

Community Outcomes

Since 1 July 2004, local authorities have been required to work with their communities to develop Community Outcomes. Community Outcomes are 'results' that the community desires/requires for their benefit.

In preparing the community outcomes listed below, the Council has relied on the following:

- ▶ A conversation with the Malvern Rural Community (May 1998 – Malvern Community Needs Group).
- ▶ Social Needs and Community Resources in Eastern Selwyn (November 1999).
- ▶ Economic Development Strategy (August 2000).
- ▶ The Community Values Survey (November 2001 – Future Path Canterbury).
- ▶ The Community Profile and Trends Analysis (May 2002 – Future Path Canterbury).
- ▶ Selwyn Central Community Needs Analysis (May 2003 – Selwyn Central Community Board).
- ▶ Canterbury Vision – weaving together people places and opportunities (February 2004 – Future Path Canterbury).
- ▶ Future Selwyn Forum (November 2003).
- ▶ Selwyn Youth forums held in Darfield, Leeston and Lincoln (March 2004).
- ▶ Selwyn District Plan.
- ▶ Water and Waste Water Activity Management Plans (April 2006).
- ▶ Roothing Asset Management Plan (April 2006).
- ▶ Waste Management Plan.
- ▶ Township surveys to date in Tai Tapu, Arthur's Pass and Lake Coleridge.
- ▶ Consultation survey undertaken in the Canterbury Times during May 2006.

Notes:

1. Publications listed above that do not have an organisation identified were commissioned by the Council.
2. In preparing the community outcomes from the various documents – trends, key issues etc have been identified. It is not possible to attribute any one outcome to a specific publication.
3. The Council is commencing a process of working with individual Selwyn communities to develop 'Community Plans' for each community. Over a 6-year period, the District will have a selection of 'Community Plans' from which a selection of community outcomes will have been identified. The identification of these outcomes will allow the Council to either provide or source the appropriate services, which the Selwyn community believes will benefit them in the future. In addition the Council will continually seek to identify and report to the community on the suggestions for community outcomes that come to its attention.
4. Future Path Canterbury is the brand name for the group of Christchurch City, Environment Canterbury, Waimakariri District, Hurunui District, Kaikoura District, Ashburton District and Selwyn District Councils, working together to develop community outcomes from a regional perspective in an effort to avoid duplication of resources.

5. Community Outcomes are those goals/objectives that the Community has identified through a variety of sources. The attached outcomes are the 'Key Outcomes' that have been identified by the community that reflect the majority of the Communities' Goals/Objectives. For each of the Key Outcomes, the Council has identified Key Performance Indicator(s) (KPIs) that will allow the Community to measure performance in achieving the Outcome.
6. It must be noted that the Council is not solely responsible for achieving Community Outcomes. On the following pages, the Council has identified its role in achieving Community Outcomes and those organisations that will assist the Community in achieving Community Outcomes. One of the key challenges for the Council is to encourage Government Agencies (that in April 2006) have a minimal presence within the District to increase their presence in achieving those Community Outcomes for which they have a responsibility. For these Community Outcomes that the Council has responsibility for, the relevant Council Significant Activity are listed on the attached pages. Within each Significant Reporting Statement, included in this document, the plans or actions that the Council will undertake are listed with appropriate Performance Measures listed.

Community Outcomes

Community Outcomes are grouped into 4 main types, Environmental, Social, Economic and Cultural.

Environment					
Key Community Outcomes	The Council Will (Council role is in Bold)	Key Reporting Document	Key Performance Indicator (KPI) from Reporting Document	Relevant Significant Activity	Assistance Will Be Sought From
