Driving in the rain and on wet slippery roads.

So often after a spell of fine weather, we get periods of heavy rain, much of which does not drain away quickly because the ground is still very hard. Drains at the side of the road also often get blocked by leaves and debris and this can cause temporary flooding.

Darfield

It is very important in wet weather to keep your speed down, and keep extra watch for pedestrians, cyclists and motorcyclists. Always indicate and use your lights on the dip setting. Park lights only minimally improve visibility in wet weather and should not be used unless your vehicle is parked.

Stopping distances nearly double on wet roads. When you're driving you should:

- slow down and keep a generous following distance between you and the car in front
- be extra careful and take corners slower than usual
- pay attention to road signs warning of flooding and remember that you will need more time to stop and avoid all hazards in wet conditions.

The two-second following distance rule should become the four-second rule in wet conditions.

Looking for funding for yourself or your group?

Selwyn District Council provides funding at a ward level to support groups and individuals whose work helps improve community wellbeing in Selwyn. Supporting people to reach their goals such as representing the district (at regional, national or international competitions), or carrying out volunteer work can benefit Selwyn district in a variety of ways, for example through having access to sports coaching, mentoring or through volunteer service to the district.

We are now inviting applications for funding. If you know anyone who may benefit from this funding please visit www.selwyn.govt.nz/council-info/community/funding to find out more. If you wish to discuss this please contact Marilyn Ponsford at selwyn.govt.nz or phone (03) 347 2710.
