## **Precautionary Boil water notice lifted for Arthur's Pass Water Supply**

Residents connected to the Arthur's Pass water supply are advised they no longer need to boil water.

A boil water notice was issued for this supply for turbidity as rainfall disturbed the water supply intake. When a water supply shows high turbidity, water treatment methods cannot be guaranteed to be effective.

The water supply turbidity levels have now lowered which means the treatment systems can operate effectively. The water is safe to drink without boiling.

The Council wishes to thank residents for their patience while the notice was in place.
