Further comments:

I wish to discuss the concept of an ice rink in the District. I come from a background in professional engineering, project management and have the build costs from other rinks eg GoreDC and Dunedin CC have completed. I am an active ice hockey player so I know how ice sports are run and I was also on the Dunedin Ice

Sports board for a time. This model is perfect to replicate for SDC where the building is owned by the Council but the sports stand by themselves (Curling, figure skating and ice hockey) to run the rink. The Canadian model is to build two rinks for every pool to take advantage of the heat exchange where with heating the pool you get free ice. In addition, I have run world events in Dunedin that the Olympic committee fund, these are hugely beneficial to the community. ice sports users in the city are frustrated there is no ice time so there is easily room to attract more to Selwyn
