I approve the proposed Plan Change. (Please alter your response as required).

I/We seek the following decision from the Council for the following reasons:

- Existing Porters Ski Area needs to be upgraded;
- This would be great to ensure Porters remains viable;
- It would be great if New Zealand had the type of on mountain facility you can get overseas;
- It would be great if we did not have to use our mountain access road;
- This will bring thousands of tourists to the mountain and the Canterbury region;
- This would be a great experience for New Zealanders and overseas skiers;
- This allows lots more people to get the enjoyment from accessing Crystal; and
- This will bring jobs into the Region.

I disapprove of the plan change

I/We seek the following decision from the Council for the following reasons:

This is the headwater of a fragile river system. There is no need for large scale accomodation on the mountain and the castle hill area has been developed to fulfil this need. Careful low impact development of ski facilities would be appropriate. Land should not be freeholded in a conservation area.

I/We seek the following decision from the Council for the following reasons:

A ski area like this will be a great resource for Canterbury and Selwyn District in particular. As a resident at Castle Hill Village, it would provide a realisation of the dream which the villagers have hoped for for 30 years.

It will provide employment opportunities for local residents and the young as an alternative to seeking work opportunities overseas.

Crystal Valley was the intended original site for this ski field, and it would be wonderful to see the vision fulfilled.

This is our families preferred ski field, as it is so close to the West Coast. Our school had a bi-annual ski camp to this skifield. The environment is very spectacular and I would enjoy the opportunity to mountain bike and walk in the environment here... There are few facilities between Springfield and Arthurs Pass and this development would add capacity in this area, without too much adverse impact on the environment. Many West Coasters travel from the Coast to Christchurch to work, shop and play and educate their children, this adds to the Coasters lifestyle choices,,,

I approve the proposed Plan Change. The proposed plan would provide a multitude of environmental, social and cultural benefits to the Canterbury region. It would also increase competition within the local ski industry and hopefully encourage other competitors to act in a manner that would have a positive multiplier effect for the region.

My family and I have just started snowboarding I,m 35 years old so starting late...It take 1.5 hours from where we live to get to porters so thats 3hrs drive each day we go on top of that a full days skiing or snowboarding and it takes a lot out of you then your paying for petrol to and from Christchurch ....my point is it would be nice to be able to take a week off and stay right on the mountain where you can get up and go down and rest in a few minutes and not hours ...and have the kind of ski resort that we see on the movies and expect .."that is what a ski resort is" no what is currently here at the moment...

I approve the proposed Plan Change. We need better ski areas. A european style ski village would increase tourism and bring money into the community.  
I/We seek the following decision from the Council for the following reasons:  
- Existing Porters Ski Area needs to be upgraded;  
- This would be great to ensure Porters remains viable;  
- It would be great if New Zealand had the type of on mountain facility you can get overseas;  
- It would be great if we did not have to use our mountain access road;  
- This will bring thousands of tourists to the mountain and the Canterbury region;  
- This would be a great experience for New Zealanders and overseas skiers;  
- This allows lots more people to get the enjoyment from accessing Crystal; and  
- This will bring jobs into the Region.

in attachment.

[http://www.skiporters.co.nz/uploads/1283817626\\_porters  
submission.doc](http://www.skiporters.co.nz/uploads/1283817626_porters<br/>submission.doc)

I/We seek the following decision from the Council for the  
following reasons:

*The relief sought is:*

To change the applicable objectives, policies, rules and other methods of the Selwyn District Plan in a manner that will:

- Provide for the expansion and upgrading of the Porter Heights Ski Area along the lines of the proposal behind the Plan Change
- Ensure that modification of Conservation Estate is kept to the minimum extent and area necessary to accommodate the proposed upgrade
- Protect the conservation and ecological values of the site of the proposal to the maximum extent practicable and provide an adequate environmental compensation package to off-set any loss of such values that cannot be adequately avoided or mitigated. Examples of such compensation could include, but would not be limited to pest eradication and habitat restoration in surrounding areas.
- Ensure that all sewage and waste is treated and disposed of in a manner that has no adverse effects on soil or water quality
- Require construction activities to be undertaken in a manner that prevents sediment or contaminant runoff into waterways
- Require sealing and runoff treatment for access roads
- Ensure complete revegetation, with appropriate native vegetation, of disturbed areas as soon as practicable
- Maintain, to the extent practicable, public access to Conservation Estate affected by the proposal.
- Provide for reduced-price family, club, group and school concessions for ski passes, in order to compensate for any loss or restriction of public access and to ensure that all socio-economic groups can enjoy the benefits of the proposal to their social and cultural wellbeing
- Ensure the character of buildings and plantings is such that it is appropriate for the ecological and natural character values of the area.

### *Reasons*

If undertaken in a sensitive, ecologically appropriate and accessible manner, this project has the potential to enhance greatly the ability of the people and communities of Christchurch, Canterbury and New Zealand to provide for their social, economic and cultural health and wellbeing. Although certain adverse effects on amenity and natural character are inevitable, if the appropriate controls and compensation are required, these effects will be mitigated and off-set by the positive effects of the proposal, to the extent required by Part 2 of the Resource Management Act. In particular, it seems likely that the proposal will provide great benefits in terms of:

- Increased foreign revenue from Australian tourism
- Increased revenue from higher numbers of domestic visitors
- Flow-on economic benefits for the Selwyn District from the construction and operation phases
- Further economic benefits for the wider Canterbury Region, including Christchurch and Christchurch International Airport
- Benefits to the social wellbeing and health of Christchurch and Canterbury residents from improved access to better alpine sports facilities

- An efficient and more sustainable use of existing infrastructure by being located close to Christchurch and surrounding towns with their existing major transport and tourism accommodation/facilities
- Improvements to the safety of users of the ski-field by eliminating the risks associated with the use of the currently unsealed and potentially unstable access road.

Subject to the relief sought, the changes will render the rules, policies and objectives as amended a more appropriate means of implementing Part 2 RMA than the current zoning, which fails provide sufficiently for the additional benefits that would flow from a development along the lines proposed.

I approve of the proposed plan change: Yes

Submission:

I approve the proposed Plan Change. I have been skiing at Porters for 40 years and seen many companies fail to make a go of it. This is, I believe, a fantastic chance to finally get a viable ski field operating so close to Christchurch, with wonderful safe access. If DOC is involved then what an opportunity for DOC to fulfil its obligation to provide recreational opportunities for people in the way people want and at the same time be supporting boosting the local economy. Encouraging more people to get into the alpine environment in this managed way can only be positive. Let's say YES to this development!

I/We seek the following decision from the Council for the following reasons:

- Existing Porters Ski Area needs to be upgraded;

- Existing Porters Ski Area needs to be upgraded;
- This would be great to ensure Porters remains viable;
- It is imperative to the growth of the New Zealand Winter Tourism industry to have the type of on mountain facility you can get overseas;
- It would be great if we did not have to use our mountain access road;
- This will bring thousands of tourists to the mountain and the Canterbury region from all over the world;
- This would be a great experience for New Zealanders and overseas skiers;
- This allows lots more people to get the enjoyment from accessing Crystal; and
- This will bring jobs and necessary positivity into the Region.

Submission:

I approve the proposed Plan Change. It would be fantastic for the area and the people who recreate in the Castle Hill basin.

I believe it is a possitive move forward for this region and is long overdue for something like this to happen here.

Access to the terrain should be allowed as much as possible by D.O.C as this is public owned land and will be more utilized and accessed by the new zealanders who choose to use it.

I absolutely support this project and hope to see it happen ASAP.

I/We seek the following decision from the Council for the following reasons:

- Existing Porters Ski Area needs to be upgraded;
- This would be great to ensure Porters remains viable;

9 September 2010

**Selwyn District Council  
PO Box 90  
Rolleston 7643**

Dear Sirs

## **RE: PORTERS PROPOSED EXPANSION**

The NZ Snowsports Council (NZSC) is an umbrella body representing the following organisations:  
Ski Areas Association NZ (Commercial Ski Areas, Club areas and suppliers)  
NZ Snow Industries Federation (importers, wholesalers, retailers/rental outlets)  
Snow Sports NZ (Competitive snowsports organisations)  
NZ Mountain Safety Council

The NZSC was established in 1988 to encourage increased participation in snow sports for New Zealanders and overseas visitors of all ages and abilities. Our vision: Growth in snow sports for all – snow for life

Growing participation in snowsports and recreation has been and continues to be the NZSC's aim on behalf of its member organisations. We all have a vested interest in this aim.

The industry measures its growth by seasonal ski area visits (number of lift passes sold). In 1988 commercial ski areas achieved 616,000 ski area visits. In 2009 ski areas achieved 1,536,000 (record for the industry) ski area visits.

Investment by ski areas has proven that growth is eminent and will continue. The increase in ski area visits and resulting growth over the past 22 years is a result of the following:

1. Investment in lifts, snowmaking and customer services
2. Increased and improved marketing (collective and individual marketing budgets)
3. Improved access to ski areas - main highways and mountain roads
4. Advent of snowboarding and other snow sports such as free skiing
5. Increase in the Australian market – eg direct flights into the southern lakes area

The NZSC and its member organisations have supported industry members throughout this period as we know investment in new developments help achieve our vision and aim.

The Porters Proposed Expansion is a great example of a new development which will generate further growth in snow sports and recreation in NZ and the Canterbury region.

### **1. Investment in lifts, snowmaking and customer services**

The Crystal Valley development and Porters Basin upgrade with new lifts, snow making, village and state of the art customer services will result in further snow sports growth making Porters a very viable and attractive destination equal to any snow sports destination anywhere in the world.

### **2. Increased and improved marketing (collective and individual marketing budgets)**

The increased growth highlighted above has occurred mainly in the Southern Lakes Region (Queenstown and Wanaka) and Mt Ruapehu Region. Both regions have the benefit of two or more large developed ski areas strengthening each region's attractiveness as a snow sports and recreation destination.

The Porters expansion will provide Canterbury with two large developed ski area destinations as well. Canterbury will be seen as a more attractive destination for snow sports and recreation. It will be on the same level as the Southern Lakes and Mt Ruapehu regions both experiencing huge growth in the past two decades. From a marketing point of view Canterbury can be marketed much more strongly off shore in Australia particularly and in the North Island on the same basis offering two well developed and accessed ski area destinations.

### **3. Improved access to ski areas - main highways and mountain roads**

The access to Porters Ski Area has always been good with a main and well maintained sealed highway servicing Canterbury and the West Coast with a short ski area gravel road to Porter's ski area car park and lifts.

The Porters expansion improves the current access considerably with the addition of a short tar sealed road to the village and gondola accessing the chairlifts in Porter's Basin and Crystal Valley.

Improved access to any ski area results in increased growth especially in present and future times where participants want to arrive at destinations as quickly, efficiently and safely as possible. Examples of how growth is enhanced by improving access to ski areas include the sealed road to Coronet Peak only 25 minutes from Queenstown, sealing the Crown Range Road (including barriers) has increased Cardrona's visits out of Queenstown, sealed roads at Turoa and Whakakapa at Mt Ruapehu. Interestingly the four ski areas mentioned have experienced the most growth of any of our commercial ski areas in NZ.

### **4. Advent of snowboarding and other snow sports such as free skiing**

Snowboarding has helped the industry increase participation in snow sports over the last 15 years. Currently 38% of ski area visits are snowboarders.

It is widely known world wide that snowboarders do not like surface lifts such as t-bars, platters and tow ropes. Surface lifts are hard to ride and they find chairlifts much easier being elevated off the snow.

The Porters expansion with new chairlifts in the Porters Basin and Crystal Valley will enable further growth attracting more snowboarders to the ski area. Ski areas serviced by chairlifts have more snowboarders participating.

### **5. Increase in the Australian market – eg direct flights into the southern lakes area**

The Australian tourism market is the most important off shore market we have annually and this includes winter. Numbers out of Australia for snow sports have increased dramatically since direct flights started into Queenstown. We are now attracting 80,000 Australians a year for snow sports and with increased marketing efforts this figure can continue to grow.

Christchurch being our second largest international gateway and having many more international flight arrivals than Queenstown is in a perfect position to handle more Australian visitors in winter. The Porters expansion will attract more Australians to Christchurch and being only a short distance from the ski area and village is ideally placed from an access point of view.

I am very happy to attend any planning hearing regarding the Porters Expansion to expand on these points.

Yours faithfully

**Miles Davidson**  
**Executive Director**

I approve of the proposed plan change: Yes

Submission:

I am support of the proposal by Porters, as like many a recreational skier, I believe that further development of ski field opportunities, not just for locals but as well International visitors, such as myself, would be beneficial to the ski industry, tourism and economy of NZ. I believe also that the opportunities to actively promote Porters as a high end destination would not detract from but in fact add to the appeal of the region and therefore have significant benefits to the local region.

Having viewed the documentation provided by Porters in support of its application and based on my experience as an environmental manager with the Tasmanian EPA, let alone as a ski tourist to NZ on 6 previous occasions, I believe the proposal has been designed to be environmentally sustainable, reduce environmental impacts (ie. use of the existing road) and can be developed with appropriate protection of the NZ alpine environment.

To have such an experience as is proposed would be unique in NZ and this is one of the huge benefits it would offer to both NZ and international visitors. The employment opportunities by such a development also should be viewed as a positive factor in approving such a proposal.

It is some years since I have visited the Cantebury and Selwyn skifield regions, but I am certain that such a development would actively encourage me to return to holiday in this area in future.

I/We seek the following decision from the Council for the following reasons:

- Existing Porters Ski Area needs to be upgraded;
- This would be great to ensure Porters remains viable;
- It would be great if New Zealand had the type of on mountain facility you can get overseas;

- It would be great if we did not have to use our mountain access road;
- This will bring thousands of tourists to the mountain and the Canterbury region;
- This would be a great experience for New Zealanders and overseas skiers;
- This allows lots more people to get the enjoyment from accessing Crystal; and
- This will bring jobs into the Region.

I approve of the proposed plan change: Yes

Submission:

I approve the proposed Plan Change as I think it would be an amazing opportunity to increase tourism in the Canterbury region as well as take porters into a worldwide spotlight as a great winter destination, on par with resorts in north America and Europe. It will also provide increased jobs opportunities in the local area.

With Christchurch airport not far away and a common direct destination from both New Zealand and Australian main city centres, I think the proposed plans would make Porters a easy choice to make for a winter ski holiday.

I/We seek the following decision from the Council for the following reasons:

- Existing Porters Ski Area needs to be upgraded;
- This would be great to ensure Porters remains viable;
- It would be great if New Zealand had the type of on mountain facility you can get overseas;

Submission:

I approve the proposed Plan Change. Sustainable development is to be encouraged where it will encourage a wide cross section of the New Zealand public to actively engage in outdoor recreation. This proposed development will do just that, will have a nil, to positive effect on the conservation of the flora and fauna of the area, as well as providing an economic stimulus in a area of teh country that is in need of jobs. further, the development will encourage competition in the upper end snow resorts market that is currently dominated by NZSki in Canterbury. Their undertaking to facilitate all forms of alpine recreation and conservation is admirable and should be encouraged as a way for New Zealand to leverage its Conservation values in a sustainable and enonomically viable manner.

I/We seek the following decision from the Council for the following reasons:

- Existing Porters Ski Area needs to be upgraded;
- This would be great to ensure Porters remains viable;

Submission:  
I approve the proposed Plan Change.

I/We seek the following decision from the Council for the following reasons:

The development of this type of facility at Porters Ski are would be a huge boon for the Canterbury Region. The development would allow greater ski days at Porters due to the ability to easily access more snow sure terrain. This, plus the expansion of the ski area, made possible by this plan change, would make Canterbury a real ski-holiday destination, (with the existing facilities at Mt Hutt) and increase employment opportunities. In addition, the removal of the need for an access road would make the ski area safer, more sustainable and more attractive for overseas visitors.

Submission:  
I approve and support the proposed Plan Change. (Please alter  
your response as required).

I/We seek the following decision from the Council for the  
following reasons:

- Existing Porters Ski Area needs to be upgraded;
- without an upgrade the future viability of Porters as a ski  
area is unfinancial
- without an operational ski field the existance of the Porter  
Heights Ski Club totaling some 300plus members would cease and  
would be a huge loss to the future generations of Canterbury  
skiers
- It would be great if New Zealand had the type of on mountain  
facility you can get overseas;
- It would be great if we did not have to use our mountain access  
road;
- This will bring thousands of tourists to the mountain and the  
Canterbury region;
- This would be a great experience for New Zealanders and  
overseas skiers;
- This allows lots more people to get the enjoyment from  
accessing Crystal; and
- This will bring jobs into the Region.

Submission:

I approve the proposed Plan Change. I think it is a fabulous step in the right direction to further promote and grow the ski industry in New Zealand. Porters is easily accessible from Christchurch, providing a fantastic opportunity to link into the lucrative Australian ski market. Australians are used to ski-in-ski-out facilities and we are now competing with Japan for our share - we need to improve our facilities and image - this is a great step in the right direction.

I/We seek the following decision from the Council for the following reasons:

- Existing Porters Ski Area needs to be upgraded;
- This would be great to ensure Porters remains viable;

Submission:

I support the proposed Plan Change. I am of the view that this is the best use of the land in question and the positive economic benefits to the District both from construction and operation of the development in question, will significantly outweigh any perceived detriment.

I/We seek the following decision from the Council for the following reasons:

New Zealand is lacking the sort of complete experience ski resort that can be found in so many countries. There is a real future in our district to draw destination tourists to stay at a facility where skiing doesn't have to be accompanied by hours of difficult driving each day to and from the field from off site accommodation. It is my view that the proposal will create significant economic growth and new jobs for our district. At a time when businesses willing to invest in development and job creation are hard to come by, Selwyn should embrace this opportunity.

- This would be great to ensure Porters remains viable;  
- It would be great if New Zealand had the type of on mountain facility you can get overseas;  
- It would be great if we did not have to use our mountain access road;  
- This will bring thousands of tourists to the mountain and the Canterbury region;  
- This would be a great experience for New Zealanders and overseas skiers;  
- This allows lots more people to get the enjoyment from accessing Crystal; and  
- This will bring jobs into the Region.

I approve of the proposed plan change: Yes

Submission:

I approve the proposed Plan change if it is approved on the basis of environmental improvements such as the planting and maintenance of beech forest in the vicinity, and that visual impact of any buildings from the main highway is minimised or eliminated.

I/We seek the following decision from the Council for the following reasons:

- It would be great if we did not have to use a mountain access road;
- This will bring thousands of tourists to the mountain and the Canterbury region;
- This would be a great experience for New Zealanders and overseas skiers;
- This will bring jobs into the Region.

I approve the proposed Plan Change.

For too long NZ and international ski tourists have had fairly limited options when it comes to a truly international alpine village and ski area.

I/We seek the following decision from the Council for the following reasons:

This is a great opportunity to provide a truly international resort option to both NZ and international visitors. Lets push to offer an alpine resort that really is a leader in this country. The Porters area has a great climate for ski conditions and is located in one of the most beautiful regions in the country.

In summation:

- Existing Porters Ski Area needs to be upgraded;
- This would be great to ensure Porters remains viable;
- It would be great if New Zealand had the type of on mountain facility you can get overseas;
- It would be great if we did not have to use our mountain access road;
- This will bring thousands of tourists to the mountain and the Canterbury region;
- This would be a great experience for New Zealanders and overseas skiers;
- This allows lots more people to get the enjoyment from accessing Crystal; and
- This will bring jobs into the Region.
