.....

REVERSE SENSITIVITY EFFECTS

Policy B3.4.19

Ensure new or upgraded road infrastructure and new or expanding activities, which may have adverse effects on surrounding properties, are located and managed to mitigate these potential effects.

Policy B3.4.20

Protect existing lawfully established activities in the Rural zone from potential for reverse sensitivity effects with other activities which propose to establish in close proximity.

Explanation and Reasons

Policy B3.4.19 and B3.4.20 manage reverse sensitivity effects in the rural area. Policy B3.4.19 requires a resource consent for activities to set up which are likely to affect surrounding properties. This gives an opportunity for affected parties to participate in the consent process and for the Council to ensure those effects are mitigated to a satisfactory level. The policy also acknowledges that new roads and the upgrading of transport infrastructure needs to be managed to mitigate reverse sensitivity effects.

Policy B3.4.20 protects activities which are established from potential reverse sensitivity effects caused by potentially incompatible activities locating close to them. The most common activity is erecting houses. Other potentially incompatible activities include: restaurants; schools; and other forms of residential or visitor accommodation. This policy is necessary to enable established businesses to operate efficiently and with some certainty, and to avoid creating unpleasant living environments for people. The most common tool to mitigate reverse sensitivity effects is to maintain appropriate buffers or separation distances between activities. However, there may be other methods which can be used to avoid reverse sensitivity effects.

Part B, Section 2.1 Transport contains specific policies to manage reverse sensitivity effects with transport routes.

TEMPORARY ACTIVITIES

Policy B3.4.21

Provide for temporary activities associated with community based as well as non commercial events or those that are necessary for construction purposes, provided associated short term adverse effects on the environment are appropriately managed.

Explanation and Reasons

Policy B3.4.21 provides for a range of temporary activities, most of which are encompassed within the Plan definition. These activities include construction activities to recognise the necessary effects associated with these activities during the temporary construction of buildings and structures. They also include a range of other activities undertaken for limited durations, which are primarily focussed on community related activities rather than temporary commercial or retail activities. There are can be benefits to the District from allowing temporary community activities particularly where within the Plan frequency limits and typically the positive community effects of these activities outweigh any temporary adverse effects. which are managed through the limits imposed.

QUALITY OF THE ENVIRONMENT – ANTICIPATED ENVIRONMENTAL RESULTS

The following environmental results should occur from implementing Section B.3.4:

- Variation in activities in the rural area on the Plains.
- Activities on the Port Hills and in the high country remain predominantly farming, forestry, outdoor recreation and holiday accommodation.
- Buildings are low rise (1 or 2 storey) and surrounded by vegetation cover rather than hard standing.
- Utilities are made of low reflective materials.

- Outdoor signs advertise local events, products or information.
- New airfields are not located too close to houses.
- Nuisance effects may occur from time to time from temporary or seasonal rural activities, but these effects should be mild and typical of the rural environment.
- Buffer zones are maintained between residential activities and activities with which they may be incompatible.

QUALITY OF THE ENVIRONMENT — ANTICIPATED ENVIRONMENTAL RESULTS

The following environmental results should occur from implementing Section B3.4:

- Townships develop with zones of distinctive character.
- Living zones maintain a quality of the environment and amenity values compatible with residential areas.
- Most new residential activities occur in Living zones, with some higher density living areas in Business 1 Zones.
- Any new residential activities in Business 2, 2A and 2B Zones or the Business 3 Zone are ancillary to other activities in the zone.
- Increases in the variety of small scale businesses and other non-residential activities in Living zones.
- Business 1 Zones have more variety in activities and associated infrastructure.
- Business 1 Zones are attractive places for people to visit, work in or reside in.
- Lower standards of aesthetic and amenity values are maintained in Business 2, 2A and 2B Zones.
- The Business 3 Zone remains dominated by specialist research, education and associated activities.
- No increase in 'reverse sensitivity' issues in townships.
- Occasional short term effects associated with temporary activities with a level of adverse effects appropriate to the surrounding environment.

CROSS REFERENCING

The table below cross-references the rules in this section with objectives and policies in the Plan. There may be other objectives or policies in the Plan (which are not listed in the cross-reference table) which will apply in some cases. The cross-reference table does not limit the application of any objective and policy in the Plan to the rules with which it is cross-referenced; and it does not preclude the consent authority from considering any other relevant objective or policy in the Plan, when making a decision on a resource consent application. Any person making a resource consent application is advised to read all the objectives and policies in Part B of the Plan.

10.10 ACTIVITIES AND HOURS OF OPERATION

Permitted Activities – Activities and Hours of Operation

10.10.1 Any activity, which is not a residential activity, shall be a permitted activity if the following conditions are met:

Discretionary Activities – Activities and Hours of Operation

10.10.2 Any activity which is not a residential activity, and which does not comply with Rule 10.10.1 shall be a discretionary activity.

Reasons for Rules

....

Scale of Activities and Hours of Operation

Rules 10.9 and 10.10 ensure non-residential activities in Living zones operate at a scale and in a way which are compatible with residential activities. The rules set maximum limits for permitted activities. Activities which do not comply with the rules may still be able to occur in Living zones, through a resource consent for a discretionary activity, if the effects are compatible with residential areas and consistency is achieved with the relevant objectives and policies of the Plan

The numbers listed in Rules 10.9 and 10.10 are not ‘magic’ numbers. Rather, they are based on the scale and nature of effects normally associated with households and residential activities.

The rules do not apply to residential activities. Residential activities are an integral part of Living zones so, by nature, are compatible with the amenity values of residential areas or Living zones. It is not the consent authority’s intention, for example, to require people to obtain a resource consent for a party generating more than 20 (Local Road) or 40 (Arterial Road) vehicle movements over the course of an evening, beyond 10.00 pm. Special provisions and exemptions have been made for **Temporary Activities**, spiritual activities, Police stations and educational activities, including schools, recognising the reality in size of buildings associated with such activities, their role within the community and the times of the days they can be utilised.
