Wastewater Treatment Pipeline Construction

What	Construction of the new Darfield and Kirwee to Pines Wastewater Treatment Plant wastewater pipeline
Where	Courtenay Road and SH73
When	Ongoing
Why	To connect the upcoming Darfield and Kirwee reticulated wastewater systems to the Pines Wastewater Treatment Plant
Contact	Corde Project Manager Fintan Harvey (027 294 7764)

We are writing to give you an update on current works on Courtenay Rd.

We have completed the pipe installation along Courtenay Rd to Adelaide St, reinstatement of the road and berms is still to be complete. The next stage of the project includes laying pipe under the rail lines towards SH73 and along SH73 to the new Kirwee Pump Station Site.

While we are working under the rail Courtenay Rd will be fully closed from the rail lines to SH73. Access to properties on Courtenay Rd will be via Bealey Rd/Courtenay Rd detour. Courtenay Rd between Miles and the rail lines will be fully open. There will be pedestrian access from Courtenay Rd to SH73

Works will be continuing on SH73 at the same time. SH73 will remain open at all times, however there will be reduced speeds and traffic lights for part of the work, so delays are expected.

There may be a period of time between the end of the Courtenay Rd works and the start of the Kiwi Rail works. During this time we will open up Courtenay Rd to traffic. Please be aware that it will be shut again between SH73 and the rail lines once work commences and you will receive a notice ahead of the closure.

We apologise for any inconvenience this may cause and thank you for your patience as we carry out these works. Further information about this project and a live map of the construction can be found at selwyn.govt.nz/darfieldkirweewastewater.

The contractor for this work is Corde Ltd. If you have any questions please contact Fintan Harvey (Project Manager) on 027 294 7764, or the Council Water Services team on 0800 SELWYN (735 996) or email contactus@selwyn.govt.nz.

Thank you
