Like · Reply · Message · 3w

Jens Christensen 0 rates rises don't make a lot of difference. What does is trimming surplus staff and the proper tendering of works contracts instead of handing them on a plate to Sicon/Blakely.

Like · Reply · Message · 3w

5

Eddie Clark Jens Christensen A rates rise is not needed as there is so much development in Selwyn for housing, offices and factories which is generating millions upon millions new revenue.

Selwyn is a highly desirable place to live. Very sadly Selwyn Council do not protect the Selwyn environment at all well. In addition Environment Canterbury constantly make the comment they are under resourced in staff and financing. What would be welcome is to ensure the council becomes much more efficient instead of the slow cumbersome organisation it has become

Like · Reply · Message · 3w · Edited

1

Eddie Clark I would really like to see Selwyn Council and Environment Canterbury get their real weight behind the proposed waste plant extension. Speak up for Selwyn, it's villages and environment by every means possible including using the District plan

Like · Reply · Message · 3w

Mike Moulin They have a bloody nerve to increase rates, with people being laid off, or hours cut back.

Like · Reply · Message · 3w

John Nigel Shirtcliffe 0 rate rise this year

We're reviewing the level of rates increase.

The COVID-19 pandemic has had a profound impact on our lives.

In the Draft Annual Plan we are reviewing the rates increase to ensure we make the right decision for our community and we want to know what you think.

We had originally proposed an average 3.5% increase in line with our Long-Term Plan 2018-2028, but we're now considering options to reduce this, or to freeze rates at this year's level.

John Nigel Shirtcliffe Hope you are not doing the ccc trick paying a lot of your people \$ 1000 k a year if you are it's time to cut there wages .most of the rates will be going on wages .

[Like](#) · [Reply](#) · [Message](#) · 3w

👍 🗨️ 5

Mark Alexander I can assure you John Nigel Shirtcliffe that no-one at the SDC is paid \$1000K per year.

I don't have the salary banding for staff.
The Chief Executive has just been reappointed and agreed to a cut in his salary.

Getting and keeping good staff requires that an organisation pays competitive salaries. It costs more to pay a consultant when one hasn't got the expertise in-house.

[Like](#) · [Reply](#) · [Message](#) · 3w

👍 3

Anne Thompson I think he meant 100K. Is anyone earning that Mark?

Like · Reply · Message · 3w

2

Hannah Mackay Anne Thompson yes they are it's in the annual report and how about how many staff are not currently working and on full pay

Like · Reply · Message · 2w

Anne Thompson So that was a smartarsed reply from the councillor then, who knew full well what John meant.

Like · Reply · Message · 2w

1

Jens Christensen It is not so much whether the odd person is considered to be receiving too much salary, it is a matter of ensuring that all positions are necessary and that those that are employed are producing a full 40 hours. Another saving to be made is to ensure that civil works are tendered and not handled to Sicon/Blakely on a plate.

Like · Reply · Message · 2w

3

Lucy White John Nigel Shirtcliffe as per the 18/19 annual report SDC has 468 employees, with 200 FTE and 46 earning 100k or more (with 3 earning more than 220k). Assuming that all those that earn 100k + are FTEs then that's 1 in 4 full time employees that earn 100k or more. I don't have the figures for 19/20 as these are not available on the council website yet.

Like · Reply · Message · 2w

John Nigel Shirtcliffe Lucy White it takes a lot of rates to pay that amount of money each year

Like · Reply · Message · 2w

Lucy White John Nigel Shirtcliffe apologies I miscalculated, it's 41 not 46 employees earning 100k or more in FY 18/19. 47 employees of the council earned 80-100k, so it is a reasonable deduction to assume that some of these may have crossed the 100k threshold in FY 19/20. And yes, that is a fair amount of rates.

Like · Reply · Message · 2w

John Nigel Shirtcliffe Lucy White that's ok but it's still a lot of money spent on wages in the trying times we are going through hope they look twice about the money they spend on some of there pet project's. I bet they would be more cearefull if it was there money . There are a lot of people that have lost there jobs or getting a lot less hurs the rates have been going up and up quite a lot each year and a lot more homes beeing built and thay are adding to the pool of rate money

1

Misha Baxter Kathryn doesn't sound like 3.5% increase 🤔

Like · Reply · Message · 3w

Joanne Kenure The rates over the last few years have gone up massively and a lot of people have been finding it harder to pay. Council needs to stop spending and reduce our rates to make it more manageable for everyone. Yes roading is important. So is our water supplies. You say we don't pay for our water. Well 2 charges say we do. One is upkeep the other is usage. I sincerely hope that foreign countries are still not taking our water

Like · Reply · Message · 3w

2

Jill Gordon Reduce rates.... go back to basic infrastructure spend and maintenance - bread and butter items.... and remove all the cake and icing items please.... if we are all having to cut and reduce our outgoings SDC should be doing the same.....

Like · Reply · Message · 3w

7

Joanne Kenure **Jill Gordon** I agree with you. In these lockdown and following depression times we need to cut back and consolidate what we have and not go on splurging on things that we can't now afford. SDC should cut back on their spending and just do essentials. No new halls/libraries council buildings. No new sewerage schemes. New Zealanders need to cut back and dig in. We are going to go thru a lot of tough times with massive unemployment. Wage decreases. Fewer hours etc

We're proposing to take a pause on developing a new community centre in Prebbleton.

In the Long-Term Plan 2018–2028 we proposed developing a new community centre in Prebbleton.

Since then we've carried out consultation with the Prebbleton community, and found that although there's strong support for a new facility, there's uncertainty around the best location and type of facility it should be.

Taking more time to work with the community on planning would help us find the best long-term outcome. We want to know what you think.

We're taking another look at plans for a new community centre in Leeston.

In the Long-Term Plan 2018–2028 we proposed developing a new community centre at Leeston.

Last year we found the current Leeston Library building, which also houses the medical centre, was earthquake-prone. While the building has been made safe to use in the interim, in the long term it will have to be significantly upgraded or replaced.

We're proposing to review the original proposals to take account of local needs for library, medical and other facilities, and we want to know what you think.

We're providing for growth and demand management in our water network.

One of our essential services is to provide high quality drinking water to more than 80% of the district's population.

The network is funded through a standard district-wide rating system which includes a fixed base rate and a variable amount based on the amount of water used.

We now need to review these charges, so that we are making adequate provision for future growth and security in our water supply infrastructure network, to encourage water conservation, and to provide for any impact from the Government's Three Waters review.

We're proposing to develop a wastewater system for central Darfield.

Over the past three years we've been working with other agencies and the local community, to consider options for a wastewater scheme for Darfield and Kirwee, which do not currently have a reticulated wastewater system.

A business case assessment showed the most appropriate option was to develop a scheme for central Darfield and for any new development within the township.

We have endorsed this recommendation, and we're proposing to progress further planning and consultation for a reticulated scheme – including technical reviews of options and further community consultation.

Jens Christensen Ratepayers of Selwyn, be very afraid of this proposal as part of the schemes funding is suggested to be funded by all of Selwyn. Every other waste water scheme in Selwyn has been funded by the community that gets the benefit. I have no problems with the operating costs being funded by the District but not the capital costs. Submit your views to the annual plan, closes soon. Check councils Web site for details.

Gareth Rowlands If the majority of people in the current council, had been there for more than 5 minutes, and had any sort of ticker, rather than scratching their comrades backs to get ahead, then they would know that the rate paying residents of Darfield, already paid for a wastewater scheme that never eventuated, (notice this is conveniently negated from the current document). Why should they pay for another, they likely will never see?, and probably instead be manifested, in yet another improvement for Rolleston, the SDC "Jewel in the voting crown".

Like · Reply · Message · 1w

9

Philip Hunt Nope, don't want it don't need it. Maybe you could hold off while we all deal with your comrades consequences. Stop wasting money.

Campbell McClimont So by further community consultation, you mean you're going to tell us what you are going to do and we as the ratepayers can hit our head on a brick wall. I can't recall a time when I have ever spoken to someone in Darfield who wants this. But then this doesn't meet the business plan of someone on the council who has only got time and overpaid at that, to find ways to spend up large on something unwanted and unnecessary.

Like · Reply · Message · 1w

Sharn Nu'u When you've got fibre cables being laid, but don't have a sewerage system 🤔 #shittownofNZ

Like · Reply · Message · 1w

2

Denise Ellen Sharn Nu'u fibre cable was a directive of the central govt. Rolling it out over NZ. Most rural towns have a septic tank the cost per household to be added to your rates could be \$25k and if you rent it will be passed onto you! This cost belongs to everyone!

Like · Reply · Message · 1w

Richard Poole This doesn't make sense to me, everyone in the township already has a septic system. Where is the benefit unless Darfield is going to double/triple in size?

The cost to decommission existing tanks and connect to reticulated wastewater system will be significant for both ratepayers and homeowners. Homeowners currently have to pay for septic emptying/servicing but that would just be replaced with an annual cost for the reticulated system.

This seems like a solution in search of a problem, I've not met anyone in Darfield who is in favour of this change because we all seem to be struggling to see why it's necessary/beneficial relative to the costs incurred.

Frankly, the money would be better spent on providing community services or investments that create long-term jobs rather than creating huge infrastructure disruption that then costs local jobs by removing the need for septic tank servicing.

[Like](#) · [Reply](#) · [Message](#) · 1w

2

Trent O'Neill Why is everyone so bull headed? Just because you already have a septic system doesn't mean that the township shouldn't have a reticulated sewer system.

Darfield is a growing city and adding one of these will help with growth and also save future buildings the cost of having to add one which in turn drives further growth

[Like](#) · [Reply](#) · [Message](#) · 1w

Bianca Allen **Trent O'Neill** we pay more then enough rates which keep going up and up and up each year and have already forked out to pay for septic tanks. Council can do it but they need to budget for it and not be a cost on top of what we pay them each year. They have know about future plans of these areas which they should have budgeted for years ago. Can u afford another 10k/20k/30k on top of your mortgage,rates, food, water charges, electricity etc most households cant.

[Like](#) · [Reply](#) · [Message](#) · 1w

Richard Poole Have a look at the actual plan Trent and you'll see that the proposed areas won't help with new developments as they only intend to cover one end of Horndon St and the area by the sawmill and one side of the shops. For the cost involved, it feels like the money could be spent more wisely.

David Cruickshank Quite happy with what I have thanks.

[Like](#) · [Reply](#) · [Message](#) · 1w

Kathy Nustrini Nope don't want it, have a septic and rates bill that is already expensive enough

[Like](#) · [Reply](#) · [Message](#) · 1w

Andrea Horton-Gaskin Don't want it thanks I have a treatment system already which is as good as the reticulated system treatment and I paid handsomely for it so unless SDC refund me for that I won't be paying ANYTHING

[Like](#) · [Reply](#) · [Message](#) · 1w

Bianca Allen I recommend sending in your views to the council as they want and need to hear from you. Just did and its quick and easy to do 😊

[Like](#) · [Reply](#) · [Message](#) · 1w · Edited

Lee Brunton Yes make your views official, it is fairly quick to register and submit your viewpoint.
