Report: Summary of Submissions by Submitter Number/Name

Submitter Number:	1	**Submitter:**	Natalie Taylor
Point Number	1.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:**		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding		

Point Number	1.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [
Point Number	1.3

Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the

	beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do nothing. Use the existing park facilities and remove or replace old and unsafe items in the park. **Project cost:** Year 1: $143,000 **Estimated impact on rates:** Included in our current rates **Funding:** Rates: 100% **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1
Point Number	1.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:**
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield

Point Number	1.5
Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1.6
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Return to Sheffield community to remain open
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Submitter Number:	2	**Submitter:**	Irvin Chew
Point Number	2.7		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** I have attended a walk-in session and have lost confidence in the options presented by the council. The 3 'big decisions' is a distraction to the poor planning process that has been described to me. A real planning process would describe the need of each investment and acting on the need when it arrives. What essentially occurs now in the SDC process is basically a political stoush where whoever shouts loudest gets their project prioritised. I no longer support my decision and change my previous submission.		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP

Comments:	**Question:** Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	2.16
Category	Activity > Infrastructure DC
Comments:	The development contributions policy should look at placing higher contributions to reduce impact of rates increase. If developers want

	to make money, they need to invest more into the community infrastructure.
Staff Recommendation	The submission is acknowledged. The development contributions for all services have been reviewed and adjusted leading into the preparation of the draft LTP. This has included the introduction of a new development contribution for community infrastructure. Based on the programme of capital works, A thorough and robust process is undertaken to calculate the development contribution amount that can be fairly and reasonably applied to the growth community for a project. The calculation is made in accordance with the Council's Development Contribution Policy and the legislation that underpins the policy as well as guidelines on administering the policy.
Point Number	2.17
Category	Activity > Walking and cycling improvements
Comments:	I do not support any pet projects such as 'Rural walking and cycling improvements' which don't even tell us how much it costs nor does this process give us enough granularity to say we support it or not.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	2.19
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	The S&E section is useless, it just says it will change but doesn't say change to what specifically. I will change in ten years time, and may or may not get grumpier.
Staff Recommendation	Council acknowledges the submission and notes the concern with the level of information provided. Improvements regarding the presentation and provision noninformation will be considered for future consultations.
Point Number	2.20
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	The SDC needs to demonstrate what is a 'do-minimum' plan to reduce the impact of rates increase and general rise of cost of living

	instead of proposing pet projects. There is no evidence for 'increased' demand for a sporting facility. If you ask any community if they want something, of course they're gonna say yes....do you give a child a lollipop every time he/she asks for one?
Staff Recommendation	Submission is acknowledged by council.
Point Number	2.21
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Stop spending money. If businesses see an opportunity to expand let them spend the money.
Staff Recommendation	It is acknowledged the submitter has selected to not progress with the Economic Development Strategy and holds a view that the proposed allocation should be reduced. Councils' contribution to economic development is alongside others who are expected to contribute significantly more overall. Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. Every cent of spend will be scrutinised and planned for to ensure outcomes and returns are maximised from the spend. Action plans will outline this in detail. The $9m is over a ten-year period, and not all the proposed spend is the same across the years with the first years having a lower allocated amount. Not all the money is new with some money coming from existing budgets.
Point Number	2.22
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Learn to use an excel spreadsheet properly - I hear they are fantastic.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	2.23

Category	Activity > Other Categories identified by Staff > Consultation Document Feed
Comments:	In the walk-in, I was promised that a detailed list of projects are available under supporting documents. All I see is an outdated LTP done in 2021 which bears no resemblance to the proposed spend in the consultation document. At the end of the day, we need to prioritise renewals, safety improvements and justified growth investment (I'm talking about full on NPV business cases with options analysis). All pet projects that get the loudest voice needs to be canned. This needs to be demonstrated in the consultation process and as such I have not seen any evidence of this. I point you to to the Aurora Energy consultation document for CPP - that's what it should look like.
Staff Recommendation	Council acknowledges the submission. The supporting information was available on both our Council website (www.selwyn.govt.nz) and our Engagement Platform (www.yoursay.selwyn.govt.nz). Any questions or requests for additional information were able to be made through our facilities or call centre.

This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46

	Funding: Rates: 100% **Comment:**

Category	Activity > Lincoln Town Centre Upgrades
Comments:	Lincoln is horribly neglected but being grown at ridiculous speeds. We are bulging ubder over subscribed everything while Darfield gets disproportionate facilities & upgrades. Prebbleton Rugby Club got a huge ratepayer subsidy whike we dont have enough grounds here.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	11.14
Category	Activity > Lincoln Town Centre Upgrades
Comments:	birches and springs road upgrades are. ot even nentioned and need to be in this ten year plan. A number of upgrades aroubd Lincoln are t scheduled til 2034-38. This is a poor choice due to the large growth expected in Lincoln. The absence of Coubcillors from Lincoln is reflected in these very long dates for upgrades alongside the undustainable growth pushed into Lincoln instead if spread evenly
Staff Recommendation	An upgrade of the Springs and Birchs Road intersection to traffic signals is included in the draft LTP for 2031/32
Point Number	11.15

Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP
Point Number	12.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

	Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan, but with additional sports courts and/or bigger community meeting spaces. **Project cost:** Year 1: 19.24m **Estimated impact on rates (per year):** $53.14 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** Additional sports courts would be great for a growing community with very little infrastructure. We don't want to have to travel to rolleston for everything
Staff Recommendation	Staff recommend this submission be acknowledged. Future local infrastructural requirements have been taken into account in relation to this matter.

Comments:	we need a pool in darfield that is year round. It's ridiculous driving to rolleston for swimming lessons in the colder months. It would be used all year. Build it at rhe rec centre with the 2 new indoor courts. Like the Ashburton all in one facility. Sports groups would love it!
Staff Recommendation	Submission is acknowledged by Council. An indoor pool complex is planned as part of the Infrastructure Strategy (Yr 11). Staff support the concept of hubbing such facilities together.

Category	Activity > Other Categories identified by Staff > Rates
Comments:	I think the Council should stick to its basic work providing necessary things - sewer, water, roading, libraries etc in this present day and age. There are a significant number of older residents in the district who would struggle to meet these proposed increases not to mention struggling young families who if having to pay increased mortgages and rates won't be able to use all these new facilities anyway. When the council meets its fundamental obligations, then remaining funds can be directed to grandiose schemes. Cut your cloth to suit your purse, please.
Staff Recommendation	Submission is acknowledged by Council.

Point Number	18.6
Category	Activity > Chlorination
Comments:	Council support for the provision of a water de-chlorination station in Darfield.

Staff Recommendation	The submitters preference for locations in the community where dechlorinated water can be obtained for household use is acknowledged. Staff have investigated options and can provide modified drinking fountains/bottle filling stations with cartridge filters to remove chlorine at key community hubs across major townships in the district. Use of off the shelf products will reduce costs and allow the number of filling points to be scaled with demand. The filling points are estimated to have capital installation cost $20,000 (including concrete apron) plus $20,000 annual operational cost. Staff recommendation is that dechlorination is best achieved at a household level where costs are met by those who wish to benefit from chlorine removal.

Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear.		

	Project cost: None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** Because of the current macroeconomic conditions (high inflation, low growth) translating into high cost of living, we expect council to judiciously plan budgeting for next 3 years. Spend only the minimum required for transport and other facilities, and differ larger investments until the macroeconomic conditions are in favorable. We have started to hear layoffs and most of the households have tightened their budget to sail through the current difficult conditions, and we expect government and government bodies to do the same.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. With Councils Preferred Option the first Park N Ride at Lincoln is planned for 2026/27, while the two new Rolleston Park N Rides are planned between 2029 and 2033. It hoped economic conditions will have improved and these projects remain affordable and relevant, but Council can review this further through subsequent Long Term Plan and Annual Plan Processes
Point Number	19.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to

	Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:**
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield
Point Number	19.9
Category	Activity > Other Categories identified by Staff > Rates
Comments:	In my opinion a realistic approach to strategic thinking and acting is required. When interest rates are so high why is council focused on increasing borrowing. Various nearby councils have taken an approach on minimum borrowing/spending for next couple of years. We expect our council to be more pragmatic.
Staff Recommendation	That the submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.
Point Number	19.10

Staff Recommendation	Submission is acknowledged by Council.
Point Number	19.12
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	How do you explain $1.3million a year to explore the most effective technologies? Is council building its own IT solutions or is it just for exploring the appropriate solution? It is such a staggering price for just exploring. Costs like this isn't justifiable in these economic conditions.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process and providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Submitter Number:	22	**Submitter:**	Craig Reynolds
Point Number	22.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. Park N Ride sites need to provide a level of service that aligns with the increased bus services including bus parks, shelters of sufficient size, secure vehicle parking, bike stands, lighting and all-weather pavement surfacing. They have to be safe and follow CPTED requirements for potential 24/7 use. This type of level of service attracts increase patronage and use of bus services, which is the objective. Because of the cost of extending bus services, Park N Ride is more effective especially for direct to City services. Environment Canterbury and Council will be investigating 'On Demand' Services as another option within larger townships.
Point Number	22.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. I don't support the central hub model as it guts rural townships community assets - this needs to be treasured and supported rather than centralising. Prefer simple well maintained existing facilities rather than fancy new ones.
Staff Recommendation	Staff recommend this submission be acknowledged. Maintenance and access issues have been taken into account in relation to Whata Rau. The Community Centres, Halls and Libraries Network Plan - Sept 2021 will be reviewed in 2024 - 2027 and the revised plan will also include sports building and pools.
Point Number	22.3

Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:**

	I live in Darfield, and think the existing facilities are good at the domain. I don't see the benefit in an indoor court given that the existing rec centre appears poorly utilised. Playing outdoor builds character. Would be keen to understand where the demand comes from, as from discussions with locals I'm yet to find anyone who desperately wants it (or wants their rates to go up for it!) If the local Malvern community is prepared to fund-raise (not by rates) and co-own the management of the facility locally then I could be persuaded it is a good idea.
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	22.5
Category	Questionnaire > Matters For Community Guidance

	Question: Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	22.9
Category	Questionnaire > Policy Changes > Policy Review - Other

Comments:	I am in favour of Maori iwi/hapu engagement on issues affecting them but not special voting rights at council. The treaty does not have any concept of partnership, and partnership should be removed from the policy. This ongoing nonsense should end. We are a multi-cultural society and promoting one group over (bi-culturalism) another promotes division, not unity. Council is here for all, not to promote one group over the rest.
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognizes the importance of partnerships; building strong partnerships with iwi is vital for Council to fulfill its obligations to the entire community. Te Tiriti O Waitangi (Treaty of Waitangi) is a founding document of New Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with iwi, to have any meaning, requires consideration of iwi position and contribution to discussion/debate.
Point Number	22.10
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	The pool is a memorial to those who have gone before. There is no public transport service to Darfield for kids so saying Darfield is 10 minutes away is unhelpful for a good portion of the community. All kids should be able to learn to swim locally. All towns should have a local pool, ideally co-operatively managed with the local school to share costs. Surely a more cost-effective solution can be found. Perhaps the community could take over the running of the facility on a best effort basis with a contribution by council to running and maintenance costs.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool, and highlighted the Memorial aspects of this facility as a key Council consideration for the future of this site.

Point Number	22.11
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Its not council core business. Don't do it.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy, and holds a view that it is not core business of Council. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in Economic Development. The Council has a role in facilitating others and enabling Economic Development to occur as prosperously as possible to benefit the whole community.
Point Number	22.12
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	This should have a maybe option - I think that where there is a clear cost benefit to the ratepayer digital should be an option, but need to ensure we don't exlude those who don't do technology.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	22.13
Category	Activity > New Public Transport Services
Comments:	Transport: More affordable public transport services to other towns would be helpful - perhaps a couple of return services a day to a hub like Darfield, Rolly or Leeston? The community cars are helpful for some, but not for commuting to Christchurch regularly. If you start driving to the closest town to catch a bus its easy to keep driving. The Darfield bus is great, but one return service is a bit painful. Any pressure you can put on Ecan would be good. The $2 fares are the thing that got me out of the car most days of the week. Perhaps cut the community cars in favour of a few regular buses?

Staff Recommendation	Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service.
Point Number	22.17
Category	Activity > Walking and cycling improvements
Comments:	The cycle ways. I think the Alps to Ocean is wishful thinking and should be abandoned. Connect the major flat ground towns perhaps, along side the railway line? Gravel or compacted dirt not sealed. Do it cheap or not at all. How could communities be involved in this by providing time and materials?
Staff Recommendation	Submission is acknowledged by Council.
Point Number	22.18
Category	Activity > Planning Further Community Facilities
Comments:	I don't see in the consultation anything about the small community halls - I think all these should be retained and local communities operate or take them over with option for maintenance completed by council. Some may not be more than 33% EQ rated, but if the user group is happy they should be retained as is. I would use them more but its painful to book them - make it online and the prices transparent. (They seem high)
Staff Recommendation	The submission is acknowledged. Over the next 12 months Council will be reviewing the network of public-facing facilities across the Selwyn District (libraries, community centres, halls, sports centres and pavilions). This work will take a holistic look at all facilities to plan for short, medium and longer-term community needs. It is recognised that a number of Council owned halls and centres have an extensive history in Selwyn and it is also recognised that there are some halls / community centres that are now underutilised by the local community and may be facing large costs in maintenance and / or remediation. The review will help Council better understand issues, opportunities and barriers and to consider alternative options for the future.

	Depending on the facility, options identified in the review may include, but not be limited to, the lease or sale of facility to a community group or organisation, the repurposing of facility from a general public hire facility to a dedicated activity facility for the district, co-location arrangements, etc. The intention of Council's public-facing facilities network plan is to ensure a reasonable and balanced spread across the wider district, with facilities that are relevant to the various communities.
Point Number	22.19
Category	Activity > Chlorination
Comments:	Clorination - would be nice if council could provide one bore tap in each township for those who want unchlorinated untreated water. Perhaps this can't be done under current regs.
Staff Recommendation	The submitters preference for locations in the community where dechlorinated water can be obtained for household use is acknowledged. Staff have investigated options and can provide modified drinking fountains/bottle filling stations with cartridge filters to remove chlorine at key community hubs across major townships in the district. Use of off the shelf products will reduce costs and allow the number of filling points to be scaled with demand. The filling points are estimated to have capital installation cost $20,000 (including concrete apron) plus $20,000 annual operational cost. Staff recommendation is that dechlorination is best achieved at a household level where costs are met by those who wish to benefit from chlorine removal.
Point Number	22.20
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	Darfield Pool - great to have the redevelopment, perhaps a simple building could be constructed around the whole site to enclose and make it open year round?
Staff Recommendation	Submission is acknowledged by Council.
Point Number	22.21
Category	Activity > Other Categories identified by Staff > Debt Levels

Comments:	Overall I would rather council spend less even if that resulted in reduced non-core services. Would prefer council to pay down debt rather than keep on borrowing.
Staff Recommendation	Submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.
Point Number	22.22
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	For climate considerations, I would rather retain Diesel machinery rather than spend mega bucks on electric alternatives. In the grand scheme NZ is a small global emitter. What we change won't make a bit of difference. We should just adapt to the changes.
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. The Council is also developing an Emissions Plan and Sustainability Plan to identify actions into the future.
Point Number	22.24
Category	Activity > Other Categories identified by Staff > Infrastructure Property General
Comments:	Leverage the Christchurch assets wherever we can - let them pay!
Staff Recommendation	Submission is acknowledged by Council.
Point Number	22.25
Category	Questionnaire > Matters For Community Guidance > Economic Development

Comments:	Support the townships to thrive and have local community engagement on the things that matter to them. Get the people involved in activities like working bees for maintenance to facilitate community involvement and ownership of local assets.
Staff Recommendation	Feedback has been noted by relevant team.
Point Number	22.28
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	The Rolleston SH1 improvements would be good to have the highway continue without stopping if possible.
Staff Recommendation	Submission is acknowledged by Council. Both the SH1 project by NZTA and coordinated local road projects by SDC will have traffic management in place to manage traffic flow and safety.
Point Number	22.29
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	The changes to intersections with much greater visibiluty of stop signs etc are good and should continue at trouble spots. Don't reduce the speed limits, but do continue to widen the major roads between towns (Wards/Telegraph between Rolly and Darfield for example).
Staff Recommendation	Submission is acknowledged by Council. Telegraph road was widened a few years ago. Council has programmed widening key routes in the LTP.
Point Number	22.30
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	Maintenance - I am pleasantly surprised that the roads in Selwyn are generally of good condition compared to other adjacent districts. It would be good to ensure focus on high use roads rather than the tributaries. Gravel roads should remain gravel unless volume dictates otherwise. (There are good sealed arterials available mostly). Most of Selwyn is rural, so my expectations aren't high for most non-arterial/highway roads outside of towns.

Staff Recommendation	Staff support the submission because the roads are managed to meet differentiated levels of service.
Point Number	22.31
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	I don't understand why building a simple shelter and carpark costs so much. surely this can be done far more simply and affordably? If it can't be done cheaply (for example a gravel carpark) then leave the status quo. Alternatively extending the bus route to subdivisions could be more affordable if one large carpark isn't required?
Staff Recommendation	Submission is acknowledged by Council. The cost of Park n Ride includes cost for land acquisition. Extending bus routes makes bus travel longer and less attractive, so public transport planners need to strike a balance.

Submitter Number:	23	**Submitter:**	Erin TRETHEWEY
Point Number	23.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million		

	Estimated impact on rates: Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:** public transport is massively important, we need more buses into town and also locally around Rolleston
Staff Recommendation	The 85 Rolleston to City Direct Service has recently had additional peak services added to it. Environment Canterbury is considering developing a business case for additional direct services for Rolleston and Lincoln in 2024-27 including investigating 'On Demand' Services as another option within larger townships.
Point Number	23.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46

Staff Recommendation	Submission is acknowledged by Council.
Point Number	26.8
Category	Activity > Other Categories identified by Staff > Rates
Comments:	In a cost of living crisis, we need to prioritize spending on essential services and limiting rate rises. I am at the food banks helping out at least twice a week, plus collecting food, and I see how much people are struggling. I would ask the council to "look to the better angels of their nature" and remember that you exist to serve the people and make their lives better. We just had a government thrown out for rampant wasteful spending in favour of one that advocates for fiscal responsibility. I urge you to think of people who can't pay their bills or

	put food on the table, let alone manage a proposed 15.6% rate rise. We, the ratepayers, are watching.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	26.9
Category	Activity > Other Categories identified by Staff > Borrowing Levels
Comments:	I strongly disagree with the huge amounts of borrowing to fund
Staff Recommendation	Submission is acknowledged by Council.
Point Number	26.11
Category	Activity > Other Categories identified by Staff > Rates
Comments:	I am appalled at all these projects being proposed and the rates in which you are expecting people to bear. Also, I don't believe that the council will keep to the average 8.5% increase over 10 years. This average is brought down by estimating the 2031/32 increase to be only 1.7%m, which is disingenuous. If it is non-essential (like libraries, more sports facilities and the proposed public transport upgrades) then we shouldn't spend money on it. We need to prioritize minimizing rate increases and spending money on essential services.
Staff Recommendation	Submission is acknowledged by Council.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	28.4
Category	Activity > Other Categories identified by Staff > Growth
Comments:	I am concerned at the amount of growth of Prebbleton and the lack of investment in community amenities compared to other parts of the

	district. Townships in other districts that are the same size as Prebbleton have way more facilities. I would like to see a proper plan for the development of Prebbleton to make it a great place for residents to live. There must have been substantial council contributions from all of the subdivisions, but this does not seem to have been invested in the township.
Staff Recommendation	A key assumption for the Long Term Plan is the population projections. As each town grows, there is a need to understand its future, as well as upgrade its infrastructure and facilities. This is generally done through Strategic and Spatial Plans. However, as growth continues to exceed the projections, more projects are needed quicker to meet this growth.

Submitter Number:	29	**Submitter:**	Details Withheld

Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** Bus services are not well utilised, dont see any point in making ratepayers foot the bill for this when the buses are rarely more than half full now.		

	Services are not reliable and unless you work at a mall or the middle of town, they are next to useless. Regardless of how much the council want people to choose the more climate friendly option, these factors are still going to stop people using them. During this difficult economic time for most families, I would think the majority would rather not have the added cost to their rates.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. Bus patronage dropped significantly post Canterbury earthquakes, and then again from COVID. Levels have recently returned to pre COVID levels through a lot of hard work. The Greater Christchurch PT Futures initiative seeks to improve frequency and reliability of PT services, including services that are better targeted to demand, such as direct to City services that need to be supported by Park N Ride facilitates.
Point Number	29.2

Comments:	Rates increases suggested are going to be unaffordable for many in the current economic conditions. I understand that costs are increasing for council as well but expecting ratepayers to be able to cover the increases suggested is pretty unrealistic. Particularly young families and middle-income families (pensioners obviously can get a rebate so not including them). All councils in NZ are trying to raise rates at these levels when perhaps they should have to take a leaf out of public service departments and look to be cutting their own costs by downsizing staff. Rates increases like this are more likely to drive people out of Selwyn - unless that's the plan?
Staff Recommendation	That the submission is acknowledged by Council. That the Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	29.13
Category	Questionnaire > Matters For Community Guidance > Economic Development

Comments:	$9 million dollars better spent elsewhere. None of the “economic development strategy” policy is necessary at a cost to ratepayers.
Staff Recommendation	It is acknowledged the submitter has selected to not progress with the Economic Development Strategy and holds a view that the proposed allocation should be reduced. Councils' contribution to economic development is alongside others who are expected to contribute significantly more overall. Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. Every cent of spend will be scrutinised and planned for to ensure outcomes and returns are maximised from the spend. Action plans will outline this in detail. The $9m is over a ten-year period, and not all the proposed spend is the same across the years with the first years having a lower allocated amount.
Point Number	29.14

Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account

	development contributions. Development contributions do not apply to option 1. Carry out the landscape improvements to extend the playing fields; replace and upgrade the playground equipment, footpaths, toilet block, lighting and irrigation; and seal the carpark. **Project cost:** Years 1-10: $3.4m **Estimated impact on rates :** Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% * Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2
Point Number	30.8
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Rolleston needs a decent size mall which will create employment and closer to home and community, mall which is different, cinema retail shops, bigger than Riccarton Westfield, it will draw interest for people from around Selwyn and wider Canterbury to travel to Rolleston and shop.
Staff Recommendation	Comments are noted. Local employment, retaining local spend and attracting spend from outside the district are considerations which will be addressed in the Economic Development Strategy Action Planning.

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we

	want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**

	Funding: Rates: 100% **Comment:** Or make it a targeted rate as most ratepayers never go to Leeston
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1. It is noted that Council funds the larger recreation parks on a district-wide targeted rate basis that recognises the benefit these spaces provide to the broader community. In this case some funding from development contributions received within the locality will be used to help fund the work.

	Question: Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	34.9
Category	Activity > Chlorination
Comments:	Not committing to removing chlorine from our water is a disgrace. Look at the other wasteful expenditure yet you can't look after your own constituent's water supply. I am frankly embarrassed by this council and were other districts not in the same position, I would consider shifting. Sort yourselves out, stop wasting MY MONEY
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.

Point Number	34.12
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	$9000000!! Let businesses develop on their own without council overreach.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. Council is involved in and has access to important levers in economic development. The submitter also holds a view that the proposed allocation should be reduced. Councils' contribution to economic development is alongside others who are expected to contribute significantly more overall. Every cent of spend will be scrutinised and planned for to ensure outcomes and returns are maximised from the spend. Action plans will outline this in detail. The $9m is over a ten-year period, and not all the proposed spend is the same across the years with the first years having a lower allocated amount.

	Question: Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	37.7
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Sounds like a lot if the funds are only being used to 'explore' effective technologies but overall I am supportive of the concept of improving use of technology for long term efficiency
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Comments:	Not much happening in Lincoln despite being second largest population centre. What is the actual programme for the town centre improvement works and the Boundary Road reserve development?
Staff Recommendation	The Council will be starting the upgrade of the Lincoln Town Centre and Gerald Street in stages starting in 2024 at the Liffey end and finishing at Springs Rd in 2030. This is estimated to cost $45M and includes cycle lanes, power undergrounding, 4 sets of traffic signals and the replacement of the failed carriageway. The extension of Meijer Dr to Boundary Road, along with the creation of adjoining reserves, is planned in 2025/26 budgeted at $3.5M. In conjunction with this in 2026/27 a $4M Park N Ride Facility to cater for improved public transport services planned by Environmenrt Canterbury will be constructed opposite the Lincoln Events Centre.

Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding
Point Number	44.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Staff Recommendation	Submission is acknowledged by Council.
Point Number	44.8
Category	Activity > Infrastructure DC
Comments:	The "contributions Policy" is certainly an area that requires change, it has not covered the required upgrades to facilities and infrastructure when Subdivisions are planned.

Staff Recommendation	Submission is acknowledged by Council and staff note the support for the introduction of the proposed development contribution for community infrastructure.
Point Number	44.9
Category	Activity > Walking and cycling improvements
Comments:	Where are the cycling/walking upgrades across Rolleston? When planning out Rolleston the Council missed a opportunity to Plan out connected walk/cycle ways away from roads all leading to the centre of Rolleston. There are too many narrow "Burm's" that should of been no Grass with wide areas all over Rolleston.
Staff Recommendation	Submission is acknowledged by Council. Council has a footpath extension program to cover missing links. Major routes follow the walking and cycling strategy which will be updated with suggestions from LTP submissions taken into account.
Point Number	44.10
Category	Activity > Council's Office Improvements
Comments:	When Upgrading Rolleston Council Office, Get rid of the water area. It may have looked good on a plan but the ongoing cost of having it when the space could better used would be a better use of rate Payers Money. "WE" do not want to see flash upgrades when we are struggling to avoid rates.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	44.11

Category	Activity > Other Categories identified by Staff > Rates
Comments:	The current rating system is unfair and overburdens rural landholders. We are not able to sustain rates increases as forecast by the council. At present our household on a medium sized farm pays $550 weekly ($28,600 per year) in combined Ecan and Selwyn district rates. The council needs to get back to basics and live within the districts means. I do support an increase in developer contributions, but at a higher level than currently proposed. I believe a system of user pays more than rating on capital value would be more equitable and sustainable. I strongly believe rural rate payers are subsidizing urban residents and property developers. This will need to change, or you will eventually face rate revolts.

	I understand central government has been placing more demands on councils, and these demands come with significant costs. To survive this the council needs to scale back or stop activities that are not essential.
Staff Recommendation	Submission is acknowledged by Council.

Comments:	Maori should not be given ability to influence or advise ANY council decisions
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognizes the importance of partnerships; building strong partnerships with iwi is vital for Council to fulfill its obligations to the entire community. Te Tiriti O Waitangi (Treaty of Waitangi) is a founding document of New Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with iwi, to have any meaning, requires consideration of iwi position and contribution to discussion/debate.
Point Number	46.22
Category	Activity > Strengthened Partnerships
Comments:	Forget the woke rubbish and maori input on decision making
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognises the importance of supporting Iwi participation. Council is committed to ensuring inclusivity and that ensuring everyone has an opportunity to benefit. Council considers this can lead to better outcomes for the whole community. For example, Iwi knowledge about local environments can be invaluable in planning and resource management projects. For Council to include Iwi contribution to count, by ensuring Iwi perspective has an opportunity to inform decision making on its committees, reflects our commitment to the

	Treaty and our shared responsibility to create a more equitable and respectful society.

Point Number	47.8
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	Improving the roads: Leading out of Lincoln township through to Greenpark, Springs Road is a main thoroughfare now. The road speed needs to be reduced from 100 km hour to 80 km, and road signage needs to be upgraded. Also, stop allowing diesel trucks to use the main road through Lincoln Township. They are noisy and dangerous.
Staff Recommendation	Submission is acknowledged by Council. Council has developed an interim speed management plan. Heavy vehicle access and speed management through the Lincoln township is part of the design for the Lincoln Twon Centre project.
Point Number	47.11
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	I disagree with it, as it treats a minority with higher regard than another race. Likewise, Administrative Challenges: Implementing the act could require significant resources and coordination, including updating land registries, consulting affected parties, and ensuring compliance with existing laws and regulations. Also, if a white person owns land that falls under one of the categories defined in the act (such as General land or Crown land), they may experience changes in how that land is managed or regulated. For example, if adjacent land is designated as Māori customary land or Māori freehold land, there could be implications for land use or development rights.
Staff Recommendation	Council acknowledges the submission. Council is required by s 108 Local Government Act 2002 to have a policy on the remission and postponement of rates relating to Maori freehold land. When developing this policy staff have considered its position regarding rates postponement and remission based on these legislative requirements.
Point Number	47.12

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None		

	Estimated impact on rates: To be determined **Funding:** To be determined **Comment:** I believe that Park and Ride facilities may be beneficial however, there is limited information to demonstrate the return on investment, and the impacts to the ongoing maintenance for these new locations. These facilities will not reduce the number of drivers on the road, will cause disruption, and are proven to not have a significant impact on climate emissions. Community has created other facilities for enabling the elderly access to transport and based on issues with safety, I wouldn't allow my children to use these facilities by themselves.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. The Greater Christchurch PT Futures Business Case identified Park N Ride facilities were needed to support the proposed additional direct to City PT services planned, and in the future MRT related district bus connection services. This will reduce commuter travel using single occupant private vehicles. A further business case process needs to be carried out by Council to satisfy NZTA funding approval requirements for its proposed Park N Rides.
Point Number	49.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

	Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** Do what we can with what we have. Again - there is no transparency about the use of the community facility and how it will make a return on investment. There is no clear view on how the facility could be used to help reduce rates in the future. Other councils long term plans are closing down facilities suggestive of hard times to come during a recession. I would love to see more creative ideas from council about how our infrastructure could be used more creatively to "make money" within our communities to support their improvement.
Staff Recommendation	Staff recommend this submission be acknowledged. Project outcomes have been identified and operational performance has been taken into account in relation to Whata Rau.

Comments:	Whilst this is government mandated, it seems like this should already be done as part of a prioritisation exercise in our decision making. My concern is that if we don't already have policies around this, then we have limited formalisation of how we have been making decisions that benefit community and how to engage them. Surely we know this already. What concerns me most is the LTP does not provide any information about how we will be adopting these policies, and the impact to the rate payer. This is not as transparent as it could be and seems a bit ingenious about time and money spent by council.
Staff Recommendation	Council acknowledges the submission and notes the concern with the level of information provided. Improvements regarding the presentation and provision of information will be considered for future consultations.

Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	I would like to know how the $9mill is being spent. If it is for a strategic paper and monitoring of the strategy, I would be incredibly disappointed. These things get affected by government change and could easily become a waste of money.
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and notes they would like to know how the proposed budget is being spent. Every cent of spend will be scrutinised and planned for to ensure outcomes and returns are maximised from the spend. Action plans will outline this in detail. The $9m is over a ten-year period, and not all the proposed spend is the same across the years with the first years having a lower allocated amount. Council will consider their feedback in strategy action planning.
Point Number	49.13
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	In my mind, this may not be enough. The current digital services provided a lack luster.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	49.14
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	I am also concerned about the lack of interest in Health within the keeping community informed. We have no discussion points about health care facilities and increased access to health care. Our

	enrolment and doctor retention issues in the district and reduce rural access to health care services. There is no discussion about climate resilience in the region and improvements we could make to support climate change and adverse events in the region. We are incredibly infrastructurally focused despite the aspirations of the council.
Staff Recommendation	Feedback has been noted by relevant team.
Point Number	49.15
Category	Activity > Other Categories identified by Staff > Consultation Document Feed
Comments:	I appreciate this communication. This could be provided in this format far more regularly to inform the community.
Staff Recommendation	Council acknowledges the submission. Staff are reviewing the information we share with our communities and using this feedback to make some changes

Submitter Number:	50	**Submitter:**	Details Withheld
Point Number	50.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council
Point Number	50.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.*

	Project cost: Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** library's are an out of date requirement or for a small minority of people , most people use the internet or buy a book, I am tired of seeing library charges in rates
Staff Recommendation	Staff recommend this submission be acknowledged. The growth in library membership, the increased use of library lending resources, the use of value-added services such as JPs in libraries and Council Service Centre and Central Government services, and the high levels of participation in lifelong learning programmes and events have been taken into account in relation to this matter.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	50.7
Category	Activity > Council's Office Improvements
Comments:	Extension to the Rolleston's council building needs to be reconsidered, save some money.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	50.8
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Rates increase to double over the next 10 years is too high, it should be half of this, with more people moving into Selwyn there should be an offset via more household rate payers. Reduce the spending and get costs under control.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.

Comments:	Support for new businesses by way of network groups would be good; do not support however more farmland being zoned for commercial/industrial purposes.
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and Council will consider their feedback in strategy action planning.
Point Number	53.12
Category	Questionnaire > Matters For Community Guidance > Digital Solutions

Comments:	However there are many older folk in Selwyn who do not have computers, do not use internet banking and struggle with technology so there needs to be a human face/alternative.
Staff Recommendation	Face to face interaction will continue to be an important part of how we interact with our communities. Our digital approach is designed to make things more streamlined, connected and efficient.
Point Number	53.13
Category	Activity > Other Categories identified by Staff > Other Matters
Comments:	The proposed removal of the Malvern Community Board is one such thing - in the proposed new Ward changes quiz there is no choice to keep the Board - both questions propose new wards and advise there will be no Community Board. Will we have a chance to have consultation on this?
Staff Recommendation	Submission is acknowledged by Council. The Representation Review is subject to a separate process and yes it does involve a consultation process.
Point Number	53.14
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	In the current Significance and Engagement Policy there are many pages talking about consulting and listening to residents, but there is one line that says if the Council does not want to engage, it doesn't have to. One tends to be rather cynical as there has been a lot of lip service over the years and the Council has gone ahead and done what it wanted anyway, despite residents wishes
Staff Recommendation	Submission is acknowledged by Council.
Point Number	53.15
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	Any major changes must be notified to residents via direct contact or via flyers/summaries (such as the one for this LTP) rather than hidden in 'proposed' District or Long Terms Plans - zoning changes are one area where Planners have amended zoning, put it in the proposed District Plan and not notified affected ratepayers hence it has gone ahead without discussion or submission from most

	affected people. Open consultation on all major changes is requested.
Staff Recommendation	The District Plan Review impacts the whole of the district and consultation is open to all. Council aimed to use any and all channels available to communicate the process and potential changes that impact the community.

Point Number	54.9
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	No to climate change policy. Have you gone and quantified the global impact on CO2 emissions your new policy will have? Bet its stuff all. The Rating of Māori Freehold Land should be treated the same as any other freehold land. Why exactly does it need a special rating? You guys going give them a discount because of their race? Wouldn't that meet the definition of racism?
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017, this being our commitment to develop and implement plans to reduce emissions. The council has a Climate Change Policy, as well as an emissions target to assist with the development of the LTP.

	The Activity and Asset Management Plans with this LTP each specifically identify how they are responding to climate change and emission reduction. Council is required by s 108 Local Government Act 2002 to have a policy on the remission and postponement of rates relating to Maori freehold land. When developing this policy staff have considered its position regarding rates postponement and remission based on these legislative requirements.
Point Number	54.10
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Since when has the council been responsible for local economic development. The council already dishes out enough money. Stop giving people handouts.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	54.11
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	No way. Why you ask? Because you'll end up doing a bad job. Digital solutions... what a vague way to waste rate payers money.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	54.12

Category	Activity > Chlorination
Comments:	Chlorination is bloody awful. We all want it gone. Take the climate change budget and re-allocate to improving our drinking water.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	54.13
Category	Activity > Potential Requirements To Fluoridate
Comments:	No to Fluoridate. The Govt made us all take the covid jab. Then they forced us all to water Chlorination. Last thing I want is for the council to throw more chemicals into my drinking water. You guys just love spending that rates money.
Staff Recommendation	The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre.

	Project cost: Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Comments:	I agree that landowners and developers who gain value by rezoning and/or subdividing should contribute more to meet the financial costs of providing the infrastructure to meet the increased needs that the increased population brings.
Staff Recommendation	Submission is acknowledged by Council and staff note the support for the introduction of the proposed development contribution for community infrastructure.
Point Number	57.9
Category	Activity > Planning Further Community Facilities
Comments:	By population size Prebbleton seems to be underserved with community facilities. It is regrettable that including a library/service centre in one of the new shopping developments was not considered.
Staff Recommendation	The submission is acknowledged. A new community centre for Prebbleton has been in considered in earlier Long-Term Plans and was previously signalled for construction in 2025/26.

	A needs assessment study was undertaken in 2023 which concluded that there was demand for a facility to service the community, and that it should provide a mix of social, community gathering and recreation spaces. The study further concluded that the facility needed to be located so it was easily accessed by the community. As there are uncertainties about the best site for the facility and the activities that it will cater for, further planning and community consultation is needed. To enable time for the necessary planning to happen, the project has been programmed for 2026/27 to 2027/28.

Comments:	I am very happy with the availability of my local councillor (Malcolm Lyall) I have always found him easy to contact via email or text and very responsive to my queries, and suggestions. The behaviour of some locals on the Community pages is appalling and efforts should be made to rein these people in. Much of this behaviour seems to be due to genuine ignorance. Perhaps this could be addressed by efforts for all local government groups to set up some kind of education for both children and voting-age persons to explain in clear and simple terms just what each group is responsible for. E.g Ecan, Selwyn District Council, Parliament etc. I am sure local schools and youth groups could be brought on board.
Staff Recommendation	Submission is acknowledged by Council.

Category	Activity > Planning Further Community Facilities
Comments:	I would like to see a dedicated performance space that will provide the existing arts organisations and businesses the opportunity to connect with our community in a way that isn't possible at the moment. It will inspire the next generation of artists. It will open the door to new arts groups which can't yet exist due to the lack of facilities. It will provide opportunities for the young, connection for the elderly, employment for many, and inspiration for all. It is time for the council to add a dedicated arts facility to its long-term plan - thanks.
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces		

	that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:** Darfield is a small town. Yes it may have some growth of people living there but they're aware of the lack of amenities before moving there.
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	66.5
Category	Activity > Other Categories identified by Staff > Rates
Comments:	let us please have a break from rates increases. I've lived in Rolleston for 13 years and seen so much growth but being a pensioner is difficult enough with increase in living costs. My daughter and her family have just moved to Rolleston and have a large mortgage. How do you expect young people to settle and stay here with rates being so high and living costs increasing.

Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.

Submitter Number:	67	**Submitter:**	Sara Meredith
Point Number	67.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:** We need a more cohesive and integrated public transport system, especially with the construction of the new stadium underway. Central government has made clear its funding priorities for Waka Kotahi so I don't think co-funding can be relied upon, but this project should go ahead.		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council. It is agreed future PT Services provided by Environment Canterbury should take account of providing access to the new Stadium, including for specific events that people can use from the districts for traveling to the City.

Category	Activity > Chlorination
Comments:	I agree that the Council shouldn't spend any more money seeking chlorination exemptions. There is no appetite from Taumata Arowai to issue exemptions and this would be a waste of staff time and ratepayer money.
Staff Recommendation	The submitters preference to continue to chlorinate community drinking water supplies and seek no further exemptions from Taumata Arowai is acknowledged. Staff recommendation is to continue to chlorinate community supplies to reduce risk to community health.

Point Number	68.2		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.		

	Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**

Point Number	71.6
Category	Activity > Other Categories identified by Staff > Rates
Comments:	As a general comment - the Rolleston area has grown massively in the last 5 or so years. I do not have the figures reflecting the number of new houses built here during that time but it must be in the thousands. For every new house completed the council is receiving $3,000 to $4,000 (at least) in rates per year. This seems to be to be an incredible amount of extra dollars flowing into the council coffers. I understand that these new houses will require services like water (which we pay for separately and which has seen some massive increases in the charge to us) and rubbish collection. I refuse to accept that the extra rates you receive is not sufficient to cover these services Therefore you need to reconsider the extravagant expenditure you are proposing and look for more cost cutting areas. Many of us in the community are on fixed incomes or single incomes and the expect us to continually find the extra money to cover these rate increases is unreasonable. You are going to force people to move away from Selwyn to find somewhere cheaper to live. We have already considered doing this ourselves. Young families already face increasing childcare costs, mortgages or rent increases which is requiring both parents to work to cover these basic costs of living - not to mention the cost of food and power and everything else that is getting more expensive every year. Please help these families by reducing the wish list of projects you want to advance and focus only on what we have to have to service our current population - which I know will grow but then so does the income you receive from the extra rates each new house has to pay. I would support a rate increase of 5% annually but more than that I think is totally unreasonable.
Staff Recommendation	Submission is acknowledged by Council.

Point Number	71.7
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Fluffy statements that mean nothing.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	71.8
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	If it helps to deliver current services for less cost then of course.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	72.8
Category	Activity > Other Categories identified by Staff > Rates
Comments:	7. The proposed increase to rates is totally unaffordable. Ratepayers income increase by less than 5% each year; but the rise in rates is triple this. Unaffordable.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	72.9
Category	Activity > Other Categories identified by Staff > Borrowing Levels
Comments:	6.No to borrowing 4 x existing debt. Rate payers cannot afford rates now.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	72.10
Category	Activity > Strengthened Partnerships
Comments:	1. The council need to cease all relationships with mana wenua, and stop wasting rate payer funds. The treaty is very clear and precise that all people on NZ are to be treated equally.

Staff Recommendation	The submission is acknowledged. Selwyn District Council recognises the importance of partnerships. Building strong relationships with Iwi is vital for the Council to fulfil its obligations and effectively serve the entire community. Te Tiriti o Waitangi, the Treaty of Waitangi, is a founding document of New Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with Iwi, to have any meaning, requires consideration of Iwi position and contribution to the discussion/ debate.
Point Number	72.11
Category	Activity > Chlorination
Comments:	2. Water does not need `to be fluoridated; but needs the chlorine removed.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies. The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health
Point Number	72.12

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49%

	NZTA Waka Kotahi: 51% Our budgeted option **Comment:** I would like to see the inclusion of areas such as Darfield, West Melton, and Springfield. This would be a fantastic asset to not only general public, but elderly and especially tourists. The existing bus is very limited and does not provide a link to greater healthcare, or airport services.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Council will be investigating what further PT services can be provided across the wider District, further to what Environment Canterbury can provide. However it is expected these will need to be fully funded by users and ratepayers subject to further Council consideration through subsequent Annual Plan and Long-Term Plan processes.
Point Number	73.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to

	meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:** Cultural Narative is important in these buildings, having a facility is more important.
Staff Recommendation	The submission is acknowledged. Selwyn District Council prioritises inclusivity and cultural respect in our community. Te Tiriti o Waitangi, the Treaty of Waitangi, is a founding document of New Zealand. Recognising Te Reo Maori (the Maori language) and incorporating cultural design elements in public facilities is one way Council chooses to uphold the spirit of the Treaty partnership. Council considers recognising Maori language and culture in public spaces is not only appropriate but also necessary. It reflects our commitment to the Treaty and our shared responsibility to create a more equitable and respectful society.

Comments:	**Question:** Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	73.8
Category	Activity > Planning Further Community Facilities
Comments:	I would like to see more focus on other regions rather that the Rolleston Community. It is very difficult to see tangible benefits of rate spend for rural people in this region.

	There seems to be a great focus on the Township of Rolleston noted in this 10 year plan. I would like to see benefit for those living in rural communities using smaller service towns. I have also noticed that there is a lack of services focusing on our local tourist economy which would be beneficial to many townships.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	73.9
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	It is an outrage that this rural service is proposed to close. I have noticed that Sheffield and Springfield have had limited exposure in this plan, which is upsetting to rate payers in this area. The pool is a fantastic asset which is used for swimming lessons as well. The Darfield Pool is still a distance away from rural users and it is an important asset for the school and community. We plan to have children in the future and I would be incredibly disappointed for my future children that they are unable to use this asset that was around when my partner was younger. I would like to see more options for development in Sheffield/Springfield Communities even if it needs to be in a new location.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool, and highlighted the Memorial aspects of this facility as a key Council consideration for the future of this site.
Point Number	73.10
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	I would like to see more information about this spending before approving.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy with the current information that they have. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.

Point Number	73.11
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	I would like some more information and specifics on what this would look like. It is very broad and I am unsure what this would look like.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Category	Activity > New Public Transport Services
Comments:	would love to have a better transport system, maybe getting a cheaper bus but have smaller gaps between busses. currently there is no direct bus to and from a city center after 6 pm. we work in it and cannot do typical hours like 8 to 5 that forces us to drive every day, when I would definitely opt for a bus rather than driving.
Staff Recommendation	The current direct bus services are for the peak morning and evening commuter travel, where the higher patronage levels make this service viable to provide. Environment Canterbury is considering

	developing a business case for additional direct services for Rolleston and Lincoln in 2024-27. Improving the frequency of other key Metro PT services such 5 (Rolleston) and 80 (Lincoln) is also being planned.

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	I am a teacher at Sheffield School. For the past 4 years I've gotten in the water with kids and taught them vital water confidence and safety skills. Seeing children be afraid of water to jumping off the diving board and begging to go swimming daily is the most amazing feeling! Ill have a second submission coming soon….. as a teacher though the kids LOVE the pool and it is vital they have access to a pool. Darfield is not a fesiable option for our whānau to pay bus costs, plus lessons not to mention the loss of academic learning travelling.

Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool, and highlighted the Memorial aspects of this facility as a key Council consideration for the future of this site.

Category	Activity > Chlorination
Comments:	Sensible move making chlorination permanent.
Staff Recommendation	The submitters preference to continue to chlorinate community drinking water supplies and seek no further exemptions from Taumata Arowai is acknowledged. Staff recommendation is to

	continue to chlorinate community supplies to reduce risk to community health.
Point Number	81.8
Category	Activity > Walking and cycling improvements
Comments:	More effort needs to be made to improve cycle routes between Rolleston and town - preferably a cycle track running more-or-less directly from Rolleston to the end of the current Southern Motorway cycle track. The current routes (along to Hornby then in nasty traffic down to Southern Motorway or down Boundary Road to Lincoln then through Prebbleton to Southern Motorway) will not encourage any new cyclists to cycle from Rolleston to Christchurch. This should have been done when the Southern Motorway was extended to Rolleston, it'll cost 5 times as much to do it now. . .
Staff Recommendation	The submission relates to aspects that are not the Council's responsibility. Cyclepaths along State Highways are planned by NZTA.
Point Number	81.9
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Let businesses pay for their own development.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.

Comments:	try letting the local take over the repairs first. Most will donate time and materials. Possibly fix it for less than your closing costs. Things went smoother when ran by local groups.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool, and highlighted the Memorial aspects of this facility as a key Council consideration for the future of this site.

Point Number	83.10
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	$9 million?
Staff Recommendation	It is acknowledged the submitter has selected to not progress with the Economic Development Strategy and holds a view that the proposed allocation is excessive. Councils' contribution to economic development is alongside others who are expected to contribute significantly more overall. Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. Every cent of spend will be scrutinised and planned for to ensure outcomes and returns are maximised from the spend. Action plans will outline this in detail. The $9m is over a ten-year period, and not all the proposed spend is the same across the years with the first years having a lower allocated amount.

Point Number	83.11
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	not enough detail of what you mean.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Comments:	Subject: Proposal for Improved Bus Service between Lincoln and Southbridge Dear selwyn district council I am writing to express my concerns regarding the current bus service between Lincoln and Southbridge and to propose some potential improvements. As a regular passenger on the afternoon bus from Lincoln to Southbridge, I have observed that the bus often operates with only a

	small number of passengers, typically around 15 individuals. I believe there is a demand for additional services, particularly on weekends, to accommodate the needs of our community. One suggestion is to introduce a weekend bus service specifically tailored for teenagers. Many young people in our area encounter difficulties accessing Christchurch during the weekends, and a dedicated bus route could provide them with a reliable means of transportation. I recommend scheduling the bus to depart from Southbridge at 9am and return at 5pm to align with typical weekend activities. Furthermore, I propose adjusting the timing of the current afternoon bus route. Instead of returning directly to Lincoln after its initial trip to Southbridge, it could extend its service to Lincoln in the late afternoon. This adjustment would facilitate easier access to afterschool jobs and extracurricular activities for students in our community. Additionally, I am aware that there is already a bus serving Upper Riccarton schools to Lincoln; however, its current schedule does not accommodate students from my school due to its early departure time. Perhaps consideration could be given to adjusting the timing of this service to better suit the needs of all students in the area. I believe these proposed changes would not only improve transportation options for residents but also contribute to the overall convenience and accessibility of essential services and activities in our community. Thank you for considering my suggestions. I look forward to discussing this matter further and collaborating on potential solutions
Staff Recommendation	The submission relates to aspects that are not the Council's responsibility. Bus service is planned and provided by Ecan.

Category	Activity > New Public Transport Services
Comments:	updating infrastructure should be completed when there are an increased number of bus services departing/arriving to Rolleston. Currently there are not enough regular bus services to make this worth it. Bus stops through the subdivisions should also be utilised, and a Rolleston bus route (for all) established.
Staff Recommendation	With Councils Preferred Option the first Park N Ride at Lincoln is planned for 2026/27, while the two new Rolleston Park N Rides are planned between 2029 and 2033. The Lincoln Park N Ride set to coincide with Environment Canterbury's intention to improve Lincolns Direct to City PT Services first while the additional Rolleston Park N Rides will add to the existing facilities at Council HQ and Foster Park. Environment Canterbury is also investigating 'On Demand' PT Services as another option within larger townships.

Category	Activity > Lincoln Town Centre Upgrades
Comments:	when upgrading existing road networks such as Lincoln Gerald Street, please consider if the continued use/existence of crossroads as intersections is suitable. These are the most dangerous type of intersection as there are 8 interaction points. As a cyclist every crossroad is a hazard and trying to pull out of a side road of a crossroads is dangerous and difficult, especially at busy times when traffic flow is constant through Lincoln. Please install roundabouts in Lincoln. Mini roundabouts are inexpensive and highly effective at managing traffic flow, reducing accident severity and improving road safety. Please also urgently upgrade the roads around the schools

	to include traffic calming such as speed bumps. Reducing the speed limits in these areas should also be a priority. Thanks
Staff Recommendation	A series of 4 signalized intersections will be included along Gerald St as these are safest control to accommodate traffic, pedestrian and cyclists (and related cycle lanes). Roundabouts of the size needed will not fit within current road reserve and would require private land acquisition. The design of all works will undergo Independent safety audits and also post construction. Council has a programme to lower speeds for schools supported by the necessary infrastructure. Currently awaiting NZTA approval.
Point Number	91.5
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:** Please consider locations carefully and look to incorporate road upgrades that can redirect heavy traffic from Lincoln town centre
Staff Recommendation	Gerald Street is classified as an arterial road and consequently needs to handle significant traffic of different types. Lincoln is relatively unique as Gerald St is also used by agricultural vehicles and equipment. A Southern Bypass of Lincoln had been considered before and discounted by Council due to the unwillingness of developers to accommodate it, comparatively low use and high cost. The redesign of Gerald St will reduce vehicle speeds through the township which may in turn redirect through traffic onto other routes.

Category	Activity > Lincoln Town Centre Upgrades
Comments:	Please see attached document relating to the upgrade of Lincoln town centre and surrounding area
Staff Recommendation	Submission is acknowledged by Council.

Submitter Number:	92	**Submitter:**	Edward DeLilla

Point Number	92.1
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	
	Question: You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** The current Park and Ride has not reached its capacity. In the future, as the current facility nears capacity, a decision regarding additional facilities can be made. At present is it not a priority investment.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. The existing Park N Ride at the Council HQ at Rolleston is well used, including on road parking around the vicinity. The new Park N Ride facilities at Rolleston are planned for 2029-33, at which time additional capacity will definitely be required to align with the additional PT services planned by Environment Canterbury over this time
Point Number	92.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	

	Question: 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** This is a luxury which the Council cannot currently afford. It is a luxury which should be deferred until there is a budget surplus
Staff Recommendation	The submission is acknowledged.
Point Number	92.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on

	rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do nothing. Use the existing park facilities and remove or replace old and unsafe items in the park. **Project cost:** Year 1: $143,000 **Estimated impact on rates:** Included in our current rates **Funding:** Rates: 100% **Comment:** Given the current state of the Council finances, this is a luxury which the rate payers cannot afford. Only general maintenance and safety related works should be done. The old equipment should be retained until the Council is showing a budgetary surplus.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1
Point Number	92.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:** Given the current state of the Council finances, this is a luxury which the rate payers cannot afford. No new Capital works should be considered until the budget is in surplus.

Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	92.5
Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	92.16
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	Major transport spending needs to be rationalised and better managed. Comparing the graph showing the significant Transportation spend over the past several years with what can be seen as far as actual works, should that the funds are being mismanaged. The roads are in a terrible state, and the money is disappearing with little or no evidence that work is being done. Also, the quality of the pothole repairs is substandard and an embarrassment to the Council.
Staff Recommendation	Submission is acknowledged by Council. Additional budgeted funding in the LTP will help catch up on road renewals and prevent potholes.
Point Number	92.17

Category	Activity > Other Categories identified by Staff > Rates
Comments:	Given the state of the economy, Rate increases are too high. Rate payers cannot afford the continued unnecessary spending. Capital and Operating expenditures must be cut to the bare minimum. If this means delaying or cancelling projects, so be it. Also, all "fat" must be cut from all departments. Consultant costs must be cut with only used where absolutely necessary. "Managing Consultants" is an excuse for staff to SIT AROUND AND DO NOTHING! Remove the "Democracy" Operating Cost. This should be included in the job description of staff anyway. Cut Facilities, waste and transport Operating Cost. The services are inefficient and not providing value for the funds spent.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	92.18
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	In closing, the council is guilty of frivolous spending, pandering to the wants of special interest groups and living beyond its means. It is time for "tough Love". The rate payers are not a bottomless pit of cash to be wasted by their elected officials. The Council needs to remember that they serve the rate payers, not the other way around.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	92.21
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	The annual Rate Caps are too high. Given the current inflation, the rate payers cannot bear the burden of such significant rate 9increases. Until the budget is in surplus and the economic environment improves, any rate increases should be limited to match inflation.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	92.22
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	The "Democracy" cost should be eliminated. This should be SOP for all departments.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	92.24
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	Facilities, waste and tranport Operating costs need to be cut and the performance of contractors needs to to be managed to provide value for money
Staff Recommendation	Submission is acknowledged by Council.
Point Number	92.25
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	These are luxuries which the Council cannot currently afford. They should be deferred until there is a budget surplus. To be totally inclusive you need to help fund those that support those in need. Digital Exclusion excludes the old, the disabled, the poor, those that struggle with literacy, and those for who have English as their second language.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient

	services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	92.26
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	All frivolous spending needs to stop. The rate payers can not afford to continue to be used a a bottomless bucket of money to be squandered on pet Council projects. The council has spent millions on sports facilities, cycleways and a new Community Centre/Library purely for the benefit of the sporting minority, cyclists, pubs owners, restauranteurs, Shop owners and other special interests. This has been done at the expense of the roads, potable water, waste water and sewage, among any number of other necessary services. As a consequence, the council is now up against its debt ceiling and is for all intents and purposes broke. The rate payers can no longer continue to sacrifice their standard of living to support a Council that is addicted to over spending. IT HAS TO STOP NOW!
Staff Recommendation	Submission is acknowledged by Council.
Point Number	92.27
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Not until the council finances are in surplus. This is another luxury which is presently unaffordable.
Staff Recommendation	It is acknowledged that the submitter has selected to close the Sheffield Memorial Pool.
Point Number	92.28
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Not until the council finances are in surplus. This is another luxury which is presently unaffordable.

Staff Recommendation	It is acknowledged the submitter has selected to not progress with the Economic Development Strategy and holds a view that the council cannot currently afford this action. Councils' contribution to economic development is alongside others who are expected to contribute significantly more overall. Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. Every cent of spend will be scrutinised and planned for to ensure outcomes and returns are maximised from the spend. Action plans will outline this in detail. The $9m is over a ten-year period, and not all the proposed spend is the same across the years with the first years having a lower allocated amount.
Point Number	92.30
Category	Activity > Other Categories identified by Staff > Rates
Comments:	In closing, the council is guilty of frivolous spending, pandering to the wants of special interest groups and living beyond its means. It is time for "tough Love". The rate payers are not a bottomless pit of cash to be wasted by their elected officials. The Council needs to remember that they serve the rate payers, not the other way around.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	92.31
Category	Activity > Other Categories identified by Staff > Infrastructure Property General
Comments:	Infrastructure, (specifically roading), while consuming exorbitant amounts of money, has fallen into serious disrepair. An independent, in-house (not consultant) investigation needs to be made into the award, performance and management of these services. Something is not right and needs to be corrected.
Staff Recommendation	Submission is acknowledged by Council. Asset management and operational improvements are addressing these issues.

Point Number	92.34
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	The current Park and Ride by the Council offices has not reached capacity, with parking spaces still available. Once the current facility has reached near capacity, then the decision can be taken regarding additional Park and Rides.
Staff Recommendation	Submission is acknowledged by Council. The Kidman Street Park n Ride will be coordinated with the flyover. Decisions can be revisited in 27-37 LTP cycle.
Point Number	92.35
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	All transport spending needs to be audited and any and all unnecessary or discretionary spending cut. The Performance of all Contractors should be audited internally (no consultants) to ensure that contracts are being tendered, awarded, and managed as cost effectively as possible. There is currently no evidence that these contracts and services are providing value for money.
Staff Recommendation	Submission is acknowledged by Council. There are both internal and external audits of council's expenditure. Contracts are tendered competitively and managed to achieve value for money.
Point Number	92.37
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	The Council has a history of wasteful spending. This must stop! It has run up against its borrowing limit with very little to show except sports facilities, cycle trails and a Community Centre. These facilities, funded by the rate payers, only serve the interests of the sporting minority (who have to pay to use them), pubs, shops and restaurants. To paraphrase Austin Powers, "I'd love a gold -plated toilet, but it's not in the cards"!
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum by constantly improving processes and proactively looking for opportunities to reduce waste. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan, but with additional sports courts and/or bigger community meeting spaces. **Project cost:** Year 1: 19.24m **Estimated impact on rates (per year):** $53.14 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Its a bloody war memorial pool and you as a council are liable for its up keep and for the last 15yrs you have done nothing to stop it getting to the state it is now. Those boys paid the price of this pool with there lives and it was gifted to the commuity as a remembrance for their sacrifice!!! shame on you in you don't replace it or build a new one in the domain as a Memorial pool!! What message are you sending out to the New soldiers of today if you don't care about respecting Memorial built in their Honour!!
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool, and highlighted the Memorial aspects of this facility as a key Council consideration for the future of this site.

Submitter Number:	102	**Submitter:**	Teryn Proracki

Point Number	102.1
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case determined that MRT was viable in the city, but not in the surrounding Districts. Councils planned Park N Ride facilities together with additional express and direct bus services will be critical to make these connections to the MRT service. The MRT Business Case process has yet to determine what mode MRT services will take i.e. rail or bus.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m

	Estimated impact on rates (per year): $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Category	Activity > Planning Further Community Facilities
Comments:	With the Prebbleton community hall upgrade it would be good to consider a library as well. There is such a large family base here and this would be widely used in the community. Especially with the projected growth in the area. With the Kakaha upgrade it would be great if there was a pool or sports facility here to service Ladbrooks, Prebbleton and Lincoln. Rolleston pool facility is further away and having one in this key location would be highly used. As a teacher in Lincoln I see the amount of youth and children that get bored in the area after school and on the weekends. This ends in behavioural issues such as shop lifting etc... it would be great to have youth areas in Lincoln to support this. Have the pool at Kakaha Park would also be another boredom buster that kids could get to easily on their bikes.
Staff Recommendation	The submission is acknowledged. A new community centre for Prebbleton has been in considered in earlier Long-Term Plans and was previously signalled for construction in 2025/26. A needs assessment study was undertaken in 2023 which concluded that there was demand for a facility to service the community, and that it should provide a mix of social, community gathering and recreation spaces. The study further concluded that the facility needed to be located so it was easily accessed by the community. As there are uncertainties about the best site for the facility and the activities that it will cater for, further planning and community consultation is needed. To enable time for the necessary planning to happen, the project has been programmed for 2026/27 to 2027/28.

Comments:	Stop taking the land we love this small community and I'm not happy on the amount of land being taken over to build so many houses all crammed together. At least give the next one's bigger sections. will the growth ever stop or slow down? We moved here 4 years ago and built out beautiful home for a smaller community vibe. A town that reminded us of home on the west coast where life is slower and easier than the city. Now the developers are tearing up the beautiful land around us and cramming in 100’s of small houses. The centre of town will soon be too busy to drive around, and something will need to be built down the back of Rolleston.

Staff Recommendation	The National Policy Statement on Highly Productive Land provides clear direction and parameters for council in considering future housing growth in Selwyn. The size of sites is a District Plan function, not the Long Term Plan. Population projections are not predictions, rather they indicate probable outcomes based on assumptions. A key assumption for the Long Term Plan is the population projections and this help provide confidence in investment, including the expansion of town centres.

Comments:	ok so Canterbury Cricket are currently looking at supporting Canterbury Country Cricket along with the Waimak Council in building a second cricket facility in rangiora. I spent 5 years on the country cricket board and in that time it was in the 3 year strategy to develop a facility (predominantly for training) for the players who lived south of the waimak river selwyn and banks peninsula. However this was shelved and never put back in (conveniently in my opinion) as the focus has always been on having something close to the home for the CEO who lives in Rangiora. Im the chairman of Weedons and cricket in the selwyn region is unbelievably strong. Current Black Caps Kyle Jamieson, Henry Nicholls, Darell Mitchell and Henry Shipley are all registered members of clubs in the selwyn region. Theres also Zac Foulkes, Harry Chanberlain, Blake Coburn and Jesse Frew who have all featured in the Canterbury Squads along with Robbie Foulkes and Cam Paul who both have represented New Zealand under 19 this past season. Junior number are strong (almost twice that on waimak district). I know for a fact that Canterbury Cricket can't afford to play at Hagley oval and that in my opinion main power oval in Rangiora is under resourced. Now is the time for selwyn to build a cricket facility similar to Saxron oval in Nelson or even Bay oval in Mt Maunganui where first class cricket can be played (and potentially womens internationals or under 19 world cup games) which would bring in a hige amont of profile to the district along with a financial boost to the local businesses. We could have it as a rural base for junior cricket in the region and potentially it could even be a rugby ground in winter and host a club game each week. Id be happy to be contacted for a meeting about this but just not sure who to speak to. Paul Rugg (apologies for grammar and spelling I've written this on my phone)
Staff Recommendation	Submission has been acknowledged by council. A cricket stadium has not been considered at this point and has not come up as a key point for stage 1 of the District Park development. Given the other available grounds in the Canterbury region we do not see this as a sustainable option in the short term, but it is something that could be considered in planning work going forward.

Submitter Number:	109	**Submitter:**	Danielle Petrie

Point Number	109.1
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** Public transport links need to be drastically improved in the more isolated rural towns of Selwyn to connect to the larger hubs, before a park and ride infrastructure is developed in the larger more populated areas. Darfield needs more public transport options immediately.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service. The Park N Ride facilities will be sized and provided to enable use from the adjoining townships so residents can drive and park to then access the PT services. It is not viable to provide PT services within smaller townships.

Category	Activity > Other Categories identified by Staff > Rates

Comments:	I feel the councils plan is unfair to rate payers, increases are too high too soon during the current economic period, most families are already struggling with increased costs of living. Especially when it feels like all the money is spent in the larger hubs and the smaller towns are not having the basics looked after.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**

Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities

Comments:	Consider building a gymnastics facility in Rolleston or provide land to Affinity for the creation of a purpose-built facility previously committed to investigate in the last Long-Term Plan (April 2021) The club is a huge part of the Selwyn Community and personally to my family for my Son. The club goes above and beyond, and the support of the Selwyn District Council is essential in helping its continued success and sustainability for the community.
Staff Recommendation	The submission is acknowledged. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input. This excludes existing or proposed Council facilities as part of the Long Term Plan. Staff recommend that this facility be included as part of a wider community facility funding and planning project with gymnastics as a potential individual case study along with other facilities such as a performing arts and a military museum or similar to provide a variety of examples.

Point Number	112.4
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	The public consultation document that has been released by Selwyn District Council has no mention of gymnastics within the 64-page document. I understand this was also raised during the 2021-2031 LTP process. Gymnastics is globally recognised as the foundation to all sports. Affinity Gymnastics Academy is the second largest sports club by membership in the Selwyn District and is the only gymnastics club that caters for all levels, ages and abilities, six days a week. The club currently leases a building which is not fit for purpose as a gymnastics club. A larger purpose-built facility would enable the club to grow and offer more sporting options for the public of Selwyn. Affinity is already the largest sports club and could grow much further if we had the space to add other gymnastics codes (e.g. rhythmic, trampoline & parkour) and complimentary sports (e.g. Olympic fencing, aerial skills/cirque). The council owns large amounts of reserve land that can easily accommodate a purpose-built facility that can provide all gymnastic codes as well as other complimentary sports that both a recreational purpose and competitive pathways.

Comments:	**The Council needs to build a gymnastics facility in Rolleston or provide land to Affinity for the creation of a purpose-built facility**. Affinity is one of the few places where young people in Rolleston can go to participate in structured, physical education. It is crucial for the health of our youth and the safety of our community to provide places like this. The fact that there is no heating in winter and no cooling in summer in the current facility is outrageous for a sporting location, and the fact that the Council agreed that they would look to support gymnastics provision based on the last LTP process, but appears to have not honoured their previous commitment to the community is terrible. Rolleston seriously lacks things for young people to do, especially supervised, and this would go some of the ways towards fixing that.
Staff Recommendation	The submission is acknowledged. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input. This excludes existing or proposed Council facilities as part of the Long Term Plan. Point Number	114.7
Category	Activity > New Public Transport Services
Comments:	Would be good to improve and increase public transport from Darfield etc. Could we start to consider rail improvements and start using rail as a form of public transport?
Staff Recommendation	Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service. The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case considered a wider passenger rail service using the existing rail network. This could have merits in the future if combined with a wider regional passenger rail service. But with small projected patronage, large investment needed for rolling stock and infrastructure (on a rail network managed by others), and that there is no CBD connection makes this currently not worthwhile.

Point Number	114.8
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	Could we look at doing more for the Malvern area? Such as building a gym facility within this complex? Darfield lacks places to maintain fitness during the winter months. If we want a healthier Malvern for years to come, I would like to see a better health and fitness sector. That doesn't involve trekking into Rolleston for this. Giving Darfield a well-resourced Gym and in the future an indoor year-round swimming centre would be great.
Staff Recommendation	Submission is acknowledged by council.

Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input. This excludes existing or proposed Council facilities as part of the Long Term Plan. Staff recommend that this facility be included as part of a wider community facility funding and planning project with gymnastics as a potential individual case study along with other facilities such as a performing arts and a military museum or similar to provide a variety of examples.

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP
Point Number	118.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre.

	Project cost: Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**

Comments:	I would love more busses from Darfield. Into city centre at different times, through to Rolleston, Lincoln, Hornby. I use the bus most days travelling to town, and it is always full (on a double decker too). More options on this would be fantastic.
Staff Recommendation	Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service. This would include linking larger townships like Darfield to Rolleston and PT services based there including connections to the City.

Comments:	I support having a purpose-built gymnastic club built to accommodate affinity gymnastics. Their current building is unfit for purpose (we experienced the high temperatures in the building during my daughters birthday party) and believe it would be an incredible asset to the community to have a more suitable building.		

	Gymnastics is a truly fantastic sport that has so many benefits and skills. The options to expand their current classes is very exciting! Please support the club, just like other clubs in Christchurch are supported by their council!

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Closing the Sheffield Memorial Pool will be removing a community asset from our current residents and future generations. The local school children use this pool most school days when it is open, and it gets used regularly outside of school hours. As a parent with young children in Sheffield, we try to use this asset as often as we can and make the most of the convenience. The argument that Darfield pool is only a 10 minute drive is irrelevant given the convenience will be removed, therefore those using the Sheffield Memorial Pool would not necessarily take the trip to Darfield. Living in a rural community with many surrounding rivers and waterways, it is important for children to be given the opportunity to gain confidence in and around water. Not all families can afford to pay for swimming lessons, given the drive to another facility as well as the lesson cost. Closing the pool will take away the swim lesson opportunity that is currently provided both through school and privately. Lastly, I do not believe it is appropriate to compare the use of the Sheffield Memorial Pool with facilities that are surrounded by a larger community. I very strongly DO NOT support the closure of Sheffield Memorial Pool, unless Council can come up with another solution to maintain a pool facility in Sheffield.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Comments:	These tips for first home buyers could well be the council's mantra:
	1. SORT OUT YOUR FINANCES - are they too great, if so then trim them!
	2. NEEDS vs WANTS - how many of our long-term plans are needs, how many wants - sort them into order.
	3. DO YOUR HOMEWORK- stop blaming earlier Councils and rate rises for putting up rates to 1 and 2.
	4. RECOGNISE YOUR LIMITS - new towns in the area do they need extra - do the core things well forget the "frilly" bits.
Staff Recommendation	Submission is acknowledged by Council.

Comments:	More than anything, I want to see a commitment by this Council to the future. The development seems to be granted by Council so I want to see measures in place to protect the future for our children alongside the revenue this will bring. I envisage this as being more capital and operational funding in the environmental and health/community sector, whether in Council or outsourced in the form of grant funding. Lincoln can no longer be termed an enviro town with the lack of environmental initiatives - Te Whariki landscaping is the closest we have to any sensible design. I want to see more incentive from the Council to develop in a sustainable way - not just building up but building sensibly. Permeable paving, green roofs, green walls, pollinator paths along footpaths, community spaces that reflect the indigenous landscape rather than a European representation. I am aware that you have brilliant ecologists working within Council and would like to see them have an input on planning matters, consents, landscape designs. I am happy to pay for this across the whole region. We need to do more - my children tell me they are worried about the choices that are being made with the natural environment and the precious resources this country has to offer. I want to see health, of people and environment, prioritised over economic health. The former feeds the latter.
Staff Recommendation	There are opportunities to encourage sustainable design within public and private projects. Within Council's capital projects, such as the Lincoln Town Centre Plan and the upgrade of Gerald Street for example, Council is taking direction from in-house mana whenua representatives Te Pou Mataaho on the incorporation of Te Mana o te Wai in the form of raingardens and kai gardens. It is envisaged that the community will be consulted as to how public space in the town centre can be used for amenity and function. One of the projects main objectives is to enable safe non-motorized transport modes within the township thus encouraging walking and cycling in our communities. Council is also planning to construct a new Park N Ride facility to cater for the further bus services Environment

	Canterbury is planning for Lincoln, which includes direct to city services, which will assist in improving transport sustainability and emission reduction for Lincoln. Council will also be extending Meijer Drive through to Boundary Road, installing new sports fields, a new Dog park, walkway and cycleway links, and native plantings. We will also be retaining the area of established native Beech trees on site and planting more native plants, especially along the upper reaches of the Liffey (which is a beautiful vista).

Comments:	**reduce the number of staff at SDC, repair the Sheffield war memorial swimming pool.**
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	129.25
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	**it is not a community pool. It is a designated war memorial. SDC has been negligent in its maintenance of this war memorial for a number of years. Fix the war memorial, the community wish to have their war memorial repaired**
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	129.26
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	The Sheffield pool is a war memorial, therefor consultation should have taken place with the ministry of veteran's affairs, heritage NZ, Returned Service Association NZ and any past or current service personnel. Having contacted all four I am advised that no consultation has taken place at time of writing. The war memorial does not belong to SDC, it belongs to the community, they built it with a combination of government subsidy and local donations. What plans do SDC have to ensure that some type of war memorial remains in place for future generations should the pool ‘tub’ be removed? Apart from just closing the pool to save money what alternatives have been considered, by council, to ensure this valuable war memorial and community asset remains in place?

Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	129.27
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	The Sheffield Waddington area will grow over the next few years, so an economic strategy makes sense.
Staff Recommendation	It is acknowledged the submitter has said no, however, in the comments has noted the Economic Development Strategy makes sense in the Sheffield and Waddington Area. Council will consider their feedback in strategy action planning.
Point Number	129.28
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	providing those services have real benefits to the community and are not just put in place to make life easier for council employees.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	129.30
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	*Reduce the number of staff at SDC and focus on roading infrastructure before anything else. Our roads are a disgrace and overseas visitors must wonder why on earth they are the not of a higher standard. Continuos patching over and over again cannot be cost effective.*
Staff Recommendation	Submission is acknowledged by Council. Staff note the support for prioritising roading infrastructure. Catching up on renewals delivers value for money in pothole prevention.
Point Number	129.31

Category	Activity > Other Categories identified by Staff > Speed Management
Comments:	Reduce speed limits on Wiamakariri/Oxfrod road running through waddington.
Staff Recommendation	Submission is acknowledged by Council. Speed reductions on Old West Coast Rd were recommended through our full speed management plan, however this was not supported through consultation with significant opposition. Council is awaiting central government direction on how speed limits are to be managed and update our full speed management plan accordingly.
Point Number	129.32
Category	Activity > Other Categories identified by Staff > Road Safety
Comments:	fix our roads properly, reduce speed limit on SH73 through Sheffield. Put up more signage advising people that there are children and others walking through both Sheffield and waddington.
Staff Recommendation	Submission is acknowledged by Council. Speed limits on State Highways are managed by NZTA. Council has made submissions supporting the speed reduction through these locations. Council has submitted to NZTA for additional crossing points for our townships based on SH. Additional signage is not typically successful as research shows the majority of road signs are ignored by drivers.

Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2
Point Number	130.7
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	
	Comment: There is a massive need for a decent indoor sports facility. Darfield High School basketball court isn't full size so it would be awesome if the rec centre could provide a full court, like West Melton.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	130.11
Category	Questionnaire > Matters For Community Guidance
Comments:	
	Question: Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.

Point Number	130.12
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	Could we look at doing more for the Malvern area? Such as building a gym facility within this complex? Darfield lacks places to maintain fitness during the winter months. If we want a healthier Malvern for years to come, I would like to see a better health and fitness sector. That doesn't involve trekking into Rolleston for this. Giving Darfield a well-resourced Gym and in the future an indoor year-round swimming centre would be great.
Staff Recommendation	Submission is acknowledged by council.
Point Number	130.13
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	It is a great pool and a wonderful alternative to Darfield. Darfield pool gets too full of people. Alternatively, make Darfield indoor pool open year-round.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	130.14
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	1.3 million isn’t a lot. It won’t go far, needs to be more.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	131.7
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities

Comments:	We need to have a purpose-built gymnastics facility in Rolleston or have land made available to build a facility - we have the largest gymnastics club in the South Island that has now reached its maximum in numbers due to facility constraints. The mayors welcome letter in 2021 after the last LTP stated" Following your calls we will build artificial turfs to support Hockey and Football, New Gymnastics facility," the first 2 were ticked off but there has been nothing done about the Gymnastics facility and no information provided at all to why this has not progressed. Affinity are the largest sports club and registered charity offering sports and recreation in the Selwyn district but receives no support from Council.
Staff Recommendation	The submission is acknowledged. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input. This excludes existing or proposed Council facilities as part of the Long Term Plan. Staff recommend that this facility be included as part of a wider community facility funding and planning project with gymnastics as a potential individual case study along with other facilities such as a performing arts and a military museum or similar to provide a variety of examples.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**

Staff Recommendation	Submission is acknowledged by Council. [

Point Number	132.9
Category	Activity > Chlorination
Comments:	Not happy about chlorinated water, it smells like a swimming pool and tastes disgusting.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an

	exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	132.10
Category	Activity > Potential Requirements To Fluoridate
Comments:	Against fluoridated water. Why would you fluoridate water to protect teeth when the reason kids teeth are rotting is because they are not drinking water. They are drinking juice and other sugar filled rubbish. It's bad parenting, educate the parents.
Staff Recommendation	The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health
Point Number	132.12
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	I have concerns about the additional time and costs associated with implementing this consultation policy. Especially in an era of ongoing rate rises and red tape. Seeking guidance or input from Ngāi Tahu is encouraged but this should be at no cost to rate payers with no time delay and be non-binding. Ngāi Tahu are a very wealthy and successful business who do not require rate payer support. Any decisions impacting ownership transfer of council / rate payer owned assets. Or reduced / restricted access to assets needs to be democratically voted on.
Staff Recommendation	Council acknowledges the concerns raised. However this policy is a legal requirement. All councils in New Zealand are obligated by the Local Government Act 2002 to adopt a Significance and Engagement Policy.

Point Number	138.2		

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**

Comments:	I support it but the budget of $1.3m appears exorbitant
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Comments:	Build a gymnastics facility, or provide land for a gymnastics purpose built facility which can help the community.
Staff Recommendation	The submission is acknowledged. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input. This excludes existing or proposed Council facilities as part of the Long Term Plan. Staff recommend that this facility be included as part of a wider community facility funding and planning project with gymnastics as a potential individual case study along with other

	facilities such as a performing arts and a military museum or similar to provide a variety of examples.

Point Number	146.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** A large rates increase is unacceptable		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP		
Point Number	146.2		

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** A large rates increase is unacceptable, and there is limited growth in Leeston to justify this investment
Staff Recommendation	Staff recommend this submission be acknowledged. Population growth predictions have been taken into account in relation to this matter.
Point Number	146.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements

Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes two indoor courts. **Project cost:** Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million) **Estimated impact on rates (per year):** $19.91 **Funding:** Rates: 57% Development contributions: 43% * **Comment:** this should be located near or at Darfield high school so the facility is well utilised.
Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.
Point Number	150.3
Category	Activity > New Public Transport Services
Comments:	we need transport from Darfield to Rolleston. A Selwyn connector, only once or twice a day. Our young people can get to youth hub in Christchurch, if they get 1 bus from Darfield at 7am. Yet they can't get to the new youth hub in Rolleston.
Staff Recommendation	Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service. Council is aware that this needs to cater for younger and older residents to access services that are being consolidated around our main townships like Rolleston and Lincoln, including the links they

	provide with PT services to the City.

Submitter Number:	151	**Submitter:**	Paula McLeod
Point Number	151.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** Would be good if Darfield was included in this. But ultimately affordable public transport should be a bigger priority		
Staff Recommendation	Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service. This would include linking larger townships like Darfield to Rolleston and PT services based there including connections to the City.		
Point Number	151.2

Category	Activity > New Public Transport Services
Comments:	I'd also like to highlight the need for public transport between Darfield and Rolleston eg the Health Hub for teenagers in Rolleston is amazing but currently inaccessible for our Darfield students
Staff Recommendation	Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service. Council is aware that this needs to cater for younger and older residents to access services that are being consolidated around our main townships like Rolleston and Lincoln, including the links they provide with PT services to the City.
Point Number	151.6
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	You close this pool and those people have to travel further to another pool, not to mention the Darfield pool can be very busy, especially with all the community sessions added in and limiting the public use. The upgrades to the Darfield are debateable as to whether they were necessary given a roofed facility that could open year round would have been a better option.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Submitter Number:	152	**Submitter:**	Michael van Ee

Point Number	152.1
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** I am a big supporter of public transport systems however Canterbury's busing network is so sub par that this facility will no doubt be under utilised. Why would anybody drive any distance to a park and ride facility then park up their car in order to effectively double their commute time. According to google a bus trip from Rolleston to the cbd is 1hr in peak traffic and only 30 minutes by car. Who would spend an extra hour commuting per day so that they can use the bus and that is assuming you destination is somewhere close to the bus route, some would but not many. I would support a park and ride at the train station if there was a commuter train from Rolleston to the CBD that stopped in Hornby as it would not share the same congested roads as a bus does but a bus park and ride makes no sense whatsoever.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. The proposed Park N Rides, and the success of these needs to be paired with the uplift in PT Services required to be provided Environment Canterbury, in particular the direct to city services that do not stop often like the current 85 Rolleston to City Service. Environment Canterbury is planning to increase the frequency of the 5 Metro bus service and investigate additional direct and express PT services to the City, and eventually connecting to MRT in the City. The location of one of Councils Rolleston Park N Ride facilities is next to the main rail line should in future rail passenger transport be considered viable.

Point Number	152.8
Category	Activity > Chlorination
Comments:	The decision not to pursue chlorine free status is very disappointing. I am currently spending more on water filters and medication to counter the negative effects of chlorine and would happily pay for the rate increase to remove this substance from our water supply. Surely the new government would open to changing the rules to more reasonable standard.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	152.9
Category	Activity > Providing safe drinking water
Comments:	ECan's continued mismanagement of Canterbury's water is a disgrace. It will no doubt cost ratepayers dearly in the not-too-distant future.
Staff Recommendation	The submitters comment is acknowledged.
Point Number	152.10
Category	Activity > Rolleston Transport Improvements
Comments:	Bus based transportation solutions to reduce climate impact and reduce congestion are a waste of time and money, they are far too

	slow to be a reasonable replacement for car transportation. Busses are an important community service for those who need it but is simply too uncompetitive to be a realistic substitute for car transportation. Direct cycleways from Rolleston and Lincoln to Christchurch's cycle network would be better money well spent than a park and ride facility which is a laughable bad idea.
Staff Recommendation	The Greater Christchurch PT Futures Business Case identified that further investment in improved PT services and infrastructure will have positive benefits. This will reduce the use of single occupant private vehicles that in that in turn will reduce emissions and congestion and provide people with an affordable transport option. With the move to a fully electric bus fleet this will also assist in emissions reduction. The aim of PT Futures for Greater Christchurch is to put PT services on the same of not better basis than private vehicle travel in peak times.

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million		

	Estimated impact on rates: Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding
Point Number	154.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre.

	Project cost: Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**

Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes two indoor courts. **Project cost:** Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million) **Estimated impact on rates (per year):** $19.91 **Funding:** Rates: 57% Development contributions: 43% * **Comment:** This would be an amazing asset to our community and surrounding villages. It is long overdue, the demand for indoor space at Selwyn Sports Centre and Rolleston is nearly at capacity and it is hard to get court time. Not having to travel to Rolleston for sport would also save costs while increasing physical participation in our community. Inside court space allows activities to flow and not be cancelled. It would be great for the Schools to also have access rather than having to travel to Rolleston and would save a considerable amount of money on bus hires. With the increase in population this would be a valuable asset to have access to.
Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.

Comments:	I believe the council has deliberately not maintained upkeep or appropriately advertised this awesome community swimming pool as there has been intention to close for some years now. This facility needs to remain open to service the community. There is a strong support in the community for this facility to remain. The Darfield pool redevelopment was not well thought out as the high school couldn't even properly run their swim sports due to a platform blocking off a lane. Whoever designed this needs to realise and learn from their faulty design process and this strange part of the design needs to be removed.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Comments:	Our number one priority needs to be passenger rail from Rolleston to Christchurch to Rangiora. I haven't researched what the problems are getting this up and running (deliberately - I don't think there's any point in getting mired in all the technical details), but it seems to offer too many advantages to present and future generations to accept that we're not working on this. I know there are buses into the city and beyond, but they add more to road congestion than trains would. It seems nuts that this service isn't under construction already.
Staff Recommendation	The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case considered a wider passenger rail service using the existing rail network connecting Rolleston to Rangiora. This could have merits in the future if combined with a wider regional passenger rail service. But with small projected patronage, large investment needed for rolling stock and infrastructure (on a rail network managed by others), and that there is no CBD connection makes this currently not worthwhile.

Comments:	The mixed rural/town nature of the Selwyn District and our more recent housing development choices have increased car dependency. If we are serious about a sustainable Selwyn, valuing what we have, and being recognised for good community design, then creating a range of efficient and appealing alternative transport options is essential - for connecting people within our towns, between our towns, with Christchurch city, and with the outdoors. The Park and Ride facilities described could contribute to this if the advantages of using them were made clear.		
Staff Recommendation	It is intended that the proposed Park N Ride facilities are positioned and integrated into townships to support higher density and sustainable living outcomes sought by Council. They are perhaps better referred to as future 'transport hubs'. Council is planning that these improve access to core PT services accessible by the wider district.

Comments:	**Question:** You told us you want to see better access to public		

	transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** So $11.6 Million for a carpark?
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. Park N Ride sites need to provide a level of service that aligns with the increased bus services including bus parks, shelters of sufficient size, secure vehicle parking, bike stands, lighting and all-weather pavement surfacing. They have to be safe and follow CPTED requirements for potential 24/7 use. This type of level of service attracts increased patronage and use of bus services, which is the objective.

Comments:	But 1.3 million?
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology.

	Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Submitter Number:	163	**Submitter:**	Matt Marquis
Point Number	163.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** if you are making Rolleston the 'hub' of Selwyn (which makes sense), Rolleston needs to be accessible from other		

	areas. You can't get a bus from Darfield to Rolleston?? Makes no sense.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service. This would include linking larger townships like Darfield to Rolleston and PT services based there including connections to the City.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46

	Funding: Rates: 100% **Comment:**

Comments:	It is vital to our young people and especially teenagers to keep this pool open. We live in Springfield and the access to activities (outdoors and indoors) and socialising is extremely limited, costly and time consuming. This is their local activity with their local friends. Rural communities should not be expected to always go to main centres at the cost of the individual, plus it would reduce the load on Darfield. We need to support more remote communities. Our children love this pool. It is a life saver for all of us. The diving board is the main attraction.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

It's getting ridiculous. You'll find a notion in most of the smaller, untouched communities that the big centres get absolutely everything and yet smaller communities just get things shut down (Eg. Proposed shut down of the Sheffield Pool). There is option for a		

	Selwyn Bus Network to allow for travel around the district, even just small routes like Springfield - Darfield, Darfield - Rolleston, Hororata - Darfield, Lincoln - West Melton etc. May be nice to actually cater for every community in this district instead of blowing the budget on the big centres. Great, they are growing, but not everything should be focused around them. This network would significantly improve financial availability in Selwyn, allowing those who aren't keen on Driving everywhere to be able to bus into the communities they wish to travel into for a low fare. This can be communicated back to ECAN, so I would suggest that both SDC and ECAN collaborate on this network to ensure that every community is getting SOMETHING out of this Long Term Plan.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service. Council and Environment Canterbury are working closely together on how to improve PT in the district.

Category	Activity > Other Categories identified by Staff > Growth
Comments:	Secondly, focus on your minorities. Leeston and Rolleston will grow and that's fantastic, but whgenda. That was two years ago. I'm sure if we actually uat about West Melton, Sheffield, Springfield, Arthur's Pass, Castle Hill, Darfield, Kirwee, Coalgate, Whitecliffs, Hororata, Glentunnel, Greendale, Burnham, Dunsandel, Doyleston, Southbridge, Springston, Tai Tapu, Windwhistle? All these communities that are CONTINOUSLY undermined and given zero attention by the council apart from when the voices are so loud they cannot be ignored anymore. There's minor things you've done, but these are things that HAVE to be done, like the water piping in Springfield or the Malvern Rec Centre in Darfield. I question again, where's the public transport network. There is no buses, there is no rail even that is just sitting there being used for coal and tourists. A lot of people in these underserved communities are frustrated because all their rates just go to Rolleston, Lincoln or Prebbleton and they get nothing in return. Make use of it, give these communities the services they need before you prioritize new things in the main centres. Healthcare centres, where are they? Arthur's Pass, Castle Hill, Springfield and Sheffield residents all have to drive to Darfield to get medical care and all the way into Christchurch for Hospital care. Why isn't this a priority? The ambulances tend to take 30 minutes to an hour to reach some of these rural communities and by that point someone could've lost their life! Education could also be something to look into, with significant numbers of Selwyn residents choosing to enrol their children in Christchurch based High Schools. If we really want to grow this district, we need to look at our Schools. Rolleston College is suffering immensely with their upgrade being delayed, and as the only other High School alternative, kids flock away from Darfield High after Year 7 and 8. Again I question why the council hasn't been communicating with the government and pushing for change, because this could be a driving factor for people to leave the district or choose not to move here in future.
Staff Recommendation	Council continues to identify improvements for each town in the district. Council works with government to advocate for better health and education services for its residents. Council will be investigating what further PT services can be provided across the wider District, further to what Environment Canterbury can provide.

	However, it is expected these will need to be fully funded by users and ratepayers subject to further Council consideration through subsequent Annual Plan and Long-Term Plan processes. It is envisaged residents in the wider district can drive to the Park N Rides to then access PT services such as direct to City
Point Number	168.9
Category	Activity > Planning Further Community Facilities
Comments:	Let's stop threatening to close public spaces, like what was attempted with the community halls. Focus on what people actually need. That is NOT spending $300,000 on improving relations with Mana Whenua. All well and good you want to do that, but there is absolutely no need to spend such a ridiculous sum of money on improving relations. That is NOT providing expenditure of $143,000 "removing objects at Leeston Park" as a option for people to vote for. I question where these figures come from, because there is absolutely no way such a significant sum of money is spent on removing objects and improving relations
Staff Recommendation	The submission is acknowledged. Selwyn District Council is committed to responsible use of ratepayer funds. Investing in relationships, and actively working with Iwi, is not just the right thing to do under Te Tiriti o Waitangi, it is also an efficient way to achieve positive outcomes for all Selwyn residents.

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Just why? If you're going to close the pool, then use the $1m to upgrade things around Sheffield instead! Have you thought about Sheffield School? Because basically closing this pool limits their access to Swimming Sports and PE lessons in the pool, so unless you're proposing to give the school funds to build a new pool in school grounds, what's the point? This will stretch the school's budget on the basis they'll need to hire buses and such just to transport kids to the Darfield pool, which is also going to need to be hired!
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	168.13
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Firstly, let's stop the mickey and stop closing community services. Of course, the Sheffield pool is used less than other pools, it's got a tiny population! Is that an issue? No!
Staff Recommendation	Submission is acknowledged by Council.

Submitter Number:	169	**Submitter:**	Details Withheld
Point Number	169.1		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**

Submitter Number:	170	**Submitter:**	John Quigley
Point Number	170.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option		

	Comment: Increase train services from Selwyn to Chch
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case considered a wider passenger rail service using the existing rail network. This could have merits in the future if combined with a wider regional passenger rail service. But with small projected patronage, large investment needed for rolling stock and infrastructure (on a rail network managed by others), and that there is no CBD connection makes this currently not worthwhile.

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	This community pool is a assett for the Sheffield community. The council have recently built brand new bathrooms and toilets for the pool. It is one of the last local pools which is used for the local school to use and for our community to use. I would think if you asked the community to help with the maintenance of getting the pool up to scratch you would get a lot of good feedback. Sheffield is small and this pool has been a wonderful place to go after work and weekends for a swim to clear your head. Sheffield doesnt get much we have a pie shop and a school. The is running the pool was a way to connect with community i think the pool should keep open
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Sheffield school students should be able to use a pool facility. Water safety is of enormous importance to nz kids - i suggest the pool either be repaired or a new pool built at Sheffield school by way of partially funded SDC and partial fundraising. Driving to Darfield is not an option for all residents either (plus not even open in winter).
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	176.6
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	I grew up in Sheffield, Its not feasible for parents and general public to have to travel to Darfield, Darfield already doesn't have enough space for the public to use with mutiple bookings and lanes closed of. I drowned at the river when I was 5 & the Sheffield pool is essential for teaching the community how to swim and prevent deaths or serious complications from drowning. More needs to be down for Sheffield & Darfield communitys not just Rolleston, Rolleston pools are always booked out and even though paid my entry fee I got booted out of the only available lane because someone wanted to have a teaching session in it.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed

	facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Point Number	179.7
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Where possible dip deeper into reserves and contributors to offset rates. They are there for the rainy-day situation and for your ratepayers this - - three years of 15% increases - is shaping as the rainy day.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	179.10
Category	Activity > New Public Transport Services
Comments:	If Selwyn ratepayers are paying for public transport it should be for public transport in Selwyn, not subsidising families to transport there children into Christchurch for schooling. All the services head to Christchurch, why is there no "loop" option in Rolleston or between Lincoln and Rolleston?
Staff Recommendation	Council is funding the infrastructure needed to support and increase the use of PT in the district and beyond as part of an agreed collaborative approach across Greater Christchurch. The existing 820 Metro bus services links from Burnham to Lincoln, including the townships in between. Environment Canterbury is also investigating 'On Demand' PT Services as another option within larger townships.

Comments:	Pools lose money so having one 10 minutes away is no major loss to the community.
Staff Recommendation	It is acknowledged that the submitter has selected to close the Sheffield Memorial Pool.
Point Number	179.13
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Stick to roads and water and maintaing assests first, whch the LTP suggests the council is missing the mark on in some areas Until the core roles are under control, leave the business to the businesses.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy whilst there are other issues that they view as more pressing. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and

	enabling economic development to occur as prosperously as possible to benefit the whole community.

Submitter Number:	180	**Submitter:**	Phillipa Lamborn for Darfield Residents Association
Organisation:	Darfield Residents Association		
Point Number	180.3		
Category	Activity > Other Categories identified by Staff > Road Safety		
Comments:	As a member of the Darfield Residents Association I have been asked to write to the council on behalf of our group with regards to two areas interest we have needing road crossings. ONE area that desperately needs a road crossing, for the safety of the children at both Darfield High School and Darfield Primary, is at close to the Cardale/Greendale intersection. We have already tried to contact the council regarding this and was declined on the basis of an upcoming overall roading plan, which has since thankfully been scrapped by the new government. With no set roading plans we are asking for a pedestrian crossing, or at the very least, an island on Greendale Road to be placed at the sidewalk that goes along the past the Darfield Pool. This crossing is used a lot by students of both schools and parents who are sometimes accompanied by child under 5. Given a corner in the road that is very close to this proposed crossing and the speeds at which some travel this road we would like this crossing to have signage and believe a pedestrian crossing is necessary. TWO there is a second area of pedestrian concern. The corner of Bray and Cardale Street. This should be set on the South Terrace side. There are 3 companies at least that frequently have truck and trailer units on this road. I realise that the council has no control over pedestrians alongside South Terrace but it has full jurisdiction of Bray and Cardale. Along with the constant flow of truck and trailer		

	units there are often large trucks parked on bray street blocking the view of children and parents at this intersection. Both of these intersections seem to only have two busy periods during the day and the Darfield Residents are NOT asking for a speed reduction zone. Thank you for your consideration of these two proposals. Phillipa Lamborn Member of the Darfield Residents Association.
Staff Recommendation	Submission is acknowledged by Council. Council has applied for $2.6m to improve safety infrastructure around schools within Selwyn, 24-27 NLTP. Our Interim Speed Management Plan is still focused on lower speeds around schools, through variable 30km/h.

Staff Recommendation	Submission is acknowledged by Council.		
Point Number	184.2		
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool		
Comments:	Please see my attached supporting document.		
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified.		

	The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	189.6
Category	Activity > New Public Transport Services
Comments:	I would also focus on the potential of train transport for future.
Staff Recommendation	The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case considered a wider passenger rail service using the existing rail network. This could have merits in the future if combined with a wider regional passenger rail service. But with small projected patronage, large investment needed for rolling stock and infrastructure (on a rail network managed by others), and that there is no CBD connection makes this currently not worthwhile.

Submitter Number:	190	**Submitter:**	Caleb Morton
Point Number	190.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** Ideally the park and ride options would work alongside possible Mass Transport options such as rail or light rail.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. The location of one of Councils Rolleston Park N Ride facilities is next to the main rail line should in future rail passenger transport be considered viable.
Point Number	190.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Comments:	I do not Support the closure of the Sheffield Community pool we need a place for our Community to swim and also a place to teach the 100 students at Sheffield school to learn to swim and also Springfield School I dont think your 1 million is correct to upgrade it this is well over priced. cant you give this back to the Sheffeild Community along with the 290K so they can fix it and look after it from then on ? Also why take all the water out of the pool? the best way to stuff a pool is take the water out ? is that why its been done ? Can your other community pools fit in 100 more kids for swimming leassons ? I have head Darfield kids battle to get space in the Darfield pool is that correct? Please don't shut the pool.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council
Point Number	193.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre.

	Project cost: Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**

Submitter Number:	197	**Submitter:**	Details Withheld
Point Number	197.3		
Category	Activity > New Public Transport Services		
Comments:	We are keen to learn more about funding options that would benefit all people who live in Rolleston and possible less impact on ratepayers. I suggest to Selwyn and Christchurch Council to focus fund to public transport first such as more bus and possibly a train station line that would connect North and South Canterbury to Central Christchurch rather than building more car parks in town.		
Staff Recommendation	The Greater Christchurch PT Futures Business Case Study considered the best approach for planning public transport within Greater Christchurch. Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service. How the wider region is serviced by PT is a matter for Environment Canterbury under the Regional Public Transport Plan. Environment Canterbury will be investigating a possible regional passenger rail service. The InterCity bus service can provide wider regional and national bus service connectivity.		
Point Number	197.6		
Category	Questionnaire > Policy Changes > Policy Review - Other		
Comments:	Would love to hear more about the policy changes and hopefully to have a wider campaign to spread more awareness about the changes and long-term plan to keep Rolleston residents and of course the rest of Selwyn district informed		

Staff Recommendation	Council acknowledges the submission and notes the concern with the level of information provided. Improvements regarding the presentation and provision of information will be considered for future consultations.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	200.7
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities

Comments:	we are in the need for a larger Gymnastic facility so that the growing community demand can be met
Staff Recommendation	The submission is acknowledged. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input. This excludes existing or proposed Council facilities as part of the Long Term Plan. Staff recommend that this facility be included as part of a wider community facility funding and planning project with gymnastics as a potential individual case study along with other facilities such as a performing arts and a military museum or similar to provide a variety of examples.

Comments:	(as per previous comment). Taihoa on your council building upgrades - make do like the rest of us.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	203.11
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Move to more user pays instead of general levies in rates. Let the market decide if the service is of value to rate payers.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	203.12
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	The average proposed rates increase cap is misleading given you are proposing to front load with big increases and then slow down. The impact of compounding percentage increases will be devastating to older people on fixed incomes. Overall, you need to be really clear about what you should be doing and what are nice to haves - I'm not sure you are. For example, upgrading council buildings for more office space' tells me you haven't really read the room and ignoring the impact on rate payers. In terms of other policy changes, there is no requirement to weat increased costs for maori consultation. The crown has a treaty with maori - local government doesn't. Don't waste money being PC. In terms of climate, regional council are already hitting us for mitigation ,don't hit us twice. Another example of not reading the room was the mayor fronting for the local council NZ and giving a partisan view on maori ward referendum requirements. We should be saving money by exiting that lobby group and telling the mayor to butt out. Finally, developers are privatizing all the gains and the public is wearing all the costs of turning green field sites into subdivisions. They need to wear a lot more of the costs given this governments view on housing.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	203.14
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	Charge developers the cull whack for developing - don't let them privatize all the gains of developing a site and leaving us with the costs. Most of them don't even live hear so don't contribute to rates ongoing.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	203.15

Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	these can be funded out of operational efficiencies that new tools can deliver. Sharpen up your service design, tighten your operating model around must haves and tool around that.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Comments:	First, I wish to congratulate the council on taking the necessary bold step to address the inevitable effects of climate change on the Upper Selwyn Huts community. Moreover, I commend the council on acting wisely to maximise the resilience of the waste management system by choosing to put in a pipeline, for the council's compassion to be willing to be the banker for the costs incurred, and for the council's decision to only seek partial recovery of the costs from the affected residents. I believe that the council is on the right track but consider, based on my international expertise as a researcher into climate change adaptation of communities, that there is room to improve the council's plan, by tweaking it in places. I humbly make the following suggestions about how to do so, along with my main reasons. The suggestions have to do with how to best ensure the well-being of the community as they face the inevitable changes coming to them. My first overarching point is that the inevitable change being forced onto the Upper Selwyn Huts community is not of their own making. They share no more responsibility for climate change than other residents of the district, and indeed of New Zealand. Notwithstanding that as a concerned resident I have been trying largely unheeded for 15 years to alert the community to the inevitable changes afoot, Upper Selwyn huts community members are victims of climate change and cannot be merely thrown to the wolves, and especially not criminalised if they react to trauma they are incapable of coping with due to their vulnerability. I know of no other country in the world that currently treats its climate change victims in such a callous manner. It would be far from international best practice. I am certain that New Zealand will come to see it as unacceptable behaviour by territorial authorities once climate change

adaptation policies are fully developed. Therefore, I believe the council must be careful to avoid unwittingly doing so during this period of learning and exploring ways to address the need to assist communities adapt to climate change.

There are five main groups of affected licensees: speculators, recreational hut owners, young families, elderly retirees, and those with health issues. My concern is for the well-being of the latter three groups, whose well-being risks being grievously affected by the current plan, but which a slight adjustment to the plan could address. The effects on speculators and recreational hut owners are addressed first.

(i) Speculators

Several licensees have made irrational business decisions out of ignorance. Unfortunately, the earthquake disaster and subsequent council (unwise in my opinion) decisions to allow all residents to stay for 12 months of the year, to allow renting, as well as to allow people to obtain more than one licence to occupy Springston South Reserve, resulted in speculation by new and absentee licensees. I put the grievances of these affected pretend 'landlords' to the side. They made unwise business decisions. I do not believe that the council should be overly concerned about these licensees' failures to carry out due diligence. These licensees sought to exploit a loophole that enabled them to seek exorbitant rents for cheap 'properties' outside the mortgage market and got caught out. There has nevertheless been a clear breach of responsibility by both the council and real estate agents to have allowed such a situation to develop. It is not my place or concern to comment further, except to say that the historically unwise decisions (in my opinion) by the council have resulted in overcrowding of huts that are very close together and will make transitioning toward abandonment of the settlement difficult because of some licensees trying to maximise their investments.

(ii) Recreational hut owners

Some families have held licences over generations. They are who the licence was originally designed for. They were not affected by the original licence that required residents to vacate their baches for at least 3 months of each calendar year. They all have homes elsewhere. It is a sad loss of heritage for these families that they will not have their ancestral bach to visit any longer, but they are well able to adapt. I also put their grievances to the side.

(iii) Elderly retirees

For many decades the licence allowed up to 12 licensees to live for the full 12 months of each year in their hut. These licensees tended to be retirees because there was a waitlist. With the relaxing of the licence to allow all licensees to stay for 12 months of the year there has been an increase in such retirees who value the peace and quiet of the Springston South reserve and the adjacent natural environment. For many, who are poorer members of society, they spent all their capital to be able to do so. As it stands, with a 15-year horizon, a recent retiree will at 80 years of age be made homeless and largely destitute, having become evicted from their home, with their only major capital asset demolished at their own expense, and forced out of their social support and connections they have established within Selwyn District. This will have a drastic effect on their well-being. As a recent retiree, who now carries out volunteer work as a research associate professor mainly supervising Pasifika doctoral students and writing up research for publication, as well as volunteer support for youth with special learning needs at a local high school, in 15 years I will have spent 55 years of my life in the Selwyn district, with 40 of those at our bach at Upper Selwyn Huts. As a Samoan family our priorities are to our extended family and village obligations, not maximising our capital. Even though my wife could return to our family ancestral village in Samoa, I will not be able to and will be forced, homeless without capital, to leave the Selwyn district and my support networks. If, however, the horizon is extended to 30 years, it would enable this group to live/die as we have planned in good faith, to maintain our well-being.

(iv) Children/youth of younger families

There have always been younger families who sought to make the most of access to excellent schools and local universities, and who were happy to follow the rule of vacating their hut for 3 months each year. They rationally determined that by doing so they could also seek to escape the poverty trap facing lower-income families having to pay for rental accommodation. They planned to eventually purchase a property as they managed to save money for a deposit, made possible without the rental burden, or enable their children to do so while they hoped to retire in their bach at Selwyn Huts on the waitlist. With the relaxing of the licence to allow all licensees to stay for 12 months of the year, there has been an increase in younger families who have obtained licences for these excellent reasons. My family is an example from the period when we still had to vacate for three months each year. It has worked well for us, especially as we had a family ancestral home in Samoa to return to for a period each year. We remain grateful for the opportunity it has given our children. Our eldest is now a dean at Scots College in Wellington and a New Zealand rep. elite sportsman, mentoring New Zealand's young up-and-coming elite sportsmen and sportswomen. However, with the currently planned 15-year horizon, children and youth of younger families will become torn from their support networks,

schools, and plans to attend university from home. But once again, with a tweak to a 30-year horizon, it would allow all current younger families to ensure their children can have the best opportunity to develop into independent successful adults through maintaining their current support networks within the Selwyn district.

(v) Those with health issues

Several licensees have inherited licences from families who used their baches for recreational purposes. These licensees suffer from health issues, and for them their licences are lifelines. An extension of the horizon to 30 years will most likely ensure that all of these current licensees are able to spend their days in the best possible well-being, by maintaining a connection not only to their childhood memories, but also to the benefits from a relatively safe community environment and established district-wide support networks.

In conclusion, I argue that there are only three tweaks to the current plan that are necessary, namely: to increase the horizon to 30 years, to stop renting, and to stop the opportunity to hold more than one licence. The current plan to charge a targeted rate for 15 years to cover the cost of the wastewater upgrade through a pipeline should be kept. Also, the plan to stop the transfer of licences after 10 years to other than one's own immediate family, should also be kept, or perhaps extended to 15 years. If renting were stopped, those currently with more than one licence would most likely transfer their extra licences to others, and absent speculators would likely divest themselves of theirs. This will take pressure off the community and enable graceful transitioning toward the inevitable abandonment of the settlement.

I also wish to make three comments. My first comment is on a reason given by the council for the current plan; that of the inordinate time and cost to the council to manage the reserve. This appears to be the reason for the currently planned 15-year horizon. Both climate change and the upgrade to a pipeline for waste management would enable a longer horizon. The reason given by the council is nonetheless understandable. As a victim of bullying and vandalism within the community, I can well understand the council’s frustration, as it also brings despair to me to see it continue: the latest being the removal and dumping of no-parking signage from along the stop bank. But I wish to suggest that the council risks carrying out inappropriate collective punishment if this is a/the reason to implement a 15-year horizon rather than say a 30-year horizon. I suggest that the main cause of the bullying and vandalism that has wasted so much of the council’s time and resources was the relaxing of the licence and the subsequent emergence of speculation, which the council has to take some responsibility for. With the removal of the opportunity for speculation, I argue that the inappropriate use of the reserve will also evaporate because once again the community

	values of family life, peace and quiet, and recreation and conservation, will reign, in keeping with the long-term vision that Ngai Tahu and the Department of Conservation have for the area. I argue that this would be the best possible transition and would not need to be rushed through a 15-year horizon. A 30-year horizon would be fine. My second comment is on the planned investigation to ensure all huts associated with licences are compliant. This is mainly relevant to ensure rental 'properties' are up to standard and renters are not being taken advantage of by licensees. Of course, if the council decides to not continue to allow renting, this rationale becomes obsolete. But I believe it is crucial for the council to recognise that if the investigation becomes focused instead on the huts of the elderly, younger families, and those with health problems, they do so to help these vulnerable people enable their huts to come up to standard, and NOT to do so as a means by which to evict them, make them homeless and destitute; having to leave the district and their support networks. To evict such vulnerable people would only throw them into further ill-being and impose unnecessary serious social and psychological hazards onto them. It would be contemptuous behaviour on the part of the council to do so and be a failure to live up to basic tenets of cultured and civilised life. Rather the council should use an investigation into compliance of the huts as a basis with which to plan how to best assist these most vulnerable members of the Selwyn district community. It will most likely be to assist with them getting their huts up to standard. My third comment is on the planned inclusion of a code of conduct clause into the licence. This is well overdue. It will empower the council to address the bullying and vandalism that has plagued the community since the relaxing of the licence. Care will however be necessary in the implementation of the clause because of the inevitable attempt by those who are currently bullying to use the clause to further their bullying of vulnerable people. The council will need to seek professional guidance about how to proceed best to investigate complaints that are made.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Hut

Comments:	**Question:** Do you support the closure of Sheffield Community Pool? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	208.3
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	i support gifting the pool back to the community fornus to fix and continue to use. We have 5 kids that love the pool, but Darfield is too far away for a quick dip, or to drop the older kids there while i continue jobs at home. We will only use the Darfield pool via our swimming lesons with teagan. the local teenagers from sheffield and surrounds come and enjoy their day or atleast multiple hours at the pool. Where are they meant to now go? Sheffield and surrounding areas needthe sheffield pool to remain usable.

Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	this is the only community assest we have left in our area where the community come together and meet / interact with other locals and our kids get to play together. Its also our childrens school pool where educational swimming which is part of the ciriculum and swim sports takes place. Its so important that all kids learn to swim specially in this beautiful country we live in to prevent these horrid drownings. This is also a momorial site which honors the local people who fought for this wonderful country.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	209.7
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	its seems that the only areas the council want to do this in is Rolleston. This is definetly nit shared through the wider communities throughout Selwyn. We want our rates used for our local community assests. Boggest Wxample the Sheffield Momorial Pool
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. Council will consider their feedback in strategy action planning.
Point Number	209.8
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	put this money towards more important things like keeping commuity assests in their communities. Biggest example the Sheffield Momorial Pool.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through

	automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** Bus routes should be considered from Springfield and Sheffield and Darfield should be considered as a park & ride hub.		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Council will be investigating what further PT services can be provided across the wider District, further to what Environment Canterbury can provide. It possible that additional bus services for Darfield could result but unlikely beyond this in the foreseeable future. Currently Darfield has a lot of on street capacity to cater for bus Park N Ride, but a future facility could be warranted paired with		

	a possible rail PT service if this could eventuate as part of a wider initiative for a regional passenger rail service.

Point Number	214.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public		

	transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:** We can't afford to wait. We have to reduce carbon emissions **now.** Petrol prices are going to continue to increase. Public transportation offers a straightforward and immediate strategy to contribute to the reduction in emissions.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council
Point Number	214.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would

	have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** If the standard plan design is similar to the Lincoln Library and Service Centre then it would be fit-for purpose as well as aesthetically pleasing.
Staff Recommendation	The submission is acknowledged.

	Question: Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	214.8
Category	Activity > Council's Office Improvements
Comments:	The $3.7 million budgeted for Rolleston Council office improvements should not be funded. After covid we should have greater flexibility for working from home. As for additional office spaces, why not access all the great meetings rooms in all the council owned facilities around the district? This will not only ensure these facilities are being used but also allow people working at headquarters to get out and see the district they are working for.
	The $3.7 million could then be used for more essential services or development, like the sports facility in Darfield, or library and council community centre in Leeston.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.

Point Number	214.11
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	Agree with proposed changes.
Staff Recommendation	Submission is acknowledged by Council.

Point Number	214.12
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	It isn't possible to comment based on the information provided. What was the wording in the previous policy and what is it being changed to. The only comment I will make is that we need to ensure that mana whenua and iwi Māori become more involved in governance. This is crucial to creating a more equitable society. Their involvement needs to be more than just tokenism, it needs to allow mana whenua a voice in how we go forward as a bicultural society.
Staff Recommendation	Council acknowledges the submission and notes the concern with the level of information provided. Improvements regarding the presentation and provision noninformation will be considered for future consultations.

Point Number	214.13
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	This is not a central activity for the council. Not when our water, environment and social wellbeing should be prioritised.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy whilst there are other issues that they view as more pressing. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	221.9
Category	Activity > Other Categories identified by Staff > Rates
Comments:	SDC needs to critical slash its scope and remit within the district instead of parasitising the taxpayer and delivering mediocre half-baked services without accountability. I wish to see severe austerity measures imposed on the council to ensure that rates and debt levels are kept as low as humanly possible.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	221.10
Category	Activity > New Public Transport Services
Comments:	I do not support the notion that it's the councils role or function to provide public transport services. I strongly object to the state or local providing of services that cannot operate as a functional profit-generating business that returns meaningful dividends that translates into meaningful long-term self-financing and development. I am sick to death of rates rises, incompetent spending and the use of the

	local taxpayer as an endless pit of funding without consequence for the incompetence that has operated in local government for too long. For these reasons, I am strongly opposed to the council providing any services beyond the following areas and wish to see the scope of 'services' provided by the council seriously and meaningfully diminished. - Roading - Rubbish Collection - Water - Sewage - Consents
Staff Recommendation	Submission is acknowledged by Council. By means of national legislation Regional Councils fund and provide PT services, whereas City and District Councils provide the supporting PT infrastructure. Councils can possibly apply to establish 'exempt services' which are funded directly by them beyond what can be provided by a Regional Council.
Point Number	221.12
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	I do not support any policies that exceed or go beyond the mandate of providing simple and essential services (roading, rubbish collection, water, sewage and consents). The current financial plan proposed by SDC sees an untenable rise in rates, whilst adopting critical amounts of debt that will burden the district and taxpayer for decades to come. It's time for austerity and a sharp reduction in services. I'm strongly opposed to 'woke' policies that see DEI or similar veins of ideological extremism pushed into local and central government. One person, one vote - regardless of their skin color or cultural heritage.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	221.13

Point Number	222.12
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	This is to support Affinity Gymnastics Academy, the largest sports and recreation club in the Selwyn District, in their quest for a purpose-built club facility. Affinity plays a vital role in our community, and it is imperative that they have the necessary infrastructure to continue serving their members effectively. As highlighted in their proposal, the current building used by Affinity is not suitable for their needs, particularly as a gymnastics club. This limitation hampers their ability to provide quality programs and services to their members. As a parent of young gymnasts, I know that the children have to endure high temperatures in Summer and cold in Winter during their training sessions. Affinity has demonstrated remarkable growth in revenue and membership, reflecting their significant impact on the district.

	The Council's previous commitment to investigate the feasibility of a new building following the 2021 Long-Term Plan was a promising step. However, it is disheartening to learn that this initiative did not progress further. Now, as the Council embarks on the 2024-2034 Long-Term Plan process, we have a renewed opportunity to address this pressing issue. I urge the Council to prioritise the provision of a council-owned building or suitable land for Affinity to develop their own facility. This investment would not only benefit the club and its members but also contribute positively to the overall sports and recreation landscape in our district. I strongly believe that supporting Affinity's proposal aligns with our community's values of promoting active lifestyles and providing adequate resources for our local organisations. I trust that the council will consider this submission favourably and take decisive action to support Affinity in their pursuit of a purpose-built club facility.
Staff Recommendation	The submission is acknowledged. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input. This excludes existing or proposed Council facilities as part of the Long Term Plan. Staff recommend that this facility be included as part of a wider community facility funding and planning project with gymnastics as a potential individual case study along with other facilities such as a performing arts and a military museum or similar to provide a variety of examples.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	223.7
Category	Activity > Chlorination
Comments:	VERY disappointed about the continued chlorination of our water in Rolleston! Ridiculous that we pay so much money in our rates to continue having chlorination, despite prior hopes raised for exemptions. Now will have to fork out thousands of dollars for filters - and still continue paying for chemical-laced water regardless!
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies. Staff recommendation is that dechlorination is best achieved at a household level where costs are met by those who wish to benefit from chlorine removal.
Point Number	223.8
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	BUT need more specifics about what the council will do with the money.
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy if more information is provided about how the proposed budget will be spent. As discussed at the

	Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in Economic Development. The Council has a role in facilitating others and enabling Economic Development to occur as prosperously as possible to benefit the whole community. Every cent of spend will be scrutinised and planned for to ensure outcomes and returns are maximised from the spend. Action plans will outline this in detail.
Point Number	223.9
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Not at that price and NEED SPECIFIC DETAILS to understand how the money will be used exactly.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Comments:	finally the document is a succinct read but lacks the transparency of the previous long term plan which is unacceptable. Massive numbers and no detail.
Staff Recommendation	Council acknowledges the submission. The full Long Term Plan document will be available once adopted in late June.
Point Number	224.12

Category	Activity > Other Categories identified by Staff > Infrastructure Property General
Comments:	in reapect of capital spend the 2021 long term plan had 687m over the 10 year period (which you have been unable to deliver). You are proposing a 111% increase on this to 1.5b in a cost if living crisis. I note that within the cosultation document you state bridges are 38 percent more expensive roads and water supply systems are 27% more expensive and sewerage is 30% more expensive. Not sure how we get a 111% increase on the back of these highly debatable statistics. there is nothing in this consultation document around what you are doing to reduce costs within council, where savings can be made, what programmes are not working. That is simply unacceptable. The council seems like it is living in a bubble unaware of the economic times that ratepayers are dealing with. Review you capex, its rediculous and prove that you have robustly reviewed current spend within council.
Staff Recommendation	Submission is acknowledged. A large portion of the capital program relates to meeting the needs of a growing district. The growth related / portion of projects is funded through development contributions. The capex program has been reviewed and amended to enable deliverability.

	Comment: Comment:
Staff Recommendation	Submission is acknowledged by Council.
Point Number	225.6
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	is it possible for the pool to be user funded through admission fees? If local residents were willing to pay per use and that amount could fund the pool then keeping it open would be a good idea
Staff Recommendation	Submission is acknowledged by Council.
Point Number	225.7
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	While the amount sounds high and the statement is vague I think there are substantial opportunities to both improve council services and improve revenue from the councils facilities. For example, the council has a first class sports facility and swimming pool in Rolleston that don't have any way to purchase access to or sign up for online. There would be substantial opportunities to generate revenue by selling class access, pool passes and billed memberships online. There are a number of commercially available systems to do this easily —including some developed right here in Christchurch. Implementing a facility management system like this would also substantially improve the user experience.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Point Number	226.1		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30		

	2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [
Point Number	226.2

Staff Recommendation	Submission is acknowledged by Council.
Point Number	227.10
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	Council has no money and keeps deferring projects forward from previous 10 year plans and needs to stop. Finish projects already agreed to. Anything that is over the original budgeted price should be cancelled. Procrastination shouldn't cost rate payers more money because the council keeps putting projects back. Also a restructure that created 63 new jobs at the same time as a cost of living crisis hits? Unbelievable. No wonder the rates are going up fast.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	227.11
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	Sounds like the council is bound by law change so the changes will have to be made.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	227.12
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Council has no money and keeps deferring projects forward from previous 10 year plans and needs to stop. Finish projects already agreed to. Business can sort out their own economic development. Council needs to stick to its core responsibilities.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in

	economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.

Submitter Number:	229	**Submitter:**	Jason Day
Point Number	229.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** there is no need for another park in this area , public transportation need to be on rail not buses!
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. With Councils Preferred Option a Park N Ride at Lincoln is planned for 2026/27. This timed to coincide with a planned increase of direct bus services to the City by Environment Canterbury. The existing Park N Ride at the Council HQ at Rolleston is well used, including on road parking around the vicinity. Further capacity is available in the unformed area north of Kidman Street used also for the Synlait Park N Ride. The timing of the two new Rolleston Park N Rides, planned between 2029 and 2033. The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case considered a wider passenger rail service using the existing rail network. This could have merits in the future if combined with a wider regional passenger rail service. But with small projected patronage, large investment needed for rolling stock and infrastructure (on a rail network managed by others), and that there is no CBD connection makes this currently not worthwhile.

Build a community recreation and sports facility at Darfield that includes two indoor courts.

Project cost:
Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million)
Estimated impact on rates (per year):
$19.91

	Funding: Rates: 57% Development contributions: 43% * **Comment:** As a player and coach and ratepayer in Darfield I believe the Council needs to look at more courts at least three so that teams have areas to warm up, depending on their sports. If you fail to do this now it is only going to cost more in the future. We don't want to be like West Melton where there isn't any room to do anything. The wider Malvern area uses the sports facilities in Darfield and to offer the indoor area for them would be a huge benefit for them. I feel you need to do things right from the beginning and consult with those users as well. I would urge you to look at more than two courts for this facility.
Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.

Submitter Number:	231	**Submitter:**	Trudy Sykes
Point Number	231.2		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	My long-term plan for the district would be to somehow work with the council on how we keep the Selwyn huts, I do not want to see them be demolished in 15 years as the council has purposed. This is a beautiful well-kept historic large community from all walks of lives young and old that looks after and cares about each other. Residents have spent their life savings on these homes. How do you remove 96 homes with the way the housing shortage is? Where will these old residents and young families go? Emergency housing is not an option there are tens of thousands on the waiting list now let alone in 15 years. Some families have been here 4 and 5 generations. The whole hut community contributes financially to the businesses in the district. There has to be a way we can move forward together which would include managing climate change figuring out the best way for the sewage system.		
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a		

	decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** stop wasting money on maori names for a start , not everything has to be a cultural design ,
Staff Recommendation	The submission is acknowledged. Selwyn District Council prioritises inclusivity and cultural respect in our community. Te Tiriti o Waitangi, the Treaty of Waitangi, is a founding document of New Zealand and recognising Te Reo Maori (the Maori language) and incorporating cultural design elements in public facilities is one way Council chooses to uphold the spirit of the Treaty partnership. Council considers recognising Maori language and culture in public spaces is not only appropriate but also necessary. It reflects our commitment to the Treaty and our shared responsibility to create a more equitable and respectful society. Selwyn District Council considers that, when public buildings incorporate Maori names and cultural design elements, they are not merely symbolic gestures. Instead, they represent a tangible effort to honour the Treaty's obligations and foster a sense of belonging for all New Zealanders.

Comments:	each town has a right to have a pool. This is a war memorial given to the community to remember those who fought and died for NZ and the communities NZ holds. Its will be very disrespectful to close something that is ment to be a cheerish by all.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Submitter Number:	235	**Submitter:**	Details Withheld

Point Number	235.1
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** Only support this if the rates are targetted to the residents of Lincoln and Rolleston. I can't see the point in the rest of Selwyn paying for other people to have good public transport where there is virtually no way to access it for others. Oh for the railway station to be serviced.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. Council could consider a targeted rate, but the facilities proposed have a wider District benefit as residents beyond those townships can drive to the Park N Rides to then access PT services such as direct to City
Point Number	235.2

Staff Recommendation	Submission is acknowledged by Council.
Point Number	235.5
Category	Activity > New Public Transport Services
Comments:	Better connected townships with public transport bus/rail.
Staff Recommendation	Council will be investigating what further PT services can be provided across the wider District, further to what Environment

	Canterbury can provide. However it is expected these will need to be fully funded by users and ratepayers subject to further Council consideration through subsequent Annual Plan and Long-Term Plan processes. The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case considered a wider passenger rail service using the existing rail network. This could have merits in the future if combined with a wider regional passenger rail service. But with small projected patronage, large investment needed for rolling stock and infrastructure (on a rail network managed by others), and that there is no CBD connection makes this currently not worthwhile.

Point Number	238.6

Category	Activity > Planning Further Community Facilities
Comments:	Every new centre / facility cost to maintain, service and staff. It is very short term thinking to spend so much money over such a short period of time (ie 20 years) building new facilities, increasing costs to rate payers so steeply, then these facilities are likely to need upgrading at the same time in the future. Why not think long term for our children - don't make it so expensive for them to live in selwyn!
Staff Recommendation	Submission is acknowledged by Council.
Point Number	238.7
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Our communities cannot afford the rate hike that is being proposed. We do not **need** these things. Maintenance is important, but right now the council should be looking at **needs** ie flood protection, water etc, not huge new 'would like' facilities that we need to pay to use anyway! A large increase in rates will mean some families will not be able to afford to use the facilities we already have! ie pool, subs for sport - or the fuel to get to fields.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.

Comments:	Please do not let Rolleston grow so much that the infrastructure is inadequate and quality of life declines.
Staff Recommendation	Population projections are not predictions, rather they indicate probable outcomes based on assumptions. A key assumption for the Long Term Plan is the population projections. As each town grows, there is a need to understand its future, as well as upgrade its infrastructure. This is generally done through Strategic and Spatial Plans. However, as growth continues to exceed the projections, more projects are needed quicker to meet this growth.

Comments:	Would Council consider rezoning Maddisons Road to five-acre blocks? Thise road lies between two industrial parks and the demand is high for smaller blocks. More revenue re rates!
Staff Recommendation	Rezoning does not occur through the Long Term Plan. The process for a rezoning is through a Plan Change. The council has recently worked through its review though there are opportunities for private plan changes. There will be processes in the future that long-term growth areas can be discussed.

Comments:	Place medium density housing near park areas to provide outdoor space for residents.
Staff Recommendation	Rezoning does not occur through the Long Term Plan. There will be processes in the future that long-term growth areas can be discussed. The Resource Management Act outlines key direction and standards relating to medium density in populated towns (through the Medium Density Residential Standards) that the council must follow. If the direction changes, council will respond accordingly. The Greater Christchurch Spatial Plan, which Council approved, sets this as an overarching direction. Council is developing a Future Selwyn Strategy that looks beyond the 10-year horizon to consider how we can respond to these challenges.

Point Number	244.3
Category	Activity > Planning Further Community Facilities
Comments:	Re Prebbleton. Prebbleton is lacking a community common room. It is the clubs thoughts that a common room that could be used as a clubrooms and community meeting place would be best suited at Kakaha Park stage 2. This can be funded privately if supported by council policy to implement. This space would be used during the year by the Prebbleton Football Club and could be made available to the community.
Staff Recommendation	Staff recommend this submission be acknowledged. A new community centre for Prebbleton has been in considered in earlier Long-Term Plans and was previously signalled for construction in 2025/26. A needs assessment study was undertaken in 2023 which concluded that there was demand for a facility to service the community, and that it should provide a mix of social, community gathering and recreation spaces. The study further concluded that the facility needed to be located so it was easily accessed by the community. As there are uncertainties about the best site for the facility and the activities that it will cater for, further planning and community consultation is needed. To enable time for the necessary planning to happen, the project has been programmed for 2026/27 to 2027/28.

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	The Sheffield Memorial Pool is currently used regularly by two rural primary schools, and used by the community during the opening summer time period, it is an integral part of both Sheffield and Springfield school sports education and swim learning, and the wider

	rural community that is not just these two visible townships/villages, the rural communities spread out to hard working Rural farms and further to our Selwyn mountain communities that also makes this their closest pool. The drive to Darfield Pools is also not 10 minutes, plus this facility is small and crowded by the use of the Darfield Community. No supporting public transport exists to accommodate age-appropriate kids to travel safely to Darfield pools or Rolleston Aquatic Centre, which makes this a safe option for many families who's children can make their own way to the pool either by walking, ride bikes, or with friends. SDC also need to consider is that this is a MEMORIAL pool, it was built in memory to the fallen in WW2. in Australia and England where I originate - we remember the fallen. Amongst the practicalities of both schools' uses, it would also seem to be incredibly disrespectful to remove this resource in a rural community when it is serving its purpose for the community it was meant for.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we

	want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Point Number	249.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option		

	Comment: i thought the park and ride was supposed to be done a long time ago to be honest? I cant see why we can't improve services within Rolleston better at tye same time
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. The existing Park N Ride at the Council HQ at Rolleston is well used, including on road parking around the vicinity. Further capacity is available in the unformed area north of Kidman Street used also for the Synlait Park N Ride. The new Park N Ride facilities at Rolleston are planned for 2029-33, at which time additional capacity will definitely be required to align with the additional PT services planned by Environment Canterbury over this time.

Comments:	We need a facility for the arts. For dance, music, theater, maybe a hire photo studio,... There is so many sports facilities around already and it only keeps getting even more. But there is nothing in Selwyn for arts.
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.

Comments:	The Sheffield pool is so important to retain as our children need somewhere to learn to swim. Yes Darfield has an upgraded pool but it is already hard to find a spot for lessons with all the other schools needing to use it. It isn't big enough to support the Malvern area alone. The pool is also a war memorial with significant meaning to members of our local community. Please don't close it.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:** We do not need another community recreation and sports centre in Darfield. The one we have is not utilised fully now. We have hired it a few times now, and it needs a total overhaul, it is very dated. Maybe if we were to update it inside, more of the community would use it. We also have the High School and Primary School that have facilities which could be hired out to groups or sports clubs, this would also bring in much needed income for the schools. We are all having to budget and reduce our spending, the council needs to do the same. We don't always need the big fancy buildings, if we just kept the ones we have in good repair.
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	268.8
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	As a member of the community deeply invested in preserving our heritage and fostering cultural enrichment, I am writing to express my strong support for allocating more funding towards heritage and culture in the council long-term plan. Heritage and culture are vital components of our community's identity, shaping our collective narrative and enriching the lives of residents and visitors alike. However, I have observed that current funding levels for heritage and cultural initiatives are inadequate to meet the growing needs of our community. Investing in heritage preservation not only safeguards our past but also lays the foundation for a vibrant future. Preserving historic sites, monuments, and artifacts ensures that future generations can connect with their roots and understand the journey that has led us to where we are today. Additionally, supporting cultural programs and events fosters a sense of belonging and inclusivity, celebrating the diverse tapestry of traditions and customs that make our community unique. By allocating more resources to heritage and culture, the council can: **Preserve Our Legacy:** Funding will enable the conservation and

	restoration of important heritage sites, ensuring they remain accessible for generations to come. **Cultivate Cultural Understanding:** Increased support for cultural programs will promote cross-cultural exchange, fostering empathy, understanding, and appreciation for diverse perspectives. **Stimulate Economic Growth:** Heritage tourism and cultural events have the potential to drive economic growth by attracting visitors, creating job opportunities, and supporting local businesses. **Enhance Community Well-being:** Engagement with heritage and culture has been shown to have positive effects on mental health and well-being, fostering a sense of pride and connectedness within the community. I urge the council to prioritize heritage and culture in the long-term plan by allocating additional funding to support initiatives in these areas. By doing so, we can ensure that our community remains vibrant, resilient, and culturally rich for generations to come.
Staff Recommendation	Council will consider community funding which includes support for heritage and cultural activities through its deliberations. Council acknowledges the importance of promoting and protecting heritage as it improves community wellbeing by connecting people and building the identity of Waikirikiri Selwyn. In 2023 Council approved the Selwyn Strategic Heritage Plan 2023-2027. The purpose of the Heritage Plan is to ensure there is a focus on improving support for heritage activities and supporting the work of local history groups and residents who are strongly motivated to collect, protect and enhance local place-based heritage. Council has two community heritage funds as part of a wider community funding programme. These are: • Community History Fund which is to support kaitiaki (guardians, conservators, and protectors) communities and community groups for various history projects (and the operating costs of community history groups). • Heritage Protection Fund which is to encourage and assist owners with work required to maintain and enhance heritage buildings in the District as well as work required on protected trees. Cultural activities can be supported via the Selwyn Community Fund and Selwyn Creative Communities Scheme. More information is available on the Council's website at https://www.selwyn.govt.nz/services/funding-And-grants

Comments:	I strongly support the council continues to include iwi in all stages of council decision making as guided by prinicples of te tiriti o waitangi.
Staff Recommendation	The submission is acknowledged.
Point Number	269.9
Category	Activity > Chlorination
Comments:	I support the chlorination of the water and fluoridation.
Staff Recommendation	The submitters preference to continue to chlorinate community drinking water supplies and seek no further exemptions from Taumata Arowai is acknowledged. Staff recommendation is to continue to chlorinate community supplies to reduce risk to community health. The submitters preference to fluoridate community drinking water supplies is acknowledged. The cost to fluoridate supplies is estimated at $7.9m over the LTP period. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.
Point Number	269.10
Category	Activity > Potential Requirements To Fluoridate
Comments:	I support the chlorination of the water and fluoridation.
Staff Recommendation	The submitters preference to continue to chlorinate community drinking water supplies and seek no further exemptions from Taumata Arowai is acknowledged. Staff recommendation is to continue to chlorinate community supplies to reduce risk to community health. The submitters preference to fluoridate community drinking water supplies is acknowledged. The cost to fluoridate supplies is estimated at $7.9m over the LTP period. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.

Point Number	269.11
Category	Activity > Low Nitrate Water Sources
Comments:	I also want to ensure water is free from nitrates.
Staff Recommendation	The submitters preference is for low nitrate water sources. Staff recommendation is to undertake further investigations into centralised sources of low nitrate water as budgeted in the LTP.
Point Number	269.12
Category	Activity > Walking and cycling improvements
Comments:	I strongly support rural walking and cycling improvements. I use the little river rail trail all the time as I am an endurance athlete. I hope that there could be a cycle trail that connects Arthurs pass to the east coast. as well as the creation of new cycle trails anywhere!!!!!! I would be great if there was a cycle trail that went from Haswell to Lincoln along Ellesmere road, as this road is incredibly dangerous for cyclists or people running the roads.
Staff Recommendation	Submission is acknowledged by Council. Major routes follow council's walking and cycling strategy which will be updated with suggestions from LTP submissions taken into account.
Point Number	269.13
Category	Activity > Lincoln Town Centre Upgrades
Comments:	I strongly support Lincoln town upgrades - we are overrun at the moment and hope that another supermarket could be built.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	269.14
Category	Activity > Compulsary organics collection
Comments:	It would be great also to do soft plastic kerb recycling too.

Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. The machinery at the recycling processing plant where Canterbury's kerbside recycling is sent to cannot process soft plastics. The Packaging Forum have their own separate soft plastics recycling scheme with drop-off points located at a number of supermarkets. You can find your closest drop-off point on their website: https://www.recycling.kiwi.nz/store-locator
Point Number	269.16
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	I strongly support ensuring that there is a strengthened partnership with mana whenua. I support everything else within the policies.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	269.17
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	This is imperative to do now so the SDC is not behind technologically.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	269.18
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	I strongly support the council commits to prioritizing and enduring that climate change is at the core of all planning and decision making processes.
Staff Recommendation	SDC’s position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders’ Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions.

	The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. Council is developing a Future Selwyn Strategy that looks beyond the 10-year horizon to consider how we can respond to these challenges. The Council is also developing an Emissions Plan and Sustainability Plan to identify actions into the future.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	270.8
Category	Activity > Infrastructure DC
Comments:	With the rapid addition of new builds by developers, SDC should 100% be seeking additional DC's from developers to fund Community Facilities, but also increasing/new models for the DC's for Infrastructure e.g. roads (not just within a few hundred meters' from developments, need to consider the wider impact on our trunk roads)/ 5 waters/ and waste facilities that all are impacted as the population increases. Growth needs to be controlled (throttled) more in line with current Infrastructure. We need more satellite Commercial Zones (particularly in Rolleston/Lincoln) to reduce need to travel to the Town Centers.
Staff Recommendation	Submission is acknowledged by Council and staff note the support for the introduction of the proposed development contribution for community infrastructure. In terms of development contributions for other infrastructure, Council does take development contributions for headworks for five waters and upgrades to the transportation network where demand from growth is contributing to the need to undertake the works. More satellite commercial areas have been identified in the growth plans (Outline Development Plans) in many of the proposed new developments in both Lincoln and Rolleston and will be provided as those developments proceed.
Point Number	270.9
Category	Activity > Strategic Investment Strategy
Comments:	Strategic Investment Strategy is Critical, we need to be think more commercially around revenue streams, partnerships, and investments to offset the doubling of rates over the next 10 years. Do we look at joint funding/sponsorships of our facilities, more onus on developers to co-fund/build facilities outside of DC structures.
Staff Recommendation	That the submission is acknowledged by Council. Council's strategic investments are based around building a strategy that will meet the needs of our communities and our businesses to thrive in the medium to long-term period.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**		
Staff Recommendation	Submission is acknowledged by Council. [

Category	Activity > New Public Transport Services
Comments:	This (more buses) is a poor cousin out come to against the light rail / MRT that was promised for the area - Look at how beautifully the Hutt connects to Wellington with the rail cars, they are different adjourning councils as well but they clearly work together better that Greater Christchurch does - We have perfect flat land between Rolleston and CHCH / Hornby also comparing to the rugged coast line they built their rail network on, clearly much more forward thinking up there.
Staff Recommendation	The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case determined that MRT was viable in the city, but not in the surrounding Districts. Councils planned Park N Ride facilities together with additional express and direct bus services will be critical to make these connections to the MRT service. The MRT Business Case process has yet to determine what mode MRT services will take i.e. rail or bus.
Point Number	271.9
Category	Activity > Walking and cycling improvements
Comments:	2. Turn the footpath on Goulds from Longore Rd to Dynes Rd to shared cycle path extending the ability to cycle from Suth-west Rolleston to the town center 3.Create a shared path along Brenley Drive, Fairburn Rd, Marliece St and Hepburn place to link to the Gould Rd shared path that runs in to central Rolleston 4.There are a lot of food shops in central Rolleston / Tennyson St but in my opinion there isn't much foot traffic, I think this is because the layout of the town and the lack of easy cycle options from some areas forces people into their cars, and then once in the car they keep driving into CHCH. I think what Rolleston needs is research in how to get more people walking in town
Staff Recommendation	Submission is acknowledged by Council. Council has a footpath extension program to cover missing links. Major routes follow the walking and cycling strategy which will be updated with suggestions from LTP submissions taken into account.
Point Number	271.10

Category	Activity > Other Categories identified by Staff > Growth
Comments:	5. I'm concerned a mistake might have been made allowing development of apartment / high density town house living in the South-west of Rolleston (Farringdon Oval) I might be (really hope I am) mistaken but it appears the only amenity will be a solitary café - I don't think people can live like that, Five Mile in Queenstown comes to mind as an example of Apartments built alongside a shopping center in a complimentary way giving the apartment dwellers the amenities on the doorstep that they need - in five mile they may be cooped up in an apartment but on the other hand they can get Korean fried chicken or a host of other shopping options in less than 2 minute walk, I hope I am mistaken but from the plans I've seen it looks like Selwyn is pioneering rural apartment living which is a bold trend I don't think anyone asked for – the proposed apartments are a long way from the new town center where I feel you would sensibly want them.
Staff Recommendation	Faringdon Oval contains a neighbourhood centre, which will have a range of shops. There are other opportunities for commercial development within Faringdon as well.
Point Number	271.11
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	7.Plant Trees everywhere you can in Rolleston - can you plant more trees on existing streets? - how about getting residents involved in planting drives on their streets? I think this is a key problem for the character of Rolleston - So few trees it's either too way windy or excessively hot - when a new development goes in the first thing taken out is the shelter belt - I think we need more trees on our streets - if you're worried about maintenance there plenty of NZ natives around that won't drop their leaves in winter... Could residents / schools literally help plant the new park?
Staff Recommendation	Council recognises the importance of tree canopy cover within urban areas for the many benefits trees provide. Council is working towards setting targets for tree canopy cover within its urban areas through reviewing its tree policy, as well as strategic work related to a Blue Green Network plan. Funding has been allocated within the 2024-34 LTP through an ‘urban greening’ fund via the general Township general ledger.
Point Number	271.12
Category	Activity > Rolleston Transport Improvements

Comments:	6. Push the case for light rail / a system like the Hutt / Wellington line - I used that rail line all the time when I lived in the Hutt valley, you'll never catch me dead on a bus.
Staff Recommendation	The proposed multi modal Rolleston Flyover will provide connectivity between Councils planned Rolleston Park N Ride sites and improve bus access and routing across SH1 to PT key routes.
Point Number	271.13
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	1. The new Community facility needs to be for Affinity Gymnastics (noting in draft LTP you mention putting a new facility in South-West Rolleston.) In the last long term plan the Council agreed to build a new Gymnastics facility to lease to Affinity, the scope for this was to be prepared by December 2021. The Mayor even mentioned the new Gymnastic facility in his introduction of the 2021. The council has fully funded the construction of sport facilities for other sports, soccer fields to Fifa pro standard, astro turfs and softball diamonds and these are fully maintained by the council. Affinity is the largest sports club in Selwyn in terms of revenue, it is not for profit and is a registered charity – in terms of total membership it is second only to the Soccer club. There are 700 registered members of all ages, our 3-year-old son is one of them. The club currently operates in a commercial warehouse that is not fit for purpose in the industrial area. Affinity has always been prepared to pay a commercial lease to the council for a fit for purpose facility, The current facility is teeming with families every morning, Detroit Dr out in the industrial area is the busiest part of town on a Sunday morning, busier than the town center, sometimes food venders set their trailers up out there to cater to the crowd cramming into the Gymnastics classes - you should move that activity closer to bricks and mortar hospitality businesses. Further, I think such a facility provides an even greater opportunity, Affinity is keen to share the building with other disciplines. Perhaps we could also have a clip and climb here? What about a foam pit for aspiring ski jumpers to toss themselves in to, a fencing club? NZs top Cyclists move to Invercargill for their

	velodrome in pursuit of their Olympic dream. Perhaps Selwyn with a suitable facility could become the desirable place to live for our aspiring future athletes
Staff Recommendation	The submission is acknowledged. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input. This excludes existing or proposed Council facilities as part of the Long Term Plan. Staff recommend that this facility be included as part of a wider community facility funding and planning project with gymnastics as a potential individual case study along with other facilities such as a performing arts and a military museum or similar to provide a variety of examples.
Point Number	271.14
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	I think something needs to be done to improve foot traffic in the new central area, at times the area just seems dead. I feel like Rolleston has been allowed to grow in a way that encourages people to get in to their cars, e.g. the new apartment / townhouses in Farigndon Oval will be right on the far edge of town 40+ minutes walk to the town centre, to get anywhere they will have to get in cars and once in the car they might not stop till they are in CHCH. Further, in town all the restaurants are in one area, the cloths shops in another and tech shops somewhere else, you don't casually walk past the thai resturant on your way to Noel Leeming, they are a 20 minute walk apart, I think people "wander around" more when they are window shopping / browsing a variety of shops / when this diverse variety of shops are close and easy walking distance together. Can you improve cycle access from the new subdivision in South West rolleston to the central business area, ie. extend the shared path further down Goulds Rd? For example when I think of the new town centre at the moment I think restaurants and Library, I wouldn't wander around there I would drive there if I explicitly want to eat out of get a book, I think the resturants there would do better if there was a mixture of shopping on that block, that area really needed to throw a macpac/ jbhifi and a few others in there and get some people window shopping until they start thinking about lunch.

Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and Council will consider their feedback in strategy action planning and comments have been noted by relevant team.

Submitter Number:	274	**Submitter:**	nicky snoyink for Forest & Bird
Organisation:	Forest & Bird		
Point Number	274.1		
Category	Activity > Other Categories identified by Staff > Bio-diversity		
Comments:	Introduction Forest & Bird is New Zealand's leading independent conservation organisation and has played an important role in protecting and restoring New Zealand's natural environment and native species since 1923. Forest & Bird is independently funded by subscriptions, donations, and bequests. Its mission is to protect and preserve New Zealand's unique ecological values, indigenous flora and fauna, and natural habitats. Forest & Bird has 45 branches throughout Aotearoa New Zealand. Our North Canterbury, Ashburton and South Canterbury Branches have a long history of conservation in the Canterbury region. We have contributed—and continue to contribute—to nature protection and restoration in the Canterbury region as advocates through national, regional, and local		

planning processes; through our youth network; as an educator through our Kiwi Conservation Club; and in action through on-the-ground conservation activities within our communities. Forest & Bird takes a keen interest in the restoration and protection of the Selwyn District's indigenous biodiversity. We congratulate the Council on the recent establishment of the 2 Selwyn Biodiversity Strategy. The Selwyn Biodiversity Strategy is vital to implementation of the National Policy Statement for Indigenous Biodiversity (NPS-IB). Submission This submission to the Long-Term Plan (LTP) is focussed primarily on the implementation of the Selwyn Biodiversity strategy and other programmes that could support its successful implementation, and thus help the council to comply with the NPS-IB. 1. Forest & Bird acknowledge the work of Selwyn's biodiversity team, Andy & Denise. We strongly support their work across the district and their valuable contribution to protecting and restoring indigenous biodiversity from a regional perspective also. We acknowledge that the Selwyn Biodiversity Strategy is a result of their good work. 2. Biosecurity is of increasing concern to Forest & Bird, which is likely to be exacerbated by the impact of climate change. Plant and animal pests are a risk to nature and productivity. While the Canterbury Regional Council (CRC) takes the lead on biosecurity, prevention and management is the role of everyone. The CRC Biosecurity Advisory Groups have been operating for three years and are a useful forum for sharing biosecurity information that impacts on biodiversity and on productivity. Territorial Authority representation on these groups is useful as a coordinated approach to biosecurity is vital to achieving good outcomes for biodiversity. 3. Having a biodiversity strategy is only the start, protecting and restoring indigenous biodiversity relies on implementation and buy-in from the community. This requires education, information, carrots and sticks. 4. To that end, Forest & Bird recommends that the Long-Term Plan 2024-34 include appropriate funding to: a. Increase the Selwyn Natural Environment Fund (SNEF) to ensure that it is able to meet the community demand and that it at least keeps pace with inflation over the life of the LTP. b. Implement the NPS-IB : i. The NPS-IB requires the Regional Council to develop a regional biodiversity strategy and sets out what must be included. The Canterbury Biodiversity Strategy (CBS) is being revitalised. The Selwyn Biodiversity Strategy could help inform the revitalised CBS. We recommend that LTP includes funding to resource continued participation of staff in the CBS revitalisation process and in ongoing participation of governance to ensure that the strategy goals are being achieved. ii. Resource participation of an SDC Councillor in the CRC Biodiversity Champions program c. Fund a district wide mapping process to establish the extent of converted land in the Selwyn District so the areas of indigenous biodiversity are understood and it is known what is to be maintained and restored; fund ground truthing of areas of indigenous biodiversity by a suitably qualified ecological expert 3 d. Adequately resource the councils environmental compliance, monitoring and enforcement team to be

	able to monitor the state of the districts indigenous e. Resource SDC participation in the CRC Biosecurity Advisory Groups f. Consider a district-wide rate for indigenous biodiversity protection and a targeted rate for biosecurity (pest plant and animal control) Conclusion Forest & Bird recommend including and increasing the funding for initiatives that will help the implementation of the Selwyn Biodiversity Strategy and the NPS-IB in the 2024- 2034 Long-Term Plan, that is enduring and at the very least keeps pace with inflation. We hope that our suggestions are helpful and that they will be reflected in the final Long-Term Plan. Thank you for the opportunity to submit. Nicky Snoyink Regional Manager Canterbury/West Coast Royal Forest & Bird Protection Society of New Zealand Inc
Staff Recommendation	*Council staff agree that biosecurity issues provide a huge threat to indigenous biodiversity currently, and probably even more, so in the future. Weed and pest control partnerships are the key to managing the issues, as is having necessary funding available to active identified outcomes. TA staff involvement in the Biosecurity Advisory Groups will play a part of that.* *Having suitable incentives and SDP rules are key to halting biodiversity loss and helping encourage improved management of indigenous biodiversity, and the SNEF fund is key to that, as are the proposed 'biodiversity partnerships', 'pest control' and 'biodiversity monitoring' budgets lines.* *Council staff are involved in the revitalisation of the Canterbury Biodiversity Strategy and will continue to be given its significance to biodiversity across the region.* *Biodiversity staff are currently framing up a Biodiversity Protection Programme that will include a mapping process to help establish associated baselines and allow, where necessary, DP rules to be followed and enforced – the proposed 'biodiversity monitoring' budgets line will help enable that process.* *Biodiversity Staff support the notion of a district-wide rate for indigenous biodiversity protection and a targeted rate for biosecurity (pest plant and animal control) as partnerships and key projects require suitable funding to be available.*

Point Number	278.7
Category	Activity > Chlorination
Comments:	I most definitely do not support leaving chlorine in Darfield and other areas water. Our water was totally fine prior to the chlorine being added and the safe drinking standards thresholds are way to low.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	278.8
Category	Activity > Potential Requirements To Fluoridate
Comments:	No to fluoride being added to our drinking water.
Staff Recommendation	The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health
Point Number	278.9
Category	Activity > New Public Transport Services
Comments:	It would be great to have a more regular bus service from Darfield to Christchurch or to Rolleston. Bus would be great in the weekends too from Darfield to Rolleston.
Staff Recommendation	Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service. This would include linking larger townships like Darfield to Rolleston and PT services based there including connections to the City.

Point Number	279.4
Category	Activity > Lincoln Town Centre Upgrades
Comments:	Please do not carry out the intended upgrade to Lincoln Centre. The plan was consulted on with the community several years ago and is now out of date. The plan does not take into account the impact Lincoln South and other subdivisions are having on the centre of Lincoln and traffic movements. It is also incredibly expensive and does not address the traffic flow issues currently being experienced. Common sense needs to be applied. Lincoln needs a speed restriction through the village like Prebbleton. It needs pedestrian crossings so elderly can safely access the services and businesses in the township. It needs some form of traffic control on the streets leading onto Gerald St so that residents can actually get out onto Gerald St without long waits.
Staff Recommendation	The type of outcomes the submitter seeks are part of the plans for the upgrade of Gerald St. This includes speed restrictions, signalised intersections and safe pedestrian crossing points. The upgrade has become more relevant with the additional traffic generated by growth as the current road pavement has been a state of failure for some time and needs to be replaced.
Point Number	279.6
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	Also with all of the capital projects being put forward, the landscaping component needs to be rationalised. The new sports park at Prebbleton is an example of an over planted landscape which results in driving up maintenance budgets. With SDC stating rates need to go up, there needs to be cost cutting at the project level with a view to the impact the project will have on ongoing maintenance.
Staff Recommendation	The submission is acknowledged by Council. Staff are aware of the need to balance the quality and extent of new plantings with ongoing maintenance requirements. As part of the process in preparing landscape plans for new park developments they are guided by the Engineering Code of Practice and reviewed in terms of maintenance efficiencies for both design and plant selection.

Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	i think the SDC needs to be more active in addressing climate change, including resilience to extreme weather events, and in reversing biodiversity loss. These are of major global significance, and all Councils need to be more actively addressing these 'big' issues.
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017, this being our commitment to develop and implement plans to reduce emissions. The council has a Climate Change Policy, as well as an emissions target to assist with the development of the LTP. The Activity and Asset Management Plans with this LTP each specifically identify how they are responding to climate change and emission reduction.

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces		

	that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** leesron doesnt need anything fancy. Rolleston is the hub. Dont want to pay foe things in leeston when i live in rolly
Staff Recommendation	The submission is acknowledged.

Category	Activity > Lincoln Town Centre Upgrades
Comments:	the level of investment in lincoln, including the main access roads in and out of the town, has been woefully inadequate. Now that the proposed Lincoln South plan is going ahead, the town will grow at a rapid pace for an even longer period of time. The existing infrastructure and amenities are already strained, it pains me to think what will happen if more subdivisions go ahead without addressing this infrastructure deficit. The Lincoln Town Plan was taken up almost a decade ago, and still nothing has happened. If lincoln is viewed by SDC as one if the primary towns in the district, then it is about time that it showed this with some serious infrastructure investment. Perhaps also consider flood planning for the new subdivisions that get built… The planning done for recently completed subdivisions seems woefully inadequate given the flooding in the past 2 years.
Staff Recommendation	The Council will starting the upgrade of the Lincoln Town Centre and Gerald Street in stages starting in 2024 at the Liffey end and finishing at Springs Rd in 2030. This is estimated to cost $45M and includes cycle lanes, power undergrounding, 4 sets of traffic signals and the replacement of the failed carriageway . The extension of Meijer Dr to Boundary Road, along with the creation of adjoining reserves, is planned in 2025/26 budgeted at $3.5M. In conjunction with this in 2026/27 a $4M Park N Ride Facility to cater for improved public transport services planned by Environment Canterbury will be constructed opposite the Lincoln Events Centre

Category	Activity > Other Categories identified by Staff > Bio-diversity		
Comments:	As part of the "Environmental Well Being" element of the LTP - there is a need to fund the removal of pest conifers (D. Fir & larch) as per the Regional Pest Management Plan. These wilding seed-source trees are located on SDC reserves in Castle Hill Village. They are currently spreading their seed onto adjacent private properties which is contrary to the requirements of the RPMP. The seed from these trees are spreading onto farmland which has had considerable tax-payer funds and effort used to remove wilding seedlings from this land. Currently, the Waimakariri Ecological & Landscape Restoration Alliance (WELRA), ECan and MPI have spent in excess of $10.000,000 in the Waimakariri Basin to remove wildings from that catchment. The pest trees on SDC reserves in Castle Hill Village are one of the few remaining sources of this wilding-spread. Commitment to undertake the removal work and securing the funds need to be urgently considered and implemented.		
Staff Recommendation	Council recognizes the environmental risks of weed spread from all conifers in the high country, including those on Council reserves in the Castle Hill village (whilst noting the significant stands of conifers on other land surrounding the village). As such Council staff have been working with village residents and ECan to remove pines from the Council reserves and look at planting suitable native plants to		

	provide form and cover. All the contorta species have been removed and a draft Reserve Management Plan has been prepared to guide management of the reserves. Staff agree that suitable Council funding should be available to complete the pine removal and associated replanting project.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m		

	Estimated impact on rates (per year): $10.46 **Funding:** Rates: 100% **Comment:** By the same logic that the Sheffield pool is closing and residents can just drive 10min to Darfield to use the pool, so too could the Leeston residents could just drive 20min to use Foster Park and Te Ara Atea. Community buildings should prioritise function over form and wasting ratepayers money on architectural excess. A floor to ceiling glass atrium or some cultural narrative have never been a deciding factor for me to go to a library of use a rec centre.
Staff Recommendation	The submission is acknowledged.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	290.8
Category	Activity > New Public Transport Services
Comments:	Could the park-n-ride facilities have some way to give non-Lincoln and non-Rolleston residents priority in their use. Potential commuters from Tai Tapu, Kirwee, West Melton etc have no internal bus routes that link to either of these bigger towns, so have no option than to drive there to catch the public transport.
Staff Recommendation	That would not be possible to give satellite townships priority. However, the facilities will be sized to provide sufficient capacity for satellite township use as well.
Point Number	290.9
Category	Activity > Other Categories identified by Staff > Borrowing Levels
Comments:	Disagree with the increase to the borrowing limit from 160% of revenue to 220% of revenue. Disagree that council thinks rate increase limits of 4x16% then 6x10% (124% total increase potential over 10 years) can be justified. Only options given for feedback are whether or not to build new stuff, where are the options to reduce service levels in some areas? eg could we accept mowing the grass in parks every 4 weeks instead of every 3 weeks. Could we heat the

	swimming pools 0.5 a degree less? Can we switch to sweeping our own gutters on alternate rounds to the trucks...
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	290.11
Category	Activity > Planning Further Community Facilities
Comments:	Give the community halls you want to close back to the local residents who council confiscated them from in the first place. Leave it to the community if they want them to fund them.
Staff Recommendation	The submission is acknowledged. Council has previously determined it needs to take a direct, future focused, and whole of district approach to planning for community centres and reserves across the district. Council has determined it needs to take more direct operational oversight of how centres and halls operate to ensure compliance with relevant legislation, improved access (not limited to certain groups communities as previously) and to better manage costs. Reasons behind Council taking increased responsibility in regard to Council Committee managed centres / reserves include poor levels of facility maintenance, underutilisation by residents of centres and halls, little / no revenue generation returned to Council, and problems for Council controlling the nature and cost of the invoices generated by Committees under the previous arrangements.
Point Number	290.13
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Council needs to follow the same catchment geography to all proposed developments.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	290.14
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Costings not provided, targets not defined or tied to drivers that are not under councils control. Sounds like a slush fund for marketing

	consultants. The proposed $9m would fund the majority of one of the "big decision" projects with a demonstrable beneficial output.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy without more information provided. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in Economic Development. The Council has a role in facilitating others and enabling Economic Development to occur as prosperously as possible to benefit the whole community. There will be a strategy action plan formed.
Point Number	290.15
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Costings not provided, targets not defined. Sounds like a slush fund for digital consultants. The proposed $1.3m/yr would fund the majority of one of the "big decision" projects with a demonstrable beneficial output.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	290.16
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	Why not divest the gravel pits if they make a yearly loss totalling $2m over 10 years. Why not divest the forestry if they make a yearly loss totalling $1m over 10 years. Rental housing is making a $50k loss over the coming 10 years, divest them
Staff Recommendation	The submission is acknowledged by Council. Council is working through a process to divest gravel reserves that are surplus to requirements. This is expected to generate around $1.17 million in

	revenue. This is a long-term process that is reliant on the Department of Conservation being resourced to undertake the Reserves Act disposal procedures. Council is also transferring the management of some pits for clean fill under lease agreements. With over 200 gravel reserves there is still a requirement to look after the remaining sites and to undertake remediation works so they can be used for an alternative purpose. Forestry Blocks have also been considered for divestment (noting that some are located on Gravel Reserves). This is also a long-term process as Council has had to replant many blocks that were de-stocked as a result of wind damage, and they need to reach a certain age before they can be considered for disposal to avoid ETS liabilities. Because of the relatively young age of the forest there is minimal harvesting to occur over the 10-year plan period. Forestry has mainly been used as a land management tool for land that has few other uses and because of the block sizes (mostly less than 2 hectares) production forestry with reasonable returns is not viable. Rental housing is mainly comprised of houses purchased on land for strategic purposes and these properties will be progressively developed or sold over time and are rented as an interim measure to offset costs. There are some legacy houses that are located on reserve (mostly on Crown land) that cannot be readily sold and are rented to obtain revenue to offset costs.
Point Number	290.18
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	How can 1 roundabout cost more to build than an entire park-n-ride facility?
Staff Recommendation	Submission is acknowledged by Council. Cost for infrastructure works includes land acquisition and construction. They are largely dependent on market conditions.

Staff Recommendation	That the submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.
Point Number	293.12
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	you are a council providing services to the community. Not sure how this fits into businesses? Thats what local business groups are do, then they come to you with proposals. When you're cutting projects like proposing to close Sheffield pool, or Leeston community centre, this money is better spent on tangible things, not ideas.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has made reference to Council not having a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. Comments have been noted by relevant team.

Point Number	293.13
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	why don't you talk to other councils, see what works for them. Or better yet pair up and use the same system. No need to explore and waste money and reinvent the wheel just do it based on something already proven to work for the same type of organisation elsewhere
Staff Recommendation	We are collaborating with other Councils within our region on technology solutions.

Point Number	293.14
Category	Activity > Walking and cycling improvements
Comments:	footpath down West Melton road is great, looking foward to be able to go for walks and bike rides
Staff Recommendation	Submission is acknowledged by Council. Staff notes the support for the recently completed West Melton to Rolleston Cycleway.

Point Number	293.15
Category	Activity > Other Categories identified by Staff > Consultation Document Feed
Comments:	Rather than each council spending money individually coming up with an engagement process, why don't you get together with like minded councils and put together a joint document, to share conultant costs for putting this together
Staff Recommendation	Council acknowledges the submission.

Submitter Number:	294	**Submitter:**	Details Withheld

Point Number	294.1
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** I prefer Option 1 but given the uncertainty in funding from NZTA, I choose Option 3. However, we don't have to wait until the next Long Term Plan if funding from NZTA is approved earlier.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP
Point Number	294.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will

	be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Point Number	294.12
Category	Activity > Walking and cycling improvements
Comments:	2. Although not included in the plan, cycling paths connecting Leeston and the rest of Ellesmere to the the major transport hubs like Lincoln should be considered in the future. Leeston Road with cars running at 100Km/h is not safe for sharing with bikers. This stretch of road is now busy especially with the increased population in Leeston and Southbridge.
Staff Recommendation	Submission is acknowledged by Council. Major routes follow council's walking and cycling strategy which will be updated with suggestions from LTP submissions taken into account.
Point Number	294.13
Category	Activity > Compulsary organics collection
Comments:	3. I agree that organics kerbside collection should be made compulsory. However, there should be an option for a smaller organics bin as some households do not need the 240L bin, especially because they are collected weekly.
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. There are no immediate plans to offer a smaller organics bin, however, this will be considered in more detail closer to when the compulsory collection takes effect. A smaller organics bin would likely not be less expensive than a 240L as the cost is associated more with the provision of the service, and less with the processing of the collected material.

Point Number	294.14

Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would		

	have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** Just fix the roof .... Thats all it needs and will only cost a small amount ... Common Sense . Also, stick with ENGLISH names for all buildings.
Staff Recommendation	The submission is acknowledged. Selwyn District Council considers that, when public buildings incorporate Maori names and cultural design elements, they are not merely symbolic gestures. Instead, they represent a tangible effort to honour the Treaty's obligations and foster a sense of belonging for all New Zealanders. Building condition, remedial repairs and seismic strengthening works have been taken into account in relation to this matter.
Point Number	295.2

Category	Activity > Lincoln Town Centre Upgrades
Comments:	Honestly, i just came here to say how poorly the Selwyn treats Lincoln. I understand rates increases but 16% is on the nose when all SDC does is carve up the land for more rate payers to milk and for what? A park and ride which is just a car park. It takes over an hour to get to town on the bus anyway so why would anyone bother. 16 years I have been in Lincoln and i have seen it turned from a nice village to a sprawling mass of homes with no infrastructure to match. Now with the proposed 60% increase in housing to be built it will become unliveable. Progress is fine but 16% to systematically destroy Lincoln while simultaneously using its residents as a cash cow will ultimately see us leave the area. The schools, the roads, the doctors, everything is jam packed. So either invest in Lincoln and we will pay our fair share or continue down the current path of turning Lincoln in to housing estate. I used to be proud to say i lived in Lincoln. But not anymore, its all been down hill since Sam Broughton came along.
Staff Recommendation	The Council will be starting the upgrade of the Lincoln Town Centre and Gerald Street in stages starting in 2024 at the Liffey end and finishing at Springs Rd in 2030. This is estimated to cost $45M and includes cycle lanes, power undergrounding, 4 sets of traffic signals and the replacement of the failed carriageway. The extension of Meijer Dr to Boundary Road, along with the creation of adjoining reserves, is planned in 2025/26 budgeted at $3.5M. In conjunction with this in 2026/27 a $4M Park N Ride Facility to cater for improved public transport services planned by Environment Canterbury will be constructed opposite the Lincoln Events Centre. With Councils Preferred Option a Park N Ride at Lincoln is planned for 2026/27. This timed to coincide with a planned increase of direct bus services to the City by Environment Canterbury. The district is fortunate to have such a great Mayor.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	299.8
Category	Activity > Infrastructure DC
Comments:	I support increasing the contributions required of developer of new developments. There contributions should reflect and provide for the costs of new community facilities to meet the cost of new community infrastructure required because of growth from their developments.
Staff Recommendation	Submission is acknowledged by Council and staff note the support for the introduction of the proposed development contribution for community infrastructure.
Point Number	299.9
Category	Activity > Strengthened Partnerships
Comments:	Mana whenua and iwi Māori must continue to be included at all stages of the council decision making
Staff Recommendation	The submission is acknowledged.
Point Number	299.10
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability

Comments:	The climate change policy needs to be strengthened. Climate change mitigation and adaptation must remain central to the councils planning and decision-making. The council must extend it's planning and decision making beyond a 10 year horizon to pay serious consideration to the impacts of those decisione on at least the next generation. We must take more action now to ensure the long term impact of climate change on the sustainability of the Selwyn district is not compromised by our failure to act now. The council must move to protect te 4 waters, out natural rivers, streams and lakes, drinking water, stornwater and waste water. These 4 waters need to be considered together.
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. Council is developing a Future Selwyn Strategy that looks beyond the 10-year horizon to consider how we can respond to these challenges.

Comments:	The Prebbelton Central Stormwater Reserve has the potential to be a beautiful asset for the Prebbelton community, native insects, and native birds as well as serving its core function. To realise this potential it needs to be landscaped with native planting. The Stormwater Reserve is a great opportunity to increase the biodiversity, native plantings, and habitat restoration for native insects and birds in the area. Native planting is a way to reflect cultural identity with the area for Ngai Tahu. Native planting will also enhance the views out for those living around the storm water reserve and for those who transition through the area. The stormwater ponds are close to some of the highest density housing in Prebbelton and planting with natives would improve the recreational ammenities in the area and privide a better link with the storm water basin in the Prevailles subdivision. It would be nice to see the edges of the Stormwater ponds planted with species such as Kakaha, Kanuka, Kowhi, Mikimiki, harakeke, Toe toe, cabbage trees, lancewoods, muehlenbeckia, coprosma, and corokia. It would also

	be nice to see a stony environment for native insects such as skinks near the north facing water inflow grate of the stormwater pond with suitable plant food sources such as Kakaha near by. There is support from the community to landscape this area with native plants (see recent post and replies on the Prebbleton Community Facebook page by Scotty Beatson). There are community members happy to work together with the Council to make the Prebbleton Central Stormwater Reserve a more beautiful environment for the local community, native insects and native birds. The council in making decisions about the 10 year plan must actively work to avoid the inverse care law. This is the principle that the availability of facilities and services tends to vary inversely with the need of the population served. So the council must insure that the poorest areas with the most need have the easiest access to quality facilities and services.
Staff Recommendation	Council Reserves staff are scoping our planting on both sides of the basin and considering allocating the budget accordingly - it is likely that the planting will be done in stages. There may be opportunities to do community planting days to assist with this as well. As potential plans are developed the community and stakeholders will be engaged with.

Comments:	West Melton requires two core things. The first is a small path in and out of the Laird place walkway into the Cats PJs. It allows our smallest children to be safe, our primary kids going to pre and post school care to be safe, and remove transiting of the car park. This path right now is grass and becomes well worn and muddied in winter.

	Second big issue for West Melton is the growing population requires more cricket facilities. West Melton has grown in population base over the years as you well know. Weedons Cricket Club catchment is West Melton. Unlike many parks, schools and facilities in Rolleston, Lincoln, Kirwee and Darfield we do not have any cricket nets. Over the 4 years my Son has played cricket in WM, it has grown from 2 Weedons Junior teams, to 4 weedons teams. Current facilities is one community supplied resource being the cricket pitch on school grounds. Whilst there are no facilities to train in nets for children, or teams and they often clash on the school grounds. The proposal would be to work with WMS as its a open community facilitiy and it would complement the current sports trainings on the field. Toilets are not an issue to consider, and it would provide more ability for Tamariki to engage in sport in a safe environment, for even longer durstions. Toilets are available and provided by the school on game days. The alternative suggestion would cost more, to be placed at the domain as youd want an open cricket pitch installed also so you can cater for trainings. Doing nets, and a new domain wicket would allow for the growing sport in West eMelton, and more teams to play locally rather than having a West Melton based side having to travel for home games to Rolleston, Weedons or Kirwee.
Staff Recommendation	Council will give consideration to the proposal to extend the path at Laird Place alongside other requests and priorities for path extension and accessibility improvements in townships. The requirement for additional cricket facilities to meet demand in West Melton has been identified by Council in planning for the development of the Domain. Significant budgets of over $1.4 million are set aside over the next three years to continue with the implementation of Master Plan projects and it is planned to install both cricket training nets and a wicket as part of this work.

Comments:	Selwyn Sister City Committee requires additional funding to keep pace with 6 year's inflation, plus to link businesses from Selwyn with Sister Cities.
Staff Recommendation	The submission is acknowledged. Selwyn Sister Cities operates in Selwyn as a community-based and community - led initiative. Council's role has been limited to providing a modest level of funding annually to contribute to the Selwyn Sister Cities community group and, from time to time, practically assisting with itinerary development/ hosting for visiting international groups. While well-meaning and likely useful for those individuals directly involved, there is no particular alignment with the activities of this group and the strategies / strategic priorities of Council. Many community groups are experiencing financial pressures, and the various Council provided pools of funding for community groups are available for local groups and local efforts. If, in the future, Council saw merit in an enhanced alliance between business sector partners in a particular international locality with those in Selwyn, and there happened to be a Sister City relationship in that locality, Council would be open to connecting with the local Committee at a project level.

Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46

	Funding: Rates: 100% **Comment:** I think adding libraries at every small town is creating a luxury which rate payers cannot afford. Nowadays, the internet has allowed improved access to such resources. I am also not in favour of building expensive town halls. or community centres, with the associated ongoing maintenance and insurance costs. Leeston is close to Rolleston and the larger selwyn towns resources should be more utilised and developed as a resource hub for the region. Times are changing and things are much more expensive. The Selwyn District Council needs to be more responsive to the financial impact of their decisons on ratepayers. Climate change also needs to be considered. Concentrating community resources in the more populated areas may help mitigate some of the impacts. In terms of the Leeston Community Hub, I believe if the current building is not safe for purpose, then decommission it. The alternative is there is a pub out there, a rugby club etc. If the community afford it from their own rates then it should not be expected that these facilities will be provided from other ratepayers within the region. Councils need to check their lofty ambitions and utopia scenarios where we can provide all facilities to all towns. We simply cannot afford it.
Staff Recommendation	The submission is acknowledged. The proximity to other facilities and services has been taken into account in relation to this matter.

Comments:	Need to keep up with effective and up to date technologies to be able to deliver good customer service which is efficient and easy to access
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Comments:	We are in the Inner Plains so currently unable to subdivide so when are we able to look at sub-dividing or able to have up to 90sqm anywhere on the 4hect please. Also we still have gravel road and we are adjoined to Old West Coast Road-Bells Road one end and adjoined to Halket Rd/Sandy Knolls. Is there a plan for these?
Staff Recommendation	Rezoning does not occur through the Long Term Plan. The process for a rezoning is through a Plan Change. The council has recently worked through its review though there are opportunities for private plan changes. There will be processes in the future that long-term growth areas can be discussed.

	Council no longer undertakes seal extensions unless these have been determined to be of a strategic benefit. Bells Road does not fall into that category. However, Council provides the ability for residents to fund and undertake a seal extension to an approved Council standard which can then be transferred to Council for ongoing maintenance and renewal after 10 years.

Category	Activity > Planning Further Community Facilities		
Comments:	**In general, I am appreciative of the recent activity by SDC in the Castle Hill Village area. The Hall, extension, Tennis Court upgrade, infrastructure upgrade and support of the art work project are notable examples.**		
Staff Recommendation	The submission is acknowledged.		
Point Number	316.4		
Category	Activity > Other Categories identified by Staff > Other Matters		
Comments:	**However, I raise the question as to whether the time is reached for creation of a formal Community Board to represent the interests of the village community. It is increasingly difficult to recruit active participation in Village Committee and the administration of the Village since the Town Committee status was removed. Greater investment is likely if the status of the Committee is upgraded.**		

Staff Recommendation	Submission is acknowledged by Council. The Representation Review is subject to a separate process and yes it does involve a consultation process.
Point Number	316.8
Category	Activity > Other Categories identified by Staff > Road Safety
Comments:	I also register concern that the escalating cost of public work projects is significantly added to by undisciplined expenditure on H&S services. It is always a sensitive matter to criticize expenditure on Health and Safety because it is a clearly laudable goal. However , even laudable goals are vulnerable to excessive expenditure. Minor road works are commonly undertaken with an oversupply of roadwork staff and the almost omnipresent cones in vastly excessive numbers. When traffic management is allowed to account for a third of the cost of a project, there is obvious room for economizing. I urge that more rigorous control over this expenditure is required from staff and contractors.
Staff Recommendation	Submission is acknowledged by Council. Council's contractors are following national guidelines on Temporary Traffic Management, which is moving towards a risk-based approach to economize.

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	To Whom It May Concern, I am writing to vehemently advocate for the preservation of the pool facility in Sheffield. The pool is not merely a recreational space; it serves as the beating heart of our community, where families and friends come together to connect and enjoy a cherished amenity that has been a cornerstone of our town for generations. In our rural area, vital resources like the pool are often overlooked in favor of investments in larger urban centers. However, depriving us

	of this asset further exacerbates the disparity between rural and urban communities. Additionally, the pool is an indispensable resource for our school, which is obligated to provide swimming and water safety programs to our students. Closing the pool would force students to travel to Darfield, adding undue financial strain and travel time to an already struggling educational institution. We implore you to recognize the immense value the pool holds for our community and to stand with us in preserving this invaluable resource. Thank you for your time and consideration. Sincerely, Simon Wright
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre.

	Project cost: Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	I am writing to express my wholehearted support for the retention of a pool facility in Sheffield and to highlight the invaluable benefits that rural facilities like this bring to our community. Sheffield Pool serves as a vital hub for our community, providing a space for families, friends, and individuals to engage in recreational activities, fostering a sense of camaraderie and unity. Its presence will contribute significantly to the overall wellbeing of our residents, both physically and socially. On rural areas, access to recreational facilities is often limited, making Sheffield Pool an essential asset. It not only promotes a healthy exercise lifestyle by offering a place for exercise and

	relaxation but also acts as a catalyst for community integration. In rural settings, these facilities play a crucial part in reducing isolation and ensure that residents have a place to connect and build relationships. Furthermore, Sheffield Pool serves as an educational resource, offering swimming lessons and water safety programmes that are particularly beneficial for families in rural areas where natural bodies of water are a particular hazard. With the retention of a swimming facility in our community, the Sheffield School Board of Trustees demonstrates a commitment to the well-rounded development and safety of our community members, especially our children. I urge you to support the Sheffield Board of Trustees in retaining a pool facility in the area, recognising its role in enhancing the quality of life for residents and contributing to the unique fabric of our rural community. Your support for this facility will undoubtedly have far-reaching positive effects for generations to come. Thank you for your time, consideration, and dedication to the betterment of our community
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Comments:	Please just focus on keeping rates as low as possible. It is just sad how hard it is getting for everyone.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	322.8
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	What a waste of money. This is NOT the role of the council. They are not needed to be Grandmothers for businesses.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	322.9
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Definitely not. What a ridiculous waste of money. More than $1 million a year to "explore" technologies. It's laughable. Use money on essential items only. Stop bleeding the people dry. Many, many people are under crippling financial stress. Have pity. We don't need this kind of wasteful spending.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Comments:	**WE <u>DO NOT</u> WANT TO CLOSE THE SHEFFIELD MEMORIAL POOL FACILITY** This is an icon to our community, that has been mismanaged due to the lack of maintenance that should have been done by the council. I am a former committee member who was ignored when we discussed putting a liner or fibre glass options on the table in 2016, 2017 and also 2018 We had talks with it being applied on the long term plan but was completely sidelined. I was there when the pool was last painted in 2016 **WHERE** it failed and the Council didn't make the company repair it or try to make ammends. I believe that the lack of respect of our community has endured because of the lack of maintenance is really negligible on the council part. I feel that if the pool was returned to our community we would get it to the standards that will give life back to the pool. We have been		

	successful in the past at running this asset. This pool has the heart and soul of Sheffield and it has been heartbreaking seeing it in such disrepair We as a Community want to see the Memorial Pool come back to life for our future Tamariki to learn to swim, meet and focus on the fun that this pool holds. I am passionate about this and bringing life back to the pool and I know that im not the only one feeling like this thank you please save our pool
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Comments:	i am dissapointed snd so frustrated that their is no plan for a large indoor facility for affinity gymnastics to have a fit for purpose building in goeing sport. They hsve huge snd incresing membership numbers snd also wanted to increase availability of not only gymnastic classes but cheer leading, trampoline and aerobics to name a few. it is not ok that my children have to train in a freezing cold shed in the winter snd in summer evenings it is not unusual for it to be 35C plus. the gymnasts have to ‘ put the appartatus to bed’ with blankets and foam noodles so that the consenation does not dampen them to the point of not been safe and unsuitable for use. selwyn desperately needs an large indoor gymnastics facility
Staff Recommendation	The submission is acknowledged. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input. This excludes existing or proposed Council facilities as part of the Long Term Plan. Staff recommend that this facility be included as part of a wider community facility funding and planning project with gymnastics as a potential individual case study along with other facilities such as a performing arts and a military museum or similar to provide a variety of examples.

Carry out the landscape improvements to extend the playing fields; replace and upgrade the playground equipment, footpaths, toilet block, lighting and irrigation; and seal the carpark. **Project cost:** Years 1-10: $3.4m **Estimated impact on rates :** Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% * Our budgeted option **Comment:** As a member of the Leeston Smallbore Rifle club Inc. I would like to see the Leeston park Pavillion either replaced with a new building that can easily incorporate the new toilet block and cricket changing facilities. There is a 1.4 million dollar budget for the toilet block this could easily cover the cost of a new multiuser building, potentially indoor cricket,netball, basketball, soccer and even archery, all in one side of the building with a self contained rifle range in the other half. There is a building at Nelson's Saxton Park that could be replicated to accommodate all these activities. Otherwise I believe that for less than the cost to demolish the park pavilion, the building could be both earthquake strengthened and modernized. We use this Building for around 50 nights a year, a local craft group use it for 44 days a year and the cricket club use it during their summer season. This is a very well utilized building.
Staff Recommendation	It is acknowledged that the submitter has selected Leeston Park Option 2. The Masterplan report stated that a further study into the future of the Rifle Range building would need to be carried out to

	assess the various options (Demolish, Strengthen, Rebuild, Relocate). Staff recommend that the study on the Rifle Range building is undertaken and that staff work with the club to assess opportunities to co-locate with Ellesmere Archery at Osborne Park (See their submission). Having target sports all in one location may also encourage further activation and efficiencies in the long term.

Question: 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design.

Project cost:
Year 1: 15.21m

	Estimated impact on rates (per year): $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	This is our favourite public pool. We travel 25 mins to get to this pool because it's such a destination. Where else in New Zealand can you swim in a pool set on a grassy bank, amongst mature trees and with a view of snowy mountains? Our family loves this pool and would hate to see it go. Surely just advertise the pool and put the project in the black again?
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	332.8

Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	This costs as much as a sports stadium. I'm not convinced economic development is required for growth. Selwyn is growing just fine without it. For the majority, Selwyn is a great place to live and grow a family while working in Christchurch. Why not focus on supporting this with trains, buses and cycle access instead?
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	332.9
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	This is incredibly expensive. I work in technology and could make a completely new SaaS product line for this cost. This proposal only explores options! I'd support this if the price was a quarter what's proposed.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	332.10
Category	Activity > New Public Transport Services
Comments:	I don't believe it's in SDC's control, or perhaps SDC has some influence on this, but busses through West Melton need another look. We have a double decker bus which comes once a day, packed to the rafters. Strongly suggest we switch to two or three busses on this route, targeted around morning and evening commute.

Staff Recommendation	Submission is acknowledged by Council. Environment Canterbury provides PT Services. Council advocates on behalf of residents for additional services. It is aware of the demands on the 86 Metro Darfield to city service and will continue to raise this with Environment Canterbury.

Category	Activity > Other Categories identified by Staff > Other Water
Comments:	I moved to Springfield in April 2021. A month after the township had a major flood event. I had to evacuate my house, fortunately it was not impacted, however several households were. As a result of this, the council improved our water supply with new tanks and backup supply from Sheffield, we really appreciate this upgrade. However the issue with the actual flooding and the stormwater - nothing has progressed - and there has been very little or no attempt by the council to keep the community informed. With ever changing weather and storm events increasing, I am very disappointed that there is nothing in the council plan to address our issues here.

	My (along with other residents) House Insurance premiums have gone up significantly due to this flooding event. I hold council responsible for these increases due to their lack of action. Council will have been aware of these issues prior to the 2021 event, in yet nothing as been done. People in this township want to feel safe and to be reasonably confident that there are things in place to improve the flood resilience of our beautiful town. We need to look after what we have and prepare for future events.
Staff Recommendation	A Concept Report has been developed on options to reduce flood risk in the Springfield township. Staff recommendation is to await the outcome of the Environment Canterbury Long Term Plan consultation process with the Selwyn community about an additional targeted rate for district wide flood and river resilience work. It is recommended that Council work with ECan, landowners and other Partners on the concept. Further design and consenting work is budgeted in year 10 of the LTP with construction in years 11 and 12. Regular maintenance of the network within the township will be continued.

Point Number	336.1		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not		

	always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** i understand that there is apparently a huge 'no' from most of selwyn for leeston to get a community centre. Everyone is allowed an opinion of course, but do you really think people outside of Ellesmere are going to vote yes? The basis of of our population is in rolleston and lincoln, which means the rest of selwyn has to contribute to all of their developments. Yes, of course the rest of us have access too, but they are not necessarily easy for us to access. Leeston is such a big town to have no community centre. Even people in Ellesmere are pushing back - but because, incorrectly, they think that if we dont get a community centre our rates wont go up again. This is obviously a joke. There is no way our rates arent going to go up. However the increases in the last 2 years are far more than justified. Leeston deserves a community space. A practical community space. Not an ugly triangle.
Staff Recommendation	The submission is acknowledged.

Comments:	10 mins drive is far. The beauty of our districts pools was you used to be able to walk to them. For me this is the same as asking if the rest of the district supports shutting the pool in leeston because southbridge pool is 10 mins drive away. I woukd be absolutely gutted if this happened. So no! I do not support closure. Of course this pool is used less, the population of sheffield is little. Does that mean they dont deserve any facilities? Apparently.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Comments:	Think of the cost of a replacement pool? How many lives have been saved by learning to swim at this pool. We cant all go to Rolleston to swim. It will be overcrowded in no time.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	338.11
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	I am appalled at the money wasted and overruns of current projects. Darfield Sewer system still not running and Robsons carting it to Rolleston. Should be penalties applied to contractors for non-completion in a set timeframe.
Staff Recommendation	The submitters comments are acknowledged. The roll out of the Darfield wastewater network to service new development is continuing in FY23/24 into FY24/25. As the pipe network is being rolled out, wastewater may need to be trucked to Pines for short periods until a sufficient properties are connected to achieve the required velocities to prevent wastewater becoming septic. Roll out to the existing areas of the township are budgeted in FY27/28 to 29/30 and 2034/35 to 37/38. Staff recommendation is to engage with the community on how servicing costs for the existing community can be met.
Point Number	338.12
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	Should use well chosen private contractors. Chord is a joke and costing rate payers far too much. McLaughlin's road water extension over a month of partial road closure to lay 700 meters of pipe. A competent contractor would have laid it in a few days with minimal interruption to locals. There needs to be an overhaul on the human resources the Council are paying for. There seems to be a lot of people hanging off the Council for the sake of. Engineers, and consultants for instance. Contract out more. Save money here rather than hefty rate increases.

Staff Recommendation	Submission is acknowledged

Comments:	I am concerned about water quality in Selwyn especially the nitrate levels and support any plan to mitigate the increasing nitrate levels in our water supply.
Staff Recommendation	The submitters support for the proposal to investigate low nitrate water sources as budgeted is acknowledged. Staff recommendation is to undertake further investigations into centralised sources of low nitrate water as budgeted in the LTP.
Point Number	339.10
Category	Activity > New Public Transport Services
Comments:	I am a strong supporter of public transport improvements in Selwyn. In order to reduce emissions we need to have a viable public transport system that connects the Selwyn townships to each other and a system that connects us to Christchurch. We have existing rail lines to the likes of Darfield and Rolleston is there not an option to have some sort of rail link plus electric bus service?
Staff Recommendation	The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case considered a wider passenger rail service using the existing rail network. This could have merits in the future if combined with a wider regional passenger rail service that also included other Malvern townships too. But with small projected patronage, large investment needed for rolling stock and infrastructure (on a rail network managed by others), and that there is no CBD connection makes this currently not worthwhile. Environment Canterbury are intending to have a fully electric bus fleet in time.

Comments:	I would like to acknowledge the work that Mayor Sam and the council do in trying to navigate the unprecedented and complex environment of managing the Selwyn District, and trying to meet the needs of the residents. It is impossible to satisfy everyone, so I am sure there will be many complaining about the proposed rate increases. I understand that although many of your decisions involve an increase in rates, I am accepting of that if my rates are going to these projects as well as maintaining essential services. Thank you for the opportunity to comment.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	341.8

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Category	Activity > Lincoln Town Centre Upgrades
Comments:	They need to be putting investment into Lincoln not the other areas, as Council has just approved large scale housing developments in Lincoln with no supporting infrastructure.
Staff Recommendation	Council is putting a very large transport investment into Lincoln with this draft LTP. Council will be starting the upgrade of the Lincoln Town Centre and Gerald Street in stages starting in 2024 at the Liffey end and finishing at Springs Rd in 2030. This is estimated to cost $45M and includes cycle lanes, power undergrounding, 4 sets of traffic signals and the replacement of the failed carriageway. The extension of Meijer Dr to Boundary Road, along with the creation of

	adjoining reserves, is planned in 2025/26 budgeted at $3.5M. In conjunction with this in 2026/27 a $4M Park N Ride Facility to cater for improved public transport services planned by Environment Canterbury will be constructed opposite the Lincoln Events Centre. Developers are required to provide new infrastructure to vest in Council, plus upgrade existing as established through consent conditions were able to be achieved.

Submitter Number:	345	**Submitter:**	Steve Muir
Point Number	345.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** Why build new park and ride facilities when each town already has spare parking available for the majority of bus users i.e. Rolleston has plenty of parking available at the Sports Centre / Aquatic Centre that is not fully utilized during most working days? Lincoln has the events Centre with parking available, Prebbleton has parking and public toilets available at the new Karaka Sports Ground. Several bus timetables and users lend itself to smaller buses for greater efficiency.		

Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. For Rolleston those sites are not positioned on what will become the core PT Transport hubs and routes and will lack the size or level of service needed including bus parking, shelters of sufficient size and other facilities. Competing with existing parking demands will jeopardize their use and attractiveness for the intended purpose. Karaka Park has been initially assessed but has not been designed to accommodate bus drop off and pick up internally. Environment Canterbury is also investigating 'On Demand' PT Services as another option within larger townships.

Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	Climate change - SDC is doing little. Why have ALL new dwellings being built NOT required to install water collection tanks and or the reuse of grey water for outdoor cleaning and irrigation use. Why has every new house not got a requirement to include solar panels for its long-term use. What has SDC done it the last 5 years as an example to conserve water, electricity or reduce CO2 remissions?
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. While we cannot require water collection or solar panels through the Resource Management consenting process, council can explore sustainable solutions for residents through its Sustainability Plan.
Point Number	345.10
Category	Activity > Lincoln Town Centre Upgrades
Comments:	Lincoln Township Upgrade. This seems a lot of money for little benefits over a small area of Lincoln. What about Edward Street upgrade I'm sure the traffic volume of this street is increasing especially with new / additional subdivision coming on Springs Road. Where are the costs associated with upgrading Southfield Drive because of increased traffic. Get rid of the trees on the road shoulders, provide better/safer cycle lanes, improve intersection Edward Street / Eastfield Drive. Why have all the main arterial roads (Eastfield Drive, Southfield Drive, Vernon Drive) in Lincoln NOT got

	painted center lines? Similar streets in Rolleston all have painted center lines and shoulder parking eg Brookside Road, Lowes Road, Springston Rolleston Road. New street lighting in Gerald/Edward Streets why? The existing lighting including pedestrian crossings in Gerald St is only three years old surely these fixtures and some columns can be reused they have an expected life of 20 and 40 years respectively. What will the cost to rate payers be for the upgrade/improvement to Springs Road from Verdeco Blvd to Edward St RAB, currently there is non-complying streetlighting, poor footpaths or pedestrian access, no cycleway and dangerous overhead reticulation poles, will the rate payers of Lincoln bear these costs, or will the developer of new subdivision provide ALL this? Any new undergrounding of existing overhead reticulation in Gerald Street should be at Orion's cost after all it is improvements to their asset or do the residents pay because SDC partially owns Orion?
Staff Recommendation	The Lincoln Town Centre upgrade consists of the whole length of Gerald St. Edward Street had been upgraded some time ago and currently no further requirements have been identified. Some roundabouts could be installed in the future as traffic volumes increase like at Southfield Dr and Ellesmere Road. Traffic signals are planned at James St end as part of the Gerald St upgrade. Like many older streets in Selwyn overhead lines remain as these are very expensive to underground. Orion will only contribute to around 20% of this. A series of upgrades are required to Springs Rd south of Gerald St, but the majority are developer required related to ODPs. Collector and arterial roads can have wider carriageways which allow center lines to be safely used.

Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	Too much attention is being paid to Māori Policies we are one country with multi-races where is the Chinese Policy or Asian Policy.
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognizes the importance of partnerships; building strong partnerships with iwi is vital for Council to fulfill its obligations to the entire community. Te Tiriti O Waitangi (Treaty of Waitangi) is a founding document of New Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with iwi, to have any meaning, requires consideration of iwi position and contribution to discussion/debate.
Point Number	345.12

Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Stick to your core business, if a private business has a need, desire or economics stack up they will fund it themselves.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	345.13
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	1.3m seems a lot to "explore" that can easily become wasted. If there is an opportunity private business will see the opportunity and do it better / more efficiently than any council can.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	348.9

Category	Activity > Lincoln Town Centre Upgrades
Comments:	1. Lincoln Town Centre: Scrap proposed plans, including traffic lights. (I live in Lincoln and bike along Gerald St each day). $46m is simply unacceptable. Instead, consider lower speed limits within the four belts (inc Gerald St) to 40 - like in Prebbleton - which gives more time for traffic to enter flows.
Staff Recommendation	Lowering the speed limits is one of the mechanisms but needs to be established with the required supporting infrastructure to get those outcomes consistently. While speed is a factor it is the density of traffic that makes turning difficult and volumes and density of traffic along Gerald St will increase which is why traffic signals can best achieve this.
Point Number	348.10
Category	Activity > Walking and cycling improvements
Comments:	2. Long distance cycle trail from Arthurs Pass to ocean: Yes, proceed with feasibility study
Staff Recommendation	Submission is acknowledged by Council.
Point Number	348.11
Category	Activity > Chlorination
Comments:	3. As it's law, keep chlorine in water
Staff Recommendation	The submitters preference to continue to chlorinate community drinking water supplies and seek no further exemptions from Taumata Arowai is acknowledged. Staff recommendation is to continue to chlorinate community supplies to reduce risk to community health.
Point Number	348.12
Category	Activity > Compulsary organics collection
Comments:	4. Ka pai re organics collection.
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. We're pleased that you're supportive of the upcoming change.

Point Number	348.13
Category	Activity > Other Categories identified by Staff > Rates
Comments:	5. I'm sure others are say this loudly too, but let me add my voice: DO NOT PLAN ON RAISING RATES BY MORE THAN INFLATION. I know it's hard, I know we need to catch up, I know the funding model is broken. Yet my own income has not gone over the rate of inflation, so if you expect me to pay proportionally much more for SDC services, what do I cut - food? heating? We ALL have to cut our cloth to match, and I expect leadership from SDC officials and councillors to demonstrate SDC is desperately reducing expenditure, and this is easiest by looking at the large, expensive, 'nice to haves' (eg the proposed Lincoln town centre upgrade - don't do it!!!!).
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	348.15
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Financial policies: Change rating structure from a mix of general & targeted rates to just general rates, to simplify and to make it much fairer to all - ie more expensive properties pay more and less expensive properties pay less.
Staff Recommendation	Submission is acknowledged by Council.

Comments:	there are only 33 pages in the document so how can you read pages 54/55 ? Council cannot even get this right.
Staff Recommendation	Council acknowledges the submission and notes the concern with the level of information provided. Improvements regarding the presentation and provision of information will be considered for future consultations.
Point Number	350.11
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Been OK for the community for a long time now,keep using it the way it is. Too many woke people overthinking what is good for every one.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Point Number	350.12
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Business owners know more about business than council, keep your noses out of it.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	350.13
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	let others reinvent the wheel then follow them
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Submitter Number:	355	**Submitter:**	Details Withheld

Point Number	355.2
Category	Activity > Chlorination
Comments:	The percentage of people who wanted our drinking water system upgraded to stop chlorination was high yet the council has chosen to stick to what they are doing. In comparison to other projects where peoples votes were similar either way they have chosen to go ahead with projects. Would love to see decisions reflect what our people are asking for.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	355.3
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Also i see a lot of conserns around the increase in rates and the councils reply re increasing infrastructure to provide for the new developments. I question the rate of new developments being approved by the council at the rate of demand? less new developments less cost to rate payers.
Staff Recommendation	That the submission is acknowledged by Council.

Comments:	There are many in our community who are under immense financial strain. I do not see this improving in future years. I understand that the council receives many requests by individuals with their own agenda's in mind but we have to work towards the greater good, the future. Many in the Selwyn district are on a limited income, all the capital spending just adds to the burden of these families. Many of the consulants that the council employs are on very high incomes, how can they possibly know what the ordinary person requires or needs. I think that all capital spending needs to be stopped unless absolutely necessary. Live within our means and NO more borrowing. I was brought up in the generation where you saved up before you spned. Still do. The council need to revert back to the same. There is so much talk regarding mental health the increase in rates just adds to that in families. Focus on what is available in our community at present and suppoert those before trying to re-invent the wheel. Look what is out there first. I understand there is talk regardingthe creation of gardens in Lowes Road, why not apprach the government and lease the land out for them to buiild a hospital. Our mayor recently commented on national television that our population is set to equal that of Dunedin in 2050, they have a hospital. Selwyn has the population of Timaru at present, they have

	a hospital. Ashburton has a population of Rolleston, they have a hospital. I know that hospitals come under national government but maybe local government could be proactive in this. It would decrese transport out, it would bring people into Rolleston and maybe spend in oor local shops. Create it with a garden around it so you could merge it into one. That way you would be receiving income from the lease and service to the community. We do not require any more unnecessary expenditure. Happy to discuss y views any time.
Staff Recommendation	The council continues to work with the government to advocate for more services, including health and education. The Long Term Plan outlines what council intends to deliver and when to respond to the growing population.
Point Number	356.11
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	it is time for the council to keep their spending under control. No more borrowing as it will affect the ratepayers of the futurre. All decisions should be made by keeping future generations in mind
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and the negative impact that the increased cost of living is having on the public. The Council also acknowledges that this trend is not only limited to New Zealand, but is widely spread in many other countries worldwide. The Council endeavours to keep rates increases to a minimum and continue to proactively look for opportunities to minimise costs.

Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. Environment Canterbury are intending to have a fully electric bus fleet in time. There are not the savings perhaps seen as evident using smaller buses as fixed costs remain the same such as needing a driver, fuel etc. Using smaller buses risks not having the capacity on those occasions when it is needed that cannot be determined easily in advance.

Category	Activity > New Public Transport Services
Comments:	The transport plan does not mention anything except car parking; what about the need for new routes from outlying areas. Lincoln needs a bus via Hornby Hub to complement the 80 service to Westfield for easier shopping. I cannot see anything in the LTP on this subject.
Staff Recommendation	Environment Canterbury is responsible for providing PT services. Environment Canterbury is considering developing a business case for additional direct services for Rolleston and Lincoln in 2024-27. Improving the frequency of other key Metro PT services such 5 (Rolleston) and 80 (Lincoln) is also being planned.
Point Number	360.5
Category	Activity > Lincoln Town Centre Upgrades
Comments:	I am unhappy that the draft plan for the Lincoln focusses on the village centre only. Nothing is planned for the rapidly expanding edges of Lincoln. Shopping for basic living needs is ignored (except for a small New World with a small carpark). Before the existing land is swallowed up by hundreds of new homes, where is there scope for additional commercial centres for present and future needs. The fast growing suburbs in the north of Lincoln ie Rosemerryn, Greenstead, Flemington etc are not well served by one supermarket in the south, not to mention the extra traffic this causes through the village centre.
Staff Recommendation	Supermarket chains decide where best to provide supermarkets. This is not a role of Council apart from the regulatory requirements under the District Plan and Resource Management Act to assess these.

Submitter Number:	361	**Submitter:**	Lou Drage
Point Number	361.3		
Category	Activity > Other Categories identified by Staff > Bio-diversity		
Comments:	I strongly support programmes to protect and enhance biodiversity on Council land, including indigenous plant restoration with community. Across the Selwyn District there is less than 0.5% indigenous vegetation remaining. Council needs to take immediate action to increase available habitat for indigenous wildlife. Hearing native bird song in local parks and reserves is a key part of community wellbeing. Community, including schools are keen to participate in native tree planting days but need assistance from community groups, such as Te Ara Kākāriki Greenway Canterbury Trust. Pest species are causing severe damage to the remaining natural environment and indigenous biodiversity. Feral pig and deer control on the Port Hills requires ongoing funding. Landowners across the Selwyn District require education and funding support with pest control. I would like Selwyn District Council to introduce a bylaw requiring pet cats to be microchipped and registered. Spaying should be encouraged to decrease the feral cat population.		
Staff Recommendation	Councill environmental staff are working hard to reverse the decline in our native species and Council funding is available to enable indigenous biodiversity regeneration and restoration projects. Managing our natural environment is an ongoing challenge and it's important that we have suitable funding available, and work in partnerships with our community, iwi, landowners, and agencies to develop and enact suitable responses to ecological challenges as they arise. Council recognizes the significant efforts of community groups such as Te Ara Kakariki to protect and restore our natural environment. Pest and weed species present a significant and ongoing threat to our native flora and fauna and it's vital that Council has associated funding available to initiate, lead and contribute to projects (including agency and industry partnerships).		

Point Number	361.4
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	Mana whenua and iwi Māori should be included in all stages of Council decision making. It is extremely important that Council work to mitigate climate change and biodiversity loss, through restoring and protecting ecological areas.
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognizes the importance of partnerships; building strong partnerships with iwi is vital for Council to fulfill its obligations to the entire community. Te Tiriti O Waitangi (Treaty of Waitangi) is a founding document of New Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with iwi, to have any meaning, requires consideration of iwi position and contribution to discussion/debate.

Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** Simplify the construction and lower building expenses. There is no requirement for an architecturally elaborate structure. Why include cultural narrative in the design? One again, this results in unnecessary additional costs for the construction. Add in culture heritage from locals instead of impacting build cost.

Staff Recommendation	The submission is acknowledged. Selwyn District Council prioritises inclusivity and cultural respect in our community. Te Tiriti o Waitangi, the Treaty of Waitangi, is a founding document of New Zealand and recognising Te Reo Maori (the Maori language) and incorporating cultural design elements in public facilities is one way Council chooses to uphold the spirit of the Treaty partnership. Council considers recognising Maori language and culture in public spaces is not only appropriate but also necessary.

Category	Activity > Other Categories identified by Staff > Rates
Comments:	The current proposed rate hikes are unreasonable for even those with modest incomes - tough decisions and cutbacks are essential to make life somewhat more affordable for the average New Zealander, of which includes a multitude of nationalities. Besides our mortgages, rates represent the second largest financial commitment we must fulfill. I would prefer to see sacrifices made in elaborate designs, and non essential initiatives until the country reaches a point where is is feasible to keep up with the continuously risking inflation and cost of living expenses.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	363.8

Category	Activity > Lincoln Town Centre Upgrades
Comments:	I believe Lincoln has played a poor cousin to Rolleston for main town center development and poor bus services
Staff Recommendation	The Council will starting the upgrade of the Lincoln Town Centre and Gerald Street in stages starting in 2024 at the Liffey end and finishing at Springs Rd in 2030. This is estimated to cost $45M and includes cycle lanes, power undergrounding, 4 sets of traffic signals and the replacement of the failed carriageway. The extension of Meijer Dr to Boundary Road, along with the creation of adjoining reserves, is planned in 2025/26 budgeted at $3.5M. In conjunction with this in 2026/27 a $4M Park N Ride Facility to cater for improved public transport services planned by Environment Canterbury will be constructed opposite the Lincoln Events Centre. Environment Canterbury is considering developing a business case for additional direct services for Rolleston and Lincoln in 2024-27. Improving the frequency of other key Metro PT services such 5 (Rolleston) and 80 (Lincoln) is also being planned.
Point Number	366.11
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities

Comments:	Bring Disc golf parks to Rolleston and Lincoln helps people exercise and brings people that use the local cafes. It the scheme of budgets this is a very inexpensive investment, Requires minimal investment and benefits a wide range of community.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	366.12
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	Pickleball can be a great sport and is aimed to a wider range of older and younger players on outdoor courts. They can be used on any existing tennis court area with the area being approx 1/2 the size of a Tennis court. Pickleball offers great social aspects and can be played by the very young learning tennis or older persons or older groups who have played tennis. Especially as Selwyn has a growing aging population the ability to have out New outdoor courts in developments. Also, Tennis courts have a max of 4 persons playing with long games, where as Pickleball in the same area could have up to 8 people playing. The games are shorter, the plastic ball is less affected by Moisture so it means far better utilization of a under utilized tennis court. Pickle ball courts need to be in New developments and available thru all the regional towns
Staff Recommendation	Submission is acknowledged by Council.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	367.8
Category	Activity > Other Categories identified by Staff > Rates
Comments:	The Selwyn District Council needs to run like a business. You are proposing rate increases that are not sustainable to the average person. You must treat the council books like any other viable business and learn to live within its means of income and sticking to national inflation only.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	367.9
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	You do not provide enough information on the changes you are proposing to actually form an opinion. This appears to be a "tick boxing" item and not clear and informative
Staff Recommendation	Council acknowledges the submission and notes the concern with the level of information provided. Improvements regarding the presentation and provision noninformation will be considered for future consultations.
Point Number	367.10
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	$9,000,000 is too much for an unknown result. Everybody is suffering from tough times and the SDC needs to buckle in its belt

	and no spend anything apart from on the key things it needs to do - water, waste, roads,
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted the proposed allocation should be reduced. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. The $9m is over a ten-year period, and not all the proposed spend is the same across the years with the first years having a lower allocated amount. Council can revisit the allocations in year 3 of LTP. Councils' contribution to economic development is alongside others who are expected to contribute significantly more overall.
Point Number	367.11
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	But only if recorded savings can be identified
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	369.3
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool

Comments:	this facility should be retained and passed to the school for their continued use maybe returning to community voluntary supervision for key holder usage
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi.		

	Project cost: Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding
Point Number	370.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

	Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:** It makes sense to respond to the initial feedback regarding design and what the communities wants and needs are. Spending the money now, even with the increase in rates is forward thinking, if it is left for another 10 years it will be substantially more expensive and in the meantime the community misses out.
Staff Recommendation	The submission is acknowledged.

In order to get more people taking public transport they need bus stops closer to where they live.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Environment Canterbury who provides Metro Bus Services, needs to undertake more regular service reviews in Selwyn to take account of urban growth. Council on its part ensures that major new roads and intersections that are provided by developers in new subdivisions can support future bus routes and services should they be funded and introduced by Environment Canterbury in the future.

Comments:	Maori should have no influence over decisions by you. I travel a lot and I no longer can relate to your naming of facilities etc. Even changing names. You cannot change history or kiss bottom to minorities.
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognizes the importance of partnerships; building strong partnerships with iwi is vital for Council to fulfill its obligations to the entire community. Te Tiriti O Waitangi (Treaty of Waitangi) is a founding document of New Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with iwi, to have any meaning, requires consideration of iwi position and contribution to discussion/debate. Selwyn District Council prioritizes inclusivity and cultural respect in our community. Te Tiriti o Waitangi (Treaty of Waitangi), is a founding document of New Zealand. Recognizing Te Reo Maori (Maori language) and incorporating Te Reo Maori in communication is one way Council chooses to uphold the spirit of Treaty partnerships. Council considers recognizing Maori language is not only appropriate but also necessary. It reflet cs our commitment to the Treaty and our shared responsibility to create a more equitable and respectful society.

Comments:	I would like some land in leeston to start a community garden in leeston
Staff Recommendation	Submission is acknowledged by Council. There is limited opportunity in Leeston on existing Council owned land for location of a community garden. It is noted that the A and P Association have significant land holdings in Leeston and there may be a possibility of utilising a small part of that land for community gardens. Further exploration of the idea could be taken up with the A & P Association and the person/group promoting the proposal.

Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:**		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding		
Point Number	377.2		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	No more increase to rates please. Can business somehow pay this?
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has questioned if the proposed allocation could be reduced. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. The $9m is over a ten-year period, and not all the proposed spend is the same across the years with the first years having a lower allocated amount. Council can revisit the allocations in year 3 of LTP. Councils' contribution to economic development is alongside others who are expected to

	contribute significantly more overall.

Comments:	Lincoln already has the population it was forecast to hit in 2041, and you've just voted to increase its size by 40%. Why does nothing in the longterm plan reflect this massive change of direction, from 'preserve the village character' to 'grow as quickly as possible'. Where are the plans to upgrade our roads and intersections, beyond the Lincoln Town Centre plan which was put together ten years ago. For years we heard "Rolleston is the centre of growth" and that's why so much of our rates was spent there. Lincoln's population is the same as Rolleston's ten years ago - where's our second supermarket? Our pool? What is the plan for accommodating the thousands of extra vehicles on our already substandard routes to Christchurch?

Staff Recommendation	Population projections are not predictions, rather they indicate probable outcomes based on assumptions. A key assumption for the Long Term Plan is the population projections. As each town grows, there is a need to understand its future, as well as upgrade its infrastructure. This is generally done through Strategic and Spatial Plans. As growth continues to exceed the projections, more projects are needed quicker to meet this growth.

Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	i would like to address the issue of evicting people from the Selwyn huts. I was a resident down there for almost a year and in this time found it to be an amazing community where values and respect for others was a common thing. I have read the councils proposed plan and to say i am disgusted is an understatement. These are people's lives we are talking about and with the housing shortage in Canterbury you are expecting 100 households to uproot their lives and try and find affordable housing elsewhere. I feel the council need to go and visit these people who have chosen to live at the huts and see what a health and natural environment they live in.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.
