Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Point Number	1148.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:**		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council		
Point Number	1148.2		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we		

	want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan, but with additional sports courts and/or bigger community meeting spaces. **Project cost:** Year 1: 19.24m **Estimated impact on rates (per year):** $53.14 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Category	Activity > Low Nitrate Water Sources
Comments:	Better information about our water quality and amounts of nitrates is needed.
Staff Recommendation	The submitters request for information on nitrate levels is acknowledged. Data on current nitrate levels and maximum acceptable values of Council operated Community drinking water supplies can be found on Council's website at https://www.selwyn.govt.nz/services/water/water-supplies/water-quality-in-selwyn-district/nitrates. Environment Canterbury has undertaken nitrate monitoring in Canterbury Groundwater that can be found on their website. Staff recommendation is to undertake further investigations into centralised sources of low nitrate water as budgeted in the LTP.

Point Number	1149.2
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	Dear Selwyn District Council, Please reconsider your plan to only give the Upper Selwyn Huts another 15 years. I'm 41 years old now and I along with my siblings spent nearly all our summers staying at the Selwyn Huts at our family's hut. It's actually Crown Land and on 22 March 1895 the Governor General of the Colony of New Zealand declared the area "a reserve made for public recreation in the Land District of Canterbury and to be known as The Lake Ellesmere Recreation Ground." This followed an application by Mr Spackman (Secretary of the Canterbury Angling Society) to set aside 20 acres of Reserve No: 959. The Upper Selwyn Huts was where our holiday bach was when we were kids, now we're taking our own children out there to visit their Nanna, my mum owns a Hut there still and she planned to retire there and no doubt see out the rest of her years living in that community that we all love so dearly. My family and I have such good memories of the Selwyn Huts community from all of the events held every year, encouraging everyone to give it a go and get the community together. It was here where I learnt to play tennis, caught my first trout, eel and perch, climbed throughout the hedges and making tree huts. We used to have so much fun here, in the playground and in the paddocks, running races, darts, tennis matches, swimming races, smoking eels with neighbours and good old get togethers. It was so much fun and we always eagerly anticipated our Christmas holidays there. All of the community love their homes and the spirit and upkeep of the place was always in the best spirit of the huts and surrounding community. I will dearly miss this place as will so many others if the Huts are to be destroyed in 15 years or less. Please consider a much longer maximum term than 15 years for Upper Selwyn Huts.

	The Selwyn Hut owners and residents have been paying towards many of the Selwyn District Community assests, but yet they have not been included in the district wide rating scheme, which is discrimination in my view. Council should be looking to repair and replace the reticulation system. They have been in charge of this since 1989 and have not done any maintenance. It's not the residents fault that Council have dropped the ball! The Upper Selwyn Huts is a historic place and should be treated as such. The Upper Selwyn Huts have little to no impact on Te Taumutu Runanga's mana whenua, their ability to practice mahinga kai and on the health of Te Waihora/Lake Ellesmere. For 130 Years the Selwyn Huts hasn't bothered anyone. Why now? You should all be ashamed, maybe look to reducing cow numbers in the catchment before you kick people out of their homes for no good reason. Ngāi Tahu has no right to this land, how many of you would sacrifice your own homes to honor their ancestors and return your farm land to what it once was in the 1800's. I bet, none of you. Please reconsider the maximum 15 year term and your discrimination against the Upper Selwyn Huts. You have nearly gone down a path where you will be embarrassed in the High Court of you try to execute your barbaric treatment of this historic Selwyn District place, the Upper Selwyn Huts.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

There is excellent evidence about the many benefits of youth participating in sports, including improving mood, reducing stress hormones, lower rates of stress, anxiety, depression and suicidal behaviour, reduction in the risk of teen substance abuse and reckless behaviour, increasing resilience, confidence and teamwork. These are goals that we should all aspire to for our teens. Having this type of facility in our community would provide our teens with a place where they can connect with their peers, in healthy positive interactions, year round.
Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	As a Springfield resident, the Sheffield Memorial Pool is an important asset to our wider community, and I do not believe the pool should close. The small pool at Springfield School is only open to school families, thus once children start Year 7, Sheffield is our closest swimming facility. In reality Sheffield Memorial Pool is the pool of choice well before children get to Year 7, with the diving board being a major drawcard for the young and young at heart. During summer holidays, with very few local facilities for teens, the Sheffield Memorial Pool is a place where youth can connect with their peers taking part in a positive activity. It is also a great place for local families with younger children to connect and catch up. Numerous studies demonstrate that strong social connection increases happiness and longevity, and this is particularly important in rural environments, where social isolation is a defacto element of living rurally. In recent years the Sheffield Memorial Pool opening hours have reduced markedly. This may make it appear as if demand is reducing for this facility, however for many families, the very limited opening hours means that they cannot visit around work or other obligations. Unfortunately this either means that these families miss

	out on this opportunity for fun, fitness, recreation and connection, or, where able, they travel significant distances to visit other facilities. This is costly, not only for the families and individuals, but has a significant unseen environmental cost. The Sheffield Memorial Pool is an important part of our growing community, and must be retained.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP
Point Number	1156.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m

	Estimated impact on rates (per year): $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1156.7
Category	Activity > Other Categories identified by Staff > Rates
Comments:	concern about how high the rate cap could move
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1156.8
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	As long as the money is invested in techinolgy and not all soent on comsultants then resulting in huhe cost blowouts, alot of off the shelf option for technology are available without engaging comsultants to tell you what the rate payers can through community engagement
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Point Number	1157.1		
Category	Questionnaire > Matters For Community Guidance		
Comments:	**Question:** Do you support the closure of Sheffield Community Pool? No **Comment: Comment: Comment:**		
Staff Recommendation	Submission is acknowledged by Council.		
Point Number	1157.2		
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool		
Comments:	I have been a user and supporter of the pool all my life, including being a committee member, and free maintenance charges from my business for many years including being part of fundraising for major projects. My grandfather who was a Returned Serviceman, was part of the original committee that fundraised and helped build the original pool. The Taege family have used the pool for five generations. You say that its 10 minutes time travel to the Darfield Community Pool, a swim cannot be guaranteed as the pool may be overcrowded which has happened a number of times. Appreciate the 10 minutes doesn't take into account for the wider catchment of the pool users such as people living West of Sheffield. This problem makes the Waimakariri River a logical alternative. Approximately 35 years ago, due to an earthquake the Sheffield Memorial pool was closure for a couple of months due to a fracture in the pool and having the pump running daily to keep the pool full. During that time the community used the Waimakariri River as preferred option. As a result, while the pool was closed the Sheffield VFB was called down		

	twice and the St Johns for three emergencies. Two of the callouts were to locals who would have used the Sheffield Memorial Pool. It is imperative that the Sheffield Memorial Pool remains open. The council have indicated that the pool is too expensive for them to run. A logical alternative is for the community to take control of the operation of the pool as was done successfully over the previous 60 years. It is estimated that the cost to upgrade the pool is around $800,000 to 1 million dollars. The Council wants to demolish the pool and is committed to around $300,000 as a cheaper option. If the Local Community was to take over the control of the swimming pool and receive the $3000,000 it would complete the restoration of the pool and operate it with the normal targeted rating contribution that exists at present. A key system would provide additional supplementary income and provide an increased use of the pool which is opposite to what has happened under council control. I wish to speak to the hearing if possible.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Point Number	1158.2		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		

Comments:	**1. Historical Value** The Mayor says in the Long Term Plan that "we're focused on looking after what we already have" - how about you look after us! An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council unanimously determined that 'Hut licences and subsequent renewals are short term and ultimately for a finite period'. At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts. I request the historical significance of the Upper Selwyn huts be recognised and the Selwyn Huts to be listed as a historical site on the district plan and the term for us being here to be extended to protect this history.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.
Point Number	1158.4
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	**2. District Wide Rates** (a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequent upgrade, the requirement we were told for being put on DWR. (b) We have already paid for the water upgrade.

(c) We should not be discriminated against and should be treated like everyone else in the district.

(d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We should also be added to the DWR for Sewer and Water like everyone else.

(e) Towards25 LTP Document stated:

"The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities."

This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table.

From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston.

(f) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community."

(g) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Selwyn Huts Future Occupancy Strategy" report dated 04/03/2024.

	(h) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners. (i) Additionally we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to

	Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**

	Question: Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1162.8
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	The Darfield Pool is already over-subscribed - too many people fighting for the one space. What a disgrace to the returned servicemen of the community (as it's a war Memorial Pool) and to the family who donated the land in the first instance, not to mention the local School who continue to support the usage by teaching their students to swim in it
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1162.9

Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Not at $9 million.
Staff Recommendation	It is acknowledged the submitter has selected to not progress with the Economic Development Strategy and holds a view that the proposed allocation is excessive. Councils' contribution to economic development is alongside others who are expected to contribute significantly more overall. Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. Every cent of spend will be scrutinised and planned for to ensure outcomes and returns are maximised from the spend. Action plans will outline this in detail. The $9m is over a ten-year period, and not all the proposed spend is the same across the years with the first years having a lower allocated amount.
Point Number	1162.10
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	If this is going to happen then we have to see some actual work being completed as a result of it.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1162.11

Comments:	I'm not inspired by what I've read.
Staff Recommendation	Submission is acknowledged by Council.

Point Number	1162.12
Category	Activity > Chlorination
Comments:	The chlorinated water has a horrendous taste and I would love to go back to our great tasting water we once had.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1162.13
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Ratepayers are struggling at the present time and Council should be trying to assist by not requiring such huge rate rises. Some pensioners and families with children and are going to struggle with a rate rise. I agree with most of the projects but Council should prioritize so to spread the costs out on the ratepayers.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.

Submitter Number:	1163	**Submitter:**	Jessica Blackwood
Point Number	1163.2		

Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	What I would like to see and what Selwyn desperately needs is a dedicated dog training and competition grounds. Where the Selwyn dog training club is currently now, is too small of an area for Selwyn current needs. The club needs more space to train members of public with their dogs, train club members and hold competition. The grounds are always covered in faces and urine making it not a nice place to train and compete. The grounds are also uneven from dogs digging which can lead to injuries to both dog and human. Members of the public wouldn't get upset when the grounds are closed for the club to use.
Staff Recommendation	Staff agree that the current site has limitations in terms of space and conflict with casual use of the dog park especially during events. More dedicated dog friendly areas are needed to service Rolleston and, with the impending development of the District Park on Levi Road there is an opportunity to incorporate dog-friendly spaces and this need has been identified in early planning undertaken to date. Space to accommodate a dedicated area for the Selwyn Dog Training Club needs to be further explored in terms of identifying the best location and how this could be set up and funded. Staff recommend that further investigation is carried out in consultation with the Selwyn Dog Training Club to determine the best future location for the club and what support Council would provide for relocation of activities.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1164.7
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a share Hub/Clubrooms built at the proposed new Tennis & Netball facilities based in West Melton. West Melton Tennis & Netball share the vision to provide an inclusive, nurturing & welcoming community focused environment to develop players of all ages, creating longevity for the clubs & community. What we are asking for is a hub to bring our community together to create a sustainable future of tennis & netball but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Tennis nets, tennis poles, tennis balls/trolleys, netball balls, gear bags, hoops & training equipment. The space would require a kitchenette suitable for making tea & coffee and afternoon tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council

	staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Submitter Number:	1165	**Submitter:**	Details Withheld
Point Number	1165.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** I'm not against the idea of park and ride facilities, however there must be more cost effective options available in terms of the infrastructure needed. Surely this infrastructure could be simplified significantly (eg gravel parking area) which would be a better use of ratepayers money.		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. Park N Ride sites need to provide a level of service that aligns with the increased bus		

	services including bus parks, shelters of sufficient size, secure vehicle parking, bike stands, lighting and all-weather pavement surfacing. They have to be safe and follow CPTED requirements for potential 24/7 use. This type of level of service attracts increase patronage and use of bus services, which is the objective.

	Question: Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment:** **Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1165.5
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	It is a shame to lose the community pool at Sheffield, but given the newly upgraded Darfield pool 10 minutes drive away it does make sense. Many people in urban areas drive 10 to 30 minutes to access a swimming pool. I don't however understand how it could cost $290,000 to close the pool.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1165.6
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	I would only support the idea if it genuinely improves services to the community and saves the ratepayers money (eg by reduced staff numbers) I certainly wouldn't support this idea if it was used for privacy encroaching ideas such as facial recognition cameras etc
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with

	more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1165.7
Category	Activity > Other Categories identified by Staff > Rates
Comments:	We are currently in a recession and the proposed levels of compounding rate increases are going to cause many of your ratepayers undue burden, especially given that the real increases are likely to be significantly higher than what has been estimated.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1165.8
Category	Activity > Other Categories identified by Staff > Debt Levels
Comments:	Selwyn District Council was once the envy of many councils with extremely low levels of borrowing, but now we are looking to burden generations of ratepayers with extreme levels of debt. What happens when the next pandemic rolls round, worse than the last, and we find the district in times of economic hardship? Or What happens if the Alpine Fault causes "the big one", an earthquake that devastates the district causing economic hardship? Would the proposed levels of debt be a wise choice on behalf of ratepayers in either of these scenarios? No doubt there will be many projects that aren't able to be completed within budget for various reasons, where will the extra funding come from? Further borrowing?
Staff Recommendation	Submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.

Point Number	1165.9
Category	Activity > Council's Office Improvements
Comments:	I don't feel that the upgrades to the Council building in Rolleston is a wise use of ratepayers money. The entrance way is perfectly usable, presentable and welcoming. Whilst the Council Chambers might be getting a little dated, improving these isn't giving value to the ratepayer. This is something that could be considered in times of surplus, rather than adding it onto the vast amounts of proposed new borrowing. As for meeting room space, could the Council consider using some of the 4 new, modern, underutilized bookable meeting spaces in Te Ara Atea https://eservices.selwyn.govt.nz/facilities/facility/te-ara-%C4%81tea
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.

Point Number	1166.9
Category	Activity > Planning Further Community Facilities
Comments:	There is an absence of planning for a dedicated performance space for the arts. I believe there had previously been a plan to have an outdoor stage for the town centre but an indoor auditorium/art

	performance auditorium/theatre is needed in the Selwyn district. Rather than having to travel into Chch - such a space would enhance the community. Te Ara Atea has a community multi space and it's great having the spaces available for workshops/exhibitions/small performances but there are a lack of performance venues in Selwyn district. This connects with the SDC community events funding where often funding applications include staging/technical equipment. The best solution would be to partner with MOE with the new senior secondary campus at Rolleston College/Horoeka Haemata and it's a win win for both sides - 50% 50% spend from both sides. Rolleston has the largest population in Selwyn and being a hub for other community facilities there is a nice synergy. It also makes Selwyn District a destination for other international acts/performances, rather than being overlooked. We are thinking longterm 10 years and beyond.
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.

Category	Questionnaire > BD3 - Malvern Rec and Sports Facility		
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes two indoor courts. **Project cost:** Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million) **Estimated impact on rates (per year):** $19.91 **Funding:** Rates: 57% Development contributions: 43% * **Comment:** With the ever growing population in Darfield township and the wider community townships, an indoor facility to provide more/better sporting opportunities, in particular for netball, but also many other various sports or activities, would potentially provide improved participation here locally instead of people travelling out of the area to undertake their chosen sport or activity. With only one court the use is very limited and would mean users competing to get their desired use timeslot. With two courts being available, then different sports or activities can use the facility at the same time, increasing the functionality for the community. Ideally the facility needs to be designed with a vision for potential extention and not be limited in that capacity. Design also needs to consider how multiple sports and/or activities can use the space simulateously. The site at the Darfield Recreation Centre is land already owned by SDC therefore no need to fund the purchase of land, meaning more funds		

	being available out of the budgeted figure to develop and design the facility to maximise it's potential.
Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.

Submitter Number:	1169	**Submitter:**	Victoria Leech for Darfield Netball Club
Organisation:	Darfield Netball Club		
Point Number	1169.1		
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility		
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. Total left to fund is $10.18 million) **Estimated impact on rates (per year):** $19.91 **Funding:** Rates: 57% Development contributions: 43% * **Comment:** A two court facility would provide an opportunity for both our club and our Malvern Netball Centre to be able to offer netball formats and competitions is an increased and differing way to what		

	we can with only outdoor courts. We are finding more and more that due to family, work and other life commitments we are needing to be more and more flexible in what we offer. Currently we are hindered in this. And with multiple, extremely large facilities within a 30 to 60 minute drive, people do head out of our area to play where there are less weather interruptions, eg. the Lincoln and Rolleston indoor facilities and even the newly opened Christchurch indoor courts. To be able to continue to thrive in our sport, we need to be adaptive to the wants and needs of our members to enable us to grow our sport in the local community, being the Darfield township and the wider rural communities. The design and future ability to add onto an indoor facility in a much later timeframe is so required, is key to a two court facility being successful and well utilised.
Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.

Comments:	please do not close, this is a valuable asset to the community. The Darfield pool is hardly big enough already let alone adding the sheffield customers as well. There are a couple of alternatives that the council seriously need to consider which will make the pool more usable for many years and reduce running costs.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Submitter Number:	1172	**Submitter:**	Teisha Cosgriff

Point Number	1172.2
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a shared Hub/Clubrooms built at the proposed new Netball & Tennis facilities based in West Melton. West Melton Netball & Tennis share the vision to provide an inclusive, nurturing & welcoming community focussed environment to develop players of all ages, creating longevity for the clubs and the community. What we are asking for is a Hub to bring our community together to create a sustainable future of Netball & Tennis but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Netball Balls, Gear Bags, Hoops, Training Equipment, Tennis Nets, Tennis Poles, Tennis Balls and Trolleys. The space would require a kitchenette suitable for making Tea & Coffee and Afternoon Tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it’s future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Comments:			

Question: You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:

Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi.

Project cost:
Years 1–3: $4.2 million
Years 4–10: $11.6 million

Estimated impact on rates:
Years 1–3: $7.06
Years 4–10: $19.52

Funding:
Rates: 49%
NZTA Waka Kotahi: 51%

Our
budgeted
option

Comment: Bus timetables need to be extended in Lincoln, which may increase use. Currently buses don't run before morning shift at hospital or after evening shift (11pm). Would be hughely beneficial to many healthcare professionals.

Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Environment Canterbury is considering developing a business case for additional direct services for Rolleston and Lincoln in 2024-27. Improving the frequency of other key Metro PT services such 5 (Rolleston) and 80 (Lincoln) is also being planned.
Point Number	1173.5
Category	Activity > Planning Further Community Facilities
Comments:	It would be great if there was a theatre in Selwyn (Rolleston). There are so many talented people and amazing groups eg. Centre Stage that support those with theatrical interests but no theatre that effectively allows them to display there talents.
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.

Category	Activity > Maintenance and Renewals Funding Roading
Comments:	I have lived on a shingle road (Station Road) for over 30 years. In the last decade, particularly, the traffic has increased significantly. Reasons include screen works trucks, horse floats, stock transporters and all the support vehicles for the businesses on the road. The dust is now excessive, and the road is being graded a lot more often than previously which must be increasing the councils costs (Abrigded).
Staff Recommendation	Submission is acknowledged by Council. Council considers sealing applications on a cost / benefit basis. Funding is limited and is only apportioned to priority sections of road. This site will be considered alongside all other unsealed roads in the years to come.

Comments:	Tarsealing of Station Roads, Hoskyns Road north of West Coast Road, currently gravel. These gravel roads have significant volume of traffic, particularly large trucks travelling at the 100km speed limit. This creates large amounts of dust which enters the properties along the road creating a health hazard. Users of this road, myself included have experienced safety issues driving on the road when fast, large vehicles cause large dust clouds affecting visibility over hundreds of metres of the road at a time. This has on occasion necessitated drivers pulling off the road to avoid the potential of collision with other vehicles on the road, both on the other side and possibly driving up behind. I ask that you please reconsider tar-sealing these sections of road. Occupants of properties along the roads advise the council has advised them on various occasions over the last several decades that these roads were due to be tarsealed under plans at the time. I would appreciate your consideration of this request thanks Anna Brenmuhl.
Staff Recommendation	Submission is acknowledged by Council. Council does not have available funding. Unsealed roads are cheaper to maintain.

Submitter Number:	1177	**Submitter:**	Harle Whitehead
Point Number	1177.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are

	collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**

Comments:	Give the $290k to the school to manage pool for local residents.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Category	Activity > Maintenance and Renewals Funding Roading
Comments:	Station Road from West Coast Road State Highway 73 is having more heavy trucks travelling to the Waimakariri River. The trucks speed and create dust. The road is full of potholes and very corrugated. Also it is very dangerous to pull out onto Highway 73 and hard to see cars coming from the west on the right. After twenty years of waiting for the road to be sealed it is time for this to be done! There has also been several accidents on that intersection ie Highway 72, Station road and Bealey Road.
Staff Recommendation	Submission is acknowledged by Council. Council does not have available funding. Unsealed roads are cheaper to maintain.

Comments:	As above - Council should let private enterprise develop the economy more efficiently than Council can.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and holds a view that Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	1182.11
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	Rating of Maori Freehold land

	1. There are no full blooded Maori in NZ 2. Few are more than 1/4 Maori 3. All land should be rated similarly regardless of the ethnicity of the owner. Any other policy is racist.
Staff Recommendation	Council acknowledges the submission. Council is required by s 108 Local Government Act 2002 to have a policy on the remission and postponement of rates relating to Maori freehold land. When developing this policy staff have considered its position regarding rates postponement and remission based on these legislative requirements
Point Number	1182.12
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	It is my understanding that in the 1998 seven year plan, Station Road RD1 7671 was to be sealed. Selwyn District council approved the opening of a quarry at the eastern end of Bealey Road. The increase in heavy traffic resulting is dramatic. Numerous trucks daily and the dust nuisance resulting is not only horrible but is a health hazard. The section of Station Road particularly affected is that between SH73 and Hoskyns Road. You approved that quarry and made our lives unpleasant. Please rectify ASAP.
Staff Recommendation	Submission is acknowledged by Council. Council does not have available funding. Unsealed roads are cheaper to maintain.

Submitter Number:	1183	**Submitter:**	Michelle Martin
Point Number	1183.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:			

	Question: You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** This is an extreme budget, a cheap way could be found to fund.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Park N Ride sites need to provide a level of service that aligns with the increased bus services including bus parks, shelters of sufficient size, secure vehicle parking, bike stands, lighting and all-weather pavement surfacing. They have to be safe and follow CPTED requirements for potential 24/7 use. This type of level of service attracts increase patronage and use of bus services, which is the objective. The budgets include the value of Councils land in accordance with accounting practices.
Point Number	1183.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	

	Question: 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** The local community should decide. This is my preference.
Staff Recommendation	The submission is acknowledged.

Point Number	1183.8
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Some digital but retaining personal services
Staff Recommendation	Face to face interaction will continue to be an important part of how we interact with our communities. Our digital approach is designed to make things more streamlined, connected and efficient.
Point Number	1183.9
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	Ngai Tahu is very wealthy. They should pay rates too on housing development land and farm land.
Staff Recommendation	Council acknowledges the submission. Council is required by s 108 Local Government Act 2002 to have a policy on the remission and postponement of rates relating to Maori freehold land. When developing this policy staff have considered its position regarding rates postponement and remission based on these legislative requirements
Point Number	1183.10
Category	Questionnaire > Policy Changes > Policy Review - Other

Comments:	Climate change Policy - DO NOT SUPPORT
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017, this being our commitment to develop and implement plans to reduce emissions. The council has a Climate Change Policy, as well as an emissions target to assist with the development of the LTP. The Activity and Asset Management Plans with this LTP each specifically identify how they are responding to climate change and emission reduction.

Comments:	1. No to Arthurs Pass cycleway.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1183.12
Category	Activity > Lincoln Town Centre Upgrades
Comments:	2. No to 4.8 million spend on Lincoln Township plan.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1183.13
Category	Activity > Planning Further Community Facilities
Comments:	3. Yough Facility - concerned about council using Family planning as they are a unreputable organisation that encourages young teenage girls to have abortions, go on contraceptives, puberty blockers, hormone treatments etc etc. All without parent knowledge.
Staff Recommendation	The submission is acknowledged. Council has offered available space within the Rolleston Community Centre’s Integrated Youth Hub for registered NGOs delivering free services to young Selwyn

	residents. The services available are intended to introduce choice and options for Selwyn young people. Central government funders and accreditors of such NGOs are expected to ensure a quality service that complies with all relevant legislation.
Point Number	1183.14
Category	Activity > Other Categories identified by Staff > Rates
Comments:	4. Cannot afford the rates increases. This has already affected my rental price and will furthermore make it unaffordable for me to live.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1183.15
Category	Activity > Walking and cycling improvements
Comments:	- Cycleways - No to rural cycleways - not worthwhile as low use versus high. - Urban cycleway only 1km long at a time is worthwhile. Only one side of the road, cyclists can go both ways on the path with painted lines. Car parking needs to be available roadside even if only on 1 side. - Rural cycleways in future should be unsealed, crushed lime tracks are better. Road cyclists don't use cycleways as they cycle on the open roads. Only cycleways that should be prioritised are high density area servicing schools in towns.
Staff Recommendation	Submission is acknowledged by Council.

	Question: You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP
Point Number	1189.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	
	Question: 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

	Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**

Category	Activity > Planning Further Community Facilities
Comments:	Prebbleton community hall was scheduled for replacement in the current 10 year plan with money assigned for the work. Where has this money gone and why are we not getting a new fit for purpose community hall for the ever increasing population, Prebbleton. There is a large section for sale on Springs Road that would be ideal.
Staff Recommendation	Staff recommend this submission be acknowledged. A new community centre for Prebbleton has been in considered in earlier Long-Term Plans and was previously signaled for construction in 2025/26. A needs assessment study was undertaken in 2023 which

	concluded that there was demand for a facility to service the community, and that it should provide a mix of social, community gathering and recreation spaces. The study further concluded that the facility needed to be located so it was easily accessed by the community. As there are uncertainties about the best site for the facility and the activities that it will cater for, further planning and community consultation is needed. To enable time for the necessary planning to happen, the project has been programmed for 2026/27 to 2027/28.

Category	Activity > Low Nitrate Water Sources
Comments:	Give us pure water without nitrates, chlorination or fluoride.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies, investigate low nitrate water sources and not fluoridate water supplies is acknowledged. Staff recommendation is to continue with the 5 Waters capital programme as proposed in the LTP.
Point Number	1190.9
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	Climate change is a CON.
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions.
Point Number	1190.10
Category	Activity > Other Categories identified by Staff > Speed Management
Comments:	I oppose spped reduction on Selwyn roads.
Staff Recommendation	Submission is acknowledged by Council. Speed needs to be fit for purpose for each road. Council has developed an interim speed management plan focusing on schools and network critical sites within rules set out by NZTA.
Point Number	1190.11
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	Sealing of Hoskyns Road from Kirwee to SH73.
Staff Recommendation	Submission is acknowledged by Council. Council does not have available funding. Unsealed roads are cheaper to maintain.

Point Number	1190.12
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	Why do Maori need to be involved with all decision making?
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognizes the importance of partnerships; building strong partnerships with iwi is vital for Council to fulfill its obligations to the entire community. Te Tiriti O Waitangi (Treaty of Waitangi) is a founding document of New Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with iwi, to have any meaning, requires consideration of iwi position and contribution to discussion/debate.

Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:			

	Question: You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** Funding the projects by way of increased rate when many ratepayers are struggling with huge cost of living crisis is NOT an option. Building such facilities is arcade and not future-proof, just like the content of the proposed long-term plan for Selwyn is yesterday, except for the investment in IT. Try and project into the future and see what 10 years from now, what the future is like. Look to countries like China and try and work towards a future world that the future generations will thrive, Singapore is another example.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP
Point Number	1191.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1191.8
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	It has historical value should consider fund-raising by the locals for ongoing operation.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified.
	The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed

	facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	1191.9
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Not until we know the plan and the RO!
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy without more information. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in Economic Development. The Council has a role in facilitating others and enabling Economic Development to occur as prosperously as possible to benefit the whole community. Action plan will be developed with outcomes defined.
Point Number	1191.11
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	It is the future and used effectively, can pave the way to improving services
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1191.12
Category	Activity > Other Categories identified by Staff > Other Matters

Comments:	One way to keep the community informed and engaged is to have an effective governance structure that provides a link between the community and the council. This is to ensure the community has a voice through their elected representatives, hence the need to keep Malvern Community Board which plays a crucial role of taking onboard the concerns of the community and liaises with the council to arrive at satisfactory outcomes. In fact, there should be more community boards in Selwyn to serve the interests of the community.
Staff Recommendation	Submission is acknowledged by Council. However, the Representation Review is subject to a separate process that does have a separate consultative process.

Comments:	
	Question: Do you support the closure of Sheffield Community Pool? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1194.6
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool

Comments:	Sheffield Pool. It was built as an RSA pool for the local schools and community to use. The pool is an important asset as it is safer than using the local rivers and allows for much less pollution and climate change than parents driving all the way to Darfields pool. It also would be an important contribution to helping put out any major fires (which could occur) if it was available for helicopters to access. Please keep it available for us to use. The ratepayers contribute to keep ALL pools open.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool, and highlighted the Memorial aspects of this facility as a key Council consideration for the future of this site.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	
	Question: 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan, but with additional sports courts and/or bigger community meeting spaces. **Project cost:** Year 1: 19.24m **Estimated impact on rates (per year):** $53.14 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Comments:	Leeston would hugely benefit from it's own business park! At present the industrial area is very limited with little or no chance of businesses being able to expand. The council is quite happy to approve the development of subdivisions but unfortunately the retail facilities etc are not keeping up with this demand. Fed up with so much of our rates finding projects in Rolleston while Leeston is neglected.
Staff Recommendation	Submission is acknowledged by Council.

Comments:	1. Provide a collection point for recyclables in the Sheff/Darfield area. 2. Something similar to Castle Hill and Arthurs Pass would do.
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. Sheffield and Darfield townships receive a kerbside collection service. The reason the recycling station system works in Arthur's Pass and Castle Hill is, because they are remote and do not receive a kerbside collection service, they are also provided with communal general rubbish skips, and are monitored by community volunteers for contamination, fly tipping and servicing requirements. These facilities come at a considerable ongoing operational cost, and an unstaffed facility in an urban area such as Darfield or Sheffield has considerable potential to attract fly tipping and contamination within the recycling as seen in other districts. We are working with our contractor to further extend kerbside collection routes where possible, and adding additional drop-off points (for rubbish bags and recycling crates). This is currently the most effective way to make recycling more accessible.

Category	Activity > Other Categories identified by Staff > Other Water
Comments:	See email attached to submission if not clear to read in here  Malvern Hills Rural Water scheme. We are farmers on the Hartley's Road water scheme which is a restricted supply scheme. We have agreed to purchase 12 units of water even though we would rarely if *ever* use 12 units. We accept this part of the deal for security reasons and the now horrendous cost of applying f.pr additional units if ever needed. It has become far more expensive since SDC took ownership of our scheme. • When the scheme was owned by the users any overpayments or accrued finances stayed within the scheme so all was not lost. Now with SDC ownership ALL IS LOST.

This includes the $6000000 surplus funds in our scheme when SDC took .ownership in 2016.

I am sure that most if not all farmers on our scheme pay for more water than they actually receive or use. .For reasons already mentioned.

SDC has installed water meters on over 93% of all water connections but refuse to put meters on our supply, They also refused to assist when I told them that I was going to purchase 4 meters and install them myself. I tl1ought that maybe they could suggest a good type of meter or offer to purchase them for me through the Council discount but no.

I purchased the 4 meters and finished installing them on 28-11-23. The reading on 28-4-24

We had purchased a total of 152 days times 12 units This means that we had been paying for 12 units @ 224

Plus Fxd charges

They have been recording for 5 months now. totalled 774,000 L 774 units

= 1824000 I 1824 units

=$ 2688

$308

= $2996

$2996 for 12 units = 249.66 per unit.

	However the total water actually received was only 774 units or 5.09 units per day. $588.60 per unit. $2996 for 5.09 units = Ratepayers on metered supplies are able to be charged for what they actually use whilst restricted supplies cannot but instead face huge costs to purchase additional units. This is inequitable.
Staff Recommendation	The submitters comments are acknowledged. As part of the 2016/17 Annual Plan consultation on the move to a District wide water supply rate, it was shown that the rate for Malvern Hills properties on 2 units reduced by nearly 30%. Restricted water supplies such as the Hartleys scheme, are billed based on the cost to operate the scheme shared across the number of units allocated for the scheme. Each property pays for the right to take their 'allocation' of water. Charging is not done based on the volume supplied as with on demand schemes. This allows the total consented annual volume to be managed within the consent limits and property owners to pay for the number of units they need access to. It would not be possible to move to a user pays restricted scheme and effectively manage the number of units allocated to each property. To change to a fully on demand user pays scheme significant infrastructure upgrades would be required including pumping and pipe network.

Point Number	1209.3
Category	Activity > Chlorination
Comments:	if not clear please look at the email attached to this submission

Chlorination charges.

SDC charge $4 per unit for chlorinating our water including stockwater. (See enclosed letter Greg Bell July 10 2019)

Over the past 5 months we have been charged for the costs of chlorinating 1050 units of water that were never delivered and never chlorinated.

THIS CANNOT BE LEGAL.

I ask Council to change the system of charging for chlorination by removing the $4 per unit charge and increasing the fixed charge to $10 per ratepayer and refund the past overcharges le we have been paying $54 per year instead of the promised $10.

This would bring the result ba<,k in line with what was promised in the last consultation document.

I also ask that all restricted supplies in Selwyn be changed to metered supplies in line with the majority of ratepayers.

I note that our scheme is not on your list of schemes to apply for an exemption from chlorination . Our scheme is one of the largest schemes in Selwyn and one of the best performing.

Staff have told lies about the condition of our scheme for years.

A few years ago a new risk was added to our criteria , this being that "Wells less than 30m deep cannot qualify for chlorination exemptions."

Murray Washington has stated that by deepening the Hartleys road scheme to over 30 m there was no guarantee that the quality of water would be any better,.

It is therefore not a scientific fact that wells over 30m deep are safe.

	I request that Council either remover the depth risk from our risk analysis or get on with it and deepen our well to over 30m We have one of the shallowest wells in Selwyn.
Staff Recommendation	The submitters comments are acknowledged. As part of the 2016/17 Annual Plan consultation on the move to a District wide water supply rate, it was shown that the rate for Malvern Hills properties on 2 units reduced by nearly 30%. Restricted water supplies such as the Hartleys scheme, are billed based on the cost to operate the scheme shared across the number of units allocated for the scheme. Each property pays for the right to take their 'allocation' of water. Charging is not done based on the volume supplied as with on demand schemes. This allows the total consented annual volume to be managed within the consent limits and property owners to pay for the number of units they need access to. It would not be possible to move to a user pays restricted scheme and effectively manage the number of units allocated to each property. To change to a fully on demand user pays scheme significant infrastructure upgrades would be required including pumping and pipe network. The risk analysis mentioned by the submitter is no longer used to determine whether chlorination is required. Under the Drinking Water Quality Assurance Rules there is a requirement to add a small dose of chlorine to the piped network after treatment. To be able to move to intermittent chlorination (for eligible schemes) an exemption from Taumata Arowai is required. Exemption will only be granted by the regulator if infrastructure and systems can lower risk sufficiently. The length of reticulation on private property means the Hartleys scheme would be very unlikely to obtain a chlorine exemption. Deepening the well would not change this.

In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** I am against the building of this facility as I do not know what a Whata Rau is. I feel very discriminated against and insulted that I am not given an explanation as to the usage of this building. If the Council deem is necessary to give a building a Maori name then they should also include an english title to then be an all inclusive entity.
Staff Recommendation	The submission is acknowledged. Selwyn District Council considers that, when public buildings incorporate Maori names and cultural design elements, they are not merely symbolic gestures. Instead, they represent a tangible effort to honour the Treaty's obligations and foster a sense of belonging for all New Zealanders.
Point Number	1210.3

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1210.8
Category	Questionnaire > Matters For Community Guidance > Digital Solutions

Comments:	We don't need more staff working on computers. Use that money to fund general maintenance in the district.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1210.9
Category	Activity > Strategic Investment Strategy
Comments:	Having read the consultation document I can find no reason to spend large amounts of ratepayers money on an Economic Development Strategy. This sounds very 'pie in the sky' and those funds should be used for the core expenditure of the district.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1210.10
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	The Council should take another look at developments that have a number of large lifestyle blocks. If these areas were now rezoned to make more intensive housing available it would prevent the ever increasing wastage of fertile land being used for housing, for example the developments on Telegraph and Creyke Roads in Darfield.
Staff Recommendation	The National Policy Statement on Highly Productive Land provides clear direction and parameters for council in considering future housing growth in Selwyn. Rezoning considerations do not occur through the Long Term Plan but rather through the District Plan Review process.
Point Number	1210.11
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	I wrote to all the District Councils two or three years ago about the research findings in Australia of the damage that housing with black

	roofs has on the atmosphere. The night time air temperature can be up to 10 degrees warmer causing not only health problems but the use of more air conditioning (which not only use more electricity, but puts out more heat into the atmosphere). I suggested the Council should ban the use of black roofs in all new subdivisions as has been done in Los Angeles 12 years ago and in the last year or two in new suburbs in outer west Sydney. Selwyn promotes itself as the fastest growing and by inference one of the most desirable places to live but we allow black roofs, black houses, black fences, black asphalt - all generating heat - and very few shelter trees in all the new subdivisions. This ruling would cost NO extra money and would be much healthier for our citiziens. It appears none of the Councillors saw fit to even research the Link supplied. We are not looking after our citizens.
Staff Recommendation	While we cannot require certain roofing materials through the Resource Management or Building Act consenting process, council can explore sustainable solutions for residents through its Sustainability Plan.
Point Number	1210.12
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	I would like to see the Council sell the farm it bought 23 to 24 years ago, for sewage, on the corner of State Highway and Creyke Road. The funds could be used to fund the new two court facility in Darfield. No doubt the development of part of a farm bought in the Rolleston area will benefit their local area then this would be a great way to help the younger generation of Malvern.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and holds a view that Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. Submission noted by relevant team.

Point Number	1210.13
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	I assume Council has representatives on the Board of Corde and presumably the ratepayers should expect a healthy dividend from this enterprise. I suggest that they should therefore question why every vehicle that is seen driving around the area, and there are many, has only one person travelling in that vehicle. Often several vehicles are seen parked at one location. This is extravagant in the extreme. Surely if any one particular staffer is visiting a particular site it would take not time to ascertain from the other departments if anyone else is also off to that job as well. Finally, do not include projects in the LTP that have no hope of being completed in that timeframe. Do not do endless Feasability Studies (which cos Millions) when you know that the project is not likely to start within the next five years. RATEPAYERS ARE STRUGGLING - CUT YOUR CLOTH. NO EXTRA STAFF.
Staff Recommendation	That the submission is acknowledged by Council.

Category	Activity > Chlorination
Comments:	*Please continue to investigate un chlorinating the town water supplies*
Staff Recommendation	The submitters preference for Council to continue considering removing chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1212.8
Category	Activity > Lincoln Town Centre Upgrades
Comments:	*I support the Lincoln Town Plan upgrades*
Staff Recommendation	Submission is acknowledged by Council.

Submitter Number:	1213	**Submitter:**	Details Withheld
Point Number	1213.1		

Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** A good public transport network is definitly required going forwards but for it to be useful and effective it needs to pick up and drop off near to peoples homes.With the current and proposed urban sprawl that is about to happen in Lincoln it is very doubtful that will be able to happen. If you put a park and ride in at Lincoln and also the ones in Rolleston you are encouraging many cars to do repeated short journeys which is incredibly bad for the lifespan of the car engines, the battery and air pollution. Ideally public transport should be in corridors of medium density housing where people live who are most likely to use it. SDC could change the medium density zoning to apply more specifically to town centre locations where it should be medium density under the new government changes, but the Mayor has already stated that it would not be a preference as it would be 'too hard.' On page 15 of the LTP you talk about Climate Change and the effects beyond the lifespan of the plan, but is SDC really bothered about Climate Change and the environmental effects or is it just 'greenwashing' because it sounds good? You have a 'Climate Change' policy - where does this come into action in this plan?
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-

	funding. Environment Canterbury who provides Metro Bus Services, needs to undertake more regular service reviews in Selwyn to take account of urban growth. The proposed Park N Ride facilities are positioned and integrated into townships to support higher density and sustainable living outcomes sought by Council. They are perhaps better referred to as future 'transport hubs'. The 2020 Greater Christchurch PT Futures Business Case identified that further investment in improved PT services and infrastructure will have positive benefits. This will reduce the use of single occupant private vehicles that in that in turn will reduce emissions and congestion and provide people with an affordable transport option. This aligns with Greater Christchurch Spatial Plan and related Transport Plan that includes all modes of transport. The 'Future Selwyn' Strategy and area plan development will look at integrated land use and transport planning in more detail.
Point Number	1213.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is*

	earthquake prone and will likely need further significant upgrades to be used from 2035 onwards. **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** This is my preferred option but I do not know what the people of Leeston would want? Im sure everyone would say that they want facilties improved in their own area but the reality is that you have no money. Borrowing increase as on Page 57 from $155 million to $634 million seems a huge amount. It goes on to say that 'much of the borrowing will be funded by development contributions from land devlopers and lease income from Council commercial properties' - but I find that hard to believe, as developers have not yet funded very much at all, and supply minimal infrastructure in and around subdivisions which will eventually become the Councils problem to maintain and repair (costing you more) The rates increases that you are proposing are high and possibly managable at the moment for most but then you forcast the increases just stop - again I'm not a finance person but I find it hard to believe that rates will then just stop increasing - when there is so much debt owed?
Staff Recommendation	The submission is acknowledged.
Point Number	1213.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. 	Project cost: Years 1-10: $3.4m **Estimated impact on rates :** Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% * Our budgeted option **Comment:** I imagine that if I lived in Leeston I would prefer the full upgrade option but that is really a 'nice to have' not a 'need to have.' The population of Leeston has not exploded as Lincoln, Prebbleton and Rolleston have and so sadly some things are not going to be possible. It does however nee to be safe, hygienic, well lit and fit for purpose so the middle option will achieve this.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2
Point Number	1213.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:** Darfield has a relatively small population compared to Rolleston, Lincoln and Prebbleton. If Malvern is being developed further then the building developers involved should fund facilities. Im sure that this is not what people in darfield will want but with the

	excessive population growth that has been allowed in Lincoln and Prebbleton these areas should be a priority.
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	1213.8
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	On page 15 of the LTP you talk about Climate Change and the effects beyond the lifespan of the plan, but is SDC really bothered about Climate Change and the environmental effects or is it just 'greenwashing' because it sounds good? You have a 'Climate Change' policy - where does this come into action in this plan? $3 million to 'help catch up with road renewals and do emergency work for climate change and extreme weather events' seems extremely inadequate considering the state of the roads that need upgrading and the likelihood of extreme weather events.
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. The Council is also developing an Emissions Plan and Sustainability Plan to identify actions into the future.
Point Number	1213.9
Category	Activity > New Public Transport
Comments:	A good public transport network is definitly required going forwards but for it to be useful and effective it needs to pick up and drop off near to peoples homes.With the current and proposed urban sprawl that is about to happen in Lincoln it is very doubtful that will be able to happen. If you put a park and ride in at Lincoln and also the ones in Rolleston you are encouraging many cars to do repeated short journeys which is incredibly bad for the lifespan of the car engines, the battery and air pollution. Ideally public transport should be in corridors of medium density housing where people live who are most

	likely to use it. SDC could change the medium density zoning to apply more specifically to town centre locations where it should be medium density under the new government changes, but the Mayor has already stated that it would not be a preference as it would be 'too hard.'
Staff Recommendation	Environment Canterbury who provides Metro Bus Services, needs to undertake more regular service reviews in Selwyn to take account of urban growth. The proposed Park N Ride facilities are positioned and integrated into townships to support higher density and sustainable living outcomes sought by Council. They are perhaps better referred to as future 'transport hubs'. The 2020 Greater Christchurch PT Futures Business Case identified that further investment in improved PT services and infrastructure will have positive benefits. Point Number	1213.10
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	It is very sad that small community facilities like this are being closed. Darfiled has had a pool upgrade and is not that far away - however 1 million in the scheme of this budget is not huge and surely the local community would be happy to manage the pool. It is such a good way of developing community and also helping children to learn to swim and be safe around water. The Council have gone down a route of taking responsibility for small community facilities such as parks, small halls, and small pools away from the community - and now it is costing them too much - it would be better to ecourage, train and facilitate the community to take responsibility for their own facilities - they will care and appreciate it more than having a central contractor who does not care.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility

	and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	1213.12
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	The people that you employ should be adequately skilled and trained to work with digital technologies. This should come as part of the standard employment of the correctly qualified people within the Council.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP. This will encapsulate people, process, systems and data.
Point Number	1213.13
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	I would support any clarification of engagement and financial policies however there is not enough detail here to comment. Having experienced the treatment of rate payers and 'ordinary people' through the PC69 'process' - it was appalling, not transparent and clearly designed to trick and deceive the public, so any improvements would be welcomed - but again these need to be specified. So I would recommend withdrawing both of these policies

	from the LTP until you can provide clearer consultation with the community.
Staff Recommendation	Council acknowledges the submission and notes the concern with the level of information provided. Improvements regarding the presentation and provision noninformation will be considered for future consultations.
Point Number	1213.14
Category	Activity > Strengthened Partnerships
Comments:	Strategic Relationships - strengthened partnership with mana whenua. I do support this and it is very important. I would say that listening to the Council meetings it is interesting how much preference and importance is given to the mana whenua representative as opposed to the elected representatives. I can see that going forward this could cause an issue and people to ask questions.
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognises the importance of supporting Iwi participation. Council is committed to ensuring inclusivity and that ensuring everyone has an opportunity to participate. Council considers this can lead to better outcomes for the whole community. For example, Iwi knowledge about local environments can be invaluable in planning and resource management projects. Council is trying to ensure Iwi contribution counts by including Iwi in decision making on its committees. The current arrangement at Council meetings allows Iwi participation in the discussion, but at a Council meeting the Iwi representation does not have voting rights.
Point Number	1213.15
Category	Activity > Chlorination
Comments:	Providing Safe Drinking Water:- This is a huge issue and you have put it in one section at the back of the document where you are 'telling' not 'asking.' It will be 82.6 million to remove the chlorine (+$231 per year on rates) This is after saying that 96% of respondants listed it as a key priority. You introduced chlorine under the pretence that it was 'temporary.' In fact some people are still waiting and thinking that it will be removed - however it is clear from your document and also listening to your council meetings that there is not going to be and never has been any intent to remove the chlorine. Whether chlorination is right or wrong I do not know - but to put the decsion making through such a shoddy process will again

	increase distrust in the Council. It was also disappointing to listen to Councillors referring to rate payers who are passionately against chlorination as annoying and inferring that they are just crazy and not worth listening to? I feel strongly it should have been put back to the public to say if they wanted to pay the extra to have the chlorine removed or for it to stay and the health and safety risks explained.
Staff Recommendation	The submitters preference for community consultation on the removal of chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. This matter was included in the consultation document and Council will consider all submissions received. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1213.16
Category	Activity > Low Nitrate Water Sources
Comments:	Of even bigger concern to me personally - and should be to everyone is the paragraph about 'Considering Low Nitrate Water Sources.' Again hidden in a small paragraph and 'telling' not 'asking' This is such an important public health issue it should be being put out there loudly and urgently. Of course straight away you blame ECan, but this has to be a priority for SDC, ECan and the Government. You say that 5 water sources are already at half the maximum nitrate level allowed currently in NZ for drinking water. NZ use 11.3 mg/l nitrate - nitrogen which is a level that was set in the 1950's to avoid blue baby syndrome. This is out of date and needs urgent action by you. The NZ College of Public Health, Medicine, and Public Health Association states that 100 cases of bowel cancer and 40 deaths per year are related to high nitrate levels along with links to miscarriages/ premature births, thyroid, colorectal, non hodgkins lymphoma, stomach, bladder, ovarian and breast cancers. The New Zealand College of Midwives advises pregnant women should avoid drinking water over 5mg/l nitrate (increases pre term birth chance by 47% which can result in learning difficulties, poor health outcomes for life and costs of approx $97,000 for that child in health care.) 5 areas are stated as having half the current limit - so presumably around 5.6mg/l nitrate. One of these areas is Darfield and Kirwee from- if I lived there I would not drink the water. To be safe it sould be under 1mg/L If we cannot drink our local water it increases plastic pollution exponentially, as well as transportation,

	storage etc. Areas effected most are usually dairy areas such as we have - nitrate has no taste, no colour, no odour. Synthetic nitrogen fertiliser (added to accelerate grass growth) and intensive dairying are the main issues, but here we also have nitrate leaching from the refuse depot bringing the issue closer than ever to Rolleston. SDC, Ecan and the Govt need to lower the number of cows in Canterbury now. They need to phase out synthetic nitrogen fertiliser. The areas around the refuse station need action. So $5.3 million to 'start looking at this situation over 10 years is clearly not enough, not soon enough and should be given priority over anything else. Without healthy water you will not have a healthy population. We could maybe stop what is happening and save our water table from contamination before it is too late for all areas (although it is most likely too late as this nitrate could be in the ground 20 -30 years before reaching the water table.). I propose that any funds required for this are moved across now and action is taken urgently, this could avoid the future need to bring water in from further away - presumably the alps so that it is not nitrate contaminated. It would be great to see SDC be brave and take the lead on this rather than blaming everyone else and just taking the consequences of their inaction.
Staff Recommendation	The submitters support for investigation of low nitrate water sources is acknowledged. Further investigations into the centralised sources of low nitrate water is budgeted in the LTP in years 1 to 4. Staff recommendation is to proceed with these investigations as budgeted in the LTP.
Point Number	1213.17
Category	Activity > Potential Requirements To Fluoridate
Comments:	No flouridation to the water. Looking at the state of childrens teeth here and the costs around adult dental care flouridation of the water seems like an obvious choice to me. As there is no budget and no intention, but chlorination is continuing, it would be interesting to know the costs of adding fluoridation to the water supply so that people could make an informed choice as maybe people would opt to have it?
Staff Recommendation	The submitters request for consultation on fluoridation is acknowledged. Fluoridation has been estimated to cost $7.9m (uninflated) to implement. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.
Point Number	1213.18

Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	Selwyn Huts - even though this decision has been made I feel they should be kept as part of Selwyns history and heritage. Batch settlements like this one at Selwyn Huts are unique and iconic to New Zealand and if SDC were serious about its Heritage Strategy they would actually start doing things that illustrate this. In the recent District plan there were no heritage protection actions taken. In fact the opposite was documented. It is amazing to uphold the tangata whenua history but the reality is that places such as Lincoln have a strong and still important colonial history and this should be maintained as well. Lincoln has its roots as an agricultural town and this should be celebrated. Maintaining our valuable highly productive land should have been and should be in the future a high priority as it cannot be replaced once lost. We need to maintain the food security of the community for the future - especially in the face of cimate change.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.
Point Number	1213.19
Category	Activity > New Public Transport Services
Comments:	Exploring new public transport services at a cost of $75,000 with Ecan is a good idea.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1213.20
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	Roading maintenance and renewals $82.3 million - this is a huge amount and has not been broken down in the document for people to look at. Having found the break down it does not include anything from what I can see for Springs Road, Birches Road and most of Ellesmere Road. These roads are extremely worn, too narrow, have

	dangerous stop junctions coming onto them and are not fit for purpose with the current amount of traffic - never mind the future growth of Lincoln. Every week almost there are accidents. Just yesterday there was a near fatal - if not fatal accident at the junction of Ellesmere and Edward Street. Yes people need to drive better, but it is the Councils responsibility (not Waka Kotahi) to make our local roads safe. Stop junctions need flashing light up signs. Road markings need updating. Roads need to be wider and resurfaced. Everyone I have spoken to would be happy for money to moved across to address these issues and these issues are urgent before more people are killed. This is a core Council responsibility and a 'must have' not a 'nice to have.'
Staff Recommendation	Submission is acknowledged by Council. Staff note the increased need for improving main roads and managing the speeds and signs for safety. Council has a program implementing safety improvements at intersections, which includes enhanced road marking and larger signs. Other options are being considered.
Point Number	1213.21
Category	Activity > Lincoln Town Centre Upgrades
Comments:	Lincoln Town Centre Upgrades - page 49 'planning to 'progressively' up grade Gerald Street from Springs Road intersection to James Street. It was adopted in 2016 'at the time to meet the needs of a growing population.' Original cost was $21.4 million and is now $46 million - how much will it be by the time it actually gets completed? Has this work taken into account of the fact that Lincoln is about to again drastically increase and virtually double in size? The town plan as it stands would be great - and better than nothing. A better option would be 4 way traffic lights at the end of William Street as this would allow traffic from both William Street and Robert Street to turn onto Gerald Street, as well as allowing pedestrians to cross safely in all directions. The cycle path cost could be reduced by having a two way cycle path on one side rather than a path on both sides. The diagonal parks cause chaos and should be removed as cars reversing out along with cars coming out of the side roads and big 4 wheel drive cars blocking the views. Traffic needs to urgently be slowed down as the current pedestrian crossings will result in a fatality soon. Children and young people are not safe - cars do not slow down or stop. Kids on scooters and bikes appear on the crossings without giving drivers a chance to see them. Every week there are near misses and many people have expressed their concern about the lack of safety for children going to school.
Staff Recommendation	The outcomes promoted by the 2016 Lincoln Town Centre Plan are still relevant however the design upgrade plans for Gerald St will reflect current best practice. Inflation and construction cost

	escalations have had a large impact on bigger CAPEX transport projects since the last LTP in 2021. Traffic signals are included at West Belt. They are not included at William Street as the breaks in traffic created at West Belt will assist in providing crossing opportunities in the town center. The section of Gearld Street between the Liffey and West Belt will have slower speeds and improved facilities for pedestrians. A number of options are currently being investigated for the area alongside the shops including safe parking. A single dual lane cycleway on one side of the road has technical issues through the planned traffic signals at crossroads and will not serve the opposite side of the street for access.
Point Number	1213.22
Category	Activity > Walking and cycling improvements
Comments:	Te Waihora Lakeside Trail 5 Million and Waikirikiri Alpine to Sea Trail Stage 1- 10 million and stage 2 - 12 million! these costs are not including inflation - this is the cost now so presumably by the time they are carried out they could be as much as double that as has happened with the Lincoln Town Centre? This is $27 million of work that shouldn't be done. It does mention getting other sources of funding and this should be done. It is not for rate payers to be paying for such projects in the current climate and it should have been more clearly talked about in the LTP as most will not be aware of this cost - agin not transparent and will increase distrust of the Council and its processes.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1213.23
Category	Activity > Compulsary organics collection
Comments:	Compulsory Organics - kerbside collection is briliant. Kerbside recycling of all types of plastic would be great to do as well, when it is possible to do so.
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. We're pleased you are supportive of the change. Materials accepted in the kerbside recycling are limited by what the recycling processing plant can sort, as well as the recycling commodity markets. There is currently almost no demand for post-consumer plastics numbered 3, 4, 6 and

	7. Without an outlet for these materials, they cannot currently be collected for recycling. Fortunately, many companies seem to be moving away from using these plastic grades in their packaging.
Point Number	1213.24
Category	Activity > Infrastructure DC
Comments:	Please do increase development contributions substantially - this is vital and should have been done before now.
Staff Recommendation	The submission is acknowledged, and staff note the support for the introduction of the proposed development contribution for community infrastructure. A thorough and robust process is undertaken to calculate the development contribution amount that can be fairly and reasonably applied to the growth community for a project. The calculation is made in accordance with the Council's Development Contribution Policy and the legislation that underpins the policy as well as guidelines on administering the policy.
Point Number	1213.25
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	Nowhere in your documents do you discuss 'tree cover.' this is vital for a healthy, liveable environment and has been sadly lacking in any SDC decisions as illustrated by Rolleston which is devoid of large trees and natural habitats for birds and other wildlife. Tree Cover protection should be included in all future plans urgently - including not removing existing trees and making developers add trees and green spaces to developments. Rolleston is a dismal desert of concrete and is lacking in all things 'environmental' - please do not let this happen to other Selwyn nighbourhoods.
Staff Recommendation	Staff support the submission as planning work is underway in terms of reviewing the Tree and Vegetation Policy to strengthen the approach to both retention of existing vegetation and establishment of additional vegetation. In addition to this the Blue-Green Network Plan that is being developed as part of the Future Selwyn work will also provide targets for future tree cover. In anticipation of this work and also as a measure to reduce the impacts of climate change

	(more planting reduces heat in urban areas) an urban greening programme has been included in the draft LTP. Staff recommend that work continues on the development of policies and plans that are focused on retaining and increasing vegetation cover in urban environments and that support is given to the Urban Greening Programme included in the draft LTP (total $775,400 over 10 years from 2024/25).
Point Number	1213.26
Category	Activity > Planning Further Community Facilities
Comments:	A new Prebbleton Community Facility is definitely needed now that the population has increased so much. A military museum at Burnham is a huge expense that will not be funded by entrance fees - this is the kind of project that is a 'nice to have' but definitely should not be looked at or funded by rate payers in the current climate. Community Reserve Boundary Rd 2024 - 2029 should be done with some urgency due to population growth. Kakaha Park Stage 2 2024 - 2026 is not urgent and could be delayed indefinitely as not currently required. The 'district park' Rolleston is not required and should be delayed until it can be paid for, it is a 'nice to have' not a 'need to have.'
Staff Recommendation	The submission is acknowledged. Plans for a new Prebbleton Community Centre are still included in the current Long-Term Plan.
Point Number	1213.28
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	The Council need to get back to basics. It is interesting to note that with the proposed subdivision in Lincoln we were told by the Council

	that 'if you build the houses the businesses and infrastructure will come' - but that has been proven to be wrong and now you want to spend more money to put it right? Interesting? I have spoke to many people who feel that the rate of development should be slowed down to allow everything to catch up. Its all very well selling Selwyn as a great place to live but not much use if you are ruining it for the people that live here. There is actually no more space in our education facilities especially at senior school level. The water quality is at breaking point. The roads are at breaking point. We are wrecking the environment faster than it can ever be expected to cope and that doesnt really fulfil a legacy of leaving a better place for the future for our mokopuna does it?
Staff Recommendation	Population projections are not predictions, rather they indicate probable outcomes based on assumptions. A key assumption for the Long Term Plan is the population projections. As each town grows, there is a need to understand its future, as well as upgrade its infrastructure. This is generally done through Strategic and Spatial Plans. However, as growth continues to exceed the projections, more projects are needed quicker to meet this growth. This can lead to infrastructure upgrades being out of sync with growth. Council works with government agencies to help improve infrastructure provisions (e.g. education).

Submitter Number:	1214	**Submitter:**	Nicholas Kirk for Waihora Ellesmere Trust
Organisation:	Waihora Ellesmere Trust		
Point Number	1214.2		
Category	Activity > Other Categories identified by Staff > Bio-diversity		
Comments:	The Waihora Ellesmere Trust (WET) is a volunteer-led community-driven organisation committed to enhancing the health and biodiversity of Te Waihora / Lake Ellesmere and its surrounding catchment area. Established in 2003, our enduring vision is to cultivate a balanced environment that supports diverse uses while		

preserving the area's unique flora, fauna, and cultural heritage. To achieve this, WET engages in various conservation activities aimed at nurturing the lake's ecosystem, promo ng cultural and historical awareness, and providing opportunities for Selwyn District residents to actively engage with and learn about the lake. Supported by the Selwyn District Council's Strategic Community Partnership Fund, WET has been able to serve as a strategic partner in advancing the Council's objectives of enhancing environmental, social, and cultural well-being. Through this partnership, WET has undertaken several impactiul initiatives, including: · Employing a dedicated project manager to spearhead the development of the Te Waihora Lakeside Trail, aligning with the Council's proposal for Rural Walking and Cycling Improvements. Since July 2023 the WET Project Manager has worked in collaboration with Selwyn District Council consultants to populate and accelerate the Te Waihora Lakeside Trail feasibility assessment. · Hosting biennial Living Lake Symposia, offering residents opportunities to learn about ecological restoration efforts, lake chemistry (pollutiuon levels), and biodiversity updates. · Contributing to annual bird counts in Te Waihora to gather crucial data for conservation decision-making, particularly focusing on vulnerable species like the Australasian Bi ern. · Collaborating on trapping initiatives in Yarrs Flat, promo ng biodiversity conservation in partnership with the Selwyn District Council , the Department of Conservation, and other stakeholders. · Organising seminars on various catchment-related topics to facilitate community engagement and education, both at public venues and during our Annual General Meetings. · Actively participating in forums like Whakakohanga Kōrero, aimed at fostering collaboration among stakeholders interested in Te Waihora Lake Ellesmere's well-being. WET’s work programme also aligns closely with goals articulated in Selwyn District Council ’s biodiversity strategy. Our ac vi es – such as the annual bird count - help identify the state of indigenous biodiversity within the region, and we help support actions by landowners and the community, such as trapping, which support indigenous biodiversity and enhance public awareness of our natural environment. WET's objectives resonate with the desires of Selwyn residents for a more sustainable community, preserving our environment, fostering connectivity, protecting water resources, and providing access to green spaces. We urge the Selwyn District Council to sustain current funding for WET through the Strategic Community Partnership Fund to enable us to sustain our vital ac vi es. If possible, we request an increase in funding given inflationary pressures. We argue this money is a sensible investment as funding WET to conduct our ac vi es will be cheaper than contracting consultants or professional organisations. We support the Long Term Plan consulta on document’s proposal regarding “Rural Walking and Cycling Improvements”; in particular, the aim to construct a new trail around Te Waihora Lake Ellesmere connecting to the Li le River Rail Trail. Funding provided to WET through the Strategic Community Partnership Fund will facilitate the ongoing

	employment of a project manager – who we have spent $60,000 to date to employ - to advance the construction of the Te Waihora Lakeside Trail, seek capital funding opportunities, and liaise with key partners. This investment will not only enrich our community's well-being but also contribute to the realization of our shared vision for a vibrant and sustainable Selwyn District. Dr Nicholas Kirk – Chair Waihora Ellesmere Trust
Staff Recommendation	Council staff recognize the significant effort that WET has made towards Te Waihora over the last two decades. This work includes leading community engagement efforts concerning a variety of significant projects. WET is now working closely with Council staff and consultants on the Te Waihora Trail project and as such the WET project manager is helping to provide advice, lead design discussions, and engage with the community (including with associated landowners). This forms an important contribution to this important recreation project which will add significantly to our district.

Submitter Number:	1215	**Submitter:**	Samantha Shilton
Point Number	1215.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06		

	Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding
Point Number	1215.2
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes two indoor courts. **Project cost:** Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million) **Estimated impact on rates (per year):** $19.91 **Funding:** Rates: 57% Development contributions: 43% * **Comment:**

Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.
Point Number	1215.4
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	it would be a shame for locals to close but the $1 million to keep it open could instead go towards Darfield pool and have it running all year, it would have been great to close in darfield pool and or have an extended season and extended lessons and fitness classes
Staff Recommendation	It is acknowledged that the submitter has selected to close the Sheffield Memorial Pool.
Point Number	1215.5
Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the closure of Sheffield Community Pool? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.

Submitter Number:	1216	**Submitter:**	Details Withheld
Point Number	1216.1		

Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** This needs to be delayed until funding options are more clear. Given the cuts in central government spending i expect there would be no contribution from the NZTA. With the Lincoln park n ride facility why does the council not include this in the scope of works for the Lincoln Gerald St upgrade, this could save the ratepayer thousands by incorporating tenders, consents and contracting costs.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. The Lincoln Park N Ride is being considered in conjunction with the Meijer Drive Extension to coordinate with.
Point Number	1216.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will

	be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** Leeston are well overdue fit for purpose community facilities, however stick with a standard desgin that will not see costs balloon overtime.
Staff Recommendation	The submission is acknowledged.
Point Number	1216.3

Point Number	1216.8
Category	Activity > Lincoln Town Centre Upgrades
Comments:	We have lived in Lincoln for the last 26 years. The Population was under 2500. Since that time the population has grown by over 10k. Over these 26 years the council has neglected the needs of the Lincoln community. In 26 years I can recall only two significant projects, that being the community centre and Library. The lack of representation for Lincoln on council is apparent. We see no advocacy from council on community matters, for example lack of medical facilities, you can not become enrolled to any medical practice within Lincoln. No Ambulance service, for a town over 10k population, this is alarming. (you cannot expect the Fire Brigade to cover this role). We have seen businesses up and leave to

	Rolleston. We have seen the policing reduce from 3 Officers to 1 with Lincoln now targeted because of this. All this with a growing population. We have seen no support from council for the High School, given its out of date buildings and cramp conditions. Very quick to get on the Rolleston bandwagon however. It would be with interest to know given the number of new subdivisions in Lincoln where do the development contributions go? To fund community facilities in Rolleston? A new aquatics facility was built in Rolleston and opened with their population at about 9500 people. Using the same methodology why is there not talk about a facility for Lincoln. The council had a perfect opportunity to collaborate with the University as they went through their redevelopment. Again, I expect it comes down to lack of representation. I am all about growth, however i do not believe the council is able to keep up with it, especially with the growth of two towns. Any improvements over the last 26 years have come from the developers, not from Council. Given what we have seen occur from the population growth from 2.5k to 10k I expect with the addition of another 1700+ homes we will again see minimum investment from Council. You cannot expect the Lincoln population to just utilise Rolleston facilities. This is potentially the cause of the congestion we seen in a very poorly planned Rolleston. Don't make the same mistake in Lincoln. The Gerald St redevelopment must go ahead without delay, however I belive this is now out of date. The plan needs to be reworked and take in to account the new 1700 homes and population growth that will come with the development. It should also include a central retail square area and the development of William St between the Events Centre and Gerald St. Based on data from Stats NZ, Lincoln is the 45th largest urban town by population in the country, with one of the highest percentage increases, however it lacks many community facilities that most smaller towns already have. It is about time the council loses its tunnel vison and governs for all of Selwyn.
Staff Recommendation	Submission is acknowledged by Council. The outcomes promoted by the 2016 Lincoln Town Centre Plan are still relevant however the design upgrade plans for Gerald St will reflect current best practice. A higher amenity area will be created between the Liffey and West belt will create more of town centre function. The Council will starting the upgrade of the Lincoln Town Centre and Gerald Street in stages starting in 2024 at the Liffey end and finishing at Springs Rd in 2030. This is estimated to cost $45M and includes cycle lanes, power undergrounding, 4 sets of traffic signals and the replacement of the failed carriageway . The extension of Meijer Dr to Boundary Road,

	along with the creation of adjoining reserves, is planned in 2025/26 budgeted at $3.5M. In conjunction with this in 2026/27 a $4M Park N Ride Facility to cater for improved public transport services planned by Environmenrt Canterbury will be constructed opposite the Lincoln Events Centre

The Council will starting the upgrade of the Lincoln Town Centre and Gerald Street in stages starting in 2024 at the Liffey end and finishing at Springs Rd in 2030. This is estimated to cost $45M and includes cycle lanes, power undergrounding, 4 sets of traffic signals and the replacement of the failed carriageway . The extension of Meijer Dr to Boundary Road, along with the creation of adjoining reserves, is planned in 2025/26 budgeted at $3.5M. In conjunction with this in 2026/27 a $4M Park N Ride Facility to cater for improved public transport services planned by Environmenrt Canterbury will be constructed opposite the Lincoln Events Centre
Point Number	1216.11
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	$9 Million better spent elsewhere given the state of some of our roads and infrastructure

Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	1216.12
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Again given the economic climate, money best spent eleswhere
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Submitter Number:	1217	**Submitter:**	Anita Wreford
Point Number	1217.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding.		

	Project cost: Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:** We need to get cars off our roads! Both to reduce congestion but also because we are in a climate emergency! With the continued development (and future massive development in Lincoln), we need to put the infrastructure in NOW.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council
Point Number	1217.3
Category	Activity > Lincoln Town Centre Upgrades
Comments:	We need the Lincoln Town Centre plan to be finally implemented! Lincoln is growing at a massive rate and the town and infrastructure are not keeping up with it. The roads are becoming very unsafe: Springs, Birches and most of Ellesmere Rd are not mentioned or due for any upgrades to make them safe enough for the amount of traffic that now travel on them. There are multiple fatal stop junctions that need improved signage and road markings. Gerald Street most definitely needs traffic lights and cycle ways to make it safe for kids to get to school. Future developments (and retail areas) should be designed with pedestrians first and foremost. Currently they are all just a massive ugly car park with shops around the outside, no street frontage (apart from the area by New World, which does look much nicer), and just getting across the busy carparks with kids etc can be very challenging (eg Rosemerryn at busy times). The Council should be promoting walking and cycling and getting people out of their cars!! It would save money on road maintenance as well.
Staff Recommendation	The widening and safety upgrade of Ellesmere Road is included early in the draft LTP. The Council will starting the upgrade of the Lincoln Town Centre and Gerald Street in stages starting in 2024 at the Liffey end and finishing at Springs Rd in 2030. This is estimated

	to cost $45M and includes cycle lanes, power undergrounding, 4 sets of traffic signals and the replacement of the failed carriageway. The section of Gearld Street between the Liffey and West Belt will have slower speeds and improved facilities for pedestrians. A number of options are currently being investigated for the area alongside the shops.

Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** roads infrastructure needs to be addressed first.		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP		
Point Number	1218.2		

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Point Number	1218.3

In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Carry out the landscape improvements to extend the playing fields; replace and upgrade the playground equipment, footpaths, toilet block, lighting and irrigation; and seal the carpark. **Project cost:** Years 1-10: $3.4m **Estimated impact on rates :** Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% * Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2
Point Number	1218.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account

	development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:** None of these optiins look far enough down the track. One or two courts is not going to be sufficient. Would not recommend building unless the facility can cater for a wider area.
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	1218.5
Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1218.8
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	From the quick description given in the provided document, it is hard for me to understand what this means. How does it affects our rates in the terms of how much time and money are going in to these

	changes. In the end, we pay enough rates and we don't want ro be paying more. I have not had the time to investigate this, so will refrain from commenting further.
Staff Recommendation	Council acknowledges the submission and notes the concern with the level of information provided. Improvements regarding the presentation and provision noninformation will be considered for future consultations.
Point Number	1218.9
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	More parking facilities around foster park is required. Why not pipe the water run and cover, and install angle parking?? The parking does not cater for the amount of people that attend this area on weekends and when events are held.
Staff Recommendation	Staff support the submission to provide additional parking around Foster Park. A budget has been provided in the draft LTP in 2025/26 ($1.5 million) to provide more parking at Foster Park including on the Goulds Road frontage. Land has also been acquired on Broadlands Drive for a future park and ride and car park space. Staff recommend that the budget ($1.5 million in 2025/26) for carpark and roadway construction at Foster Park currently included in the draft LTP is supported.
Point Number	1218.11
Category	Activity > Planning Further Community Facilities
Comments:	The selwyn area has a huge Arts community. Why not look at a facility that will cater for this. It could be a mutli use facility if design correctly. The old community centre would be a great central location, that has car parking to suit.
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such

	as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.
Point Number	1218.12
Category	Activity > Council's Office Improvements
Comments:	Council building upgrades is not a priority. There are other more urgent items that need to be addressed.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	1218.14
Category	Activity > New Public Transport
Comments:	Why are we not looking at a train service from Rolleston to the city? This could be a huge load of roads whhich could then reduce the cost of roading upkeep. It would be used by all walks of life, workers, students, elderly etc.
Staff Recommendation	The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case determined that MRT was viable in the city, but not in the surrounding Districts. It considered a passenger rail service using the existing rail network could have merits in the future if combined with a wider regional passenger rail service. But with small projected patronage, large investment needed for rolling stock and infrastructure (on a rail network managed by others), and that there is no CBD connection makes this currently not worthwhile. The MRT Business Case process has yet to determine what mode MRT services will take i.e. rail or bus.
Point Number	1218.17
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	More parking facilities around foster park is required. Why not pipe the water run and cover, and install angle parking?? The parking does not cater for the amount of people that attend this area on weekends and when events are held.

Staff Recommendation	Submission is acknowledged by Council. A park n ride is programmed for construction on Broadland St in 2024. Staff note the need for additional parking near the park.
Point Number	1218.18
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	If upgraded it could potentially take the pressure off the current pools. Why do children in more rural areas have to miss out on these opportunities when their families contribute to rates!
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	1218.19
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Spend the time and money on the actual community. It would make more of an impact.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:** I think a new community health centre including doctor's facility would be more important considering the waiting lists in place. The sports facility can wait it should not be a priority especially with the projected growth in the area..
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	1219.5

Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1219.8
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	The goverment is presently cutting back after the over spending and wastage of the last goverment the council should follow suit. We should not be looking at developing recreational facilities when the health service is in a poor state , we need to build health centres , get the roads repaired and keep good infrastructure. the water systems need repair work . All the latter seem to be undertaken often by contractors that overcharge and make poor quality repairs ,many people sent to clip the same ticket at roading jobs which often and is totally unnecessary at councils exspense.
Staff Recommendation	Submission is acknowledged by Council. The council continues to work with the government to advocate for more services, including health and education. The Long Term Plan outlines what council intends to deliver and when to respond to the growing population.
Point Number	1219.9
Category	Activity > Council's Office Improvements
Comments:	In recession the council should lead by example consolidation instead of expenditure and this should be paramount.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.

Point Number	1219.11
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	I feel the community facilities seem to be focused on recreation and a huge exspense, at this time of reccesion of which there will be no quick fix , it is unfair to increase rates in this area. there plenty of recreational things people can do without large exspensive centres at this stage.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1219.12
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	because it is an integral part of Sheffield community it is used all the time in the season by many families, children use it in the school holidays, as does the local school. It is important children learn to swim. Not many families can afford to travel. It has always been managed and repaired by the community, there has been no major incidents, the council took over dont know when how or why but now lifeguards are needed= cost repairs = council = subcontracting= inflated cost. So yes it should remain community owned and maintained.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Comments:	I embrace new technology but feel AI may save money , but will take away existing jobs, also it is still needed to be used with caution as it is still in its infancy.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1219.14
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	Your admin staff are on $140/ an hour how can this be justifiable? When the national average is $32 there appears to be so much over pricing going on, across all contracted work, starting at the top with the council charges and hourly rates. Lead by example, I say again .
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1219.15
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	How big do we want our townships to be mini cities....? When will this development stop, are the considerations being made regards Schools, health, water and more commuters on the roads, or is this another rate gathering excercise and worry about it later Rural areas do not have the facility or capicity to expand and if you took time to survey and ask people who live in these areas you would be surprised that most agree
Staff Recommendation	Population projections are not predictions, rather they indicate probable outcomes based on assumptions.

	A key assumption for the Long Term Plan is the population projections. As each town grows, there is a need to understand its future, as well as upgrade its infrastructure. This is generally done through Strategic and Spatial Plans. As growth continues to exceed the projections, more projects are needed quicker to meet this growth.

Submitter Number:	1220	**Submitter:**	Adele Du Plessis
Point Number	1220.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. Comments:	The Selwyn Heritage & Historical Network are submitting to this Long Term Plan with regard to: The Selwyn Heritage Plan (2023-27) eHive Project and Administration of Licences Community History Fund, review, increase, annual commitment Heritage Funding $20 District Wide Rate. Our Submission is as attached with two Supporting Documents Selwyn Heritage and Historical Network Submission to Selwyn District Council Long Term Plan April/May 2024 The Selwyn Heritage and Historical Network, (SHHN) represents the Museums, Historical Societies, and Charitable Trust registered Historical organisations in the Selwyn District. They have been operating as a united district wide group, working together in its present form since 2019 for the preservation of our district's history and as a recognised lobby group to the Selwyn District Council. We would like to comment on: 1. The Selwyn Strategic Heritage Plan (2023-27) 2. eHive project and administration of licences and high-level management to maintain the Museums of Waikirikiri Selwyn community

3. Community History Fund, review, increase, annual commitment

4. Our previous district wide rate proposal for heritage funding

Selwyn Strategic Heritage Plan

Due to SHHN promotions through the last Long Term Plan process, the District Council moved to establish a Selwyn Strategic Heritage Plan.

Nicola Sutton was commissioned to research and advise Council in this regard. Her findings were well researched and complete and showed a definite requirement from council to support Heritage & History.

The Plan was agreed & confirmed to action on 14th December 2022.

The SHHN would like to thank the District Council & Staff for their commitment to assisting the district's passionate historians in their volunteering work to preserve and promote our history to the residents locally, and visitors regionally, and internationally.

We note that since the Plan's adoption, we have enjoyed increased interaction with the Heritage & Content staff & Library staff, having partnered with them and contributed to their work on various programmes such as Township Trails, Selwyn Stories and the development of the history cases at Te Ara Atea etc. Groups have seen an increase in enquiry from the public and schools & have worked on important projects between our groups. This has been a very positive experience for everyone .

We would have welcomed the Selwyn Strategic Heritage Plan being listed as a supporting document for the Long Term Plan process – heritage values should be included at the heart of planning & operations across this fast growing District.

eHive

The SHHN appreciated the development of the Community History Fund (an initial $50,000) which in the first year satisfied those that applied to it, mainly due to only a few applying, this however allowed for a very important developmen t, the purchase of 10 licenses for a 5 year period for eHive, allowing both cataloguing & management of, as well as online access to thousands of the district's significant historical images, articles & objects.

This in itself, is one of the best outcomes thus far due to the commitment of some dedicated volunteers in the various groups of the Network. This group is holding regular information and learning

meetings. Please remember these individuals travel for these meetings and spend hundreds of hours cataloguing at their own cost and volition to develop access to the Museums of Waikirikiri Selwyn collections for the betterment of the District.

The SHHN would like to see that the Selwyn District Council Library staff take over the administration of the licensing and high-level management for eHive, which will need attention in about 2 years' time. (2026)

Community History Fund

The Community History Fund was extended in the 2023 – 24 Annual Plan with the same cap of $50,000 - it was oversubscribed. The Fund has again been extended with the same $50,000 this year, once again being oversubscribed, a number of our groups have been disillusioned and are struggling with their operating costs and insurance commitments.

It is obvious that the level of funding to assist the heritage sector falls behind what is required to assist these volunteers. It was recognised in the adopted plan that there would need to be a review in the 2024 – 2034 Long Term Plan to assess the need and funding level to the Community History Fund, as stated this has shown to currently be undervalued.

District Wide Rate Proposal

In the last Long Term Plan the SHHN promoted the introduction of a $20 District Wide Rate, this would have seen sufficient funds available to borrow significantly to complete some 'big ticket projects' in the District, also leaving enough annually to fund what the current History Fund is designed for and repay the loan and the interest payments.

The SHHN would like to be informed officially of the probability or not of a district wide rate, and if not, the reasons for that.

The SHHN ask Council to significantly increase its commitment to funding the district's heritage & history groups, either with a District Wide Rate or in the interim by increasing the Community History Fund to a level that meets the current needs of the groups requiring its offerings.

The SHHN also ask Council to move forward with the Vision, Goals, and Strategic Outcomes and the Action Plan identified in the Selwyn Strategic Heritage Plan

	The Selwyn Heritage & Historical Network members encourage Councillors and Staff Members to visit our museums and societies from Arthurs Pass to Springston South Soldiers Memorial Hall and all in between, to understand the level of commitment that is shown by all of the volunteers in the district so they can put the value of this in perspective. Many of the groups require financial assistance apart from their operating costs. For and on behalf of the Selwyn Heritage & Historical Network, Grant Clausen
Staff Recommendation	The submitter's points are noted as follows and have been forwarded to the appropriate Council team for information: (1) Unspent eHive funds (approx. $1k) and the request that these be held for use by the Taumutu Runanga. (2) Request for continued funding for eHive beyond 2026 is noted and Council acknowledge the importance of eHive remaining available for the community organisations that have invested significant volunteer effort into entering records as this benefit the wider District. The Council would look favourably on an SHHN application for funding a further five year subscription at the relevant time and request that this matter be raised closer to the period with accurate costs for the subscriptions. (3) The suggestion that the Council's libraries team take over the high level management of eHive will be reviewed for consideration.

Comments:	Council Building Insurances - Council needs to appoint a staff member to take a pragmatic approach to the reviewing of the insurance levels of all of the Councils buildings. Currently Council seems content with accepting the review of its insurance provider to the point of being extremely over valued which comes with exorbitant premiums. as a case in point, Council leases a portion of the gravel reserve at 1618 Leeston Road to the Ellesmere Heritage Park Trust who are, as part of the lease, committed to insuring the buildings. One of the buildings insured is an open front 8 bay farm pole shed, this has been valued by Councils provider at

	$590,000. A full quotation from Goldpine, a reputable supply company, values a replacement of this shed at $80,000. Obviously, the premium on this shed is totally overvalued, I wonder how many buildings the Council insures and how many of these have been treated like this shed. As a ratepayer I need to see that Council is doing its best to properly utilise my rates. I suspect this situation has come about Council Staff accepting the annual or 3 yearly increases by the insurance provider believing they know their stuff. By having someone from Council reviewing the insurance levels on all of its buildings, would see possibly thousands of dollars saved.
Staff Recommendation	The submission is acknowledged by Council. Council has engaged a staff member responsible for insurance and is making improvements in this area.

Comments:	Selwyn Huts ongoing 1. Historical value The Mayor says in the Long Term Plan that "we're focussed on looking after what we already have" - how about you look after us! An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered		

by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council unanimously determined that ‘Hut licences and subsequent renewals are short term and ultimately for a finite period’ . At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts.

We need to submit requesting this historical significance be recognised and for the Selwyn Huts to be listed as an historical site on the District Plan and for the term for us being here to be extended to protect this history.

2. District wide rates

Everyone needs to submit on the LTP asking for us to be put on DWR for Water and Sewer.

The reasons being :

(a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequant upgrade, the requirement we were told for being put on DWR.

(b) We have already paid for the water upgrade.

(c) We should not be discriminated against and should be treated like everyone else in the district.

(d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We should also be added to the DWR for Sewer and Water like everyone else.

(e) Towards25 LTP Document stated:

"The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities."

This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table.

From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston.

(f) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community."

	(g) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Sekwyn Huts Future Occupancy Strategy" report dated 04/03/2024. (h) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners. (i) Additionally we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Category	Questionnaire > BD1 - Transport - Park and Ride		

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** It's a valuable step to take but too expensive right not without co-funding.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding
Point Number	1223.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to

	build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:** The library is essential to the community and needs enhanced and modern features to meet the needs of the community, especially as technology impacts every area of our lives. The cultural narrative is important and a real treasure to the community. It seems foolish to throw money at the current damaged building.
Staff Recommendation	The submission is acknowledged.

Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	"We're focused on looking after what we already have" 2024 GREAT the council needs to look after the commuinity of Upper Selwyn Huts. Two Main Reasons: the Huts Communities have historical value and given the fast pace of change in the Selwyn District so much hertitage is disappearing under new development. Upper Selwyn Huts has significant historic value to our district for - hosting the Future King George in 1927 - for being one of the earliest recreational reserves in Canterbury - for having the first community water and sewerage scheme in the district (1927 for the sewerage) - for being the home of one of the most famous fly fishing lures invented at Upper Selwyn Huts - for many other reasons associated with a history of sport and recreation in Selwyn Equity, Justice & Fairness In 2020 SDC Councillors voted to destroy the Upper Selwyn Huts Community against Council advice. Council advice was a new 30 year licence to occupy and district wide rating to fund required upgrades to water & sewerage infrastructure. The Mayor received a 'Please Explain' letter from MP Amy Adams of which I received a copy. In 2024 it appears the Mayor and Councillours are doubling down on their 2020 decision. This is not honourable, not legitimate behaviour from representatives of the voters. Having snit for being reprimanded for poor decision making is not a justification for doubling down on said poor decision making.

Upper Selwyn Huts should be treated the same as every other community in the Selwyn District, that being :
(a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequant upgrade, the requirement we were told for being put on DWR.
(b) We have already paid for the water upgrade.
(c) We should not be discriminated against and should be treated like everyone else in the district.
(d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We should also be added to the DWR for Sewer and Water like everyone else.
(e) Towards25 LTP Document stated:
"The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities."
This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table.
From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston.
(f) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community."
(g) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Sekwyn Huts Future Occupancy Strategy" report dated 04/03/2024.

	(h) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners. (i) Additionally we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.
Point Number	1225.9
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	this is a legitimate area for policy work but Im cautious of councillors trying to pick winners and investing council in private business concerns.
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and Council will consider their feedback in strategy action planning.

Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** It would be helpful to also to add more bus routes and increase frequency of bus timing. A Tram going to and from the CBD will make a huge difference to Rolleston Community
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Environment Canterbury is considering developing a business case for additional direct services for Rolleston and Lincoln in 2024-27. Additional buses were added recently to the 85 Rolleston direct to City service. Improving the frequency of other key Metro PT services such 5 (Rolleston) and 80 (Lincoln) is also being planned. The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case determined that MRT was viable in the city, but not in the surrounding Districts. It considered a wider passenger rail service using the existing rail network could have merits in the future if combined with a wider regional passenger rail service. But with small projected patronage, large investment needed for rolling stock and infrastructure (on a rail network managed by others), and that there is no CBD connection makes this currently not worthwhile.

Comments:	I have recently travelled to the Uk and marvelled at the gardens and historic places maintained by various organisations. These are well used by the public and are the envy of other nations. Closer to home the Taranaki Regonal Council has impressively saved and maintained Tūpare and otehr properties in the area, making Ndw Pluymouth a great place to visit as well as being superb for the locals. I have visited Braodfields Garden and see it is for sale, it is a National Treasure and I would like to ask that somehow we find a way to make the space available to the public in the future. Broadfield's has been offered to various community groups over the years and is an excellent venue, I am a member of the NZ Alpine Garden Society and we held our show and Garden Expo there. It was fabulous. The site is perfect for large numbers, a marquee and more. The highest grade given to just a few gardens by the NZ

	Gardens Trust is due to both its strong design and the astounding use of native plants. It would be a jewel in the crown for the region in terms of a public park, the public continue to be able to visit.
Staff Recommendation	Staff acknowledge the quality and significance of Broadfield Gardens and the opportunity it presents as a formal garden to complement the existing open spaces. However, the proposal does have some costs and risks that need to be weighed up alongside other options. This includes the cost of purchase (and how that could be funded), the cost of additional infrastructure to enable public use, the on-going cost of maintenance and potential revenue opportunities. There are also some limiting factors such as proximity, accessibility and connectivity. It is noted that Council is considering development of a formal garden at the District Park as part of stage 1 development: that would focus on 3 main types or components of formal gardens: botanic plantings (including natives, exotics and floras); sister city garden opportunities; community gardens. Although the acquisition of the garden presents an opportunity for Council to provide a special area of open space that is not replicated anywhere else in the District, staff are of the view that the proposal is difficult to support at this time given the costs and other factors mentioned above. Staff recommend that Council does not purchase Broadfield Garden at this point in time but considers what other mechanisms are available or support it could provide to retain the garden for the district's benefit.

Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

	Based on extensive Community leadership and representation for well over 40 years, I support Leeston Community Committee's LTP submission to build a well overdue multiuse Community Centre adjacent to Leeston Park to serve the local District. The facility should incorporate user spaces and associated storeage, fit for purpose kitchen and bar areas, flexible space catering for up to 300 people, emergency management requirements and be designed to allow for future expansion and needs of a growing district. As highlighted in our consultants' conceptual Leeston town plan, any future new or upgraded library/service centre facility should remain on an Anderson Square site. **These proposals are in line with views expressed at the Public Meeting on the options, held in Leeston on Febuary 8th of this year and attended by well over 200 people, which I convened.** **Future uses for such a Community facility could include weddings, funerals, church gatherings, trade promotions, sporting activities, cultural activity and functions, Cummunity group meetings and forums, service club activities, youth activities SDC functions and emergency management.**
Staff Recommendation	The submission is acknowledged.

	Estimated impact on rates : Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% * Our budgeted option **Comment:** The master-plan produced by SDC staff needs to have imput from residents , and to incorporate and/or include Whatu Rau implications.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2. The intention is for the proposed master plan to go out to the public for comment. Park user groups have been consulted on the draft Master Plan at the beginning of 2023. The Master Plan incorporates Whata Rau in the design.

Submitter Number:	1231	**Submitter:**	Chris Lee
Point Number	1231.8		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	1. My first question would be WHY is SDC so determined to close down an entire community. The land belongs to the Crown, and I understand, is only administered by SDC. At any point in time, has the Crown given any indication of wanting to dispose of the land? Does the Crown have a hidden agenda? What possible purpose would it serve the Crown to close an entire community? The Huts have been occupied since the 1890's, mainly for fishing. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act., and as such, should be protected.		

2. The reason given by SDC, and now bandied about in the press coverage is all about Climate change, in particular rising sea levels and the danger of flooding. If you were to research this supposition, you would see that Leeston and other surrounding areas would be flooded long before Upper Selwyn Huts. I would pose the question here, Are you threatening to evict these communities as well? In addition to this, if you have been so worried about rising sea-levels, why as a council, do you continue to grant building consents to these areas?

3. The stumbling block in all this seems to be the issue of water and sewerage. It is understood that

we will soon be on the same sewer system as Leeston who pay District Wide Rates. We were told that a requirement for being put on the DWR was to pay for our sewer ourselves and a subsequent upgrade, which we did. Why then are we being discriminated against as we already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage? Why have we not been added to the DWR for Sewer and Water?

Quoting 'Towards25 Long Term Planning Document '

"The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that "Selwyn should be seen as one integrated district", rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, "the cost to residents should also be consistent". In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities."

This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table.

	From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston. The council took charge of the reticulation system in 1989, I believe , and to my knowledge have done NO maintenance. It is high time that we were moved onto the District wide water/sewerage system and put an end to these arguments 4. Another question is why was consent given to build new properties, and to improve older existing properties, if the council had these current plans in mind? When we applied for consent to build 68 Anderson Ave, (Building Consent 060741) our architect and we were told at the time, that we were 'a test case', setting a standard for all future builds. We had to commission engineers and specialists to take into account sea levels, wind speeds, snow bearing loads of the roof etc. We complied with everything and were granted our CCC . What has changed in the meantime? 5. My final point is that post-quake, saw the move of people from Christchurch whose home had been destroyed, using their insurance payouts to fund the upgrades to their Hut, with a view to living out theirs lives in comfort. Not only are you wanting to evict people, but insulting them by telling them to destroy their homes at their own cost. With no compensation, how on Earth do you think that they are going to be able to even rent a place to live, or are you proposing to build homes to rehouse an entire community? As elected Councillors, you have a duty to represent your electorate. Showing your absolute lack of compassion in this case, I would put forward that you are not fit to govern. Yours sincerely Chris Lee
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend

	that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Carry out the landscape improvements to extend the playing fields; replace and upgrade the playground equipment, footpaths, toilet block, lighting and irrigation; and seal the carpark. **Project cost:** Years 1-10: $3.4m **Estimated impact on rates :** Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% * Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2

Point Number	1232.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes two indoor courts. **Project cost:** Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million) **Estimated impact on rates (per year):** $19.91 **Funding:** Rates: 57% Development contributions: 43% * **Comment:** put on school grounds for use off the rangatahi in the local schools as well as the community
Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.
Point Number	1232.5
Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the closure of Sheffield Community Pool? No **Comment:**
Staff Recommendation	Submission is acknowledged by Council.

Point Number	1232.9
Category	Activity > Other Categories identified by Staff > Other Matters
Comments:	i dont believe we should be getting rid of our community boards.
Staff Recommendation	Submission is acknowledged by Council. However, the Representation Review is subject to a separate process that does have a separate consultative process.
Point Number	1232.10
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	please ensure the Whitecliffs bridge repairs are done this has a huge effect on our community.
Staff Recommendation	Submission is acknowledged by Council. Repairs are programmed for the 24/25 year.
Point Number	1232.11
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	This is a memorial pool you dishonor those who you re meant to remember by closing down such a resource.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool, and highlighted the Memorial aspects of this facility as a key Council consideration for the future of this site.

Submitter Number:	1233	**Submitter:**	Details Withheld
Point Number	1233.1		

Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** Delay building Park and Ride due to the cost - which impacts rates increases.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP
Point Number	1233.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

	Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** Due to the high cost for this matter of $19.24M I do not support anything other than a repair option.
Staff Recommendation	The submission is acknowledged.
Point Number	1233.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Carry out the landscape improvements to extend the playing fields; replace and upgrade the playground equipment, footpaths, toilet block, lighting and irrigation; and seal the carpark. **Project cost:** Years 1-10: $3.4m **Estimated impact on rates :** Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% *

	Our budgeted option **Comment:** I support repair option only - due to the proposed rates increases.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2
Point Number	1233.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:** A Sports Facility at Darfield is not a necessity - when ratepayers are being asked to pay 16.%+ rates increases.
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	1233.5
Category	Questionnaire > Matters For Community Guidance
Comments:	

	Question: Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1233.8
Category	Activity > Lincoln Town Centre Upgrades
Comments:	Cut expenditure on Lincoln Township (upgrade and parking), Leeston township, and Darfield townships and prunce expenditure back to SDC core functions.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1233.9
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Proposed rates increases are far too high and should be vastly scaled back.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1233.11
Category	Activity > Strengthened Partnerships
Comments:	No to strengthening a partnership with mana whenua. I don't want any more money to be spent.

Staff Recommendation	The submission is acknowledged.
Point Number	1233.12
Category	Activity > Chlorination
Comments:	I object strongly to continued chlorination of all Selwyn (and NZ) want supplies and want this ceased. I want SDC to apply for Exemptions from Chlorination.
Staff Recommendation	The submitters preference to obtain chlorine exemptions is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1233.13
Category	Activity > Potential Requirements To Fluoridate
Comments:	I strongly object to all investigation about water centralisation. I strongly object to water centralisation. I strongly object to any fluoridation of any water supplies now or in the future. It is not SDC or Government's place to drug people via water supplies.
Staff Recommendation	The submitters preference to not investigate low nitrate sources of water is acknowledged. Staff recommendation is proceed with investigations as proposed in the LTP. The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health
Point Number	1233.13

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Reburish pool and resolve land stability and ownership issues.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1233.14
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	SDC is proposing to pay $9M over 10 years to support economic development with Selwyn businesses. I object to spending any of this money. This is not SDC core function.
Staff Recommendation	It is acknowledged that the submitter holds a view that the proposed allocation is excessive. Councils' contribution to economic development is alongside others who are expected to contribute significantly more overall. Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. Every cent of spend will be scrutinised and planned for to ensure outcomes and returns are maximised from the spend. Action plans will outline this in detail. The $9m is over a ten-year period, and not all the proposed spend is the same across the years with the first years having a lower allocated amount.
Point Number	1233.17
Category	Activity > Providing safe drinking water
Comments:	I strongly object to all investigation about water centralisation. I strongly object to water centralisation.
Staff Recommendation	The submitters preference to not investigate low nitrate sources of water is acknowledged. Staff recommendation is proceed with investigations as proposed in the LTP.
Point Number	1233.19

Category	Activity > New Public Transport Services
Comments:	With regard "Exploring new public transport services" : as SDC have staff who could participate in any study - I fail to see why $75,000 of ratepayer's money is being earmarked for a study. I say yes to a study only if using existing council staff at no cost to taxpayer.s I say no to a study if there is any cost to taxpayers.
Staff Recommendation	The funds are required to develop the business cases in conjunction with Environment Canterbury for the additional PT services and infrastructure needed for Selwyn
Point Number	1233.20
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	NZTA transport requirements: SDC is proposing to spend $19M which is a lot to spend on roading. I would only agree to spend some of this money, if SDC cuts expenditure on the many other proposed things inthe SDC Long Term Plan. If nothing is cut, then minimal should be spent on roading.
Staff Recommendation	Submission is acknowledged by Council. Neglecting road repairs and maintenance causes increased maintenance and repair costs in future years.
Point Number	1233.21
Category	Activity > Lincoln Town Centre Upgrades
Comments:	Lincoln Town Centre upgrades: I object strongly to the very high proposed cost. Doing any of these high cost upgrades will detract from the beauty of small town Lincoln.
Staff Recommendation	Submission is acknowledged by Council. Of the $46M for the upgrades that includes improving amenity aspects, $36M is related to core infrastructure works that are necessary anyway to address a failing carriageway and other near end of life assets like kerbing and footpaths. This also includes the signalization of the 4 key intersections necessary to cater for the expected traffic volumes and safety needs
Point Number	1233.22
Category	Activity > Walking and cycling improvements

Comments:	Rural Walking and Cycling Improvements: I object to any further expenditure (including feasbility studies) on improvements that ratepayers are expeced to foot the bill for.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1233.23
Category	Activity > Planning Further Community Facilities
Comments:	Planning further community facilities: I object to any studies on or implementing further community facilities - particularly Prebbleton Community, a new community facility in South-west Rollleston and re-development of Rolleston Community Centre. Ratepayers cannot and should not be forced by their Council to pay for more and more facilities.
Staff Recommendation	The submission is acknowledged.
Point Number	1233.25
Category	Activity > Strategic Investment Strategy
Comments:	Strategy Investment Strategy: SDC should stick to their core function, which does not include investment imho.
Staff Recommendation	That the submission is acknowledged by Council. Council's strategic investments are based around building a strategy that will meet the needs of our communities and our businesses to thrive in the medium to long-term period.
Point Number	1233.26
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	Water and Wastewater services: I object to all upgrades of water and wastewater services.
Staff Recommendation	The submitters comment against water and wastewater upgrades is acknowledged. Staff recommendation is to proceed with the 5 waters capital programme as proposed in the LTP.

Point Number	1233.27
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	Transportation: I strongly object to the widening of Ellesmere Road from Edward Street to Knights Stream. I live on Ellesmere Road, but have had no notification that this is going to occur or the cost to ratepayers.
Staff Recommendation	Staff do not support the submission because Widening of Ellesmere Road is necessary to handle increase in traffic between Lincoln and Christchurch.
Point Number	1233.30
Category	Activity > Other Categories identified by Staff > Rates
Comments:	RATES LEVELS AND LIMITS: I strongly oppose SDC planned rates increases of approx 16% for the first 4 years of the Long Term Plan, and a proposed 10% increase in Rates for the remaining 6 years. This is far too much. I wonder where SDC thinks ratepayers will find the money to pay their increased rates.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1233.36
Category	Activity > Other Categories identified by Staff > Rates
Comments:	I believe the Selwyn District Council proposed spending is out of control with its proposed spending, and rates increases. Rates are forecast to double in the next 10 years. I strongly oppose proposed Rates increases of this magnitude, and will struggle to pay it. Many people will simply not be able to afford to pay rates if this level of proposed spending and subsequent Rates increases goes ahead. SDC needs to get back to its core functions, and not spend ratepayer's money on a variety of things which are not compulsory. Examples are: proposed expenditure on parking in Lincoln costing millions of dollars, proposed expenditures in Lincoln township, Leeston township, and Darfield township - none of which Selwyn District Council should be doing.

Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and the negative impact that the increased cost of living is having on the public. The Council also acknowledges that this trend is not only limited to New Zealand, but is widely spread in many other countries worldwide. The Council endeavours to keep rates increases to a minimum and continue to proactively look for opportunities to minimise costs.
Point Number	1233.43
Category	Activity > Other Categories identified by Staff > Borrowing Levels
Comments:	BORROWING: SDC appears to be planning to borrow significantly more than it brings in PA in rates. I object to this.
Staff Recommendation	That the submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.
Point Number	1233.45
Category	Activity > Other Categories identified by Staff > Other Matters
Comments:	Staff training should occur for SDC staff who deal with members of the public when they phone or visit SDC. I say this as I have found SDC staff to be difficult to deal with, and imho trained to be so.
Staff Recommendation	Submission is acknowledged by Council and thank you for your feed back.

Submitter Number:	1234	**Submitter:**	Bruce Davey

Point Number	1234.2
Category	Activity > Providing safe drinking water
Comments:	As a landowner in Arthurs Pass I have a number of items related to that area, some of which have impact regionally and nationally. I request consideration of the following: - that a permanent water system upgrade to the Arthurs Pass water supply is implemented as promised - the current temporary solution is not appropriate for the long term
Staff Recommendation	The submitters support for water treatment upgrades in Arthurs Pass is acknowledged. During periods of high rainfall, the source water quality deteriorates significantly making treatment systems ineffective. Stored water is needed to continue to supply the village and meet mandatory Drinking Water Quality Assurance Rules. As part of the Long Term Plan the final stage of upgrades to the treatment plant have been budgeted for in 2026 to 2029 and will investigate treatment efficiency. Pending the outcome these works may include treatment and storage upgrades. Staff recommendation is to budget for these works as planned in the LTP.
Point Number	1234.3
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	As a landowner in Arthurs Pass I have a number of items related to that area, some of which have impact regionally and nationally. I request consideration of the following: - that kea be recognised as a fauna of importance and that work to proceed to pass a bylaw to prohibit feeding of kea except for recognised conservation purposes - the council continue funding for conservation acivities in the Arthurs Pass area.
Staff Recommendation	Councill environmental staff are working hard to reverse the decline in our native species across the district. They recognize that kea protection efforts need to be supported and focused, and as such staff are engaging with stakeholders regarding the kea feeding bylaw proposal. Staff recognize the huge efforts made by Arthurs Pass community volunteers in kea and other biodiversity protection efforts.

Point Number	1234.4
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	As a landowner in Arthurs Pass I have a number of items related to that area, some of which have impact regionally and nationally. I request consideration of the following: - that the council lead a dark sky designation for the village. With its unique location and nocturnal animal life the bright lights in the city are detrimental to health and well being of animals and residents. Councils leading of this is particularly important because two of the largest sources of light pollution is from infrastructure of Waka Kotahi (the state highway) and Kiwirail (the rail yard)
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and would like to see Arthurs Pass progress towards Dark sky accreditation. Dark sky considerations will be part of the development of Action Plans associated with the Economic Development strategy. Council will consider their feedback in strategy action planning.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1236.3
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	As recent new members to the community, the use of this Sheffield pool over the summer months has had a significant and positive impact to our family (including our children aged 5 and 6). We strongly hope that these physical and social benefits can continue to be supported with a swimming facility in Sheffield.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Submitter Number:	1237	**Submitter:**	Kerry Glynn
Point Number	1237.2		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	The Selwyn Huts have been an established recreational reserve for an extended period, greater than 100 years. The Selwyn District Council has had responsibility for management of this area as a reserve since 1989 and have not done any of the legally required activities since then. Now they want to terminate the reserve by		

	limiting the licence available to leaseholders. The SDC failure is now being foisted onto the residents there and that should not be done. • The Selwyn Huts should be listed as a history site on the District Plan. It pre-dates the 1900s so is an archaeological site under Heritage Pouhere Taonga Act • All homes and all people should be protected. It's unfair to cease offering a licence to the Selwyn Huts leaseholders. Review the 15 year finite term and let us stay. This also helps preserve our kiwi history! • It's unfair not to include Selwyn Huts on the District Wide Rate for water and sewer. Excluding a community in the district goes against the purpose of introducing the DWR in the first place. The legal opinion from Council's own lawyers have highlighted this. Leaseholders should not be discriminated against and should be treated like everyone else in the district • Replace the reticulation system. Council have been in charge of this since 1989 and dropped the ball by not doing any maintenance and upgrades over the last 35 years. Don't use your incompetence as an excuse to make us pay or to kick leaseholders out. With the current difficulties with affordable housing availability the councils statements on page 12 of the plan, "looking for modern, affordable housing, with good amenities and services" should also consider that many people, not necessarily young, thrive in an environment like the Selwyn Huts. The SDC should reflect and protect the Selwyn Huts environment. Of course climate change may have an impact and this can be factored into a licence and be triggered by a threshold that directly affects the Selwyn Huts, not by some unspecified event.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Submitter Number:	1239	**Submitter:**	Karen St Guillaume for Rolleston Brass
Organisation:	Rolleston Brass		
Point Number	1239.1		
Category	Activity > Planning Further Community Facilities		
Comments:	Rolleston Brass Submission to Selwyn Long Term Plan 2024-2034 Background: Rolleston Brass is a thriving non-profit music organisation serving the community in a multitude of ways. As a community Brass Band, Rolleston Brass runs two Brass bands and provides free tui on to learners with the organisation totalling over 60 active members ranging in ages from 9 years to 70 years of age. Many others follow and support our work. Rolleston Brass provides music for council and rate-payer-run events such as ANZAC day and Christmas story at Christmas me along with free concerts in Te Ara Ātea, at the Community centre and in the Rolleston School Hall. The band represents the Selwyn district at Brass Band competitions both Nationally and Regionally. Our organisation performs to hundreds of people at various concerts and events throughout the year. We are extremely active in serving musically throughout the Selwyn District. We are continuing to grow - currently teaching 20+ school-aged children brass instruments and training 40+ other people of all ages in our bands. A er consulta on and discussion with our Rolleston Brass committee and Rolleston Brass members we would like to put forward our feelings regarding the long-term plan: Rolleston Brass is grateful to Selwyn Council for financial support it receives by way of council grants, but our biggest challenge is to find a dedicated band room /rehearsal space where we can rehearse, teach our young people, run Rolleston Brass Band, Academy Band, Learner groups and also be able to store necessary equipment such as music stands and percussion etc. This is a priority to ensure the future of our organisation. A space shared with other groups would work well. The focus on sports facilities for the Selwyn district is admirable, but, there is a serious lack of anything suitable for Music, Culture and Arts groups (particularly with regard to Rolleston) to practice, develop and grow their cration a weekly / daily basis. That no dedicated musical arts space is being planned for the already existing music / culture and performing arts groups in Selwyn (particularly Rolleston) - and for new groups to be created in our district - is seriously worrying. It can readily lead to groups having to disestablish through lack of facilities and support - and individuals having to travel to be part of groups in Christchurch city which already have the facilities. This will be a very sad outcome for		

	Selwyn! Rolleston Brass has been enquiring and communicating with Selwyn council for a number of years now regarding a suitable Arts / Music space for rehearsal. We put in a submission about the use of the old library for a band room and musical arts rehearsal space, but unfortunately nothing has come of that. We strongly believe that the council should plan and build a purpose-designed space which could be used by multiple music / culture/ arts groups. This would enable the fostering and development of such groups thereby providing opportunities for people in the Selwyn District. We see this as a priority - and Rolleston Brass is willing to be involved in helping to come up with ideas and specs for such a project. We sincerely hope the council will view the Arts in our district as being as worthy as sports are of having necessary and vital facilities
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. Also, Council will be reviewing the network of public-facing facilities across the Selwyn District (libraries, community centres, halls, sports centres and pavilions). This work will take a holistic look at all facilities to plan for short, medium and longer-term community needs. The review will help Council better understand issues, opportunities and barriers and to consider alternative options for the future. Depending on the facility, options identified in the review may include, but not be limited to, the lease or sale of facility to a community group or organisation, the repurposing of facility from a general public hire facility to a dedicated activity facility for the district, co-location arrangements, etc. The intention of Council's public-facing facilities network plan is to ensure a reasonable and balanced spread across the wider district, with facilities that are relevant to the various communities.

Submitter Number:	1240	**Submitter:**	Oliver Boyd for Summerset Group Holdings Limited
Organisation:	Summerset Group Holdings Limited		
Point Number	1240.5		
Category	Questionnaire > Policy Changes > Policy Review - Other		

Comments:	Please see our submission on the Council's proposed development contributions policy attached as a supporting document. Submission on the Selwyn District Council's Draft Development Contributions Policy 2024 on behalf of Summerset Group Holdings Limited 1. Summerset is New Zealand's second largest developer and operator of retirement villages, which makes it one of New Zealand's largest home-builders. Summerset has 38 villages completed or in development across New Zealand and provides a range of living options for more than 8,000 residents. 2. New Zealand is facing a housing crisis, including a retirement living and aged care crisis. The Selwyn District Council's draft Long Term Plan consultation document shows the district's age distribution is expected to increase significantly in the 65 and over age group from 13% to 18% over the next 10 years. This will result in even further demand for retirement villages. It is vital that the regulatory environment recognises and provides for the development that is required to meet this growing demand, and funding for associated infrastructure, but does so on a fair, equitable and proportionate basis that reflects, for comprehensive care retirement villages like Summerset's: 2.1. the reduced occupancy per unit when compared to a typical household unit - Summerset's average occupancy for its independent units is 1.3 residents per unit and for its care units is 1 resident per unit; and 2.2. the typically low pattern of demand on community infrastructure, amenities and facilities when compared against the demand assumptions for a typical household unit - residents entering Summerset's villages average 81 years, have specialist physical and social needs, and access Summerset's extensive range of on-site amenities. 3. To fairly account for the lower demand profile, both a population per unit discount (to account for the lower occupancy) and a demand factor discount (to account for the older demographic and on-site amenities) should be applied to set specific contribution calculations for comprehensive care retirement villages. This should distinguish retirement units, and aged care rooms, and provide separate rates for each. In setting calculations, the Council needs to clearly demonstrate the causal connection between any infrastructure required as a result of the increase in demand (if any) directly attributable to retirement village development. 4. Accordingly, in principle we support the Council's approach of applying a reduced household unit equivalent (HUE) rate for residential units and aged care units in retirement villages as set out in page 29 of the Draft Policy. However, in light of the independent review into infrastructure demand by retirement village residents commissioned by the Tauranga City Council in July 2023 (the report of which is set out in Appendix 1), we submit that in some instances the reduced HUE rates do not go far enough. 5. The review found that on average residents have a demonstrably lower demand for transport, reserves and community facilities, due to

	villages providing many on-site facilities/amenities and, for aged care residents, a higher need for 24/7 medical care and reduced mobility. For example, average occupancy within Summerset's villages is 1.3 and 1 residents per unit for independent and care units respectively, with typically very low demand on many of the items of community infrastructure being funded such as sports halls, aquatic centres, community centres and libraries. 6. Similarly, for transport impact, the Draft Policy proposes an assessment for standard retirement village units of 0.33 HUE per unit and for aged care units of 0.22 HUE per unit. However, retirement units generate around 20% of the trips of a standard dwelling and aged care rooms generate around 10% of the trips of a standard dwelling. These figures are based on the independent review commissioned by the Tauranga City Council, and include allowance for staff and visitor transport. 7. Taking into account both population per unit/room, and demand factors, Summerset suggests the rates in the table below. In addition, we encourage the Council to review the contents of the report set out in Appendix 1 and seek an independent review of its own, which we would be happy to contribute to. Development type Activity Units of demand Retirement unit Transport 0.2 HUE per unit Community infrastructure 0.1 HUE per unit Reserves 0.1 HUE per unit Aged care room Transport 0.1 HUE per room We would like to thank you for the opportunity to submit and are happy to appear in support of our submission. Yours faithfully, Oliver Boyd National Development Manager Summerset Group Holdings Limited
Staff Recommendation	The submission is acknowledged. Staff recommend that consideration is given to undertaking an independent assessment regarding the calculation of transport, reserve and community infrastructure HUE's relating to retirement villages.

Submitter Number:	1241	**Submitter:**	Shary Vargo for Youth South West Christchurch Trust
Organisation:	Youth South West Christchurch Trust		
Point Number	1241.2		

Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	**Strategic Community Partnership:** As the Relationship Manager of the Multi Party Agreement for 24-7 YouthWork in the Selwyn District Council, we (Youth SouthWest Christchurch Trust) are making a submission to the 2024-2034 Long Term Plan for continued Council support. As outlined in the supporting document attached, our youth workers are integrated into the schools they support as well as the rural communities where rangatahi live. By establishing relationships through presence-based youth work rangatahi have the opportunity to engage with accessible youth workers, being assisted to find belonging, having access to community professionals & social services and opportunities for leadership that result in greater wellbeing. Research shows the benefits of having 24-7 youth workers in schools include increasing students' self esteem, community participation, ability to make positive choices, school attendance and participation in sports and other meaningful activities. Supporting them through the highs and lows of their teenage years, we contribute to the development of resilient individuals who will be able to give back positively to their communities and society. **In short, 24-7 YouthWork is a vital part of Selwyn's growing community where we form part of the village that contributes to the future of the region.** The five key aims of 24-7 YouthWork are: Support Students, Build Positive Relationships, Cultivate School Spirit, Leadership Development, & Integrate Students into Out of School Activities. We work successfully with a culturally diverse range of young people all over NZ by using educated methodologies and action learning, supporting both individuals and inclusion. We remove barriers to participation & connect students with community activities & social services support. Youth workers are trusted with extremely private/challenging conversations. Students report feeling safe, experiencing a sense of belonging. Over 75% of students reported "an improvement to their overall wellbeing over the time they had been interacting with their youth worker" (YouthVoice 2022 Jan 2023). Thank you for considering our attached supporting document.
Staff Recommendation	This request will be considered by Council within the Long Term Plan Deliberations. Strategic Partnerships are part of the Council's Community Funding Programme and any arrangements with groups are generally made for three years, subject to performance and delivery. A submission to Council's Long-Term Plan process, plus strong alignment with Council's strategic direction and role is required for consideration for this fund. The activities funded are generally activities that, should they not be delivered, might reasonably be expected to be the

	responsibility of Council or impact an aspect of the District's wellbeing.

Submitter Number:	1242	**Submitter:**	Rupert Tipples for Lincoln & Districts Historical Society (Inc.)
Organisation:	Lincoln & Districts Historical Society (Inc.)		
Point Number	1242.4		
Category	Activity > Lincoln Town Centre Upgrades		
Comments:	**History and Heritage – Submission to LTP by Lincoln & Districts Historical Society (Inc.) 29 April 2024** 1. LDHS (Inc.) congratulates SDC on becoming far more proactive where the History and Heritage of the community are concerned, including the development and now, implementation of the Selwyn Strategic Heritage Plan 2023-2027 which was approved at a Council meeting in December 2022. Noted that it was not included as a supporting document for the LTP consultation. It is attached as one of our supporting documents(1).. 2. Lincoln Town Centre Plan We support the plan, (to improve Gerald Street and cycling pedestrian safety) but with the following comments: a. What will be done to protect the heritage setting of St. Stephen's Anglican Church, Coronation Library- the Down by the Liffey Gallery, and the Liffey Reserve with the installation of traffic lights at the James St/Gerald St intersection? b. The town centre plan boundary shown in the document is at Kildare Terrace - with shops to be built to the street on the current Famous Grouse carpark. This concerns us as it impinges on the area we have proposed should be a Historic Precinct at the time of the recent policy debates on		

	urban intensification. See attachments 2 and 3, which are copies of the Society's *Newsletters,* Issue 57 November 2022 and 58, March 2023, and describe the issues as we see them in 'Preserving Lincoln's Charm' . c. We recommend the plan is reviewed to incorporate/allow for views to our heritage building Pioneer Hall and the neighbouring Liffey Reserve. We are also concerned less Pioneer Hall might become shaded by any future development.
Staff Recommendation	Submission is acknowledged by Council. Council is aware of the heritage and other cultural aspects that will need to consider in the design for the area for the planned traffic signals at Edward St and James St. This includes the area around Kildare Terrace as well extending west into the town centre. The carpark to the east of the famous Grouse is owned and operated by Council as a public carpark. It has no current plans to develop the site further to its current use.
Point Number	1242.5
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	**History and Heritage – Submission to LTP by Lincoln & Districts Historical Society (Inc.) 29 April 2024** 1. Liffey Cottage Reserve. Proposed work to improve the Liffey Cottage reserve is urgent and should proceed this year. We have been in consultation with Derek Hayes (SDC) and his team of Landscape Architects, which has led to the proposals and documents attached (attachments 4, 5 and 6)), which are budgeted at some $10,000. The area is now a dustbowl, unsightly, unhealthy and unpleasant. The dust is damaging not only the building, but also the museum collections held within the Cottage.
Staff Recommendation	Staff support the submission as the surrounds of the cottage need upgrading as the area is unsightly and have been working with the community on this project for some time. Budgets have been set aside for this type of work. Staff recommend that the work is covered under existing Township budgets for path installation and landscaping in years 1 to 3 of the programme.

Point Number	1242.6
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	**History and Heritage – Submission to LTP by Lincoln & Districts Historical Society (Inc.) 29 April 2024**

1. Selwyn Community History Fund - established as part of the Selwyn District Strategic Heritage plan, has been a godsend for the voluntary organizations supporting Heritage across the District.

   We strongly recommend that this should continue and the value be increased annually to at least allow for inflation. We also strongly recommend that funding continues to be available to renew the ehive subscriptions for Museums of Waikirikiri Selwyn members. We support the SHHN request that the management of the ehive subscription and funding be handled by the SDC Library, a practical solution which will provide continuity for a diverse group of volunteers from ten groups (currently), all focused on recording, and also providing access to their collections for the Selwyn community and beyond. The combined Museums of Waikirikiri Selwyn collection is becoming a terrific resource.

2. We support a Lincoln Rotary project 'Lincoln Mill heritage interpretation project' - for a water wheel replica (display only, not in the river) and history panels on the Liffey near the weir. This might include the now stored millstones from Meyenberg Square.
3. Burnham Military Museum (RHC). LDHS Committee noted that this Museum would require significant operational and capital funding - particularly staffing, insurance, and materials, in addition to capital and land costs. We recognize that this is a far bigger project than Selwyn District Council alone could undertake. It is of national importance and needs external funding. To obtain Government funding a feasibility study is needed. We believe that this is capital expenditure and should proceed as already formulated in the last (3 April 2024) Council meeting. A possible partnership opportunity was noted: would it be possible to build into any feasibility study provision for future community archive storage, an issue which is of growing concern to us and other

	societies, who are archiving records on behalf of a range of community groups. We ask how is the NZRAF Museum at Wigram funded? That may give some valuable insights. *The Listener,* Issue 16 (27 April 2024), has just had a series of articles for ANZAC Day highlighting 'Lest we forget', preserving the past for our cultural memory. An article 'Taonga Tales' (pp. 16-21) is especially relevant to this discussion,
Staff Recommendation	The submitter's points regarding eHive subscriptions are noted and will be forwarded to the Council's libraries team. The submitter's support for the community history fund and various community history projects including the Lincoln Mill interpretation and the military museum feasibility study are noted.
Point Number	1242.7
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	**History and Heritage – Submission to LTP by Lincoln & Districts Historical Society (Inc.) 29 April 2024** 1. Other Heritage matters: a. Collins Road to Springs Road Road improvements are inevitable. How will the heritage Springs water trough (Heritage item H.324) be protected and celebrated? Please see our Newsletter, Issue 59, p.4 (attachment 7). b. We strongly recommend Interpretation/information panels for the site of 'The Springs' Homestead and Springs (H. 323). The ideal site for these would be along the footpath on the south side of the Te Whariki subdivision at the 'Viewing Point'. c. Street names database – we recommend public access to a Selwyn street names database. This could be facilitated by a 'New Street Names' databank, which should be a publicly accessible site for people to make recommendations for new street/subdivision names for SDC and developers to draw on. Residents value the use of names for local places, people, features, flora and fauna. Ngai Tahu Properties and Lincoln University have led the way with the selection of local names for the Te Whariki subdivision bordering Springs station.

	On behalf of the Society, Rupert Tipples MA, PhD. President.
Staff Recommendation	The submission is acknowledged. Comments regarding the interpretation panel will be referred to the relevant team.;

Submitter Number:	1243	**Submitter:**	Harvey Polglase for Malvern Community Patrol
Organisation:	Malvern Community Patrol		
Point Number	1243.4		
Category	Activity > Other Categories identified by Staff > Crime/district safety		
Comments:	The Malvern Community Patrol asks that the Council fund the installation of security cameras at the Darfield Recreation Centre connected to the Police network. The Patrol and Police are aware of the area being used for antisocial activities including drugs and vandalism, and have had reports of vehicle damage in the car parks. Council facilities in some areas are already equipped with cameras and there is popular support for them locally in a poll by the Darfield Residents Association. The move is supported by Darfield Police and the cost will be under $5000.		
Staff Recommendation	Submission is acknowledged by Council and staff will explore this as an option.		

Submitter Number:	1244	**Submitter:**	Details Withheld

Point Number	1244.1
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** I am only submitting regarding Lincoln. Any Park and Ride should avoid town centres and reduce short trips that add to congestion in busier areas. Locating a space will be tricky with the planned sprawl of Lincoln. I would encourage Council to do further mahi around this including consultation with commuters.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. Councils Preferred Option a Park N Ride at Lincoln opposite the Lincoln Events Centre is planned for 2026/27. This timed to coincide with a planned increase of direct bus services to the City by Environment Canterbury.
Point Number	1244.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the

	loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Carry out the landscape improvements to extend the playing fields; replace and upgrade the playground equipment, footpaths, toilet block, lighting and irrigation; and seal the carpark. **Project cost:** Years 1-10: $3.4m **Estimated impact on rates :** Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% * Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2
Point Number	1244.4
Category	Activity > Lincoln Town Centre Upgrades
Comments:	Lincoln Township is my key focus here, however I have also cited Rolleston for a couple of concerns specifically. Any Park and Ride should avoid town centres and reduce short trips that add to congestion in busier areas. Locating a space will be tricky with the planned sprawl of Lincoln. I would encourage Council to do further mahi around this including consultation with commuters.
Staff Recommendation	Submission is acknowledged by Council. The Park N Ride at Lincoln opposite the Lincoln Events Centre is planned for 2026/27. This timed to coincide with a planned increase of direct bus services to the City by Environment Canterbury. Business and shop owners are concerned about the all-day parking around Gerald St by those using current bus services to the City. The proposed Park N Ride will assist in the upgrade of Gerald St by providing for this type of parking at a better location.

Point Number	1244.5
Category	Activity > Other Categories identified by Staff > Growth
Comments:	Slowing the development of Lincoln and Rolleston should be a serious consideration. Both high schools are at breaking point, primary schools have no space left. Principals are constantly focussing on where to put ākonga, distracted from the real purpose of our schools; teaching and learning. The education sector is getting slammed in the media and reforms are coming, easing the pressure on our teachers, and our tamariki in schools by slowing the growth is absolutely in SDC's control. It is a problem SDC's consenting process has caused, it's time to show some backbone and put the rate payers needs ahead of that of the developers greedy wants.
Staff Recommendation	The provision of schooling is not a council function. The council works with the Ministry in helping project potential growth based on projections. However, as growth continues to exceed this, more infrastructure is needed quicker. The government has also made it clear to councils that we are to be able to respond to growth and zone accordingly.
Point Number	1244.9
Category	Activity > Other Categories identified by Staff > Speed Management
Comments:	Lincoln Township is my key focus here, however I have also cited Rolleston for a couple of concerns specifically. Speed calming features too should be in place around our kura and in other places where cyclists and pedestrians need to have equal safe access. Climate Change policies are moot when those wanting a carbon neutral means of access are scared into cars
Staff Recommendation	Submission is acknowledged by Council. Council has budgeted $2.6Mill in the 24-27 NLTP to upgrade safety infrastructure, including traffic calming around Selwyn schools
Point Number	1244.11
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	Lincoln Township is my key focus here, however I have also cited Rolleston for a couple of concerns specifically. There are no natural shade areas in Rolleston or Lincoln, so many established tree cover is removed in minutes by the developer, and

	there is so much focus on open space, where can our tamariki go to explore woodland, enjoy the shade of a tree on a hot day, without a drive to Darfield? Identifying some space to develop native forest nearer to areas that are highly developed would be fantastic for the communities. Again I ask you to consider the Climate Change policy and where protecting established tree cover in subdivisions comes in.
Staff Recommendation	The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. Council is developing a Future Selwyn Strategy that looks beyond the 10-year horizon to consider how we can respond to these challenges, including canopy cover and native forests. The Council is also developing an Emissions Plan and Sustainability Plan to identify actions into the future.
Point Number	1244.12
Category	Activity > Other Categories identified by Staff > Road Safety
Comments:	Ministry of Education and SDC need to work better for the safety of our tamariki and rangatahi. The lack of safe roading features is a death waiting to happen. I would like to see some funding come from speed cameras around places such as our schools and the high street. Changes to speed limits only work when effectively policed, and this is not prioritised by police. Having a revenue stream that supports safer roads for the most vulnerable in our community would be fantastic. Speed calming features too should be in place around our kura and in other places where cyclists and pedestrians need to have equal safe access.
Staff Recommendation	Submission is acknowledged by Council. Council has progressed our Interim Speed Management Plan focusing on safe speeds around schools. Council has budgeted $2.6 Million for school safety interventions for road safety and traffic calming. Council regularly discusses issues with the NZ Police, but policing and enforcement is the responsibility of the NZ Police. All funds from safety cameras go to central govt and not to the local authority.

Point Number	1244.13
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	Climate Change policies are moot when those wanting a carbon neutral means of access are scared into cars.
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions.
Point Number	1244.14
Category	Activity > Walking and cycling improvements
Comments:	Cycle lanes that are safe with routes that are not dominated by heavy freight and farm machinery should be prioritised. Too many cyclists get bullied on the roads because there has not been investment in safe routes being developed in line with growth. Our tamariki and cycling commuters deserve their positive transport choice to be a safe transport choice. The growth of eBikes and Scooters too should be a consideration as they too have been left with minimal regulation and affect those using more traditional modes of transport.
Staff Recommendation	Submission is acknowledged by Council. Major routes follow council's walking and cycling strategy which will be updated with suggestions from LTP submissions taken into account.
Point Number	1244.16
Category	Activity > Other Categories identified by Staff > Road Safety
Comments:	IN addittion to my earlier submisison, I ommitted my concerns of the use of cross road junctions in new developments. These are not fit for purpose and the use of roundabouts or staggering the roads to allow for safer righ hand turning and straight on travel needs to be considered. As we grow it is clear that driver behaviour needs to be managed by effective transport planning. The fact SDC has to share "guess whcih car has right of way?" posts show the need. Manage the drivers decisions by smart road design that keeps people safer.

	Stop signs are inneffective, cross roads dangerous, and speedlimits moot without adequate policing.
Staff Recommendation	Submission is acknowledged by Council. Road intersections in new subdivisions are managed via the Engineering Code of Practice.

Submitter Number:	1245	**Submitter:**	Chris Stewart for Arthur's Pass Association
Organisation:	Arthur's Pass Association		
Point Number	1245.5		
Category	Activity > Other Categories identified by Staff > Community funding /grants		
Comments:	**we appreciate the support the community has received for arts and heritage projects and events and we hope that this funding will continue. We also hope that the Council will support the Department of Conservation to redevelop the Park Headquarters building as an information, conservation and heritage hub.**		
Staff Recommendation	The Community Funding Programme that supports a wide range of community projects and activities (including arts, heritage and conservation) is included in Long Term Plan budgets. The Selwyn Strategic Heritage Plan 2023-27 includes an action to engage with DOC about their plans for the visitor facilities at Arthus Pass and this will be factored into planning.		
Point Number	1245.7		
Category	Activity > Providing safe drinking water		
Comments:	Water Supply: The Arthur’s Pass water supply has recently had work carried out. Multiple tanks are in place to give a large amount of storage capacity in times of turbidity of the water at the intake. We		

	have been told multiple times that this tank farm is a temporary solution only. We would like to see this promise of a permanent solution to be in the budget within the next 2 financial years. A permanent solution using a membrane filter alongside the UV treatment and chlorine will take away the need for the bulk of the tank farm currently in place. Please ensure funding is allocated in the 2024/25 or the 2025/26 SDC budget
Staff Recommendation	The submitters support for water treatment upgrades in Arthurs Pass is acknowledged. During periods of high rainfall, the source water quality deteriorates significantly making treatment systems ineffective. Stored water is needed to continue to supply the village and meet mandatory Drinking Water Quality Assurance Rules. As part of the Long Term Plan the final stage of upgrades to the treatment plant have been budgeted for in 2026 to 2029 and will investigate treatment efficiency. Pending the outcome these works may include treatment and storage upgrades. Staff recommendation is to budget for these works as planned in the LTP.
Point Number	1245.11
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Transport: We would like to see specific funding allocated to upgrade the lighting in Arthur's Pass village ASAP to enable the Village to be classified as a dark sky area. As this will involve discussions with Kiwirail, we really need SDC on board to lead those discussions. We note that $1.2m is allocated for district wide dark sky in 2039/40. Please pull some of this allocation forward to allow this to happen in the prime Arthur's Pass area in the 2025/26 financial year.
Staff Recommendation	It is acknowledged that the submitter would like to see Selwyn progress towards Dark sky accreditation in the Arthurs Pass area. Dark sky considerations will be part of the development of Action Plans associated with the Economic Development Strategy.
Point Number	1245.12
Category	Activity > Strengthened Partnerships
Comments:	It seems that Tarahaka o Kaimatau is now the accepted Te reo Maori name for Arthur's Pass. Kiwirial have applied that to their signage near the subway tunnel. $700,000 is allocated in 2026/27 for

	this and other things throughout the Selwyn district. We support the implementation of bi-lingual signage at the Village entrances.
Staff Recommendation	Council staff are aware that the draft Long Term Plan includes various budgeted items. Staff note however, that items currently included in draft LTP budget are not confirmed until Council determines the final budget.
Point Number	1245.13
Category	Activity > Walking and cycling improvements
Comments:	We fully support the construction of a cycle trail to join the two extremes of the Selwyn District. We only need to look at how popular cycle trails are becoming around Aotearoa. This would bring in more tourism and enable new businesses to become established along the proposed route, which traverses from the highest point of the Selwyn District, Arthur's Pass to the lowest point, Te Waihora/Lake Ellesmere
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1245.18
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	**We ask that funding for volunteer conservation groups continue particularly the Selwyn Natural Environment Fund.** **we appreciate the support the community has received for arts and heritage projects and events and we hope that this funding will continue. We also hope that the Council will support the Department of Conservation to redevelop the Park Headquarters building as an information, conservation and heritage hub.**
Staff Recommendation	The Community Funding Programme that supports a wide range of community projects and activities (including arts, heritage and conservation) is included in Long Term Plan budgets. The Selwyn Strategic Heritage Plan 2023-27 includes an action to engage with DOC about their plans for the visitor facilities at Arthus Pass and this will be factored into planning.

Point Number	1245.19
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	We would like more maintenance of the Council gardens in the village
Staff Recommendation	Submission is acknowledged by Council. Staff have been working through a process to pick up gardens that have been maintained outside of the reserve maintenance contract and absorb these into the contract. This includes the gardens at Arthus Pass and budgets have been developed to accommodate this minor additional cost.
Point Number	1245.24
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	**he Arthur's Pass Association represents the 140 home owners and bach holders at Arthur's Pass Village and Bealey Spur community. Although we are a small community we believe the Council should recognise that we are an iconic part of the District. As such, the Council should be doing whatever it can to support the maintenance and development of the village as a scenic, wildlife, community and historic highlight of the District. Specific ways in which we believe the Council can undertake this support through the Long Term Plan are summarised below and developed in the document attached.**
Staff Recommendation	The submission is acknowledged. Submission is noted by relevant team.;
Point Number	1245.29
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	**- we question the need for $553,000 allocated in 2025-2027 for underpass flooding**
Staff Recommendation	The submitters preference to not fund stormwater capital upgrades to reduce flood risk to the underpass in Arthurs Pass are acknowledged. Staff recommendation is to further investigate and design these improvements in year 2 of the LTP as planned.

Point Number	1245.31
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	We would like to see a continued push for a bylaw prohibiting the feeding of kea
Staff Recommendation	Councill environmental staff are working hard to reverse the decline in our native species across the district. They recognize that kea protection efforts need to be supported and focused, and as such staff are engaging with stakeholders regarding the kea feeding bylaw proposal. It is important that funding is available to support other indigenous biodiversity projects.
Point Number	1245.32
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	We would like the local roads and footpaths to be cleared of snow in a quicker time. We request that the open drain along Brake Hill Road be covered and piped in the 2024/25 financial year
Staff Recommendation	Submission is acknowledged by Council. Piping would be very expensive because of the topography. And considering the amount of water coming down the drain, piping may not be our best option. Council staff will review option. No additional work is budgeted at this time.
Point Number	1245.33
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	We support the implementation of bilingual signage at Arthursa Pass to the sea.
Staff Recommendation	Submission is acknowledged by Council. There is on-going consideration by Council for Bi-lingual signage and a strategy is required. There is allocated budget for District/township signs and this will likely include Bi-lingual going forward with a consultation process.

Point Number	1245.34
Category	Activity > Other Categories identified by Staff > Emergency management
Comments:	We appreciate the support from the council Emergency Mangement team and believe funding to this sector should be increased.
Staff Recommendation	*The submission is acknowledged. Council appreciates the support.*
Point Number	1245.35
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	**we believe funding should be made available in 2025/26 to achieve Dark Sky status for Arthur's Pass**
Staff Recommendation	It is acknowledged that the submitter would like to see Selwyn progress towards Dark sky accreditation in the Arthurs Pass area. Dark sky considerations will be part of the development of Action Plans associated with the Economic Development Strategy.;
Point Number	1245.37
Category	Activity > Walking and cycling improvements
Comments:	**we support the construction of a cycle trail from Arthur's Pass to the sea.**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1245.40
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	**we request that funding for the heating of the Arthur's Pass Community Centre allocated for 2030/31 be brought forward to the next financial year 2024/25**
Staff Recommendation	Staff do not support the submission. A significant amount of work has been carried out by Council in recent years in upgrading the building including installation of heat pumps, insulation and new flue

	for the log burner. A new heating appliance was considered but as this would trigger a Building Consent substantial budgets would be required to carry out compliance works (disabled access toilets, alarm system, accessibility improvements) it did not proceed. The reasons for not proceeding were communicated to the Arthurs Pass Community Association. Staff are of the view that the significant cost of this work is not warranted at this point but have allowed for heating replacement and associated works from 2029-30 (when the existing fire appliance is expected to be at end of life). Staff recommend that the submission to have a new solid fuel heating appliance installed at Arthurs Pass Community Centre is declined but the condition and performance of the existing solid fuel heater is monitored over the next few years.

Submitter Number:	1246	**Submitter:**	John Collyns for Retirement Villages Association New Zealand
Organisation:	Retirement Villages Association New Zealand		
Point Number	1246.3		
Category	Questionnaire > Policy Changes > Policy Review - Other		
Comments:	We have attached our submission on the Council's development contributions policy as a supporting document. 2 May 2024 To: Selwyn District Council By online submission Submission on the Selwyn District Council’s Draft Development Contributions Policy 2024 on behalf of the Retirement Villages Association of New Zealand		

1. The Retirement Villages Association of New Zealand (RVA) is a voluntary industry organisation that represents the interests of the owners, developers and managers of registered retirement villages throughout New Zealand. The RVA was incorporated in 1989 by a group of entrepreneurs to:

1.1. represent the interests of retirement village owners, developers and managers;

1.2. develop operating standards for the day-to-day management of retirement villages; and

1.3. protect their residents' wellbeing.

2. New Zealand has more than 460 registered retirement villages and 96% by unit number are members of the RVA. The RVA's members include all five publicly-listed companies (Summerset Group, Ryman Healthcare, Arvida Group, Oceania Healthcare, and Radius Residential Care Ltd), other corporate groups (such as Metlifecare, Bupa Healthcare, Arena Living, independent operators), and not-for-profit operators (such as community trusts, religious and welfare organisations).

3. The RVA welcomes the opportunity to provide feedback to the Selwyn District Council on its Draft Development Contributions Policy 2024.

4. Retirement villages play a key role in addressing the housing crisis, and the retirement living and aged care crises. Retirement village developments have a higher population density than traditional residential development. The development of affordable retirement village dwellings, such as those provided by RVA members, reduces land demand pressure and makes further residential housing available as new village residents release their properties to the market.

5. This increase in housing supply helps to relieve pressure on the housing market and contributes towards improved housing affordability in the long term. Affordable housing and the realistic prospect of home ownership for younger generations provides the opportunity for more secure accommodation than renting, and long-term investment opportunities.

6. Retirement villages also have benefits in reduced transport demand from residents, consequential reductions in the use and demand for infrastructure, and climate benefits resulting from the overall density of villages and the aforementioned transport benefits.

	7. The RVA wishes to express its support for the submission of Summerset Group Holdings Limited in its entirety. The RVA requests the Selwyn District Council engages constructively with Summerset in relation to the Draft Development Contributions Policy. Signed: On behalf of the Retirement Villages Association of New Zealand Date: 2 May 2024 Address for Service: The Retirement Villages Association of New Zealand PO Box 25-022 Wellington 6146
Staff Recommendation	The submission is acknowledged. Staff recommend that consideration is given to undertaking an independent assessment regarding the calculation of transport, reserve and community infrastructure HUE's relating to retirement villages.

Point Number	1248.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP
Point Number	1248.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.*

	Project cost: Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [
Point Number	1248.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do nothing. Use the existing park facilities and remove or replace old and unsafe items in the park. **Project cost:** Year 1: $143,000 **Estimated impact on rates:** Included in our current rates **Funding:** Rates: 100% **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1
Point Number	1248.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility

Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:**
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	1248.5
Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1248.7
Category	Activity > Strengthened Partnerships
Comments:	I strongly object to strengthening a partnership with mana whenua. No more money to be spent.

Staff Recommendation	Council is committed to responsible use of ratepayer funds. Council considers that investing in relationships, and actively working with local Runanga , is not just the right thing to do under Te Tiriti o Waitangi, it's also an efficient way to achieve positive outcomes for all Selwyn residents. Council recognises it has a large volume of often complex needs and time consuming demands that its places on Runanga representatives, who are generally volunteers, in order to assist Council meet its legal compliance requirements, develop and implement strategy, guide adherence to cultural protocols and good practice. The mechanism of contribution towards the two Runanga is considered an appropriate and cost effective way to support the contribution of Runanga representatives to supporting Council to achieve positive outcomes for all Selwyn residents.
Point Number	1248.8
Category	Activity > Chlorination
Comments:	I would likt Exemptions from Chlorination to be applied for.
Staff Recommendation	The submitters preference to obtain chlorine exemptions is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1248.9
Category	Activity > Low Nitrate Water Sources
Comments:	Low Nitrate Water Sources: We object strongly to all investigation about water centralization. We object strongly to water centralization.
Staff Recommendation	The submitters preference to not investigate low nitrate sources of water is acknowledged. Staff recommendation is proceed with investigations as proposed in the LTP.
Point Number	1248.10

Category	Activity > Potential Requirements To Fluoridate
Comments:	Potential requirement to fluoridate: We object strongly to any fluoridation of any waters supplies now or in the future.
Staff Recommendation	The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health
Point Number	1248.11
Category	Activity > New Public Transport Services
Comments:	Exploring new public transport services: As the Council currently employs staff who could participate in any study – I fail to see why $75,000 of ratepayer's money is being ear marked for a study?? Yes to a study if using existing council staff at no cost to ratepayers. No to a study if there is any cost to ratepayers.
Staff Recommendation	The funds are required to develop the business cases in conjunction with Environment Canterbury for the additional PT services and infrastructure needed for Selwyn
Point Number	1248.12
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	NZTA transport requirements: $19M is a lot to spend on roading etc. I object to any further expenditure at this time.
Staff Recommendation	Staff do not support the submission because neglecting road repairs and maintenance causes increased maintenance and repair costs in future years.
Point Number	1248.13
Category	Activity > Lincoln Town Centre Upgrades
Comments:	Lincoln Torn Centre Upgrades: I object strongly to the very high and in my opinion unnecessary expenditure on Lincoln Torn Centre. Doing any of these upgrades will seriously detract from the beauty of Lincoln.
Staff Recommendation	Submission is acknowledged by Council. Of the $46M for the upgrades that includes improving amenity aspects, $36M is related to core infrastructure works that are necessary anyway to address a

	failing carriageway and other near end of life assets like kerbing and footpaths. This also includes the signalization of the 4 key intersections necessary to cater for the expected traffic volumes and safety needs. There is strong outcome focused on improving the amenity on Gerald St, in particular in the eastern township area
Point Number	1248.14
Category	Activity > Walking and cycling improvements
Comments:	Rural Walking and Cycling Improvements: I object to any further expenditure (including feasibility studies) on improvements that ratepayers are expected to foot the bill for.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1248.15
Category	Activity > Planning Further Community Facilities
Comments:	Planning further community facilities: I object to any studies on or implementing further community facilities – particularly Prebbleton Community, a new community facility in South-west Rolleston, and re-develop Rolleston Community Centre. Ratepayers cannot and should not be forced by their Council to pay for more and more facilities.
Staff Recommendation	The submission is acknowledged.
Point Number	1248.16
Category	Activity > Council's Office Improvements
Comments:	Council's Rolleston Office Improvements: The Council should make do with their existing relatively new building and not expect ratepayers to pay for further improvements to the tune of $3.7M. I object to any improvements being made or charged to ratepayers. Strategic Investment S
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.

Point Number	1248.17
Category	Activity > Strategic Investment Strategy
Comments:	Strategy Investment Strategy: The Council should stick to its core function, which does not include investment.
Staff Recommendation	That the submission is acknowledged by Council. Council's strategic investments are based around building a strategy that will meet the needs of our communities and our businesses to thrive in the medium to long-term period.
Point Number	1248.18
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	Water and Wastewater Services: I object to all upgrades of water and wastewater services.
Staff Recommendation	The submitters comment opposing water and wastewater upgrades is acknowledged. Staff recommendation is to proceed with the 5 waters capital programme as proposed in the LTP
Point Number	1248.19
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	Transportation: I strongly object to the widening of Ellesmere Road from Edward Street to Knights Stream. I live on Ellesmere Road, but have had no notification that this is going to occur or Consultation.
Staff Recommendation	Staff do not support the submission because Widening of Ellesmere Road is necessary to handle increase traffic between Lincoln and Christchurch.
Point Number	1248.20
Category	Activity > Chlorination
Comments:	I object strongly to continued chlorination of all nz water supplies and want this ceased.
Staff Recommendation	The submitters preference to obtain chlorine exemptions is acknowledged. To move to intermittent chlorination for eligible

	schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1250.8
Category	Activity > New Public Transport Services
Comments:	It would be really helpful to have public transport from Leeston to Rolleston (especially after school) but I'm sure during the day. Rolleston is the main hub and where a lot of things happen - sports trainings (football) and swimming lessons. Public transport would be helpful to get older children (but not yet with drivers licenses) to get to Rolleston. I'm sure it would also be helpful for others throughout the day. Public Transport from Lincoln to Rolleston, West Melton to Rolleston, Darfield to Rolleston could also be helpful.
Staff Recommendation	Council will be investigating what further PT services can be provided across the wider District, further to what Environment Canterbury can provide. However it is expected these will need to be fully funded by users and ratepayers subject to further Council consideration through subsequent Annual Plan and Long-Term Plan processes. The Park N Ride facilities will be sized and provided to enable use from the adjoining townships so residents can drive and

	park to access the PT services.

Point Number	1251.1
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** There is existing park and ride space in both centres. We should be looking to the future by supporting an electrified train service to Christchurch. I came from Melbourne where people catch a bus to the station, or park their car at the station. Works well if you have a good bus network.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. The 2020 Greater Christchurch PT Futures Business Case identified that further investment in improved PT services and infrastructure will have positive benefits including the use of Park N Rides in the Districts to facilitate direct PT services to the city. This was further reinforced in the 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case. There are insufficient Park N Ride facilities to cater for 10 years of demand to align with the additional PT services planned by

	Environment Canterbury. MRT Business Case also considered a wider passenger rail service using the existing rail network. This could have merits in the future if combined with a wider regional passenger rail service. But with small projected patronage, large investment needed for rolling stock and infrastructure (on a rail network managed by others), and that there is no CBD connection makes this currently not worthwhile.
Point Number	1251.2

The front page of the Selwyn Times, published on the 3rd April, says it all. The lead story, “Rate hikes are in our hands”, whilst at the bottom of the page is a property developer advertising, “City Living, Country Lifestyle".

One has to wonder if the SDC is taking its lead from the developers, or vice versa. Either way, it’s the same result: high inflation, high debt and high interest rates, at the same crippling the purchasing power of our income. SDC is not alone, following in the footsteps of national governments, both locally and overseas, who have no problem racking up runaway debts in the name of progress and then relying on a compliant populace to foot the interest bill. Is it any wonder that essentials like housing, transport and even decent food and healthcare are slowly moving beyond the reach of our rising generation.

The approach of the Council to build expensive infrastructure for tiny population pockets within the district has to be questioned and a Cost Benefit Analysis undertaken. I take the example of the West Melton Community and Recreation Centre. The population of WM currently sits at 2900 according to SDC estimates and is projected to climb to 4000 by 2034. This is a small township relative to any suburb in Christchurch, about half the size of Hoon Hay with a population of 9140. This is twice the projected population of West Melton, yet we would not expect two CRC’s to be built in Hoon Hay. The nearest CRC is the Pioneer Complex, which services the SW corner of Christchurch with a population well over 30,000 people (The official figure for the Spreydon Ward alone is 25,400 as of February 2023). Based on these figures one would have to question the need for a CRC in WM, even in 2034. These facilities are expensive to maintain and operate and require large capital expenditure for a small population base of rate payers, the vast majority of whom will rarely use the facility; even now it is rated as “moderate use” and that’s with the Scout den included. The decision to build was is even more problematic given that a large number of the WM population live only 15 to 20-minutes away from Rolleston and Hornby where such facilities are available. I therefore strongly oppose any major expenditure on community facilities that do not meet the requirements of a CBA algorithm.

The algorithm should factor in population, distance to existing facilities and a usage function based on target groups. The population could be normalized per 10,000, the distance normalized per 10 km and the usage function parameter would incorporate a probability of usage over a week, normalized to 10 bookings. A resultant value less than “1" would invalidate the project.

Project to proceed if P/10000*km/10*Bookings/10 > = 1

The Leeston Projects

Community Hall/Library

A few longtime residents of the former Leeston ratepayers committee began pushing for a community hall over 10 years ago. I have personally sat on this committee for the past 12-months and am familiar with the negotiations between the committee and SDC.

The committee has spent many hours gauging community sentiment and recently held a very well attended public meeting to provide updates to and receive feedback from the Leeston Community. A survey received over 230 written responses. The feedback was very clear; yes, the community eventually wants a community facility, but not the options proposed by the SDC. Rather, the residents preferred that the building should cater for at least 300 seated people (using the Dunsandel community hall as a guide) and provide for multiple activities such as funerals, weddings, recreation and concerts, among many others. Now let us apply the algorithm discussed above.

Population of Leeston: 2600 trending to 3100 by 2034. We should double this to factor in the populations of Doyleston and Southbridge, to arrive at a total population pool of 6200. This yields a population factor of 0.62 in the algorithm.

Distance to existing desired facilities:

Halls: Leeston already boasts several facilities that supply the desired space. The Rugby-Club netball court seats 400, The Station on Station Street seats 250-300 with kitchen facilities, Southbridge Hall accommodates 250-300 seated, the Golf club, Bowling club, Lakeside Hall, A&P Showgrounds, Scout den and two churches in High Street all offer community space. Add to these the Primary school and College where audiences of 200 to 400+ can be accommodated, respectively. Given the distance to these facilities is effectively “zero", the algorithm declares the requirement for a new community hall to be zero.

Library: the current library is ideally located opposite the Primary school and facilitates safe access for children after school. The library is spacious and quietly positioned opposite Anderson Park. A medical facility and a spacious meeting room are enclosed. Again, the algorithm produces a zero result for the project to proceed. The SDC has suggested the building is earthquake prone and needs remediation. The decision to remediate has been deferred to 2034/35, yet The building is used daily without trepidation. I posit that if the SDC believe the building is unsafe, then they should repair it, thereby keeping the facility in this ideal location. A second opinion on the extent of these repair is recommended. And what is meant by the phrase, “carry out necessary repairs…… so that it can be continue to be used for a limited time instead.” Surely if the building is repaired and fit for use, why impose the pejorative “limited"?

Staff Recommendation	The submission is acknowledged. Staff advise that The Community Centres, Halls and Libraries Network Plan - Sept 2021 will be reviewed in 2024 - 2027, with the revised plan also including sports buildings and pools. The location of other local facilities has been taken into account in relation to Whata Rau.
Point Number	1251.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Carry out the landscape improvements to extend the playing fields; replace and upgrade the playground equipment, footpaths, toilet block, lighting and irrigation; and seal the carpark. **Project cost:** Years 1-10: $3.4m **Estimated impact on rates :** Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% *

	Our budgeted option **Comment:** I suplort the concept being presented by the Leeston Ratepayers Committee that a new recreation facility be built on the park in say, the next LTP, in the meantime encouraging better use of existing community facilities, such as the Rugby Club courts. This should be totally separate from the library, as is the case in Lincoln and Rolleston. **Leeston Park** The park already includes a rugby pitch, cricket oval, tennis courts, Scout den, playground with skate ramps, grandstand, changing rooms, indoor netball court, squash courts and bar, the latter 5-facilities being owned by the Rugby club. This site provides a central location for traditional sports. What it lacks are indoor and outdoor basketball, badminton and volleyball courts, as well as table tennis and gymnastics space. One could also add a concert hall with stage. All of these facilities are found in either Lincoln, or Rolleston, 20-kms from Leeston. The skate park is rather modest compared to that in West Melton and there is little off street parking, or sculpted bicycle tracks for children. Applying the algorithm, the population factor of 0.62 is multiplied by a distance factor 2, if you place the emphasis on large court spaces. It is unclear what the booking rate would be for the sports identified, but it would not be unreasonable to estimate 20 bookings per week, given the ethnic mix developing in Leeston that would tend not to participate in traditional sports. 0.62 X 2 X 2 = 2.48. Based on the assumptions applied, the provision of a multi-sport stadium on the Leeston Park site is justified. This has to be off-set by community expectations for other improvements to the site, which may require several tranches of funding. So, in my opinion, the SDC should be focusing more on building a multi-sport facility on Leeston Park and less on a new library.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2 and supports the Leeston Community Committee submission and support for a multi-sport facility.

Point Number	1251.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes one indoor court. **Project cost:** Year 3: $7.07 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $5.97 million) **Estimated impact on rates (per year):** $11.67 **Funding:** Rates: 57% Development contributions: 43% * Our budgeted option **Comment:** my algorithm gives this a value of around 3-4, given the closest indoor court is in West Melton, 22-km away, the population pool is around 9,000 and the normalised booking rate would be around 1.5 for 15 bookings per week. The cost is good value given it costs that much to build a roundabout in Prebbleton.
Staff Recommendation	It is acknowledged that the submitter has selected Option 2, build the community recreation and sports facility at Darfield that includes one indoor court.
Point Number	1251.5

Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? Staff Recommendation	Submission is acknowledged by Council.
Point Number	1251.8
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:** I was misled by the SDC introduction to the motion, which suggested there was no sports court in Ma.vern, but this is incorrect. There is a SRC with courts in West Melton, 22-km away. This is the same distance Leestonites have to travel to use indoor courts in Lincoln and Rolleston. Additionally, given Darfield already has a modern CRC and aquatic centre, whereas Leeston has neither, i vote that any construction of an SRC in Darfield be delayed

	until Leeston has at least one of the amenities previously alluded to. Please disregards my earlier submission with respect to this matter.
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	1251.9
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	I need more details on how this money is spent. Currently it sounds nebulous. Who is being paid the money etc.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy without more information on expenditure. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. Every cent of spend will be scrutinised and planned for to ensure outcomes and returns are maximised from the spend. Action plans will outline this in detail.
Point Number	1251.10
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Again, very nebulous. What technologies do we need that we currently don't have access to and what will they be used for?
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1251.11
Category	Questionnaire > Policy Changes > Policy Review - Other

Comments:	The changes for Maori Freehold land are not specified. I need to know more. I don't want to give Council any more power than they currently have to increase rates, or extract rates from ratepayers, so I reject the CPI aspect.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1251.12
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	**Maintenance and Renewables funding:** this should be covered by depreciation which is annually around $45 million. NZTA funding will be needed. Inflation pressure is driven by Councils and Government over spending, so this heat needs to be taken out of the economy.
Staff Recommendation	Submission is acknowledged by Council. Council has no control over the inflationary pressure we are experiencing.
Point Number	1251.13
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	**Do not use the Climate Change excuse for any rate rises**. I utterly reject Net Zero being inflicted on the ratepayers as it is a futile effort to limit global emissions of GHG's when any effort made by us is obliterated by the increasing emissions in China, India, Indonesia and other manufacturing centres. I utterly reject the notion that climate catastrophes can only be averted if we adopt a Net Zero policy. Catastrophes conjured up by the climate alarmists include sea rise due to Ice-cap retreat and the consequent flooding of New Zealand coastal regions, the "boiling of the earth", worsening cyclone intensity and frequency, global temperature rise greater than 2.5-degrees since the start of the industrial revolution and droughts and floods leading to unprecedented loss of life and crop failures. All predictions have failed and will fail because they are based on inaccurate models. For example, in 2007/8 It was predicted by Jensen and Gore that arctic ice would disappear by 2014 and New York City would be under water if CO2 emissions were not drastically reduced. What have we seen since? Increasing CO2 levels and the arctic ice extent is tracking the 2000-2023 average in 2024 and the polar bears are doing just fine.

	Evidence, that above the saturation level of 300-400 ppm, CO2 can no longer induce global warming https://dailysceptic.org/2024/04/24/new-scientific-evidence-that-co2-emissions-cant-warm-atmosphere-because-it-is-saturated-published-in-peer-reviewed-journal/ and https://www.sciencedirect.com/science/article/pii/S2666496823000456 What is really happening with Arctic ice extent? https://youtu.be/LF7pUUd7IXk?si=LFdVJKPFCTlsJah8 The link between CO2 emissions and temperature increase is demonstrated in the link below. Note that the global temperature anomaly rose from -0.6 to +0.3, or 0.9C in total, from the start of the industrial revolution up to WW2, but rose from 0.3 to 0.9 since, despite a doubling of CO2 emissions. The majority of increase in the temperature anomaly occurred when emissions were lower than today. Also note, that there was a temperature decline from 1945 to 1975, during which period there was a steep rise in CO2 emissions, prompting scientists in the 1970's to predict an impending ice age. https://www.conservativewoman.co.uk/smoke-mirrors-and-co2-emissions-part-2/
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions.
Point Number	1251.14
Category	Activity > Lincoln Town Centre Upgrades
Comments:	**Lincoln Town Centre upgrade**: a comp.ete waste of ratepayer money. Are you seriously suggesting that it would make any difference to climate, of flow of traffic, by upgrading a 1.5 km section of road? Remove the car parks if you will, then paint a cycle lane on the road. Or even better, divert cyclists along the back streets. As it is, I avoid Lincoln township and use Springs, or Stands roads to travel to Leeston. And the annoying thing about your proposed "upgrade", is that you will impose a 30 kph speed limit. It will end up

	like Tennyson Stret in Rolleston, or Manchester Street in Christchurch, which I avoid even when cycling.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1251.15
Category	Activity > Providing safe drinking water
Comments:	**Safe Ddinking Water**: Chlorine exemptoon should be applied for. Our water is from a clean and secure source and should only require UV irradiation if anything at all.
Staff Recommendation	The submitters preference for Council to obtain chlorine exemptions is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1251.16
Category	Activity > Potential Requirements To Fluoridate
Comments:	**No to Fluoridation**. I also object to the bluilding of large storage reservoirs scattered around the district. These tanks were built too early and incurred unnecessary rate hikes. We already have a secure water supply in the aquifers that have supplied our towns for decades.
Staff Recommendation	The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health. Providing water storage for our community supply schemes provides resilience against planned and unplanned outages and helps maintain reliability of supply for our communities. Staff recommendation is to proceed with the 5 waters capital programme as proposed in the LTP.

Point Number	1251.17
Category	Activity > Walking and cycling improvements
Comments:	**Bicycle Trails**: I am an avid ofr-road cyclist. May I suggest you maintain the ones we have rather than spend $millions on tourist focused trails.
Staff Recommendation	Submission is acknowledged by Council. Council does footpath maintenance and renewals annually within NZTA approved budget.

Point Number	1251.18
Category	Activity > Council's Office Improvements
Comments:	**Council Offices**: do with what you have. No money to be spent here. We need less SDC staff, not more.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.

Point Number	1251.19
Category	Activity > Strategic Investment Strategy
Comments:	**Strategic Investment Strategy**: it's time to open the books to allow residents to see what Corde is costing us. What competitive tenders have been let? How do their charges compare to other providers? SDC claims Corde is profitable, but if that comes from ratepayers paying for uncompetitive pricing, then the claim is false.
Staff Recommendation	That the submission is acknowledged by Council.

Submitter Number:	1252	**Submitter:**	Helena Cridge for Kirwee Tennis Association

Organisation:	Kirwee Tennis Association
Point Number	1252.3
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	Dear Councillors I am writing on behalf of the Kirwee Tennis Club Assn in regards to our tennis court upgrade. I have sought information on who owns the courts where the council owns the land but we own the improvements and are responsible for the upkeep of the tennis courts. It is a great facility and well used by the community and is the Malvern Head Quarters of Tennis as all Malvern meetings and trophies are kept there and tournaments from other areas such as Ellesmere, North Canterbury and Ashburton use these courts as we have six and its central location is the main draw card. We would like to upgrade these courts in the near future and wondered if it was a possibility of the council perhaps contributing towards the cost of this as there are four courts that need upgrading. This will costs a significant amount and the club has some money set aside but it would be great if the council were able to contribute in some way to the cost of this. I don't have a quote. At the moment four courts sit lower than the other two courts and it would be good to have them all levelled off to reduce the damage caused by tree roots. However there could be other ways around this. Please consider this application in line with other courts that you have upgraded in the district. Many thanks Helena Cridge
Staff Recommendation	The submission is acknowledged by Council. The majority of courts provided across the district are owned and maintained by Council (installed by the various reserve committees) but in some cases the courts are club owned and located on Council land under a lease agreement (as is the case with Kirwee Tennis Club). There are also some courts owned by clubs and built on their own land (e.g. Southbridge, Leeston). This situation does provide a level of inequity and a quandary in terms of availability to funding support. Council has undertaken minor repairs to the court surface at Kirwee due to root damage from shelter trees. Staff are of the view that a pool of grant funding for this type of assistance could be a way forward in the future to enable a contribution to be made. It is noted that the existing Selwyn Community Fund has limited funds available for this type of application (up to $5,000 per applicant). In this case the cost of the work needs to be fully understood as well as the amount of funding that the club has to contribute to the work. It is suggested

	that this request is deferred until further information is available and a clear policy on support for this type of application is considered.

Point Number	1253.2		
Category	Activity > Other Categories identified by Staff > Community funding /grants		
Comments:	The second matter I wish to deal with is also close to my heart. I am a board member of the Orana Wildlife Trust - my membership I believe reflects my ongoing commitment, expertise and science and research contributions to Aotearoa NZ's native biodiversity. In this regard I am extremely proud of the work the Trust does to deliver conservation for a range of threatened and at-risk native NZ bird species, but also in situ conservation for native lizards, terrestrial invertebrates and plant species. Indeed, Orana Wildlife Park is considered by the Regional Council to be a biodiversity hotspot, and this recognition helped lead to a very significant Jobs for Nature programme and cooperation with Environment Canterbury and others. So, along with the large range of exotic species for which the Park is extremely well known, nationally and indeed internationally, sits its complementary role in helping safeguard NZ's own biodiversity. And combining all of these elements, which incidentally but importantly, sit on the doorstep of the District, is the fact that the Park is an in-demand local visitor and tourist destination, with upwards of 200,000 visits annually – little surprise then that many Selwyn residents make this visit and enjoy this incredible resource. It is within the above context that I raise my second idea, i.e., strong support for the Orana Wildlife Trust’s submission seeking ongoing operational funding support for the Park. While a new member of the Board I have been enormously impressed by the Trust’s approach to Park management including from a funding perspective. To say that they have left no stone unturned would be a huge understatement. They obtain all of their capital development funding from external sources and until recently have been able to cover operational needs through entrance fees and related sources. But this latter position is increasingly no longer tenable – entrance fees are now considered		

	to be at a level where any further price hike would be counter productive and inflationary pressures have meant running costs simply cannot be covered without other support. This is where Waikirikiri Selwyn and neighbouring councils can help, and in my view should. The Trust certainly understands the financial 'hole' that faces almost all councils. In this regard they have suggested a phased on-going funding contribution, and one that is shared with other councils – this phased approach reflects the very difficult position that councils find themselves in during the next rating year, with hopefully relatively more comfortable positions emerging thereafter. It also reflects reasonableness and realism, contributing only an estimated $7-8 pr year to rate-payer bills while delivering enormously to the District in multiple ways.
Staff Recommendation	The submitter's support for the submission from Orana Wildlife Park is acknowledged.
Point Number	1253.3
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	To begin, a little personal background - I was born in Darfield but spent my formative years in Windwhistle. I then left Waikirikiri Selwyn but returned to live in Prebbleton around 18 years ago. I have maintained however a lifelong interest in the district - I am for example a member of the Waihora Ellesmere Trust and have been so since its inception. I belong to a number of other boards and society committees. In this submission I want to raise two ideas, both of which concern our native biodiversity (and I have submitted previously on the District's draft biodiversity strategy). The first idea I wish to make concerns the District's native biodiversity as envisaged within the 4 well-being statements on p15 of the consultation document. I would like stronger wording around native biodiversity in the urban and peri-urban environments of the District where our 'nativeness' is mostly invisible and overwhelmed still by exotic plantings. To me this is indicative of the divide occurring between urban dwellers who are increasingly disconnected from the natural environment, and natural biodiversity which occurs elsewhere. We have a native ngahere on our small property and increasingly we are seeing native bird species - the District needs to increase initiatives in this space including with water races and sub-divisions (Ngai Tahu Property developments in Lincoln being a

	hugely notable example of what is possible, what is needed and what can be delivered). I would suggest a subtle change in wording to the environmental well-being intent with a 4th indicator, namely, proportion of urban and peri-urban environments with native biodiversity plantings and habitats. This surely is achievable and absolutely necessary, and should be relatively cost neutral to rate-payers?
Staff Recommendation	Council recognizes the need to increase native plantings in the urban and peri-urban environments and will be guided by the NPS-IB targets and the Regional Council in this regard. As such Council has also set associated Goals, Targets, and Actions in its draft Selwyn Biodiversity Strategy to help guide related initiatives in the future.

Point Number	1254.6
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	In the current financial climate I think any new projects or up-grading exist infrastructure should be put on hold. Any new spending by council should be for safety reasons only
Staff Recommendation	That the submission is acknowledged by Council.

Submitter Number:	1255	**Submitter:**	Bruce Cochrane
Point Number	1255.1		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.		

	Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** I support Leeston Community Committee's submission to the LTP to build a multi-use Community Centre adjacent to Leeston Park. This facility should incorporate space for storeage, have purpose built kitchen and bar facilities, be capable of handling a funtion of up to 300 persons, emergency management, designed for future expansion and changing requirements for a rapidly growing Ellesmere District. Our consultants have produced a progressive town plan which I would hope will be included in future development. I believe that a new or upgraded Library/Educational facility should remain on the Anderson Square site. I attended the recent Public Meeting regarding a Community space and believe this to be in line with public sentiment expressed at that meeting. Uses for the new building could include facilities for emergency services and management, Community meetings, youth avtivities,trade promotions, weddings and funerals, service club activities, SDC functiions and activities, future sports activities etc
Staff Recommendation	The submission is acknowledged. Council staff consider that there are significant efficiencies and increased benefits to be made in ongoing operational costs and usage if facilities are multi-purpose / multi-functional, where that makes sense to do so.

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29

Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	hello, My comments are about the Upper Selwyn Huts (USH) 1. Historical value		

The Mayor says in the Long Term Plan that "we're focussed on looking after what we already have" - how about you look after us!
An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council unanimously determined that 'Hut licences and subsequent renewals are short term and ultimately for a finite period' . At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts.
We need to submit requesting this historical significance be recognised and for the Selwyn Huts to be listed as an historical site on the District Plan and for the term for us being here to be extended to protect this history.
2. District wide rates
Everyone needs to submit on the LTP asking for us to be put on DWR for Water and Sewer.
The reasons being :
(a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequant upgrade, the requirement we were told for being put on DWR.
(b) We have already paid for the water upgrade.
(c) We should not be discriminated against and should be treated like everyone else in the district.
(d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We should also be added to the DWR for Sewer and Water like everyone else.
(e) Towards25 LTP Document stated:
"The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities."

	This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table. From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston. (f) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community." (g) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Sekwyn Huts Future Occupancy Strategy" report dated 04/03/2024. (h) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners. (i) Additionally we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	To the Selwyn District Councillors, I wish to oppose two of your recent decisions regarding the Upper Selwyn Huts. The first is the charge for connection to the new sewer pipeline; the second is the closing of the village in 2039. Regarding the sewer, this community installed, and paid for its own sewer as far back as the 1920's. Granted, it is no longer fit for purpose, but for 100 years this treatment system served a purpose, and, this is my main point, relieved the council of the responsibility and expense of providing something similar. For the council to now turn around and ask 100 mainly low income households to stump up even 30% of the cost of the upgrade is not only patently unfair, but ungrateful. The cost of the upgrade should be spread across the entire district, in the same way an improvement to a library or sports facility would be. This seems especially obvious when one considers that the leases for occupying the huts will end in 15 years. The council is asking the residents to pay for something which will be used long after they have been evicted from their homes. This is wrong. Moreover, a yearly rates/fees/sewer combined cost of nearly $5,000 is far too much for most people. It makes us think the council's agenda is more about lower class socioeconomic cleansing than supposed climate change.

	But it brings me to the next point. The reasons for the 15 year lease are neither compelling nor clear, but seem to centre around climate change and consequent sea level rise. The council's own modelling, however, shows sea level rise will not be a problem for at least 25 years. And this is modelling. Given that modelling can be wrong (either way), surely it would be fairer to let nature, and the market, decide. If the lake level threatens the settlement, people will move. If they don't THEN is the time to signal the ending of the leases. It's not something that will happen overnight, like an earthquake. There will be plenty of warning. Everyone at the huts will be severely financially affected by your 15 year closure. The retired people cannot afford to rent; the young folk have lost value from their houses. Given the problems of homelessness in this country I cannot see how your 15 year lease fits with the image of "consultation" and "listening" you promote on your website. A 30 year lease would significantly relieve the stress and tension which has arisen since your announcement, while still acknowledging your concerns around climate change. It would not not be a big change for ten councillors, but it wouid make a huge difference to 100 residents. Colin McCulloch 98 Billens Ave Selwyn Huts

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01		

	Funding: Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** The current proposal for Whata Rau does not meet the community needs. I support the concept of a Multi-Use Community Event Centre based at Leeston Park. The community needs a meeting place that will cater for multiple activities including sport, arts, tournaments, community events, and social gatherings etc. A facility of this nature would bring much needed life to Leeston Park and the greater Leeston Community. Incorporating a library in this space would compromise the activities that could be held in a facility of this nature, negating some of the opportunities for genuine multi-use. Furthermore, The best location for a Library in Leeston is where it is currently situated. It is close to the primary school, is away from a heavy traffic bypass, and connects well to the Main Street. This is a great opportunity for the community to build a greater connection and partnership with Council in order to deliver fantastic outcome that will serve generations to come.
Staff Recommendation	The submission is acknowledged. Operational aspects of a combined use facility have been considered in relation to this matter. Council staff consider that there are significant efficiencies and increased benefits to be made in ongoing operational costs and usage if facilities are multi-purpose / multi-functional, where that makes sense to do so.

Comments:	I would like to support a submission from Rolleston Squash Facility Development Group to build a new squash facility in Rolleston. This is an amazing sport, that's suitable for most people, including children and older residents. It's a very social sport that is gaining popularity nationally and internationally. The sport is splayed all year around and recently got included in the Olympics 2028. A few well-known squash players are from New Zealand and the next NZ Open will be held in Christchurch. Also, as something you might know, there is a huge international database (https://squashlevels.com/player_detail?player=410205&show=last10) of graded squash players (all levels) around the world, and none of the other sports have anything similar. This is another evidence that this sport is popular and growing! Currently, the closest squash courts to go to are in Lincoln, but the facility is a part of Lincoln University, and is not suitable for social gatherings, bringing the kids etc. I am personally, a member of Christchurch and Richmond clubs, as they have great facilities and a junior program. I have two kids who love playing, which means, I have to travel a few times per week for at least 30 min one way to be able to play or give the kids the opportunity to learn squash with other players. I also know that many Rolleston residents would love to play, but its too difficult, expensive, and time-consuming to commute to Chch only to play squash. I would love to be able to live locally without the need to travel too far too often, as this would save the planet, money and time. This would also give an opportunity for my kids to enjoy this great sport! Valentyna
Staff Recommendation	Staff recommend that the submission is acknowledged but the funding requested is not approved. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input, Squash being one of them. Staff note that existing facility utilisation has not been outlined in the submission. Staff recommend that this facility be included as part of a wider community facility funding and planning project.

Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Point Number	1263.2		
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities		
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a share Hub/Clubrooms built at the proposed new Tennis & Netball facilities based in West Melton. West Melton Tennis & Netball share the vision to provide an inclusive, nurturing & welcoming community focused environment to develop players of all ages, creating longevity for the clubs & community. What we are asking for is a hub to bring our community together to create a sustainable future of tennis & netball but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the		

	following. Tennis nets, tennis poles, tennis balls/trolleys, netball balls, gear bags, hoops & training equipment. The space would require a kitchenette suitable for making tea & coffee and afternoon tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is*

	earthquake prone and will likely need further significant upgrades to be used from 2035 onwards. **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** Repair existing library and service centre in order to minimise currents costs to ratepayers and prevent massive rates increases.
Staff Recommendation	The submission is acknowledged.
Point Number	1265.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do nothing. Use the existing park facilities and remove or replace old and unsafe items in the park. **Project cost:** Year 1: $143,000 **Estimated impact on rates:** Included in our current rates **Funding:** Rates: 100% **Comment:** SDC ideas for Leeston Park currently exceed its ability to pay for it out of rates income. SDC needs to reduce expenditure drastically and vastly reduce proposed rates increases.

Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1
Point Number	1265.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:** A sports facility at Darfield is not a necessity - when ratepayers are being asked to pay 16%+ rates increases.
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	1265.5
Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our

	services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1265.7
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Refurbish pool and resolve land stability and ownership issues.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1265.8
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	SDC proposal to pay $9M over 10 years to support economic development with Selwyn businesses. I object to SDC spending any of this money. This is not SDC core function.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and holds a view that Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	1265.9
Category	Activity > Chlorination
Comments:	I object to continued chlorination of Selwyn water supplies, as it is not SDC's place to put chemicals in water supplies.
Staff Recommendation	Under the Drinking Water Quality Assurance Rules there is a requirement to add a small dose of chlorine to the piped network

	after treatment. To be able to move to intermittent chlorination (for eligible schemes) an exemption from Taumata Arowai is required. Exemption will only be granted by the regulator if infrastructure and systems can lower risk sufficiently. Having obtained an exemption for Rakaia Huts, Council has sought independent advice on the infrastructure upgrades required to obtain exemptions for 17 potentially eligible schemes. Without continuous chlorination, additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1265.10
Category	Activity > Potential Requirements To Fluoridate
Comments:	I object to any fluoridation of any water supplies now or in the future. It is not SDC or Government's place to drug people via water supplies.
Staff Recommendation	The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health
Point Number	1265.11
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	NZTA transport requirements: SDC's proposal to spend $19M on roading needs revising, and cut down down massively.
Staff Recommendation	Staff do not support the submission because neglecting road repairs and maintenance causes increased maintenance and repair costs in future years.
Point Number	1265.12

Category	Activity > Lincoln Town Centre Upgrades
Comments:	
	Lincoln Town Centre upgrades: I object to the proposed cost of doing these upgrades (for parking and other).
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1265.13
Category	Activity > Walking and cycling improvements
Comments:	
	Rural Walking and Cycling upgrades: I object to any further expenditure (including feasibility studies) on improvements that ratepayers are expected to foot the bill for.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1265.14
Category	Activity > Planning Further Community Facilities
Comments:	
	Spending on proposed community facilities in Prebbleton, South-west Rolleston and re-development of Rolleston Community Centre should not proceed until SDC has more money or has downgraded proposed plans.
Staff Recommendation	The submission is acknowledged.
Point Number	1265.15
Category	Activity > Council's Office Improvements
Comments:	I fail to see how SDC Rolleston Office needs improvements and object to paying for these. The SDC building is relatively new and shouldn't need "upgrading" at this time.

Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	1265.16
Category	Activity > Strategic Investment Strategy
Comments:	SDC Investment strategy: is not imho a core function.
Staff Recommendation	That the submission is acknowledged by Council. Council's strategic investments are based around building a strategy that will meet the needs of our communities and our businesses to thrive in the medium to long-term period.
Point Number	1265.17
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	Water and Wastewater: I object to all upgrades.
Staff Recommendation	The submitters comment is acknowledged. Staff recommendation is to proceed with the 5 waters capital programme as proposed in the LTP.
Point Number	1265.18
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	Transportation: I strongly object to the widening of Ellesmere Road from Edward Street to Knights Stream. I live on Ellesmere Road but have had no notification that this is going to occur of the cost to ratepayers.
Staff Recommendation	Staff do not support the submission because Widening of Ellesmere Road is necessary to handle increase in traffic between Lincoln and Christchurch.

Point Number	1265.19
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	With regards to listening to Climate Change - I believe the science is not settled.
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions.
Point Number	1265.20
Category	Activity > Other Categories identified by Staff > Debt Levels
Comments:	SDC proposes to borrow significantly more than they will receive in rates in a year. I object to this.
Staff Recommendation	That the submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.
Point Number	1265.21
Category	Activity > Other Categories identified by Staff > Rates
Comments:	RATES LEVELS AND LIMITS: I oppose to SDC planned rates increases of approx 16% for the 4 years, then approx 10% increase for the remaining 6 years. Rates are forecast to double in 10 years. This is far too much of an increase for ratepayers to bear.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1265.22

Category	Activity > Other Categories identified by Staff > Financial management
Comments:	In summary, SDC needs to cut out, and cut back many of the proposed building works e.g. Lincoln Township upgrades, Leeston Library and park, and Darfield township building programmes. Currently SDC cannot afford to do these and ratepayers shouldn't be anticipating 16%+ rates increases.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and the negative impact that the increased cost of living is having on the public. The Council also acknowledges that this trend is not only limited to New Zealand, but is widely spread in many other countries worldwide. The Council endeavours to keep rates increases to a minimum and continue to proactively look for opportunities to minimise costs.

Submitter Number:	1266	**Submitter:**	Shannon Nuttall for Aurora Dance Studio
Organisation:	Aurora Dance Studio		
Point Number	1266.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None		

	Estimated impact on rates: To be determined **Funding:** To be determined **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP
Point Number	1266.3
Category	Activity > Planning Further Community Facilities
Comments:	My name is Shannon Nuttall and I run local Dance Studio Aurora Dance Studio. I would like to bring to your attention how impactful having a purpose built performing arts space in the Selwyn District would be. We currently hold our whole dance school end of year show in the Rolleston College theatre space, it is a lovely space but unfortunately it is no longer a suitable size for the size of our studio. We have over 200 students that attend our lessons from Monday to Saturday. As you can imagine organising a show of this size is a huge undertaking, we are having to triple cast our shows as the College has little to no backstage area or dressing rooms and we simply cannot fit our dancers in this space. We have also needed to perform over 2 or 3 days to give all of our dancers young and old a chance to shine on stage. We would love to put on more shows for our community but finding and booking performance space is really hard, the College is great but dates are tight as it is the only space currently available. Performing arts is such a valuable activity for children to experience, as it grows their confidence and that translates to all areas of their lives. Please consider the request to add a performance space into our community in the future. Thank you for your time
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.

Submitter Number:	1267	**Submitter:**	David Baumbach
Point Number	1267.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:** I don't think we can rely on the central government to fund this (although they should help).		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council		
Point Number	1267.2		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake		

	prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**

Comments:	re the Development Contributions Policy, I believe that there is definitely an important need for further enhancement & / or development of local facilities, however from what I see, the biggest part that seems to be missed is a contribution to town planning and local infrastructure. These towns that have multiple developments happening are no doubt great for Selwyn long term, but the towns are struggling to keep up with the growth (often not designed for the amount of traffic), and the roads are often in disrepair. Its all very well having development contributions for facilities and the infrastructure around them, but the long-term bigger picture is getting missed in the process.
Staff Recommendation	Submission is acknowledged by Council and support for enhancement of community facilities is noted. Council does include programmes for upgrading existing infrastructure in townships and where this can, in part, be attributed to growth a portion of costs may be funded from development contributions. Examples include Rolleston and Lincoln Town Centre development.

Comments:	**Comment:**

	Living in Darfield, I appreciate that it would be fantastic to have a new sports facility with indoor courts., and I am generally in support of the idea. I am however, extremely concerned that this is a knee jerk reaction to a need to spend funds in our district and believe that further discussion and analysis should be done before such an expensive commitment is made. The projected growth in Darfield is big enough to warrant further investigation. For example, who will be the end uses? Would it be a stand-alone structure and not enhance the single event capacity of the existing building? Can the extended use justify the cost? Will it be of practical use? ie - if you are going to the expense, then would a single court be enough? And if not, then is it too expensive to do 2? And therefore, should it be postponed? The recent pool developments have made me question the thought processes behind such decisions. For example, while the pool needed an upgrade, was it necessary to such an extent for the regular kids who frequent it at the weekend, while forgetting the local schools & swim schools requirements who are the most regular of users?
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility.

Comments:	Selwyn need to build a squash court.

	Poipatu Waikirikiri. Would be a valuable asset for the comminity and internationally for all new zealanders its a sport that's suitable for all ages, increases strength fitness cardio vascular health. Coordination the list goes on its inside so played all year round. Personally I moved to an area where i didnt know anyone, joined the local squash club with a friend 18years later Im still playing and have made so many positive connections with people that I would otherwise have never met. Nga mihi
Staff Recommendation	Staff recommend that the submission is acknowledged but the funding requested is not approved. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input, Squash being one of them. Staff note that existing facility utilisation has not been outlined in the submission. Staff recommend that this facility be included as part of a wider community facility funding and planning project.

Comments:	Please hand the pool back to the community to run, support and manage?

Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Category	Activity > Planning Further Community Facilities
Comments:	I notice that you have a proposed community facility for Prebbleton. This appears to have been in the previous LTP but seems to have been deferred? Currently there is no council facility (other than the Cottage, which although nice, is not suitable for anything other than small meetings/gatherings) that can be used for sports, or a space that the council have holiday programme activities (in the last school holidays their was nothing in your booklet that a Prebbleton parent could walk their child to). A community needs a centre or hub to build community spirit and connectiveness. The hub I am envisioning should be purpose built so that there are some indoor sporting facilities, some meeting rooms/spaces that could be used for art/drama too, some dedicated rooms for historical society/geneology type groups. I am more than happy to be on a

	planning committee or help with the process but I worry that by continually putting this project off we are not only loosing a location centrally for it to be located (walking distance for those young and old reduces the carbon footprint and will increase the facilities use) but prices are never going to be cheaper. We need a purpose built space to connect as a community for everyones social, and health wellbeing.
Staff Recommendation	The submission is acknowledged. Plans for a new Prebbleton Community Centre are still included in the current Long-Term Plan.

	Our budgeted option **Comment:** Current library/service centre leaks, smells, and looks unsafe. I don't know how the staff put up with it. Libraries with the supplementary services e.g. Heartlands are critical for service towns. They are meeting points for various groups and a welcome respite for parents due to the wide range of services there, including WiFi. Often people who complain about a resource such as this don't actually use it and have no idea what fantastic services are available there. I regularly see people getting job applications photocopied, being helped with smartphone issues, paying dog and rate fees. Without this valuable resource people would have to travel to Lincoln or Rolleston - if they had transport. Build it please.
Staff Recommendation	The submission is acknowledged.

Comments:	You need technology that is current, reliable, and usable.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1276.9
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	Have no particular view either way..
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1276.10
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	The quality of some of the repairs is dubious and the regularity of some of the parks/reserve maintenance seems ad hoc. Contractors make a lot of money from councils from this type of work.
Staff Recommendation	The submission is acknowledged by Council. Maintenance works are undertaken by the contractor in accordance with contract specifications and are subject to independent audit. Any specific instances of work that is not to standard can be reported to Council staff via the service request system and the matter addressed with the contractor.
Point Number	1276.11
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	The cost of supporting infrastructure is crippling; roads and parks particularly. Has council examined the possibility of actually employing a team, or teams, to better react to low level infrastructure issues like the plethora of road repairs that seem to constantly drain Selwyn's coffers? Could you look at having our own teams to do this work, perhaps in conjunction with Ashburton or Waimakariri councils? I think it's worth pursuing.

	Thanks you for the opportunity.
Staff Recommendation	Submission is acknowledged by Council. NZTA's funding (51% subsidy) is dependent on tendering road maintenance activity to the public and SDC picking a competent Contractor (based on price and experience) to maintain and improve our roads.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29

	2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**

	Question: Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1277.6
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	See attached
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Comments:	To whom it may concern, I am writing to express my wholehearted support for the retention of a pool facility and to highlight the invaluable benefits that rural facilities like this bring to our community. Sheffield Pool serves as a vital hub for our community, providing a space for families, friends and individuals to engage i recreational activities, fostering a sense of camaraderie and unity, Its presence

	will contribute significantly to overall wellbeing of our residents, both physically and socially. On rural areas, access to recreational facilities is often limited making Sheffield pool an essential asset. It not only promotes a healthy exercise lifestyle by offering a place for exercise and relaxation but also acts as a catalyst for community integration. In rural settings, these facilities play a crucial part on reducing isolation and ensure that residents have a place to connect and build relationships. Furthermore, Sheffield Pool serves as an educational resource, offering swimming lessons and water safety programmes that are particularly beneficial for families in rural areas where natural bodies of water are a particular hazard. With the retention of a swimming facility, the Sheffield School Board of Trustees demonstrates a commitment to the well-rounded development and safety of lur community members, especially our children. I urge you to support the Sheffield Board of Trustees in retaining a pool facility in the area, recognizing its role in enhancing the quality of life for the resident sand contributing to the unique fabric of our rural community. your support for this facility will undoubtedly have far reaching positive effects for generations to come. I dean Glassey support the retention of a swimming facility for the wider Sheffield community. I support A Community entity to take ownership, repair and maintain the existing Sheffield Memorial pool. The build of a new facility on the Sheffield Contributing School Grounds signed Dean Glassey date 29/04/24 thank you for yout tiem, consiuderayoion and decication to the betterment of our community

Comments:	Refer to powerpoint attachment on climate change		
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions.

Comments:	See submission attachments for maps etc

Good morning
I am not sure the LTP submission form suits our submission and was then told to put our submission forward in an email
As we are all aware, as our youth get older we need to keep them positively engaged in their community and in turn helps grow stronger communities
As they either grow out of the regular mainstream sports they are looking for something else to fill their time with or if they do not fit into traditional sports, they can become troublesome and disruptive at a younger age which then has more negative impact on our communities.

Our sports club offers a space that helps youth that do not fit into traditional sports and also those growing out of the regular mainstream sports and looking for something else, whilst help keeping them engaged and a positive part of the community.

Our sports club is looking for a home field in the Selwyn district area
We offer an alternative sport for those youth growing out of the regular mainstream sports.
We have all the equipment, including scrim (safety netting to contain the gel balls and keep the public safe).
We have over 20 sets of gear that we lend out to new and junior players, so they do not feel they have to purchase gear to try this sport.
plus our club players also lend out their personal gear to new players
We are really just looking for a small piece of land that we are able to grow our sport from

Just a little background on our sports club that may be helpful.
Our club is very serious about the safety of not only our members but also the safety of the public.
Over 10 years ago, our club set the safety standard for the South Island clubs, commercial operators, and events.
I have organized and run many large events throughout the South Island over the years, including the 30th anniversary of paintball in NZ event, which was the largest paintball event the South Island has ever had.

We work with site specific health and safety plans for every site, and this is strictly adhered to.
We are wanting to bring the competitive sport of paintball to the public as a spectator sport (as it is around the world) and as a sport that the public can be involved in.
It is not only Stag do's and birthday parties. I have been playing competitively in NZ for over 20 years, and Canterbury has been producing very competitive teams for much longer than that.

We are looking for either a tree/bush type area similar to 43°33'43.0"S 172°27'37.5"E - Google Maps (Waterholes Rd/ Main South Rd) for our recreational players, woodsball league and events (We would not require the whole block which gives plenty of buffer for safe zones on all four sides)an old gravel pit (the likes of Robbinson's Rd gravel pit) or paddock area that we

could build a scenario field for our recreational players and for training our competitive players.
and or a small sports field(50m x 50m would be great) that we can train our next generation of competitive tournament players and to hold South Island tournaments from.

use this space at the end of the rugby field (similar to 43°31'34.8"S 172°22'00.2"E - Google Maps This has very tall dense tree lines on two sides and would be real easy for us to run safety scrim netting to enclose the field of play on the other two sides giving safe zone for spectators and there are plenty of public toilets etc within the reserve

My personal focus is to grow the junior and youth side of our club and I feel the Selwyn District youth could benefit hugely along the way with such an exciting sport for them to come into if they do not fit into traditional sports or as they grow out of the regular mainstream sports.
In return helping with fund raising opportunities to support local youth groups, schools, sports clubs etc while giving local youth a new focus and also to encourage them to give back to their community
Whilst the sport is called paintball the balls are not actually paint
The balls that we use throughout New Zealand have an outer shell made from gelatin which contains a vegetable based, non-toxic water-soluble fill.
The "Gelballs" nowadays are made of materials found in food items, and are actually edible incase some of the fill does manage to get into someone mouth (although to incredibly tasty)
Completely biodegradable. Water-soluble and the outer shell will start to break down in contact with even just a light dew
Our markers run on air not CO2 so no flammable gasses onsite

with regards

Richard Johnson

Paintball Canterbury
Sport ambassador - Youth development!

Vice President - *Rebel Paintball Group Incorporated*

Staff Recommendation	Staff support the submission in terms of assisting the club to find a suitable space for the paintball activity. Council has a number of potential sites that could be suitable for this activity. This includes former gravel pits and forestry blocks that could provide a safe venue for paintball. Staff recommend that potential locations for the paintball activity are assessed and explored in consultation with the Rebel Paintball Club.

Submitter Number:	1281	**Submitter:**	Renée Habluetzel
Point Number	1281.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:** I am not sure about what is best but do not want to see delays stop work on getting better public transport
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council
Point Number	1281.3
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	**Arthur's Pass Visitor Centre** - I would like to see council support the refurbishment of the DOC Arthur's Pass Visitor Centre otherwise known as Park HQ. I understand council is not keen to provide funding but other support could be offered that would be useful. The SDC Heritage Team have been a wonderful support to the Arthur's Pass community helping with the Otira Tunnel centenary and assisting in protecting what remains inside Park HQ. We would like to have more help to continue the work that will need to be done with interpretation when the Visitor Centre is refurbished. - We are more hopeful that the building will be earthquake strengthened and refurbished after meeting with the DOC project manager in April. Work on the dbc begins in September. - A refurbished Arthur's Pass Visitor Centre is the closest thing the Selwyn District will have to a Museum or similar facility, on this basis council needs to do what it can to make it happen - Arthur's Pass National Park (APNP) is the Selwyn District's only National Park, this needs to have a much bigger profile than just using images of mountains and kea. A story needs to go with the

	images about how to protect our National Park and our taonga species like kea.
Staff Recommendation	The submitters points are noted - of particular interest is the point about DOC plans to begin strengthening and refurbishment of the visitor's centre as the Selwyn Strategic Heritage Plan 2023-27 includes an action to engage with DOC about their plans for the visitor facilities at Arthus Pass. This information will be forwarded to the relevant Council team to inform next steps. The point regarding story telling in relation to Arthurs Pass National Park and taonga species is noted and has been forwarded to the relevant Council staff for consideration.
Point Number	1281.4
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	**Biodiversity** - Arthur's Pass village needs a kea feeding by law, making it an offence to feed kea. Kea are Nationally Threatened, the next step is heading toward extinction. We also need a 30km speed limit to protect kea from being hit by cars. - More acknowledgement of all the work happening in APNP, there is alot of work with Whio, Kākāriki karaka happening. These are all things locals need to value in their area.
Staff Recommendation	Councill environmental staff are working hard to reverse the decline in our native species across the district. They recognize that kea protection efforts need to be supported and focused, and as such staff are engaging with stakeholders regarding the kea feeding bylaw proposal. It is important that funding is available to support other indigenous biodiversity projects.
Point Number	1281.6
Category	Activity > Other Categories identified by Staff > Emergency management

Comments:	**Civil Defense** In the past ParkHQ was used as the Civil Defense base and would love to see the Civil Defense and Community Response team work from the building again. Since the closure of the building CRT has had to store equipment at various places in the village. We need a permanent base so we can be prepared for AF8.
Staff Recommendation	*The submission is acknowledged. The use of the Park HQ in Arthurs Pass is a Department of Conversation decision but if it was safe and possible we would support the use of this facility by the Arthurs pass community. Staff recommend that the Emergency Management Team continue to work with the CRT in AP.*

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1282.6
Category	Activity > Chlorination
Comments:	Leave the water alone, stop chlorination
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1282.7
Category	Activity > Council's Office Improvements
Comments:	no money spent on council building upgrades.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.

Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1.

	Build a community recreation and sports facility at Darfield that includes one indoor court. **Project cost:** Year 3: $7.07 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $5.97 million) **Estimated impact on rates (per year):** $11.67 **Funding:** Rates: 57% Development contributions: 43% * Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the submitter has selected Option 2, build the community recreation and sports facility at Darfield that includes one indoor court.
Point Number	1283.5
Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the continued development of an economic development strategy? Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1283.7
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	I beleive there is a huge need for a purpose built facility for gymastics. Ths is a fundamental activity for all sports adn there is no suitable building available in Selwyn. Affinity Gymnatics Academy hold classes for more than 800 particpants and also school groups

	from selwyn and special needs groups from Rolleston every day and are struggling with the commerical not fit for purpose building that they are currently in. The council agreed to vuild in the last LTP, however, have not moved forward with this or ated on it. I would like to see them build for Afffiniy or provide a land option asap.
Staff Recommendation	The submission is acknowledged. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input. This excludes existing or proposed Council facilities as part of the Long Term Plan. Staff recommend that this facility be included as part of a wider community facility funding and planning project with gymnastics as a potential individual case study along with other facilities such as a performing arts and a military museum or similar to provide a variety of examples.

Point Number	1284.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m

	Estimated impact on rates (per year): $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1284.5
Category	Activity > Lincoln Town Centre Upgrades
Comments:	In my view the Lincoln Town Centre upgrades need to have a higher priority, particularly for safe transport. With PC 69 going through, Lincoln will see a (further) massive period of residential growth. The town centre is already chaotic and dangerous to navigate, particularly for cyclists and pedestrians of all ages. It is quite difficult to navigate from one end of Lincoln to the other - unless you're in a private car

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1284.6
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	. In addition, some of the intersections in the area are seeing increasing frequency of traffic accidents. These intersections should be improved urgently. One example is the Tancreds Rd / Birches Rd intersection where the stop signs are missed or ignored. A rumble strip before these stop signs could help to reduce this issue, at least in the short term.
Staff Recommendation	Submission is acknowledged by Council. Council cannot be held responsible for driver behaviour. We are already implementing safety improvements at intersections, which includes enhanced road marking and larger signs. Other options are being considered.

Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	Save the Selwyn Huts i have lived in my home at the Selwyn Huts since 2013. i have lived here for eleven happy years. I was in Lyttelton and had the opportunity to buy here. I spent all of my savings buying my home (you need to be a cash buyer). I feel proud of my lovely house and i have always felt safe and secure here. My home is warm and dry and it is the first home i have bought. It is full of personality with beautiful tongue and groove walls and ceilings. It has its own personality, its my santuary and like every other place here it is full of history.		

	The thought if it being demolished breaks my heart - what will i do and where will i go? I have no family here and my friends are at the Huts - it is like a family here. When you return it to an 'open space', can I pitch a tent here for myself because that is the only option for me that i can see. There are a lot of bloody good people here and you - the SDC - are causing so much grief, uncertainty and anxiety for us. I thought you were FOR the people but you are not. Save the Selwyn Huts. Why are we not going to be included on the district wide rate? That is not ffair to discriminate against us when you let all the other towns be on this.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Comments:	My name is Nikau and I am a kid at the Selwyn Huts. I love living here because I have lots of friends here and my mum and papa have lots of friends. It is like everyone is our family. My grandma lives here and I love to see her every single day. I am really sad that you don't want us to live here anymore. It is a great place to live and I always feel very safe because I know everyone is looking out for me. Maybe if you visit us and get to know what it is like here then you will change your mind. Since you said we can't live here anymore everyone is sad. It makes me feel even more sad and I cry a lot. My mum cries all the time. She is always scared about not		

having money and sometimes when I ask her to buy me something she says no because you are making us pay more money for our toilets. This isnt fair because other people dont have to pay more. They all pay the same. We should pay the same too. If everybody shares then it is only a little bit. We were going to go on a holiday to visit my papas marae at christmas but now we arent going to go because it will cost too much money. My papa also says no when I ask to go to the dairy or buy extra things at the shop. I am not going to get as much pocket money any more and that is ok but it will take me a really long time to save for a new bike. Please think about it and let us stay and dont make us pay lots of money. This place is very special and it is making everybody sad that it will be gone

(1) HISTORICAL VALUE

An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council unanimously determined that 'Hut licences and subsequent renewals are short term and ultimately for a finite period' . At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts.

Put the Selwyn Huts on the DWR. The reasons being

(a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer system twice before, the requirement for being put on DWR.

(b) We have already paid for the water upgrade in 2018

(c) We should not be discriminated against and should be treated like everyone else in the district.

(d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We should also be added to the DWR for Sewer and Water like everyone else.

	(e) Towards25 LTP Document stated: "The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities." This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table. From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston. (f) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community." (g) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Selwyn Huts Future Occupancy Strategy" report dated 04/03/2024. It. Is. The. Right. Thing. To. Do !!!! Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else. Additionally we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989. It is not our fault that you have dropped the ball and neglected us

Comments:	It makes me really angry to hear about the way this council is treating the Selwyn Huts. This place has historical significance and should be recognised and protected. Let the residents stay, they are the kaitiaki and will help preserve our New Zealand history!! Let them go on the District Wide Rate. It's bad enough what you are doing to them, evicting them with no compensation, and then you're increasing their fees by over 200%!!! They are part of the district. Put them on the District Wide Rates.		
Staff Recommendation	Staff acknowledge this submission. Comments:	I have cried for the people of the selwyn huts, hearing their stories. I have happy memories of this place and would hate to see it all burned to the ground. Sick!!!! Change your mind!! let them stay!!! with an agreement that they will go when it is actually not safe anymore. thats totally reasonable for them to ask that. and pay them out when its not!!!!!! I live in the district and i for one would be happy to pay a little extra on my rates for their sewer and water. i am moving to leeston soon, they will be paying for mine. its only fair and what the district wide rate is all about!!!!!
Staff Recommendation	Staff acknowledge this submission. Point Number	1289.2		
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities		
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a share Hub/Clubrooms built at the		

	proposed new Tennis & Netball facilities based in West Melton. West Melton Tennis & Netball share the vision to provide an inclusive, nurturing & welcoming community focused environment to develop players of all ages, creating longevity for the clubs & community. What we are asking for is a hub to bring our community together to create a sustainable future of tennis & netball but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Tennis nets, tennis poles, tennis balls/trolleys, netball balls, gear bags, hoops & training equipment. The space would require a kitchenette suitable for making tea & coffee and afternoon tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Comments:	Selwyn partnering network Strategic partnership Our projects for the coming three years, together with our full strategic plan indicate how Selwyn Parenting Network already undertakes much of the social wellbeing needs that were identified and which have only grown, in all four wards of Selwyn, and we would welcome open discussion on how SDC can benefit from partnering with our ParentinG charity through enhanced delivery of services, access to specialized knowledge, cost efficiency, community engagement and support, increased reach and impact, as well as collaboration and learning opportunities. This partnership can contribute to the councils goals of improving social equity and wellbeing for parents and creating a stronger and more inclusive

	community. In 2021, Sarah Wylie was commissioned by Denise Kidd at SDC to research and evaluate a Social Wellbeing Profile and Response for Selwyn District. Two focus groups were recognised as part of future social wellbeing needs: These were Mental Wellbeing and Supported and Effective Parenting. Our core work and charitable purpose. Given our extensive connections , geographic coverage and targeting group, Selwyn Parenting Network was identified in the report as the “obvious choice” to support and advocate to MSD, MOH and Oranga Tamariki (as appropriate) for additional resourcing as a provider agency – SDC acting as a backbone. In the three years since this report, Social Wellbeing needs of Selwyn have only increased. Over 25% of our population are under 15 years old, however support services for children and young people have only recently begun to establish a presence in our towns. We work with these families, notably their parents. The district has also become far more ethnically diverse in recent years, both in urban and rural areas, and statistic show that the proportion of elderly residents is also increasing. All this change has brought vitality to the district, but it can be hard when every other neighbour is also new to town, most of the working population commutes into Christchurch, and many people are both time- and cash-poor. With one of the main purposes of local government being to improve socal, economic, environmental and cultural wellbeing of residents and communities, we would like to open discussions of a Strategic Partnership/
Staff Recommendation	This request will be considered by Council within the Long Term Plan Deliberations. Strategic Partnerships are part of the Council's Community Funding Programme and any arrangements with groups are generally made for three years, subject to performance and delivery. A submission to Council’s Long-Term Plan process, plus strong alignment with Council’s strategic direction and role is required for consideration for this fund. The activities funded are generally activities that, should they not be delivered, might reasonably be expected to be the responsibility of Council or impact an aspect of the District's wellbeing.

Submission from Hope Presbyterian Network

As representatives of Hope Presbyterian Church Rolleston and West Melton, the Hope Presbyterian Network submits this proposal to the Selwyn District Council's Long-Term Plan

Who We Are:

The Hope Presbyterian network is made up of Hope Presbyterian Church, Te Whare Awhero, Youth Southwest Christchurch, and Hope Funerals. We serve and are actively involved within the Christchurch City Council and Selwyn District Council geographical areas.

With over 20 years of active engagement in the Rolleston and West Melton communities, we have developed hubs in both areas, responding to their growth and evolving needs through a community-led approach. We prioritise collaboration to foster positive outcomes and although we are a faith-based organisation, our experience has shown that this aspect does not hinder community participation in our programs and events. This inclusivity can be largely attributed to the significant role churches and their people played during the Christchurch earthquake recovery. Faith-based organisations, including ours, opened their doors wide to support the community for the greater good—a practice we proudly continue at HOPE in both of our locations in Selwyn and through our associated trusts. We have and continue to be widely embraced by the community.

Addressing Growing Needs: Dana, Mana, and Anika, our paid staff lead teams that cover both Community and Youth portfolios. The paid roles are currently funded through minimal grants. However, this funding model is becoming unsustainable due to the district's rapid growth and increasing needs being identified. We have come this far largely thanks to our dedicated volunteers and our numerous partnerships. However, as we look to the future, it's clear that the growing demands with Selwyn and especially Rolleston are substantial. We see the potential for HOPE to serve as a central community hub, not just in West Melton and Rolleston, but across the district.

Recommendation for Collaboration: With the Selwyn District Council developing key community strategies focused on youth and ageing well, we strongly recommend considering HOPE as a pivotal

community hub and partner to support these strategies proactively. HOPE would ask that the Selwyn District Council invest directly into HOPE as a collaborative partner, like HOPE is investing in the Selwyn communities. With the Piki Amokura and Te Paepae strategies being developed, we believe we can play a part in assisting in leading the development and delivery of services in these areas.

HOPE has a deep understanding of local needs from a community-led perspective and is eager to collaborate more extensively with the Selwyn District Council. Moving forward, we acknowledge that relying solely on volunteer support to address these community issues effectively is no longer feasible. HOPE's primary focus is to support the community's rapid growth to ensure continued thriving through positive, authentic engagement. We would encourage the Selwyn District Council to engage with us further, as we both aim to enhance the well-being of our communities and HOPE needs to do better at partnering with SDC which is why we present our submission.

Current Community Activities: Our current initiatives are made possible through the 7,881 hours of volunteer time by the community and funding from HOPE to enable this to happen. These initiatives include.

Community Engagement

- Op Shop
  - Low costs quality op shop (weekly)
  - Low-cost counselling (weekly - Te Whare Awhero)
  - Developing partnerships with other local agencies.
- Women's Coffee Group
- Prison Chaplaincy
- NZDF Burnham Camp involvement through Chaplaincy.
- Community Markets
- Time for mums (fortnightly)
- Christmas Events
  - Selwyn Carols
  - Carols on Kirrin
  - Christmas Tree Grotto
- Firewood Mission (free firewood to those in need)
- Hope in the Streets
- Mana Ake (Te Whare Awhero)

Elderly Engagement

- Café Connection (monthly)
- Foot Clinic (Monthly)

Youth and Children

- School Holiday programmes
- 24/7 youth workers in schools
- Friday Night Youth
- Alternative Education (Rolleston)
- Top Town (HOPE's model)
- Occasional School lunch programmes

Collaborations and Partnerships: We collaborate extensively with organisations such as Youth Southwest Christchurch, Mana Ake, E Tu Tangata, Moral Compass, Kairos Trust, Te Whare Awhero, Hope Funerals, CDN Trust, and 24/7 Youth to maximise our impact. We are actively exploring collaborations with entities like the Salvation Army and Selwyn Parenting Network to enhance our services and reach.

Emerging Needs and Future Directions: Recent observations highlight a growing demand for family support, evidenced by increased attendance at our new mum's group and multicultural participation in community events. HOPEs on the ground approach means we can easily identify the felt and real needs within the community. To meet evolving needs, we're focused on developing programs for older persons and fostering partnerships aligned with government contracts to support Selwyn residents effectively.

In conclusion, the Hope Presbyterian Network is committed to collaborating with the Selwyn District Council to create a thriving community for all residents. We invite the Council to engage with us further as we work together towards a brighter future as we have significant investment already within this community, and our people are embedded within the life of those who call Selwyn home.

Staff Recommendation	This request will be considered by Council within the Long Term Plan Deliberations.

	Strategic Partnerships are part of the Council's Community Funding Programme and any arrangements with groups are generally made for three years, subject to performance and delivery. A submission to Council's Long-Term Plan process, plus strong alignment with Council's strategic direction and role is required for consideration for this fund. The activities funded are generally activities that, should they not be delivered, might reasonably be expected to be the responsibility of Council or impact an aspect of the District's wellbeing.

Submitter Number:	1292	**Submitter:**	helen stevenson
Point Number	1292.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:**		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP		

Point Number	1292.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** In these tough economic times , fiscal responsibility MUST be implemented - Citizens and Rate payers are having to tighten their belts - SDC MUST do so too !! if Councillors and the Mayor want to keep their jobs !
Staff Recommendation	The submission is acknowledged.
Point Number	1292.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements

Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do nothing. Use the existing park facilities and remove or replace old and unsafe items in the park. **Project cost:** Year 1: $143,000 **Estimated impact on rates:** Included in our current rates **Funding:** Rates: 100% **Comment:** Please see comments above re fiscal responsibility
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1
Point Number	1292.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:** My comments about fiscal responsibility

	continue .. rate payers are NOT cash cows ! What is wrong with driving 20-30 minutes to use an existing facility ? And, stop this out-of-control expansion that is burying food producing land under houses .
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	1292.5
Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1292.8
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	I STRONGLY object to the shockingly wasteful use of rate payers hard earned dollars - eg plantings at West Melton roundabout - not cared for , so replacements needed;; and stupidly dug up later for some extra water/drainage work - all TOTALLY mismanaged use of OUR money ! We budget, nice-to-haves dont happen, it is time the Council started thinking this way !
Staff Recommendation	The submission relates to aspects that are not the Council's responsibility. NZTA built the roundabout and have repaired it at their cost,
Point Number	1292.9

Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	There must be a limit to economic development - our food producing land is VERY finite . Reducing the staffing and salary of same would be helpful - the council must realise that they are there AT THE WILL OF THE PEOPLE !!
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	1292.10
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	THis sounds like "padding" to me - what's wrong with the computers and phones that you have now ??
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1292.11
Category	Activity > Low Nitrate Water Sources
Comments:	In the Selwyn Times May!, 2024 "investigating how to get low nitrate levels at a cost of 5 million" - excuse me, nitrate filters are available , have been for years, and really work - another stupid misuse of money with the mindset that council can spend whatever they want because rate payers will provide !! Council needs to show fiscal responsibility and good management of funds before rate payers will trust them with more ...
Staff Recommendation	The submitters comment about low nitrate water source investigations is acknowledged. Early investigations have shown that

	centralising water sources in locations where low nitrate water is expected near the Waimakariri River is the most viable option. Investigations will include drilling test bores to monitor quality and if feasible continue into concept and detailed design. Staff recommendation is to undertake further investigations into centralised sources of low nitrate water as budgeted in the LTP.

Submitter Number:	1293	**Submitter:**	Renée Habluetzel for Kea Conservation Trust
Organisation:	Kea Conservation Trust		
Point Number	1293.2		
Category	Activity > Other Categories identified by Staff > Bio-diversity		
Comments:	I am attaching the Kea Conservation Trust biodiversity submission from 2023 for consideration to the LTP. The main problem facing kea in our village is access to food which brings them close to the main road where they are often hit by vehicles or brings them into contact with other dangers such as poisons, including lead, or electrical wiring. The nature and risks of keahuman interactions and the fact that these interactions frequently occur on land that is not public conservation land, but is subject to territorial authority regulation (such as local roads, private property and council property) means that the district has a key role to play in kea protection.		
Staff Recommendation	Councill environmental staff are working hard to reverse the decline in our native species across the district. They recognize that kea protection efforts need to be supported and focused, and as such staff are engaging with stakeholders regarding the kea feeding bylaw proposal.		
Point Number	1293.3		
Category	Activity > Other Categories identified by Staff > Bio-diversity		

Comments:	15 th December 2023 The Kea Conservation Trust was set up in 2006 to assist in conservation of wild Kea (Nestor notabilis) in their natural habitat and to increase the husbandry standards and advocacy potential of those Kea held in captive facilities within New Zealand. The Kea Conservation Trust was registered as a charitable entity under the Charities Act 2005 Kea are of particular importance for the Selwyn Biodiversity Strategy because as well as being endangered and iconic they are also active off public conservation land on land that is owned, managed or regulated by Selwyn District including local roads, Selwyn District assets and on private and other land regulated under the District Plan and subject to bylaws. The Trust is a charitable organisation with a strong community focus, which is dedicated to the conservation of kea, one of New Zealand's most charismatic flagship species. We achieve these objectives through partnerships with people and communities to research and raise awareness of kea, their habitat and the unique issues impacting on kea and our fragile NZ mountain ecosystems. We also investigate and initiate practical methods of mitigating impacts through promoting community conservation efforts and collaborating with relevant community groups and stakeholders. 2 This information is disseminated free through our website, Facebook page, email updates to over 500 subscribers and annual reports to members, community talks and presentations, professional conferences and scientific papers, and production of free education material and promotional material (DVDs/books) for schools and community groups. We are active in helping protect kea in the Selwyn District with a focus on managing human-kea interactions. The District is a key location for kea in New Zealand and Arthur's Pass was the venue for a recent Kea Recovery Group meeting for that reason. The first ever Kea Konvention was held in Arthur's Pass in 2017, supported by DOC Work that the Trust does in the District includes: - Lead removal project – A Jobs for Nature funded project to remove lead building material in areas where kea are present and which has led to lead removal from most structures in Arthur's Pass Village. - Kea patrol – A new initiative with Arthur's Pass Wildlife Trust and Fulton Hogan to help protect Kea in Arthur's Pass village. This includes cleaning up food and removing anything that could harm kea, reporting any matters of concern - Advocating for lower speeds – supporting the Arthur's Pass community to make a submission to Waka Kotahi which includes letters of support from all local businesses, Arthur's Pass Association, YMCA, Arthurs Pass Wildlife Trust as well as Kea Conservation Trust. - Seeking a by-law to manage kea feeding off public conservation land - Working with Forest & Bird and DOC to transport sick and injured birds to the South Island Wildlife Hospital In this work the Trust partners with the Department of Conservation, Arthur's Pass Wildlife Trust, Royal Forest & Bird Protection Society, The Kind Foundation (formerly YMCA). The main problem facing kea in our village is access to food which brings them close to the main road where they are often hit by vehicles or brings them into contact with other dangers such as poisons, including lead, or electrical wiring. The nature and risks of keahuman interactions and the fact that these interactions frequently occur on land that is not public conservation land, but is subject to territorial authority regulation (such as local roads, private property and council property)

	means that the district has a key role to play in kea protection. The changes that the Kea Conservation Trust wants to see in the strategy are: Acknowledgment of the organisations protecting kea Organisations that help protect kea in Arthur's Pass include the Arthur's Pass Wildlife Trust, South Island Wildlife Hospital (SIWH) The Kind Foundation, Forest & Bird. 3 Inclusion of kea in the list of Special Features of Selwyn's Biodiversity Kea should be added to section 3.2 of the strategy as a special feature of Selwyn's biodiversity. Our proposed wording is: "Kea (Nestor notabilis) – Threatened – Nationally Endangered. Kea are the only mountain parrot species in the world and now number fewer than 5,000 individuals in the wild. They occur throughout the mountain lands of the District and are frequently visible in and around Arthur's Pass Village, Arthur's Pass National Park and the skifields." Ensuring kea are acknowledged across their range Kea should be added to the list of species in the High Country and Foothills landscape types as they utilise all of these landscapes as well as in the montane and subalpine landscape. Restoration of eastern populations of kea through improved pest control is likely to lead to more presence at the margins of the Southern Alps. Pests, lead and human interactions should be identified as key threats in all landscape types utilized by kea. Information on the locations of kea sightings held by the Department of Conservation in relation to public conservation land in the District shows that kea have been observed from the Main Divide through to the foothills of the Kowai River valley and the uppe Selwyn River catchment: https://docdeptconservation.opendata.arcgis.com/datasets/79ea1d1b63fa436ca8702b1d459b4e7f_0/e xplore?location=-43.306798%2C171.799808%2C11.54 Similarly mapping of kea caught in Arthur's Pass Village and then released with GPS trackers shows that kea travel outside the national park into the surrounding high country Map courtesy of Jodanne Aitken, Kea Ecology PhD candidate, Lincoln University 4 Action to protect kea Goal 4: There should be an action attached to Goal 4 about supporting communities to manage interaction with kea, including through the development of a bylaw to ban kea feeding on non-conservation land except for a conservation purpose and through advocacy to other agencies such as NZTA Waka Kotahi about the importance of managing kea-human interactions. Sincerely, Renée Habluetzel
Staff Recommendation	It is noted that the bulk of this submission is related to the draft Selwyn Biodiversity Strategy (for which public submissions closed in mid-January 2024). Councill environmental staff are working hard to reverse the decline in our native species across the district. They recognize that kea protection efforts need to be supported and focused, and as such staff are engaging with stakeholders regarding the kea feeding bylaw proposal. Staff recognize the huge efforts made by Arthurs Pass community volunteers in kea and other biodiversity protection efforts.

Point Number	1294.10
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	. Sheffield Memorial Pool I do not support the Councils preferred option I believe that the Sheffield school should be consulted, and their preferred option adopted
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	1294.11

Category	Activity > Providing safe drinking water
Comments:	. Water supplies I believe the council should be urgently working with ECAN to minimise the impact of nitrates in water supplies. I also believe the Council should be actively working towards the introduction of Fluoride into at the least all large water supplies.
Staff Recommendation	The submitters support for further work on low nitrate water sources is acknowledged. Further investigations into the centralised sources of low nitrate water is budgeted in the LTP in years 1 to 4. Staff recommendation is to proceed with these investigations as budgeted in the LTP. The submitters preference to fluoridate community drinking water supplies is acknowledged. The cost to fluoridate supplies is estimated at $7.9m over the LTP period. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.
Point Number	1294.12
Category	Activity > Walking and cycling improvements
Comments:	7. Rural Walking and Cycling a. The development of a cycle trail between Arthur's Pass and the plains should be a high priority. This would be of significant benefit to the economic development of Selwyn. b. The Castle Hill community and the canterbury mtb community have built a world class series of tracks, largely on DoC land. Under the arrangements with Doc this is largely the responsibility of those communities. I would like to see support for that work included in the regular and therefore long-term plan budgeting process
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1294.13
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	8. Wilding Conifers a. The Craigieburn and Waimakariri basins are one of the success stories of the attempts to remove wilding conifers throughout New Zealand. This work requires ongoing action to make sure the trees don't reestablish. Financial support of WELRA would enable this to continue. The funding needs to be programed and regular. b. We are concerned about wildfires in the Craigieburn Valley. The removal of conifers around the Village would decrease

	the likely hood of this occurring. The issue is compounded because the alpine style promotes houses being close together. c. The reserves at Castle Hill contain a significant number of wilding conifers. They are all seed source trees. These trees need to be removed. The Village doesn't want to incur the costs of removing trees from the neighboring land. This removal work is urgent because these trees are still growing, and the cost of removal will only increase. d. The delays in completing the Reserves Management Plan for Castle Hill are unacceptable and funding needs to be provided to complete this. 9. Animal Pests The land surrounding Castle Hill Village is home to many pests. Ongoing work to get these is again funded largely by the Village. Assistance and pest removal in other areas is requested
Staff Recommendation	Council recognizes the environmental risks of weed spread from all conifers in the high country, including those on Council reserves in the Castle Hill village (whilst noting the significant stands of conifers on other land surrounding the village). As such Council staff have been working with village residents and Environment Canterbury to remove pines from the Council reserves and look at planting suitable native plants to provide form and cover. All the contorta species have been removed and a draft Reserve Management Plan has been prepared to guide management of the reserves. Staff agree that suitable Council funding should be available to complete the pine removal and associated replanting project.
Point Number	1294.14

Comments:	10. Dark Sky Castle Hill is ideally suited to become a premium dark sky area. To achieve this we need the street lighting changed. We need assistance to get unsuitable lighting removed from houses etc
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy and would like to see Castle Hill progress towards Dark sky accreditation. Dark sky considerations will be part of the development of Action Plans associated with the Economic Development strategy. Council will consider their feedback in strategy action planning.
Point Number	1294.15
Category	Activity > Other Categories identified by Staff > Waste Management
Comments:	1. Green Waste Disposal There a lot of vegetation in the village that is constantly being trimmed or removed. On many weekends there

	are multiple trailers of waste created. Currently this must be taken away by the owners. One of the issues is that it is often put in with general waste or worse left on the ground for others to pick up. We would request that a solution for green waste be looked at and established. This could vary from providing an area to dump the waste and then shredding to a separate large waste bin for the village.
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. There are no immediate plans to establish a permanent green waste drop-off site at Castle Hill as costs to residents of Castle Hill to provide this (in particular transport costs) is prohibitively expensive. Furthermore, an open top skip in an unstaffed facility would invite tipping of construction waste and other bulky waste - contaminating the green waste. Staff have suggested previously that Council would consider assisting the community association with a community hire of a garden chipper once or twice per annum.

	Question: Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1295.8
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	At a time of hardship and the ongoing cost of living crisis both within NZ and impacting Selwyn ratepayes we should not be setting up or investing on any "Climate Change" policies
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions.

Point Number	1295.9
Category	Activity > Chlorination
Comments:	You should as already requested by the Selwyn rate payers, take our voice and calls to stop posioning our water supply and remove all cloronation and even worse the mind destroying "Fluoride" should be resisted at all costs.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies. The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health

Category	Activity > Other Categories identified by Staff > Financial management
Comments:	All projects that are not related to the Selwyn Districts core delivarable to its ratepayes should be placed on hold and re evaluated until the Selwyn rate payers overcome the current cost of living crisis. This includes the silly "Rural walking and cycle improvements".
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1295.11
Category	Activity > Council's Office Improvements

Comments:	In addition why would you be spending more rate payers contributions for "Council Rolleston Office Improvements" This is unjustified and adds no additional value to the Selwyn rate payer.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	1295.12
Category	Activity > Strategic Investment Strategy
Comments:	And Why would you have a strategic Investement funding that will never provide returns greater that the huge debt interist you are signing the rate payers of Selwyn to if you were to proceed against the will of the ratepayer.
Staff Recommendation	That the submission is acknowledged by Council. Council's strategic investments are based around building a strategy that will meet the needs of our communities and our businesses to thrive in the medium to long-term period.
Point Number	1295.13
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	On another note of ratepayers funding the council, there has been an unjustified increase of staff taht has almost 3x over the last 4 years and our services are even worse off. As with the current economic enviroment across NZ where both the National Goverment and global / local business are dealing with economic recession and having to downsize, maybe Selwyn District council should follow and remove the wastfullness of excessif staff and return to supporting core functions of tlocal council.
Staff Recommendation	That the submission is acknowledged by Council. With the rapid growth of the district the workload has increased significantly. The Council has endeavoured to keep the headcount to an optimal level.

Submitter Number:	1296	**Submitter:**	Paul Monk for Squash Canterbury

Point Number	1296.2		
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities		
Comments:	1. Executive Summary 1.1. Introduction Thank you for the opportunity to make a submission on the Selwyn District Council Long-term Plan 2024-2034. We are submitting this proposal to Selwyn District Council on behalf of Squash New Zealand, Squash Canterbury, the Rolleston Squash Facility Development Group, over 2,250 Squash Members in the Canterbury District and all the potential Squash players that are not able to participate in Squash due to the shortage of facilities that we have in the Selwyn District. The proposal outlines the need for a new squash facility in Rolleston to address the growing demand for squash courts in the community. Despite the increasing popularity of squash, current facilities do not meet the needs of residents, resulting in current players having to travel significant distances and limited access for new participants. We request support from Selwyn District Council to support the investigation and planning for a new facility: $60,000 in budget in FY25 to go towards undertaking a Feasibility Study and Business Case $40,000 in budget in FY26 to go towards undertaking Concept Design $250,000 in budget in FY26-27 to go towards undertaking Detailed Design and Consenting $2,500,000 in budget in FY28-29 to go towards Construction We anticipate the total construction cost will be in excess of $3.5M and possibly as high as $5.5M thus completion of the project as preliminary conceived will require funding partnerships beyond what we are requesting Selwyn District Council might provide.		

1.2. Need

The 2022 Squash New Zealand Facilities Strategy identifies the need to for provide squash courts for the growing population of Selwyn as one of its top national priorities. This along with the rising interest in squash, the accessibility of squash as a sport, the shortage of facilities in the Selwyn District and the associated health benefits provide a compelling case for the development of additional squash provision in the District.

1.3. Why Squash?

1. Cultural diversity: Squash is played in 185 countries and in NZ by people of all descent. Squash brings together diverse cultures.
2. Squash offers a holistic workout that enhances cardiovascular health, muscle strength, agility, and endurance, aligning with global health recommendations.
3. Its adaptable nature makes squash accessible to individuals of all ages, abilities, and backgrounds, fostering inclusivity in sports participation.
4. Squash facilities provide opportunities for social interaction, teamwork, and fair play, promoting community cohesion and mental well-being.
5. Squash encourages lifelong engagement, offering challenges and rewards for players of all ages, contributing to active aging and social connectivity.
6. With avenues for both recreational play and competitive engagement, squash supports goal-setting, competition and skill improvement, enriching the overall sporting experience.
7. Squash can be played in all weather conditions with facilities able to be utilised over 365 days of the year.

1.4. Proposed Location

The proposed location for a new squash facility in Rolleston is based on its predicted population growth, demographic composition, absence of current squash amenities, central position within the District, potential economic advantages, and opportunities for collaborative partnerships in facility development.

We have identified two potential options for development in Rolleston:
1. A new multisport squash and recreation facility adjacent to the Rolleston Community Centre
2. A new squash facility at Rolleston College (Horoeka Haemata)

Further planning and investigation will be required to identify the preferred option.

1.5. Facility Design and Features

The design of the squash facility in Rolleston will be guided by a number of core principles:

1. Partnership: Collaboration with Iwi and local stakeholders will inform the design process, ensuring the facility meets diverse community needs and fosters a sense of ownership and engagement.
2. Multi-use: The facility will be designed to accommodate various activities beyond squash, maximizing its utility and appeal to a broad audience, including other sports, fitness classes, social events, and educational programs.
3. Community Hub: Serving as a vibrant hub for recreational and social activities, the facility will foster connections, promote well-being, and enhance the overall quality of life for residents.
4. Sustainability: The design will incorporate sustainable practices to minimize environmental impact, such as energy-efficient systems, water conservation measures, and the use of eco-friendly materials. As well as choosing a location that offers sustainable transport options for participants.
5. Accessibility: The facility will prioritize accessibility for all members of the community, including individuals with disabilities, ensuring equal opportunities for participation and engagement in squash and other activities.

1.6. Funding and Partnerships

Funding for the project will be sourced from a combination of council investment, community fundraising efforts, and potential partnerships with private investors and sports organizations.

1.7. Timeline and Implementation

The proposed timeline includes phases for planning, design, approvals, construction, and a grand opening, with a commitment to close collaboration with the Selwyn District Council, stakeholders, and the community throughout the process.

1.8. Conclusion

The development of a new squash facility in Rolleston represents a strategic investment in the health, well-being, and vitality of the community. We urge the Selwyn District Council to support this proposal and allocate the necessary resources for its successful implementation.

2. Background information
2.1. Squash as a sport for Selwyn

Squash is a sport that not only engages individuals but also enriches entire communities through its diverse range of benefits. Here's why squash courts would be a valuable asset for Selwyn and Rolleston:

1. Cultural diversity: Squash is played in 185 countries by more than 20 million people including commonwealth and former English colonised countries, Pacific Island nations, Europe, USA, Canada, South Africa, Egypt, India, Pakistan, Australia, and China. With 30% of Selwyn's population having arrived in New Zealand in the past 20 years, many of these ethnicities form a growing demographic of Selwyn's diverse cultural community. About 10% of Selwyn's 60,000 people have immigrated here from other countries. As experienced in other Districts in New Zealand, Squash will bring together these diverse cultures.
2. Health and Well-being Benefits: Squash is often referenced as the world's healthiest sport across a broad range of criteria (Forbes Magazine). It offers a comprehensive workout, promoting physical fitness, cardiovascular health, and mental well-being. The sport's fast-paced nature, combined with its accessibility for all ages and skill levels, makes it an enjoyable and effective way to stay active year-round in any weather.
3. Accessibility: Squash stands out as a sport that celebrates diversity and inclusivity, providing equal opportunities for individuals of all ages, genders, and skill levels to participate, enjoy, and excel. Its noncontact nature and flexible format allow for solo play or games with 2, 3, or 4 players, accommodating various preferences and abilities. With modified game types available, squash caters to both leisurely enjoyment and competitive engagement, ensuring accessibility for all. Interclub competitions epitomise squash's intergenerational and gender-neutral appeal, where a junior as young as 11 may challenge a senior player over 60. These events often feature mixed-gender matches, reflecting squash's commitment to inclusivity and fair play across age groups and skill levels.
4. Social Inclusion and Personal Development: Squash serves as a platform for social inclusion, personal growth, and skill development. It encourages the development of social skills, self-confidence, and mental well-being, while providing opportunities for individuals to engage in meaningful physical activity. Squash facilities also serve as community hubs, bringing people together and fostering a sense of belonging.
5. International Pathways and Olympics: Squash offers international pathways for aspiring athletes, with various professional and amateur tournaments worldwide. Additionally, squash is a Commonwealth Games sport and will be included in the Olympics from 2028, providing opportunities for community members to engage with the sport at a global level and inspiring future generations of athletes.

2.2. Squash Facilities in New Zealand

Squash facilities in New Zealand serve as vital hubs for fostering community engagement, promoting physical activity, and nurturing talent in the sport. With over 300 facilities and 750 courts spread across the country, these venues provide spaces for players of all ages and skill levels to participate in squash, from casual recreational play to competitive tournaments. However, many of these facilities face

challenges such as aging infrastructure, limited resources for maintenance, and fluctuating membership numbers, which can impact their overall condition and sustainability.

Surveys have shown that greater than 70% of affiliated squash facilities are over 40 years old and more than 60% are rated at average or lesser condition. It also highlighted that squash is under-delivering in the provision of warm, clean, quality courts. Where Courts have been significantly upgraded or rebuilt in Christchurch (largely as a result of the 2010/2011 Earthquakes), there have been large increases in playing numbers, including in the younger age groups. This demonstrates the importance of modern, purpose-built facilities and the high latent demand for squash.

Recognizing the importance of addressing these challenges and ensuring the continued growth and viability of squash facilities nationwide, Squash New Zealand developed a National Facility Strategy in 2022. This is a comprehensive plan aimed at addressing the development, maintenance, and enhancement of squash facilities throughout the country. By providing a strategic framework for decision-making, the Facilities Strategy seeks to support the long-term sustainability and success of squash facilities across New Zealand.

The relevance of this Facilities Strategy extends to the Selwyn District, where the growing ethnically diverse and relatively young population and increasing demand for recreational opportunities highlight the need for modern, wellmaintained community facilities. The strategy highlights 14 National Squash Facility Priorities based on the impact they could have.

Investigation into the need for additional squash courts in the Selwyn District to cater for the high forecast population growth was identified as one of these priorities.

2.3. Squash focus on tamariki and rangatahi

Squash New Zealand and Squash Canterbury, are deeply committed to fostering youth participation in our communities, recognising the importance of instilling a love for sport from an early age. This is particularly pertinent in Selwyn District where, according to the 2018 census, 46% of the population was aged <20 years old. Some reasons that squash is the ideal activity for our tamariki and rangatahi are:

1. Squash encourages active lifestyles and regular physical activity, promoting lifelong health and well-being among tamariki and rangatahi.
2. The sport offers a unique blend of cardiovascular exercise, strength training, and mental stimulation, contributing to overall fitness and cognitive development.
3. Squash fosters resilience and determination as young players learn to overcome challenges and setbacks on the court.

4. Through participation in squash, tamariki and rangatahi develop important life skills such as goal-setting, time management, and sportsmanship.
5. Squash provides a supportive and inclusive community environment where children and youth can build friendships and social connections that extend beyond the court.
6. As they progress in squash, tamariki and rangatahi have opportunities to represent their schools, clubs, and regions in interclub competitions and tournaments, fostering a sense of pride and accomplishment.

We have implemented initiatives tailored to introduce tamariki and rangatahi to squash, providing them with avenues to engage and flourish in our sport including: 1. School Activation Programmes: These programmes aim to provide in curriculum lessons for numeracy and literacy through physical education and squash.
2. Coach / Activator Development: Creation of school modules specifically to upskill teachers in the coaching and deliver of squash.
3. Junior Programmes in clubs: Supporting clubs to appoint junior convenors who will grow junior programmes and participation within their clubs.
4. Skills and pathways: Developing resources where players can digitally track their skills and progress and supporting clubs to set up their own development pathways in partnership with local schools and parents.

2.4. New Zealand and Canterbury Youth Squash Development

Youth development is a key priority for Squash NZ and for Squash Canterbury. Within Canterbury, we are focussed on supporting coaches who are running programmes in secondary schools. These programmes have been particularly successful at Christchurch Boys High and Saint Bede's College by introducing a significant number of rangatahi to squash.

For 2024 and 2025, our focus is on expanding those programmes to a number of other schools commencing with Hoon Hay and Hornby High Schools. We have agreed with Sport Canterbury to use our approved Tū Manawa Active Aotearoa funding in these schools in order to target rangatahi who have not had the opportunity to play squash previously. To support the establishment of a squash facility in Rolleston, we will expand these programmes to schools in the Selwyn District.

We are also working closely with Squash NZ to build a larger network of coaches across the Canterbury District as this will enable us to meet predicted growth in demand and to ensure that all tamariki and rangatahi receive high quality and appropriate coaching. This will also allow us to rollout a squash school holiday programme in 2025.

Squash Canterbury supports a range of competition opportunities for tamaraiki and rangatahi. This includes weekly Junior Interclub and regular tournaments. These competition events provided opportunities for both fun and development. Depending on their own goals, tamariki and rangatahi are able to progress to Canterbury, New Zealand, and International level representative events and teams.

3. Current state of Squash in New Zealand, Canterbury, and Selwyn

Squash as a sport has 19,121 affiliated members and 100,000 people playing squash in New Zealand and has grown over the last seven years. The primary growth in our sport has come from a 36% growth in leisure players over that same period of time.

In the Squash Canterbury District, in 2021 there were 2,256 affiliated squash players and 1,261 casual participants with membership having grown by approximately 20% since 2014 (1.4%/year), well above the national average.

Currently in the Selwyn district we have four squash facilities, one that is run by an affiliated club – Malvern Squash Club and three that are not affiliated – Arthurs Pass Squash Courts, Lincoln Squash Club and Leeston Rugby Club.

With the National Strategy only able to survey affiliated clubs, we only have more in-depth information on Malvern Squash Club which in 2021 had 44 members and average quality facilities.

As only one of these facilities is managed and operated by an affiliated club, there is a significant risk that these courts could be lost to the community because the owners may decide to use them for something else. This has already happened to the squash courts in Lincoln, where there used to be four, but two were converted by the university into alternative facilities (a spin cycle studio and a climbing wall).

Between these four facilities there are a total of seven squash courts:

Facility	Type	Courts	Distance Rolleston
Malvern Squash Club	Multi-sport	2 standard	29km
Leeston Rugby Club	Multi-sport	2 standard	24km
Lincoln Squash Club	University Facility	2 standard	10km
Arthurs Pass Squash Courts	Stand-alone	1 standard	120km

3.1. Need from the community

Squash New Zealand and Squash Canterbury have been working in partnership with the Rolleston Squash Facility Development Group, a

group of passionate squash players mostly based in Rolleston who currently need to travel extensively to the above clubs to be able to participate.

This group have conducted an informal petition that has received 336 signatures in support of the development of a new squash facility. They have also submitted their own submission as part of the Long-term Plan process which we support and complements ours.

A couple of the highlights from the petition included these comments:

Stephen Gardner “Our family has just shifted out to Rolleston, like many others over the past few years. It would be great if there was a facility out here as our kids will be keen to play in a few years’ time. I play competitively and it’s a big drive into Christchurch to play, not to mention the carbon footprint associated with it. A modern facility would be a great community asset!"

Jennifer Barnden "Husband and I play squash, having to travel out of Rolleston weekly. Having a squash court in Rolleston would be awesome"

3.2. Identified need in Rolleston
The National Strategy analysed squash participation levels across the country including population per court, members per court and members per population. In this analysis, Auckland has been removed due to its population and number of courts being so different to the rest of the country, so any national analysis excludes Auckland.

1. The Canterbury District has a higher proportion of people per court (7,011 to 5,635) and significantly higher people per affiliated court (11,136 to 7,551) when compared to the national average. This shows us that there are under supply of courts in the Canterbury District.

2. The Canterbury District has a similar number of members per court (33 to 34) and slightly lower number of all players per court (36 to 38) when compared to the national average. This shows us that with the number of courts in the district that we have roughly the right number of players.

	Total Courts	2023 population	People/ court	Aff. Courts	People/Aff. Court	Affiliated members	Members/ court
Canterbury	108	757,230	7,011	68	11,136	2,256	33
National	611	3,443,220	5,635	456	7,551	15,080	33

3. The Canterbury District has significantly lower number of squash players per population (0.46% to 0.70%) and affiliated squash players per population (0.30% to 0.44%) when compared to the national average. This shows us that we should have a far higher number of

squash players and people participating in squash in the Canterbury District.

	Total Courts	2023 population	Affiliated members	All players	All players/pop	Aff. Playe
Canterbury	108	757,230	2,256	3,517	0.46%	
National	611	3,443,220	15,080	24217	0.70%	

4. The National Strategy provides guidelines for squash court provision to be one affiliated squash court for every 7,500 people, noting for urban areas to aim for one affiliated court for every 8,500 people.

5. Urban areas are generally considered to be areas with a population of over 5,000, so for Selwyn, Rolleston, Lincoln and Prebbleton fall into this classification, so for the purpose of this analysis, we will use this Urban ratio to consider the whole Selwyn District as it is more conservative than the rural ratio.

6. The Selwyn District currently has much higher population per court (10,500 to 5,635) and population per affiliated court (36,750 to 6,412) when compared to the national average and much higher than the recommended guidelines of one affiliated court per 8,500 people. This shows us that the Selwyn District has a significant shortfall in the provision of squash courts even when considering all available courts as opposed to just affiliated courts.

7. By 2048 it is projected that the Selwyn District will have a much higher population per court (15,214 to 6,403) and population per affiliated court (53,250 to 7,285) when compared to the national average and much higher than the recommended guidelines of one affiliated court per 8,500 people. This shows us that with the projected growth in the Selwyn District and the fact that there are currently no planned new squash courts that there will be an even greater shortfall in the provision of squash courts by 2048.

8. When considering the National Strategy provision guidelines for squash court provision Selwyn is currently 6.6 affiliated courts short and this shortfall is projected to grow to 10.5 courts short by 2048. This shows us that we need to start planning immediately for how we address this shortfall in squash courts and the facility size in Rolleston needs to be in excess of 6 courts now with a plan to expand to 10 courts over the coming decades.

	Selwyn		Christchurch		Na
	2023	2048	2023	2048	2023
Population	73,500	106,500	402,400	463,500	3,443,220
Courts	7	7	35	35	611
Affiliated courts	2	2	28	28	537
Pop per court	10,500	15,214	11,497	13,243	5,635
Pop per affiliated court	36,750	53,250	14,371	16,554	6,412
Recommended people per affiliated court	8,500	8,500	8,500	8,500	8,500
Recommended courts	8.6	12.5	47.3	54.5	405.1
Shortage (all courts)	**1.6**	**5.5**	**12.3**	**19.5**	**-205.9**
Shortage (affiliated courts)	**6.6**	**10.5**	**19.3**	**26.5**	**56.4**

9. When considering the population in the Selwyn District and where current squash courts are located, most urban centres are close to or over the recommended number of squash courts, except for Rolleston. This shows that Rolleston is the location in most need of additional squash courts in the Selwyn District.

Selwyn District	2023 Population	Number of Squash Courts	Recommended Courts for population	Shortf oversu
Rolleston	29,600	0	3.5	
Lincoln	10,250	2	1.2	
Prebbleton	5,280	0	0.6	
Darfield	3,150	2	0.4	
West Melton	2,450	0	0.3	
Leeston	2,430	2	0.3	

3.2.1. Need conclusion

1. This research shows that there is a very clear need for additional squash facilities in the Selwyn District and particularly in Rolleston.
2. Due to its central location, the location of population growth and where existing squash courts are located. Rolleston is the preferred location for additional provision of squash courts.
3. The Selwyn District with its project growth has the greatest shortfall in squash courts available to its population across New Zealand.
4. If we were to increase the supply of courts, given these severe shortfalls, with additional courts, local participation will likely rise rapidly.

4. Proposal

4.1. Purpose

Given Squash NZ and Squash Canterbury are already working with the non-affiliated court facilities in the Selwyn District to address some of the shortfall, the purpose of this submission is to outline the need for additional squash court provision in the Selwyn District and to identify options for how Squash New Zealand and Squash Canterbury can

address this shortage, particularly in Rolleston, in partnership with Selwyn District Council.

4.2. Request

Our request is for financial support to help with the planning to determine the preferred option and support the generation of sufficient capital to build a facility.

1. We request that Selwyn District Council allocates $60,000 in budget in FY25 to go towards undertaking a Feasibility Study and Business Case. This work generally costs in the region of $60,000 - $100,000. If Selwyn District Council is able to invest $60,000 towards this work, then Squash New Zealand is prepared to contribute $10,000 towards this and Sport Canterbury has indicated that they would also contribute financially.
2. We request that Selwyn District Council allocates $40,000 in budget in FY26 to go towards undertaking Concept Design. If Selwyn District Council contributes $40,000 to this work then we will look to raise the remaining funding required either from Squash NZ or from grant funding.
3. We request that Selwyn District Council allocates $250,000 in budget in FY26-27 to go towards undertaking Detailed Design and Consenting. If Selwyn District Council contributes $200,000 to this work then we will look to raise the remaining funding required from grant funding.
4. We request that Selwyn District Council allocates $2,500,000 in budget in FY28-29 to go towards Construction. If Selwyn District Council contributes $2,500,000 to this work then we will look to raise the remaining funding required from grant funding.

		Budget required		
	Financial Years	**Total cost**	**Request from Council**	**Contribu from oth**
Needs Assessment	Complete	$0	$0	$0
Feasibility	FY25	$40 - 70k	$45k	$10k
Business Case	FY25	$20 - 30k	$15k	$10k
Concept Design	FY26	$40 - 60k	$40k	$20k
Design and consent	FY26-27	$300 - 500k	$200k	$100k
Construction	FY28-29	$3.5 - 5m	$2.5m	$1.5m
Total		**$3.9 - $5.7m**	**$2.8m**	**$1.64m**

Budget required Financial Years Total cost Request from Council Contribution from others Needs Assessment Complete $0 $0 $0 Feasibility FY25 $40 - 70k $45k $10k Business Case FY25 $20 - 30k $15k $10k Concept Design FY26 $40 - 60k $40k $20k 10 Design and consent FY26-27 $300 - 500k $200k $100k Construction FY28-29 $3.5 - 5m $2.5m $1.5m Total $3.9 - $5.7m $2.8m $1.64m

4.3. Funding

With the overall capital build likely being in the range of $3.5 - $5.7m based on other similar builds that have happened recently, we anticipate that the contribution from Selwyn District Council will likely need to be roughly 60 – 70% of the total project cost with the upfront planning work likely requiring a higher proportion to be funded by Council.

We want to be very realistic about this ask as we know that the funding landscape currently is limited, with most major funders having limited resources and more and more applications for those resources every year.

The reality is that the traditional thinking for funding a facility of one third Council, one third sector funders, one third private is outdated and with Central Government no longer putting capital funding into local projects that Local Councils will generally have to fund a much higher proportion of the capital required for new community facilities.

This does give Council's a much greater say however in the outcomes they want from these facilities they are investing into.

We anticipate being able to raise $1 – 1,5m from various trusts and funders if we are able to secure initial funding from Selwyn District Council.

4.4. Options

We want to emphasise that we have started to consider several options to address the identified needs, with some smaller measures being identified such as working with unaffiliated clubs to become affiliated, supporting clubs in Christchurch and possibly developing courts at Lincoln University. However, due to the size of the need identified, we suggest that the development of additional squash courts in Rolleston is the only practical option to ensure that the community in the Selwyn District has the same ability to play squash as the rest of the country.

We are only at the initial investigation stage of this project and therefore all the figures provided in these options are provisional and based on other recent projects. Also, a lot of the assumptions made regarding these potential options still require extensive engagement and consultation with the key stakeholders such as Selwyn District Council, Lincoln University, and the local and Canterbury Squash community.

Squash New Zealand, Squash Canterbury and the Rolleston Squash Facility Development Group (RSFDG) want to work in partnership with Selwyn District Council to further investigate these options and would like to request financial assistance to appoint a specialist consultant to undertake this work.

4.4.1.Option 1

Build a new multisport squash and recreation facility adjacent to the Rolleston Community Centre

After an initial consultation with staff at Selwyn District Council, the land at 96 Rolleston Drive, adjacent to the Rolleston Community Centre was identified as a possible location for a new multisport capable squash facility.

With the existing Community Centre onsite, there is the ability to look at extending the community centre to cater for the squash courts and potentially sharing existing facilities such as toilets and car parking.

This is also the location of the youth hub, a central source of services and programmes targeted at rangatahi youth (12 to 24 years old) in the District. Conceived as a space where youth can go to receive targeted programmes and non-judgemental, confidential youth services from qualified agencies, a co-located squash facility could become a strong functional physical outlet for youth interested in physical fitness, collaboration, teamwork and mental health.

Co-locating squash courts with an existing facility offers a multitude of benefits that extend beyond squash itself such as:
1. Maximized Facility Utilisation: By integrating squash into the Community Centre, the facility can cater to a broader range of recreational activities and attract a more diverse audience. This increased utilisation enhances the facility's value proposition and contributes to its long-term sustainability.
2. Programming: Locating these facilities together could lead to joint programming and cross-promotion with other activities offered at the facility.
3. Enhanced Community Impact: A combined facility could become a community hub that encourages social interaction, cultural exchange, and community development.
4. Cost-Efficient Infrastructure Development: Building squash courts as an extension of an existing facility can be a cost-efficient approach compared to constructing a standalone facility. Utilising shared amenities, such as parking, toilets, and administrative spaces, reduces construction costs and streamlines operational expenses.

Steps required:
1. Undertake detailed feasibility study to determine preferred site, capital and operational viability, funding options. This would include determining whether attaching to the existing community centre is possible.
2. Engage with Selwyn District Council to begin process of Landowner Approval and securing a lease.
3. Develop business case and concept design for preferred option.

4. Set up new club that will own and run facility once developed.
5. Secure funding for design and consent stage of development.
6. Engage planner to begin resource consent process.
7. Engage an architect and/or project management company to deliver project including working with Council.
8. Undertake detailed design and apply for building consent.
9. Secure funding for construction.
10. Engage construction company (if not included in previous stage) to undertake construction.

Example

The QE2 Park multi-sport facility in Brighton was a great example of squash working well with a number of other sports. The 6 squash courts were built under the main stands and operated for many years alongside the main stadium, swimming and dive pools, water features, gymnasium and other sports related facilities.

Not only did the co-location allow shared use of key services and infrastructure, but it also created a large uplift in demand for squash as many members of the public saw the sport and combined it with their swimming and other activities at the park. Unfortunately, when the Christchurch City Council demolished QE2 it did not have the funds to replace all facilities on the site and the squash courts were lost to the public. Members of the public often comment to Squash Canterbury that QE2 was where they had their first experience of squash.

4.4.2.Option 2

Build a new squash facility at or co-located with Rolleston College (Horoeka Haemata)

The new second campus for Rolleston College-Horoeka Haemata is slated to be built in the next 3-5 years but is currently on hold pending a Government review. Rolleston already has five primary schools (some of them large) and is planning for a high school student population of 3500 and once reached will be the largest in the country.

The second campus will be built on the Lincoln side of Rolleston. This is just 6 km from the Lincoln University campus (whereas downtown Rolleston is about 10 km). If a state-of-the-art squash development facility was to be built, not just a squash club or a multi-sport recreation centre, a very broad partnership could be envisioned that could include the sports science department within the Department of Tourism, Sport and Society at Lincoln University.

This would put Selwyn District on the map for producing world class squash athletes (fits with the Olympic games announcement, recent success at the Commonwealth games, and the vision of bringing the NZ Open to Christchurch beginning in March 2025). Since Auckland,

Hamilton, or Wellington do not have International level facilities, the Christchurch area, already with the modern Christchurch club 8-court facility attached to a larger bar and restaurant facility and Richmond club redevelopment that is just beginning, is poised with its international Airport to become the New Zealand link to the world Professional Squash Association (PSA) Australasian PSA circuit.

In 2025 and 2026, Christchurch will host the NZ open, a PSA Silver level tournament with men's women's prize money of approximately $100,000 which will bring about half of the world's top 20 men's and women's players to Christchurch. This event will be held in the Issac Theatre Royal.

Steps required: 13
1. Engage with Rolleston College – Horoeka Haemata to determine interest in the development of squash courts on school land.
2. Undertake detailed feasibility study to determine preferred site, capital and operational viability, funding options.
3. Engage with Rolleston College to begin process of securing a lease.
4. Develop business case and concept design for preferred option.
5. Set up new club that will own and run facility once developed.
6. Secure funding for design and consent stage of development.
7. Engage planner to begin resource consent process.
8. Engage an architect and/or project management company to deliver project including working with Council.
9. Undertake detailed design and apply for building consent.
10. Secure funding for construction.
11. Engage construction company (if not included in previous stage) to undertake construction.

Example
The Devoy Centre in Tauranga is a shining example of this kind of partnership. With 7 glass-back courts including 2 full-size doubles courts with moveable walls and an International all glass exhibition court, this facility was conceived by a leadership team that included former world champion New Zealander Dame Susan Devoy.

Juniors (under 19yrs) are a primary focus of this facility making up about 40% of the membership. Co-located with the high school using land leased from Tauranga Boys' College at no charge, in return for court access, this facility is a centre for youth development for the Tauranga region. The relationship extends beyond real estate and squash is now an integral part of the college curriculum.

The building is architecturally designed on a single level allowing for a very interactive and dynamic atmosphere for both members and guests. Natural lighting is a strong feature along with contemporary furniture and fixings. Facility overview
• Purpose-built squash complex incorporating a gym
• 6 x glass-back courts with ASB walls and fully sprung floors

• Ability to move the internal walls on 3 courts to create 2 full-sized doubles courts) • Dedicated exhibition court and re-locatable gallery seating allowing up to 250 spectators
• Shared gym facilities (with Tauranga Boys College) adjacent to squash facilities
• On-site fully equipped pro-shop stocking squash equipment
• 150m2 fully enclosed deck leading through large sliding doors into social area
• Central office, bar and café area can be managed by one person
• Members have electronic tag access to playing facilities
• Court access managed by online booking system through any device

The membership and participation numbers have grown significantly since the centre was first opened in 2011 from 220 to 600 now. This growth as meant that the club has had to introduce a waiting list policy because of the demand.

With the Rolleston College second campus development currently on hold and under review, there is an opportunity to reach out to Education New Zealand (Mō mātou) to discuss a partnership between Squash NZ, Squash Canterbury, Rolleston College-Horoeka Haemata, Lincoln University, and Selwyn District Council.

5. Summary

Thank you for the opportunity to make a submission on the Selwyn District Council Long-term Plan 2024-2034. The proposal outlines the need for a new squash facility in Rolleston to address the growing demand for squash courts in the community. Despite the increasing popularity of squash, current facilities do not meet the needs of residents in the greater Selwyn District and particularly Rolleston.

The 2022 Squash New Zealand Facilities Strategy identifies the need to for provide squash courts for the growing population of Selwyn and Rolleston as one of its top national priorities. This along with the rising interest in squash, the multicultural demographics of Rolleston, and the associated social and health benefits to the community and its youth provide a compelling case for the development of additional squash provision in the District.

So far, we have identified two potential options for development in Rolleston; a new multisport squash and recreation facility adjacent to the Rolleston Community Centre, and a new squash facility at Rolleston College (Horoeka Haemata). Further planning and investigation will be required to identify additional options and the preferred option. We anticipate a series of consultations and collaboration with local Iwi and stakeholders will inform the design process, ensuring the facility meets diverse community needs and fosters a sense of ownership and engagement.

	It is likely that the best option would be designed to accommodate various activities beyond squash, maximizing its utility and appeal to a broad audience, including other sports, fitness classes, social events, and educational programs. Given the costs, we recognize this will take a funding partnership that would likely involve a combination of council investment, community fundraising efforts, and potential partnerships with private investors, sports organizations and government grant. The ideal timeline for development would be as soon a practical but 4-5 years is more likely. The development of a new squash facility in Rolleston represents a strategic investment in the health, well-being, and vitality of the community. We urge the Selwyn District Council to support this proposal and allocate the necessary resources for beginning the formal planning and consultation processes and to partner with Squash NZ, Squash Canterbury and the local squash community to see it through to a successful conclusion.
Staff Recommendation	Staff recommend that the submission is acknowledged but the funding requested is not approved. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input, Squash being one of them. Staff note that existing facility utilisation has not been outlined in the submission. Staff recommend that this facility be included as part of a wider community facility funding and planning project.

Submitter Number:	1297	**Submitter:**	Alan & Robyn Ogle
Point Number	1297.1		
Category	Questionnaire > Matters For Community Guidance		
Comments:			

	Question: Do you support the continued development of an economic development strategy? Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1297.3
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	There is a major opportunity at Castle Hill Village that the SDC appears to overlook. For exmaple Mackenzie, Ashbuton and Hurunui Councils have all assisted with hotpool facilities with great success. An SDC economic strategy is needed for the Castle Hill area
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy. Submission is noted by relevant team.
Point Number	1297.4
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	There are a number of other issues that need attention by the SDC, including: Progression towards a dark sky area, either with a trial of a lights off initiative or dark sky compliant street lighting
Staff Recommendation	It is acknowledged that the submitter would like to see Selwyn progress towards Dark sky accreditation. Dark sky considerations will be part of the development of Action Plans associated with the Economic Development strategy.

Point Number	1297.5
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	There are a number of other issues that need attention by the SDC, including: ☐ Implement the Castle Hill Village Reserves Management Plan,
Staff Recommendation	Submission is acknowledged by Council. The Castle Hill Reserve Management Plan is progressing to completion with a hearing to be held on 9 May 2024. Once completed an implementation programme will be developed. In anticipation of the plan being completed budgets have been provided in the draft LTP to undertake tree pest removal at Castle Hill.
Point Number	1297.6
Category	Activity > Other Categories identified by Staff > Waste Management
Comments:	There are a number of other issues that need attention by the SDC, including: ☐ A garden waste disposal system for the Village,
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. There are no immediate plans to establish a permanent green waste drop-off site at Castle Hill as costs to residents of Castle Hill to provide this (in particular transport costs) is prohibitively expensive. Furthermore, an open top skip in an unstaffed facility would invite tipping of construction waste and other bulky waste - contaminating the green waste. Staff have suggested previously that Council would consider assisting the community association with a community hire of a garden chipper once or twice per annum.
Point Number	1297.7
Category	Activity > Other Categories identified by Staff > Other Water

Comments:	There are a number of other issues that need attention by the SDC, including: Aa wastewater treatment plant upgrade
Staff Recommendation	The submitters support for wastewater upgrades is acknowledged. Staff recommendation is to continue with the 5 waters capital programme as proposed.
Point Number	1297.9
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	There are a number of other issues that need attention by the SDC, including: Upgrade of the signage and fencing at the Village entrance
Staff Recommendation	Submission is acknowledged by Council. Entrance signage upgrade is being arranged through the developer with design pending approval from NZTA.

Submitter Number:	1298	**Submitter:**	Karren Madden
Point Number	1298.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** The project should be deferred until the economy recovers. There is a cost-of-living crisis, Rate payers cannot sustain the current level of Council spending.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP
Point Number	1298.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design.

	Project cost: Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** Keep the building plans simple, the community needs a community space not a building that is a monument to Council, Runanga, designers or builders. I support the Leeston Community Committee submission.
Staff Recommendation	The submission is acknowledged.
Point Number	1298.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Carry out the landscape improvements to extend the playing fields; replace and upgrade the playground equipment, footpaths, toilet block, lighting and irrigation; and seal the carpark.

	Project cost: Years 1-10: $3.4m **Estimated impact on rates :** Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% * Our budgeted option **Comment:** I support the Leeston Community Committee submission. Keep it simple, involve the community in completing the project. The community can help with landscaping and planting. Stop shutting the community out, a community involved in Council projects protects the project into the future.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2, support of the Leeston Community Committee submission and welcomes community involvement at varying stages of the project (e.g. planting days)
Point Number	1298.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None

	Funding: None **Comment:** Sports facilities should not be a priority in the current LTP.
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	1298.5
Category	Questionnaire > Matters For Community Guidance
Comments:	
	Question: Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1298.8
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	The pool was transferred to the council to be managed and looked after for the community, not to be demolished or sold to fund other projects.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1298.10
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	this is not a core business of the council; business need to be responsible for themselves. not be propped up by the council.

Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and holds a view that Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	1298.11
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Stop spending money!
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1298.12
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	Stop borrowing money! spend funding on essential projects only, the nice to haves need to be put on hold until the district can actually afford it.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and the negative impact that the increased cost of living is having on the public. The Council also acknowledges that this trend is not only limited to New Zealand, but is widely spread in many other countries worldwide. The Council endeavours to keep rates increases to a minimum and continue to proactively look for opportunities to minimise costs.

Point Number	1298.13
Category	Activity > Strengthened Partnerships
Comments:	When Iwi can participate in the community and attend meetings, they are invited to then they can have a seat at the table. We always invite and include Iwi, but they don't attend community meetings. They can't represent the community if they don't get involved.
Staff Recommendation	Council is committed to responsible use of ratepayer funds. Council considers that investing in relationships, and actively working with local Runanga , is not just the right thing to do under Te Tiriti o Waitangi, it's also an efficient way to achieve positive outcomes for all Selwyn residents. Council recognises it has a large volume of often complex needs and time-consuming demands that its places on Runanga representatives, who are generally volunteers, in order to assist Council meet its legal compliance requirements, develop and implement strategy, guide adherence to cultural protocols and good practice. The mechanism of contribution towards the two Runanga is considered an appropriate and cost-effective way to support the contribution of Runanga representatives to supporting Council to achieve positive outcomes for all Selwyn residents.
Point Number	1298.14
Category	Activity > Chlorination
Comments:	Stop Chlorination, and don't Fluoridate it's not needed.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies. The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health
Point Number	1298.15

Category	Activity > Lincoln Town Centre Upgrades
Comments:	Don't waste money on Lincoln town center, Council office upgrades, or cycleways.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1298.16

Comments:	Don't waste money on Lincoln town center, Council office upgrades, or cycleways.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1298.17
Category	Activity > Council's Office Improvements
Comments:	Don't waste money on Lincoln town center, Council office upgrades, or cycleways.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	1298.18
Category	Activity > Compulsary organics collection
Comments:	Rate payers should be able to decide if they want to opt in or out of curb side collection.
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. This regulation is outside of Council's control. The Ministry for the Environment has issued a directive that all urban areas with a population of greater than 1,000 residents must have a food scraps/organic collection by 1 January 2027. Every Council in New Zealand is obligated under the Waste Minimisation Act to comply with this.

Submitter Number:	1299	**Submitter:**	Anna Clarke
Point Number	1299.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** Just an idea I have been pondering. Could there be a third bus route that ran just on weekdays for a few hours at the start and end of day that ran every 10 minutes following a route between Burnham School, Clearview School, Rolleston College, Lemonwood School, Rolleston Christian School, Te Rohutu Whio, and Rolleston School?		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Environment Canterbury is considering developing a business case for additional direct services for Rolleston and Lincoln		

	in 2024-27 including investigating 'On Demand' Services as another option within larger townships.
Point Number	1299.2

Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1299.9
Category	Activity > Walking and cycling improvements

Comments:	I did not see any specifics about how you plan to improve cycling lanes. I am not in support of doing a design of Christchurch digging up half the road and putting a designated cycle lane on both sides of the road. This forces cars to park illegally on congested parking right by the road which causes dangerous blind spots at give way and stop signs. It also creates controversy as that is taken out of transport tax allocated funds instead of say a cycle "tax or levy" charge on each bike being purchased. Additionally, my husband and many other Rolleston residents who cycle to Christchurch every day for work "faster than busing or driving a car in peak traffic!" into Hallswell/Wigram/Hornby cannot do so safely due to the scrapped funding from NZTA Waka Kotahi to complete the second stage of the Southern Motorway by not continuing the cycleway. I propose if the government will not finally finish that cycle way, could our local council considering continuing the Christchurch City Council's cycle/pedestrian path on Jones Road from Curraghs Road intersection through to Hoskyns Road please? There have been multitude of near misses with cyclists going down Jones Road with big vehicles and smaller cars who are not looking for cyclists not to mention it already being a narrow road. If you are not convinced? Jump on the number 5 bus and experience the driver having to pump the brakes to avoid swiping oncoming big vehicles like buses and trucks. It is a very unpleasant experience. Thank you for your time.
Staff Recommendation	Submission is acknowledged by Council. Cycle/pedestrian path on Jones Road from Curraghs Road intersection through to Hoskyns Road would require extensive road upgrades.

Submitter Number:	1300	**Submitter:**	Francine Bills
Point Number	1300.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:** Construction of new park & ride facilities & upgrading public transport infrastructure is crucial to lowering carbon emissions. Postponing it for any reason does not fit with any climate change policy. (I must say the link to your climate change policy didn't work for me.)
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council
Point Number	1300.2
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes two indoor courts. **Project cost:** Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million)

	Estimated impact on rates (per year): $19.91 **Funding:** Rates: 57% Development contributions: 43% * **Comment:** This must be built. The impact on the health and well-being of users is priceless. It also means less travel required and fewer carbon emissions if a local facility is provided.
Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.
Point Number	1300.5
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	That link took me to the document that has only 33 pages. I think there could be some improvements needed to the online aspects of this consultation.
Staff Recommendation	Council acknowledges the submission and notes the concern with the level of information provided. Improvements regarding the presentation and provision noninformation will be considered for future consultations.
Point Number	1300.6
Category	Activity > Other Categories identified by Staff > Consultation Document Feed
Comments:	Again, this link only took me to a 33 page document.
Staff Recommendation	Submission is acknowledged by Council. Unfortunately, it is not clear from the response what specific document is mentioned here. The intention of the Consultation document was to break the Long - Term Plan up into smaller sections to assist the community's understanding. Staff recommend that the public is encouraged to provide feedback on how we can better achieve this via communications@selwyn.govt.nz

Point Number	1301.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** The public transport is of no use to me since i live rurally.		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP		
Point Number	1301.2		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to		

	build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** I do not use any Leeston community facilities as they are too far away from my house.
Staff Recommendation	The submission is acknowledged.
Point Number	1301.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do nothing. Use the existing park facilities and remove or replace old and unsafe items in the park.

	Project cost: Year 1: $143,000 **Estimated impact on rates:** Included in our current rates **Funding:** Rates: 100% **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1
Point Number	1301.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:** I do not use any facilities at Darfield and have hardly ever been there in my life.
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	1301.5
Category	Questionnaire > Matters For Community Guidance
Comments:	

	Question: Do you support the closure of Sheffield Community Pool? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1301.7
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	This should be a decision for Sheffield residents as it has no relevance to me.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1301.8
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Please keep council spending to a minimum because the rates rises will become unaffordable for many and result in mortgagee sales which will not be good for our region. We already have very little disposable income so cannot go shopping at markets or local shops to support our local economy.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1301.9
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	Everyone is already under financial pressure from the increased costs of housing, transport, food and services. Government funding should be allocated for new subdivisions as they are allowing too much immigration when there are not enough houses in New Zealand to house everyone.

Staff Recommendation	Council is required to have sufficient capacity for housing to meet projected demand. Council continues to work with government agencies to ensure there are enough services and housing in Selwyn.
Point Number	1301.10
Category	Activity > Lincoln Town Centre Upgrades
Comments:	I don't think we need any traffic lights in Lincoln as I prefer towns that don't have traffic lights. It could be better to rezone the transitional housing area as commercial and recoup the money for development from businesses instead of ratepayers.
Staff Recommendation	Submission is acknowledged by Council. The planned 4 signalised intersections along Gerald St are necessary to accommodate traffic, pedestrian and cyclists and related cycle lanes. The widening and safety upgrade of Ellesmere Road is included early in the draft LTP. Council is aware of the heritage and other cultural aspects that will need to consider in the design for the area for the planned traffic signals at Edward St and James St. Council may need to consider closing to through traffic the likes of East Belt but this will be investigated and modelled closer to the time in relation to the design of the traffic signals and options available. Lower speed limits are part of the plans. The Christmas Parade will not be impacted by the competed projects.

Submitter Number:	1302	**Submitter:**	Details Withheld
Point Number	1302.2		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	• The Upper Selwyn Huts should be listed as a history site on the District Plan. It pre-dates the 1900s so is an archaeological site under Heritage Pouhere Taonga Act		

	• All homes and all people should be protected. It's inhumane and disgusting to evict the Selwyn Huts residents from their home. Review the 15 year finite term and let us stay. This also helps preserve our kiwi history!!! • It's unfair not to include Selwyn Huts on the District Wide Rate for water and sewer. Excluding a community in the district goes against the purpose of introducing the DWR in the first place. The legal opinion from Council's own lawyers have highlighted this. We should not be discriminated against and should be treated like everyone else in the district • Replace the reticulation system. Council have been in charge of this since 1989 and dropped the ball by not doing any maintenance and upgrades over the last 35 years.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Point Number	1303.5
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	What you are doing to the Upper Selwyn Huts (USH) is wrong for so many reasons. I just can't believe you are planning on wiping us off the map while you smile and wave to the masses, telling them "We are working for you", or "We care about you." During the last meeting at the Springston Hall, all you big wigs was smile and avoid answering the questions put to you. I just hope you actually take the time to consider fully what you are planning. The USH were there before 1900 - 1895 to be precise, so that surely qualifies them to be labelled a archaelogical site under the Heritage Pouhere Taonga Act. These are peoples' homes for goodness sake and should be treated as such. It is not as if you are going to put a high speed train track through the area or a rocket launch site on the spit. We pay so many of the districts rates, why can't we be put on the district wide rate for water and sewer? Why are we not being included? You should listen to your own lawyers - that's what you use the rate payers money to pay for, isn't it? It is not our fault you have let the articulation system go to the dogs. Apparently you have been "looking after it" since 1989 and have done very little to maintain it. Replace it or fix it - don't run us off the land because of your inaction.

	A five year lease with the hope of renewing it for another 5 and then maybe for another 5 years sucks. Would you do that to someone living in Lincoln or Rolleston? I don't think so. If I were to come on to your property for the aim of complying for an obscure reason, I'd think you would see me off quick smart. Would you look through the windows of houses of those people who have refused to let you in? Better bloody not. Try it in Lincoln or better yet, a certain individual living at the Rakaia Huts. The rumour is the Rakaia Huts are next. Good luck with that. The climate warming / rising sea level scenario. Apparently you 'learned' people have been using the wrong model. The flooding at the Lower Selwyn Huts is a given and it is only a matter of time before it happens again. Being on sea level, that is understandable. The USH is at least 2 metres above sea level and has never flooded. Why not wait until the sea has actually risen half that height before smiling at us and tell us the sky is falling. No one is denying or stopping anyone to use the lake for their food source. There is only one fisherman at the USH and he is planning to give it up. Maori might like to say they are the guardians of the lake but maybe they should have thought of that sooner before driving the moa and Haast eagle to extinction. I like to think everybody out at the Lower and Upper Selwyn huts are also the guardians of the lake. The people have spoken about the continued existence of the USH and you people at the SDC should listen - because you are suppose to be looking after everybody in the district while at the same time focusing on what we already have.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Comments:	Stop spending money in this current economic climate.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1304.9
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	The council needs to get back to its core business, stop funding community business development, sports development. Council should leave Biodiversity, flood prevention to ECAN, we don't need to be paying for this twice.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1304.10
Category	Activity > Chlorination
Comments:	Remove Chlorination from our water,
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1304.11
Category	Activity > Potential Requirements To Fluoridate
Comments:	do not fluoridate our water.
Staff Recommendation	The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1305.7
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool

Comments:	How did the council get the Shefield Memorial pool? Was it obtained with the understanding that the SDC would take care of the up keep of it? If SDC don't want the responsibility, then give it back to the community.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	1305.8
Category	Activity > Potential Requirements To Fluoridate

Category	Activity > Council's Office Improvements
Comments:	Do NOT spend $3.7m on the Rollerston Council building upgrade. That idea should be stopped until the Cost of Living Crisis is over.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.

Submitter Number:	1306	**Submitter:**	Details Withheld
Point Number	1306.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None		

	Estimated impact on rates: To be determined **Funding:** To be determined **Comment:** You should focus more on adding in passing lanes on SH73 between Darfield and Yaldhurst. Many cars drove this road everyday from and to Darfield, yet there are no passing lanes anywhere
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. NZTA Waka Kotahi are responsible for state highways and any improvements. Council has advocated for passing lanes for SH73 previously.
Point Number	1306.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m

	Estimated impact on rates (per year): $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Staff Recommendation	Submission is acknowledged by Council.

Submitter Number:	1307	**Submitter:**	Details Withheld

Point Number	1307.2
Category	Activity > Low Nitrate Water Sources
Comments:	**My submission to the SDC Long Term plan is to do with the sourcing of low nitrate drinking water for ALL residents of Selwyn.** The nitrate contamination of Selwyn freshwater is very serious. Environment Canterbury (Ecan) scientists have predicted that nitrates in the Selwyn environment won't peak until at least 2037 and then, who knows how quickly it will decrease? Myself and other Springston community members have held several community water testing sessions for private bore owners, over the last few years. In 2022 we found that nearly half of our 130 tests - 52 samples or 43% had nitrate levels at or over 5mg/L , which is nearly half of the Maximum Acceptable Value deemed by WHO and the Ministry of Health as a risk factor for Blue Baby Syndrome. (11 households had nitrate levels close to the MAV, including a pregnant woman. All were advised to access lower nitrate water to be safe) Nitrate in water at 5mg/L or above is also the level at which a Stanford University study and others have found that the risk for premature births and low birth weight babies increased significantly. In light of these studies, the NZ College of Midwives issued a statement in May 2021 advising women with drinking water at these levels to access water with lower nitrate levels. They said, "it is prudent to take a precautionary approach and consider the lower threshold of 5mg/L (or lower) as safer for pregnant women. If drinking water exceeds this threshold, pregnant women should consider accessing an alternative water source such as bottled water, or investigate effective treatment options." https://www.midwife.org.nz/wp-content/uploads/2021/05/Advice-to-member-Nitrates-May-2021-1.pdf

Considering the SDC already has 5 community supplies with nitrate levels at or above 5mg/L, **I ask that the SDC sets up low**

nitrate water collection points immediately. Nitrates in Selwyn water are going up, we have no time to waste on 'feasibility studies'.

Water collection points or water filling stations could be set up quickly and relatively cheaply so that both urban and and rural people

have access to low nitrate water. Many Selwyn residents currently have no choice unless they buy bottled water or install

expensive filtering systems.

While I understand the SDC has no statutory responsibility to assist rural private bore owners, the SDC does have a moral responsibility. This is because the SDC championed the Central Plains Water scheme in its formative years, setting up the Trust that established CPW Ltd, even
loaning it money. Even the current Chair of the Board of Directors of CPW Limited is a SDC councillor.
The CPW scheme has allowed for more intensified agriculture on the Selwyn plains which has and will continue to contribute significant nitrate into the
environment which the SDC (highly ironically) is having to deal with in its community water supply systems.
To compare CPW nitrate pollution(sometimes called 'nitrate losses' but pollution nonetheless) to that created by Selwyn community sewage
is a sobering comparison. Ecan has set a limit for nitrate pollution from Selwyn community sewage at 62 tonnes/year.
The CPW scheme has a resource consent for 979 tonnes/year. Even if the scheme doesn't use its total pollution allocation, it is still well over 10 times

more than the entire Selwyn community pollutes!

It is fair and logical to ask CPW Limited to contribute to the $5.3 million you have budgeted for looking into sourcing low nitrate water - **I ask that the SDC investigate this**. If things get truly pear shaped and the SDC has to build nitrate reducing infrastructure for
all its community water supplies, as outlined in a report commissioned by council in 2021, then somehow $100 to $322 million for the infrastructure will have to be found, along with $26 million a year to run it! Ouch!! *('Eye-watering cost to remove nitrates', Selwyn Times, Dec 15,*

	2021) Then we'll see how much the rates and ratepayers rise... Thank you
Staff Recommendation	The submitters support for investigation of low nitrate water sources is acknowledged. Further investigations into centralised sources of low nitrate water is budgeted in the LTP in years 1 to 4. The submitters request for locations in the community where low nitrate water can be obtained for household use is acknowledged. Currently, New Zealand Drinking Water Standards Maximum Acceptable Value (MAV) is 50mg/L for nitrate, which is equivalent to 11.3mg/L nitrate-N. All community drinking water supplies are below the MAV with five schemes exceeding 50% of the MAV for Nitrate-n and therefore subject to additional monitoring. These include Rolleston (Illinois bore), Kirwee, Darfield, Dunsandel (single result), Edendale (single result). Staff recommendation is to proceed with investigations into centralised low nitrate water sources as budgeted in the LTP.
Point Number	1307.3
Category	Activity > Low Nitrate Water Sources
Comments:	Nitrate levels in drinking water: risks for pregnant women and formula-fed babies Through land uses such as farming and sewage disposal systems, nitrate, a highly soluble compound, is released into the soil and easily transported through into groundwater. Exposure to high nitrate levels in drinking water may prevent the blood from delivering oxygen throughout the body. High nitrates in drinking water have been associated with methaemoglobinaemia (blue baby syndrome) in infants who are formula fed and two recent international studies published in 2021 have also linked antenatal nitrate exposure in pregnant women to low birth weight (1) and preterm birth (2). Currently, New Zealand Drinking Water Standards give a Maximum Acceptable Value (MAV) of 50mg/L for nitrate, which is equivalent to 11.3mg/L nitrate-N. This MAV is based on reducing the risk of methaemoglobinaemia (blue baby syndrome). However the two recent international studies have linked nitrate exposure above 5 mg/L during pregnancy to preterm birth (20-31 weeks) and low birth weight. This finding is consistent with other studies looking at preterm and low birth weights (3-7). Nitrate contamination in drinking water and adverse birth outcomes: emerging evidence is concerning for NZ – Public Health Expert, University of Otago, New Zealand Nitrate levels do vary over the year. They are often highest in spring, and in areas where there is

	extensive irrigation, high nitrate levels can be found in late summer. Advice Public / council-managed water supplies in New Zealand are monitored for nitrate levels and are generally considered safe to drink. Women and families who have a private water supply, such as drinking-well water should have their water regularly tested for nitrate levels. Regional councils may publish information which identify rural areas where nitrate levels in drinking water may be a concern. It is important to use a laboratory that has been approved by the Ministry of Health to carry out the analysis required. Although the current MAV for nitrates in drinking water supplies is equivalent to 11.3mg/L, it is prudent to take a precautionary approach and consider the lower threshold of 5mg/L (or lower) as safer for pregnant women. If drinking water exceeds this threshold, pregnant women should consider accessing an alternative water source such as bottled water, or investigate effective treatment options. The current recommendation is to use an alternative safe water supply (for example bottled water) to make up infant formula if the nitrate level is ≥11.3mg/L Nitrate is difficult to remove from water. Household cartridge / carbon filters, chemical treatment and boiling will not remove nitrate. Reverse osmosis and ion exchange can remove nitrate however these are expensive options. Breastfed babies are exposed to nitrates in the breast milk of their mothers, but they are protected against negative effects because the predominant organism (Lactobacillus species) in breastfed infants' gastrointestinal tracts does not convert nitrate to nitrite. It is nitrite that combines with fetal haemoglobin to prevent oxygen binding.
Staff Recommendation	The submitters comment is acknowledged. Staff recommendation is to proceed with investigations into centralised low nitrate water sources as budgeted in the LTP.

Submitter Number:	1308	**Submitter:**	Mary O'Brien for CCS Disability Action
Organisation:	CCS Disability Action		
Point Number	1308.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		

Comments:

Question: You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:

Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding.

Project cost:
Years 1–3: $4.2 million
Years 4–10: $11.6 million
Estimated impact on rates:
Years 1–3: $14.41
Years 4–10: $39.83
Funding:
Rates: 100% **Comment:**

The Selwyn community has indicated that they want access services at all stages of life and in addition to the Councils Climate Change Policy states that climate change mitigation and adaption is a core part the Councils planning and decision making. With the fastest growing population in New Zealand and younger and older people reporting that they wanted more public transport and better access to Park and Ride facilities and bus stops the Council must continue to invest in all aspects of transport and Public Transport which can make a strong contribution to community wellbeing.

Transport systems that are available, accessible, and affordable enable citizens to engage in work, education, community, and leisure activities that are essential for a healthy and meaningful life[i] A good public transport network is a major contributor to economic, social, and environmental goals[ii]. Public transport contributes to reducing vehicle kilometres travelled and vehicle emissions, it reduces congestion on roads. This means that the Council must continue to invest in public transport even in the absence of Waka Kotahi funding to ensure that the growing community will be able to access services. To

We note that the Council has budgeted for the proposed new Park and Ride facilities with the expectation of Waka Katahi funding, however delaying investment will have long term negative effects on the whole community and the communities desire to access services at all stages of life will not be meet.

Recommendation

- **We support option 2. Build three new Park and Ride facilities at Lincon, Rolleston upgrade public transport infrastructure with out NZTA Waka Kotahi funding.**

- We recommend that the Council ensure that the Park and Ride and new bus shelters and their surroundings e.g. approaches, footpaths are accessible. This can be achieved by
  - consulting with disabled people to gain insights about where they can and can't go (due to access barriers) areas where access is imperative e.g. health services, CBD'setc.
  - Include disabled people in pedestrian counts, surveys of bus patronage. This can be done by measuring disabled people using visible mobility aides using footpaths, buses etc[iii].
  - Consulting with access experts who have sound technical knowledge and a good understanding of the lived experience of disability, and Universal Design.
  - Using the above information to prioritise investment over the lifetime of this plan.

Question: Do you support the Council investing in better technology

	solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1308.4
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Swimming is more than a leisure activity. New Zealanders swim for a variety of reasons including sport, recreation, and health benefits . Swimming is the second most popular sport and recreation activity in New Zealand with 30.2%% of New Zealanders over 16 years swimming. Walking is the most popular (60%) and cycling (24.8%) the third most popular . In addition to this New Zealand has a high fatal drowning rate in comparison to other western nation . Disabled New Zealanders are less likely to participate in in sports and recreational activities, and when they do they participate in fewer sports . People need access to amenities such as swimming pools within a close distance, as the need to reduce vehicle kilometers travelled indreases , acces to amenities suc as the pool will become more important.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1308.5
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Improvements to digital solutions must address accessibility.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Staff Recommendation	Submission is acknowledged by council.
Point Number	1308.10
Category	Activity > New Public Transport Services
Comments:	**Exploring new public transport services** The introduction of new and more frequent public transport services would provide numerous broad benefits to the community, and we fully support this. We have had positive feedback re MyWay by Merto from disabled people supported by CCS Disability Action in Timaru who are now able to access services and connect with the community using this accessible and affordable service. This service is a success, and we believe a similar service would benefit the people of Selwyn, particurarly those who are unable to use existing public transport. **Recommendation** • That the Council investigate the provision of an on-demand bus service such as MyWay by Metro in Oamaru.
Staff Recommendation	Environment Canterbury is considering developing a business case for additional direct services for Rolleston and Lincoln in 2024-27 including investigating 'On Demand' Services as another option within larger townships like MyWay in Timaru but this would only ever eventuate as a trial first.
Point Number	1308.11
Category	Activity > Walking and cycling improvements

Comments:	Walking and cycling improvement. Walking and cycling are integral parts of a successful and healthy community and when linked with Public Transport they expand residents and visitors horizons. They provide opportunities for physical activity, social engagement, and access to opportunities and via the walking and cycling networks and links with public transport. Even though Waka Kotahi will not be available it is essential that these developments continue. **Recommendation** • **That the Council continues to fund walking and cycling using locally generated funds. However we do not recommend shared walking and cycling paths as these create conflict between cyclists and pedestrians who are less likely to use shared paths because they do not feel safe.**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1308.13
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	• **Increased funding for roading maintenance and renewal projects over the next three years.** We support this with the proviso that where appropriate (e.g. urban area such as the Lincon Town Centre upgrades) that the needs of pedestrians, particurarly vulnerable pedestrians are addressed by creating accessible footpaths. Creating accessible footpaths increases participation of all pedestrians. **Recommendations** • That the Council commits a small percentage of the renewal and maintenance budget to conducting Street Accessibility Audits and uses this information to prioritise improvements that will improve safety and increase participation. **Changes to Waka Kotahi Funding, value for money investment and increasing productivity.**

	With a growing population and community feedback that indicates that the community wishes to move around the community and remain in the area as they age. It is essential that the Council continues to address accessibility when upgrading or constructing new infrastructure. To achieve this and create an equitable, accessible community that is enjoyed by all the Council needs to commit to measuring participation by vulnerable people, consult regarding accessibility and conduct access audits to inform the prioritisation of improvements. CCS Disability Action would like to achieve this. [i]Spotlight on Disability. Key findings 2018.chrome-extension://efaidnbmnnnibpcajpcglclefindmkaj/https://sportnz.org.nz/media/1808/active-nz-spotlight-on-disability-december-2018-key-findings.pdf [ii] Perry MA, et al., Accessibility and usability of parks and playgrounds, Disability and Health Journal (2017), http://dx.doi.org/10.1016/j.dhjo.2017.08.011
Staff Recommendation	Submission is acknowledged by Council. Council's subsidised maintenance and renewal budget must be spent within rules set out by NZTA.

Submitter Number:	1309	**Submitter:**	Dan Te Ngaru
Point Number	1309.2		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	I fell in love with the Selwyn Huts the very first time I visited this beautiful place. It's where I fell in love with my wife, where I proposed to her, where our son was born and where he was raised. The news has hit us all hard, but the worst part is knowing that Council made the decision in May 2019 for the short-term finite licence but owners weren't made aware until March 2024. We bought late 2020, us, like the 48 other buyers since 2019, were not made aware. We could have saved our hard earned money and put it towards a deposit. Now you want to make us pay to destroy the homes that we love and tear apart our community, and not even		

have the decency to offer us any compensation. We don't want to be bought out, we want to stay for as long as it's safe to stay, but at least if there was compensation on the table the situation wouldn't be so stressful. And while on the subject of money, making us pay even more (for sewer and water) makes it even harder to save and secure any kind of future for us and for our family! In 15 years, I will be at retirement age. My wife and I will have to use all of the savings we can scrape together, reducing our quality of life over the next 15 years, and both our KiwiSaver to even get a foot in the door. Is a bank going to give a retired couple a big mortgage? So we will be starting from square 1 when we are meant to be enjoying our golden years. What a shitty position to be put in. Have some heart, review the 15 year term. Let us stay. Offer compensation if it's no longer safe to be here. Put us on the District Wide Rate.

(1) HISTORICAL VALUE

An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council unanimously determined that 'Hut licences and subsequent renewals are short term and ultimately for a finite period' . At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts.

Put the Selwyn Huts on the DWR. The reasons being

(a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer system twice before, the requirement for being put on DWR.

(b) We have already paid for the water upgrade in 2018

(c) We should not be discriminated against and should be treated like everyone else in the district.

(d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We

should also be added to the DWR for Sewer and Water like everyone else.

(e) Towards25 LTP Document stated:

“The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities.”

This document also has USH specifically listed in the “Proposed district-wide rate for urban water compared with existing targeted rates” table.

From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston.

(f) Buddle Findlay’s Legal Opinion dated 04/03/2019 states “We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community.”

(g) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn’t find the full amount. This was proposed in 4.12.4 of the “Upper Selwyn Huts Future Occupancy Strategy” report dated 04/03/2024.

It. Is. The. Right. Thing. To. Do !!!!

Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else.

Additionally we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989. It is not our fault that you have dropped the ball and neglected us

Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Comments:	**Question:** Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1310.6
Category	Activity > Strengthened Partnerships
Comments:	1. I support your continued positive engagement with Mana Whenua. They have much to bring to the table to enrich our communities.
Staff Recommendation	The submission is acknowledged.
Point Number	1310.7
Category	Activity > Lincoln Town Centre Upgrades
Comments:	2. I fully support the Lincoln town centre upgrade especially in relation to making it safer for cyclists and a simpler transition in and out of the area for vehicles.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1310.8
Category	Activity > Other Categories identified by Staff > District Planning

Comments:	3. With a view to the future - I would like to see Council planning for and extending infrastructure and facilities for a 'Selwyn city' while the land is alvailable. At the moment there still seems to be a focus on each little community rather than seeing them as a whole system - especially including Lincoln, Rolleston, Springston, Leeston. For example, the town cente of Rolleston is already highly congested with the new shopping area along Tennyson? street looking like it should be a pedestrian mall with shop fronts too close to the road. How much better it would have looked to have trees along the street like a boulevard with the shop fronts placed well back off the road. My suggestion is to plan a new retail district between Rolleston and Lincoln similar to Wanaka's new district on the way in to the town. It would provide easier access to a new supermarket etc. for both communities plus Springston and Taitapu. With Lincoln due to expand by 60% with the new subdivision accommodating all of those people within the existing congested shopping areas will be impractical and shortsighted.
Staff Recommendation	The Greater Christchurch Spatial Plan, which Council approved, begins to address this at a sub-regional level. Council is developing a Future Selwyn Strategy that looks beyond the 10-year horizon to consider how we can respond to these challenges as a whole system.
Point Number	1310.9
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	4. Given the above a pool complex for Lincoln will also be needed soon which again will serve the surrounding communities and the growth in Lincoln. The perfect location would be on the north side of the Events Centre with plenty of space for parking.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1310.10
Category	Activity > Other Categories identified by Staff > Speed Management
Comments:	5. I support a 40km speed limit within all subdivisions with cycle lanes included. 50km is too fast for streets with small children and adults walking and using cycles to travel around the town and placing trees and other obstacles on the road side is creating a safety risk.

Staff Recommendation	Submission is acknowledged by Council. Council has previously consulted on a full speed management plan which reflected your submission, we need to give some consideration to the consultation results, which were largely unsupportive of speed limit reductions. We are now dependent on central government to outline how speed limits are to be managed and update our full speed management plan accordingly.
Point Number	1310.11
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	I support the Council doing everything possible to clean up our local waterways such as the Selwyn river and Lake Ellesmere. They are a disgrace. They need to be restored to a swimmable level as soon as possible. Making money out of our water resource should only be permitted if the activity undertaken results in a deterioration of that resource. We have to accept that water does not have an infinite capacity for accommodating continual degradation and adjust our policies and activities accordingly and as soon as possible. Farming practices need to go back to dryland farming and move away from dairy. It's not acceptable to provide considerable amounts to our GDP when our waterways have become sewers.
Staff Recommendation	The submitters support for waterway enhancement is acknowledged. Council is developing Catchment Management Plans for our Land Drainage Schemes that will identify tools and solutions to improve lowland waterway health. Staff recommendation is to continue with the Surface Water Capital programme as proposed in the LTP, in particular the implementation of the catchment management plans under the Ecological Enhancement budget.

Point Number	1311.1		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Point Number	1311.5
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	It doesn't clearly outline what the proposed changes actually are?? So it's kind of hard to give feedback. I can say that your engagement on consultation process leaves a lot to be desired. Communities such as my own, at the Selwyn Huts, should be involved in projects concerning them and consulted during the process, not just told what's happening after everything has already been decided
Staff Recommendation	Council acknowledges the submission and notes the concern with the level of information provided. Improvements regarding the presentation and provision noninformation will be considered for future consultations.
Point Number	1311.6
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	For most of my life, the Selwyn Huts has been the place that I call home. I am absolutely heartbroken following your recent decision, also completely blindsided and appalled at the way the Council has gone about it. This has had a major impact on my mental health and the general mental wellbeing of my whole family. The uncertainty that lies ahead is daunting and terrifying, and despite you saying that there will be a support team, we all feel like we are being left out in the cold. Giving us the number for Depression Helpline is not support. Involving Kainga Ora is not support. If this is a managed retreat then treat it like you would if it was any other area. Don't discriminate against us. We are home owners too, some of you seem to forget that. The Selwyn Huts is the only place that my son has ever known. Here, he is surrounded by friends and family and wouldn't want to live anywhere else. After overhearing some discussions and seeing me upset, he asked what was going on. Knowing how much my son loves being here, and how much security he has surrounded by the village that is raising him, how

could I break this news to him? In a truthful but gentle way, I explained to him that some people think we shouldn't be allowed to live here anymore and we might have to move. It took him a while to register that meant everyone, and that this place wouldn't exist in the future. I saw the moment the penny dropped and he broke down. My heart broke – again

The thought of the financial burden ahead, not only starting from scratch at retirement age and too old to get a mortgage (if we are lucky enough to the maximum), having to pay tens of thousands of dollars to demolish the home that I cherish, but the increased cost coming with having to pay for the sewer and waste water upgrades sends my anxiety through the roof. Saving and planning for our future when we are already paying rates and have all the financial responsibilities that come with running a household and owning a home is hard enough. But then you add insult to injury by not including us on the District Wide Rate and make it even harder and even more stressful in these economically challenging times. Why would you think that it's ok to force someone out of their home, make them pay to demolish it, and not offer any financial support? Even though you say there will be some sort of help in the future, there has been no mention of financial support or compensation. Our proposed licence, as it stands now, clearly states that there will be no compensation. How is that ok? How are we supposed to feel? These are our homes and the way you are going about evicting us in this cold, cruel manner is disgusting. It makes me feel sick to think of all the things we won't be able to afford, not for ourselves, but for our children.

You have no idea just what it is that you are taking from us. Not just our homes, our biggest asset, but our support system and the strongest sense of community and belonging that I have ever known. I'm not sure where else you could find this. There are a few of us "huts kids" from the 90s/20s that have gone away and done our own thing, but something calls us home, we have all found our way back

It's amazing just how many people have a connection to the Selwyn Huts. It really is a magical place, with a rich history and holds many fond memories for people all over the globe. So many people that I have met over the years, when they find out where I live, share stories of their summers out here, or the great times that they had when they lived here, or visiting friends and family. What a shame to erase this beautiful piece of New Zealand history.

(1) HISTORICAL VALUE

An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there

were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council unanimously determined that 'Hut licences and subsequent renewals are short term and ultimately for a finite period' . At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts.

Put the Selwyn Huts on the DWR. The reasons being

(a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer system twice before, the requirement for being put on DWR.

(b) We have already paid for the water upgrade in 2018

(c) We should not be discriminated against and should be treated like everyone else in the district.

(d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We should also be added to the DWR for Sewer and Water like everyone else.

(e) Towards25 LTP Document stated:

"The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities."

This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table.

	From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston. (f) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community." (g) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Selwyn Huts Future Occupancy Strategy" report dated 04/03/2024. It. Is. The. Right. Thing. To. Do !!!! Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else. Additionally we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989. It is not our fault that you have dropped the ball and neglected us
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1312.8
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	the Pool already exists in Sheffield, and with regular maintenance can continue to do so. closing this facility is another example of less resources for smaller communities in favor of more vehicles on roads to travel to larger communities. community means living local, and supporting local infrastructure.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1312.9
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	sounds like a lot of meaningless business speak, written as to be vague and sound important, though ultimately leaving massive room for interpretation with no real commitment.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1312.10
Category	Activity > Chlorination
Comments:	Arthur's Pass is not included in the list of potentials to have chlorine removed ,which is nothing short of an insult given the source of the water!, potentially one of the purest sources in the country, and with decades of no chlorination and no concerns this is still a point of let down by our council and needs to be rectified ! this is far more important for the health of the people than cycleways and swimming pools that we seem to be included in the costs with the real needs of our community overlooked for what suits the council best.

Staff Recommendation	The submitters preference for Council to remove chlorine from the Arthurs Pass community drinking water supply is acknowledged. Under the Drinking Water Quality Assurance Rules there is a requirement to add a small dose of chlorine to the piped network after treatment for all schemes, unless an exemption is obtained. Arthurs Pass is a surface water take which are considered to be at higher risk of contamination by the Regulator Taumata Arowai. The scheme is not considered to be eligible for an exemption. Councillors agreed to permanently chlorinate the supply to reduce risk to community health. Staff recommendation is to reduce risk by continuing to chlorinate all our community drinking water supplies.

Submitter Number:	1313	**Submitter:**	Details Withheld

Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** Why not add more bus stops. A pole in the ground with a bus stop number. Upgrading bus stop shelters are a nice to have, but won't increase my satisfaction. I now need to walk 1km before I get to my closest bus stop. We all have phones with which we can see arrival times. We don't need fancy expensive digital arrival		

	boards.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. Environment Canterbury who provides Metro Bus Services, needs to undertake more regular service reviews in Selwyn to take account of urban growth. Council on its part ensures that major new roads and intersections that are provided by developers in new subdivisions can support future bus routes and services should they be funded and introduced by Environment Canterbury in the future. Council is also providing an annual bus stop improvement programme that provides shelters and real time information systems

In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes two indoor courts. **Project cost:** Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million) **Estimated impact on rates (per year):** $19.91 **Funding:** Rates: 57% Development contributions: 43% * **Comment:** I think having two indoor courts would enhance the usefulness of this facility.
Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.

Comments:	It is important to me that the community and infrastructure needs of the people of Glentunnel are provided for in the Selwyn Long-Term Plan 2024-2034, these needs include but are not limited to representation in Council decision making, public stormwater management and upgrading the public drinking water supply infrastructure in Glentunnel.
Staff Recommendation	The submitters support for infrastructure upgrades in Glentunnel is acknowledged. Upgrades to the Hartley's water supply scheme (serving Glentunnel) include connecting the scheme to Hororata to increase resilience and adding source capacity. Minor Stormwater improvements for Glentunnel are budgeted. Staff recommendation is to continue with the 5 waters capital programme as budgeted in the LTP.

Comments:	I submit given the significant increase proposed in relation to Development Contributions Policy, the consultation document has been remiss in including this as a significant item to be submitted on by the public, given the flow on effects of the Policy. Increases in the order of 40-70% from the 2022 policy is a significant increase. I understand CPI has been added from the 2022 policy however this is a small component of the proposed increase. I appreciate there are increase cost of work however the level of increase proposed must be on the basis of a lift in levels of service, a lift in capital works or a catchup from past years of under expenditure on capital works items. I hold concerns for councils transparency as to the increase and its ability to deliver on the increased capex/levels of service. The proposed amendments should be removed from this LTP and dealt with as separate consultation process, with further details on the capex proposed.
Staff Recommendation	That the submission is acknowledged by Council.

Comments:	• RE CASTLE HILL VILLAGE • Finalise and implement the Castle Hill Village Reserves Management Plan, including funding removal of the remaining seed source/wildling Douglas Fir and Larch trees in the Village
Staff Recommendation	Submission is acknowledged by Council. The Castle Hill Reserve Management Plan is progressing to completion with a hearing to be held on 9 May 2024. Once completed an implementation programme will be developed. In anticipation of the plan being completed budgets have been provided in the draft LTP to undertake tree pest removal at Castle Hill.
Point Number	1318.8
Category	Activity > Other Categories identified by Staff > Waste Management
Comments:	• RE CASTLE HILL VILLAGE • A garden waste disposal system for the Village •
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. There are no immediate plans to establish a permanent green waste drop-off site at Castle Hill as costs to residents of Castle Hill to provide this (in particular transport costs) is prohibitively expensive. Furthermore, an open top skip in an unstaffed facility would invite tipping of construction waste and other bulky waste - contaminating the green waste. Staff have suggested previously that Council would consider assisting the community association with a community hire of a garden chipper once or twice per annum.
Point Number	1318.10
Category	Activity > Walking and cycling improvements

Comments:	• RE CASTLE HILL VILLAGE • And we should develop a cycle trail that connects Arthurs Pass to the east coast (p49). This could rival Central Otago and be a huge benefit to the region.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1319.7
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	My additional comments relate to the Arthur's Pass township as I believe there are unique needs in the Arthur's Pass area that need to be addressed by the Selwyn District Council, in line with the requirement to "promote the social, economic, environmental and cultural wellbeing of communities" which I have summarised below. **Stormwater** • It appears that $553,000 has been allocated in 2025-2027 for underpass flooding but the exact location and extent of work is not identified. If this is for the subway tunnel leading to the train station, which can be a health and safety issue when water freezes, I would like SDC to review this spend and look at the responsibility that Kiwirail has for this area and any work that may be necessary.
Staff Recommendation	The submitters request for Council to seek alternative funding mechanisms for stormwater capital upgrades to reduce flood risk to the underpass in Arthurs Pass are acknowledged. Staff recommendation is to further investigate and design these improvements in year 2 of the LTP as planned.
Point Number	1319.8
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	• Dark Sky - I believe that specific funding needs to be allocated to upgrade the lighting in Arthur's Pass village urgently to enable the Village to be classified as a Dark Sky Area. I understand that this would involve KIwiRail and SDC would need to start discussions with them to implement this.

	It seems that $1.2m is allocated for district-wide Dark Sky costs in 2039/40 however Castle Hill village has $50,000 allocated in 2025/26 for changing street lighting to different bulbs and on/off timers. Given the unique and remote location of Arthur's Pass it is important to minimise light pollution now. I request that SDC review funding allocations for this and bring it in line with what has been approved for Castle Hill Village, ie work to be done the 2025/26 financial year. .
Staff Recommendation	It is acknowledged that the submitter would like to see Arthur's progress towards Dark sky accreditation. Dark sky considerations will be part of the development of Action Plans associated with the Economic Development strategy. Specific feedback on street lighting in Castle Hill will be referred to relevant team.
Point Number	1319.9
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	• **Heritage** - The Arthur's Pass village is a unique area with many original buildings. I think it is important for SDC to increase support for heritage activities in Arthur's Pass such as being involved in the protection and development of the Park Headquarters/Visitor Centre building managed by the Department of Conservation as well as other buildings such as Tunneller's cottages. The Arthur's Pass National Park was established in 1929 so with the upcoming Centenary this should be a focus of some Council funding.
Staff Recommendation	The Submitter's point regarding heritage is noted. The Selwyn Strategic Heritage Plan 2023-27 includes an action to engage with DOC about their plans for the visitor facilities at Arthus Pass. The community would be able to apply to a range of funds in the Community Funding Programme to support centenial activities for Arthurs Pass National Park. Information about funding is located on the Selwyn District Council website at https://www.selwyn.govt.nz/services/funding-And-grants

Point Number	1319.11
Category	Activity > Providing safe drinking water
Comments:	**Water Supply** • The water supply for Arthur's Pass has been an ongoing issue for residents and bachholders over the years. The current situation of multiple tanks as a storage solution were promised to be a temporary solution only. I request that a permanent solution, using a membrane filter alongside the UV treatment and chlorine, is included in the budget over 2025 and 2026 rather than there be further delays and ongoing environmental impact. •
Staff Recommendation	The submitters support for water treatment upgrades in Arthurs Pass is acknowledged. As part of the Long Term Plan the final stage of upgrades to the treatment plant have been budgeted for in 2026 to 2029 and will investigate treatment efficiency. Pending the outcome these works may include treatment and storage upgrades. Staff recommendation is to budget for these works as planned in the LTP.
Point Number	1319.13
Category	Activity > Walking and cycling improvements
Comments:	• Cycle Trail - I support the construction of a cycle trail from Arthur's Pass to Springfield as per the funding allocated but believe that SDC would also need to plan for and coordinate the services that will be required along the trail to cope with the number of cyclists eg Toilets, Showers, Camping and other facilities which all need to meet the requirements of the area and address concerns by Manu whenua eg with waste water disposal.
Staff Recommendation	Submission is acknowledged by Council.

Point Number	1319.14
Category	Activity > Other Categories identified by Staff > Speed Management
Comments:	• Speed limits - Traffic speed through Arthur's Pass village is a safety issue for road users and pedestrians due to traffic volume and speed. As tourist numbers increase this is becoming more dangerous. I request that SDC work with Waka Kotahi to lower speed limits on State Highway 73 through the village.
Staff Recommendation	Submission is acknowledged by Council. Council has been supportive of and lobbied for lower speed limits through the Arthurs Pass village, however the SH is NZTA responsibility, also the central government is yet to disclose its intentions around setting of speed limits.
Point Number	1319.15
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	• **Conservation / Kea** - Given the unique identity of Arthur's Pass village, the history of Kea in the area and the need to protect this species, I request that the SDC consider passing a by-law that prohibits the feeding of Kea in the village to protect birds and so that SDC can work collaboratively with conservation organisations.
Staff Recommendation	Councill environmental staff are working hard to reverse the decline in our native species across the district. They recognize that kea protection efforts need to be supported and focused, and as such staff are engaging with stakeholders regarding the kea feeding bylaw proposal.
Point Number	1319.19
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	**Halls & Community Centre** • I see that an upgrade of the heating in the Arthur's Pass Community Centre has funding allocated for 2030/31. I believe that this needs to be brought forward to the next financial year, 2024/25 as it is an immediate need to ensure

	the safety of the community should there be any event where the Community Centre is needed as a Civil Defence facility to support residents and visitors. Given the remoteness of Arthur's Pass this needs to be more of a priority than the $850k allocated for roof ventilation in 2024/25 at Greenpark.
Staff Recommendation	The Submitter's point regarding heritage is noted. The Selwyn Strategic Heritage Plan 2023-27 includes an action to engage with DOC about their plans for the visitor facilities at Arthus Pass. The community would be able to apply to a range of funds in the Community Funding Programme to support centenial activities for Arthurs Pass National Park. Information about funding is located on the Selwyn District Council website at https://www.selwyn.govt.nz/services/funding-And-grants
Point Number	1319.24
Category	Activity > Other Categories identified by Staff > Emergency management
Comments:	• **Property Numbering Arthur's Pass** - The SDC support for Civil Defence and preparation for adverse events is vital for the Arthur's Pass area. As part of this it is really important that all property owners have access to registering on Gets Ready. This involves each property having a number that Gets Ready recognises. Currently, there is not numbering for each property at Arthur's Pass and some properties have different numbers on different databases. I request that SDC review and update property numbering at Arthur's Pass so that every property has a number which is the same on all databases.
Staff Recommendation	*The submission is acknowledged. Staff recommend that this issue be followed up on and considered as part of the next Annual Plan*
Point Number	1319.25
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	***There are other issues which I believe are important and need to be addressed for the Arthur's Pass area.***

	• **Tourism Increase / Te Araroa Trail** - In the Malvern Area Plan 2031 it is stated that " Arthur's Pass Village is an important tourist destination, with opportunities available to further promote the township and the National Park as a tourist destination." As tourism is increasing and the numbers walking the Te Araroa trail skyrocket I believe that SDC needs to review the services required and provided in Arthur's Pass to meet the increasing demand. Over the summer it is particularly evident that the Department of Conservation camping area, adjacent to the Information Centre, is inadequate for the number of travellers wishing to camp. • There needs to be a publicly owned and operated area for camping and along with that provision of a publicly owned and operated showering facility. The Malvern plan also states that " Any new development should be located within or close to areas currently serviced with reticulated water and should utilise the capacity remaining in the Sunshine Terrace Wastewater Treatment Plant or other community systems ahead of on-site wastewater disposal". " Mana whenua have concerns with on-site wastewater treatment and disposal systems" and the potential for environmental contamination. This is an issue that needs to be addressed urgently
Staff Recommendation	Submission is acknowledged by Council. Council does not have plans to establish a campground at Arthurs Pass and has limited land holdings in that area that would be suitable for this type of facility. Additional camping space and associated facilities at Arthurs Pass may be better provided by DoC who already have facilities in this area. It is recommended that this submission is referred to the Department of Conservation for consideration.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes one indoor court. **Project cost:** Year 3: $7.07 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $5.97 million)

	Estimated impact on rates (per year): $11.67 **Funding:** Rates: 57% Development contributions: 43% * Our budgeted option **Comment:** Options should be investigated for use of other (non-council) facilities within the community (such as School facilities) to delay expenditure.
Staff Recommendation	It is acknowledged that the submitter has selected Option 2, build the community recreation and sports facility at Darfield that includes one indoor court.
Point Number	1321.5
Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1321.8
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	while I am in support of community pools remaining open, council will need to balance this cost against usage. current signage and

	public information does not promote high number of users of this facility. Charges for attendance need to include a variety of payment options, including season passes etc. Community pools are an important resource for children to learn water safety - much needed in our community.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1321.9
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Cautious support - strategy should support development that provides services / employment in a way that meets community needs and minimises disruption (noise, pollution, traffic congestion)
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and Council will consider their feedback in strategy action planning.
Point Number	1321.10
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	I support the work planned regarding the Māori contribution to Council Decision-making policy. council decision-making needs to be strongly informed by local Runanga.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1321.11
Category	Activity > Strengthened Partnerships
Comments:	I support stronger relationships between council and Mana Whenua.
Staff Recommendation	The submission is acknowledged.

Point Number	1321.12
Category	Activity > Chlorination
Comments:	Action should continue on plans to provide (where possible) safe drinking water without the need for perpetual / constant chloranation.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1321.13
Category	Activity > New Public Transport Services
Comments:	There need to be improvements in public transport within Selwyn - particularly from Darfield and Leeston into Rolleston, Lincoln and Christchurch.
Staff Recommendation	Council will be investigating what further PT services can be provided across the wider District, further to what Environment Canterbury can provide. Environment Canterbury is considering developing a business case for additional direct services for Rolleston and Lincoln in 2024-27 including investigating 'On Demand' Services as another option within larger townships.
Point Number	1321.14
Category	Activity > Compulsary organics collection
Comments:	Compulsory Organics collection - This should be done in the lowest cost model possible. Households who compost food and garden waste will have little use for this service, for many this will be an unneeded expense to be added to the cost of living.

Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. We do acknowledge that this is an additional unwanted burden for those who already compost their own food scraps and garden waste at home. This regulation is outside of Council's control. The Ministry for the Environment has issued a directive that households in all urban areas with a population of greater than 1,000 residents must have a food scraps/organic collection by 1 January 2027. Every Council in New Zealand is obligated under the Waste Minimisation Act to comply with this.
Point Number	1321.16
Category	Activity > Other Categories identified by Staff > Infrastructure Property General
Comments:	Infrastructure Strategy: A cautious approach needs to be taken when determining which strategic assets are needed - and when they are needed by. Some community / recreational infrastructure may need to be delayed to allow prioritisation of key assets such as sewerage and fresh water, while keeping a limit on increases in rates.
Staff Recommendation	Submission is acknowledged. This submission is considered within the context of the 'big decisions'.

Point Number	1323.7
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	Hello, My name is Alina Boyce, I am making an individual submission to support Squash New Zealand, Squash Canterbury, Rolleston Squash Facility Development Group's Request for construction of a

	multisport capable Squash focused sport facility in Rolleston. I have resided in Rolleston since 2015. I have been an active an engaged squash player since the age of 14 years old. Moving to Rolleston, I was surprised to learn it lacked an accessible squash club. I currently travel into Christchurch, or over to Lincoln University to play. There are only two courts available at Lincoln University and it is difficult to get a booking. My son is showing an interest in playing squash, and will have to travel into Christchurch to join a club junior squash program as there is none in Rolleston. Having a Squash facility in Rolleston means I will be able to play the sport I love more. My son will be able to play without having to travel into Christchurch. On a wider level more juniors will be able to be introduced to this sport and be able to play locally. Regards, Alina Boyce
Staff Recommendation	Staff recommend that the submission is acknowledged but the funding requested is not approved. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input, Squash being one of them. Staff note that existing facility utilisation has not been outlined in the submission. Staff recommend that this facility be included as part of a wider community facility funding and planning project.

Point Number	1324.5
Category	Activity > Other Categories identified by Staff > Rates
Comments:	. SUBMISSION General Rates 2.1 ESAI acknowledges that territorial authorities nationwide are under considerable pressure to deliver significantly improved environments and major implementation of new rules and regulation. This has been brought about by significant and rapid policy changes imposed at the national scale, bringing increased pressure to fund not only the existing functions of the councils but introduced several changes and requirements that must be adhered and responded to. ESAI appreciates that this has likely come with an increased 'price tag'. However, this pressure has arrived precisely at a time when farms and rural businesses are faced with extreme production cost increases matched with considerable decreases in end product value. A substantial rise in rates is therefore unsustainable in the rural sector at this time and foreseeable future. 2.2 Any form of rate or user charge will impact on rate payers and ultimately the regional and national economies. ESAI is particularly concerned with the substantial increase in rates likely to impact rural properties in Selwyn. For example the projected combined SDC and Environment Canterbury rates increase on a 250ha rural Ellesmere property could be nearing $30,000 by 2034. 2.3 ESAI recommends: That rates increases be spread more evenly across the 10 year LTP therefore diminishing the impact of the considerable rise forecast in 2025 and 2026. 2.4 ESAI does not accept the simplistic assumption that a property's value has a correlation to income, ability to pay or the services it requires. Much of the district council's functions and support is to the benefit of all rate payers. 2.5 ESAI recommends: That further consideration is given to the application of Uniform Annual General Charges (UAGC) as a mechanism for applying fairer rates payments across all ratepayers.
Staff Recommendation	That the submission is acknowledged by Council.

Point Number	1324.7
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Economic Development - Page 42 of LTP Consultation Document 3.4 While ESAI supports SDC playing a supportive role in the district's economic development, ESAI does not believe that this is a core role of the Council. ESAI is concerned that the Council is proposing a major budget spend, $9 Million, on economic strategy. ESAI opposes the enormity of this spend at a time when rate payers will struggle to meet their household, property and rating costs. ESAI Recommends: 3.5 That the SDC significantly reduces the proposed economic development budget by at least 60 percent
Staff Recommendation	It is acknowledged the submitter has not selected an option as to whether the Economic Development Strategy should progress, but holds a view to reduce the proposed allocation. The proposed allocation is a contribution from the Council towards activity that will stimulate and support the local economy. Councils' contribution to economic development is alongside others who are expected to contribute significantly more overall. Council is involved in and has access to important levers in Economic Development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. Every cent of spend will be scrutinised and planned for to ensure outcomes and returns are maximised from the spend. Action plans will outline this in detail.
Point Number	1324.8
Category	Activity > Strengthened Partnerships
Comments:	Strategic Relationships 3.6 SDC has highlighted the intention to develop a strengthened partnership with mana whenua. ESAI considers that this focus should also extend to all relationships with the wider community. Communities are important to maintaining and growing district connections and often act as a conduit to more efficient and positive outcomes. The SDC Significance and Engagement Policy is generally acceptable but in some Ellesmere Sustainable Agriculture Inc. 5 instances is not implemented efficiently or effectively; tending to isolate some groups or consulting highly affected parties too late in the development of projects or initiatives. Consequently, this may result in more funding being spent

	or reaching outcomes that are not suitable for any of the interested parties. Unfortunately some recent projects from Council appear to have avoided community input at the outset which has resulted in protracted development phases and more cost. ESAI Recommends: 3.7 That SDC adheres to the Significance and Engagement Policy and engages and consults all potential interest groups throughout projects or initiatives that will directly affect ratepayers; setting and following consultation pathways that are open and inclusive. Ellesmere Sustainable Agriculture Inc. thanks the Selwyn District Council for considering this submission
Staff Recommendation	Council staff note the submitters expression of support for strengthening the partnership between Council and mana whenua. The submitter makes the point that Council needs to improve timing, reach and range of its engagement with community and relevant community groups in regards to significant community projects, and Council recognises the importance of improving how and when we communicate and engage community and affected / interested community particularly in regards to environmental projects
Point Number	1324.10
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	MATTERS FOR COMMUNITY GUIDANCE Infrastructure Strategy 3.2 ESAI wishes to bring to the Council's attention the serious need to address and apply significant budget towards coastal protection and drainage infrastructure. Parts of the district's coast line are under threat of coastal inundation and lack of suitable drainage. There are now consistent breaches of the sea bunds causing major issues for some specific properties and migratory fish strandings. In addition many lowland stream and drain outlet culverts that drain into the sea are no longer fit for purpose nor adequately maintained. ESAI Recommends: 3.3 That urgent attention and funding is allocated to investigating and actioning the relocation, upgrade and/or appropriate ongoing maintenance to protect the Selwyn coastal environment, drainage network and associated infrastructure.
Staff Recommendation	The submitters comments are acknowledged. This year Environment Canterbury consulted on developing a new targeted rate for 'district-wide flood and river resilience in Selwyn'. As part of Selwyn District Councils verbal submission on this proposal, we asked that coastal inundation is also included within the scope of this rate. Environment Canterbury is considering short term coastal adaptation options for the Taumutu area in conjunction with affected landowners. Existing banks/bunding in this area are not managed or

	maintained by either Selwyn District or Canterbury Regional Council. Selwyn District Council budget to maintain rated land drainage assets. Staff recommendation is to continue to support the Environment Canterbury short term adaptation discussions and consider funding a half share of short term works at $45,000 to reduce risk to Land Drainage assets.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1325.7
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	In the last LTP, it was decided by council to build a purpose built facility for Affinity Gymnastics Academy, to rent from the council, however this has not been undertaken. We have a huge need for this in the area, as it is a sport that is fundamental for all other sports to follow on from. There are no suitable building in Izone, Rolleston, or Selwyn.

	Affinnity are in a building that is not suitable for the gymnasts. It is cold, damp and wet in winter and boiling hot in Summer. It would be great to have the council decide to build for Affinity or find suitable land for them to build on. Affinity brings a large number of visitors to the area, hosting 3 competitions per year bringing over 800 particpants from all over NZ each competition. We are the largest sporting club in Selwyn, however, have no support for a building. However, council are happy to build more Rugby pitches, floodlights for them and courts etc funded by the ratepayer.
Staff Recommendation	The submission is acknowledged. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input. This excludes existing or proposed Council facilities as part of the Long Term Plan. Staff recommend that this facility be included as part of a wider community facility funding and planning project with gymnastics as a potential individual case study along with other facilities such as a performing arts and a military museum or similar to provide a variety of examples.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1326.7
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	1. The poor state of a number of high-use roads in the district is a major concern, especially given likely increasing traffic use due to new subdivisions. The upgrade to Ellesmere Road and the Ellesmere / Lincoln-Tai Tapu intersection upgrade should be brought forward from 2027/28. There is also no mention about any plans to upgrade both Springs and Birches Roads between Lincoln and Prebbleton. Both roads are increasingly dangerous with poor surfaces and intersection crashes. With already high commuter use this will only get worse with the expected population increase with the PC69 subdivision.
Staff Recommendation	Submission is acknowledged by Council. Prioritising repairs and improvements to our major routes is already happening.
Point Number	1326.8
Category	Activity > Lincoln Town Centre Upgrades
Comments:	2. Investment into the Lincoln Town Centre need to be a priority. Further delay and lack of investment in Lincoln is not acceptable especially given the town is going to almost double in size with PC69 subdivision. This should include the Gerald Street and Birches Road intersection traffic lights brought forward to the next 3 years, rather than

	2029/30. Traffic lights should be installed in the centre of the village at Gerald and William / Robert Street intersection.
Staff Recommendation	Submission is acknowledged by Council. The other 3 signalised intersections along Gerald St are needed first to cater for the traffic growth at those intersection and to tie into the adjoining street works. They are not included at William Street as the breaks in traffic created at West Belt will assist in providing crossing opportunities in the town center. The section of Gearld Street between the Liffey and West Belt will have slower speeds and improved facilities for pedestrians.
Point Number	1326.9

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1327.7
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	I am in favour of supporting Affinity Gymnastics Academy for future development of their building. It is the largest Charity sports club in the Selwyn District with supporting and including all children to further develop fundamentals skills which is important for all other sports. Gymnasts have also represented Canterbury since they have opened and have a vision and potential for future New Zealand gymnasts. As well as this, schools in the area and preschools as far as Merivale continue to use the facility for their children to learn and develop each term. Affinity currently pays $160,00 per year in rent to a private landlord for an unsuitable building. Ensuring all gymnasts and coaches are safe in our building is a top priority and with no heating in the winter, as the council took this out, this is less than ideal. The council should commit to helping Affinity with some land or a building to continue to support the community.
Staff Recommendation	The submission is acknowledged. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input.

	This excludes existing or proposed Council facilities as part of the Long Term Plan. Staff recommend that this facility be included as part of a wider community facility funding and planning project with gymnastics as a potential individual case study along with other facilities such as a performing arts and a military museum or similar to provide a variety of examples.

Submitter Number:	1328	**Submitter:**	kathryn claridge for Lincoln Community and Residents Association (INC)
Organisation:	Lincoln Community and Residents Association (INC)		
Point Number	1328.2		
Category	Activity > Lincoln Town Centre Upgrades		
Comments:	The Lincoln Community and Residents Association(INC) supports the decision to allocate funding for the upgrade of Gerald Street as suggested in the Selwyn District Council Long Term Plan. Recent community consultation on the 4 stage approach to the upgrade of Gerald Street has however raised the following concerns for consideration: • The community has been concerned for some time about the state of the roading around Lincoln and in particular Gerald Street. Although the Lincoln Town Centre Plan was adopted in 2016, no work has been done apart from repair work which is continuing to fail and cost money and the population and traffic numbers continue to rise. The committee believes that it should therefore be a Council priority to progress this Plan much quicker than the draft plan suggests. • The Association would like to see the rebuild of the Gerald Street infrastructure as well as roading and parking soon as possible, including footpaths, pedestrian crossing, undergrounding of overhead utilities, sensible and safe cycleways, traffic lights and a speed restriction. • The community is concerned about road safety around Lincoln and would like consideration to be given to roading		

	around the schools and to creating a traffic bypass (removing heavy traffic off Gerald Street) • The community believes the council needs to re-consult with the community about the Lincoln Town Centre Plan and the council needs to listen to the concerns of the community. Thanks Kathryn Claridge Chairperson Lincoln Community and Residents Association 2/5/2024
Staff Recommendation	Submission is acknowledged by Council. The outcomes sought by the Residents Association are included what the Council is planning to provide for Gerald St. The Council will be starting the upgrade of the Lincoln Town Centre and Gerald Street in stages starting in 2024 at the Liffey end and finishing at Springs Rd in 2030. This is estimated to cost $45M and includes cycle lanes, power undergrounding, 4 sets of traffic signals, replacement of the failed carriageway and public carparks. A Southern Bypass of Lincoln had been considered before and discounted by Council due to the unwillingness of developers to accommodate it, comparatively low use, and high cost. Gerald St is an arterial road so must accommodate a variety of traffic types. The redesign of Gerald St will reduce vehicle speeds through the township which may in turn redirect through traffic onto other routes. Councils roading programme includes a future project to form Collins Rd to Ellesmere Rd to provide another route for Lincoln South development traffic other than Springs Rd. This attempted to be pinned to the Plan Change outcomes but was not agreed to. Council will be consulting with the Community when the more detailed plans and options are available. Council has a programme to lower speeds for schools supported by the necessary infrastructure. Currently awaiting NZTA approval.

Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the continued development of an economic development strategy? Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1333.4
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Comment:** Prefer to have a park and ride facility built in Lincoln without Waka Kotahi Funding. The Lincoln routes (esp with the additional direct service) are well used. A dedicated place for parking might encourage more people to drive a short way and use the bus into town.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council
Point Number	1333.5
Category	Activity > Planning Further Community Facilities
Comments:	Thank you for the community events and courses run through the Library and Events departments. Please keep providing them.
Staff Recommendation	The submission is acknowledged.

Submitter Number:	1334	**Submitter:**	Details Withheld
Point Number	1334.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** SDC has too many proposed plans for money they don't currently have. Object to building Park and Ride facilities and their cost.		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP		
Point Number	1334.2		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake		

	prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** Due to high cost of this proposal (Leeston) I do not support anything other than a repair option.
Staff Recommendation	The submission is acknowledged.
Point Number	1334.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1.

	Do nothing. Use the existing park facilities and remove or replace old and unsafe items in the park. **Project cost:** Year 1: $143,000 **Estimated impact on rates:** Included in our current rates **Funding:** Rates: 100% **Comment:** Council needs to cut, and seriously downgrade any proposed spending, as the proposed rates increases are already too large.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1
Point Number	1334.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:**
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	1334.5

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1334.7
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Refurbish pool and resolve land stability and ownership issues.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1334.8
Category	Activity > Chlorination
Comments:	I object to chlorination of all Selwyn water supplies and want this ceased. I want SDC to apply for Exemptions from chlorination.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be

	used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1334.9
Category	Activity > Providing safe drinking water
Comments:	I object to investigation about water centralisation. I object to water centralisation.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1334.10
Category	Activity > Potential Requirements To Fluoridate
Comments:	I object to any proposed fluoridation of any water supplies now or in the future.
Staff Recommendation	The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.
Point Number	1334.12
Category	Activity > Lincoln Town Centre Upgrades
Comments:	Lincoln Torn Centre upgrades: I object to doing this.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1334.13
Category	Activity > Planning Further Community Facilities
Comments:	Planning further community facilities: should be put on hold in the current economic climate.
Staff Recommendation	The submission is acknowledged. Over the next year Council will be reviewing the network of public-facing facilities across the Selwyn District (libraries, community centres, halls, sports centres and pavilions). This work will take a holistic look at all facilities to plan for

	short, medium and longer-term community needs. It is recognised that a number of Council owned halls and centres have an extensive history in Selwyn and it is also recognised that there are some halls / community centres that are now underutilised by the local community and may be facing large costs in maintenance and / or remediation. The review will help Council better understand issues, opportunities and barriers and to consider alternative options for the future.
Point Number	1334.14
Category	Activity > Council's Office Improvements
Comments:	SDC Rolleston Office improvements: I object to this.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	1334.15
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	SDC should stick to their core functions.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1334.16
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	I object to all upgrades of water and wastewater services.
Staff Recommendation	The submitters preference to not upgrade water and wastewater services is acknowledged. Staff recommendation is to continue with the 5 waters capital programme as budgeted.
Point Number	1334.17

Category	Activity > Maintenance and Renewals Funding Roading
Comments:	I strongly object to the widening of Ellesmere Road from Edward Street to Knights Stream. I live on Ellesmere Road, but have had no notification that this is going to occur or what the cost to ratepayers will be.
Staff Recommendation	Staff do not support the submission because Widening of Ellesmere Road is necessary to handle increase in traffic between Lincoln and Christchurch.
Point Number	1334.18
Category	Activity > Other Categories identified by Staff > Debt Levels
Comments:	BORROWING: SDC appears to be planning to borrow significantly more than it brings in per annum for Rates. I object to this.
Staff Recommendation	That the submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.
Point Number	1334.19
Category	Activity > Other Categories identified by Staff > Rates
Comments:	RATES LEVELS AND LIMITS: I object to SDC planned rates increases of approx 16%+ for the first year, double digits for the next three years, and a proposed 10% increases in rates for the remaining 6 years. The SDC has to budget according to its income. Rates are forecast to double in the next 10 years. SDC should stick to core functions.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1334.20

Category	Activity > Maintenance and Renewals Funding Roading
Comments:	NZTA transport requirements: SDC is proposing to spend $19M on roading. I object to this amount being spent and want it eliminated or revised downwards.
Staff Recommendation	Staff do not support the submission because neglecting road repairs and maintenance causes increased maintenance and repair costs in future years.

Submitter Number:	1335	**Submitter:**	Blanche Fryer
Point Number	1335.2		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	1, I am making a submission to the long term plan that the Council includes the Upper Selwyn Huts in the district wide rates for water and sewer like every one else. I have made submissions before for the Towards25 that they should be included as the document stated 'The Council proposed..... this proposal will also help keep these services affordable for smaller communities. I feel the UPH have been discriminated against . There is a culture of dislike from from several of the councilors who just want to see the back of them! 2, The Huts are a Historic Settlement since 1889, and the have become substantial homes over the years and especially in the last 20 years. Many of them still display the charm of the historical Selwyn District which is an unusual sight amongst the tsunami of development . I request that the USH be recognized as place of Historical Significance and listed as a historical site on District Plan.		

Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Submitter Number:	1336	**Submitter:**	Flynn Naysmith
Point Number	1336.3		
Category	Activity > Planning Further Community Facilities		
Comments:	I am a high school student here in Selwyn and want to say that I am disappointed that the Arts and a specific Performing Arts Space such as a theatre hasn't been considered. Not every young person in the area is into sport and it would be great if a performing arts space could be part of the plan. Please consider the benefits of such a space to young performers in the area who at the moment have nowhere. Such a space would enhance Selwyn for everyone.		
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.		

Submitter Number:	1337	**Submitter:**	Letitia Lum for Te Ara Kākāriki Greenway Canterbury Trust

Organisation:	Te Ara Kakariki Greenway Canterbury Trust
Point Number	1337.2
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	**Background** Te Ara Kākāriki Greenway Canterbury Trust (TAK) is an Incorporated Charitable Trust with the mission to create a 'greenway' or corridor of native biodiversity dots between the Waimakariri and Rakaia rivers, linking the Canterbury Foothills to Te Waihora Lake Ellesmere and the sea. TAK has been undertaking indigenous habitat creation and enhancement since 2009, working with landowners, schools, ecologists, and community volunteers to achieve our mission. This year we will plant our 250,000th native ecosourced seedling and our 150th Greendot site. We have a long history of delivering successful outcomes and an excellent reputation for engaging the community, raising awareness and understanding of local biodiversity. With Selwyn District Council support we provide restoration planning, plant grants for landowners, community volunteer and educational school planting events and administration of the trust. Te Ara Kākāriki's work contributes to SDCs efforts to improve residents' well-being, one of the main purposes of local government as stated in the consultation document. • Environmental well-being - Increasing indigenous vegetation cover aids the council's goals of enhancing biodiversity, improving water quality, and creating low carbon towns. • Cultural well-being – People of many cultures participate in our community and school planting days which often incorporate education on cultural uses of rākau / plants and the history of the land. • Social well-being – Our events contribute to Waikirikiri Selwyn being a great place to live, providing opportunities for community to enjoy time together and build connections. **What we are asking**

	We are grateful for our strong working relationship with SDC, enabling the success of our programmes, engaging the community to restore indigenous biodiversity in Canterbury. Selwyn District Council has contributed $40,000 annually to TAK over the past three years through strategic partnership funding / the Selwyn Natural Environment Fund. This funding is a crucial part of our success, which is why we request an ongoing funding commitment with an increase of $6,000 to assist with rising inflation. The trust is reliant on short term grants, making long term planning challenging. Multiyear funding is important because it takes time to choose sites, write restoration plans and for nurseries to supply quality ecosourced seedlings of the required species. It also allows us to build on that funding, giving outside funders confidence in our ability to succeed, increasing the value for SDC who may not usually be able to access those funding streams. Our efforts working with landowners to create greendots within Waikirikiri Selwyn supports the councils 2023 Biodiversity Strategy goal to 'support actions by landowners and our community to protect and restore indigenous biodiversity' and our public planting events 'enhance public awareness of our natural environment'. **In 2023 Selwyn District Council grant made possible the following** • Three public planting days benefitting 130 volunteers and five landowners, • Three Kids Discovery Plantout days benefiting 267 students and three schools. • Planting of 4,592 plants • Funding for plants and guards for ten landowners. • Coordination of the trust, restoration planning and other community engagement days.
Staff Recommendation	This request will be considered by Council within the Long Term Plan Deliberations. Strategic Partnerships are part of the Council's Community Funding Programme and any arrangements with groups are generally made for three years, subject to performance and delivery. A submission to Council's Long-Term Plan process, plus strong alignment with Council's strategic direction and role is required for consideration for this fund. The activities funded are generally activities that, should they not be delivered, might reasonably be expected to be the responsibility of Council or impact an aspect of the District's

	wellbeing.
Point Number	1337.3
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	The big decisions asked in the submission survey aren't very relevant to Te Ara Kākāriki's goals, but we would like to remind the council that where plantings are to be included as part of the community park and recreation facilities that it should be a priority to plant native ecosourced plants and where possible denser planting hubs /greendots should be included to create valuable biodiversity habitat. If, as part of any of the upgrades, any significant planting is planned, TAK welcome opportunities to work with the council to involve schools or community in these projects.
Staff Recommendation	Submission is acknowledged by Council. Council's Tree and Vegetation Policy is currently being reviewed and this will provide for encouragement of indigenous planting in parks where this can be practically achieved. In addition, budgets have been provided in the draft LTP to undertake further biodiversity plantings and indigenous revegetation restoration in existing parks and reserves. A total of $519,100 has been provided over the 10-year planning period for biodiversity planting programmes. It is also noted that some of the development programmes for new parks (e.g. Lincoln Domain extension, Kakaha Park Stage 2) include significant indigenous planting.
Point Number	1337.4
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	**A large ecosanctuary** Te Ara Kākāriki have a long-term goal to plant a large ecosanctuary and we would like to see SDC adopt this goal also. An ecosanctuary would ideally be 1,000ha but even 100ha at this stage would be a

great asset to Canterbury's biodiversity as well as strengthening our community's relationship with the environment.

We are aware there is possibility of an ecosanctuary in Christchurch, but this does not mean we don't need another in Selwyn. Our existing remnants are small and not able to support populations of our most threatened wildlife species. We have heard the benefits of Wellington's Zealandia and Dunedin's Orokonui and now is the time to create something similar for Canterbury's future residents and wildlife.

With our recent experience planting 3.5ha and 6ha Greendots and management of field staff through our Jobs for Nature programme we feel we are ready to upscale should the opportunity arise.

The Huritini Halswell River

The Huritini Halswell River is an area where we would like to see more biodiversity enhancement and we would be enthusiastic to work with SDC on this also.

The Huritini is a Spring fed river flowing from the Christchurch suburb of Halswell and the Waikirikiri Selwyn suburb of Prebbleton. It is an important tributary of Te Waihora Lake Ellesmere, a lake of national significance, cultural importance, and habitat for a diverse variety of indigenous bird species, many of which are threatened.

Te Ara Kākāriki would be interested in any opportunity to work alongside SDC to improve the mauri of the river by restoration of the land directly along it, engaging the growing community surrounding it in its care, as has been seen with the Ararira Lll and Christchurch rivers to improve water health and habitat for aquatic and terrestrial wildlife.

Te Ara Kākāriki Professional Restoration Services

As our three-year Jobs for Nature programme comes to an end in July, we are not ready to lose our highly competent staff or return to

	lower restoration outputs. In response to this, the trust be offering paid professional restoration services to local authorities and private landowners. This will include planting, site preparation and maintenance, predator control and other restoration activities. The aim of this new venture is for the income to pay our employee wages with surplus funds paying them to assist with our community and school planting programmes and any other Greendot restoration work needed. If there are surplus funds raised through this, they will go towards our community and school programmes to either decrease our reliance on grants or enable us to allow more landowners or schools to participate in our programmes.
Staff Recommendation	Council supports the notion of an ecosanctuary and the need for larger areas of native restoration sites. Staff also recognise the significance of the Huritini Halswell River and the need to take a catchment-based approach to improving the river and its margins from an indigenous biodiversity perspective. They are happy to work with TAK, the local community, and Environment Canterbury on this initiative.

Submitter Number:	1338	**Submitter:**	Sue Stokes for Malvern Swim School
Organisation:	Malvern Swim School		
Point Number	1338.1		
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility		
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1.		

	Build a community recreation and sports facility at Darfield that includes one indoor court. **Project cost:** Year 3: $7.07 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $5.97 million) **Estimated impact on rates (per year):** $11.67 **Funding:** Rates: 57% Development contributions: 43% * Our budgeted option **Comment:** Yes, only if it doesn't come at the expense of the Sheffield Memorial Pool.
Staff Recommendation	It is acknowledged that the submitter has selected Option 2, build the community recreation and sports facility at Darfield that includes one indoor court.
Point Number	1338.2
Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the closure of Sheffield Community Pool? No **Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1338.3
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	To whom it may concern, The Malvern Swim School business is writing to express their wholehearted support for the retention of a pool facility in Sheffield and to highlight the invaluable benefits that rural facilities like this bring to our community. We began running lessons out of the Sheffield Memorial Pool back in 2018 for Sheffield School and have over the years, developed a

	relationship with Springfield School that sees us running lessons for their advanced swimmers at Sheffield. Following on from this, we developed afterschool and holiday programmes which this season (2023/24) we were running at full capacity and were hoping to follow this on with running two days afterschool in the 2024/25 season. Running the lessons at Sheffield Memorial Pool has brought home the importance of having lessons accessible in the local community as many of our participants are restricted by being single-car families, unable to drive and the limited time it would take to travel elsewhere for these valuable lessons. It is essential that our tamariki are given the opportunity to develop aquatic skills as the lost of life of any child or adult would be devastating to the community. We have noticed other advantages in having the pool local in the community such as: providing a space for families, friends, and individuals to engage in recreational activities, fostering a sense of camaraderie and unity, overall wellbeing of our residents, both physically and socially, and promotes a healthy exercise lifestyle by offering a place for exercise and relaxation. We also recognise this pool facility is not just that, it is also a war memorial, that was made possible by donations of time, money and land from the community. This will be a devastating lost of the older members of our community who saw those efforts given and takes away a teachable lesson to the younger members by not having the memorial preserved and respected as it should have been. I urge you to support the Malvern Swim School in retaining a pool facility in the area, recognising its role in enhancing the quality of life for residents and contributing to the unique fabric of our rural community. Your support for this facility will undoubtedly have far-reaching positive effects for generations to come. We also would urge the council to maintain the Memorial Pool for the 2024/25 season to give the community time to be consulted and come up with a reasonable solution that works for the community and council. Thank you for your time, consideration, and dedication to the betterment of our community. Sue Stokes - XXXXXXX and Tegan Holdem - XXXXXXXX On behalf of Malvern Swim School
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified.

	The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Submitter Number:	1339	**Submitter:**	Vivienne Wilson for Orion New Zealand Limited
Organisation:	Orion New Zealand Limited		
Point Number	1339.1		
Category	Questionnaire > Matters For Community Guidance		
Comments:			

Question: Do you support the continued development of an economic development strategy? Yes **Comment: Comment: Comment:**

Staff Recommendation Submission is acknowledged by Council.

Point Number 1339.4

Category Questionnaire > BD1 - Transport - Park and Ride

Comments: **Comment:** Dear Mayor and Councillors Long Term Plan 2024-2034 1.
Thank you for this opportunity to make a submission on the Council's draft Long Te rm Plan 2024- 2034. Background 2.
As you will be aware, Orion owns and operates the electricity distribution infrastruct ure in Central Canterbury. Our network is both rural and urban and extends over 8, 000 square kilometres from the Waimakariri River in the north to the Rakaia River i n the south; from the Canterbury coast to Arthur's Pass. We deliver electricity to m ore than 220,000 homes and businesses and are New Zealand's third largest Elect ricity Distribution Business (EDB). Orion and its various predecessors have been pr oviding this essential service to the region for close to 120 years. 3.
Orion is a Lifeline Utility for the purposes of the Civil Defence Emergency Manage ment Act 2002. Orion has a statutory duty under this legislation to ensure it is able to function to the fullest possible extent, even though this may be at a reduced leve l, during and after an emergency. 4.
Orion has a fully owned subsidiary, industry service provider Connetics, and togeth er with Orion the two organisations make up the Orion Group. 5.
Central Canterbury is a place of rapid growth and transformation, embracing chang e and innovation. Electricity distribution has always been an essential service that underpins regional, community and - 2 -
economic wellbeing. Our service is vital to the wellbeing and livelihood of the peopl e and businesses who live and operate here. Now, it also has a critical part to play in New Zealand's transition to a low carbon economy. 6.
In this context Orion's Group Purpose of "Powering a cleaner and brighter f uture with our community" is central to all we do. As Aotearoa New Zealand transi tions to a low carbon economy, the energy sector has a critical part to play primaril

	y through electrification. Orion has established its purpose to be a vital player in th at transition for our community and our region. We are focused on helping our com munity realise its dreams for a future that is new, better, and more sustainable over the long term. 7. We are very conscious that we face a rapidly changing and massively different ene rgy environment in the decades ahead. The changing landscape facing Orion is p rimarily driven by three factors – climate change, new technology and increasing demand for electricity. The increasing demand for electricity is driven by the ne ed to both enable decarbonisation at pace, and support population growth. 8. In this context, we now set out our comments on the discussion and issues raised i n the Consultation Document. Waka tūmatuanui Public transport (page 26 and foll owing) 9. The Consultation Document refers to the Greater Christchurch Partnership an d the Mass Rapid Transit proposal. It also notes that the Council will need infrastructure that can accommodate increased bus services. Page 28 refer s to the proposal to build three Park and Ride facilities at Rolleston and Linc oln being one of the Council's big decisions. 10. We would like to work with the Council on public transport infrastructure pla nning where that intersects with future energy requirements. We also think this n eeds to be taken into account in the Long Term Plan. Decarbonisation of the trans port fleet in Canterbury will lead to growing demand for electricity as fossil fuels ar e phased out of both private and public transport. Changes to Orion's network infr astructure will be required to support the growing electrification of transport. The overall demand for transport and mode of transport has a significant impact on how Orion plans for these investments. - 3 - 11. Overall, Orion has developed five different possible Future Energy Scenarios for how the energy environment might evolve in the Mid Canterbury region1 . These Future Energy Scenarios are plausible development pathways for ener gy sector transition in our region over the next 30 years. By planning for different s cenarios in 2050 we are able to understand the different potential needs and uses for our network in energy transition, and understanding the development of transpo rt is critical to developing our Future Energy Scenarios. 12. Changes to our network infrastructure are significant investments and can have lon g lag times. This means as much foresight and prior knowledge as possible o f significant changes to urban development and transport planning is critical. We welcome the opportunity to talk to you about this further, and we would like to eng age with the Council to review and validate our energy scenario framework and as sumptions. We think this will be beneficial for both parties.
Staff Recommendation	Submission is acknowledged by Council. Council would be pleased to work with Orion on any mutually beneficial transport outcomes relating to energy supply. Council has facilities companies such as Orion establishing EV public car charging stations on its land. Council has raised with Environment Canterbury that when electric buses are more common in Selwyn then charging infrastructure will be required by bus operators. It is noted the 2023 MRT Study has yet to determine what mode would be used.

Central Canterbury is a place of rapid growth and transformation, embracing chang e and innovation. Electricity distribution has always been an essential service that underpins regional, community and - 2 - economic wellbeing. Our service is vital to the wellbeing and livelihood of the peopl e and businesses who live and operate here. Now, it also has a critical part to play in New Zealand's transition to a low carbon economy. 6. In this context Orion's Group Purpose of "Powering a cleaner and brighter f uture with our community" is central to all we do. As Aotearoa New Zealand transi tions to a low carbon economy, the energy sector has a critical part to play primaril y through electrification. Orion has established its purpose to be a vital player in th at transition for our community and our region. We are focused on helping our com munity realise its dreams for a future that is new, better, and more sustainable over the long term. 7. We are very conscious that we face a rapidly changing and massively different ene rgy environment in the decades ahead. The changing landscape facing Orion is p rimarily driven by three factors – climate change, new technology and increasing demand for electricity. The increasing demand for electricity is driven by the ne ed to both enable decarbonisation at pace, and support population growth. 8. In this context, we now set out our comments on the discussion and issues raised i n the Consultation Document Economic Development (page 42) 13. The Consultation Document notes that the Council is proposing to play a more active role in the district's economic development so that continued development in Waikirikiri Selwyn is intentional, sustainable and strategic. As such, the Council

	is currently considering priority actions for its work through an Economic Developm ent Strategy. The Consultation Document notes that local business sector particip ation will be key to driving and implementing this strategy. Orion supports t his proposal. 14. As part of part of promoting economic development in Waikirikiri Selwyn, we also see local area energy planning as an important component. We discuss this bel ow in the next section.
Staf f Rec om me nda tion	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and Council will consider their feedback in strategy action planning.

Co mm ent s:	See attached submission. Dear Mayor and Councillors Long Term Plan 2024-2034 1. Thank you for this opportunity to make a submission on the Council's draft Long Te rm Plan 2024- 2034. Background 2. As you will be aware, Orion owns and operates the electricity distribution infrastruct ure in Central Canterbury. Our network is both rural and urban and extends over 8, 000 square kilometres from the Waimakariri River in the north to the Rakaia River i n the south; from the Canterbury coast to Arthur's Pass. We deliver electricity to m ore than 220,000 homes and businesses and are New Zealand's third largest Elect ricity Distribution Business (EDB). Orion and its various predecessors have been pr oviding this essential service to the region for close to 120 years. 3. Orion is a Lifeline Utility for the purposes of the Civil Defence Emergency Manage ment Act 2002. Orion has a statutory duty under this legislation to ensure it is able to function to the fullest possible extent, even though this may be at a reduced leve l, during and after an emergency. 4. Orion has a fully owned subsidiary, industry service provider Connetics, and togeth er with Orion the two organisations make up the Orion Group. 5. Central Canterbury is a place of rapid growth and transformation, embracing chang e and innovation. Electricity distribution has always been an essential service that underpins regional, community and - 2 - economic wellbeing. Our service is vital to the wellbeing and livelihood of the peopl e and businesses who live and operate here. Now, it also has a critical part to play

in New Zealand's transition to a low carbon economy. 6.
In this context Orion's Group Purpose of "Powering a cleaner and brighter future with our community" is central to all we do. As Aotearoa New Zealand transitions to a low carbon economy, the energy sector has a critical part to play primarily through electrification. Orion has established its purpose to be a vital player in that transition for our community and our region. We are focused on helping our community realise its dreams for a future that is new, better, and more sustainable over the long term. 7.
We are very conscious that we face a rapidly changing and massively different energy environment in the decades ahead. The changing landscape facing Orion is primarily driven by three factors – climate change, new technology and increasing demand for electricity. The increasing demand for electricity is driven by the need to both enable decarbonisation at pace, and support population growth. 8.
In this context, we now set out our comments on the discussion and issues raised in the Consultation Document.

Climate Change discussion and Climate Change Policy (pages 15 and 55) 15.
We note the general discussion at page 15 of the Consultation Document about the risks facing the Council and the actions the Council is proposing to take to reduce carbon emissions. We look forward to the Council's Emissions Reduction Plan in due course. We support the Council's actions that help our community to decarbonise and improve the long term resilience of Mid Canterbury. 16. The Consultation Document notes at page 55 that the Council is reviewing its climate change policy and will be available to review shortly. 17.
The current policy provides that the "Council will make Climate Change mitigation and adaptation a core component of its planning and decision making and mainstream it into the Council's function and activities." Adaptation is defined in the current policy as: Adaptation is about an ongoing process of adjusting to the actual and expected changes in the environment resulting from greenhouse gas emissions which have already been released into the atmosphere, and those that may be released in the future. Adaptation includes planning for direct impacts on infrastructure, economy, health, safety and wellbeing, and indirect impacts such as potential food and water insecurity, and disrupted health services. It also means adjusting the way we live and work to prepare for a zero-
carbon future and being open to the opportunities this will bring. 18.
Looking forward, we think local area energy planning will be an integral part of the Council's mitigation and adaptation plans. Local area energy planning is an integrated planning approach designed to define detailed place-
based whole energy systems pathways and delivery plans for net zero.2
Overseas literature suggests that collaborative local area energy planning enables a wide range of actors – from local authorities and other public sector bodies to businesses, charities and community groups – to establish an explicit shared purpose to achieve local commitments on net 2 See https://es.catapult.org.uk/tools-and-labs/local-area-energy-planning/ - 5 - zero carbon emissions.3 19.
We look forward to being able to comment on the review of the draft climate change policy and in due course collaborating with the Council and other stakeholders such as Environment Canterbury, Christchurch City Council and ChristchurchNZ in local area energy planning for Mid Canterbury .4

Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. Council is developing a Future Selwyn Strategy that looks beyond the 10-year horizon to consider how we can respond to these challenges. The Council is also developing an Emissions Plan and Sustainability Plan to identify actions into the future.

Submitter Number:	1340	**Submitter:**	Tim Carter for Carter Group Limited
Organisation:	Carter Group Limited		
Point Number	1340.2		
Category	Activity > Lincoln Town Centre Upgrades		
Comments:	Carter Group is a major investor in the Selwyn district. For the last ten years, we have been completing the IPort Business Park development, which includes large format retail and a number of large industrial logistics operators. We have also been selling freehold land to owners/occupiers to invest and build smaller warehouse facilities that provide employment and prosperity to both Selwyn and Rolleston. We recently started a large residential subdivision in Lincoln and are pursuing another large residential subdivision re-zoning in Rolleston. **Lincoln Development** We are commencing the south of Lincoln development in September		

	this year with consents currently in process with ECan, and soon to be lodged with SDC. The first stage of this development will involve 250 residential lots for sale, the provision of a site for a potential primary school, and also provision of a super lot to provide a supermarket and retail amenities. We note that the Lincoln town centre upgrades are included in the long-term plan and are currently budgeted to occur in 2024-2033. I submit that Lincoln is under capacity constraints and the Lincoln town centre upgrade should occur in a more timely fashion. Therefore, bringing forward the lengthy time frame of delivery would ease the capacity and inconvenience to the current and future residents of Lincoln, 2033 is a very long time to wait. In particular, the Spring and Gerald Street traffic signals are scheduled to occur in 2027/28. This intersection is almost near capacity, it can handle the first stage of our sections which we are commencing in September 2024, however, this will end up being over capacity well before the intersection is upgraded. It will create a traffic safety hazard and may potentially slow down the development and payment of our development contributions to the Council. I strongly urge that this be brought forward to the 2024/25 year.
Staff Recommendation	Submission is acknowledged by Council. The District Plan requirements for PC69 require the Developer to enter into a Developer Agreement with Council to establish how the upgrade of the Gerald/Springs/Ellesmere Junction Road maybe achieved beyond its proposed timing that currently aligns with the upgrade of the western end of Gerald Street as part of the Town Centre upgrade plans. For Stage 1 of the proposed PC69 development the Developer has been requested to provide a Traffic Assessment as part of any Resource Consent Application to inform the parties on the traffic effects this will create that need to mitigated, and in particular on the intersection and to consider what further works are required beyond what Council had identified prior to PC69 and timing of the intersection upgrade.
Point Number	1340.3
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	**Rolleston West Re-Zoning** In terms of the Rolleston West rezoning we are furthering this through other processes, as I am sure the Councillors will be aware. However, we are here to formally table the outlined

	development plan that clearly shows closing Dunns Crossing Road and building a major arterial route through our land will relieve and avoid the large amount of traffic congestion currently being experienced by West Rolleston Primary School. This traffic congestion is only going to get significantly worse once the Dunns Crossing roundabout is completed. This plan has been presented numerous times through the planning processes and has generally received unanimous support, and I am sure the Councillors will be aware of this plan and be very surprised that it has not been promoted by the Council.
Staff Recommendation	This suggestion by the submitter has been raised before and discussed with Council and the NZTA Waka Kotahi. It relies on roading connections being created by a private plan change that has been declined by Council. Dunns Crossing Road is classified as arterial road that connects to the south of Rolleston and those urban areas from SH1. It is part of the Rolleston perimeter arterial network established for this purpose. The NZTA adopted plan for the new dual lane roundabout at SH1 is connecting the perimeter arterials of Dunns Crossing Road and Walkers Road together to maintain the integrity of that link. NZTA are currently obtaining the land needed from the property owner for the roundabout and the realignment of Dunns Crossing Road onto it. Council has included the upgrade of Dunns Crossing Road, including a new signalised intersection at Dunns Crossing and Burham School Road to address safety concerns in agreement with the NZTA for both the increase in traffic and provide for the safe crossings for the school. It would be inadvisable to have an arterial road of the function necessary, including catering for heavy vehicles, to rerouted through a new urban high-density development even if it did occur.
Point Number	1340.4
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	
	Comment: Our final point of submission is that we again wish to repeat our submission from three years ago regarding a potential Park and Ride on the northern side of the State Highway. This could be integrated with a public transport provision on SDC land that would have the futureproofing benefit of a multi-modal in the future and the potential to connect with commuter rail if it was established

	in greater Christchurch. This can only be afforded with the original orientation of the overbridge.
Staff Recommendation	One of the planned Rolleston Park N Ride Sites is on the corner of Jones and Hoskyns Road, as discussed earlier with the Carter Group. This enables it to be coordinated with IPORT development opportunities (but is not dependent on it) and also on the main bus route and close to the main trunk rail line should future rail passenger rail transport be considered viable. This is entirely compatible with NZTA Waka Kotahi's selected SH1 flyover 'straight' option.
Point Number	1340.5
Category	Activity > New Public Transport
Comments:	From our point of view, again, we are very surprised that the Council has not strongly promoted their original overbridge location. Our traffic modelling, which Andrew Mazey from the Council is aware of, shows that the straight or now revised NZTA overbridge has a 10% lower traffic capacity than the original skewed overbridge. We are very concerned that this straight overbridge is a shortsighted cost saving exercise by NZTA and it will choke the future potential of Rolleston and Selwyn creating a huge amount of congestion and make the already most dangerous level crossing in the South Island even more dangerous as it funnels all traffic using the overbridge wishing to access the State Highway through this very dangerous level crossing. I wish to speak to this submission. Yours faithfully **Tim Carter**
Staff Recommendation	NZTA Waka Kotahi adopted the Detailed Business Case for the SH1 Rolleston Access Improvements in late 2023. It included a the 'straight' SH1 flyover from Rolleston Dr north to Jones Rd. The 'skewed' option was originally consulted on by the NZTA and received significant public objection from the IZone area to the fact it would cut off the Jones Rd link north to the Weedons Interchange. NZTA reevaluated all options again for a grade separation over SH1

	and the rail line. Through this process the 'straight' option was determined to be best option, which was more cost effective without the draw backs of the original skew option. This was again consulted on by the NZTA and was roundly more accepted by the public which Council has acknowledged. The skew option is longer, more difficult to construct and expensive, and as NZUP is receiving no further funding by central government would not be affordable, placing the whole Rolleston NZUP programme in jeopardy.

Comments:	No need to -strengthen partnership with mana whenua
Staff Recommendation	The submission is acknowledged.
Point Number	1342.8
Category	Activity > Chlorination
Comments:	No need to -to chlorinate water To do -apply for exemption from chlorination.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1342.9

Category	Activity > Potential Requirements To Fluoridate
Comments:	No need to -fluorinate water supply
Staff Recommendation	The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.

Comment:

I oppose the build of Whata Rau when the SDC is not prepared to build a Community Centre for Prebbleton which is twice the size of Leeston.

The SDC has been considering a Prebbleton Community Centre/Hub since 2008.

- In 2010 the SDC identified that our growing community will be inadequate, and a replacement required.
- In 2013 the Strategic Plan made a recommendation to have a more flexible hub facility to cope with population growth.
- In 2016 5 'fast track projects' were identified to "future proof key community space", this included a Prebbleton Community Centre; worth noting is that the four other projects were completed.
- In 2018 a community hub in Prebbleton was planned for 2019-21 at a cost of approximately $5.5M
- The Long-term plan 2021-2031 had an allocation of $6.3M to build a Prebbleton Community Centre in 2025-2026.

At the heart of our needs is a multi-use common space which the Prebbleton Community can utilise as a social hub and retain our identity as a community as we expand in population and diversity. We need a flexible space where multiple events can occur at the same time, or one large community event can take place. We need to be able to provide a greater range of social, health and community services in our area but are currently restricted with a lack of suitable spaces. We also need a space to protect the records and resources under the care of the Prebbleton Heritage groups, as well as a space to remember our proud history in the district.

Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2 and support for a facility in Prebbleton

Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:** People currently travel some distance to attend facilities at indoor sports facilities and our district has one in each of our two largest towns. I am interested to see that funding tagged in the previous long-term plan is mentioned in the options above when the same has not be afforded to the Prebbleton Community in regard to a new Community Centre. We already have people leaving our township to play indoor sports and many to go to other events as we do not have the space for such community/social/educational events. As a reminder: The SDC has been considering a Prebbleton Community Centre/Hub since 2008. • In 2010 the SDC identified that our growing community will be inadequate, and a replacement required. • In 2013 the Strategic Plan made a recommendation to have a more flexible hub facility to cope with population growth.

	• In 2016 5 ‘fast track projects’ were identified to “future proof key community space”, this included a Prebbleton Community Centre; worth noting is that the four other projects were completed. • In 2018 a community hub in Prebbleton was planned for 2019-21 at a cost of approximately $5.5M • The Long-term plan 2021-2031 had an allocation of $6.3M to build a Prebbleton Community Centre in 2025-2026.

Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	The key focus should be keeping local people in jobs and working within Selwyn.
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and Council will consider their feedback in strategy action planning.

Point Number	1343.9
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	While I have ticked 'yes' as all aspects of society have to keep up the technology, there is no need for change for the sake of change. I would like to think that there is a sound business need and that this technology would not be at the expense of any jobs in Selwyn.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Point Number	1343.11
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	I would like to reiterate the submission of the Prebbleton Community Association, as follows: From Prebbleton Community Association to SDC as part of the feedback for the SDC Long-term Plan 2024-2034 **1) Prebbleton Public Hall** In regard to pg 31 & pg 51, re a new community facility in Prebbleton: The Prebbleton Community Association remain disappointed, and somewhat frustrated, to see a Prebbleton Community Centre/Hub excluded from the 'big decisions' for SDC with no commitment of funding and no longer planned for 2025-2026 as per your Long-term plan 2021-2031. The SDC has been considering a Prebbleton Community Centre/Hub since 2008. • In 2010 the SDC identified that our growing community will be inadequate, and a replacement required. • In 2013 the Strategic Plan made a recommendation to have a more flexible hub facility to cope with population growth. • In 2016 5 'fast track projects' were identified to "future proof key community space", this included a Prebbleton

	Community Centre; worth noting is that the four other projects were completed. • In 2018 a community hub in Prebbleton was planned for 2019-21 at a cost of approximately $5.5M • The Long-term plan 2021-2031 had an allocation of $6.3M to build a Prebbleton Community Centre in 2025-2026. At the heart of our needs is a multi-use common space which the Prebbleton Community can utilise as a social hub and retain our identity as a community as we expand in population and diversity. We need a flexible space where multiple events can occur at the same time, or one large community event can take place. We need to be able to provide a greater range of social, health and community services in our area but are currently restricted with a lack of suitable spaces. We also need a space to protect the records and resources under the care of the Prebbleton Heritage groups, as well as a space to remember our proud history in the district. While we appreciate there are fiscal constraints in this current environment, we are not willing to accept that a Prebbleton Community Centre/Hub is once again dropped off the SDC key priorities list being removed from the 2025-26 plan and request that this is reviewed and reinstated in the SDC short term plans.
Staff Recommendation	Staff recommend this submission be acknowledged. A new community centre for Prebbleton has been in considered in earlier Long-Term Plans and was previously signaled for construction in 2025/26. A needs assessment study was undertaken in 2023 which concluded that there was demand for a facility to service the community, and that it should provide a mix of social, community gathering and recreation spaces. The study further concluded that the facility needed to be located so it was easily accessed by the community. As there are uncertainties about the best site for the facility and the activities that it will cater for, further planning and community consultation is needed. To enable time for the necessary planning to happen, the project has been programmed for 2026/27 to 2027/28.
Point Number	1343.13
Category	Activity > Other Categories identified by Staff > Road Safety

Comments:	I would like to reiterate the submission of the Prebbleton Community Association, as follows: From Prebbleton Community Association to SDC as part of the feedback for the SDC Long-term Plan 2024-2034 **2) Road safety in Prebbleton** With the increasing traffic utilising Prebbleton Roads as a throughfare we remain concerned regarding pedestrian safety, especially on Springs and Birchs Road. We have heard of a number of incidents and near misses at the pedestrian crossing nearest The Prebbleton Village, Springs Road and given the number of 'distractions' (vehicles turning, cars waiting to join the traffic at the street shopping area, signs) and high volume of traffic, we beleive that further work is required to raise drivers awareness of this pedestrian crossing, with appropriate technologies such as warning marked on road re upcoming crossing and/or flashing beacons and/or a raised crossing. Additionally, we believe that the above-mentioned pedestrian crossing and at the bus stop on Birchs Road (by Glenwood Drive) require further safety measures in the form of refuge points in the middle of the road where pedestrians can stop. This is because of both the increased traffic in these areas as well as the need for greater safety for our children, people with disabilities and elderly community members many of whom may not be able to cross a busy road quickly. The PCA has also previously advocated for something like the red road highlights (used at some stop signs) so motorist reduced speed at the entrances to Prebbleton on Springs Road and now request this also Birches Road, with the continuous housing developments in Lincoln.
Staff Recommendation	Submission is acknowledged by Council. Council is reluctant to introduce speed reduction infrastructure like speed bumps etc, until it is clear from central government what is to happen with speed limits. Communications from the minister is that there could be some speed limits that need to be raised. Council is aware of the concerns with the Springs Road crossing. Crossing upgrades are prioritised and upgraded accordingly.

Point Number	1343.14
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	No issues; one has to trust that those with the working knowledge of the policies and the necessary legislative, cultural, economic and social implications have been taken into consideration.
Staff Recommendation	Submission is acknowledged by Council.

Point Number	1343.15
Category	Activity > Other Categories identified by Staff > Crime/district safety
Comments:	I would like to reiterate the submission of the Prebbleton Community Association, as follows: From Prebbleton Community Association to SDC as part of the feedback for the SDC Long-term Plan 2024-2034 **3) Safety in Prebbleton** The PCA have previously spoken with Councillor Lyall regarding the safety in Prebbleton as we experience an increase in petty crime, car thefts and break-ins. We believe Prebbleton would benefit from security cameras in key locations including main entrance and exits points of the township, and in the main shopping area; this would give the community an increased sense of security as well as help Police identify vehicle movement. If there is anything the PCA can do to help the SDC expedite any of these issues, please contact us. We will also be sending this feedback to our local councillors and requesting formal feedback on each item.
Staff Recommendation	Submission is acknowledged by Council. This matter has been raised with the Council before and at that stage was not progressed. The Council is in regular contact with the police and will raise the matter again.

Submitter Number:	1344	**Submitter:**	Fiona Bennetts
Point Number	1344.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:** Ideally Waka Kotahi NZTA would co-fund improvements to poublic transport, bit it that isn't the case, these improvements cannot wait and need to go ahead as soon as possible to help reduce green house gas emissions (we are in a climate crisis) and give people options for travelling in more environmentally-friendly ways.		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council		
Point Number	1344.2		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed		

	to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan, but with additional sports courts and/or bigger community meeting spaces. **Project cost:** Year 1: 19.24m **Estimated impact on rates (per year):** $53.14 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** Construction only eevery gets more expensive. It's better to meet current and future demand as best as can be predicted now.
Staff Recommendation	The submission is acknowledged.
Point Number	1344.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements

Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Carry out the upgrades detailed in the Leeston Park Master Plan over 15 years, including new pathways, carparks, toilets, park furniture, sports field lighting and irrigation, trees and plants, playground extension and upgrades, and park extension and signage. **Project cost:** Years 1-15: $9.49 million **Estimated impact on rates:** Years 1-5: $10.23 Years 6-10: $6.05 **Funding:** Rates: 71.4% Development contributions: 28.6% * **Comment:** Spreading the cost over 15 years and delivering a much better facility sounds like the best option for current and future users. Please ensure there is bicycle parking in convenient locations e.g. next to toilets.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 3 and note the bicycle parking suggestion
Point Number	1344.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1.

	Build a community recreation and sports facility at Darfield that includes two indoor courts. **Project cost:** Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million) **Estimated impact on rates (per year):** $19.91 **Funding:** Rates: 57% Development contributions: 43% * **Comment:** One indoor court is never going to be enough long-term (or even in 5 years' time). Future proof now and save more money in the long run. These lonmg term plans really need a 30-year vision overview.
Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.
Point Number	1344.5
Category	Questionnaire > Matters For Community Guidance
Comments:	
	Question: Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1344.7
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool

Comments:	Being able to walk or bike to the local pool is crucial for equitable access to amenities. As summers get hotter (climate change) and more people more into Canterbury (global migration as well as within NZ) we are going to need more pools not less to service the community needs. Edgeware pool in CHC was closed and we are only just getting it back in the next few years. It was a silly mistake to remove it (and others like it).
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1344.8
Category	Activity > Walking and cycling improvements
Comments:	- I support rural walking and cycling improvements. Please accelerate these initiatives to change transport habits and provide more cycling tourism connections. Please build direct cycling links between each town/centre. Please extend the shared path alongside the southern motorway between Prebbleton and Rolleston.
Staff Recommendation	Submission is acknowledged by Council. Cyclepaths along State Highways are planned by NZTA and the current government will not fund them.
Point Number	1344.9
Category	Activity > Walking and cycling improvements
Comments:	- Please provide a digital & printed map of cycling infrastructure (similar to CCC) and clear signage on the ground. I asked for this 3 years ago and still nothing has been done.
Staff Recommendation	Staff support the submission because a cycling map will be helpful in promoting active transport in the district. Funds and resources are made available to provide detailed maps by the GIS team, starting with urban areas first. Travel demand management funding request provides for its further development.
Point Number	1344.10
Category	Activity > Other Categories identified by Staff > Speed Management
Comments:	- I support slower speeds in towns, especially around schools and community spaces like libraries, playgrounds and sports facilities, and rurally (60 or 80 km/h rather than 100 km/h). RCAs retain the

	ability to set safe and appropriate speed limits regardless of what the Minister thinks. Please continue to lower speeds (all residential streets should be 40 or 30 km/h, with only a few arterials roads at 50 km/h), as this will save lives and make the district feel safer for all people, not just those inside motor vehicles.
Staff Recommendation	Submission is acknowledged by Council. Council has previously consulted on a full speed management plan which reflected your submission, we need to give some consideration to the consultation results, which were largely unsupportive of speed limit reductions. We are now dependent on central government to outline how speed limits are to be managed and update our full speed management plan accordingly.
Point Number	1344.11
Category	Activity > New Public Transport Services
Comments:	- I support the investigation of public transport improvements in addition to the services that Environment Canterbury provides, while also pushing ECan to provide more routes between towns, e.g. hubbing off Rolleston out to Prebbleton, West Melton, Kirwee and Darfield; linking Tai Tapu to Lincoln and Halswell; and providing on-demand services in other small towns like Coalgate etc. The 80 and 81 ECan buses need to go more frequently as these are often full at peak travel times. I have also spoken to my submission to ECan about this and the need for far greater coverage and frequency in Selwyn District.
Staff Recommendation	Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service. Environment Canterbury is considering developing a business case for additional direct services for Rolleston and Lincoln in 2024-27. Improving the frequency of other key Metro PT services such 5 (Rolleston) and 80 (Lincoln) is also being planned including investigating 'On Demand' Services as another option within larger townships.
Point Number	1344.12
Category	Activity > Planning Further Community Facilities

Comments:	- Please ensure any new or upgraded parks or sports and recreation facilities include adequate bicycle parking (ideally a Locky Dock) in appropriate locatoins (e.g. beside the toilets).
Staff Recommendation	The submission is acknowledged.

	Comment: Comment:
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1346.8
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Let the business community look after business issues. Use the money budgeted for this to go towards essential services.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and holds a view that Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	1346.9
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	From my dealings with the council, different departments do not seem to have the ability to share common information and this makes it very frustrating as an end user. This results in having to duplicate information and leads to extra time having to be spent on time spend on applications etc.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through

	automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1346.10
Category	Activity > Other Categories identified by Staff > Debt Levels
Comments:	I am extremely uncomfortable with the amount of debt that the council will be in by 2034. You mention that you are not concerned about this being a burden on future ratepayers, how is this not? Todays ratepayers will be greatly under pressure with the huge rates increases over the next 10years, especially with the costs of living at the moment. Then SDC are still hugely in debt in 10 years time. Who will be ultimately pay off this debt? The increases in rates to all, but specifically the rural sector have a potential negative effect. The RV algorithm used to apply rates, negatively affects the rural sector.
Staff Recommendation	That the submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.
Point Number	1346.11
Category	Activity > Other Categories identified by Staff > Rates
Comments:	A large number of farming expenses are increasing, yet the returns from farming are decreasing. Farming is the backbone of the Selwyn district and to increase the rates by the amount proposed is a huge burden on the already struggling agricultural industry. The rural sector do not have access to a lot of the services provided yet pay the highest rates in the community. In this current financial situation, the spending by the council needs to be reassessed. Spending that is not essential needs to be paused. Borrowing money will burden our future generations. Can you provide the rate income from the different sectors within the district?
Staff Recommendation	That the submission is acknowledged by Council. That the Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum. The farming community has always been an integral part of the district's fabric.

	The Council acknowledges the hard working and infrastructure heavy nature of the demands this community is facing, and we carefully consider farmers in our strategic planning.
Point Number	1346.12
Category	Activity > Providing safe drinking water
Comments:	I object to water that is safe, being treated with chlorine and fluoride. Only when there is a contamination of water should this occur.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies. The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health
Point Number	1346.13
Category	Activity > Council's Office Improvements
Comments:	The refurbishment of the Rolleston Office can wait. The money can be spent on essential services.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	1346.14

Category	Activity > Other Categories identified by Staff > Debt Levels
Comments:	In conclusion to my comments, The spending by the SDC at this time needs to be carefully considered. There is a cost of living crisis, people do not have the money for rates increases, having a council borrowing money and then ending up 600m in debt seems very irresponsible. Projects/services that are essential to the community should go ahead but not those unessential.
Staff Recommendation	That the submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.

Point Number	1347.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Comment:** WHATA RAU Introduction Thank you for the opportunity to make a submission as part of the Selwyn District Council long term plan (SDC LTP), with particular reference to Big Decisions 2a and 2b which hold significant implications for Leeston and the wider Ellesmere community. Cultural and Community Vision Te Taumutu Rūnanga have generously gifted the name Whata Rau and provided an informative and useful Cultural Narrative for the Leeston Township Masterplan in the form of He Kōrero Ahurea, Waihora Whata Rau and He Mahi Hoahoa, Waihora Whata Rau (referred herein to as (Kōrero Ahurea). Kōrero Ahurea presents a well understood representation of abundance in Waihora. This extends to the mahika kai in the form of pātiki (flounder) and tuna

(eels) among others, but also Leeston having history as the food basket for grain and agriculture in the 1800's and 1900's. Kōrero Ahurea further explores Whata Rau being more than just an abundance of food but about the ability to provide for the needs of the community and its guests. Specifically, Kōrero Ahurea refers to the Waihora Whata Rau Projects as markers (or tohu).

The Leeston Community Committee (LCC) supports the Whata Rau project and proposes the following:

- Locate a library and service centre building in its current location at Anderson Square (Civic Hub).
- Locate a new Multiuse Event Centre at Leeston Park (Community Reserve)

Locating the library on the existing library site not only activates High Street but acts as a Marker to book-end High Street. Along with the War Memorial and the recently completed 'Eel', Whata Rau will act as the initiation of the Leeston and Waihora Story. This leaves space "to recognise and celebrate the richness of the landscape, its people and its stories" as you journey down High Street culminating in the second part of Whata Rau being the multi-use facility (proposed as part of the response to Decision 2b) at Leeston Park. It would be expected and encouraged for any buildings to incorporate Te Aranga design principles as this is an integral part of the Waihora/Ellesmere story.

These options were selected through a process of consultation with the Leeston Community Committee, discussions with SDC councillors and recommendations provided in the following documentation:

- Leeston Community Facility Needs Assessment SDC 2020 - Community Centres
- Halls & Libraries Network Plan SDC 2021
- Whata Rau Leeston Community Centre and Library EOI SDC 2022
- Leeston Reserve Masterplan SDC 2023
- Community Survey Feedback SDC 2024
- Long-Term-Plan Consultation Document SDC 2024

We welcome the opportunity to engage further with Council on this project. Additional comment is provided on each of Big Decisions 2a and 2b below.

Whata Rau Cost Estimates

The current combined budgeted options across both of LTP Big Decisions 2a and 2b totals $19.4 million. We believe by having a more practical approach to design specifications we will get better value for money and achieve an outcome that is more aligned to the

community's needs. As part of our due diligence, we have looked to other examples of multiuse community event centres within our region.

The Tai Tapu event centre is a good example of the community and council partnering to deliver an outstanding facility for their area. Accordingly, we made contact with some members of that working group including Mark Blyth who was the Managing Director of the construction company Armitage Williams at the time and also a local resident. This project was completed in 2020 at a total cost of $4.6 million. This included the changing sheds and a reinforced gravel raft as part of the foundations.

We acknowledge that construction costs have increased significantly, but even allowing for a near doubling of the cost ($9 million), this still leaves circa $10 million in the budget to cover sunk costs, park upgrades and available funds reserved for a library upgrade/rebuild. We also note that option 2b (2) allows for the construction of a toilet block which could be integrated into the construction of the event centre, depending on location, thus reducing the funding requirement set aside for the park development.

Clearly for Leeston Park option 2b (3) would be our preferred option however we acknowledge current financial constraints and would prefer to emphasise and give priority to addressing the community's requirement for a multi-purpose community event centre located at Leeston Park and a Library located at its current location.

LTP Community Engagement

On the 8th of February this year the LCC convened a public meeting to discuss the proposed Whata Rau project and to outline our approach to the forthcoming submission process for the SDC LTP. The overwhelming attendance and the breadth of opinions expressed during this meeting underscored the deep-seated engagement and investment our residents have in the future of our district. The Committee invited the public to complete an online survey which was collated over the following weeks (key results attached as supporting documents). The following motion was also passed at the meeting, with no objection voiced:

"That this meeting endorses the Leeston Community Group Committee to prepare and facilitate a submission to SDC LTP on behalf of the Leeston Community".

This motion gave a powerful mandate for the LCC to make a submission to the SDC LTP.

A community survey was undertaken during early 2024 and the results are attached as supporting documents to this submission. Key statistics from the community survey:

Do you support a substantial upgrade of the park and facilities?
86% responded saying YES.

Is the current proposal (Whata Rau) fit for purpose?
70% responded saying NO

How many does the centre need to accommodate? 80% responded saying 300+

What else should be added to the plan?
77% responded saying a commercial kitchen

Accordingly, we believe our submission encapsulates the collective vision and priorities of our community. We want to ensure that Leeston and Ellesmere remain at the forefront of the SDC LTP.

Following the community feedback survey, the LCC formed a subcommittee to develop a submission. Members of that subcommittee are as follows:

Bryan Tubb – LCC Acting Chair
Mike Lay – Chartered Accountant (CA), Chartered Director (CMInstD)
Jane West – Planner (BRS, MNZPI)
Hamish McLachlan – NZRAB Registered Architect BAS MARCH
Charles Collins – NZRAB Registered Architect BAS MARCH
Isaac Williams – Structural Engineer (BE (Hons) Civil, MEngNZ)

The Sub Committee provides an excellent cross section of skills associated with development projects and all members have a deep connection to the community, both through respective professions and being born and bred in the district.

At the LCC meeting held on 30 April 2024, the following motion was passed with no objection voiced:

“The Leeston Community Committee endorses the submission made by the Subcommittee for:

Decision 2a – Option 4
Decision 2b – Option 2

With the focus on a community multi use facility located adjacent to Leeston Park, whilst a library remains at its current site.”

Our submission not only looks at matters specific to the SDC LTP but looks at the wider implications and how these decisions before the Council impact on the long-term vision for Leeston.

As part of LCC discussions on Whata Rau it was also decided that a Leeston Master Plan should be developed that considers the urban landscape along High Street as a promenade connection between Leeston Park and Anderson Square. To help cultivate and support independent community cultures in the proposed town plan, we see it as important to accommodate the specific needs of diU'erent user groups separately. By providing specific facilities that address the Leeston Park Reserve (to the west) and a Civic Hub (to the east), Leeston's High Street will be better utilised as a connecting street, thus improving local activation, appeal, and commerce.

Big Decision 2a

Support for Option 4:

Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated but does not contain the design elements planned to meet the identified needs. This building would have the same sized floor space as option 2 and include some elements of the cultural narrative in the design.

EXECUTIVE SUMMARY
- LCC support the Whata Rau Library and Community Centre Project.
- LCC proposes a diU'erent proportioning of the funds to provide the services proposed by the Whata Rau project. - LCC request to locate the library and service centre building in its current location to retain civic and cultural presence, usability for Leeston school children and large town events.
- LCC request a Multiuse Event Centre be established in Leeston Park.

Library and Service Centre (Civic Hub)

1. Community Heart and Visual Prominence

The existing library site is strategically located within the Town's streetscape, adjacent to significant cultural and historic landmarks such as Anderson Square, the Ellesmere County War Cenotaph (War Memorial) and the Millennium fountain. Placing the Library and Service Centre here ensures it remains a central feature of the community, visually prominent and easily accessible to residents and visitors alike.

2. Maximizing Utilization for Diverse User Groups

Recognizing the diverse range of user groups that use the existing library, including primary school students and community elders, the site's location should prioritize safe pedestrian connections and walking distances with the nearby primary school. By situating the facility at Anderson Square, it can remain an integral part of community life, accessible to all age groups and fostering inclusivity.

3. Supporting Large Events

With major events like the Leeston Fête and ANZAC day primarily taking place along High Street and Anderson Square, locating the Library and Service Centre here would provide valuable support and infrastructure for these events. It enhances the community's ability to host and participate in such events, strengthening social cohesion and cultural traditions.

4. Sustainability

In alignment with SDC brief, sustainability of the project is supported to a pragmatic level. It is understood SDC are seeking Greenstar 5 Star certification. Alternatives to Greeenstar include Living Building Challenge, Petal Certification, CORE Certification and Zero Energy Certification. The challenges with most of these sustainability initiatives are the fact they often require points to be pursued while providing little value to the occupants or the building. The LCC generally supports undertaking work which has proven results and is less concerned with points or titles.

Support for important elements which specifically address sustainability fall into two categories: L

- Siting and construction material selection of the building resulting in reduced embodied carbon and passive design principles.

- The building systems (mechanical, electrical, water etc.) and the Building Control and Management System (BCMS) associated with these services ultimately reducing the buildings energy consumption and ongoing running costs.

5. Location in Relation to Heavy Vehicle Bypass

Placing the library alongside a heavy vehicle bypass could disconnect social activity from the main street and pose safety and acoustic issues. By maintaining the facility at Anderson Square, these concerns can be avoided, ensuring a more conducive environment for users (particularly primary school children and the elderly), and potentially reducing project expenses associated with mitigating these issues.

6. Parking and Access

Aligning with SDC Policy, locating public buildings next to public parks and ensuring good vehicle access is crucial. The Memorial roundabout, along with Anderson Square's perimeter street, provides optimal circulation and access for vehicles, making the site well-suited for the Library and Service Centre without the need for additional street infrastructure and parking facilities.

7. Cost Considerations

The existing library site likely oU'ers cost advantages compared to the Leeston Park site. By redeveloping the existing site for the Library and Service Centre, the project can potentially be more cost-eU'ective utilizing existing infrastructure meeting the objectives of Option 4.

8. Structure

Given option 4 establishes the need for a repeatable design, the likely need for an elevated building and the project's sustainability brief, this project lends itself to lightweight construction likely comprising a combination of Light timber framing and Mass timber. Acknowledging SDC's Whata Rau design brief for a rectangular building, having regular and repeatable grids and structural forms will assist with reduction of members sizes (and cost) and allow for flexibility in future extensions and be scalable in nature. Establishing this type of structural system reduces the need for concrete and steel and the embodied carbon.

Multiuse Event Centre (Community Reserve)

1. Multiuse Event Centre As an alternative to directing public funding solely towards Leeston Park, this proposal suggests the distribution of public funding to facilitate broader access to public spaces, thereby increasing public benefit.

The vision put forward through the community feedback survey is for the site to include a multifunctional community facility, a potential capacity of 300 + people with kitchen and bar facilities, adaptable for a wide range of activities. The venue will accommodate various events, cultural gatherings, arts, education, music, recreation, as well as annual occasions such as the Annual Fête and ANZAC commemorations. It would incorporate cultural elements as described above, serving the cultural and social needs of Ellesmere while promoting the well-being of the community for generations to come. As part of the LCC's engagement process, Ellesmere sporting clubs, including the Leeston Rugby Club, have also indicated interest in making use of such a facility.

	We note that within Leeston Park the multiuse event centre may be able to be located where it would facilitate additional cost savings such as eU'icient stormwater disposal and reducing the need for acoustic treatment of the building. 2. Leeston Masterplan Leeston is expected to grow in size over the next 10 years. We believe it is critical (as part of the LTP) to develop an urban plan that considers the broader Leeston township. Following this approach will help ensure sustainable growth and good outcomes for the future direction of the Leeston community, while providing a spatial framework for executive urban development that can successfully accommodate the anticipated intensification and changes to the community over the next decade
Staff Recommendation	The submission is acknowledged. Council staff consider that there are significant efficiencies and increased benefits to be made in ongoing operational costs and usage if facilities are multi-purpose / multi-functional, where that makes sense to do so.
Point Number	1347.4
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	
	Comment: Leeston Community Committee – LTP Submission May 2024 Big Decision 2b Support for Option 2: Option 2 – Carry out the landscape improvements to extend the playing fields; replace and upgrade the playground equipment, footpaths, toilet block, lighting and irrigation; and seal the carpark. Executive Summary: - Leeston Community Committee (LCC) support upgrade of Leeston Park. - LCC request further Community Engagement on the 'Concept' Leeston Plan to maximise use. - LCC request a Wider Masterplan for Leeston. 1. Leeston Park Enhancement The LCC supports the planned upgrade of Leeston Park. Leeston Park is a large reserve with a number of existing amenities, established trees and huge potential. We feel that the current scope of the enhancement requires further refinement. It is recommended that the 'Concept' Master Plan for Leeston Park be further developed with additional

	community engagement to maximize use of the public funding to meet the many various needs of the community.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** There is already a well used park and ride in Rolleston this money should be spent on other communities		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP		
Point Number	1348.2		

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Staff Recommendation	Submission is acknowledged by Council.

Point Number	1348.6
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	This is complete and utter negligence of the Council. Small communities like Sheffield deserve to have facilities such as a pool. With rising costs it is not acceptable to assume that us the residents should have to travel to such facilities. Rolleston pool is over crowded at the best of times. As someone who uses the pool for rehabilitation it is extremely difficult to be able to travel long distances atleast a hour round trip to do so. This pool is a War Memorial the pool itself is the memorial not the wall. I am deeply offended that council is considering closing such an asset to our community as my husband is a currently servicing member of the NZDF. The meaning of these memorials such as our Sheffield pool are vital.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool, and highlighted the Memorial aspects of this facility as a key Council consideration for the future of this site.
Point Number	1348.7
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	To: Selwyn District Council Re: Submission on the Future of Sheffield Memorial Pool Dear Council Members I am writing as a concerned member of the Sheffield Waddington Community to express my concern on the future of the Sheffield Memorial Pool, a critical community and war memorial asset. Essen al Community Asset The Sheffield Memorial Pool serves as a central hub for health, recreation, and community engagement. It is crucial for teaching swimming, ensuring safety, and fostering community bonds. It is not viable always for us to travel for varying reasons including the cost of living, as someone living with a life injury expecting myself to travel for rehabilitation is not acceptable nor should anyone in our community need to. Responsibility and Maintenance Since the Council assumed ownership from the community, there has been a significant responsibility to maintain this facility adequately. Unfortunately, necessary maintenance has been deferred, leading to severe structural issues. Addressing these issues incrementally over the past 10-15 years would have prevented the current costly predicament. Preservation of War Memorial The pool is also a war memorial, honouring those who served. If there is consideration of decommissioning the pool, a dedicated memorial garden incorporating the existing memorial wall should be developed. This would serve as a place of reflection and remembrance, maintaining the legacy of our veterans. My husband

	is a current serving member of the NZDF the preservation of these memorials are important to us the residents and we deserve be er. Proposals for Alternative Solutions Given the structural and financial challenges, we urge the Council to explore alternative solutions that include working on a collaborate approach with the wider community. It's crucial that we find sustainable ways to keep a recreational facility within our community. Conclusion As stewards of our community 's assets and heritage, it is imperative that the Council takes decisive ac on to preserve the Sheffield Memorial Pool and its war memorial site. As a community , we are ready to assist in finding viable solutions to ensure these assets continue to benefit our community. Please consider maintaining the pool for the 2024/25 season to allow ample time for community consultation and planning. Our community values this facility deeply, and it is crucial that its future is shaped by those who use and cherish it most. Thank you for considering this urgent ma er. Yours sincerely
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool, and highlighted the Memorial aspects of this facility as a key Council consideration for the future of this site.

Point Number	1350.5
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	Thank you for the opportunity to make a submission on the Selwyn District Council Long-term Plan 2024-2034. We would love to speak at a public hearing if possible, please let me know the details about this and if it is possible to do it remotely. We are submitting this proposal to Selwyn District Council on behalf of Squash New Zealand, Squash Canterbury, the Rolleston Squash Facility Development Group, over 2,250 Squash Members in the Canterbury District and all the potential Squash players that are not able to participate in Squash due to the shortage of facilities that we have in the Selwyn District. The proposal outlines the need for a new squash facility in Rolleston to address the growing demand for squash courts in the community. Despite the increasing popularity of squash, current facilities do not meet the needs of residents, resulting in current players having to travel significant distances and limited access for new participants. We request support from Selwyn District Council to support the investigation and planning for a new facility: $60,000 in budget in FY25 to go towards undertaking a Feasibility Study and Business Case $40,000 in budget in FY26 to go towards undertaking Concept Design

	$250,000 in budget in FY26-27 to go towards undertaking Detailed Design and Consenting $2,500,000 in budget in FY28-29 to go towards Construction We anticipate the total construction cost will be in excess of $3.5M and possibly as high as $5.5M thus completion of the project as preliminary conceived will require funding partnerships beyond what we are requesting Selwyn District Council might provide. Please see our attached document for the full proposal.
Staff Recommendation	Staff recommend that the submission is acknowledged but the funding requested is not approved. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input, Squash being one of them. Staff note that existing facility utilisation has not been outlined in the submission. Staff recommend that this facility be included as part of a wider community facility funding and planning project.
Point Number	1350.6
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	1. Executive Summary 1.1. Introduction Thank you for the opportunity to make a submission on the Selwyn District Council Long-term Plan 2024-2034. We are submitting this proposal to Selwyn District Council on behalf of Squash New Zealand, Squash Canterbury, the Rolleston Squash Facility Development Group, over 2,250 Squash Members in the Canterbury District and all the potential Squash players that are not able to participate in Squash due to the shortage of facilities that we have in the Selwyn District. The proposal outlines the need for a new squash facility in Rolleston to address the growing demand for squash courts in the community. Despite the increasing popularity of squash, current facilities do not meet the needs of residents, resulting in current players having to travel significant distances and limited access for new participants. We request support from Selwyn District Council to support the investigation and planning for a new facility:

$60,000 in budget in FY25 to go towards undertaking a Feasibility Study and Business Case
$40,000 in budget in FY26 to go towards undertaking Concept Design
$250,000 in budget in FY26-27 to go towards undertaking Detailed Design and Consenting
$2,500,000 in budget in FY28-29 to go towards Construction

We anticipate the total construction cost will be in excess of $3.5M and possibly as high as $5.5M thus completion of the project as preliminary conceived will require funding partnerships beyond what we are requesting Selwyn District Council might provide.

1.2. Need
The 2022 Squash New Zealand Facilities Strategy identifies the need to for provide squash courts for the growing population of Selwyn as one of its top national priorities. This along with the rising interest in squash, the accessibility of squash as a sport, the shortage of facilities in the Selwyn District and the associated health benefits provide a compelling case for the development of additional squash provision in the District.

1.3. Why Squash?
1. Cultural diversity: Squash is played in 185 countries and in NZ by people of all descent. Squash brings together diverse cultures.
2. Squash offers a holistic workout that enhances cardiovascular health, muscle strength, agility, and endurance, aligning with global health recommendations.
3. Its adaptable nature makes squash accessible to individuals of all ages, abilities, and backgrounds, fostering inclusivity in sports participation.
4. Squash facilities provide opportunities for social interaction, teamwork, and fair play, promoting community cohesion and mental well-being.
5. Squash encourages lifelong engagement, offering challenges and rewards for players of all ages, contributing to active aging and social connectivity.
6. With avenues for both recreational play and competitive engagement, squash supports goal-setting, competition and skill improvement, enriching the overall sporting experience.
7. Squash can be played in all weather conditions with facilities able to be utilised over 365 days of the year.

1.4. Proposed Location
The proposed location for a new squash facility in Rolleston is based on its predicted population growth, demographic composition, absence of current squash amenities, central position within the District, potential economic advantages, and opportunities for collaborative partnerships in facility development.

We have identified two potential options for development in Rolleston:
1. A new multisport squash and recreation facility adjacent to the Rolleston Community Centre
2. A new squash facility at Rolleston College (Horoeka Haemata)

Further planning and investigation will be required to identify the preferred option.

1.5. Facility Design and Features

The design of the squash facility in Rolleston will be guided by a number of core principles:
1. Partnership: Collaboration with Iwi and local stakeholders will inform the design process, ensuring the facility meets diverse community needs and fosters a sense of ownership and engagement.
2. Multi-use: The facility will be designed to accommodate various activities beyond squash, maximizing its utility and appeal to a broad audience, including other sports, fitness classes, social events, and educational programs.
3. Community Hub: Serving as a vibrant hub for recreational and social activities, the facility will foster connections, promote well-being, and enhance the overall quality of life for residents.
4. Sustainability: The design will incorporate sustainable practices to minimize environmental impact, such as energy-efficient systems, water conservation measures, and the use of eco-friendly materials. As well as choosing a location that offers sustainable transport options for participants.
5. Accessibility: The facility will prioritize accessibility for all members of the community, including individuals with disabilities, ensuring equal opportunities for participation and engagement in squash and other activities.

1.6. Funding and Partnerships

Funding for the project will be sourced from a combination of council investment, community fundraising efforts, and potential partnerships with private investors and sports organizations.

1.7. Timeline and Implementation

The proposed timeline includes phases for planning, design, approvals, construction, and a grand opening, with a commitment to close collaboration with the Selwyn District Council, stakeholders, and the community throughout the process.

1.8. Conclusion

The development of a new squash facility in Rolleston represents a strategic investment in the health, well-being, and vitality of the community. We urge the Selwyn District Council to support this proposal and allocate the necessary resources for its successful implementation.

2. Background information

2.1. Squash as a sport for Selwyn

Squash is a sport that not only engages individuals but also enriches entire communities through its diverse range of benefits. Here's why squash courts would be a valuable asset for Selwyn and Rolleston:

1. Cultural diversity: Squash is played in 185 countries by more than 20 million people including commonwealth and former English colonised countries, Pacific Island nations, Europe, USA, Canada, South Africa, Egypt, India, Pakistan, Australia, and China. With 30% of Selwyn's population having arrived in New Zealand in the past 20 years, many of these ethnicities form a growing demographic of Selwyn's diverse cultural community. About 10% of Selwyn's 60,000 people have immigrated here from other countries. As experienced in other Districts in New Zealand, Squash will bring together these diverse cultures.
2. Health and Well-being Benefits: Squash is often referenced as the world's healthiest sport across a broad range of criteria (Forbes Magazine). It offers a comprehensive workout, promoting physical fitness, cardiovascular health, and mental well-being. The sport's fast-paced nature, combined with its accessibility for all ages and skill levels, makes it an enjoyable and effective way to stay active year-round in any weather.
3. Accessibility: Squash stands out as a sport that celebrates diversity and inclusivity, providing equal opportunities for individuals of all ages, genders, and skill levels to participate, enjoy, and excel. Its noncontact nature and flexible format allow for solo play or games with 2, 3, or 4 players, accommodating various preferences and abilities. With modified game types available, squash caters to both leisurely enjoyment and competitive engagement, ensuring accessibility for all. Interclub competitions epitomise squash's intergenerational and gender-neutral appeal, where a junior as young as 11 may challenge a senior player over 60. These events often feature mixed-gender matches, reflecting squash's commitment to inclusivity and fair play across age groups and skill levels.
4. Social Inclusion and Personal Development: Squash serves as a platform for social inclusion, personal growth, and skill development. It encourages the development of social skills, self-confidence, and mental well-being, while providing opportunities for individuals to engage in meaningful physical activity. Squash facilities also serve as community hubs, bringing people together and fostering a sense of belonging.
5. International Pathways and Olympics: Squash offers international pathways for aspiring athletes, with various professional and amateur tournaments worldwide. Additionally, squash is a Commonwealth Games sport and will be included in the Olympics from 2028, providing opportunities for community members to engage with the sport at a global level and inspiring future generations of athletes.

2.2. Squash Facilities in New Zealand

Squash facilities in New Zealand serve as vital hubs for fostering community engagement, promoting physical activity, and nurturing talent in the sport. With over 300 facilities and 750 courts spread across the country, these venues provide spaces for players of all ages and skill levels to participate in squash, from casual recreational play to competitive tournaments. However, many of these facilities face challenges such as aging infrastructure, limited resources for maintenance, and fluctuating membership numbers, which can impact their overall condition and sustainability.

Surveys have shown that greater than 70% of affiliated squash facilities are over 40 years old and more than 60% are rated at average or lesser condition. It also highlighted that squash is under-delivering in the provision of warm, clean, quality

courts. Where Courts have been significantly upgraded or rebuilt in Christchurch (largely as a result of the 2010/2011 Earthquakes), there have been large increases in playing numbers, including in the younger age groups. This demonstrates the importance of modern, purpose-built facilities and the high latent demand for squash.

Recognizing the importance of addressing these challenges and ensuring the continued growth and viability of squash facilities nationwide, Squash New Zealand developed a National Facility Strategy in 2022. This is a comprehensive plan aimed at addressing the development, maintenance, and enhancement of squash facilities throughout the country. By providing a strategic framework for decision-making, the Facilities Strategy seeks to support the long-term sustainability and success of squash facilities across New Zealand.

The relevance of this Facilities Strategy extends to the Selwyn District, where the growing ethnically diverse and relatively young population and increasing demand for recreational opportunities highlight the need for modern, wellmaintained community facilities. The strategy highlights 14 National Squash Facility Priorities based on the impact they could have.

Investigation into the need for additional squash courts in the Selwyn District to cater for the high forecast population growth was identified as one of these priorities.

2.3. Squash focus on tamariki and rangatahi

Squash New Zealand and Squash Canterbury, are deeply committed to fostering youth participation in our communities, recognising the importance of instilling a love for sport from an early age. This is particularly pertinent in Selwyn District where, according to the 2018 census, 46% of the population was aged <20 years old. Some reasons that squash is the ideal activity for our tamariki and rangatahi are:

1. Squash encourages active lifestyles and regular physical activity, promoting lifelong health and well-being among tamariki and rangatahi.
2. The sport offers a unique blend of cardiovascular exercise, strength training, and mental stimulation, contributing to overall fitness and cognitive development.
3. Squash fosters resilience and determination as young players learn to overcome challenges and setbacks on the court.
4. Through participation in squash, tamariki and rangatahi develop important life skills such as goal-setting, time management, and sportsmanship.
5. Squash provides a supportive and inclusive community environment where children and youth can build friendships and social connections that extend beyond the court.
6. As they progress in squash, tamariki and rangatahi have opportunities to represent their schools, clubs, and regions in interclub competitions and tournaments, fostering a sense of pride and accomplishment.

We have implemented initiatives tailored to introduce tamariki and rangatahi to squash, providing them with avenues to engage and flourish in our sport including:

1. School Activation Programmes: These programmes aim to provide in curriculum lessons for numeracy and literacy through physical education and squash.
2. Coach / Activator Development: Creation of school modules specifically to upskill teachers in the coaching and deliver of squash.
3. Junior Programmes in clubs: Supporting clubs to appoint junior convenors who will grow junior programmes and participation within their clubs.
4. Skills and pathways: Developing resources where players can digitally track their skills and progress and supporting clubs to set up their own development pathways in partnership with local schools and parents.

2.4. New Zealand and Canterbury Youth Squash Development

Youth development is a key priority for Squash NZ and for Squash Canterbury. Within Canterbury, we are focussed on supporting coaches who are running programmes in secondary schools. These programmes have been particularly successful at Christchurch Boys High and Saint Bede's College by introducing a significant number of rangatahi to squash.

For 2024 and 2025, our focus is on expanding those programmes to a number of other schools commencing with Hoon Hay and Hornby High Schools. We have agreed with Sport Canterbury to use our approved Tū Manawa Active Aotearoa funding in these schools in order to target rangatahi who have not had the opportunity to play squash previously. To support the establishment of a squash facility in Rolleston, we will expand these programmes to schools in the Selwyn District.

We are also working closely with Squash NZ to build a larger network of coaches across the Canterbury District as this will enable us to meet predicted growth in demand and to ensure that all tamariki and rangatahi receive high quality and appropriate coaching. This will also allow us to rollout a squash school holiday programme in 2025.

Squash Canterbury supports a range of competition opportunities for tamaraiki and rangatahi. This includes weekly Junior Interclub and regular tournaments. These competition events provided opportunities for both fun and development. Depending on their own goals, tamariki and rangatahi are able to progress to Canterbury, New Zealand, and International level representative events and teams.

3. Current state of Squash in New Zealand, Canterbury, and Selwyn

Squash as a sport has 19,121 affiliated members and 100,000 people playing squash in New Zealand and has grown over the last seven years. The primary growth in our sport has come from a 36% growth in leisure players over that same period of time.

In the Squash Canterbury District, in 2021 there were 2,256 affiliated squash players and 1,261 casual participants with membership having grown by approximately 20% since 2014 (1.4%/year), well above the national average.

Currently in the Selwyn district we have four squash facilities, one that is run by an affiliated club – Malvern Squash Club and three that are not affiliated – Arthurs Pass Squash Courts, Lincoln Squash Club and Leeston Rugby Club.

With the National Strategy only able to survey affiliated clubs, we only have more in-depth information on Malvern Squash Club which in 2021 had 44 members and average quality facilities.

As only one of these facilities is managed and operated by an affiliated club, there is a significant risk that these courts could be lost to the community because the owners may decide to use them for something else. This has already happened to the squash courts in Lincoln, where there used to be four, but two were converted by the university into alternative facilities (a spin cycle studio and a climbing wall).

Between these four facilities there are a total of seven squash courts:

Facility	Type	Courts	Distance to Rolleston
Malvern Squash Club	Multi-sport	2 standard	29km
Leeston Rugby Club	Multi-sport	2 standard	24km
Lincoln Squash Club	University Facility	2 standard	10km
Arthurs Pass Squash Courts	Stand-alone	1 standard	120km

3.1. Need from the community

Squash New Zealand and Squash Canterbury have been working in partnership with the Rolleston Squash Facility Development Group, a group of passionate squash players mostly based in Rolleston who currently need to travel extensively to the above clubs to be able to participate.

This group have conducted an informal petition that has received 336 signatures in support of the development of a new squash facility. They have also submitted their own submission as part of the Long-term Plan process which we support and complements ours.

A couple of the highlights from the petition included these comments:

Stephen Gardner “Our family has just shifted out to Rolleston, like many others over the past few years. It would be great if there was a facility out here as our kids will be keen to play in a few years’ time. I play competitively and it’s a big drive into Christchurch to play, not to mention the carbon footprint associated with it. A modern facility would be a great community asset!"

Jennifer Barnden "Husband and I play squash, having to travel out of Rolleston weekly. Having a squash court in Rolleston would be awesome"

3.2. Identified need in Rolleston

The National Strategy analysed squash participation levels across the country including population per court, members per court and members per population. In this analysis, Auckland has been removed due to its population and number of courts being so different to the rest of the country, so any national analysis excludes Auckland.

1. The Canterbury District has a higher proportion of people per court (7,011 to 5,635) and significantly higher people per affiliated court (11,136 to 7,551) when compared to the national average. This shows us that there are under supply of courts in the Canterbury District.

2. The Canterbury District has a similar number of members per court (33 to 34) and slightly lower number of all players per court (36 to 38) when compared to the national average. This shows us that with the number of courts in the district that we have roughly the right number of players.

	Total Courts	2023 population	People/ court	Aff. Courts	People/Aff. Court	Affiliated members	Members/ court	All Players/ court
Canterbury	108	757,230	7,011	68	11,136	2,256	33	36
National	611	3,443,220	5,635	456	7,551	15,080	33	38

3. The Canterbury District has significantly lower number of squash players per population (0.46% to 0.70%) and affiliated squash players per population (0.30% to 0.44%) when compared to the national average. This shows us that we should have a far higher number of squash players and people participating in squash in the Canterbury District.

	Total Courts	2023 population	Affiliated members	All players	All players/pop	Aff. Players/pop
Canterbury	108	757,230	2,256	3,517	0.46%	0.30%
National	611	3,443,220	15,080	24217	0.70%	0.44%

4. The National Strategy provides guidelines for squash court provision to be one affiliated squash court for every 7,500 people, noting for urban areas to aim for one affiliated court for every 8,500 people.

5. Urban areas are generally considered to be areas with a population of over 5,000, so for Selwyn, Rolleston, Lincoln and Prebbleton fall into this classification, so for the purpose of this analysis, we will use this Urban ratio to consider the whole Selwyn District as it is more conservative than the rural ratio.

6. The Selwyn District currently has much higher population per court (10,500 to 5,635) and population per affiliated court (36,750 to 6,412) when compared to the national average and much higher than the recommended guidelines of one affiliated court per 8,500 people. This shows us that the Selwyn District has a significant shortfall in the provision of squash courts even when considering all available courts as opposed to just affiliated courts.

7. By 2048 it is projected that the Selwyn District will have a much higher population per court (15,214 to 6,403) and population per affiliated court (53,250 to

7,285) when compared to the national average and much higher than the recommended guidelines of one affiliated court per 8,500 people. This shows us that with the projected growth in the Selwyn District and the fact that there are currently no planned new squash courts that there will be an even greater shortfall in the provision of squash courts by 2048.

8. When considering the National Strategy provision guidelines for squash court provision Selwyn is currently 6.6 affiliated courts short and this shortfall is projected to grow to 10.5 courts short by 2048. This shows us that we need to start planning immediately for how we address this shortfall in squash courts and the facility size in Rolleston needs to be in excess of 6 courts now with a plan to expand to 10 courts over the coming decades.

	Selwyn		Christchurch		National	
	2023	2048	2023	2048	2023	2048
Population	73,500	106,500	402,400	463,500	3,443,220	3,912,280
Courts	7	7	35	35	611	611
Affiliated courts	2	2	28	28	537	537
Pop per court	10,500	15,214	11,497	13,243	5,635	6,403
Pop per affiliated court	36,750	53,250	14,371	16,554	6,412	7,285
Recommended people per affiliated court	8,500	8,500	8,500	8,500	8,500	8,500
Recommended courts	8.6	12.5	47.3	54.5	405.1	460.3
Shortage (all courts)	**1.6**	**5.5**	**12.3**	**19.5**	**-205.9**	**-150.7**
Shortage (affiliated courts)	**6.6**	**10.5**	**19.3**	**26.5**	**56.4**	**-76.7**

9. When considering the population in the Selwyn District and where current squash courts are located, most urban centres are close to or over the recommended number of squash courts, except for Rolleston. This shows that Rolleston is the location in most need of additional squash courts in the Selwyn District.

Selwyn District	2023 Population	Number of Squash Courts	Recommended Courts for population	Shortfall/ oversupply
Rolleston	29,600	0	3.5	-3.5
Lincoln	10,250	2	1.2	0.8
Prebbleton	5,280	0	0.6	-0.6
Darfield	3,150	2	0.4	1.6
West Melton	2,450	0	0.3	-0.3
Leeston	2,430	2	0.3	1.7

3.2.1. Need conclusion

1. This research shows that there is a very clear need for additional squash facilities in the Selwyn District and particularly in Rolleston.
2. Due to its central location, the location of population growth and where existing squash courts are located. Rolleston is the preferred location for additional provision of squash courts.
3. The Selwyn District with its project growth has the greatest shortfall in squash courts available to its population across New Zealand.

4. If we were to increase the supply of courts, given these severe shortfalls, with additional courts, local participation will likely rise rapidly.

4. Proposal

4.1. Purpose

Given Squash NZ and Squash Canterbury are already working with the non-affiliated court facilities in the Selwyn District to address some of the shortfall, the purpose of this submission is to outline the need for additional squash court provision in the Selwyn District and to identify options for how Squash New Zealand and Squash Canterbury can address this shortage, particularly in Rolleston, in partnership with Selwyn District Council.

4.2. Request

Our request is for financial support to help with the planning to determine the preferred option and support the generation of sufficient capital to build a facility.

1. We request that Selwyn District Council allocates $60,000 in budget in FY25 to go towards undertaking a Feasibility Study and Business Case. This work generally costs in the region of $60,000 - $100,000. If Selwyn District Council is able to invest $60,000 towards this work, then Squash New Zealand is prepared to contribute $10,000 towards this and Sport Canterbury has indicated that they would also contribute financially.
2. We request that Selwyn District Council allocates $40,000 in budget in FY26 to go towards undertaking Concept Design. If Selwyn District Council contributes $40,000 to this work then we will look to raise the remaining funding required either from Squash NZ or from grant funding.
3. We request that Selwyn District Council allocates $250,000 in budget in FY26-27 to go towards undertaking Detailed Design and Consenting. If Selwyn District Council contributes $200,000 to this work then we will look to raise the remaining funding required from grant funding.
4. We request that Selwyn District Council allocates $2,500,000 in budget in FY28-29 to go towards Construction. If Selwyn District Council contributes $2,500,000 to this work then we will look to raise the remaining funding required from grant funding.

		Budget required		
	Financial Years	**Total cost**	**Request from Council**	**Contribution from others**
Needs Assessment	Complete	$0	$0	$0
Feasibility	FY25	$40 - 70k	$45k	$10k
Business Case	FY25	$20 - 30k	$15k	$10k
Concept Design	FY26	$40 - 60k	$40k	$20k
Design and consent	FY26-27	$300 - 500k	$200k	$100k
Construction	FY28-29	$3.5 - 5m	$2.5m	$1.5m
Total		**$3.9 - $5.7m**	**$2.8m**	**$1.64m**

Budget required Financial Years Total cost Request from Council Contribution from others Needs Assessment Complete $0 $0 $0 Feasibility FY25 $40 - 70k $45k $10k Business Case FY25 $20 - 30k $15k $10k Concept Design FY26 $40 - 60k $40k $20k 10 Design and consent FY26-27 $300 - 500k $200k $100k Construction FY28-29 $3.5 - 5m $2.5m $1.5m Total $3.9 - $5.7m $2.8m $1.64m

4.3. Funding

With the overall capital build likely being in the range of $3.5 - $5.7m based on other similar builds that have happened recently, we anticipate that the contribution from Selwyn District Council will likely need to be roughly 60 – 70% of the total project cost with the upfront planning work likely requiring a higher proportion to be funded by Council.

We want to be very realistic about this ask as we know that the funding landscape currently is limited, with most major funders having limited resources and more and more applications for those resources every year.

The reality is that the traditional thinking for funding a facility of one third Council, one third sector funders, one third private is outdated and with Central Government no longer putting capital funding into local projects that Local Councils will generally have to fund a much higher proportion of the capital required for new community facilities.

This does give Council's a much greater say however in the outcomes they want from these facilities they are investing into.

We anticipate being able to raise $1 – 1,5m from various trusts and funders if we are able to secure initial funding from Selwyn District Council.

4.4. Options

We want to emphasise that we have started to consider several options to address the identified needs, with some smaller measures being identified such as working with unaffiliated clubs to become affiliated, supporting clubs in Christchurch and possibly developing courts at Lincoln University. However, due to the size of the need identified, we suggest that the development of additional squash courts in Rolleston is the only practical option to ensure that the community in the Selwyn District has the same ability to play squash as the rest of the country.

We are only at the initial investigation stage of this project and therefore all the figures provided in these options are provisional and based on other recent projects. Also, a lot of the assumptions made regarding these potential options still require extensive engagement and consultation with the key stakeholders such as Selwyn District Council, Lincoln University, and the local and Canterbury Squash community.

Squash New Zealand, Squash Canterbury and the Rolleston Squash Facility Development Group (RSFDG) want to work in partnership with Selwyn District

Council to further investigate these options and would like to request financial assistance to appoint a specialist consultant to undertake this work.

4.4.1.Option 1

Build a new multisport squash and recreation facility adjacent to the Rolleston Community Centre

After an initial consultation with staff at Selwyn District Council, the land at 96 Rolleston Drive, adjacent to the Rolleston Community Centre was identified as a possible location for a new multisport capable squash facility.

With the existing Community Centre onsite, there is the ability to look at extending the community centre to cater for the squash courts and potentially sharing existing facilities such as toilets and car parking.

This is also the location of the youth hub, a central source of services and programmes targeted at rangatahi youth (12 to 24 years old) in the District. Conceived as a space where youth can go to receive targeted programmes and non-judgemental, confidential youth services from qualified agencies, a co-located squash facility could become a strong functional physical outlet for youth interested in physical fitness, collaboration, teamwork and mental health.

Co-locating squash courts with an existing facility offers a multitude of benefits that extend beyond squash itself such as:
1. Maximized Facility Utilisation: By integrating squash into the Community Centre, the facility can cater to a broader range of recreational activities and attract a more diverse audience. This increased utilisation enhances the facility's value proposition and contributes to its long-term sustainability.
2. Programming: Locating these facilities together could lead to joint programming and cross-promotion with other activities offered at the facility.
3. Enhanced Community Impact: A combined facility could become a community hub that encourages social interaction, cultural exchange, and community development.
4. Cost-Efficient Infrastructure Development: Building squash courts as an extension of an existing facility can be a cost-efficient approach compared to constructing a standalone facility. Utilising shared amenities, such as parking, toilets, and administrative spaces, reduces construction costs and streamlines operational expenses.

Steps required:
1. Undertake detailed feasibility study to determine preferred site, capital and operational viability, funding options. This would include determining whether attaching to the existing community centre is possible.
2. Engage with Selwyn District Council to begin process of Landowner Approval and securing a lease.
3. Develop business case and concept design for preferred option.
4. Set up new club that will own and run facility once developed.

5. Secure funding for design and consent stage of development.
6. Engage planner to begin resource consent process.
7. Engage an architect and/or project management company to deliver project including working with Council.
8. Undertake detailed design and apply for building consent.
9. Secure funding for construction.
10. Engage construction company (if not included in previous stage) to undertake construction.

Example

The QE2 Park multi-sport facility in Brighton was a great example of squash working well with a number of other sports. The 6 squash courts were built under the main stands and operated for many years alongside the main stadium, swimming and dive pools, water features, gymnasium and other sports related facilities.

Not only did the co-location allow shared use of key services and infrastructure, but it also created a large uplift in demand for squash as many members of the public saw the sport and combined it with their swimming and other activities at the park. Unfortunately, when the Christchurch City Council demolished QE2 it did not have the funds to replace all facilities on the site and the squash courts were lost to the public. Members of the public often comment to Squash Canterbury that QE2 was where they had their first experience of squash.

4.4.2.Option 2

Build a new squash facility at or co-located with Rolleston College (Horoeka Haemata)

The new second campus for Rolleston College-Horoeka Haemata is slated to be built in the next 3-5 years but is currently on hold pending a Government review. Rolleston already has five primary schools (some of them large) and is planning for a high school student population of 3500 and once reached will be the largest in the country.

The second campus will be built on the Lincoln side of Rolleston. This is just 6 km from the Lincoln University campus (whereas downtown Rolleston is about 10 km). If a state-of-the-art squash development facility was to be built, not just a squash club or a multi-sport recreation centre, a very broad partnership could be envisioned that could include the sports science department within the Department of Tourism, Sport and Society at Lincoln University.

This would put Selwyn District on the map for producing world class squash athletes (fits with the Olympic games announcement, recent success at the Commonwealth games, and the vision of bringing the NZ Open to Christchurch beginning in March 2025). Since Auckland, Hamilton, or Wellington do not have International level facilities, the Christchurch area, already with the modern Christchurch club 8-court facility attached to a larger bar and restaurant facility and Richmond club redevelopment that is just beginning, is poised with its international

Airport to become the New Zealand link to the world Professional Squash Association (PSA) Australasian PSA circuit.

In 2025 and 2026, Christchurch will host the NZ open, a PSA Silver level tournament with men's women's prize money of approximately $100,000 which will bring about half of the world's top 20 men's and women's players to Christchurch. This event will be held in the Issac Theatre Royal.

Steps required: 13
1. Engage with Rolleston College – Horoeka Haemata to determine interest in the development of squash courts on school land.
2. Undertake detailed feasibility study to determine preferred site, capital and operational viability, funding options.
3. Engage with Rolleston College to begin process of securing a lease.
4. Develop business case and concept design for preferred option.
5. Set up new club that will own and run facility once developed.
6. Secure funding for design and consent stage of development.
7. Engage planner to begin resource consent process.
8. Engage an architect and/or project management company to deliver project including working with Council.
9. Undertake detailed design and apply for building consent.
10. Secure funding for construction.
11. Engage construction company (if not included in previous stage) to undertake construction.

Example
The Devoy Centre in Tauranga is a shining example of this kind of partnership. With 7 glass-back courts including 2 full-size doubles courts with moveable walls and an International all glass exhibition court, this facility was conceived by a leadership team that included former world champion New Zealander Dame Susan Devoy.

Juniors (under 19yrs) are a primary focus of this facility making up about 40% of the membership. Co-located with the high school using land leased from Tauranga Boys' College at no charge, in return for court access, this facility is a centre for youth development for the Tauranga region. The relationship extends beyond real estate and squash is now an integral part of the college curriculum.

The building is architecturally designed on a single level allowing for a very interactive and dynamic atmosphere for both members and guests. Natural lighting is a strong feature along with contemporary furniture and fixings. Facility overview
• Purpose-built squash complex incorporating a gym
• 6 x glass-back courts with ASB walls and fully sprung floors
• Ability to move the internal walls on 3 courts to create 2 full-sized doubles courts)
• Dedicated exhibition court and re-locatable gallery seating allowing up to 250 spectators
• Shared gym facilities (with Tauranga Boys College) adjacent to squash facilities
• On-site fully equipped pro-shop stocking squash equipment
• 150m2 fully enclosed deck leading through large sliding doors into social area
• Central office, bar and café area can be managed by one person

• Members have electronic tag access to playing facilities
• Court access managed by online booking system through any device

The membership and participation numbers have grown significantly since the centre was first opened in 2011 from 220 to 600 now. This growth as meant that the club has had to introduce a waiting list policy because of the demand.

With the Rolleston College second campus development currently on hold and under review, there is an opportunity to reach out to Education New Zealand (Mō mātou) to discuss a partnership between Squash NZ, Squash Canterbury, Rolleston College-Horoeka Haemata, Lincoln University, and Selwyn District Council.

5. Summary

Thank you for the opportunity to make a submission on the Selwyn District Council Long-term Plan 2024-2034. The proposal outlines the need for a new squash facility in Rolleston to address the growing demand for squash courts in the community. Despite the increasing popularity of squash, current facilities do not meet the needs of residents in the greater Selwyn District and particularly Rolleston.

The 2022 Squash New Zealand Facilities Strategy identifies the need to for provide squash courts for the growing population of Selwyn and Rolleston as one of its top national priorities. This along with the rising interest in squash, the multicultural demographics of Rolleston, and the associated social and health benefits to the community and its youth provide a compelling case for the development of additional squash provision in the District.

So far, we have identified two potential options for development in Rolleston; a new multisport squash and recreation facility adjacent to the Rolleston Community Centre, and a new squash facility at Rolleston College (Horoeka Haemata). Further planning and investigation will be required to identify additional options and the preferred option. We anticipate a series of consultations and collaboration with local Iwi and stakeholders will inform the design process, ensuring the facility meets diverse community needs and fosters a sense of ownership and engagement.

It is likely that the best option would be designed to accommodate various activities beyond squash, maximizing its utility and appeal to a broad audience, including other sports, fitness classes, social events, and educational programs. Given the costs, we recognize this will take a funding partnership that would likely involve a combination of council investment, community fundraising efforts, and potential partnerships with private investors, sports organizations and government grant. The ideal timeline for development would be as soon a practical but 4-5 years is more likely.

The development of a new squash facility in Rolleston represents a strategic investment in the health, well-being, and vitality of the community. We urge the

	Selwyn District Council to support this proposal and allocate the necessary resources for beginning the formal planning and consultation processes and to partner with Squash NZ, Squash Canterbury and the local squash community to see it through to a successful conclusion.
Staff Recommendation	Staff recommend that the submission is acknowledged but the funding requested is not approved. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input, Squash being one of them. Staff note that existing facility utilisation has not been outlined in the submission. Staff recommend that this facility be included as part of a wider community facility funding and planning project.

Submitter Number:	1351	**Submitter:**	David Bailey for Canterbury Track Cycling
Organisation:	Canterbury Track Cycling		
Point Number	1351.2		
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities		
Comments:	The Canterbury Track Cycling Club requests that the Council consider including the development of a track cycling facility within its future recreation and sport park developments (as part of planning for further community facilities and infrastructure). Club members have completed an independent feasibility study over the past couple of years to identify what would be best to replace the aging outdoor velodrome at Denton Park and support the ongoing need and development of this sporting opportunity for the residents of Waitaha. A copy of this study has been provided to staff in Selwyn District Council for their park planning consideration. Whilst this study investigated a covered cycle track facility there is also an option to build an outdoor track similar to what has occurred in Wanganui recently. This cost $2.5 million on an existing foundation. Planning for a co-location of services enables efficiencies to be achieved with common facilities needed by all park users such as power & water, parking, toilet, changing, storage and social spaces. Within a park there is potential to create a hub of		

	opportunities to support cycling development from learn to ride, safe recreational pleasure and sporting aspirations. Within a covered track facility more than 4,000 m2 of indoor sport and recreation space could be used to serve other sport and recreation needs such as gymnastics, bowling, martial arts etc. The club is motivated to engage with Council's planning team to create innovative solutions that support the diverse needs and aspirations of our communities.
Staff Recommendation	The submission is acknowledged by council. The 100Ha District Park development in Rolleston will in consider options such as track cycling provision. Evaluations of the inclusion of this sort of facility is likely to occur in stage two of the park development.

Submitter Number:	1352	**Submitter:**	Details Withheld
Point Number	1352.2		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	• The Selwyn Huts should be listed as a history site on the District Plan. • It pre-dates the 1900s so is an archaeological site under Heritage Pouhere Taonga Act • All homes and all people should be protected. It's inhumane and disgusting to evict the Selwyn Huts residents from their home. Review the 15 year finite term and let us stay. This also helps preserve our kiwi history!!! • It's unfair not to include Selwyn Huts on the District Wide Rate for water and sewer. Excluding a community in the district goes against the purpose of introducing the DWR in		

	the first place. The legal opinion from Council's own lawyers have highlighted this. We should not be discriminated against and should be treated like everyone else in the district • Replace the reticulation system. Council have been in charge of this since 1989 and dropped the ball by not doing any maintenance and upgrades over the last 35 years. Don't use your incompetence as an excuse to make us pay or to kick us out Thankyou Robert Thomson
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Submitter Number:	1353	**Submitter:**	Mike Davidson for Te Taumutu Rūnanga
Organisation:	Te Taumutu Runanga		
Point Number	1353.1		
Category	Questionnaire > Policy Changes > Policy Review - Other		
Comments:	22 April 2024 Te Taumutu Rūnanga submission on the Selwyn District Council Long Term Plan 2024-34		

Ngāi Te Ruahikihiki ki Taumutu are the primary kaitiaki of the Te Waihora catchment. Their takiwā also extends to the wider Selwyn District. Te Taumutu Rūnanga ('Rūnanga') is the administrative council for the hapū. In this role, the Rūnanga has a responsibility to protect the natural resources, mahinga kia, and other values of the takiwā for the benefit of those people of Ngāi Tahu descent who have customary interests in the area.

Ko ngā hau ki ētahi wāhi, ko ngā kai ki Orariki

This whakataukī refers to the year round abundance of food that was available at Orariki, the pā of Te Ruahikihiki. Sadly today however, it does not reflect the current state and condition of our taiao (environment).

The Rūnanga welcomes the opportunity to submit as partners to the Selwyn District Council ('Council') Long Term Plan 2024 -2034 (LTP).

The Rūnanga acknowledges and appreciates the developing partnership relationship with Council and the work that has been undertaken with the Rūnanga during the development of this LTP.

The Rūnanga supports the proposed funding for the 'strengthened partnership with mana whenua'. We support the continuation of the Mana Whenua Representative on Council. No ng that this appointment should be funded through the democracy budget.

The Rūnanga shares the concerns of the Council around the increasing levels of nitrates in water sources and supports the funding proposed in the LTP to investigate the centralisation of some of the water on the plains to come from one low nitrate source. While Environment Canterbury is responsible for addressing nitrate contamination, the Rūnanga would expect to see the Council taking a strong and vocal stance with its concern around the impact of nitrates in our water.

The Rūnanga supports Council's One Water Strategy and the proposed funding of a wastewater project to Taumutu that will service Ng āti Moki Marae and Fishermans Point.

The Rūnanga notes the continued work on seeking chlorination exemptions and the listing of Taumutu as an area that could be considered for an exemption. We ask that the Rūnanga is involved at the beginning of any conversa on that affects the Taumutu community.

The Rūnanga notes the Council's ambition for a cycle trail from Arthur's Pass to the east coast and asks to be involved with this kaupapa, especially the trail around Te Waihora.

The Rūnanga would like to highlight that Taumutu does not have kerbside collection, one of only 4% of the district that does not receive this service.

Our Marae, Te Pā o Moki is a highly used community facility that benefits the wider Selwyn community, with thousands of visitors every year. Visitors to the Marae park their vehicles (including buses) on the grassed area which is within the council road reserve. This area becomes very wet and boggy during the winter months, with vehicles often becoming stuck. The Rūnanga requests that Council prioritises an upgrade to this area to enable year-round car parking, with funding added in FY24/25 to facilitate this.

As the Rūnanga has not reviewed the current design of Whata Rau, it supports op on 2 in principle on the basis that the community facilities are fit for purpose. This includes a design that reflects the gifted name of Whata Rau.

The Rūnanga notes the challenges and opportunities of climate change and while we support Council effort in this space, we encourage you to be bold with both your mi ga on and adaptation mahi. We also face significant challenges with sea level rise and coastal hazards and are developing a climate change strategy and adaptation plan. The Rūnanga notes the coastline in our Takiwā is shared by both SDC and Christchurch City Council, we expect that collaboration between the Councils and the Rūnanga to happen. No ng the public infrastructure owned by the council that is at risk.

On 08 April 2024 a joint wānanga was held with the Rūnanga, whānau, Environment Canterbury, SDC and landowners to discuss coastal adaption options for the Taumutu area. Consensus was reached at the conclusion of the wānanga that included beach reshaping and bank maintenance to be actioned as soon as possible and a longer term goal of a inland stop bank and nature based solutions.

The Rūnanga have requested funding in Environment Canterbury's LTP for beach reshaping and banks maintenance along the coastal area between Kaitorete Spit and Muriwai. However, it will be important to determine Council's responsibility and role in this mahi. Once again, we expect strong collaboration between the councils and R ūnanga.

The Rūnanga supports the recently adopted Greater Christchurch Spatial Plan and enabling papakāinga housing at the Pā and in urban environments for priority development. This plan provides a pathway to enable mana whenua healthy home aspirations for its whānau that live within the Selwyn District. The Plan also enables

	better investment partnering when combined with development of an economic development strategy for the district. The Rūnanga request Council to allow sufficient funding to enable mana whenua to express their rangatiratanga and kaitiakitanga rights and interests into environmental services. This includes enabling Mahaanui Kurataiao Limited advice into the planning framework under the RMA and similar legislation. Ngā mihi nui Dr Liz Brown Chairperson Te Taumutu Rūnanga
Staff Recommendation	Staff welcome the submission from Te Taumutu Runanga and notes the success of the Runanga representative at the Council table. Staff also support the proposed funding for the Runanga. We note the Runanga's concerns around nitrates in water sources and welcomes its support for the proposed funding investigating ways of addressing this issue. Staff also acknowledge the other matters that the submission raises including the issues of parking at the Marae, kerb side collection, climate change, coastal protection and look forward to working collaboratively with the Runanga to attempt to find solution to these matters. Staff also support the proposed wastewater project to Taumutu that will service Moki Marae and Fishermans point.

Submitter Number:	1354	**Submitter:**	Details Withheld
Point Number	1354.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** Costs need to be kept down so I think a cheaper alternative should be considered for the Park and Rides. Keep it simple! In order to keep the costs down why not use gravel as the basis for the parking area rather than sealing it. Sealing could be considered down the track if needed, but those Wilsons car parks in the central city are gravel and are well used.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. Park N Ride sites need to provide a level of service that aligns with the increased bus services including bus parks, shelters of sufficient size, secure vehicle parking, bike stands, lighting and all-weather pavement surfacing. They have to be safe and follow CPTED requirements for potential 24/7 use. This type of level of service attracts increase patronage and use of bus services, which is the objective.
Point Number	1354.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not

	always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** Need to consider impact on rates with all these projects so best to keep things simple. I understand that repairing the old one only provides a limited time option, hence next best option is the simplified design that is a long term option. Allow for landscaping to be done by the community or community groups (to reduce cost) and keep the interior fittings simple and low cost. If possible use local contractors so that our rates go into keeping local Selwyn business alive. Also why not use second hand materials and fit-outs as much as possible to keep costs down but also to be sustainable?
Staff Recommendation	The submission is acknowledged.
Point Number	1354.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements

Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do nothing. Use the existing park facilities and remove or replace old and unsafe items in the park. **Project cost:** Year 1: $143,000 **Estimated impact on rates:** Included in our current rates **Funding:** Rates: 100% **Comment:** SDC need to reduce loans and borrowings where possible so I prefer this option since it doesn't rely on development contributions (and result in more borrowing in the meantime) and is part of current rates. Let community or community groups help with landscaping and those sorts of improvements.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1. Staff support volunteering such as community planting days as part of any Leeston Park improvements undertaken. This could be organised similar in a similar way to the planting days held when Foster Park was constructed.
Point Number	1354.4

Comments:	**Question:** Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the

	Council investing in better technology solutions to improve our services to the community? Yes **Comment:** **Comment:** **Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1354.7
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Unfortunately, whilst I like keeping communities together with such things, I think the pool needs to be closed because of the fact that SDC already has high borrowings and so we need to start saying no to things to help ratepayer pockets. 10 minutes is a very reasonable drive to Darfield - large parts of Selwyn have to drive a lot further.
Staff Recommendation	It is acknowledged that the submitter has selected to close the Sheffield Memorial Pool.
Point Number	1354.8
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	SDC need to look at decreasing borrowings and not spending lots of money far and wide resulting in this constant high rate increases. One way to alternatively support our district's economic development without this budget is to just use local contractors wherever possible in all of the Council's other spending areas. Make that a policy that local Selwyn businesses and contractors must be used. Even if they may not be the cheapest option, that is one way of supporting Selwyn and we may even get a better deal in the long run - e.g. the cheapest tenders often result in budget over-runs and they come back asking for more money. Selwyn businesses will probably provide better support for their product too. Stand out by being the Council that looks after its local business this way.
Staff Recommendation	Submission noted and comments will be considered by relevant team and as part of action planning.

Point Number	1354.9
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	I support this if it means that it will help save ratepayers money in the long run (perhaps it can result in a reduction in staff numbers?).
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1354.10
Category	Activity > Other Categories identified by Staff > Rates
Comments:	There is a mention of changing Revenue and Financing Policy to allow a provision for an annual CPI uplift. Does this mean on top of the other rate increases proposed to allow capex projects to go ahead? Ratepayers are lucky if their wages/salary increase by CPI to keep ahead of rising food costs, interest rates on mortgages…….if rates go up by CPI and another 8% or more it's going to get very difficult for families. If costs hit hard and families have to sell up and there becomes a surplus of homes on the market and people can't pay the rates on these homes it's going to get harder for SDC to actually get the cash in. Best to tighten up on project planned spend.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1354.11
Category	Activity > Infrastructure DC
Comments:	Development Contributions Policy – definitely include development contribution charge to assist with new community infrastructure requirements. Existing ratepayers cannot afford to fund these. The developers who are only planning these extra subdivisions to line their own pockets (and don't necessarily live in Selwyn themselves putting the money back into the economy or using Selwyn businesses) should have to contribute more out of the sale of their sections towards improving community facilities and infrastructure. It needs to be allowed to increase these more than CPI annually if needed with the rate of the cost of building etc going up. The time between receiving the development contribution and putting this

	towards payment of infrastructure (or debt) needs to be considered when setting the development contribution charge. It needs to cover the cost of infrastructure plus interest charge if it is more likely it will be used to reduce debt used for infrastructure
Staff Recommendation	The submission is acknowledged and staff note the support for the introduction of the proposed development contribution for community infrastructure. Council undertakes a thorough and robust process to calculate the development contribution amount that can be fairly and reasonably applied to the growth community for a project. The calculation is made in accordance with the Council's Development Contribution Policy and the legislation that underpins the policy as well as guidelines on administering the policy. Annual CPI adjustments are made to the charges, and they are fully reviewed on a three-yearly basis to ensure they are appropriate to support the growth portion of the capital programme.
Point Number	1354.12
Category	Activity > Chlorination
Comments:	Water – Selwyn District Council has a duty of care to the people of Selwyn and need to listen to this and push back to Government – not just do as the Government says. Chlorine should be removed and hopefully the new Government will change Taumata Arowai and mean that smart meters would not be required. If fluoridation for Selwyn is proposed by Central Government then Selwyn needs to consult with its residents and push back to Central Government. People can get chloride or fluorine tablets if they need it, but our water pre-chlorination did not cause any issues.
Staff Recommendation	The submitters preference to for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies. The submitters preference to consult with the community, if Council is directed by the Director General of Health to fluoridate community drinking water supplies, is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.

Point Number	1354.13
Category	Activity > Lincoln Town Centre Upgrades
Comments:	Lincoln Town Centre Plan – with the costs now being estimated at more than double the initial costing, serious changes to save money need to be considered. A safer route is need for cyclists, but why not just have one cycleway (with cyclists going both ways on it) instead of two cycleways. Keep the angle car parks in front of the shops (butcher, fish and chip shop etc) as they are great for the businesses (I think the plan suggests they stay but just mentioning it in case). People often use these parks just to pull into for a 5/10 minute stop and then they can safely back out, check the traffic and pull out. If people have to go and search for a car park in designated car park areas it is more likely that those little shops will lose business. Also those designated car parks will get full with staff and library visitors. Could leave these car parks as gravel like the Wilsons car parks in the central city (save money by not sealing them).
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1354.14
Category	Activity > Walking and cycling improvements
Comments:	In Lincoln we do need intersection upgrades to assist cars, cyclists and pedestrians. Agree this should be at the current roundabout at Springs Rd/Gerald St, West Belt/Gerald St and Edward St/James St. If this is through traffic lights at Springs Rd/Gerald St and West Belt/Gerlad St then there may not be a need for anything at Vernon Dr/Gerald St as the traffic lights could be synced to allow gaps in traffic? Or if roundabouts are cheaper at the four intersections and can be made in a cost saving manner that allows visibility all around (so nothing in the middle of the roundabout that causes visual impairment. Since this Town Centre Plan, PC69 (and possibly other Plan Changes) have been approved so there will be more cars/cyclists/pedestrians in Lincoln
Staff Recommendation	Submission is acknowledged by Council. Roundabouts are often more expensive in urban settings due to their land requirements.
Point Number	1354.15
Category	Activity > Walking and cycling improvements

Comments:	.
	Arthurs Pass cycleway – don't do this and don't spend anything more on feasibility costs. Put this money into more important matters as we can't have our rates skyrocketing.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1354.16
Category	Activity > Council's Office Improvements
Comments:	
	Council Offices – the entranceway looks absolutely fine as it is – save money and don't change it! It is also disappointing that the offices are not that old and you are already talking about adding more meeting room space and office space. Does this suggest staff numbers have gone up a lot more than planned if more office space is needed (to save costs do staff requirements need looking at). Meeting rooms; if needed use Te Ara Atea (the new library complex).
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	1354.17
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	Community Funding and Recreation Funding – to help keep rates down such funding needs to be looked at. Community groups and individuals can look to do their own fundraising or get corporate sponsorship rather than applying to council. There are so many different sports options that different people enjoy so how on earth does the council expect to fund all of these? It's not inclusive to just pick and choose certain sports options to allow for in facilities. Help community groups by offering free hire of rooms/venues owned by council (rather than just giving them funding). When groups are needing to organise traffic management, train them! The council can pay for/run the required H&S courses periodically for community groups to send volunteers along to. This could help out sporting groups too (e.g. cycling groups).

Staff Recommendation	Council offers a range of capacity building training through our capacity builidng programme, including on the topic of fundraising. Residents are encouraged to sign up to receive the regular Community and Economic Development newsletter to hear about all capacity building training opportunities. Information about the programme is outlined on the Council website. Groups can apply for funding for room hire through the Selwyn Community Fund application process.
Point Number	1354.18
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	The graph of the Summary Financial Strategy is concerning as there are probably projects mentioned that aren't a part of this graph? E.g. the new community facilities? Rates revenue is not climbing at the rate of the net borrowing, and the borrowing limit just keeps going up. This is going to push for more rates rises down the track if costs for projects increase more (look at what has happened with the Lincoln Town Centre plan and more costs are required to revise/re-work this since it's now "old").
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1354.19
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	The Council needs to seriously consider spending in the area of flooding and work with ECan. The rivers need to be kept clean and dredged of weeds and silt and Lake Ellesmere (Te Waihora) needs to be opened as much as possible when required since the strong southerlies close it. Work (and rates) need to be put into flood prevention and into supporting residents if flooding occurs – make sure civil defence and emergency groups are ready for action. This is another reason for saving money in many other areas - if a flooding event or other nature disaster occurs the Council is going to need funds. We cannot afford to go into more debt.
Staff Recommendation	The submitters comments supporting capital works to reduce flood risk and drainage are acknowledged. Staff recommendation is to proceed with the Stormwater and Land Drainage capital programme as proposed in the LTP.

Point Number	1354.20
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	SDC have to look at what is needed rather than what is a 'nice-to-have' for this current Long Term Plan. Keep it simple to keep the costs down and our rates down. Consider the core areas of the Council and what Councils of years ago focused on. Councils now seem to be trying to keep everybody happy by providing a much wider range of services than ever before. Ratepayers cannot afford this.
Staff Recommendation	That the submission is acknowledged by Council.

Comments:	The Ellesmere Heritage Park Trust is submitting to the 2024 Long Term Plan informing Council of its present activities, advising Council of its funding challenges and requesting a meeting with regard to the goal and actions in Selwyn Strategic Plan (2023-27) As stated in the Supproting Document Ellesmere Heritage Park Trust 1618 Leeston Road Submission to the Selwyn District Council Long Term Plan 2024 Comments on: 1. Update of activities at the museum site (Selwyn Heritage Centre) 2. Funding challenges 3. Selwyn Strategic Heritage Plan (2023-27) Update on activities at the museum site (Selwyn Heritage Centre) The Ellesmere Heritage Park Trust (The Trust) are developing a Museum on Council land at 1618 Leeston Road (the ex Ellesmere County Council & Sicon works yard) the property is now known as 'The Selwyn Heritage Centre' The Trust have a memorandum of understanding with the Ellesmere Historical Society who have a new Archival Storage facility and research room within the main building, the two organisations work well together. The Trust has made significant developments to the Heritage displays at the Centre with an 1870's Cottage and 1870's Gaol as part of the exterior area, and featured displays within the main building at the site. Further

consented Historic buildings are being prepared for display during the next year, A very early and significant weather board shed , ‘Drumroslyn Shed’ has been shifted on site awaiting imminent foundations to be put in place, this building has been recognised by staff from Heritage New Zealand & an Archaeological company as a significant example of its type being made of a combination of imported & local timbers and shingles. An 1880’s Cottage on Council land at 7 Leeston and Lake Road is also to be shifted on site to foundations which will be completed soon, this has the significance that it had a Saddlery business lean-to attached to it from its beginning up to 1925, this lean-to is to be rebuilt onto the cottage once shifted to the site so as to display the actual machines and tools that were used in it in the late 1800’s The Trust has over 9000 Historic articles either on display or in storage on site that have been offered or collected. This is a major contribution to the ability to showcase the Districts Heritage and its History. A few of these articles have been part of the displays at Te Ara Atea along with others in the district. Council should be pleased that these articles are available from the various organised groups who are passionate of the districts heritage. Funding challenges While the trust is gratefully assisted by Council through the Community History fund to be able to pay for operational expenses, these have had significant increases in the past two to three years. Rates, as you understand are increasing – with another major rise this coming year. Insurance for the buildings, through the Council insurance scheme, have gone from $6,000 3 years ago to $13,000 this current year . Office costs (phone/internet/power) are required to document our collection within the eHive network. Consumables for archival recording & labelling are always needed to do our work. We are now looking at annual operating costs of $20,000 These costs have become untenable with the level of funding available through the Community History Fund The Trust regularly applies for funding from lenders during major projects and has received grateful assistance from organisations such as Rata Foundation, Ellesmere Lions etc. Local business organisations have been significantly helpful with materials and time when required, however we cannot continue to keep relying on their generosity. Consenting costs for our projects to save our history have been a major expense. As a guide of total funds required for building preservation and restoration projects, the Carrol Cottage project, which a number of Councillors and Staff have visited, cost in the region of $120,000 to complete. This shows the level of commitment and passion the Trust has to preserve history. The Trust continues to organise raffles and other self-motivated funding streams to be able to continue with our passion to ‘show off’ our history to rate payers and visitors alike. Increasing costs are making this more and more frustratingly difficult. Selwyn Strategic Heritage Plan (2023-27) (The Plan) During the investigations of the Plan, Nicola Sutton recognised the challenges faced by the Trust with being able to fund the on-going works required to produce a Professional Museum to the District. Goal 1.6 – Options for the

	Selwyn Heritage Park Centre lease are understood and inform next steps Actions 1.6.1 of the Adopted Plan – Look into the lease arrangements for the Selwyn Heritage Park Centre to understand if there are options for enabling arrangements that better support the (park's) centre's ability to attract funding for developments (2023-24) The Trust would welcome a meeting with the appropriate staff members with regard to the Goal and Actions above as mentioned in The Plan The trust promoted the suggestion of Council striking a $20 District Wide Rate to fund all of the groups in the Heritage & History sector. This was to be discussed as part of the 2024 – 2034 LTP and informed by Council, the Trust is one of the group that would benefit from this proposal. The Trust has plans to develop the main building of the Selwyn Heritage Centre, but to keep our collection safe, we must ensure the temperature and moisture levels are kept within a required range. The building is currently not fit for purpose and will require a substantial sum to complete this development. We will go to funding providers where we hope to receive some of the funds, but believe the Selwyn District Council has a commitment to the community to preserve history and culture for future generations and therefore should provide a significant level of funding towards this project The support we have received from the local community has been incredible, but i n order to complete this major District Museum Project, we need Council commitment to it. If funding levels of other major projects of this Long Term Plan reduce significantly, please commit to this project. For the Ellesmere Heritage Park Trust ellesmereheritagepark@gmail.co
Staff Recommendation	The submitter's point are noted and have been forwarded to the appropriate Council team for information and consideration including arranging a meeting with the Ellesmere Heritage Park to discuss action 1.6.1 of the Selwyn Strategic Heritage Plan 2023-27. Support for the Community History fund is noted and Council acknowledges the challenge that community organisations have in raising the funds needed to meet operating costs. Council acknowledges the interest of Ellesmere Heritage Park in Council consideration of a $20 District Wide Rate in the 2024-34 if funding levels for other major projects are reduced significantly.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will

	be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Comments:	Should there be a Selwyn District Council presence in Prebbleton, the third largest township of Selwyn? If you believe there should be, then where would the best location/s be? This 2016 report talks about the importance of Community Spaces or Hubs. The report states:- “To be effective Community Spaces need to embody ‘Community Development’ in its entirety and be located ‘Where the People Are’, as well as being accessible, well designed and equipped, plus be social and activated to cater for the spectrum of community users.” A later report: – Prebbleton Facility Needs Assessment GLG Report 2019 states that there is a need for:- “A community facility that can be used by all for a range of different functions, with a clear intergenerational focus and the inclusion of some specialised spaces.” It also states that the building needs to be :- “Accessible for all to get to and use (walkability is really important)” and also as a Location “Where it can function as a community focal point and help support the future heart of Prebbleton” and needs “Ease of access, visibility and central location” I believe that the Long Term Goal of Prebbleton should be to have a Community Hub close to the main street where people are; and in easy walking distance for residents (including Bupa & Somerset Rest Homes and Prebbleton Primary School children). Youth need to also be catered for as there is no High School in Prebbleton. It should also have indoor / outdoor spaces so residents can informally ‘drop in’ and socialise with others without the need to book. It would be a place where anyone can go to enjoy the programmes which are listed in the ‘What’s On in Selwyn’ quarterly magazine under the Libraries Programmes. So, land needs to be either purchased, acquired, or retained for this purpose. The land and location should be tagged now. The build or reconstruction could be at a later date and be possibly a collaborative project with the local community. The Community Recreational Hub could then be located at the Domain or Kakaha Park where a new Community Recreational Centre similar to West Melton Community and Recreation Centre could be built ASAP
Staff Recommendation	The submission is acknowledged.

	A new community centre for Prebbleton has been in considered in earlier Long-Term Plans and was previously signalled for construction in 2025/26. A needs assessment study was undertaken in 2023 which concluded that there was demand for a facility to service the community, and that it should provide a mix of social, community gathering and recreation spaces. The study further concluded that the facility needed to be located so it was easily accessed by the community. As there are uncertainties about the best site for the facility and the activities that it will cater for, further planning and community consultation is needed. To enable time for the necessary planning to happen, the project has been programmed for 2026/27 to 2027/28.

Comments:	selwyn huts , if residents pay 30% of pipeline they can stay 30 years (6 lots of 5 years)and then look at gobal warming effects on there homes.. look after all people in your area.....be fair to all rate payers, theres people who wish to live there life out there with a home they put alot of love, savings and care into. Council have know about sewer update being needed since 1989 and have left it till consent is lapsing then tell home owners to pay for it, you could have planned better and been saving over those many years for the future sewer requirements. the home owners have in last 120 years had there rights/lease renewed without a end date, why put a end date on this time different from last 24 times ..... be fair ....moral ....understanding
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:** It is quite possible central government will not fund these improvements and park and ride seems to be the best way to service a large area without buses needing to travel extended routes. Please also include cycle storage facilities for those that do not want a motor vehicle stored all day. There is some pressure to have cycle facilities that are protected from rain partly because women are put off by wet seats. Experienced women cyclists use a shower cap for keeping their seat dry or covering a wet seat so somewhere to safely		

	lock a bike is maybe all that is required. Cycling up to 3 kilometres to a bus is not onerous so does allow a central bus stop to service a lrge part of the towns they are proposed for.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council. It is an outcome that Park N Rides provide for good bike parking and possibly storage in future.

Category	Activity > Walking and cycling improvements
Comments:	The study into additional public transport routes is a good idea. Selwyn district is quite unique in New Zealand because it has a number of small towns all in quite close proximity to each other more like what is seen in Europe, Cycling infrastructure between these towns is desirable from both a recreational and commuting perspective. However, recent cycle paths seem to have been installed with limited community involvement. An example in Manion Road. It was cheap to send cyclists along a wide, under used road but it has no connectivity. Putting the service along Jones Road would have connected the NZMCA caravan park and a number of residences to the cycle network. The NZMCA site is one of the busiest in the country and a number of guests will have cycles available and would enjoy a protected ride to Rolleston for groceries or coffee.

	Also, if you want to encourage more cycling please consider the road surfaces being used. North Belt adjacent to Lincoln Primary and High Schools has recently been resealed but is very hard on the posteriors of cyclists. Springs Road from Robinsons Rd to Tancreds Road is another.
Staff Recommendation	Submission is acknowledged by Council. Cycle/pedestrian path on Jones Road in the industrial zone would require extensive road upgrades. There is trade-off between cycling comfort and seal life when choosing chip size for reseals.
Point Number	1360.11
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	The Climate change policy review is also relevant as this is a fast changing area.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1360.12
Category	Activity > Infrastructure DC
Comments:	The revision of the Development Contributions Policy is a good idea. It has been reported that each new house inherits close to $100,000 of infrastructure so this should be paid for
Staff Recommendation	Submission is acknowledged by Council and support for the review of Council's Development Contribution Policy is noted.

Submitter Number:	1361	**Submitter:**	Colin Heinz
Point Number	1361.2		
Category	Activity > Maintenance and Renewals Funding Roading		

Comments:	Brake Hill in Arthur's Pass is a narrow road with a deep ditch right on its western berm. Due to the limited parking space at the end of this no exit road and the slight curve near the end of this road vehicles may have to back down it and a fee has ended up stuck that ditch. In one case a tow truck had to come from Darfield to extract it. I support other submissions to the Long Plan Term to include putting a pipe with a series of gratings in this ditch to make this unlit road safer to drive on.
Staff Recommendation	Submission is acknowledged by Council. Piping would be very expensive because of the topography. And considering the amount of water coming down the drain, piping may not be our best option. Council staff will review option. No additional work is budgeted at this time.

Submitter Number:	1362	**Submitter:**	Chris Roberts for Ellesmere Archery Club
Organisation:	Ellesmere Archery Club

Comments:	We support the submission of the Doyleston Community Committee in their submission regarding management of Osborne Park We are also submitting for the Ellesmere Archery Club to build an indoor range at Osborne Park

Ellesmere Archery Club Submission

The Ellesmere Archery Club have been operating our outdoor range at Osborne Park since 2016. During this time we have had an excellent relationship with both the council and the Doyleston Community Committee. During this time we have grown as a club, to a point where we have 36 club members and a number of casual archers each week.

Our indoor range is currently located at Southbridge Domain so this causes issues with room as it can only comfortably accommodate between 12 and 16 archers.

Although the building is structurally sound there are issues around it 's location as we have to transport our equipment between both locations, as well as Southbridge wanting to expand the parking area, so we would like to have alternative indoor arrangements within the next 3 to 5 years.

Our Submission

Our submission is that we lease a portion of Osborne Park close to the hall at a minimal rental to build a new indoor range. Our proposal is to dismantle a 12.6 x21m building on the land obtained by Selwyn District Council for the development of a district park in Levi Rd and relocate it to Osborne Park. This building would be extended to approximately 40m, have a concrete floor and a number of roller doors down the side to allow access if community organisations or clubs wish to make use of the building. The side of the building facing the park would have new iron on it, with the original iron being used on the fence side of the extension. We wish to ask the council for a contribution to the costs of dismantling the building and relocating to Osborne Park and fund raise the required amount of money to extend the building to approximately 12.6m x 40m as per the attached drawings. This size building will allow us to accommodate a majority of our members, and there will be no need to transport our equipment. We would also like to have the council provide seed funding towards the cost of the extension and to obtain this, are happy to forgo the upgrade to the lights at Osborne Park which we applied for through the Doyleston Community Committee 3 years ago, as long as this is not to the detriment of any other users of the park.

Conclusion

As well as assisting our club to grow, we feel this will be beneficial to the community by providing additional facilities for community which are unable to be accommodated by existing or proposed new facilities. This will allow us to run things like Have a Go days in any

	weather conditions as well as other groups we work with such as the Defence Force Invictus Games Team. This proposal is a win for the council, Doyleston and Southbridge, as it assists the council by removal of a building with minimal demolition costs, it creates a modern Archery facility at Doyleston as well as expanding the opportunities for community use at Osborne Park, and also assists Southbridge by allowing demolition of our current indoor range to allow more parking as Southbridge adds its new court areas. We also support the Doyleston Community Committee in their submission regarding management of Osborne Park
Staff Recommendation	Staff support the submission as it covers off a number of key community outcomes including activating a community hall with low usage, saving council lighting costs, activating a reserve with low usage, freeing up space at Southbridge Park. Staff recommend agreeing to this approach in general with the finer details such as shed size and relocation to be worked though in due course with the Ellesmere Archery Club.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	
	Question: 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

	Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1362.6
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. Category	Questionnaire > Matters For Community Guidance
Comments:	

	Question: Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1363.6
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	NPHS Te Waipounamu note the highlighting of the role of the Council in considering climate change and improving wellbeing. NPHS Te Waipounamu supports the Council's actions to mitigate and adapt to climate change, including through the collective climate action plan developed by the Canterbury Mayoral Forum. We encourage Council to consider opportunities to integrate health and social factors into these climate actions. For example, a risk assessment of climate impacts of land and infrastructure could consider potential health and social impacts of climate risks.
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. Council is developing a Future Selwyn Strategy that looks beyond the 10-year horizon to consider how we can respond to these challenges. The Council is also developing an Emissions Plan and Sustainability Plan to identify actions into the future.

Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	

Question: You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:

Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi.

Project cost:
Years 1–3: $4.2 million
Years 4–10: $11.6 million

Estimated impact on rates:
Years 1–3: $7.06
Years 4–10: $19.52

Funding:
Rates: 49%
NZTA Waka Kotahi: 51%

Our
budgeted
option

Comment: Public Transport 11. NPHS Te Waipounamu supports Option 1 – Building three new Park and Ride facilities in Lincoln and Rolleston and upgrading public transport infrastructure. Supporting more people to use active and public transport will reduce congestion, help cut transport emissions and increase physical activity, benefitting the health of people and the planet. 12. Public transport promotes accessibility to work, education, health services as well as key business areas. Access to public transport is important for people who do not have access to other transport modes, including disabled people, older people, youth and low-income earners. For example, without safe, accessible public transport, individuals who are blind, deafblind or have low vision have reduced independence, higher rates of unemployment, limited recreational opportunities, and increased social isolation.5 5 Blind Low Vision NZ (2023). Access to Public Transport. Accessed from: https://blindlowvision.org.nz/about-us/position-statements/access-to-public-transport/ 4 13. The increased use of public transport not only reduces kilometres travelled in private cars, cuts carbon emissions and improves air quality, but also allows greater access to roads for

	people walking, cycling and scooting by removing single-occupancy vehicles from the roads
Staff Recommendation	Submission is acknowledged by Council and the support for the various activities and projects in draft LTP
Point Number	1363.8

2027/28

	2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:** Waihora Whata Rau - community facility and reserves upgrade Leeston 14. On decision 2a, NPHS Te Waipounamu supports Option 2 to build Whata Rau as agreed using the concept plan that was designed around the community needs for a flexible space with cultural narrative. 15. Community facilities, such as libraries and recreational facilities, have the potential to improve community resilience and support physical and mental health and wellbeing by providing places for people to meet and participate within their community. We encourage Council to consider how new and upgraded community facilities can be built to be fully accessible and inclusive for all people to use, now and in the future. We also encourage the Council to engage meaningfully engage with different communities to ensure that community facilities are inclusive and accessible to people of any age, ability, gender, ethnicity and culture. 16. On decision 2b, NPHS Te Waipounamu supports Option 2 to carry out landscape and facilities improvements as described. The main items of interest to NPHS Te Waipounamu are upgrades to the footpaths, toilet blocks, and lighting for both health and safety reasons. While Options 2, 3 or 4 would all deliver these, the impact on rates makes Option 2 preferable. Option 2 also retains improvements to the playing fields and playground equipment providing better spaces to encourage physical activity. NPHS Te Waipounamu recommends that the Council uses the PARCS tool6 when planning the accessibility of reserves. This tool is a checklist to ensure the accessibility and usability of toilets, rest areas, play areas, paths, car parks and bus routes.7
Staff Recommendation	The submission is acknowledged. Consideration of inclusivity and accessibility will continue to be factored into Council's planning of indoor and outdoor spaces.
Point Number	1363.9
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility

Comments:	
	Comment: Malvern Recreation and Sport Facility 17. NPHS Te Waipounamu supports either Option 2 or 3 to build a community recreation and sport facility at Darfield. The final size and budget should be determined based on community needs. 6 PARCS stands for Parks for Activity in the Community Study. 7 Perry, M. A., Devan, H., Fitzgerald, H., Han, K., Liu, L. T., & Rouse, J. (2018). Accessibility and usability of parks and playgrounds. Disability and health journal, 11(2), 221-229. 5 18. Regular physical activity has numerous benefits for physical and mental health, including reducing the risk of heart disease, Type 2 diabetes and several cancers, plus improving mental health, mood and cognitive function. Having access to local facilities is associated with higher levels physical activity. The Selwyn Sports Centre has proved very popular for sports, recreation and events. As the population around Darfield grows having indoor facilities closer to home will benefit the community. NPHS Te Waipounamu recommend that the design of the new facility be fully accessible to allow for people of all ages and abilities to make use of it. 19. Indoor sports facilities allow sport to be played regardless of the weather, providing options of spaces for recreation that are resilient in a changing climate. In addition to providing a space to be physically active, sports facilities have social benefits through providing space for people to meet and socialise, foster social inclusion and participation, and being an important source of employment and local economic development.
Staff Recommendation	It is acknowledged that the submitter has selected Option 2, build the community recreation and sports facility at Darfield that includes one indoor court.
Point Number	1363.10
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Sheffield Memorial Pool 20. NPHS Te Waipounamu supports the closure of the Sheffield Community Pool. Recreational water environments, such as swimming pools, can pose a number of public health risks, including transmission of infections. Serious gastrointestinal infections such as those caused by Cryptosporidium, Norovirus, Giardia and E.coli, can be spread through contact with pool water, even if treated with chlorine as protozoa such as Cryptosporidium and Giardia are resistant to standard levels of chlorine in pools. Older facilities can also make it difficult to meet modern water quality expectations such as treatment with ultraviolet

	(UV) which is needed to reduce risks of water-borne disease. 21. Although swimming has benefits for physical activity and can be an inclusive activity for people with disabilities, the proximity of the newly upgraded Darfield pool means there is a suitable alternative to the Sheffield location Sheffield Memorial Pool 20. NPHS Te Waipounamu supports the closure of the Sheffield Community Pool. Recreational water environments, such as swimming pools, can pose a number of public health risks, including transmission of infections. Serious gastrointestinal infections such as those caused by Cryptosporidium, Norovirus, Giardia and E.coli, can be spread through contact with pool water, even if treated with chlorine as protozoa such as Cryptosporidium and Giardia are resistant to standard levels of chlorine in pools. Older facilities can also make it difficult to meet modern water quality expectations such as treatment with ultraviolet (UV) which is needed to reduce risks of water-borne disease. 21. Staff Recommendation	It is acknowledged that the submitter has selected to close the Sheffield Memorial Pool.
Point Number	1363.11
Category	Questionnaire > Matters For Community Guidance > Digital Solutions

Comments:	Digital Solutions 22. NPHS Te Waipounamu supports Council investing in better technology solutions to improve services to the community. 23. NPHS Te Waipounamu recommends Council prioritise digital accessibility in their new digital strategy to ensure that digital services and offerings are inclusive for disabled people. Accessible information and communications allow disabled people to participate and contribute on an equal basis with non-disabled people. We suggest Council considers how to increase accessibility beyond current digital standards to make the Council's services and information as inclusive and accessible as possible. Captioning videos, using colour contrast that supports readability, and ensuring websites and forms are accessible to screen reading software can reduce barriers for people with disabilities. 24. NPHS Te Waipounamu notes that care should be taken to ensure that the community, especially older people in Selwyn, can find the information they need online easily. Service staff in libraries and service centres should be trained to play a key role in assisting residents to navigate Council's digital information and empowering them with the skills to access services independently.
Staff Recommendation	Face to face interaction will continue to be an important part of how we interact with our communities. Our digital approach is designed to make things more streamlined, connected and efficient.
Point Number	1363.12
Category	Activity > Strengthened Partnerships
Comments:	Strategic relationships 25. NPHS Te Waipounamu supports Council strengthening partnership with mana whenua. Māori experience many disparities in health outcomes compared to non-Māori. Te Tiriti o Waitangi, including the preamble and the three articles, along with the Ritenga Māori declaration, are the enduring foundation of achieving hauora and independence for Māori. The Waitangi Tribunal has noted that Te Tiriti places responsibility on the Crown to 'to protect actively Māori health/hauora and wellbeing' and that the achievement of equitable health outcomes for Māori is a responsibility of all sectors.11 Strengthening the relationship and including mana whenua representation at decision-making tables will support better hauora Māori outcomes.
Staff Recommendation	The submission is acknowledged.

Point Number	1363.13
Category	Activity > Providing safe drinking water
Comments:	Providing safe drinking water 26. NPHS Te Waipounamu recommends that the Council chlorinates its water supplies to help protect the water from contamination throughout the entire network. Chlorination has significant benefits for controlling infectious diseases. 27. NPHS Te Waipounamu supports investigating centralisation of water supplies to reduce nitrate levels in the drinking water supply. High levels of nitrate in drinking water may pose a significant health risk for the foetus in pregnancy and formula-fed infants (babies less than six months old). Adults with specific rare metabolic disorders (deficiency of glucose 6-phosphate dehydrogenase or methaemoglobin reductase) may also be at risk. 28. NPHS Te Waipounamu recommends that Council fluoridates its water supply. Fluoridation is safe and effective at usual water treatment dosages and is the most effective way to reduce oral health inequities, especially for the most economically-deprived. Data collected by the Community Oral Health Service in 2022 show that 63 percent of year 8 children in Canterbury were caries free. This compares to 73 and 80 percent of year 8 children in Wellington and Auckland respectively, which have fluoridated water supplies. Caries free means that the children have no past or current experience of dental decay. We note that Waikiriri Selwyn has not yet been directed by the Director-General of Health to fluoridate but support this effective intervention to improve the oral health of residents of Selwyn, particularly children
Staff Recommendation	The submitters support to continue to chlorinate community drinking water supplies is acknowledged. Staff recommendation is to continue to chlorinate community supplies to reduce risk to community health. The submitters support for investigation of low nitrate water sources is acknowledged. Staff recommendation is to undertake further investigations into centralised sources of low nitrate water as budgeted in the LTP. The submitters support for fluoridation community drinking water supplies is acknowledged. The cost to fluoridate supplies is estimated at $7.9m over the LTP period. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.

Point Number	1363.14
Category	Activity > New Public Transport
Comments:	29. Transport is an important determinant of health and wellbeing. Transport can improve health by providing access to places, services and opportunities that are essential for good health and wellbeing. Transport can also cause significant harm such as through air pollution exposure, greenhouse gas emissions and road crashes. These benefits and harms are not spread evenly across the population. Some groups, such as Māori, older people and more socioeconomically deprived people, gain fewer benefits from the transport system, and suffer more of the adverse consequences. Disabled people and people living in rural areas can also experience transport disadvantage due to factors such as financial and access barriers or a lack of transport options. 30. In a rapid health analysis during the update of the Canterbury Regional Land Transport Plan 2024-2034, NPHS Te Waipounamu identified pathways to positive health outcomes from transport system shifts. (see original submission for table) 31. Rural communities experience inequitable access to health care appointments and procedures when compared to their urban counterparts, due to travel time and expense, requirements for accommodation, childcare, time off work and distance from whānau support. Many people across Te Waipounamu identify travel costs and transport as major barriers to accessing the care they need. 32. NPHS Te Waipounamu supports preparing a business case with Environment Canterbury to improve public transport services in Waikiriri Selwyn, particularly to some of the smaller townships. As noted in our comments supporting Park and Ride facilities, access to public transport can have a positive impact on health. People living in rural settings face different health and transport challenges to their urban counterparts. Transport plays a critical role in access to other determinants of health and to social connection. The dispersed nature of rural residents means there are currently few alternatives to using private vehicles to access these amenities. More public transport services can support access and mode shift, which has benefits for community wellbeing outcomes. The current services are

well used but do not necessarily meet the needs of younger or older Selwyn residents

33. NPHS Te Waipounamu supports increasing funding for roading maintenance and renewals, including a new bridge at Whitecliffs, Rolleston transport improvements and budgeting for emergency work that might be needed due to climate change or extreme weather events. Improving the safety of the transport system, including through well-maintained roads, has direct health benefits such as reduced injuries and deaths. The dispersed nature of rural residents in many parts of Selwyn means they are at high risk of isolation and disruption of services in the event of climate events, extreme weather or social emergencies. Transportation plays a critical role in this, both directly and indirectly, acting as a primary infrastructure lifeline within a community. In the event of a disaster, the restoration of all other lifeline systems depends on the ability to move people and resources to the sites where damage has occurred. A more resilient roading network can lead to improved health outcomes by reducing severance and disrupted access to community and resources. Well-maintained roads also reduced greenhouse gas emissions, noise and vibration.

34. NPHS Te Waipounamu supports upgrades to the Lincoln Town Centre, especially improving walking and cycling access. NPHS Te Waipounamu recommends using the Healthy Streets framework and the New Zealand Healthy Streets Design Check Tool to support healthy community outcomes while planning and implementing the design of the upgrades. Improving the streetscape, footpaths, cycle lanes and lighting can improve safety, encourage uptake of active transport and support social capital.

35. NPHS Te Waipounamu also encourages the Council to prioritise and fund actions that reduce reliance on cars and support the uptake of public transport, active transport and micro-mobility modes, such as e-scooters and e-bikes, such as through behaviour change initiatives at schools and workplaces, improving safety through speed management, and building infrastructure that make these modes an attractive and easy choice. People who use active transport modes, like walking, cycling, and public transport, are more likely to meet physical activity recommendations for good health, compared to those who drive. Active transport is the most important opportunity available to New Zealanders to increase their physical

	activity to adequate levels for health and the transport environment is key to facilitating or hindering this.
Staff Recommendation	Submission is acknowledged by Council and the support for the various activities and projects in draft LTP
Point Number	1363.15
Category	Activity > Other Categories identified by Staff > Waste Management
Comments:	Resource recovery and waste management 36. NPHS Te Waipounamu supports compulsory organics kerbside collection in Darfield, Leeston, Lincoln, Prebbleton, Rolleston and West Melton. Using wheelie bins similar to recycling bins to collect both food scraps and green waste would provide the biggest opportunity to divert organic waste from landfill, which in turn has positive impacts for the climate. 37. Reducing the amount of organic waste that ends up in landfill has many benefits including reducing the amount of methane produced, reducing other greenhouse gas emissions and reducing the overall volume of waste going into landfills. This means that existing facilities can operate for longer. Organic waste that is turned into compost can also help regenerate soil and contribute to the circular economy by reusing materials. 38. In addition to collecting organic waste, we suggest that Council consider ways to support and encourage households to reduce waste such as through food waste reduction campaigns. In the waste hierarchy, reducing waste ranks higher than composting waste, because it's better not to generate waste in the first place. 39. We also suggest that Council encourages households and communities to compost at home or at community gardens because this has the added benefits of avoiding the transport emissions generated by kerbside collections and by transporting organic material to facilities. Encouraging people to compost may also support them to grow their own food and support food resilience. 40. We support Council working with the community to understand any cost implications for households which do not already have organics bins. We also recommend investigating discretionary exceptions to compulsory collection for residents who may live on the outskirts of the affected towns who may have more typically rural properties but be within town limits.

Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. 36. We are pleased that you are supportive of the change. 37. We agree. 38 - 39. Council currently contribute to the national Love Food Hate Waste campaign, hold public workshops about food waste (and other waste minimisation topics), and publish food waste reduction social media posts. We also have a community garden under development, adjacent to our ReDiscover Education Centre. This will have a focus on food waste avoidance and we will hold workshops on topics such as preserving fruit and vegetables, how to store vegetables and herbs for longer shelf life and less food waste, and composting workshops. 40. We intend to seek guidance from the Ministry around the discretionary exemptions.

Category	Activity > Other Categories identified by Staff > Social / Affordable Housing
Comments:	Property and Assets 41. NPHS Te Waipounamu supports the introduction of a new development contribution to provide for community facilities to serve new developments. Neighbourhood environments conducive to healthy living have safe outdoor spaces to exercise and play, allow community members to walk and bike safely, have access to public toilets, clean drinking water and community facilities including schools, shops with healthy food options, green spaces and water systems. As communities continue to grow it is vital that these features are planned for and provided. 42. NPHS suggests that Council works collaboratively with other councils, agencies, developers and social housing providers to increase the variety of housing stock in Selwyn to meet the needs of a wider range of residents. Housing is a critical determinant of health, and the places people live are also critical in enabling (or acting as a barrier to) health and health[1]promoting behaviours. To meet community demand now and the future more affordable and diverse types of dwellings are needed, such as smaller dwellings (1-2 bedroom homes), multigenerational homes, kaumātua and social housing. For example, having more variety for older residents to downsize locally to will increase opportunities for residents to remain living in Selwyn and maintain social connections as they age.

	Increasing public transport options as discussed above is one way to enable the feasibility of developing of a wider variety of housing that may be more suitable for residents without private cars. The Greater Christchurch Partnership (GCP) Housing Action Plan has the potential to support more people to access healthy, warm, sustainable and affordable housing in Waikirikiri Selwyn. NPHS Te Waipounamu supports Council's involvement in the GCP Housing Action Plan and encourages Council to dedicate funding towards completing the actions in this plan. 43. NPHS Te Waipounamu recognises the need for proposed rates increases to pursue the transformational opportunities that will have a meaningful impact on environmental and population health for Waikiriri Selwyn. NPHS Te Waipounamu urges Council to continue to consider how these proposed activities can be delivered as efficiently as possible. This will maximise the impact of increased rates revenue on outcomes so that the benefits to the community outweigh the financial impact on households.
Staff Recommendation	Submission is acknowledged by Council.

Submitter Number:	1364	**Submitter:**	Details Withheld
Point Number	1364.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million		

	Estimated impact on rates: Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:** We need to get the infrastructure in place now to assist with future growth which is coming fast. Better and safer options for transport for the community.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council
Point Number	1364.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan, but with additional sports courts and/or bigger community meeting spaces. **Project cost:** Year 1: 19.24m **Estimated impact on rates (per year):** $53.14 **Funding:** Rates: 80.5%

	Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Category	Activity > Lincoln Town Centre Upgrades
Comments:	I would like to see council strategies for the Lincoln community. - Safety upgrades to the roads in and around the Schools in Lincoln. -- More drive through drop-off zones. -- Prevent parents from driving right up to the school and parking to drop kids off and doing crazy u-turns. -- Making footpaths and crossings safer to incentivise parents to let their kids walk to school. -- Safer cycling pathways to allow more younger kids to bike to school and parents to deem this a safe option. - Reduce throughfare traffic in Lincoln and also find ways to slow traffic down as currently the main roads through lincoln are busy and dangerous. Most vehicles travel over the speed limit and are not concious of what they're doing. - How are we as a community going to account for the growth in Lincoln that is coming with PC69 and communter traffic into the city. Park and Ride facilities will help with this. - Safer cycling paths around the town. - Drivers are running stop signs around 80 - 100k zones on some of the roads around Lincoln. Not sure how this can be combatted effectively without putting speed bumps on the stop signs to force drives to slow down and stop.
Staff Recommendation	Submission is acknowledged by Council.

Comments:	far out thats a HUGE jump up in rates. Not sure how in 2yr time we're going to be paying nearly an extra $2k?!! Thats a fricken lot with everything ekse going on. Most definitley shut that pool down! Ha.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1365.12
Category	Activity > Planning Further Community Facilities
Comments:	the "city of selwyn" really needs to be planning soke arts facilities too. Literally everything in this was about "sports and recreation" which is great, we totally need that. But can we start thinking about the "other kids". The ones that need a creative space and outlet. Like an art studio on thr back of a theatre. It doesnt have to be huge, fancy and state of the art. But we do need something. Bit disappointed there were no options on that.
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.

Point Number	1366.2		

Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	The Selwyn Huts should be listed as a historic site on the District Plan. It pre-dates the 1900s so it is an archaeological site under heritage pouhere taonga act. All homes and all people should be protected. It's inhumane and disgusting to evict the Selwyn Huts residents from their home. Review the 15 year finite term and let them stay. This also helps preserve our kiwi history!!! It is unfair not to include Selwyn Huts on the District Wide Rate. Excluding a community in the district seems to contradict the name "District Wide Rate" and goes against the purpose of introducing the DWR in the first place. Replace their reticulation system. Council have been in charge of this since 1989 - you dropped the ball by not doing any maintenance and upgrades over the last 35 years. Don't use your incompetence as an excuse to make these people pay or to kick them out.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1369.7
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	this is outside the council mandate i feel. also we cant afford this
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and holds a view that Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	1369.8
Category	Activity > Other Categories identified by Staff > Rates
Comments:	yes as long as it has a postive impact on reducing rates. It feels to me like the council is very much out of touch with what is happening on the ground with rate payers. We cant afford the rates now let alone the increases predicted. Rates cannot on any shape or form continue to keep being ahead of inflation, the cloth needs to be cut to suit. The aspirations of having things that we dont actually need, needs to change.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1369.9

Category	Activity > Other Categories identified by Staff > Financial management
Comments:	1. Council staff numbers need to be capped for now, households/businesses etc in Selwyn and across the country are bleeding capital. We cannot afford the proposed rate changes.
Staff Recommendation	That the submission is acknowledged by Council. With the rapid growth of the district the workload has increased significantly. The Council has endeavoured to keep the headcount to an optimal level.
Point Number	1369.10
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	2. I am very disillusioned at the way council has taken over control of reserves thinking they know better. The outcome is more cost to rate payers. Also it is driving resiliance away and reducing community well being. We now cant go onto our reserves and do anything. Our rural community is very engaged and driven and needs these type of projects for us to thrive. The current method is actually having the opposite effect. We have very strong linkages to our reserve given it was originally donated to the community by a local farmer and has had significant events occur over the years. eg My Grandfather was involved in voluntry building an airfield on part of the reserve during the war for the ultimate benefit of our community at the time and into the future, we have lost this kind of practical yet simple and very cost effective thinking. Last week i watched 2 guys from Corde arrive at the reserve in 2 vehicles and they chopped down 1 small pine tree by the walking track which was approx 10-15cm at the base. At what cost to us? This needs to change. I have worked in the Rural Support Trust for the last 20 years and for us building communities resiliance is paramount going forward. The current system lead by council is completely at odds to what we are trying to do at the RST.
Staff Recommendation	Submission is acknowledged by Council. Council appreciates the strong connection that communities have with their local reserves and domains. Although Council has formally disestablished committees of Council including reserve committees it is intended that there will be opportunities for local communities to continue to provide valuable input to reserves on a voluntary basis. This can be by way of acting as a local point of contact for reserve matters or involvement in organised projects. Staff are aware that there have been teething problems with maintenance works as these have

	transitioned from committees to contractors but are committed to providing an effective service going forward.
Point Number	1369.12
Category	Activity > Other Categories identified by Staff > Rates
Comments:	I am very concerned with our rates bill now. We sit very close to $40k pa. i dont mind paying for things but please show me what i get for my $40k. We dont get rubbish and i am very close to disconnecting the house/stock water and sorting my own supply to reduce our rates bill. It feels like rural people are paying alot more than we should simply because we have a large capital value. **This needs to be addressed ASAP**
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1369.13
Category	Activity > Planning Further Community Facilities
Comments:	**With council pressing on building pools, large reserves, librarys in Rolleston this is fine but i have and will never step foot in any of them. Can i suggest that these be more based on user pays. Why should i or someone in eg Arthurs Pass pay for this when we are never going to use it.** **From 2013/14 to present our rates have increased 366% or 36% per annum. While over that time inflation has gone up 2.1% per annum. Do you not see that?** **Yes some of this is increases in farm size and on farm development but again what am i getting for my rates?**
Staff Recommendation	The submission is acknowledged.
Point Number	1369.14
Category	Activity > Infrastructure DC

Comments:	**To me development contributions are not high enough as why are rates exceeding inflation now and into the future as planned.**
Staff Recommendation	Council has reviewed the development contribution charges to ensure they reflect the requirements for the growth portion of capital projects and can only apply development contributions to the growth community that benefits from the assets provided. Development contributions cannot be used for maintenance and renewal works. A thorough and robust process is undertaken to calculate the development contribution amount that can be fairly and reasonably applied to the growth community for a project. The calculation is made in accordance with the Council's Development Contribution Policy and the legislation that underpins the policy as well as guidelines on administering the policy.

Point Number	1370.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment: Consider other areas that have no public transport at all eg rural Malvern, How about a bus from Springfield through to town collecting folk along the way even if it was once a week or fortnight for those that don't drive to access appointments or shopping etc**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. Council will be investigating what further PT services can be provided across the wider District, further to what Environment Canterbury can provide.
Point Number	1370.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

	Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** Use money elsewhere under currant financial climate, other areas are growing more rapidly. Rural areas losing facilities whilst urban get brand new. Who pays the most rates!
Staff Recommendation	The submission is acknowledged.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1370.6
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	**The question is deceptive and misleading, unfortunately wider Selwyn will get an untruthful impression.** **A million dollar upgrade utter nonsense Used less! What a joke the council has the hours open, limited so much its barely accessible.** **This wonderful facility has been an asset to Sheffield since it was built 70 years ago.** **The takeover and subsequent running down by council with the ultimate goal of closure is terrible, the lack of maintenance when rates are taken for its upkeep are criminal.** **Give it back to the good people of Sheffield to manage as they did so very well.** **from recent research other councils support their local pool committees in running these smaller facilities very**

	successfully.(same depth and size)with actually little cost or imput, they help them. **More often than not locals have greater knowledge and commitment to local assets than staff an council will ever have.** **Under the misconception that the council would to a better, cheaper ,more efficient job of looking after these cherished facilities, rural towns were duped of the right to manage any asset when clearly time has proved the opposite.** **Private Engineers Reporting indicates that the Tub leak is easily repaired, so too all other ownership issues leave as is.** **After two extremely supporting public meetings, I feel confident the Sheffield people have far greater skill & capacity to take it forward into the future.** **Along theses lines I have started a petition to be presented when i speak to my submission, due to the very short timeline from public notice of closure to now i assume understanding in the effort involved and continue on till the date i speak** **Perhaps as a show of support the councilors may wish to grant the money allocated for demo to a new pool entity to begin with. Fair to say it was taken from them in far greater shape than it has been left at now.** **yours sincerely** **Michelle Webster**
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff

	response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Submitter Number:	1371	**Submitter:**	Sharon King
Point Number	1371.2		
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities		
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a share Hub/Clubrooms built at the proposed new Tennis & Netball facilities based in West Melton. West Melton Tennis & Netball share the vision to provide an inclusive, nurturing & welcoming community focused environment to develop players of all ages, creating longevity for the clubs & community. What we are asking for is a hub to bring our community together to create a sustainable future of tennis & netball but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Tennis nets, tennis poles, tennis balls/trolleys, netball		

	balls, gear bags, hoops & training equipment. The space would require a kitchenette suitable for making tea & coffee and afternoon tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Category	Activity > Other Categories identified by Staff > Speed Management
Comments:	I would really like decreased speed limits on the outskirts of Lincoln. Increased population means increased people out and about running, walking, biking on the outlying country roads. No foot paths available, in places very little roadside to walk on. In low lying Lincoln, bird life is around the area, endangered by traffic. Please

	consider lowering speed limits and providing safe areas for those not in cars to travel around the rural areas.
Staff Recommendation	Submission is acknowledged by Council. Council has previously consulted on a full speed management plan which reflected your submission, we need to give some consideration to the consultation results, which were largely unsupportive of speed limit reductions. We are now dependent on central government to outline how speed limits are to be managed and update our full speed management plan accordingly.

Category	Activity > Planning Further Community Facilities
Comments:	Selwyn needs a dedicated Arts facility. Arts, culture and creativity are important to the overall wellbeing of everyone in the community. The Arts and Creative sector contribute to our economy. The emphasis in Selwyn seems to be on sporting facilities, this is great, however all residents should have facilities of their choice provided for. EG Our family have enjoyed the midwinter lights in Christchurch, travelling in enjoying them, eating in town at the time. Would be awesome to see this in Selwyn. Theatre of any kind is a great social and relaxing place to go to.
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.

2033/34 **Comment:** Leeston needs a community center. There are many groups and organizations that would have a use for this venue. The current design is very disappointing and is not fit for purpose, we don't require the library to be part of the community center and it makes sense for the library to stay in its current position. This whole process has been very drawn out with many rate payers $$ being wasted and not utilised correctly in the process. There is note above about community consultation, but I feel this has been very limited. The community does not need or asked for a state of the art, eco and very expensive building. I feel we would be happy with something along the lines of TaiTapu that can be configured into different size rooms etc - this is also a cost saving to council to use exisitng plans and something that is known to work. There was mention that the library needed to be in the same building for staffing reasons etc, but the majority of the other community centers operate as separate entities and seem to be successful - not sure why Leeston needs to be any different.

Staff Recommendation	The submission is acknowledged. Council staff consider that there are significant efficiencies and increased benefits to be made in ongoing operational costs and usage if facilities are multi-purpose / multi-functional, where that makes sense to do so.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1375.7

Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	Consultation with all groups in local communities would be preferable over just select groups. The same with rating....one rating system for everyone would be preferable
Staff Recommendation	Council acknowledges the submission and notes the concern around the level of clarity regarding how specific groups will be engaged with. The proposed policy sets out Council's general approach to determining how and when it will engage with the communities it serves. Council's engagement approach will be determined based on the level of significance assessed using the assessment criteria outlined. Council acknowledges the submission. Council is required by s 108 Local Government Act 2002 to have a policy on the remission and postponement of rates relating to Maori freehold land. When developing this policy staff have considered its position regarding rates postponement and remission based on these legislative requirements.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22

	Funding: Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**

Comments:	maintain and increase levels of climate change response. Never ever put it further down the level of importance
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. Council is developing a Future Selwyn Strategy that looks beyond the 10-year horizon to consider how we can respond to these challenges. The Council is also developing an Emissions Plan and Sustainability Plan to identify actions into the future.
Point Number	1376.9
Category	Activity > Other Categories identified by Staff > Bio-diversity

Comments:	protection of our bio diversity is a significant responsibility as we look to the future of this area. We have significant species, both plant and animal which need protection. The Kea in Arthur's pass and other Wildlife in the area are currently supported by the local community. The SDC should provide support to these communities to continue this work.
Staff Recommendation	Councill environmental staff are working hard to reverse the decline in our native species across the district. They recognize that kea protection efforts need to be supported and focused, and as such staff are engaging with stakeholders regarding the kea feeding bylaw proposal.
Point Number	1376.10
Category	Activity > Walking and cycling improvements
Comments:	Safe Cycle ways across the district should continue to be a priority and not be put on the back burner. A cycle trail which links the mountains to the Little River trail should be supported.
Staff Recommendation	Submission is acknowledged by Council.

Submitter Number:	1377	**Submitter:**	Rory Keeler
Point Number	1377.2		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	The Selwyn Huts should be listed as a historic site on the District Plan. It pre-dates the 1900s so it is an archaeological site under heritage pouhere taonga act. All homes and all people should be protected. It's inhumane and disgusting to evict the Selwyn Huts residents from their home. Review the 15 year finite term and let them stay. This also helps preserve our kiwi history!!!		

	It is unfair not to include Selwyn Huts on the District Wide Rate. Excluding a community in the district seems to contradict the name "District Wide Rate" and goes against the purpose of introducing the DWR in the first place. Replace their reticulation system. Council have been in charge of this since 1989 - you dropped the ball by not doing any maintenance and upgrades over the last 35 years. Don't use your incompetence as an excuse to make these people pay or to kick them out.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1378.7
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Ratepayers should not subside business's making profit. If it truly makes economic sense, then business will/should invest.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and holds a view that Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	1378.8
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	When looking at the long term plan for a council, the first priority should always be to look at the primary purposes of council, and ensuring these are met, before moving onto the other functions. The primary and most important function is to provide quality essential infrastructure to the people of the district. e.g. Quality potable water, safe sewage, rubbish management, safe roading, parks, etc. At no time should spending on “nice to haves” (e.g. Leeston & Malvern facilities and Lincoln Town upgrade) ever impact the primary roles or cause excessive debt. Funding should therefore be prioritised accordingly. This means rates collected today should first be spent on essential services for today, along with saving for any upgrades required, or, replacement as essential services reach their end of life.

Good leaders look not at the 5 or 10 year plan but the 100 year impact of their decisions. Good leadership is not about having showy things to reflect as achievements, but ensuring strong foundations and financial stability for the future. Projects based on loans, indicate the money is not there today, and therefore, we are spending tomorrow's income now. For every project, there are usually ongoing maintenance expenses and ever increasing insurance costs. These create yet another liability for the future and also need to be factored into the future spending budget.

We also have no ability to control future interest rates, so every loan increases risk around what future portion of rates will be committed to servicing loans, rather than essential services, or maintain existing parks, buildings, and staff wages.

Unfortunately, some of the budgetary projections rely on one factor very heavily – a growth economy. Most people are aware, nothing can grow forever. Everything reaches a maximum size of capacity. In this interdependent global world, now more than ever, we have very little ability to influence the larger economy. (We never know what events are coming – eg Covid, Earthquake, etc) When looking at future spending, loans should never rely on expected growth but look only at current income and predicted expenditure. Any population growth and subsequent increase in number of ratepayers dollars should be considered a surplus to meet unexpected expenses/events, or saved for the future, reducing the need for loans. Those moving here should expect to be part of the building up of the area, not have it ready made without their input. Historically towns grew, they saved/fundraised, then built projects to suit the population.

Another factor often overlooked, is who benefits from non-essential projects? Every household in the district pays rates either directly, or indirectly through their rent. So, we have to ask, do the projects allow access for everybody, or do some projects have limited access, or require purchase of tickets, meaning those on restricted incomes, are effectively subsiding projects that only a few will be able to access? eg. A library is free to all, pools admissions is low cost, however a stadium usually requires more expensive tickets to attend events, limiting those that can afford to enjoy the facility. At no time should ratepayer funds be spent on projects that are not accessible or affordable to all. Otherwise, we are asking those on

tight budgets to subsidise those that have easier access and/or a higher disposable income.

Business generation is often used as an explanation for expenditure on town projects, however if the return was truly good and made economic sense, business would be investing without the need for ratepayer funding.

There is a fine balance to be met, between future proofing for potential growth, and not overburdening current ratepayers, to provide for those that are not yet here. An upgraded facility is nice to have, but if we raise loans now to provide these, it means we are less likely to have funds saved for the future, and we enter into a loan dependant system, where each project requires a loan as recent income has been paying off loans of much earlier projects. What is the cost of the interest over the term of the loan until it's paid off, versus saving now and incurring costs increases due to a delayed start? In this instant microwave society where many people live on borrowings, effectively costing them a lot in interest over the term of their life & reducing their overall lifetime purchasing power, are the council setting the right example by borrowing rather than saving? What message is being sent to the people the council is serving?

Subsequently, the council should reflect on its projects and expected outcomes. Sometimes what people want now, is more immediate gratification, and this comes at the expense of future freedom and flexibility to respond to changing circumstances. People will always want more, but as everyone living on a budget knows, what we want, and what we can sensibly afford are often different. Not jeopardising our future freedom and flexibility, or overburdening household incomes for years to come, needs to be a priority.

Households or businesses can't continue to increase spending well beyond the rate of inflation year after year. Therefore, the Council should not consider increasing their spending beyond the rate of inflation. As the population grows, so does council income. So, if there are projects that are wanted, but are not within existing income levels, we should do without for now. Individuals cannot increase their spending exponentially without extra effort to earn additional income, no matter how much something is wanted. No business can

	say I want to spend more, so customers, you have to pay more just because you can't go elsewhere. This is called extortion. So why do council feel they don't have to follow the rules of good management? Care of the people also includes ensuring people can afford to live and rates remain at an affordable level. At a time when households are tightening their belts due to budgetary constraints and subsequently putting off purchasing or upgrading things, (cars, tv's, house extensions, landscaping, appliances, etc) it's not right for the council to spend on upgrading non-essential services and pass these costs onto ratepayers who are already going without.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1378.9
Category	Activity > New Public Transport Services
Comments:	Provide a much better public transport system, to help bring the different communities together so we have a more inter-connected population and allow for better use and access to existing facilities eg libraries and pools, and reduce the need to build new projects which increase debt and rates.
Staff Recommendation	Council will be investigating what further PT services can be provided across the wider District, further to what Environment Canterbury can provide. However it is expected these will need to be fully funded by users and ratepayers subject to further Council consideration through subsequent Annual Plan and Long-Term Plan processes.
Point Number	1378.10
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Increasing rates beyond the rate of inflations indicates overspending. It must be recognised that when council increases the rate by xx%, but apply it to an increased property value, it is actually a higher increase to the ratepayer than the stated % figure. An increase in capital value of a property does not equate to an equivalent increase in income. The way property values have

increased exponentially compared to income does not mean the spending of council should increase exponentially.

Some rates have gone up approx. 65% for households in the last 10 years. But income has not. Rate increases cannot be at high levels long term. It has be changed to within inflationary levels at some point to remain affordable. Saying a debt of 220% of annual income "will not overburden future ratepayers" when the proposal is to increase rates so substantially is not a fair or realistic statement and sounds like a desperate bid to justify overspending. Just because an agency says you can borrow, doesn't mean it's wise, or fair. To max out the debt also gives no room to respond to the unexpected, leaving the future council vulnerable as there is no financial safety net to fall back on. Just because other councils are having huge increases doesn't justify Selwyn doing it. When something's not right, it's not right, no matter how many others do it. So, comparing Selwyn to other councils does not justify it.

Therefore, when increasing rates we need to look at the $ figure of the previous year and base the % on that as the overall increase, not exceeding the rate of inflation, even when increased property value is included. Understandably different properties change value at different rates. To make the calculation easier to administer, I suggest an overall property average could be used to ensure rate increases remain within inflation rates.

In theory, as the population of the district grows, the larger income base and economies of scale should see the per household rates bill come down. Not go up because we can now get bigger loans to build even more. (Unfortunately, not a single council have managed their expectations for wanting more, and achieved this reduction.) New subdivisions, paying rates today, are likely to have lower maintenance costs for a few years, so this income boost should be spent wisely rather than going towards funding loans, as when the subdivision maintenance costs arise in the future, the money will have already been spent elsewhere. This is where the loan trap begins, spending too much now rather than saving for tomorrow.

We are being advised that essential services like water, sewage and roading are already facing high increases of 27-30% well above the

	standard rate of inflation. Not to mention the impact of climate change on the budget. How then, can we responsibly spend on non-essential projects? The percentage of household income spent on rates, either directly or via rent, has gone up beyond the rate of inflation over the years. It is impossible for councils to continue increasing rates at current levels year on year and not have adverse impacts on the population they are serving. It cannot grow forever, everything has a maximum. These increases are not sustainable. Those with fixed incomes should not be pushed to being unable to afford medical visits, pay for insurance, or forced to sell homes because rates are too high. This is a position some retirees are in. This is where some people are today, and with current projections it is only going to get worse. Some day, one day, the increases will have to be reined in. Why not now? Why doesn't Selwyn lead the way showing the country what is essential is the primary goal. Focus on rates affordability, and keep what's "nice to have" done in moderation, reflecting respect and consideration to household and business incomes, and as a reflection of the Counsel's care for the community? Model what people should be doing with their own budgets, focus on the essential and not build up too much debt.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1378.11
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Whilst businesses may want expenditure on town or development projects to help their futures, does this help every sector and household equally and fairly, or are they expecting low income ratepayers to subsidise their growth?
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and holds a view that Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.

Point Number	1378.12
Category	Activity > Lincoln Town Centre Upgrades
Comments:	The Lincoln town upgrade is projected to cost $46 million. That is a large spend per head of population. How is this affordable with the current – not future - population?
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1378.13
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Comment:** The same for the Leeston and Malvern projects. The per head spend is high. This can't be an affordable or sustainable expectation to set for other centres within the district.
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility.
Point Number	1378.14
Category	Activity > Lincoln Town Centre Upgrades
Comments:	Are lovely new buildings like the Leeston & Malvern facilities and Lincoln Town Centre a necessity right now, or are they just nice to have, and have we saved enough to complete the project, or are we borrowing from tomorrow to pay for today?
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1378.15
Category	Activity > New Public Transport

Comments:	Would a better public transport system, providing links to existing facilities be a much better option than spending big, and borrowing to pay for what we can't currently afford? Because raising rates at current projected levels should not be considered affordable. Better public transport is already in the plan. Make sure it accommodates the areas that don't have facilities. Give smaller areas easy access to existing council facilities, and ensure the transport runs at times the population are likely to use them.
Staff Recommendation	Council will be investigating what further PT services can be provided across the wider District, further to what Environment Canterbury can provide. However it is expected these will need to be fully funded by users and ratepayers subject to further Council consideration through subsequent Annual Plan and Long-Term Plan processes.
Point Number	1378.16
Category	Activity > Other Categories identified by Staff > Debt Levels
Comments:	Wisdom, is not bowing to pressure of the loudest, for short term gratification with a high debt burden, but showing care for all, including the meek and the mild, and preserving future freedom and flexibility. Whilst providing nice showy things may help with re-election, is it truly serving the community best?
Staff Recommendation	That the submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.

Point Number	1379.4
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	My name is Corey Woodward and I'd like to state my full support for the North Canterbury Equestrian Advocacy Group (NCEAG)

	submission. I'm a horse rider, as are my wife and family. We live near West Melton. Upon taking up riding it became clear there were very few options for riding in the Selwyn District that didn't involve private property or the roadside. As a result of this frustration Treks & Trails of New Zealand was born in 2019 - a free online map of places to ride horses through-out New Zealand. Sadly, compared to other districts, Selwyn has very few lines on the map. The West Melton Horse Forest is one of these, which is a fantastic ECan facility and is our go to ride if we don't want to drive further afield. With such an expansive and beautiful landscape, our district has huge scope for SDC sanctioned/promoted horse trails - either dedicated or shared use - alongside rivers (flowing or not), within reserves, and utilising Unformed Legal Roads (sometimes erroneously referred to as Paper roads). I've seen shared trails working extremely well in the USA. We are fortunate that a lot of grass road verges in Selwyn are wide and mostly maintained by the adjacent landowners to a rideable standard, creating opportunities for some riders. However, not everyone is comfortable riding beside a road for a number of reasons, including nervous horses, a new or young rider, traffic behaviour or encroachment by other infrastructure or obstacles. As such, I ask that Council: A. includes horse riding representatives resident in Selwyn in the planning of infrastructure projects and other relevant reviews - I am available, as the Selwyn representative of the NCEAG, and also have the ear of over 2600 riders who follow Treks & Trails of New Zealand. B. includes horse trails in the planned activities within the new Regional Park on the outskirts of Rolleston. With the eventual size of the park there should be scope for meandering bridle trails that can intersect and/or run parallel to foot and cycle trails. This works well in Bottlelake Forest for instance, and to a lesser degree in the West Melton Forest (less intersections, not less well)
Staff Recommendation	The generally accepted definition of a vulnerable road user in NZ is safely providing for people walking, biking, or on other wheeled devices. It does not include horse riders as they have choice whether they wish to ride on roads or not. Council has in the past have adopted bylaws preventing horses being ridden or trotted on Councils formed shared use paths. This relates to how incompatible this is with its primary intended use by pedestrians and cyclists that can be scared by horses (and vice versa) plus the damage caused and inconvenience from horse droppings etc. As a large rural district, Council encourages horse riders to use low volume rural roads to ride alongside rather than busy arterial roads which poses a safety risk to all road users or use dedicated riding parks. The NZTA does not provide co-funding to support horse riding on

	roads for any purpose as this is not related to transport. The proposed Selwyn District Park could include for such activities but contact needs to be made within Council with those planning the park to discuss opportunities.

Category	Activity > Walking and cycling improvements
Comments:	My name is Corey Woodward and I'd like to state my full support for the North Canterbury Equestrian Advocacy Group (NCEAG) submission. We're also a cycling family and as such love to see the investment being made in growing the safe off-road cycling infrastructure in our district. However, some of these projects also reduce or restrict the ability to safely ride on the roadside. The West Melton to Rolleston cycleway, for example, has greatly reduced the amount of room available to ride on the grass. In this case, not too many horse riders will be riding into Rolleston itself, but the horse owners in the Knights Road and Maddisons Road area have had their options restricted. As such, I ask that Council: C. Consider the impacts on roadside riding when planning new infrastructure and develop road safety messaging around passing speeds and distances. D. Encourage use/development of Rivers, reserves, and ULR (Unformed Legal road) as riding routes, removing any obstacles such as locked gates or fences, and eventually adding signage and providing mounting blocks - concrete mounting blocks can also act as motor vehicle deterrents if necessary.
Staff Recommendation	Submission is acknowledged by Council. Council must consider value for money and social equity when using rates to meet the needs of the broad community.

Comments:	**Question:** Do you support the closure of Sheffield Community Pool? No **Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1380.4

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	I would like to see a new facility built on Sheffield School grounds to replace the aging community pool. If this is not possible, then we need to keep the community pool open.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1380.6
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	To whom it may concern, I ama writing to express my wholehearted support for the retention of a pool facility in Sheffield to highlight the invaluable benefits that rural facilities like this bring to our community. Sheffield Pool serves as a vital bug for our community, providing a space for families , friends, and individuals to engage in recreational activities, fostering a send of camaraderie and unity. Its presence will contribute significantly to the overall wellbeing of our residents, both physically and socially. On rural areas, access to recreational facilities is often limited, making Sheffield Pool an essential asset. It not only promotes a healthy exercise lifestyle by offering a place for exercise and relaxation but also acts as a catalyst for community integration. In rural settings, these facilities play a crucial part in reducing isolation and ensure that residents have a place to connect and build relationships. Furthermore, Sheffield Pool serves as an educational resource, offering swimming lessons and water safety programmes that are particularly beneficial for families in rural areas where natural bodies of water are a particular hazard. With the retention of a swimming facility in our community , the Sheffield School Board of Trustees demonstrates a commitment to the weel-rounded development and safety of our community members, especially our children. I urge you to support the Sheffield Boatrd of Trustees in retaining a pool facility in the area, recognizing its role in enhancing the quality of life for residents and contributing to the unique fabric of our rural community. your support for this facility will undoubtedly have far-reaching positive effects for generations to come.

	Thank you for your time consideration, and dedication to the betterment of our community. I Angela l. Wright support the retention of a swimming facility for the wider Sheffield community, I support, The build of a new facility on the Sheffield Contributing School Grounds
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Comments:	I have a passion for enhancing facilities in Arthur's Pass and have attached a supporting document.
Staff Recommendation	The submission is acknowledged.
Point Number	1381.10
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	2024 SDC LTP submission. This document is to go alongside the submission from Peter Neale The following are some additional items I'd like to make a submission on. They are all in relation to the 2024 CAPEX file. . Transport; I would like to see specific funding allocated to upgrade the lighting in Arthur's Pass village ASAP to enable the Village to be classified as a dark sky area. As this will involve discussions with Kiwirail, we really need SDC on board to lead those discussions. I note that Castle Hill has some allocated funding for this in the 24/25 budget. It may prove to be more cost efficient if Arthur's Pass has some work done at the same time. I note that $1.2m is allocated for district wide dark sky in 2039/40. Please pull some of this allocation

	forward to allow this to happen in the prime Arthur's Pass area in the 24/25 or 25/26 financial year.
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and would like to see Arthur's Pass progress towards Dark sky accreditation. Dark sky considerations will be part of the development of Action Plans associated with the Economic Development strategy. Council will consider their feedback.
Point Number	1381.11

Comments:	2024 SDC LTP submission. This document is to go alongside the submission from Peter Neale The following are some additional items I'd like to make a submission on. They are all in relation to the 2024 CAPEX file. Transport; I fully support the construction of a cycle trail to join the two extremes of the Selwyn District. We only need to look at how popular cycle trails are becoming around Aotearoa. This would bring in more tourism and enable new businesses to become established along the proposed route, which traverses from the highest point of the Selwyn District, Tarahaka/Arthur's Pass to the lowest point, Waihora/Ellesmere.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1381.13
Category	Activity > Providing safe drinking water
Comments:	2024 SDC LTP submission. This document is to go alongside the submission from Peter Neale The following are some additional items I'd like to make a submission on. They are all in relation to the 2024 CAPEX file. Water supply; The Arthur's Pass water supply has recently had work carried out. Multiple tanks are in place to give a large amount of storage capacity in times of turbidity of the water at the intake. We have been told multiple times that this tank farm is a temporary

	solution only. I see there is funding allocated over the next 4-5 years which should provide Arthur's Pass with the promised permanent solution. A permanent solution using a membrane filter alongside the UV treatment and chlorine will take away the need for the bulk of the tank farm currently in place. Please ensure this funding remains allocated in the SDC LTP.
Staff Recommendation	The submitters support for water treatment upgrades in Arthurs Pass is acknowledged. As part of the Long Term Plan the final stage of upgrades to the treatment plant have been budgeted for in 2026 to 2029 and will investigate treatment efficiency. Pending the outcome these works may include treatment and storage upgrades. Staff recommendation is to budget for these works as planned in the LTP.
Point Number	1381.14
Category	Activity > Other Categories identified by Staff > Speed Management
Comments:	2024 SDC LTP submission. This document is to go alongside the submission from Peter Neale The following are some additional items I'd like to make a submission on. They are all in relation to the 2024 CAPEX file Other things not clearly in any specific categories; Please continue with the push to reduce speed limits to 20kph or 30kph on Council roads in Arthur's Pass Village. The majority of Council maintained side roads in Arthur's Pass are unsealed and not suitable for the current 50kph speed limit. I would also like to see SDC support any request to Waka Kotahi to have the speed limit reduced to 30kph on SH73 through the centre of the Village.
Staff Recommendation	Submission is acknowledged by Council. Council has been supportive of and lobbied for lower speed limits through the Arthurs Pass village, however the SH is NZTA responsibility, also the central government is yet to disclose its intentions around setting of speed limits. Council is now dependent on central government to outline how speed limits are to be managed and update our full speed management plan accordingly.
Point Number	1381.15
Category	Activity > Other Categories identified by Staff > Community funding /grants

Comments:	Please continue to allocate funding for volunteer Conservation groups, in particular through the SNEF fund. This is an important part of Council's role to protect native flora and fauna.
Staff Recommendation	The support for the continued use of the SNEF (Selwyn Natural Environment Fund) for community-led environmental projects is noted.
Point Number	1381.16
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	I acknowledge that SDC already allocates funds for Arts and heritage projects and events throughout the wider SDC area. I strongly urge this funding to continue in future years. I would also like to see SDC offer support in getting the Te Papa Atawhai/DOC Park HQ (former Visitor Centre) up and running again.
Staff Recommendation	The Community Funding Programme that supports a wide range of community projects and activities (including arts, heritage and conservation) is included in Long Term Plan budgets. The Selwyn Strategic Heritage Plan 2023-27 includes an action to engage with DOC about their plans for the visitor facilities at Arthus Pass and this will be factored into planning.
Point Number	1381.17
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	Maintenance and upkeep of SDC owned gardens in Arthur's Pass are often kept maintained and tidy by local volunteers. I would like our repeated request for garden maintenance to be carried out on a more regular basis to be implemented.
Staff Recommendation	Submission is acknowledged by Council. Staff have been working through a process to pick up gardens that have been maintained outside of the reserve maintenance contract and absorb these into the contract. This includes the gardens at Arthus Pass and budgets have been developed to accommodate this minor additional cost.
Point Number	1381.18

Category	Activity > Walking and cycling improvements
Comments:	In times of heavy snow fall, the local footpaths and side roads can become impassable and dangerous. The Waka Kotahi contractors clear SH73. On occasion, if time permits, they also clear the side roads at no cost to SDC. I would like to see a better system in place that gets local roads and footpaths cleared in a quicker time frame. Potentially a phone call to a local resident could be made after any significant snow fall event to ascertain what is needed.
Staff Recommendation	Submission is acknowledged by Council. Snow clearing by council's roading contractor is done on a priority basis.
Point Number	1381.21
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	2024 SDC LTP submission. This document is to go alongside the submission from Peter Neale The following are some additional items I'd like to make a submission on. They are all in relation to the 2024 CAPEX file. Stormwater; There is $553,000 allocated in 2025-2027 for underpass flooding. I suspect this is for the subway tunnel leading to the train station. This is often a problem, even more so when it freezes, which causes health and safety issues for passengers on the TranzAlpine train. Before this amount of ratepayer's money is spent, I would like SDC to look into whether it is an SDC responsibility or a Kiwirail responsibility.
Staff Recommendation	The submitters request for Council to seek alternative funding mechanisms for stormwater capital upgrades to reduce flood risk to the underpass in Arthurs Pass are acknowledged. Staff recommendation is to further investigate and design these improvements in year 2 of the LTP as planned.
Point Number	1381.24
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	I would also like to see the continued push for a do not feed the kea bylaw, which will assist with protecting this precious taonga species.
Staff Recommendation	Submission is acknowledged by Council.

Point Number	1381.25
Category	Activity > Other Categories identified by Staff > Emergency management
Comments:	The SDC Civil Defence staff are setting the standard for all of Aotearoa, in terms of their preparedness and knowledge. With the odds of the alpine fault rupturing in the near future getting higher, it is crucial that funding is increased to this sector so all of the Selwyn district will cope in the event of AF8 happening.
Staff Recommendation	*The submission is acknowledged. Council appreciates the support.*
Point Number	1381.26
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	For several years requests to get the open drain along Brake Hill in Arthur's Pass Village, covered and piped have come to nothing. I would like to see this issue resolved in the 2024/25 financial year.
Staff Recommendation	Submission is acknowledged by Council. Piping would be very expensive because of the topography. And considering the amount of water coming down the drain, piping may not be our best option. Council staff will review option. No additional work is budgeted at this time.
Point Number	1381.27
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	2024 SDC LTP submission. This document is to go alongside the submission from Peter Neale The following are some additional items I'd like to make a submission on. They are all in relation to the 2024 CAPEX file. Halls and Community Centres; An upgrade of the heating in the Arthur's Pass Community Centre has funding allocated for 2030/31. This needs to be bought forward to the next financial year, 2024/25. In an alpine environment, suitable heating is very important, not just for those using the Community Centre, but also for the good of the building. Should the Alpine fault go with a bang as predicted, a non electric form of heating and cooking will be essential for the local Community Response team to care for stranded locals and travellers. I acknowledge that SDC have assisted with various improvements in the last 5 or 6 years. In the 20 or so years prior to

	that, upgrades and general maintenance of the building was generally carried out by local volunteers at no cost to the SDC. This building was at one time owned by the local Community, but was gifted to SDC ownership in the 1990's (?). Up until last year, the local Community also picked up the power bill at the facility, another saving to SDC. The current fireplace was second hand when it was installed in the 1990's, so doesn't meet any clean air regulations. When SDC consider funding for the Arthur's Pass CC, they should keep in mind, that a lot of improvements have come at no expense to SDC. Please make this new fireplace install an absolute priority for the 2024/25 financial year.
Staff Recommendation	Staff do not support the submission. A significant amount of work has been carried out by Council in recent years in upgrading the building including installation of heat pumps, insulation and new flue for the log burner. A new heating appliance was considered but as this would trigger a Building Consent substantial budgets would be required to carry out compliance works (disabled access toilets, alarm system, accessibility improvements) it did not proceed. The reasons for not proceeding were communicated to the Arthurs Pass Community Association. Staff are of the view that the significant cost of this work is not warranted at this point but have allowed for heating replacement and associated works from 2029-30 (when the existing fire appliance is expected to be at end of life). Staff recommend that the submission to have a new solid fuel heating appliance installed at Arthurs Pass Community Centre is declined but the condition and performance of the existing solid fuel heater is monitored over the next few years.

Submitter Number:	1382	**Submitter:**	Gabrielle O'Brien
Point Number	1382.2		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	1. My first question would be WHY is SDC so determined to close down an entire community. The land belongs to the Crown, and I understand, is only administered by SDC. At any point in time, has the Crown given any indication of wanting to dispose of the land?		

Does the Crown have a hidden agenda? What possible purpose would it serve the Crown to close an entire community?

The Huts have been occupied since the 1890's, mainly for fishing. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act., and as such, should be protected.

2. The reason given by SDC, and now bandied about in the press coverage is all about Climate change, in particular rising sea levels and the danger of flooding. If you were to research this supposition, you would see that Leeston and other surrounding areas would be flooded long before Upper Selwyn Huts. I would pose the question here, Are you threatening to evict these communities as well? In addition to this, if you have been so worried about rising sea-levels, why as a council, do you continue to grant building consents to these areas?

3. The stumbling block in all this seems to be the issue of water and sewerage. It is understood that

we will soon be on the same sewer system as Leeston who pay District Wide Rates. We were told that a requirement for being put on the DWR was to pay for our sewer ourselves and a subsequent upgrade, which we did. Why then are we being discriminated against as we already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage? Why have we not been added to the DWR for Sewer and Water?

Quoting 'Towards25 Long Term Planning Document '

"The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that "Selwyn should be seen as one integrated district", rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, "the cost to residents

should also be consistent". In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities."

This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table.

From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston. The council took charge of the reticulation system in 1989, I believe , and to my knowledge have done NO maintenance. It is high time that we were moved onto the District wide water/sewerage system and put an end to these arguments

4. Another question is why was consent given to build new properties, and to improve older existing properties, if the council had these current plans in mind? When we applied for consent to build 68 Anderson Ave, (Building Consent 060741) our architect and we were told at the time, that we were 'a test case', setting a standard for all future builds. We had to commission engineers and specialists to take into account sea levels, wind speeds, snow bearing loads of the roof etc. We complied with everything and were granted our CCC . What has changed in the meantime?

5. My final point is that post-quake, saw the move of people from Christchurch whose home had been destroyed, using their insurance payouts to fund the upgrades to their Hut, with a view to living out theirs lives in comfort. Not only are you wanting to evict people, but insulting them by telling them to destroy their homes at their own cost. With no compensation, how on Earth do you think that they are going to be able to even rent a place to live, or are you proposing to build homes to rehouse an entire community? As elected Councillors, you have a duty to represent your electorate. Showing your absolute lack of compassion in this case, I would put forward that you are not fit to govern.

	Yours sincerely Gabrielle O Brien
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1383.8

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	fix the pool to the state it was BEFORE selwyn district council took it from the community and let it fall into disrepair. then give it back fixed to the community rhat previously owned and maintained it before council ran it into the ground. we need more community pools given the darfield pool isnt fit for purpose, is rarely open for business hours and our kids need to learn to swim without druving half an hour. What pool do north of Sheffield to arthurs pass does selwyn have to utalise? your taking away what we have already paid for!
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	1383.9
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	i have spoken to numerous employees of SDC who all say the same thing, who needs a coffee once a month to welcome new business for 9 million dollars? many of us run a successful business in selwyn with no aid, only hinderance from SDC. This is a huge waste of money and could be better spent elsewhere, like on the cycleway nobody asked for or even approved from West melton to Rolleston
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and holds a view that Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April

	2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	1383.10
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	given it takes selwyn 2 months to send a link on a OIA request that doesnt answer the questions. I honestly have NO faith in your ability of implementing “digital solutions” given you cant seem to send a email in DOUBLE the alloted timeframe.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1383.11
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	I do NOT support changes to current policies, given the council is unable to manage current finances and cant show transparency on where, when and what the money is being spent on.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1383.12
Category	Activity > Other Categories identified by Staff > Rates
Comments:	the rates postponement policy reads like un affodibilty of rates for our retired community. They made selwyn what it is today a reverse mortgage isnt ethical for a council to place on our residents homes for the councils constant failure to spend within their means. The borrowing of SDC is the issue, not the ability of our elderly to pay

	30% forcasted rate increases over the next two years. Youve let our most vulnerable down and now you want to punsih the kin for it. get better soon Selwyn this screams Maxism
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1383.13
Category	Activity > Other Categories identified by Staff > Other Matters
Comments:	i have lost trust in our mayor and beluve his appointment to the LGNZ is a complete conflict of i trest. given two high up financial controllers of selwyn have recently resigned, it would be safe to say that something is a miss.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1383.14
Category	Activity > Other Categories identified by Staff > Other Matters
Comments:	the community board in malvern keeps the residents informed. The council doesnt. The effort it has taken to get this far on this submission is embarrassing. This isnt democratic i dont know of many who could undertake this process without huge difficulty.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1383.15
Category	Activity > Walking and cycling improvements
Comments:	for two decades residents of selwyn have complained about the width of hoskyns road, your solution? Make a cycleway off the road, and lay tarseal on dirt the length of the road. Who ever at chord/sdc considered this as a viable long term solution should be fired without delay. Millions over the last decade has been spent on the same potholes and eroding road edges to have grass grown through it. your cycleways are laid on compostable grass, little compaction and even your own guidelines are being ignored.

Staff Recommendation	Submission is acknowledged by Council. The West Melton to Rolleston Cycleway was included in the 23/24 annual plan and delivered accordingly. For any construction quality problem, contractor is held responsible for making amends without additional cost to council.
Point Number	1383.16
Category	Activity > Other Categories identified by Staff > Debt Levels
Comments:	spending has gotten out of control, the forecast of rates rises reducing doesnt align with the borrowing outlaid in “this way” long term plan, so one of the two is published deceptively. The debt ceiling will need to be raised significantly to even stay aflot due to miss management, poor accounting and IMO fraud through the LGFA and its stipulations (which sdc wont be transparent about though OIAs) 1) its not your money 2) Sams legacy projects and feel good movement needs to stop 3) taking peoples homes for your failings is disgusting.
Staff Recommendation	That the submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	About the proposal to close the Sheffield Memorial Swimming Pool: The Memorial Pool was built with local fundraising for the community to learn to swim and for recreation, and as a monument to the sacrifices made so that continuing generations will benefit from its use. The suggested closing of the pool would be a very backward step for our community. Council spending on wonderful large facilities is necessary and great for densely populated areas. But distant outlying towns also need local, and if possible, readily accessible facilities, not only for recreation but for teaching and learning swimming skills. And just as importantly, for practising those skills. Their future water safety depends on their ability and confidence in the water. For children to need to travel to Darfield or Rolleston from Springfield and Sheffield will either use a lot of school's teaching time and resources or will be left to those parents willing, and able, to drive after school. Swimming should be taught to all children as part of their education, and can only be learned through good instruction combined with plenty of practice. For this to be left for an occasional trip to Darfield or Rolleston wont replace daily swimming lessons in the summer. My six grandchildren have all learned to swim well - at Springfield School pool and at Sheffield pool. All children should have and continue to have this opportunity as an important part of their education and physical development. The suggested closing of the Sheffield pool would a mistake. Rather than demolishing it to build a new one elsewhere the cost of demolition needs to be put to repair and upgrading what is already in place. Caroline Hawkins 10 Queen Street Springfield
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Submitter Number:	1385	**Submitter:**	Mark Christensen for Project Oversight Group - Pest Free Banks Peninsula and Towards Pest Free Waitaha
Organisation:	Project Oversight Group - Pest Free Banks Peninsula and Towards Pest Free Waitaha		

Point Number	1385.2
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	Submission from the Project Oversight Group of Pest Free Banks Peninsula and Towards Pest Free Waitaha to Selwyn District Draft Long Term Plan 2024/2034) Elected Representatives Selwyn District Council From: Mark Christensen Chairperson Project Oversight Group of Pest Free Banks Peninsula and Towards Pest Free Waitaha Kia ora koutou Re: Draft Long-Term Plan 2024/34 Submission The Project Oversight Group (POG) of Pest Free Banks Peninsula / Te Pākata o Rākaihautū (PFBP) and Towards Pest Free Waitaha (TPFW) comprises appointees of: • Environment Canterbury • Christchurch City Council • Selwyn District Council • Banks Peninsula Conservation Trust • Department of Conservation • Ngā Rūnanga of Banks Peninsula / Te Pākata o Rākaihautū • Te Rūnanga o Ngāi Tahu Pest Free Banks Peninsula The POG supports the submission of the Project Management Group (PMG) for Pest Free Banks Peninsula, and seeks that the Council's LTP provide for • The continuation of an annual contribution of $50k per annum (inflation adjusted) to support the Pest Free Banks Peninsula elimination programme. • Enough budget for biosecurity work to ensure biodiversity values and gains on Council owned land on Banks Peninsula are supported by ensuring capital and operational budgets are adequate for the task. Towards Pest Free Waitaha • Continuation of the salary of the Community Activator from 1 March 2025 to support the community groups within Selwyn when the Predator Free Trust money ends, and funding for at least a second similar position from 1 July 2025. • $30k for the provision of strategic planning and operational advice to the POG from 1 July 2024. • Professional communications advice to the POG from 1 July 2024, including how best to engage with/enthuse residents who are not already involved in pest control. • Professional pest control advice from 1 July 2024 on planning for the upscaling of a partly central government funded elimination project across Selwyn District, building on and linking with PFBP. • Professional ecological advice in the 2024/2025 financial year on ecological regeneration priorities within the district as part of the Towards Pest Free Waitaha area (similar to the Banks Peninsula Ecological Vision), as a precursor to more formal community and landowner engagement on ecological regeneration priorities beginning in the 2025/26 financial year. • Standardised biodiversity outcome monitoring and GIS system, integrated with the PFBP system. The Project Oversight Group's role The POG's role is to provide governance level oversight of both: • the Pest Free Banks Peninsula / Te Pākata o Rākaihautū (PFBP) Partnership; and • groups undertaking pest control more widely across Christchurch City, Selwyn District, and Waimakariri District as part of the Towards Pest Free Waitaha (TPFW) Partnership Pest

Free Banks Peninsula / Te Pākata o Rākaihautū The POG reiterates the comments, concerns and requests of the PFBP Project Management Group (PMG) in their submission by the Chair of the PMG, Dr David Miller, dated 1 May 2024. Towards Pest Free Waitaha The POG recognises that there is much enthusiasm for pest control in the community across the Selwyn District. However, that community effort has to date overall been uncoordinated and has varying levels of expertise and resource. The POG has secured funding from the New Zealand Predator Free Trust for 1 year for a Community Activator who is working closely with PFBP, the agencies including the Council, and now with many individual community groups. This is part of the work which POG has been leading on the initial planning for the Towards Pest Free Waitaha initiative. This initiative is intended to connect the community-based pest suppression activities which are part of the Pest Free Banks Peninsula/Te Pātaka o Rākaihautū vision, and to build on that experience and expertise by connecting its community-based pest suppression initiatives with others across the rest of Christchurch City and within the Selwyn and Waimakariri Districts. Supporting these groups across the city will enable a strategic approach to pest suppression, similar to what is happening in Wellington, Dunedin and other cities. Early and continued engagement with landowners/communities is critical. We consider that the community led, agency supported approach (adopted by PFBP) is fundamental to the establishment and ongoing success of Towards Pest Free Waitaha. POG recommends that this model be used for TPFW. The overall vision is to work towards implementing what would be one of New Zealand's largest landscape-scale pest suppression and elimination projects, linking Banks Peninsula with the Alps, between the Rakaia and Ashley/Rakahura Rivers. While the POG sees the extension of the proposed Environment Canterbury targeted rate for biodiversity across the urban part of Christchurch as a critical step in bringing this initiative to life, the targeted rate, by itself, will not be enough. Specifically, priorities for additional funding which the POG considers is necessary to (in order of priority) are: • Continuation of the salary of the Community Activator from 1 March 2025 to support the community groups when the Trust money ends, and funding for at least a second similar position from 1 July 2025. • The provision of strategic planning and operational advice to the POG from 1 July 2024 to support the development pf Pest Free Selwyn as part of Towards Pest Free Waitaha. • Professional communications advice to the POG from 1 July 2024, including how best to engage with/enthuse Selwyn residents who are not already involved in pest control. • Professional pest control advice from 1 July 2024 on planning for the upscaling of a partly central government funded elimination project across the Selwyn District, building on and linking with PFBP as part of Towards Pest Free Waitaha. • Professional ecological advice in the 2024/2025 financial year on ecological regeneration priorities within the Selwyn District as part of the Towards Pest Free Waitaha area (similar to the Banks Peninsula

	Ecological Vision), as a precursor to more formal community and landowner engagement on ecological regeneration priorities beginning in the 2025/26 financial year. • Standardised biodiversity outcome monitoring and GIS system, integrated with the PFBP system. The Project Oversight Group of Pest Free Banks Peninsula and Towards Pest Free Waitaha requests to be heard in support of this submission and that we present a combined submission with Dr David Miller of the PFBP Project Management Group. Mark Christensen Chair PFBP and TPFW Project Oversight Group
Staff Recommendation	Council recognises the significant efforts of the Pest Free Banks Peninsula project to control pest predators across the peninsula, along Kaitorete, and around Ngati Moki and Muriwai. The project is an excellent example of what can be achieved across a wide geographical area by a committed group of stakeholders. Council also acknowledges the significant efforts made by our community and the neighbouring districts in the Aotearoa Pest Free 2050 project. It is vital that Council has suitable funding and capacity available to support such initiatives, including the proposed Predator Free Selwyn project as part of Pest Free Waitaha Canterbury. It is an important that Council shows support for our community in this meaningful initiative, and that projects are well planned and coordinated to get optimal outcomes.

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP
Point Number	1386.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan, but with additional sports courts and/or bigger community meeting spaces. **Project cost:** Year 1: 19.24m

	Estimated impact on rates (per year): $53.14 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do nothing. Use the existing park facilities and remove or replace old and unsafe items in the park. **Project cost:** Year 1: $143,000 **Estimated impact on rates:** Included in our current rates **Funding:** Rates: 100% **Comment:**

Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1
Point Number	1386.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes one indoor court. **Project cost:** Year 3: $7.07 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $5.97 million) **Estimated impact on rates (per year):** $11.67 **Funding:** Rates: 57% Development contributions: 43% * Our budgeted option **Comment:** 1. Health and Wellness: Such a facility provides opportunities for residents to engage in physical activity, promoting overall health and well-being. Regular exercise can reduce the risk of various health conditions like obesity, heart disease, and diabetes. 2. Social Interaction: It serves as a hub for social interaction, fostering a sense of community and belonging. People from diverse backgrounds come together, forming friendships and support networks. 3. Youth Development: A recreation center offers programs and activities tailored for youth, providing constructive outlets for their energy and fostering personal development. It can help keep them away from negative influences and instill valuable life skills like teamwork and leadership.

4. Economic Impact: Such facilities can boost the local economy by attracting visitors from neighboring areas for tournaments, events, or classes. Additionally, the presence of a recreational center can enhance property values and attract businesses to the area.
5. Community Cohesion: By providing a common space for residents to gather and participate in various activities, a recreation center strengthens the fabric of the community. It encourages inclusivity and a sense of unity among residents.
6. Quality of Life: Access to recreational facilities improves the overall quality of life for community members. It offers them opportunities for leisure and relaxation, reducing stress and enhancing mental well-being.
7. Skill Development: Whether it's through sports leagues, fitness classes, or educational workshops, a recreation center facilitates skill development and lifelong learning for people of all ages.
8. Crime Prevention: Engaging residents, particularly youth, in positive recreational activities can help reduce delinquency and crime rates by providing them with constructive outlets for their time and energy.
9. Inclusivity and Accessibility: A well-designed facility considers the needs of all community members, including those with disabilities, ensuring that everyone can participate in activities and enjoy the benefits it offers.

Overall, a community recreation and sports facility in Malvern could play a vital role in enhancing the overall quality of life, fostering community spirit, and promoting physical and mental well-being in a small community.

Staff Recommendation

It is acknowledged that the submitter has selected Option 2, build the community recreation and sports facility at Darfield that includes one indoor court.

Point Number	1386.8
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Closing down a community pool can have several negative impacts: 1. Loss of Recreation and Exercise Opportunities: Community pools often serve as a primary source of recreation and exercise for individuals of all ages. Closing down the pool deprives the community of a valuable resource for physical activity, which can lead to a decline in overall health and well-being. 2. Social Isolation: Community pools are hubs for social interaction and community building. Closing the pool can lead to a loss of social connections within the community, particularly among children, seniors, and those who rely on the pool for socializing. 3. Impact on Mental Health: Swimming and other water-based activities are known to have therapeutic effects on mental health. Closing the pool can result in increased stress, anxiety, and depression among community members who no longer have access to these activities. 4. Economic Disruption: Community pools often contribute to the local economy by attracting visitors, hosting events, and providing employment opportunities. Closing the pool can have ripple effects on businesses and individuals who rely on the pool for income. 5. Loss of Skill Development: For many children, community pools serve as a place to learn swimming and water safety skills. Closing the pool can hinder the development of these essential life skills, potentially increasing the risk of drowning incidents. 6. Impact on Property Values: Access to recreational facilities like community pools can enhance property values in the surrounding area. Closing the pool may diminish the attractiveness of the neighborhood, leading to a decrease in property values for homeowners.

	7. Loss of Community Identity: Community pools often serve as symbols of community pride and identity. Closing down the pool can erode this sense of identity and cohesion within the neighborhood, leading to a loss of community spirit. Overall, the closure of a community pool can have far-reaching negative consequences for the physical, social, economic, and environmental well-being of the community.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Comments:	Ellesmere Lions Club, supported by Ellesmere Sustainable Agriculture Inc and Harts Creek Streamcare Group 2 MAY 2024 The following submission provides an overview of a proposed project in the Ellesmere area of Selwyn, for consideration by the Selwyn District Council, in relation to the Draft Long Term Plan (LTP) – Selwyn District Council 2024 - 2034. This submission encourages and requests the Selwyn District Council to support this project in the future through funding allocation, grants, and in-kind support. 1. SUBMITTERS Ellesmere Lions Club, Ellesmere Sustainable Agriculture Inc, Harts Creek Streamcare Group. 2. CONTACT DETAILS for SUBMITTERS Working Group Chair, President of Ellesmere Lions Club, c/o Murray Doak, Secretary of Ellesmere Lions Club, PO Box 57 Leeston, sec.ellesmerelc@lionsclubs.org.nz, 03 XXXXXXX, XXXXXXXXXX. 3. THE PROJECT Waitatari Harts Creek Bird Hide and Boardwalk rejuvenation project. We are seeking the following be included in the Selwyn District Long Term Plan. Allowance of up to $300k capital contribution for project management, design, procurement, and construction costs of a new birdhide and boardwalk, available from 2024-25. This is a new project that is not currently budgeted for within the current or draft Long Term Plan. 4. HISTORY Waitatari Harts Creek is a renowned New Zealand fishing and treasured ecological stream that flows into Te Waihora Lake Ellesmere. In the early 1990’s the Ellesmere Lions Club and local anglers built a bird hide and boardwalk, linking a walking track along Harts Creek to the margin of the lake within the Harts Creek Wildlife Management Reserve. The elevated bird hide allowed for bird watching in this internationally recognised site. The gentle, family-friendly walking track and structures have been maintained by a dedicated team of volunteers ever since. The walk crosses private farmland and enters the DoC estate.

In 2023 the structures were deemed not fit for purpose. The bird hide was dismantled, and the boardwalk is currently on an 18-month reprieve from removal. While the walkway along Harts Creek remains open, there is no visual connection to the Lake without the elevated viewing platform. A working group of interested parties convened to investigate the rejuvenation of this well-loved walkway in the south-eastern corner of Selwyn.

5. THE WORKING GROUP

The Ellesmere Lions Club is currently facilitating the initial stages of this project given its previous interest in maintaining the walkway and funding the previous bird hide.

The working group investigating and charged with progressing this project includes representatives from: Ellesmere Lions Club; Ellesmere Sustainable Agriculture Inc; Harts Creek Streamcare Group, landowners, videographer. Representatives from the following organisations are supporting the working group: Auldwood Birds; Department of Conservation; Environment Canterbury; Selwyn District Council; Selwyn Waihora Zone Committee. There are several other interested parties being apprised of the project.

6. PROJECT PROPOSAL

The first working group meeting was held in November 2023. Permanent public access over private farmland is being facilitated by Ellesmere Lions through Herenga a Nuku Aotearoa Outdoor Access Commission, to be followed by improvements to the track and fencing.

Next steps for the working group include investigating design specifications for a new hide and boardwalk, negotiating responsibility for maintenance going forward, environmental work (weed removal, bank protection, riparian planting), a working budget, identifying funding sources. Initial estimates on costs for the structures alone are in the vicinity of $200K. The working group believes the project is beyond the scope of any of the volunteer organisations involved. The employment of a part-time fixed term project manager will ensure momentum in rejuvenating this much-loved recreational gem in Selwyn.

7. MATTERS FOR COMMUNITY GUIDANCE – IMPROVING WELL BEING

7.1 SOCIAL

The Harts Creek Bird Hide walk is a valuable recreational space for Selwyn. It provides a family-friendly walk, fishing, bird watching, picnicking, exercise, and a physical connection to Te Waihora Lake Ellesmere. It features on the Selwyn website and the DOC

Canterbury walks. Its existence supports Selwyn's outdoor character and environment, identified as key issues in feedback to SDC. It is near Leeston and Southbridge, and only a 25-minute drive from Rolleston. The drive to Harts Creek takes the urban dwellers of Selwyn through the productive agricultural area of Ellesmere, supporting the urban-rural connection.

7.2 ECONOMIC
As an internationally recognised site of ornithological significance, the Harts Creek Bird Hide walk brings national and international visitors to Selwyn, with all the accompanying economic benefits of tourism. A better sited, fit for purpose structure will enhance this experience.

The proposed new cycle trail around Te Waihora Lake Ellesmere will be enhanced by having a 'destination' attraction in the southern corner of the lake. This fits the rural walking and cycling improvements objectives of SDC.

Locally, a trip to the walk will invariably be concluded with an ice cream or coffee stop, supporting Leeston and Southbridge businesses. SDC have economic development as a goal in the LTP. Visitors to Ellesmere will be able to view the Ellesmere Lions Club history board and eel feature, Lakeside Domain, Ngati Moki Marae and Hone Wetere Church, Lakeside Soldiers Memorial Hall, and hopefully, in the future, the Selwyn Heritage Centre.

5.3 ENVIRONMENTAL
As part of the rejuvenation project, weed control, stream bank protection and riparian planting are proposed. This will build on the efforts of the Harts Creek Streamcare group and landowners' work further upstream.

Te Waihora Lake Ellesmere is a significant geological feature of the Selwyn district, one that does not always receive positive recognition. Building familiarity and connection with Te Waihora Lake Ellesmere and promoting its unique attributes as a bird and fish haven, will foster kaitiakitanga in the community.

5.4 CULTURAL
Te Waihora Lake Ellesmere, the 'food basket' of the local rununga, has cultural and historical significance to Selwyn. Interaction with this natural environment will foster understanding and kaitiakitanga. The walkway will lend itself to being an educational opportunity – information boards, school visits.

8. KEEPING OUR COMMUNITY INFORMED – RURAL WALKING & CYCLING IMPROVEMENTS

	A feasibility study on a proposed new cycle trail around Te Waihora Lake Ellesmere, connecting to the Little River Rail Trail, is currently being funded by SDC. The Waitatari Harts Creek Bird Hide walk will provide a 'destination' activity near the southern end of the proposed cycle trail. 9. CONCLUSION The Waitatari Harts Creek Bird Hide and Boardwalk rejuvenation project is the perfect example of placemaking in Selwyn. It has social, economic, and cultural benefits to the community. It links Selwyn inhabitants to their natural surroundings and is more than just a Sunday walk destination. The submitters encourage and request the Selwyn District Council to support this project in the future through funding allocation, grants, and in-kind support. Thank you
Staff Recommendation	Council recognizes the good work that has been done in recent decades by the Ellesmere Lions Club and the local community in creating and managing the Harts Creek walkway, boardwalk and bird hide. This has created a very good and well used recreation asset for the community which has provided access to and allowed many people to enjoy the Te Waihora environs. Council staff are involved in helping to facilitate and lead the working group that has been formed to look at the improvement and redevelopment of the boardwalk and bird hide. The walkway and bird hide will provide a valuable spoke / diversion from the proposed Te Waihora trail that Council staff, consultants and the WET project manager are currently working on.

Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:**		

Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding
Point Number	1391.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan, but with additional sports courts and/or bigger community meeting spaces. **Project cost:** Year 1: 19.24m **Estimated impact on rates (per year):** $53.14 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31

Point Number	1391.7
Category	Activity > Providing safe drinking water
Comments:	I wish to submit on the Arthur's Pass water supply planned works. It is pleasing to see that there are substantial in the current LTP and I support the continuation of this programme. There are some parts of the approach that could be better. Currently there are substantial leaks in the reticulation system that affect the relaibility of the Water supply. Notably when there is a rain event, the turbidity of the Avalanche creek supply increases and trips off the water treatment plant. Due to the leaks in the reticulation system the current storage is depleted within hours of a plant shutdown. The approach to solving this issue should be 3 fold. 1) Better pre-treatment. Install a prefilter/settling tank/sand filter to prevent the turbidity increasing to the point where the plant shuts down. This could be repurposing some of the current storage tanks on the inlet side of the Treatment plant. 2) Reduce the demand. Adress the leaks in the reticulation system by replacing the sections that are of known condition, Very Poor/Poor/moderate in the next financial year. This would be approximately a total of 600 metres according to the SDC data. An audio analysis of the pipe routes would give an accurate location of current leaks. 3) Control of water storage following a Turbity or earthquake event. The system should be fitted with a slam shut valve on the Water Supply outlet after the storage tanks. It would need to be operated by a seismic sensor or the plant turbidity sensor. This will keep the storage intact (12 tanks??) until the event has passed and the reticulation system status is confirmed. If the event if AF8 or similar, then as the storage is alongside the Community Centre, which would probably be the Community Disaster point.
Staff Recommendation	The submitters support for water treatment upgrades in Arthurs Pass is acknowledged. During periods of high rainfall, the source water quality deteriorates significantly making treatment systems ineffective. Stored water is needed to continue to supply the village and meet mandatory Drinking Water Quality Assurance Rules. As part of the Long Term Plan the final stage of upgrades to the treatment plant have been budgeted for in 2026 to 2029 and will investigate treatment efficiency. Pending the outcome, these works may include treatment and storage upgrades. Staff recommendation is to budget for these works as planned in the LTP.

	Water meters have been installed on all connections in the township to help identify high demand/on property leakage. Network monitoring sites have been installed which monitor pressure (which will help identify leakage) and water quality. Renewal of parts of Council's pipe network have been completed over the last few years and further renewals are prioritised on a district wide basis.

Submitter Number:	1392	**Submitter:**	Details Withheld
Point Number	1392.2		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	hello, In regaurds to the Upper Selwyn Hutts (USH) 1. Historical value The Mayor says in the Long Term Plan that "we're focussed on looking after what we already have" - how about you look after us! 2. District wide rates for USH. The reasons being : (a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequant upgrade, the requirement we were told for being put on DWR. (b) We have already paid for the water upgrade. (c) We should not be discriminated against and should be treated like everyone else in the district.		

(d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We should also be added to the DWR for Sewer and Water like everyone else.
(e) Towards25 LTP Document stated:
"The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities."
This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table.
From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston.
(f) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community."
(g) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Sekwyn Huts Future Occupancy Strategy" report dated 04/03/2024.

(h) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners.

(i) Additionally we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this.

	• The Selwyn Huts should be listed as a history site on the District Plan. It pre-dates the 1900s so is an archaeological site under Heritage Pouhere Taonga Act • All homes and all people should be protected. It's inhumane and disgusting to evict the Selwyn Huts residents from their home. Review the 15 year finite term and let them stay. This also helps preserve our kiwi history!!! • It's unfair not to include Selwyn Huts on the District Wide Rate for water and sewer. Excluding a community in the district goes against the purpose of introducing the DWR in the first place. The legal opinion from Council's own lawyers have highlighted this. We should not be discriminated against and should be treated like everyone else in the district • Replace the reticulation system. Council have been in charge of this since 1989 and dropped the ball by not doing any maintenance and upgrades over the last 35 years. Don't use your incompetence as an excuse to make them pay or to kick them out Thank You Andrew Bowring
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Submitter Number:	1393	**Submitter:**	RICHARD SANDOM

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool		
Comments:	To whom it may concern, I am writing as the father and grandfather of Waddington residents, and as an ex Canterbury swimming champion and surf lifesaver. I believe it is absolutely critical that children have a benign body of water close to where they live to learn to swim, and to play on hot days. Relying on a crowded facility 10 minutes' drive away is not a viable alternative in this era of both parents working, and with the steadily rising cost of fuel. Also, we are being encouraged to cut down our C02 emissions, which does not tie in well with a 20 minute round trip. Children will simply not get the practice they need for swimming to be second nature. This is always important of course, but particularly so when there is a large river with strong currents close by, and other water hazards associated with farming such as open irrigation races I understand the Sheffield School makes good use of the pool with its Learn to Swim programme, which compliments the programme offered after hours at the pool. My grandson has been involved with both of these, and when I have been at the pool they seem well attended by the local children, and with a skilful staff teaching them I wholeheartedly support for the retention of a pool facility in Sheffield. My preference would be for the necessary upgrades to be carried out on the current pool either in Council ownership, or under a Community Entity. If an agreement can be reached, I would also support the building of a new facility on the Sheffield Contributing School grounds as an alternative. However, if this route is taken, the old pool should not be closed until the new pool is commissioned Yours faithfully Richard Sandom		

Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Submitter Number:	1394	**Submitter:**	Jane Elms for Prebbleton Community Association
Organisation:	Prebbleton Community Association		
Point Number	1394.2		
Category	Activity > Planning Further Community Facilities		
Comments:	From Prebbleton Community Association: 1) Prebbleton Public Hall In regard to pg 31 & pg 51, re a new community facility in Prebbleton: The Prebbleton Community Association remain disappointed, and somewhat frustrated, to see a Prebbleton Community Centre/Hub excluded from the 'big decisions' for SDC with no commitment of funding and no longer planned for 2025-2026 as per your Long-term plan 2021-2031. The SDC has been considering a Prebbleton Community Centre/Hub since 2008. • In 2010 the SDC identified that our growing community will be inadequate, and a replacement required. • In 2013 the Strategic Plan made a recommendation to have a more flexible hub facility to cope with population growth. • In 2016 5 'fast track projects' were identified to "future proof key community space", this included a Prebbleton Community Centre; worth noting is that the four other projects were completed. • In 2018 a community hub in Prebbleton was planned for 2019-21 at a cost of approximately $5.5M		

	• The Long-term plan 2021-2031 had an allocation of $6.3M to build a Prebbleton Community Centre in 2025-2026. At the heart of our needs is a multi-use common space which the Prebbleton Community can utilise as a social hub and retain our identity as a community as we expand in population and diversity. We need a flexible space where multiple events can occur at the same time, or one large community event can take place. We need to be able to provide a greater range of social, health and community services in our area but are currently restricted with a lack of suitable spaces. We also need a space to protect the records and resources under the care of the Prebbleton Heritage groups, as well as a space to remember our proud history in the district. While we appreciate there are fiscal constraints in this current environment, we are not willing to accept that a Prebbleton Community Centre/Hub is once again dropped off the SDC key priorities list being removed from the 2025-26 plan and request that this is reviewed and reinstated in the SDC short term plans.
Staff Recommendation	The submission is acknowledged. A new community centre for Prebbleton has been in considered in earlier Long-Term Plans and was previously signalled for construction in 2025/26. A needs assessment study was undertaken in 2023 which concluded that there was demand for a facility to service the community, and that it should provide a mix of social, community gathering and recreation spaces. The study further concluded that the facility needed to be located so it was easily accessed by the community. As there are uncertainties about the best site for the facility and the activities that it will cater for, further planning and community consultation is needed. To enable time for the necessary planning to happen, the project has been programmed for 2026/27 to 2027/28.
Point Number	1394.3
Category	Activity > Other Categories identified by Staff > Road Safety
Comments:	2) Road safety in Prebbleton With the increasing traffic utilising Prebbleton Roads as a throughfare we remain concerned regarding pedestrian safety, especially on Springs and Birchs Road.

	We have heard of a number of incidents and near misses at the pedestrian crossing nearest The Prebbleton Village, Springs Road and given the number of 'distractions' (vehicles turning, cars waiting to join the traffic at the street shopping area, signs) and high volume of traffic, we beleive that further work is required to raise drivers awareness of this pedestrian crossing, with appropriate technologies such as warning marked on road re upcoming crossing and/or flashing beacons and/or a raised crossing. Additionally, we believe that the above-mentioned pedestrian crossing and at the bus stop on Birchs Road (by Glenwood Drive) require further safety measures in the form of refuge points in the middle of the road where pedestrians can stop. This is because of both the increased traffic in these areas as well as the need for greater safety for our children, people with disabilities and elderly community members many of whom may not be able to cross a busy road quickly. The PCA has also previously advocated for something like the red road highlights (used at some stop signs) so motorist reduced speed at the entrances to Prebbleton on Springs Road and now request this also Birches Road, with the continuous housing developments in Lincoln.
Staff Recommendation	Submission is acknowledged by Council. Counci's introduction of speed reduction infrastructure like speed bumps etc. needs to consider central government's direction on what is to happen with speed limits. Communications from the minister is that there could be some speed limits that need to be raised. Council is aware of the concerns with the Springs Road crossing. Crossing upgrades are prioritised and upgraded accordingly.
Point Number	1394.5
Category	Activity > Other Categories identified by Staff > Crime/district safety
Comments:	3) Safety in Prebbleton The PCA have previously spoken with Councillor Lyall regarding the safety in Prebbleton as we experience an increase in petty crime, car thefts and break-ins. We believe Prebbleton would benefit from security cameras in key locations including main entrance and exits

	points of the township, and in the main shopping area; this would give the community an increased sense of security as well as help Police identify vehicle movement. If there is anything the PCA can do to help the SDC expedite any of these issues, please contact us. We will also be sending this feedback to our local councillors and requesting formal feedback on each item.
Staff Recommendation	Submission is acknowledged by Council. This matter has been raised with the Council before and at that stage was not progressed. The Council is in regular contact with the police and will raise the matter again.

Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment:** **Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1395.8
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	give the money to the community 200,00 that was going to be spend on closing and let them do what they choose to make it viable

Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	1395.9
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	not when it costs 9 million 100,000 should be more than efficient
Staff Recommendation	It is acknowledged the submitter has not selected an option as to whether the Economic Development Strategy should progress, however, holds a view that the proposed allocation should be reduced. The proposed allocation is a contribution from the Council towards activity that will stimulate and support the local economy. Councils' contribution to economic development is alongside others who are expected to contribute significantly more overall. Council is involved in and has access to important levers in Economic Development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. Every cent of spend will be scrutinised and planned for to ensure outcomes and returns are maximised from the spend. Action plans will outline this in detail.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1395.11
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	clean up the plastics
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. The Council is also developing an Emissions Plan and Sustainability Plan to identify actions into the future.
Point Number	1395.12
Category	Activity > Chlorination
Comments:	lessen the use of glysophate chlorine and other chemicals
Staff Recommendation	The submitters preference to for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.

Point Number	1395.13

Category	Activity > Chlorination
Comments:	The most important to us is clean chemical free water and repaired roads I was involved in bringing to attention that selwyn was about to chlorinate our beautiful water we had 800 signatures in a very short time a meeting was call at pur own cost i would like to see a public meeting called when we know what the water regulations are going to be explainations plans and options made clear to us called a meeting the out cry you have had since to take choline out is rediclous cost I understand because of the water regulators the idea of other chemicals added to water is a medically medicating a whole population affecting there health / well-being can you as a council guarantee and show from studies our babies will not be harmed

	I like the idea of a choline free water tap for locals to use as drinking water which will be beneficial in Lincoln will address some needs Cholrine is a nuro toxin up sets the gut micobium and a negative effects on lungs breathing in when showering and and absorbtion thru the skin Can you believe our water to be that heavily chlorined in chch that plunket nurses are not recommending mothers NOT to bath babies in tap water i will look forward to a future public meeting on WATER Keep spending to a minimum until we know the world is in a more stable position on all other projects. We do not want our rates borrowing absorbant loans from who knows where A reminder the country is in a Recession
Staff Recommendation	The submitters preference to for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.

Category	Activity > Other Categories identified by Staff > Other Water
Comments:	clean out our rivers and river mouths to prevent flooding
Staff Recommendation	The submitters comment is acknowledged. Council maintain the Land Drainage network for water conveyance. Environment Canterbury has recently completed a Long Term Plan consultation process with the Selwyn community about an additional targeted rate for district wide flood and river resilience work. Staff recommendation is to proceed with the surface water programmes as budgeted.

Submitter Number:	1396	**Submitter:**	June Keeler
Point Number	1396.2		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	The Selwyn Huts should be listed as a historic site on the District Plan. It pre-dates the 1900s so it is an archaeological site under heritage pouhere taonga act. All homes and all people should be protected. It's inhumane and disgusting to evict the Selwyn Huts residents from their home. Review the 15 year finite term and let them stay. This also helps preserve our kiwi history!!! It is unfair not to include Selwyn Huts on the District Wide Rate. Excluding a community in the district seems to contradict the name "District Wide Rate" and goes against the purpose of introducing the DWR in the first place. Replace their reticulation system. Council have been in charge of this since 1989 - you dropped the ball by not doing any maintenance and upgrades over the last 35 years. Don't use your incompetence as an excuse to make these people pay or to kick them out.		
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.		

Submitter Number:	1397	**Submitter:**	Peter Neale

Point Number	1397.1
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** Get this project underway now, build it and the people will use it. If there's too much delay there may not be the same uptake from customers as there will hopefully be now.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding
Point Number	1397.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau

Comments:

Question: 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre.

Project cost:
Year 1: $16.01m

Estimated impact on rates (per year):
$44.22
Funding:
Rates: 80.5%
Development contributions: 19.5% *
2024/25
2025/26
2026/27
2027/28
2028/29
2029/30
2030/31
2031/32
2032/33
2033/34

Our
budgeted
option

	Comment: As the population increases in the Leeston region it is important to have a good fit for purpose Community facility in that area. However, I don't want to see this meaning smaller Community Centres around the District receive less funding and care as a result of this big spend.
Staff Recommendation	The submission is acknowledged.
Point Number	1397.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Carry out the landscape improvements to extend the playing fields; replace and upgrade the playground equipment, footpaths, toilet block, lighting and irrigation; and seal the carpark. **Project cost:** Years 1-10: $3.4m **Estimated impact on rates :** Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% * Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2

Point Number	1397.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes one indoor court. **Project cost:** Year 3: $7.07 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $5.97 million) **Estimated impact on rates (per year):** $11.67 **Funding:** Rates: 57% Development contributions: 43% * Our budgeted option **Comment:** This will be a useful asset for the area. With the placement being in Darfield, it is close enough for residents in surrounding towns to be able to make good use of it.
Staff Recommendation	It is acknowledged that the submitter has selected Option 2, build the community recreation and sports facility at Darfield that includes one indoor court.
Point Number	1397.5
Category	Questionnaire > Matters For Community Guidance
Comments:	

	Question: Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment:** **Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1397.8
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	The new Darfield facility will be close by, so Sheffield residents can utilise that. If local Sheffield residents want to take on the upkeep of the Sheffield pool, would gifting them the facility be an option?
Staff Recommendation	It is acknowledged that the submitter has selected to close the Sheffield Memorial Pool.
Point Number	1397.9
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	I see a lot of wasted time with SDC contractors. If contractors can develop a more stream lined process, it will in turn save on ratepayers money.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1397.10
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	I'm happy to leave this to the decision makers, but I can't see anything negative in these changes.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1397.13
Category	Activity > Walking and cycling improvements
Comments:	2024 SDC LTP submission. This document is to go alongside the submission from Peter Neale The following are some additional items I'd like to make a submission on. They are all in relation to the 2024 CAPEX file Transport; I fully support the construction of a cycle trail to join the two extremes of the Selwyn District. We only need to look at how popular cycle trails are becoming around Aotearoa. This would bring in more tourism and enable new businesses to become established along the proposed route, which traverses from the highest point of the Selwyn District, Tarahaka/Arthur's Pass to the lowest point, Waihora/Ellesmere
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1397.15
Category	Activity > Providing safe drinking water
Comments:	2024 SDC LTP submission. This document is to go alongside the submission from Peter Neale The following are some additional items I'd like to make a submission on. They are all in relation to the 2024 CAPEX file. Water supply; The Arthur's Pass water supply has recently had work carried out. Multiple tanks are in place to give a large amount of storage capacity in times of turbidity of the water at the intake. We have been told multiple times that this tank farm is a temporary solution only. I see there is funding allocated over the next 4-5 years which should provide Arthur's Pass with the promised permanent solution. A permanent solution using a membrane filter alongside the UV treatment and chlorine will take away the need for the bulk of the tank farm currently in place. Please ensure this funding remains allocated in the SDC LTP.

Staff Recommendation	The submitters support for water treatment upgrades in Arthurs Pass is acknowledged. During periods of high rainfall, the source water quality deteriorates significantly making treatment systems ineffective. Stored water is needed to continue to supply the village and meet mandatory Drinking Water Quality Assurance Rules. As part of the Long Term Plan the final stage of upgrades to the treatment plant have been budgeted for in 2026 to 2029 and will investigate treatment efficiency. Pending the outcome, these works may include treatment and storage upgrades. Staff recommendation is to budget for these works as planned in the LTP.
Point Number	1397.16
Category	Activity > Other Categories identified by Staff > Speed Management
Comments:	2024 SDC LTP submission. This document is to go alongside the submission from Peter Neale The following are some additional items I'd like to make a submission on. They are all in relation to the 2024 CAPEX file. Please continue with the push to reduce speed limits to 20kph or 30kph on Council roads in Arthur's Pass Village. The majority of Council maintained side roads in Arthur's Pass are unsealed and not suitable for the current 50kph speed limit. I would also like to see SDC support any request to Waka Kotahi to have the speed limit reduced to 30kph on SH73 through the centre of the Village.
Staff Recommendation	Submission is acknowledged by Council. Council has been supportive of and lobbied for lower speed limits through the Arthurs Pass village, however the SH is NZTA responsibility, also the central government is yet to disclose its intentions around setting of speed limits. Council is now dependent on central government to outline how speed limits are to be managed and update our full speed management plan accordingly.
Point Number	1397.17

Comments:	2024 SDC LTP submission. This document is to go alongside the submission from Peter Neale The following are some additional

	items I'd like to make a submission on. They are all in relation to the 2024 CAPEX file. Please continue to allocate funding for volunteer Conservation groups, in particular through the SNEF fund. This is an important part of Council's role to protect native flora and fauna.
Staff Recommendation	The support for the continued use of the SNEF (Selwyn Natural Environment Fund) for community-led environmental projects is noted.
Point Number	1397.18
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	2024 SDC LTP submission. This document is to go alongside the submission from Peter Neale The following are some additional items I'd like to make a submission on. They are all in relation to the 2024 CAPEX file. I acknowledge that SDC already allocates funds for Arts and heritage projects and events throughout the wider SDC area. I strongly urge this funding to continue in future years. I would also like to see SDC offer support in getting the Te Papa Atawhai/DOC Park HQ (former Visitor Centre) up and running again.
Staff Recommendation	The Community Funding Programme that supports a wide range of community projects and activities, including arts and heritage, is included in Long Term Plan budgets. The Selwyn Strategic Heritage Plan 2023-27 includes an action to engage with DOC about their plans for the visitor facilities at Arthus Pass and this will be factored into planning.
Point Number	1397.19
Category	Activity > Other Categories identified by Staff > Parks and Reserves

Comments:	2024 SDC LTP submission. This document is to go alongside the submission from Peter Neale The following are some additional items I'd like to make a submission on. They are all in relation to the 2024 CAPEX file. Maintenance and upkeep of SDC owned gardens in Arthur's Pass are often kept maintained and tidy by local volunteers. I would like our repeated request for garden maintenance to be carried out on a more regular basis to be implemented.
Staff Recommendation	The development contributions for all services have been reviewed and adjusted leading into the preparation of the draft LTP. This has included the introduction of a new development contribution for community infrastructure. Based on the programme of capital works, Council undertakes a thorough and robust process to calculate the development contribution amount that can be fairly and reasonably applied to the growth community for a project. The calculation is made in accordance with the Council's Development Contribution Policy and the legislation that underpins the policy as well as guidelines on administering the policy.
Point Number	1397.20
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	2024 SDC LTP submission. This document is to go alongside the submission from Peter Neale The following are some additional items I'd like to make a submission on. They are all in relation to the 2024 CAPEX file. In times of heavy snow fall, the local footpaths and side roads can become impassable and dangerous. The Waka Kotahi contractors clear SH73. On occasion, if time permits, they also clear the side roads at no cost to SDC. I would like to see a better system in place that gets local roads and footpaths cleared in a quicker time frame. Potentially a phone call to a local resident could be made after any significant snow fall event to ascertain what is needed.
Staff Recommendation	Submission is acknowledged by Council. Snow clearance is carried out on a priority needed basis.
Point Number	1397.23
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	I would also like to see the continued push for a do not feed the kea bylaw, which will assist with protecting this precious taonga species.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1397.24
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	2024 SDC LTP submission. This document is to go alongside the submission from Peter Neale The following are some additional items I'd like to make a submission on. They are all in relation to the 2024 CAPEX file. Stormwater; There is $553,000 allocated in 2025-2027 for underpass flooding. I suspect this is for the subway tunnel leading to the train station. This is often a problem, even more so when it freezes, which causes health and safety issues for passengers on the TranzAlpine train. Before this amount of ratepayer's money is spent, I would like SDC to look into whether it is an SDC responsibility or a Kiwirail responsibility.
Staff Recommendation	The submitters request for Council to seek alternative funding mechanisms for stormwater capital upgrades to reduce flood risk to the underpass in Arthurs Pass are acknowledged. Staff recommendation is to further investigate and design these improvements in year 2 of the LTP as planned.
Point Number	1397.26
Category	Activity > Other Categories identified by Staff > Emergency management
Comments:	2024 SDC LTP submission. This document is to go alongside the submission from Peter Neale The following are some additional items I'd like to make a submission on. They are all in relation to the 2024 CAPEX file. The SDC Civil Defence staff are setting the standard for all of Aotearoa, in terms of their preparedness and knowledge. With the odds of the alpine fault rupturing in the near future getting higher, it is crucial that funding is increased to this sector so all of the Selwyn district will cope in the event of AF8 happening. For several years requests to get the open drain along Brake Hill in Arthur's Pass Village, covered and piped have come to nothing. I would like to see this issue resolved in the 2024/25 financial year.
Staff Recommendation	SDC acknowledges the comments commending the CDEM Teams effort. This is enabled by Selwyn District Council not only funding CDEM well, but also the enabling of Governance and management in supporting CDEMs initiatives, especially within communities. The

	LTP has extra funding for CDEM for both capax and Opex. This includes extra staffing. Submission is acknowledged by Council. Piping would be very expensive because of the topography. And considering the amount of water coming down the drain, piping may not be our best option. Council staff will review option. No additional work is budgeted at this time.
Point Number	1397.27
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	2024 SDC LTP submission. This document is to go alongside the submission from Peter Neale The following are some additional items I'd like to make a submission on. They are all in relation to the 2024 CAPEX file Transport; I would like to see specific funding allocated to upgrade the lighting in Arthur's Pass village ASAP to enable the Village to be classified as a dark sky area. As this will involve discussions with Kiwirail, we really need SDC on board to lead those discussions. I note that Castle Hill has some allocated funding for this in the 24/25 budget. It may prove to be more cost efficient if Arthur's Pass has some work done at the same time. I note that $1.2m is allocated for district wide dark sky in 2039/40. Please pull some of this allocation forward to allow this to happen in the prime Arthur's Pass area in the 24/25 or 25/26 financial year.
Staff Recommendation	Submission is acknowledged by Council. Dark sky considerations will be part of the development of Action Plans associated with the Economic Development strategy. Council will consider this feedback.
Point Number	1397.28
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	2024 SDC LTP submission. This document is to go alongside the submission from Peter Neale The following are some additional items I'd like to make a submission on. They are all in relation to the 2024 CAPEX file. Halls and Community Centres; An upgrade of the heating in the Arthur's Pass Community Centre has funding allocated for 2030/31. This needs to be bought forward to the next financial year, 2024/25. In an alpine environment, suitable heating is very important, not just

	for those using the Community Centre, but also for the good of the building. Should the Alpine fault go with a bang as predicted, a non electric form of heating and cooking will be essential for the local Community Response team to care for stranded locals and travellers. I acknowledge that SDC have assisted with various improvements in the last 5 or 6 years. In the 20 or so years prior to that, upgrades and general maintenance of the building was generally carried out by local volunteers at no cost to the SDC. This building was at one time owned by the local Community, but was gifted to SDC ownership in the 1990's (?). Up until last year, the local Community also picked up the power bill at the facility, another saving to SDC. The current fireplace was second hand when it was installed in the 1990's, so doesn't meet any clean air regulations. When SDC consider funding for the Arthur's Pass CC, they should keep in mind, that a lot of improvements have come at no expense to SDC. Please make this new fireplace install an absolute priority for the 2024/25 financial year.
Staff Recommendation	Staff do not support the submission. A significant amount of work has been carried out by Council in recent years in upgrading the building including installation of heat pumps, insulation and new flue for the log burner. A new heating appliance was considered but as this would trigger a Building Consent substantial budgets would be required to carry out compliance works (disabled access toilets, alarm system, accessibility improvements) it did not proceed. The reasons for not proceeding were communicated to the Arthurs Pass Community Association Staff are of the view that the significant cost of this work is not warranted at this point but have allowed for heating replacement and associated works from 2029-30 (when the existing fire appliance is expected to be at end of life). Staff recommend that the submission to have a new solid fuel heating appliance installed at Arthurs Pass Community Centre is declined but the condition and performance of the existing solid fuel heater is monitored over the next few years.

Submitter Number:	1398	**Submitter:**	penny carnaby for Banks Peninsula Conservation Trust
Organisation:	Banks Peninsula Conservation Trust		

Point Number	1398.1
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	2050 Ecological Vision for Te Pātaka o Rākaihautū Banks Peninsula (including the Port Hills) October 2023 The vision: In 2050 native biodiversity is thriving across Te Pātaka o Rākaihautū Banks Peninsula. Native ecosystems underpin our resilient communities, recognising that when nature thrives, people thrive. Ka ora te whenua Ka ora te tāngata Introduction The ecological vision for Te Pātaka o Rākaihautū Banks Peninsula has been developed by the Banks Peninsula Conservation Trust (BPCT) with input from many partner organisations, including mana whenua, landowners, Christchurch City Council, Environment Canterbury, the Department of Conservation, and other community groups. The BPCT is proud to promote the ecological vision and acknowledges with gratitude the many contributors who assisted its development. The ecological vision is a resource to be used by the whole community and others are encouraged to adopt it, or adapt it for their own purposes. Banks Peninsula (which includes Port Hills), with its breath-taking landscapes, diverse ecosystems and precious wildlife, has long captured the hearts of those fortunate enough to engage with this special place. The Peninsula's wide range of habitats support a remarkable biodiversity, from penguins and inanga to wētā and forest birds, from kelp forest and podocarp forest to cliff and mountaintop plants. This biodiversity has great value - as taonga, for recreation, for tourism, and for ecosystem services such as flood protection. The challenges posed by climate change and human activities have threatened the delicate balance that sustains this ecological gem. The 10 ecological goals outlined here chart a path through those challenges and towards a thriving, resilient and biodiverse future. In adopting this vision, we can take encouragement from the progress made to date. Since the 1920s, when indigenous forest was reduced to only 1% of Banks Peninsula's area, indigenous woody vegetation has steadily increased so that today about 20% of the land is covered in regenerating native vegetation. Remarkably, despite

extensive historical losses of forest, few native species were lost locally, and Banks Peninsula remains a biodiversity hotspot for Waitaha Canterbury and for Aotearoa.

The 10 interconnected goals in this vision will guide collective efforts towards the recovery of this unique area, enabling it to flourish. Success depends not on any single entity or a few, but on us all: mana whenua, landowners, agencies, conservation organisations and the wider community, working hand in hand to achieve our shared aspirations. This vision is intended to facilitate collaboration and provide new solutions to complex issues. Together, we can foster a culture of environmental stewardship, implementing sustainable land management practices, and embracing innovative conservation strategies.

On Banks Peninsula we envision a future where native species thrive and ecosystems regenerate, offering sanctuary for both resident and migratory species. The restoration of ecological corridors, the protection of critical habitats, and the reintroduction of locally extinct species will restore the Peninsula's ecological integrity, and provide inspiration for the rest of Canterbury and Aotearoa. The 2050 ecological vision for Banks Peninsula invites us to dream big, and to work tirelessly for a future where our actions today foster the thriving biodiversity of tomorrow. It is a call to unite in creating a better future.

When Nature Thrives, We Thrive – Ka ora whenua, ka ora te tāngata

Penny Carnaby
Banks Peninsula Conservation Trust Chair

The 10 Ecological Goals This vision outlines 10 interconnected goals which collectively will guide efforts towards enhancing the biodiversity and thriving ecosystems of Te Pātaka o Rākaihautū Banks Peninsula.

Goal 1: Protect all remaining old-growth forest remnants

The deeper soils on Te Pātaka o Rākaihautū Banks Peninsula were once extensively covered in podocarp forest, with hardwood trees and ferns beneath the lofty tōtara, mataī and kahikatea, sometimes with miro and rimu. Sub-alpine areas were dominated by thin barked tōtara with native cedar. The south-east corner of the Peninsula had localised areas of red and black beech.

Podocarp trees were highly prized by settlers for timber, and those growing on the lowlands were among the first resources to be extracted. Forests were further cleared by burning to make land available for farming. These tree species have a lineage dating back

to Gondwana. Their lives can span many hundreds of years, sequestering and storing carbon while they grow. They are important for wildlife, providing valuable food sources for even the largest forest birds, kerurū and kākā, as well as nesting and roosting sites. Older trees with holes and hollows provide nesting places for ruru, mohua, riflemen, bats and kiwi. Healthy forest soils support a rich and diverse ecosystem.

These remnant forest types are now rare, but are important windows into the previous native ecosystems. They are small fractions of what once existed, and are now mostly small, isolated patches. Often their margins are vulnerable to wind, stock damage and weed pests. Elsewhere, there are single old-growth trees which are isolated from forests and even more vulnerable to damage. These remnant trees and forests hold the genetic material of the next generation, as well as providing food and shelter for large numbers of birds, insects and other wildlife.

Now is our chance to covenant or otherwise legally protect and manage the small remaining areas of these mighty forests before they are lost. They can also be protected by restoration planting of native trees around the edges to enlarge the forest patches and provide shelter to the older trees in the centre.

Goal 2: Protect the full range of rare1 and naturally uncommon ecosystems

From its summits down to the coasts and plains around its perimeter, Te Pātaka o Rākaihautū Banks Peninsula has many distinctive geographic features supporting specialised ecosystems that are rare or naturally uncommon in Aotearoa. They have distinctive soils and climatic conditions which support uncommon flora and fauna. These ecosystems are varied and mostly small and unforested. To survive, these need protection from pests, grazing animals, introduced weeds and from development.

They include:
• Inland cliffs, scarps and tors, which are often home to threatened or rare plants and animals, such as the nationally critical Lyttelton forget-me-not, Banks Peninsula sun hebe, waitaha gecko and Banks Peninsula tree wētā.
• Wetlands, such as lagoons and estuary margins, seepages and flushes on valley floors and slopes, and ephemeral wetlands, which each have their own characteristic assemblage of plants and animals.
• Boulderfields, which create microclimates and provide refuges for native shrubs, invertebrates and lizards.
• Coastal cliffs and rock stacks, which provide nesting, burrowing and roosting sites for penguins, shags, petrels and other sea-going birds, and for lizards.

• Sand-dunes, shingle beaches, coastal turfs and sea mammal haul-out areas, which each have different characteristics suited to specific assemblages of plants, invertebrates, lizards and birds.

These special ecosystems make a significant contribution to national biodiversity.

1 These ecosystems are now classified as naturally uncommon. See: https://www.landcareresearch.co.nz/publications/naturally-uncommon-ecosystems/

Goal 3: Protect streams and coastal seas through better land management

Aquatic habitats need to be healthy in order to support the many native species that depend on freshwater and marine environments for part or all of their life cycle. Freshwater and marine ecosystems are greatly affected by the conditions on the land adjacent to them. Silty sediment chokes up streams and coastal waters, greatly reducing their ability to support life. High nutrient loads promote excessive algal growth.

Good land management can greatly reduce sediment and nutrient inputs into streams and coastal seas. On steeper slopes and near coastal margins, native forest cover helps to reduce silt run-off. The forest and its soils absorb water and release it slowly, reducing sediment movement and the risk of flooding. Appropriate indigenous vegetation along the stream margins all the way down the catchment intercepts silt and nutrient run-off, reducing sediment and nutrient overload in streams and wetlands. Overhanging trees shade waterways, reducing light and heat reaching the water, which further reduces the likelihood of detrimental algal blooms. Falling leaves and other terrestrial inputs provide food for a healthy in-stream food web that supports aquatic invertebrate larvae, tuna/eels, adult galaxids (whitebait species) and kōura/freshwater crayfish. In slow-moving wetland areas, vegetation offers further filtration and buffering, which improves water quality. Clear water then reaches the sea, promoting healthy beds of kelp and seagrass, which support nurseries of fish and other marine life.

Many of our iconic native species such as kororā/little blue penguin, tītī/petrels, spotted shags, tuna/eels and inanga/whitebait rely on the healthy state of the land, freshwater and the marine environment to survive.

Inanga and other whitebait species need good water quality throughout their life cycle

Adult inanga live in coastal wetland areas (creeks, rivers, estuaries, etc.) and feed on tiny insects that also need healthy freshwater to breed. A few days before the full moons and new moons of February to May the adult inanga travel downstream to the place where the freshwater meets the incoming seawater. They wait for the very high waters of the spring tide to carry them up into flooded vegetation on the edge of the streams where they work their way into the base of dense, grassy vegetation to lay their eggs. The eggs are hidden there, shielded from natural predators (herons and eels) and from the sun's UV, and, ideally, safe from trampling stock. They develop over the next few weeks until they are ready to hatch on the next high spring tide. The tiny larvae are carried downstream to the sea, where they feed on plankton in coastal waters for 6 months until spring arrives, when they migrate back into clean wetlands, rivers and streams.

Goal 4: Establish four large biodiversity hubs of indigenous vegetation

Fragmented forest patches have small interiors with most of the habitat being close to an edge. Edges are more vulnerable to drying winds, and to weed and predator incursion. This limits the resilience of the plants, animals, important soil-living microbes and fungal networks, especially under a warming climate, thus reducing the diversity of species that can survive, and compromising those that remain. This goal is to establish four large-scale hubs, of more than 1000 hectares each, of connected and protected indigenous vegetation. These hubs will contain old-growth and regenerating forest and naturally uncommon ecosystems, providing ecosystem resilience from summit to sea.

Establishing large hubs of continuous native habitat from summit to sea and across spurs, valleys and rocky tops enables a rich diversity of native plants and animals to thrive. They support larger populations, increasing genetic diversity. Animal species can move safely between food and water sources, and adapt as the seasons and climate change; this is particularly important for smaller species that are less able to cross large open gaps in a more fragmented landscape, e.g. tomtit, rifleman and gecko.

These areas of 1000 hectares or greater will be in various ownerships, with large parts of them likely to be in private ownership sympathetic to this goal, such as with the Wildside which has Hinewai Reserve at the core. There may be residential areas within them.

Goal 5: Enhance native biodiversity within the rural environment

Most of Te Pātaka o Rākaihautū Banks Peninsula is rural, and this environment is a diverse mix of native and exotic elements. Much of the native remnant ecosystems are embedded within a matrix of primary production (agriculture, forestry, horticulture, etc.) and with areas of human habitation within it (farm houses, baches and small villages). Wildlife species move across this landscape, from mountaintop to lower country and down to the coastal margin or Kā Pākihi Whakateketeka a Waitaha Canterbury Plains, from one bush area to the next, or from stream to lake and sea, in order to find food, to find safe shelter, to breed, and to cope with the changes in seasons and weather patterns. With the worldwide shift in climate, this habitat flexibility is becoming increasingly important.

Many native birds, such as kererū, bellbird, tūī and fantail, spend considerable amounts of time within gardens and amongst farmland, opportunistically moving with the seasons. Other smaller species, like riflemen, lizards and beetles, struggle to cross large open stretches without native cover and safe shelter from pests. Springs, streams and rivers, critical for production and settlement, are also critical for biodiversity.

Sympathetic management of the native ecosystems within the areas of primary production and settled areas is important in order to sustain native species and to build ecosystem resilience into the landscape. Developing resilience against climate change will benefit both the environment and the people that live there. There are many things that can be done. These include restoring forest corridors and other habitat connections, waterway and stream-edge restoration, sympathetic road verge management, use of native species in shelter belts, and weed and animal pest control. These actions will improve ecosystem services and bring benefits to the primary production values and to human wellbeing. Owners can choose to legally protect their areas of native habitat in perpetuity through covenanting.

Goal 6: Increase the abundance of rare and uncommon native species

Te Pātaka o Rākaihautū Banks Peninsula has a wide range of native biodiversity, of varying abundance. Some native species are relatively common and are found throughout the Peninsula, such as fantails, silvereyes and black-back gulls. Some are locally uncommon, such as ruru, tūī, tītī and nikau palms. Some rare species are classified as nationally threatened, at risk or locally endemic, including hoiho, kārearea, spotted shag, Banks Peninsula tree wētā, a number of endemic moths, Lyttelton forget-me-not and Cooks scurvy grass. This goal is focused on the less common species, to increase their abundance and range. This will make their populations more secure, increase the biodiversity of areas they

spread into, and enable people to encounter and appreciate them more widely than they can at present.

Many animal and plant species on the Peninsula appear to have increased in abundance over the last few decades as a result of habitat protection, pest control, and the general increase in native woody vegetation - including bellbird, tomtit, kereru and five-finger. Kororā have benefitted from localised predator control. However, increases in populations may be quite localised, and some species may still be declining or relatively neutral. All are vulnerable to loss of habitat and to increases in predators.

This goal aims to ensure that native fauna and flora become more abundant and widespread across the Peninsula. While it is focused mainly on less common species, it would also cover any common species that started to decline. For fauna that are dependent on the marine environment, such as tītī and other petrels, penguins, shags, tuna and inanga, their abundances on land will be partially dependent on what is happening in the marine environment, potentially some distance away from Banks Peninsula.

Achieving this goal relies on success in some of the other goals, and evaluation of it requires affordable monitoring methods that can detect changes in species' abundance.

Goal 7: Re-establish populations of locally extinct plant and animal species

In the past, Te Pātaka-o-Rākaihautū Banks Peninsula was home to some native species that are now missing. Some of these are gone forever, such as moa, South Island piopio, laughing owl and the Waitaha penguin. Other species survive elsewhere, but were lost from the Peninsula, most likely due to extensive deforestation and the impact of introduced predators and hunting. The absence of these missing species has reduced the native biodiversity of the Peninsula. Some of these are iconic species that characterise Aotearoa's unique wildlife. Restoring local populations of these species will enhance local biodiversity.

As areas of suitable habitat expand and the impact of introduced predators is reliably managed, it will become increasingly feasible to reintroduce some of these missing species from suitable nearby source populations. The Peninsula has already seen the successful reintroduction of tūī, which had become locally extinct in the early 1990s. Several invertebrate species have been successfully reintroduced to Ōtamahua Quail Island. These species are all reproducing and forming self-sustaining populations.

Further potential candidates for reintroduction could include tuatara, tokoeka/South Island brown kiwi, seabird species including

pakahā/fluttering shearwater, kakaruai/South Island robin, kākā, kākāriki/yellow crowned parakeet, mohua/yellow-head, takahē and yellow mistletoe.

In general, re-establishment is most successful when the causes of the original loss have been addressed, the species' habitat needs are met and the threat from introduced predators is minimised. Since some of the species listed above nest in tree holes and hollows, and the Peninsula currently has few ancient trees with suitable holes, artificial nest-boxes could be installed as a substitute. Despite the anticipated elimination of feral predators, flightless birds may still be at risk from domestic cats and dogs and so may only be successful inside predator-proof fences.

Me he korokori tūī
How eloquent is he who has the throat of a tūī

By 2000, tūī had effectively died out from the Peninsula, with only occasional sightings of single vagrant birds. And so, the community, with Agency support and appropriate research, translocated 72 tūī from Maud Island, Marlborough Sounds, to Hinewai Reserve in 2009 and 2010. These tūī, and many of their hatchlings, have coloured leg bands so that they can be identified and their movements monitored. A team of volunteers in the Banks Peninsula Tūī Restoration Group have spent thousands of hours, observing, recording and managing this information. The work is overseen by Dr Laura Molles.

Goal 8: Eliminate or control pest animals to protect native biodiversity

Introduced mammalian pests are now widespread throughout Aotearoa and have played a major role in the extinction story. They will continue to threaten native species if left unchecked. These pests can be divided into two main groups:
• Predator pests that eat wildlife, including birds, lizards and invertebrates. These include ferrets, stoats and weasels, feral cats, hedgehogs, rats and mice. Possums eat chicks and eggs, and pigs eat eggs and invertebrates.

• Browsing pests that imperil our biodiversity by weakening the forest structures, compromising regeneration, and targeting certain plant species they find particularly palatable. These include goats, deer (red and fallow), pigs, possums, hares and rabbits. Rodents also eat plant seeds, seedlings and flowers, thus preventing native plant species regeneration.

Pest Free Banks Peninsula (PFBP) was established in 2018 by a collaboration of organisations with conservation functions on Te Pātaka o Rākaihautū Banks Peninsula. The programme is facilitated

by BPCT and is a community-led agency supported initiative working towards realising the PFBP goal.

PFBP aims to eliminate all feral browsing pests across the Peninsula, and reduce all predator pests to zero, or as close to zero as possible. It may not be possible to eliminate all of these pests, e.g. rodents, however the intention is to reduce populations to a level that does not threaten biodiversity. For it to be technically feasible, achieving this goal assumes that the tools for pest control continue to be developed. This goal aligns with the national 'Predator Free New Zealand 2050' programme but is more comprehensive.

Goal 9: Eliminate or control 'transformer' ecological weeds

Ecological 'transformer' weeds are non-native plants, usually garden escapees, that can smother, outcompete and prevent natural regeneration of our ecosystems. These include pine species, sycamore, old man's beard, banana passionfruit, Chilean flame creeper, Spanish heather, spur valerian, pig's ear and pride of Madeira. They also threaten our native fauna that relies on healthy native ecosystems. Ecological weeds can be trees, shrubs, climbers, herbaceous, succulent, freshwater or marine plants, and can spread by many different means, e.g. wind, water currents, birds, people and other animals. Typically they are fast growing, able to outcompete our native species, or are better adapted than native plants to environmental pressures which used to be uncommon in Aotearoa, such as wildfires or soil disturbance by mammals. Some weeds (e.g. pines, gorse) promote the spread of fire, which worsens the risk to native ecosystems and to human property.

If left unchecked, such weeds can expand exponentially and become increasingly costly to control. It is therefore important to understand which weeds pose a particular threat to native habitats, ensure new ones do not establish, and that new infestations are eradicated before they spread. Understanding how they proliferate is important to understanding how to control them. Climate change is expected to increase the conditions that suit many weed species, and so controlling them now is a priority.

Goal 10: Improve native habitat corridors between the Peninsula, urban Christchurch and the rest of Canterbury

Native bird species move seasonally for food, nesting sites or in search of breeding partners and some species will populate new areas if conditions are suitable. Large bush birds such as kerurū, tūī and kaka are capable of flying large distances such as between the Te Pātaka-o-Rākaihautū Banks Peninsula and the alpine areas, foot hills and plains of Waitaha Canterbury. Smaller bush species such as bellbird, fantail and warbler move smaller distances between bush

patches and their seasonal movements between the Peninsula hills and the gardens and parks of Christchurch City are well recorded. The many significant wetlands at the foot of the western and northern margins of the Peninsula attract huge numbers and species of wetland birds from far afield, some from great distances across the oceans. This goal aims to develop and enhance native habitat areas and corridors to facilitate safe movement of native species through the Peninsula, urban Christchurch and across Canterbury, and therefore help support more resilient populations of native birds.

The hills and valleys of the Peninsula that form the zone of contact with Kā Pākihi Whakateketeka a Waitaha Canterbury Plains run from the mouth of Te Roto o Wairewa Lake Forsyth round past Tai Tapu to the mouth of the Ihutai Avon-Heathcote estuary at Sumner. The Port Hills, from Gebbies Pass to Godley Head, define a substantial portion of this contact zone, and are part of the Peninsula's connection with Selwyn District and also with urban Ōtautahi Christchurch. The Port Hills' northern slopes lost most of their forest cover in the first 600 years of human settlement, and large areas have been cloaked in native tussock for several centuries. This has reduced available habitat for forest species, such as larger bush birds. Only small remnants of old-growth forest remain, such as Ahuriri Bush, but there has been native regeneration in damper sites and Christchurch City Council and others have been undertaking restoration plantings for many years.

The risk of fire here and across the Peninsula is a consideration when restoring forest habitat. Native plantings can take many decades to establish in dry conditions but generally carry fire less easily than many exotic species if well planned. A range of protections can be considered when planting, including designating fire break areas, selecting fire resistant native species particularly for around the margins of planted areas and in home shelterbelts, ensuring clear zones around houses and powerlines, and incorporating ponds for firefighting and for wildlife habitat.

Developing networks of native habitat linking through the hills and valleys on the western and northern margins of the Peninsula to the wetlands, parks, gardens and reserves will benefit indigenous biodiversity and facilitate natural migrations. Various community-led groups are already working towards this goal, including Whaka-Ora, initiated by Te Hapū o Ngāti Wheki to replenish the mauri of Lyttelton Harbour, and Te Kākahu Kahukura (TKK), supported by BPCT, Te Hapū o Ngāti Wheki, Summit Road Society and Living Springs. Te Ara Kakariki is planting forest corridors on the plains.

Appendix 1: Why Te Pātaka o Rākaihautū Banks Peninsula is worth protecting

Te Pātaka o Rākaihautū Banks Peninsula is an extraordinary geological region and the biodiversity jewel of Ōtautahi Christchurch and Waitaha Canterbury. Its origins as an offshore volcanic island, its large size (about 100,000 hectares, making it the largest peninsula in Aotearoa), and its location as a high-altitude, high-rainfall counterpoint to the extensive low-altitude, low-rainfall plains of the eastern Te Wai Pounamu South Island, all contribute to its distinctive characteristics. Its geological and island origins underpin the extraordinary diversity of life found upon Banks Peninsula, and have made it a hotspot for local endemism – unique species that exist nowhere else in Aotearoa or the world.

The island that is now Banks Peninsula was formed by offshore volcanic activity over a period from twelve to six million years ago. When the volcanic activity finally ceased, the craters centred on Lyttelton and Akaroa eroded into today's harbours as they were invaded by the ocean. Plant and animal life colonised the island and continued to evolve, separated from their mainland relatives. Eventually, about 20,000 years ago, the out-washed gravels from the glaciated Southern Alps of the South Island, which fanned out to form the Kā Pākihi Whakatekateka a Waitaha Canterbury Plains, reached the volcanic island and joined it to the rest of the South Island, forming the Peninsula we know today.

The eroded volcanic landform creates a remarkable diversity of microclimates, thus providing exceptional habitat diversity – from the windswept mountain tops (the highest Mt Herbert at 919m), rugged rocky bluffs, tors, coastal cliffs and islets, to the harbours and outer bays, deep fertile valley floors, streams and estuaries. On top of this intricate form, the volcanic soils, overlaid with wind-blown glacial loess from the plains, and a legacy of millions of years of burrowing seabirds depositing guano, formed rich fertile soils. With the plains joining the island to the mainland, large quantities of sand (formed from glacier-ground then river-worked rock from the Alps) constantly carried down to the sea by Canterbury's braided rivers, got transported around the Peninsula's coast by long-shore drift, settling out into pockets around the base of the new Peninsula, creating many and varied beaches, estuaries, wetlands and dune systems.

Before humans settled here, the Peninsula was almost entirely forested. On the mid to lower slopes and alluvial valley floors, lofty tōtara, matai and kahikatea (podocarps) towered over understoreys of hardwood trees and shrubs, climbers, tree ferns and ground ferns etc. The warmer coastal parts of these forests included frost-tender northern species such as nikau, kawakawa and tītoki. The higher altitude forests had native cedar and Hall's/thin-barked tōtara emerging above the hardwood tree canopy. In the coolest and wettest uplands of the south-east corner of the Peninsula, red and black beech forests out-competed the podocarp species. The rocky slopes, cliffs and sub-alpine peaks were clothed in stunted forests

with diverse shrublands, indigenous herbs and grasses. These forests and the wetlands and beaches would have been raucous with birdlife, with large flightless birds like the moa, takahē and kiwi being common. Rivers and estuaries would have teamed with invertebrates and fish, and nesting seabirds would have been abundant.

With human arrival, starting about 900 years ago, a rich history of cultural and economic activity began. However, impacts of human activities accelerated, especially in the last two centuries, resulting in significant ecological and environmental damage. By 1920, the forests were reduced to 1% of their original cover, and the loss of woody vegetation caused vulnerable soils to erode and slip, leading to sediment increase in waterways. The loss of habitat, as well as the introduction of feral predators and browsers (including rats, cats, mustelids, possums, goats, pigs and deer), caused the loss of many species, including kākā, kākāriki, tītī, piopio, saddleback and tuatara. The introduction of weedy plant species also threatened vulnerable indigenous species and habitat types. Recently, however, with changing farming practices and values, native woody vegetation on the Peninsula has been steadily increasing, and about 20% of the land is now covered in regenerating forest.

Remarkably, the Peninsula remains a biodiversity hotspot for Canterbury and for Aotearoa. There is an astonishing number of locally endemic species, including seven plant species and many invertebrate species, such as cicada, wētā, beetles, moths, etc This reflects the Peninsula's origins as an island. Some nationally vulnerable species are thriving here too. Very few plant species have been completely lost from the Peninsula, and the fauna remains very diverse. Several nationally rare lizard species have sizeable populations, and there is diverse birdlife due to the range of habitats – bush, freshwater and coastal. That so many of the original native plants and animals have survived is due to the sheer size of the Peninsula, its varied topography (from damp nooks and crannies to dry rocky outcrops) and the forethought of some landowners who set aside and continue to protect small areas of original forest.

Banks Peninsula is uniquely placed geographically and ecologically as a biodiversity hotspot, a seeding node, and a storehouse of carbon for Christchurch and the wider Canterbury area.

Appendix 2: Why indigenous biodiversity is important

Biodiversity is vital for our survival. Its protection is at the heart of the United Nations Convention on Biological Diversity, one of the three Conventions under the Rio Summit. New Zealand's National Policy Statement for Indigenous Biodiversity sets the direction for the country to protect, maintain and restore indigenous biodiversity. We

are closely connected to the land and rely on nature for our food, water, health and wellbeing. For Māori, kaitiakitanga is integral to the spiritual, cultural and social life of tangata whenua, and there are specific processes and practices for looking after the environment.

No other country can protect the ecosystems, species and endemics of Aotearoa; we have to protect them. Extinction is irreversible, and environmental degradation is costly to undo.

Ecosystems and the various species and elements within them are interdependent. Nature, over millions of years of trial and error (aka evolution), established a vast diversity of species that were adapted to the local climatic conditions, soils and other environmental variables to form well-functioning ecosystems. Millions of kilometres of fungal hyphae (filaments) in the soil deliver micronutrients to plants, which in turn supply the fungi with the food they need (produced by photosynthesis). Micro- and macro-organisms, e.g. worms, feed on leaf litter and other forest debris, turning it into good quality, well aerated soil, and produce a kind of glue that helps prevent drying out and wind erosion. Above-ground invertebrates help spread propagules such as fungus spores within a wider area. Vertebrates, including birds, bats and lizards, and invertebrates, such as native bees and wētā, help with pollination and seed dispersal, in return for food in the form of nectar, berries etc., while assisting the continual renewal of the ecosystem. The more diversity, the greater the range of services that are exchanged, and the more resilient the overall system becomes.

Collectively, other ‘ecosystem services’ enabled by a fully functioning indigenous ecosystem include:
• The canopy and roots of native cover and a healthy soil structure help attenuate water flow and hold soil in place. This protects the soil from erosion and reduces the damage from extreme rainfall events. It also protects the soil from desiccation in sustained drought events. With climate change, these weather extremes, which threaten human property and infrastructure through flooding, slips and fires, are expected to become more common.

• At a global level, as a result of the exchange of gases by photosynthesising plants, absorbing CO_2 and releasing O_2, storing the carbon in their mass and transferring some to the soil, the biosphere regulates the atmosphere within the stable range that we all depend on.

Losing any element of a diverse ecosystem reduces its functionality and its ability to renew itself. If we restore as much as possible of the ecological systems that evolved here, we will improve the integrity of the land and the overall wellbeing of the people who live and make a living here.

Staff Recommendation	*Council staff recognise the excellent body of indigenous biodiversity work that the Banks Peninsula Conservation Trust have undertaken and achieved, including in the Southern Port Hills area of the Selwyn district. It's important that the agencies are able to work with and assist our community groups and landowners to active their indigenous biodiversity aspirations in their areas / takiwa.* *Staff support the "Predator Free Selwyn' and "Towards Pest Free Waitaha" project concepts and acknowledge the need for capacity and funding to guide, align and assist those initiatives. Ideally there will be support available for a Community Activator role that would focus on coordinating current pest control projects and look at how best to engage with/enthuse Selwyn residents who are not already involved in pest control.*

Comments:	Kia ora koutou Re: Draft Long-Term Plan 2024/34 Submission from Banks Peninsula Conservation Trust (BPCT) This submission has been prepared by the trustees and management of the Banks Peninsula Conservation Trust (BPCT) for the SDC. BPCT supports the submissions forwarded to SDC by Dr David Miller from the Pest Free Banks Peninsula (PFBP) Management Group and Mark Richardson Chair, Pest Free Banks Peninsula Oversight group (POG). I wish to present BPCT's submission in person and, if it is possible for the BPCT, PFBP and POG submissions to be heard following each other on the same day it would be appreciated. 1. Acknowledging the support of Selwyn District Council BPCT wishes to acknowledge the SDC staff who work with the BPCT on the PFBP programme and the Te Kākahu Kahukura (TKK) collaboration of 21 organisations on both sides of the Port Hills. 2. The work of BPCT: Celebrating community-led, council supported indigenous biodiversity and climate resilience outcomes

Banks Peninsula is uniquely placed geographically and ecologically as a biodiversity hotspot. Because biodiversity is mobile, Banks Peninsula acts as a seeding node, and a storehouse of carbon for Greater Christchurch (including the Selwyn District) and the wider Canterbury area. Biodiversity is a public good and all current and future generations of Greater Christchurch residents benefit from its protection and enhancement.

The BPCT's model of community-led conservation with strong local council support has proven to be effective due to: the Trust's ability to work positively with landowners in way that is often unavailable to Council; low operating overheads ensuring maximum resources are directed into biodiversity enhancement; a proven ability to leverage Council/s funding to maximise other funding opportunities (e.g., $1M from MPI and $8M from PF2050Ltd secured over 7 seven year period); good science underpinning programmes that support community aspirations for biodiversity protection and enhancement; and the Trust demonstrating local conservation sector leadership through the establishment and facilitation of collaborations of organisations and individuals working towards shared ecological goals.

The BPCT's most notable achievements during the last LTP period include:

- Celebration of 20 years as Aotearoa's only independent conservation covenanting authority, now with over 100 covenants established which legally protect high value habitat for current and future generations of Christchurch residents.
- A refreshed 2050 Ecological Vision for Banks Peninsula (attached) including two new goals focused on removal of 'transformer' ecological weeds and enhancement of native habitat corridors between the Peninsula, urban Christchurch, and the region.
- Winner of the 2022 Canterbury Aoraki Conservation Board supreme award Te Waka o Aoraki, recognising excellence in conservation outcomes.
- Finalist in the New Zealand Biosecurity Awards for leadership of the highly successful Banks Peninsula Feral Goat Eradication Programme.
- Establishment of a new Peninsula-wide Farm Biodiversity Programme to support farmers with biodiversity planning and monitoring.
- Ongoing strategic leadership and facilitation of significant landscape scale, cross land tenure, multi-partner conservation programmes (note SDC is a partner organisation in both these collaborations) e.g

  ▪ Te Kākahu Kahukura 21 organisations working together to restore a thriving and resilient indigenous forest supporting an abundance of native birds, lizards, and invertebrates on the Port Hills.

▪ Pest Free Banks Peninsula 17 partner organisations (including five BP runanga) committed to the widespread removal of animal pests across Banks Peninsula (including the Port Hills). (note SDC is a partner organisation in both these collaborations)

2. Response to directions signalled in the Draft LTP 2024/2034

One anomaly in the published SDC LTP 2024-2034 seems to be that although it contains a goal that "Waikirikiri/Selwyn's whenua/land, wai/water, and kātaoka o te taiao/ biodiversity are protected and enhanced", and the Plan also mentions that climate change is one of the most pressing issues worldwide, the Plan seems to say very little about climate change mitigation and adaptation. There appear to be no environmental policies or any significant environmental directions included in the Plan.

BPCT would encourage more specific biodiversity and climate change outcomes are considered in the SDC LTP to support the considerable effort the community is already contributing to the enhancement of biodiversity outcomes in the Greater Christchurch area which links BP to the Alps between the Rakaia and the Ashley/Rakahura Rivers. It is our contention that the Council needs to acknowledge the significant work being done within its boundaries as well as alongside it and aim to work in partnership with others to protect these gains going forward.

3. Suggested areas of support

BPCT respectfully requests consideration of the following: (drawn from the PFBP and POG submissions):
3.1 Consideration of support for the “Predator Free Selwyn" and “Towards Pest Free Waitaha” project concepts, to dove tail with other adjacent pest projects.
3.2 Consideration of the continuation of the salary of the Community Activator from 1 March 2025 to support the community groups when the Predator Free 2050 Trust money ends, and funding for at least a second similar position from 1 July 2025. 3.2 Consideration of professional communications advice to the POG from 1 July 2024, including how best to engage with/enthuse Selwyn residents who are not already involved in pest control.

Concluding comments
Thank you for reading our submission. We wish to present our submission in person.

Penny Carnaby
Chairperson
Banks Peninsula Conservation Trust

Staff Recommendation	*Council staff recognise the excellent body of indigenous biodiversity work that the Banks Peninsula Conservation Trust have undertaken and achieved, including in the Southern Port Hills area of the Selwyn district. It's important that the agencies are able to work with and assist our community groups and landowners to active their indigenous biodiversity aspirations in their areas / takiwa.* *Staff support the "Predator Free Selwyn' and "Towards Pest Free Waitaha" project concepts and acknowledge the need for capacity and funding to guide, align and assist those initiatives. Ideally there will be support available for a Community Activator role that would focus on coordinating current pest control projects and look at how best to engage with/enthuse Selwyn residents who are not already involved in pest control.*

Submitter Number:	1399	**Submitter:**	Nigel Easson
Point Number	1399.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49%		

	NZTA Waka Kotahi: 51% Our budgeted option **Comment:** What about Darfield? Future focused
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Council will be investigating what further PT services can be provided across the wider District, further to what Environment Canterbury can provide. It is aware of the demands on the 86 Metro Darfield to city service and will continue to raise this with Environment Canterbury.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the

	needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**

Comments:	Kia ora Sheffield Swimming Pool On behalf of my family, I do not support the SDC's proposed closure of the Sheffield Pool. I have a child who is neurodiverse and can't travel in a vehicle at present. The save-in-grace for the summer was the Sheffield Pool. My family swam at least once a day when the pool was open. I believe the SDC has a social licence to support our neurodiverse community. If the SDC close the pool, you are limiting our disabled community access to a vital resource for learning to swim, interacting with other community members and allowing the freedom to be themselves.

	I would like to discuss in more detail the importance of having a swimming complex in our community. Thanks
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Comments:	4 Surprising Benefits of Swimming for Autism Improving your child's concentration, mental alertness, responsiveness, and peace of mind in 30-40 minutes sounds like a dream, doesn 't it? The truth is – swimming can do all of the above, and many studies confirm the benefits of swimming for autism. Swimming isn't just a workout for the body or an energy release. It also works the mind, and its benefits outlast the time in the pool. Let's dive into the most important benefits of swimming for autism and see how you can use this incredible sport to help your child. For more autism tips and resources, you can download your free guide here: 1. Swimming Is A Perfect Way to Calm the Mind If you've ever tried meditating yourself, you'll know how hard it can be to sit still and let your mind switch off. Fortunately, you don't have to sit still and clear your mind to receive a meditative-like effect. One of the first noticeable benefits of swimming is its ability to calm the mind. I've gone into swimming sessions feeling stressed and anxious and come out of the pool without a worry. It's almost unbelievable how effective it can be at easing your mind. The bonus: you don't even have to try to do anything special — just turn up and swim. On land, you can breathe whenever you want. You never have to think about it. To meditate, you have to keep your mind focused on your breath and attempt to pull your focus back whenever it wanders. As a parent of an autistic child, I'm sure you can imagine the amount of focus needed for your child to do this. When you're swimming, since you can't breathe whenever you want, you're forced to think about your breathing pattern constantly. One of the first things your child will be taught is to blow bubbles under the water and breathe as they lift their head out. As your child progresses through the lessons, they will be taught to breathe every two or three strokes. The repetitive counting of strokes and the focus on breathing can be incredibly soothing and stop the mind from wandering and worrying. 2. Swimming Helps With Sensory Deprivation In the water, everything feels …calmer. All the noise, feelings, and business of the outside world stop. The feeling of the water is interesting, and the way light moves through it can be fascinating. Of course, swimming pools can also be noisy environments, and the uncertainty of the water can be overwhelming for some children. However, water seems to be a very

soothing place for most children. For children with autism, water offers resistance, pressure, comfortable temperatures, and pleasant sensory arousal. One of the main benefits of swimming for autism is that it's stimulating, but it's the right kind of stimulating. On top of that, there's generally less social pressure in the water since class sizes are limited. It's pretty easy to ignore the world around you when you're so focused on staying above water. Sometimes, however, swimming lessons can be hectic. Not to mention those horrible latex caps. I used to teach an autistic child who was incredibly touch-sensitive, and his parents thought he'd never wear a swimming cap. He compared the feeling to being scratched by knives. If your local swimming lesson provider asks children to wear swimming caps, I recommend a polyester cap. They're soft to the touch and don't feel too restrictive. To combat the hectic feeling swimming pools can have, I'd recommend booking oneon-one or one-on-two classes. They're often calmer, with not as many screaming and swimming teachers shouting over the loud kids. Also, get a sense of how much your local pool echoes. I've been in some pools that are far louder than others simply because of the shape of the roof. As ridiculous as it sounds, you must shout over your echo to be heard. 3. Swimming Can Improve Taking Instructions It's no secret children on the autism spectrum can have difficulty with communication and often issues in taking instruction. It can be challenging in a classroom environment. Swimming, or sports in general, can be hugely beneficial for teaching children how to effectively take instructions without the pressures felt in a more formal environment. Any decent swimming instructor will always explain instructions through demonstration. Instructions like "I want you to swim to that cone with big arms" will be followed up by the teacher demonstrating this on the poolside or another child demonstrating in the water. It will then be up to your child to figure out how to get their body to move in the way that has been described. Sometimes, the teacher will help your child by physically moving their arms so they can experience how each movement is supposed to feel. 4. Swimming Develops Motor Skills Not only does swimming help with taking instruction and applying instruction, but it also helps to develop your child's fine motor skills. Fine motor skills are crucial in daily activities like washing your hands, making food, getting dressed, or using a computer. Due to the constant use of fine motor skills during swim therapy for autism, your child's mind is constantly stimulated. By the end of a swimming lesson, the children often have a sense of peace because they 've had adequate mental and physical stimulation. How to Help An Autistic Child Embrace Swimming? Swimming lessons for an autistic child can be highly beneficial. Helping your child learn to swim can be a rewarding and enjoyable experience for both of you. But how do you teach your child with autism how to swim? · Choose the Right Environment Select a swimming pool or area that is calm, clean, and not too crowded. Autistic children may be sensitive to sensory stimuli, so a quieter and less stimulating environment can be helpful. · Find a Qualified Instructor Look for a swimming instructor with experience working with children with special needs, including autism. They should be patient, empathetic, and

knowledgeable about different teaching methods. · Gradual Introduction Begin by introducing your child to the water gradually. You can start with simple activities like splashing in shallow water, pouring water over their hands, or letting them sit on the poolside with their feet in the water to get used to the sensation. · Provide Sensory Support Be aware of your child's sensory sensitivities. If they are sensitive to certain textures or sensations, consider using swimwear that is comfortable for them. Some children may prefer wearing a wet suit for the added sensory input. · Be Patient and Stay Consistent Children with autism may take longer to learn new skills, including swimming. Stay patient and remain calm, even if there are challenges. Celebrate small victories and progress. Consistency is essential for children with autism. Try to maintain a regular swimming lesson schedule so your child knows what to expect. · Prioritize Safety Ensure that safety is a top priority. Always supervise your child while in the water, and consider using flotation devices or life jackets if needed. If you encounter significant difficulties, consider seeking guidance from a pediatric occupational therapist or a behavioral therapist working with autistic children. Swimming Benefits Children with Autism in Many Different Ways Teaching your child to swim moves far beyond the survival benefits you initially thought about, from breathing skills to instruction-taking, repetition, and turn-taking. All of these translate to day-to-day activities outside the pool. Of course, don't expect your child to take to the water instantly. I highly recommend you persevere, even if nothing is working. I've seen many kids, autistic and not, cry and kick up a fuss about getting in the pool. This goes on for weeks and weeks before, suddenly, there 's a light bulb moment. They managed to blow bubbles for the first time. They managed to push off the wall on their own for the first time. They have a moment of confidence, which can make all the difference for a child with autism. FAQs Q: Is swimming good for all autistic children? A: Swimming is great for autistic kids, helping them not only physically but also improving their overall well-being. Learning to swim is crucial for their safety and contributes to their overall health. Although some autistic children struggle with sensory issues connected to water, many are drawn to it for sensory stimulation. Q: Can autistic people swim? A: Yes, autistic people can learn to swim just like anyone else. With proper support and teaching methods, many autistic individuals can enjoy and benefit from swimming. Q: What are the benefits of autism swim therapy? A: Autism swim therapy provides both physical and overall well-being benefits, such as improving motor skills, speech, confidence, and cognitive processing. It helps them learn a crucial life skill for self-protection while also enhancing their general health and happiness. Q: What sport is autism-friendly? A: Swimming, track and field, cycling, and soccer are great sports for kids with autism because they offer a structured and predictable setting, making children feel more at ease and secure. Q: Do autistic people like taking baths, showering, or water in general? A: People with autism might find taking a shower challenging because of sensory issues. The sound and feel of running water, as well as being wet, can be overwhelming for them. On the other hand, many individuals on the spectrum are drawn to water, as

	they find the sensation soothing and stimulating. Relationship with water depends on personal sensory preferences, so it ’s best to talk to your child and a professional about it. Comments:	I am a retired qualified Social Worker who has worked for government agencies all my life with a lot of contact with all sorts of people from all walks of life. I now live in a bus & stay at the freedom camping places in your area when I can. FREEDOM CAMPING I am pleased with the way the summer season has flowed 2023/24 regarding the 28 days at each park. There are still some areas that are very vague as to when the vehicle is recorded as this is not done on a regular basis and as such leaves the campers confused as to how many days they have been there & is not done at times when you can actually see how many people are using these facilities overnight. You would be quite surprised how many cars stay overnight. Many are workers who arrive after 5pm & are gone by 7am. They can't afford the rent nowadays, enduring a breakup etc. & only have their car.

Then you have tourists who are on tight schedules & only stay overnight & are gone by 9am.

Then you have people that live on the road fulltime. Most of these are retired, seasonal workers who like to sleep in occasionally & want to stay in the same place for more than a day. There are more people living on the road now than ever with the rise of rentals etc & even families whose children are learning via correspondence

The queues at the toilets some nights & mornings is horrendous & quite embarrassing actually.

By the time the rangers come around, nearly everyone has left.

The above is a bit of background to go with the following submissions.

SUBMISSION

SDCC Freedom Camping Winter Months & Days Allowed

Can the council relook at the months it allows as winter months please??

Most of the SDCC freedom camping grounds are closed from 1st April until the 1 st November making Winter 7 months long.

Having the grounds closed at the 1 st April is usually before Easter & the school holidays & there is still usually good weather around.

Having the grounds not opening until 1st

November is after the school holidays & Labour Weekend when most of the freedom camping grounds are full & the weather is usually pretty good.

I PROPOSE that the winter hours for freedom camping are from

1 st May 2024 until 27th September 2024 as the school holidays start on 28 September 2024 (weather dependant).

Secondly, with your winter dates as they are now only allows 28 days over the 7 months making it that you can only stay at Lakeside Domain 4 days every month. Where are the workers, homeless, retirees etc going to stay the other 6 months?

The loss of income to the Selwyn District businesses will be huge.

A lot of money is spent by campers in your district especially vehicle repairs, food, fuel etc.

	There is also the health & wellbeing of these people that needs to be thought about. Quite a few that I have talked to are on a healing journey from whatever illness has struck them. The pressure of wondering where they can park up safely over winter is a big issue for many. Some of the retirees have worked hard all their lives to be able to freedom camp around the country & do spend their money in the little places that they can camp at. I PROPOSE that it goes back to what it was 2 years ago over winter only. 28 nights at least 1 night away & then you can start back at 28 days again. This will stop people setting up structures etc. & becoming fulltime. This will also provide security over that time. Please consider these submissions as they are very important to a lot of people. Thank you for taking the time to read this.
Staff Recommendation	The submission is acknowledged by Council. Staff agree that the management of freedom camping on Council reserves could be improved and have been considering and trialling number of measures. The freedom camping reserves are set aside for recreation purposes but have also become places that accommodate some homeless people as a result of broader social issues as well as transient freedom campers. Council staff need to be able to manage the use of the freedom camping sites in an efficient and fair manner that complies with the underlying legislation. The closure of some sites to freedom camping over winter is required to enable sites to recover, prevent damage to assets, enable efficient management of sites and for public health and safety due to the potential for flooding. There are no plans to extend the summer season and staff are comfortable with the current seasonal closure dates. It is noted that all freedom campgrounds are open until 29th April to take into account school holidays and ANZAC weekend. and also open earlier in October to capture the long weekend. Council allows the maximum camping time permitted under the Reserves Act (28 days) but many other Council's apply a much shorter maximum stay period under their Bylaws. Staff agree that managing vehicles in and out of camping areas is problematic and enforcement has been difficult. Staff have investigated installing cameras to record licence plates as a measure to manage this issue. Cameras have been trialled and quotes sought for installation of licence plate recognition (LPR) cameras. Rakaia Huts campground

	would also benefit from installation of control gates to effectively manage use. Staff recommend that an additional $75,000 is provided in 2024/25 to enable LPR cameras and control gates to be operated at sites to manage camping activities. Staff also recommend that a review of the Bylaws and Camping on Reserves Policy is carried out to ensure that effective and enforceable controls can be put in place to manage this activity.

Comments:	Community Pools should be kept open to encourage children's water safety
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1402.9
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	We should be sticking mainly to the basics.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and holds a view that it is not Council's core business. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	1402.10
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	We should be sticking mainly to the basics.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1402.11
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	I see the rate rises that you are planning for the next 10 years and are wanting to build Capital Projects. I think that the Council should selloff some of its spare/surplus land to fund these projects. The

	Kirwee Reserve improvements could funded be selling the 2x 10 hec blocks of land west of the present reserve and would go a long towards making the project rates neutral.
Staff Recommendation	Submission is acknowledged by Council. Council has for some time been working through a land disposal programme which has included both freehold land and reserve land (former gravel reserves). Work is currently underway on a project to identify further land that is surplus to requirements and could potentially be offered for sale. This is to both reduce holding costs and provide revenue streams. The 20 hectare block at Kirwee (Wrights Block) may be considered as part of that process.
Point Number	1402.13
Category	Activity > Other Categories identified by Staff > Other Matters
Comments:	I am not sure if I am in the right section or not but I strongly object to the dropping of the Malvern Community Board. This is the only way that the mainly rural areas of the western side of district have a voice. Although they have no money or real power it is at least a way that this area can get some little say in our district affairs.
Staff Recommendation	Submission is acknowledged by Council It is noted that the Representation Review is subject to a separate process.
Point Number	1402.15
Category	Activity > Other Categories identified by Staff > Infrastructure Property General
Comments:	Another valuable surplus piece piece of land is the farm on Creyke Road that was bought as a sewage farm for Darfield and Kirwee. As there is now a pipeline to the sewage treatment plant at Rolleston this land is no longer needed. This could be sold and the money could be used to fund the new sports center in Darfield.
Staff Recommendation	Council acknowledges the submission. The land has been developed by Council to include central pivot irrigation and is currently let to a Farming Company. The land is currently strategically retained as it may be able to be developed in the future for residential housing and therefore increase in value. Staff recommend consideration be given to disposal once there is an increase in land value

Point Number	1402.16
Category	Activity > Planning Further Community Facilities
Comments:	In the Kirwee rating area the Council charge at least 600 plus, and growing hall rates on properties equating to at least $100,000 and will not allow the Kirwee Hall to have any access to this. This is a most unfair policy and should be changed to allow the Kirwee Hall access to this fund the same as all other ratepayers in Selwyn.
Staff Recommendation	Council acknowledge the construction and also the ongoing repairs and maintenance associated with community centres are an increasing expense to Council and its rate payers. Council does not generally make budget provision for construction and ongoing repairs and maintenance associated with buildings owned by external organizations/ outside legal entities.

Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding
Point Number	1403.3
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes two indoor courts. **Project cost:** Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million) **Estimated impact on rates (per year):** $19.91 **Funding:** Rates: 57% Development contributions: 43% * **Comment:**

	The Darfield community will continue to grow and to erect a facility with only 1 indoor court seems short sighted and it will only be more expensive to add to the building at a later date. I would encourage the use of a standardised design in order to minimsie costs.
Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.
Point Number	1403.4

Comments:	**Question:** Do you support the continued development of an economic development strategy? Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1403.5
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	The Leeston Park buildings currently house the Leeston Smallbore Rifle Club and associated indoor rifle range. This facility is used as a rifle range on a regular (1 - 2 times per week) from early March through to September, and on at least monthly during the other months. The Leeston Club & it's NZ Firearms Safety Authority inspected and approved rifle range form an integral part of the Ellesmere Smallbore Rifle Association. Weekly Tuesday night competition is held here every third Tuesday, as well as Friday Club nights every week throughout the season. In a town with an increasing population it is vital this facility remains, either in the current form or as part of a new sports facility, to service the competitors who turn up every week for companionship and friendly competition. The Leeston Smallbore Rifle Club, as with all rifle clubs, provides a safe, welcoming environment for all competitors and provides training on the safe use of firearms, often being the first

	point of contact for those interested in the sport particularly for those who don't have a family member involved. It is imperative such a facility is available in an expanding community.
Staff Recommendation	Submission is acknowledged by Council. It is suggested that further discussions be held by council staff with the club and opportunities to co-locate with Ellesmere Archery at Osborne Park (See their submission) be investigated as it would seem there would be a number of aspects of the facilities that would align. Having target sports all in one location may also encourage further activation and efficiencies in the long term.

Submitter Number:	1404	**Submitter:**	Fiona Ngakuru
Point Number	1404.1		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	As a resident of the Upper Selwyn Huts I am asking Council to consider the attached file. Thank you. 1. Historical value The Mayor says in the Long Term Plan that "we're focussed on looking after what we already have" - how about you look after us! An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890 ’s at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council unanimously determined that ‘Hut licences and subsequent renewals are short term and ultimately for a finite period’ . At its 13 March 2024 mee ng Council resolved to accept op on 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts. I request this historical significance be recognised and for the Selwyn Huts to be listed as an historical site on the District Plan and for the term for us being here to be extended to protect this		

history. 2. District wide rates I request that the Upper Selwyn Huts be put on DWR for Water and Sewer. The reasons being : (a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequant upgrade, the requirement we were told for being put on DWR. (b) We have already paid for the water upgrade. (c) We should not be discriminated against and should be treated like everyone else in the district. (d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We should also be added to the DWR for Sewer and Water like everyone else. (e) Towards25 LTP Document stated: “The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities.” This document also has USH specifically listed in the “Proposed district-wide rate for urban water compared with existing targeted rates” table. From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston. (f) Buddle Findlay’s Legal Opinion dated 04/03/2019 states “We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community.” (g) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn’t find the full amount. This was proposed in 4.12.4 of the “Upper Sekwyn Huts Future Occupancy Strategy” report dated 04/03/2024. (h) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners. (i) Additionally we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else.

Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Comments:	**Question:** Do you support the continued development of an economic development strategy? Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment:** **Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1405.4
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Yes, as long as it does not disadvantage those that do not have access or choose not to engage with technology solutions. Already many older residents feel left out or are being left behind due to the rapid change in technology.
Staff Recommendation	Face to face interaction will continue to be an important part of how we interact with our communities. Our digital approach is designed to make things more streamlined, connected and efficient.

Point Number	1405.5
Category	Activity > Lincoln Town Centre Upgrades
Comments:	Lincoln Town Centre Master Plan which was adopted in 2016, may well not be fit for purpose any more due to the increase in population and plus further proposed subdivision developments. While it is clear that the plan needs to be actioned as soon as possible, further consultation will delay advancement meanwhile additional pressures and constraints (such as financial, traffic management, infrastructure, community needs) continue to influence key decision making. Modelling and assumptions may well have changed that previous plans and decisions were based on. A heavy traffic by-pass to avoid the town centre should be reconsidered, plus better planning and infrstructure as increased traffic movements change roading requirements and flow. Safe cycleways to encourage more short trips by bike would be of benefit to local residents. Safety around schools (early childhood, primary and secondary) including reduced speed zones should be a priority.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1405.6
Category	Activity > Walking and cycling improvements
Comments:	Walking and cycling opportunitites should be progressed, in particular with access to the Port Hills. While there are ample opportunities within the Christchurch City boundaries, there is limited access from Selwyn to the Port Hills.
Staff Recommendation	Submission is acknowledged by Council. Major routes follow council's walking and cycling strategy which will be updated with suggestions from LTP submissions taken into account.
Point Number	1405.7
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	The Council will need to continue to develop long-term plans to address the many environmental challenges and pressures on the loss of biodiversity, loss of highly productive land, and the impact of climate change, meanwhile balancing the needs of local

	communities while retaining the distinct and unique character of the various settlements or townships within the district. To provide leadership and guidance for managing the natural environment, actively considering sustainability while encouraging economic development opportunitites and providing facilities and services to make Selwyn a great place to live, work and play.
Staff Recommendation	Council needs to develop a balanced approach to the many challenges facing the district. This includes planning suitable responses, supporting our community and showing leadership.

Submitter Number:	1406	**Submitter:**	Craig Blackburn for Go Hororata (Hororata Residents Committee)
Organisation:	Go Hororata (Hororata Residents Committee)		
Point Number	1406.1		
Category	Activity > Other Categories identified by Staff > Parks and Reserves		
Comments:	Go Hororātā Submission LTP 2024 Since 2020, Go Hororātā has collaborated with the SDC to develop a Master Plan for the Hororātā Reserve. This process included public meetings, an online survey and multiple meetings with the Go Hororātā committee. The Hororātā Reserve Master Plan was finalised in August 2023. Go Hororātā has been encouraged by this process and it has been a positive step forward in the community/SDC relationship. The community has developed the Hororātā Reserve for 146 years, most recently establishing a 6km walkway and a world-class equestrian Cross Country Course. It is important that the community is able to continue to being involved in the Reserves future. The Hororātā Reserve is unique in that it caters for a wide range of activities that do not have to work around sports fields. The Reserve is used by people from all over Selwyn for horse riding, walking, cycling, tennis, target shooting, school duathlons, picnics, small and large events. The plan's purpose is to look forward to the next 10-20 years to ensure the more than 92-hectare Reserve continues to be enhanced in ways that serve the community and wider Selwyn district		

functionally. It seeks to strengthen the Reserve as a multi-use recreational public space and amplify its existing character. It is planned that work will be completed in stages and will mainly involve improvements to current features and facilities within the Reserve. A budget was developed by SDC staff with an investment in Capital projects of $1.2 million over the next 10 years. A modest target considering the budgets for other Reserves in the district. This is not just an investment in the Hororātā Community but into a public space for all of Selwyn. 2024/2025 was planned to be the most significant investment in finishing several projects that are currently half-done. These includes: Projects Budget 1. Complete the new toilets – including landscaping surrounds, signage, parking. This project was started in 2020 and the toilets have only just opened April 2024 $70,500 2. Removal of the old toilet block, landscaping pedestrian entrance and connection to the hall site, install of storage shed and fencing. $55,000 3. Complete east/north perimeter walkways (the walkway was excavated in May 2023 as part of the clean-up following wind storm that caused significant tree damage). Project cost includes shingling, fencing, signage $40,000 4. Upgrade to new main entranceways, close existing entrance which currently on a bend in the road, install new connecting vehicle access tracks $90,000 5. Reinstatement of cross-country course and Equestrian area development. This work would see structure put in place to ensure horse riders, walkers/dogs/cyclists can use the Reserve simultaneously and address the SDC's safety concerns. Including fully fencing the trotting track for safety and establishing a new paddock for float parking (this makes it safer as it is away from the main public area, and a loose horse would be contained). Keep in mind that the SDC committed to the Cross-Country course being reinstated, and the community has been patient waiting for this project to be completed. $105,000 6. Landscaping planting programme $20,000 Total budget for 2024/25 $380,500 Go Hororātā was surprised to discover that the entire capital projects budget for the Hororātā Reserve has been excluded from the LTP 2024/25 budget. The total 10-year budget has been reduced by $247,000.00. The budget included in the LTP does not match the Master Plan. It does not allow for projects to be completed in a logical order and it means that projects will remain half completed for another 12 months. The budget submitted was developed by staff and the community strategically to see the Master Plan implemented over the next 10 years. There has been no strategic process applied to the changes made. Budget submitted with the Master Plan 2024 / 2025 2025/ 2026 2026/ 2027 2027/ 2028 2028/ 2029 2029/ 2030 2030/ 2031 2031/ 2032 2032/ 2033 2033/ 2034 $380,500.00 $95,500.00 $60,000.00 185,000.00 195,000.00 183,000.00 $85,000.00 $ 5,000.00 $16,000.00 $55,000.00 LTP Budget 2024 / 2025 2025 / 2026 2026 / 2027 2027/ 2028 2028 / 2029 2029 / 2030 2030 / 2031 2031/ 2032 2032/ 2033 2033/ 2034 $ 0.00 $356,500.00 $104,075.00 $69,000.00 $138,000.00 $126,500.00 $201,250.00 $5,750.00 $5,750.00 $5,750.00 It is important to note that items 3

and 5 are not capital projects but rather putting back what was there as part of the recovery from the storm damage and the closing of the Cross-Country Course because of SDC safety concerns. It is disappointing to collaborate with the SDC over four years to complete a great Master Plan only to have the budget significantly changed without consultation. It is frustrating that the SDC did not communicate with the community before removing and altering this budget. Go Hororātā requests that the $380,500.00 budget for the Capital Projects be included in the LTP for 2024/25 as submitted. If it is not possible to include the full $380,500.00 then at minimum include the budget to complete the projects that are half-finished and move the remaining budget to 2025/26. This would be $270,500 covering projects 1, 2, 3, 5. Work with the community to get these projects completed in the most cost-effective and efficient way. New Public Toilets Go Hororātā expresses its disappointment in the quality of the new public toilets on the Hororātā Reserve. A project plagued with issues; it was good to see the toilets finally open. However, the quality of the toilet block is substandard – no toilet seats, not bird proofed, will fill up with dust and leaves, no way of drying your hands and the structure is showing signs of rusting already. It has been noted that no toilet seats make the toilets less accessible for the elderly and disabled. Go Hororātā asks that the toilets be looked at as the structure will most certainly not stand the test of time and budget for remedial work allowed. Proposal for a local Domain/Reserve Coordinator Rural communities are feeling disconnected to their Reserve's and frustrated that they are no longer able to care for these public green spaces like they have for generations. Since the dissolving of Council committees there has been no real plan of how the Reserves will be managed and how communities can be involved. SDC rangers are doing their best to ensure maintenance and projects are carried out but it seems that they are overwhelmed. They have a large area to cover and cannot be everywhere they need to be at times. Communities feel that since the dissolving of the Council Community Committees, the cost of maintaining these Reserves has increased dramatically due to services previously supplied by locals free of charge like roadside mowing/removal of rubbish etc. Communities also feel then can no longer carry out community- led projects on their Reserves. The scope of work needed to keep these reserves up to an acceptable standard is well under what was done previously due to donated time and machinery or use of PD workers. There was never a hand over of information and without buy in by local communities they won't help in future A solution that is proposed is for the Council to employ a local coordinator who could help manage these spaces. This person could work under Ranger's guidance too: - communicate with Corde regarding Mowing and garden maintenance - coordinate contractors to make sure they are carrying out jobs efficiently - ensure, where possible local contractors are used - carry out small fixes that we are currently paying huge amounts for outside contractors to come in and do - Check that after storms, the spaces

	are safe. Check trees, pick up branches etc - be a point of contact the community can reach out to regarding these spaces - be the on the ground contact for bookings/events, making sure venues are ready, working with the Council bookings team - Work with the Council and community on improvement projects on the Reserves - Work with the Rangers to connect the Council to the communities surrounding these Reserves. Including ensuring all health and safety protocols are followed It is suggested that the coordinator would cover Greendale, Hororātā, Coalgate, Glentunnel, Whitecliffs, and Lake Coleridge. It would be really important for this person to live in the area and have a passion for these spaces. This system has worked with the area's Council halls and community centres. A local person was employed to coordinate these facilities. This has successfully addressed many of the communities' concerns following the committees' dissolution. Go Hororātā request that the Council implement a local Reserve Coordinator for the next financial year. This could be done on a contract basis rather than employee with set budget and protocols in plan. A fixed term contract could be used to trial this system
Staff Recommendation	Staff support the submission to bring the development programme at Hororata Domain forward one year to 2024/25 because some work is a continuation of projects already underway and there is also a need to carry out public health and safety works to the equine facilities and trotting track. Staff will also review the new public toilets to check on structural issues and any work that may be needed to improve comfort and secure the building. Council appreciates the strong connection that communities have with their local reserves and domains. Although Council has formally disestablished committees of Council including reserve committees it is intended that there will be opportunities for local communities to continue to provide valuable input to reserves on a voluntary basis. This can be by way of acting as a local point of contact for reserve matters or involvement in organised projects. Staff do not support the introduction of a paid person to act as a reserves coordinator in the Malvern area. The proposal has cost and level of service implications in terms of providing an additional resource for this area. Staff concur that there has been teething problems in the transition from committees to contract but are confident this can be resolved by setting up improved communication channels, utilising local volunteers as the 'ears and eyes' to report matters of concern and providing additional support. The Reserves Operations Team will look to ensuring there is a consistent point of contact in Council to support the rural reserves. It is noted that there is opportunity for budgets to be provided to resident's associations which could be used to support local initiatives including on reserves. Staff recommend that part of the budget ($270,500) for Hororata Domain development is brought forward from 2025/26 to 2024/25 to enable urgent and committed works to proceed. Staff further recommend that processes are put in place to improve communication between

	local communities, Council staff and contractors on reserve matters and to ensure that there are clear channels for reporting issues.

Submitter Number:	1407	**Submitter:**	Cindy Driscoll for The Hororata Community Trust
Organisation:	The Hororata Community Trust		
Point Number	1407.3		
Category	Questionnaire > Matters For Community Guidance > Economic Development		
Comments:	Hororātā Community Trust Submission to the Selwyn District Council LTP 2024 The Hororātā Community Trust (HCT) supports the Selwyn District Council (SDC) economic development strategy and investment. It is encouraging to see the SDC develop a strategy to focus on and invest in Destination Management, visitor attractions, and major events in our district. The $9 million budgeted to deliver the economic development strategy should have tangible return for the district which need to be measured with results publicised. Since introducing the Selwyn NZ brand and focusing on tourism in the district, there has been good results. The website introduction and coordinated marketing campaigns have created a good brand story for Selwyn. Tourism and event business are benefiting from this brand and able to leverage off it. Encouraging collaboration and businesses together has been a positive. It is crucial to have a dedicated SDC staff member driving the strategy to ensure ongoing success. Events have been proven to have a direct economic impact in regions. The SDC needs to continue to support events in Selwyn. The SDC can help all events, regardless of size, by streamlining the permit application process (the current system is not working), differentiating between major and local events, allowing for different requirements to make it easier for smaller local events to run and continuing to promote events through SDC channels. Differentiating between local events and major events is essential. The SDC could develop strategic partnerships with organisations that run major events (be community or commercial). Partnerships with key major events in the district will allow the SDC to leverage these to attract more visitors from outside the region and promote Selwyn’s tourism businesses. At present, this is challenging to do within the		

	Community Fund structure. A Major Event fund could help these significant beneficial events and festivals continue to grow and benefit the district.
Staff Recommendation	Submitter is supportive of Economic Development Strategy and in particular highlights support for Selwyn NZ and tourism. Comments related to events and funding are noted and will be shared with relevant team.
Point Number	1407.6
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	The HCT supports investment into the Hororātā Reserve. Not only is the Hororātā Reserve a wonderful and unique recreational area, but it is also a good events venue. The Council could promote this as a venue to attract different events to the region, complementing the ones already occurring. The newly developed Hororātā Reserve Master Plan puts in place a framework that will encourage more recreational use of this space and make it easier to run events. The SDC must ensure a sufficient budget to implement the Master Plan. It has been good to see investment in new toilets at the Hororātā Reserve; however, the quality of the toilets is substandard; there are no toilet seats, and it will be challenging to keep birds and debris out of them. Overall, for public toilets, which have high usage year-round and for a number of events, it is disappointing that they are such poor quality. The SDC will need to allow budget to do remedial work on this toilet block. The Hororātā Reserve is used by the local community and people from all around Selwyn and further afield. For that reason, the SDC should give the Hororātā Reserve higher priority than it currently does
Staff Recommendation	A total budget of $1.01 million has been provided over the 10-year planning period to undertake development work at Hororata Reserve based on the Master Plan. As a result of other submission received staff agree that a budget should be included in year 1 (2024/25) to enable projects already underway and public health and safety works to the equine facilities and trotting track to be completed. Staff will also review the new public toilets to check on structural issues and any work that may be needed to improve comfort and secure the building. Any work required can be covered under existing budgets for public toilet upgrades. Staff recommend that the budget programme for developing Hororata Reserve is supported and part of the budget ($270,500) for Hororata Domain development is brought forward from 2025/26 to 2024/25 to enable urgent and committed works to proceed.

Comments:	Please find attached my submission on Arthur`s Pass Waste Water  I would like the opportunity to also submit verbally in person on this mater as well.  Kind Regards  Ben Deans  Selwyn District Council Long Term Plan Submission Ben Deans Arthur`s Pass Wastewater Reticulation Overview Arthur`s Pass Township located in the heart of Arthur's Pass National Park and is a

small alpine town with approximately 130 wastewater systems of varying types of which approximately 30 are consented systems and the other 100 operating as a permitted activity under the Land and Water Regional Plan. This submission will set out the numerous issues with the current status quo and suggest that the SDC undertake a full study on the feasibility and costing of reticulating all waste water within Arthur's Pass Village and then begin the budgetary process to set aside the necessary capital for the system to be built in the future. Current Wastewater Systems Arthur's Pass village essentially has three categories of waste water systems. The reticulated system which services the Doc Facilities on Mount Bealey Road and 8 houses/bachs on Sunshine Terrace, there are also two bare sections on Sunshine terrace which may or may not be able to be connected to this existing system if they were to be built on. The second category are consented systems of which there are approximately 30 which based on Canterbury maps data seem to include the majority of commercial operations and other government or local government buildings, new builds and a small percentage of existing baches/homes. The third category is unconsented systems. Within this set it is likely these systems are a permitted activity under the Land and Water Regional Plan with any rebuild change of use or new wastewater systems requiring the owner to go through the ECAN consent process. To say however a vast majority of these unconsented yet potentially permitted discharges even come close to meeting current ECAN, SDC and Government standards is patently false. These systems vary from long drops, plumbed long drops, basic concrete tanks all the way up to more modern systems that have been installed without consent. Without an actual survey being undertaken it is impossible to know how this breaks down but based on the age of many of the dwellings the majority these systems will be rudimentary at best often with grey water simply being discharged on the surface. Need For Reticulated Wastewater in Arthur`s Pass Arthur`s Pass village has need of an efficient waste water system. A combination of geography, tourism growth, environmental concerns, economics and the unworkable ECAN requirements highlight why the status quo cannot be sustained. Current Ecan Rules In summary Ecan require a resource consent for wastewater management for new builds or where there are changes to the wastewater flow (e.g. resulting from addition of buildings). The design of an on-site wastewater management system is based on the Australian/New Zealand Standard (AS/NZS1547:2012). Generally the treatment system will consist of either septic tank discharging to sand bed/trench or a secondary system to drip irrigation. Where Lots are small and environmental risks are high a secondary system to sand bed might be required. Most Lots in Arthurs Pass are too small to use a secondary system to drip irrigation so the secondary system to sand bed would be required in the more sensitive areas. Design of these systems are influenced by section size and topography but also a soakage test. The ECAN rules are not fit for the specific Arthurs Pass Conditions while

incredible costs are levied on those looking to or required to put in new systems. Some sections based on slope and bach/house position may not even be able to fit a consentable system in and others would require the felling of beach trees. The Economics of the Current System The normal capital cost for these systems on the plains is in the order of $20,000 and more for a secondary treatment system to sand bed. In addition there is the cost for preparing the consent application and the ECan processing cost. These could total around another $10,000 depending on the environmental risk. For development in Arthurs Pass these costs increase due to distance from the suppliers/consultants and the environmental sensitivity of the environment. Our property at 56 Gentian Lane has had the following costs to date. Septic Design and Testing $5,465 Ecan Consent Lodgement $2,400 (Ecan currently proposing to increases this to a $6000+ fixed fee irrelevant of time spent on the application) Earth works, Septic Tank & Sand Bed $37,000 approx Total $44,865 While this may be on the higher end I would expect $30,000 would be at the lower end of the cost to put a consented and compliant system in assuming it's even possible on a given site. This does not include the ongoing maintenance and yearly pump out. To make matters worse the last waste water consent ECAN issued was for 56 Gentain Lane and a term of only 10 years was given, the prior last consent was for 77 School terrace and was for 15 years. Local Iwi now insist on 10 year consents and unless the applicant wants the additional cost of applying for a notified consent and challenging iwi preference. If all 130 waste water systems were consented on ten year terms the cost to the village at the current Ecan price of $2600 would be $338,000 every ten years or $33,800 per year. At the proposed increased Ecan price this would be $780,000 approx every ten years or $78,000 per annum. This is before any specialist fees or the price of any new or upgraded systems are included. If we assume a low end of $30,000 for a compliant system over 100 legacy systems this would be a cost of $3,000,000. These costs create a negative incentive for property owners not to upgrade systems or illegally update. It is almost inconceivable that SDC has yet to make provision for reticulated wastewater considering these costs alone before even looking at the environmental factors. Future Proofing Arthur`s Pass Village Given the growth in tourism, the large number of baches and homes used as short term stay accommodation and the growing popularity of the village as a permanent place to live it is essential that a fit for purpose wastewater system is put in place. Whether this is an upgrade of the system currently servicing Sunshine terrace and Mount Bealey Road to allow full treatment in the village or storage tanks to allow rail or trucking to Darfield to then be pumped into the Rolleston system or some combination of treatment and transportation. The SDC is already trucking waste from the large public toilets by the train station. Although it is a contentious issue in the village the shelved Stafford report leaves open the possibility of future development in the village on railway land in conjunction with local & central

	government & Iwi. While the need for reticulated wastewater exists now and is not contingent on further development taking place, that development would require an appropriate waste water system to be in place. Finally in the future ECAN rules are unlikely to become more relaxed and if anything will become more stringent with increased costs, the time to set in motion a long term wastewater plan for Arthur`s Pass is now and should be a priority as a core function of local government. I appreciate your time and would like the opportunity to present my thoughts and further evidence verbally.
Staff Recommendation	The submitters request for reticulated wastewater disposal in Arthurs Pass is acknowledged. A community wastewater system, connecting existing properties and conveying to a centralised treatment and disposal site is proposed in the Infrastructure Strategy for 2051. The proposal is subject to further investigation, consenting and increase in disposal area. Staff recommendation is to continue with these works as planned in the Infrastructure Strategy. Council may wish to consider adding investigation funding in the first 10 years of the LTP. If Council wish to do this, funding in the order of $40,000 could start the process.

Point Number	1409.1		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	As I resident of the Upper Selwyn Huts, I request the attached document be considered by Council. 1. Historical value The Mayor says in the Long Term Plan that "we're focussed on looking after what we already have" - how about you look after us! An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890 ’s at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose		

was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council unanimously determined that 'Hut licences and subsequent renewals are short term and ultimately for a finite period' . At its 13 March 2024 mee ng Council resolved to accept op on 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts. I request this historical significance be recognised and for the Selwyn Huts to be listed as an historical site on the District Plan and for the term for us being here to be extended to protect this history. 2. District wide rates I request that the Upper Selwyn Huts be put on DWR for Water and Sewer. The reasons being : (a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequant upgrade, the requirement we were told for being put on DWR. (b) We have already paid for the water upgrade. (c) We should not be discriminated against and should be treated like everyone else in the district. (d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We should also be added to the DWR for Sewer and Water like everyone else. (e) Towards25 LTP Document stated: "The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities." This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table. From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston. (f) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community." (g) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Sekwyn Huts Future Occupancy Strategy" report dated 04/03/2024. (h) The cost

	and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners. (i) Additionally we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Point Number	1410.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06		

	Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding
Point Number	1410.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre.

	Project cost: Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:** The current library building is unsuitable for current and future community needs and a new purpose building is needed. Libraries are a crucial part of any community They provide access to a wide variety of services and educational and leisure resources for everyone, regardless of gender, ethnicity and socio-economic status. It is one of the few remaining places in society where people can access free information and guidance. A modern, architecturally designed building will provide an attractive and comfortable space for current patrons and encourage new customers to explore the vast opportunities that libraries offer. A parent friendly, warm inviting atmosphere will attract children and whānau and help foster life-long readers and learners.
Staff Recommendation	The submission is acknowledged.
Point Number	1410.3

Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.

Point Number	1410.6
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	I would rather see rates spent on upgrading the Darfield pool to an enclosed pool that could be used year round.
Staff Recommendation	It is acknowledged that the submitter has selected to close the Sheffield Memorial Pool.
Point Number	1410.7
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	I am opposed to economic growth just for the sake of growth. Unfettered growth is unsustainable, deleterious to the environment and doesn't necessarily benefit locals.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	1410.8
Category	Activity > Low Nitrate Water Sources
Comments:	I am pleased that The Council is taking heed of rising levels of Nitrogen in drinking water sources. I strongly oppose having to use ratepayers' funds to source safer alternatives however. The increase in nitrogen laden water is directly linked to the dairy industry's excessive use of nitrogen fertiliser and it is that industry who should be paying for finding safe alternatives. It can take up to 10 years for the nitrogen to be detected in water sources, so it inevitable that there will be many more bores showing high levels of nitrogen in the near future. Council should be approaching Fonterra now for funds to clean up the mess that they helped create.

Staff Recommendation	The submitters support for investigation of low nitrate water sources with alternative funding mechanisms is acknowledged. Further investigations into the centralised sources of low nitrate water is budgeted in the LTP in years 1 to 4. Staff recommendation is to proceed with these investigations as budgeted in the LTP.
Point Number	1410.9
Category	Activity > Walking and cycling improvements
Comments:	WHITECLIFFS' WALK/CYCLEWAY After 10 years of lobbying, the Whitecliffs community finally got a walk/cycleway. Unfortunately, it was not sealed properly and is constantly covered with weeds . At the moment it is impossible for 2 people to walk abreast because the width of the path is so diminished by weeds. I believe the cost of the project was about $500,000 - what a waste of money if it is going to be allowed to deteriorate. Please seal the surface properly so that the facility can be used for the purpose it was intended. If it is left unsealed the weeds will simply break down the surface and any further repairs will be more costly. Also, the community took it upon itself to build a path away from the most dangerous part of Whitecliffs Road.This was with the understanding that once Council built the rest of the walk/cycleway, the community built section would be incorporated into the Council built part, to create a contiguous, sealed surface. This has yet to happen and it seems that once the project was completed there was no follow up. (Photos attached)
Staff Recommendation	Submission is acknowledged by Council. The operational delivery team has been made aware of the issues.

Submitter Number:	1411	**Submitter:**	David Miller for Pest Free Banks Peninsula
Organisation:	Pest Free Banks Peninsula		
Point Number	1411.3		

Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	Please read our attached submission. 01 May 2024 Elected Representatives Selwyn District Council Dear Councillors Long Term Plan 2024-2034 Thank you for the opportunity to participate in the conversation about the Selwyn District Council Long Term Plan 2024-2034. It is my privilege to make this submission on behalf of the Project Management Group of Pest Free Banks Peninsula (PFBP). I wish to begin by thanking SDC councillors and staff who are directly involved in the management and oversight of PFBP, including Lydia Gliddon on the Project Oversight Group, and Denise Ford on the Project Management Group: they and other SDC colleagues continue to make a very positive contribution to Pest Free and we are extremely appreciative of their work. PFBP staff and volunteers are undertaking removal of predators within the Selwyn district with overwhelming support from local residents – a complete exemplar of our 'community led, agency supported' methodology. Our connecting local residents to nature and the outside world is demonstrated by our received permission to trap on private land, as well as with the committed volunteers that check traps on a weekly basis and the feedback we receive from them about the biodiversity increases they are witnessing. Within Selwyn, PFBP support Te Taumutu Runanga with on the ground help (such as weeding and pest control), planning (reviewing Muriwai environmental documentation) and employment of runanga members (such as summer students). PFBP rangers and staff have attended and presented at several trapping evening sessions throughout Selwyn to help sow the seeds for a predator free Selwyn. PFBP thank SDC for the previous Selwyn Natural Environment Fund (SNEF) funding in which control devices are installed around Taumutu to prevent the decline of native biodiversity. PFBP would welcome having this contestable fund enlarged so that others could access and unlock funding specific to increasing biodiversity within SDC. One anomaly in the published SDC LTP 2024-2034 seems to be that although it contains a goal that "Waikirikiri/Selwyn's whenua/land, wai/water, and kātaoka o te taiao/ biodiversity are protected and enhanced", the Plan also mentions that climate change is one of the most pressing issues worldwide, the Plan seems to say very little about climate change mitigation and adaptation. There appear to be no environmental policies or any significant environmental directions included in the Plan. This is in contrast to the feedback we are getting from locals in Selwyn who want to launch "Predator Free Selwyn" and who are already engaged in environmental projects including trapping and restoration. Further, planning has started on how best to increase and consolidate the biodiversity gains on Banks

	Peninsula and link BP to the Alps between the Rakaia and the Ashley/Rakahura Rivers. This is the Towards Pest Free Waitaha initiative of which the Pest Free Project Oversight Group is facilitating the planning. The success of PFBP is critical to this extended project. Substantial work is already under way across Selwyn, the City and Waimakariri linking and supporting the various community groups and agencies already undertaking pest control. It is our contention that the Council needs to acknowledge the significant work being done within its boundaries as well as alongside it and aim to work in partnership with others to protect these gains going forward. In sum, PFBP would argue that the LTP for the coming ten years needs to make some substantive commitments to environmental protection, including increasing the amount available for biodiversity enhancements, including but not limited to predator control. I would like to speak to this submission. With grateful thanks and best wishes Dr David Miller Pest Free Banks Peninsula PMG Chai
Staff Recommendation	Council recognises the significant efforts of the Pest Free Banks Peninsula project to control pest predators across the peninsula, along Kaitorete, and around Ngati Moki and Muriwai. The project is an excellent example of what can be achieved across a wide geographical area by a committed group of stakeholders. Council also acknowledges the significant efforts made by our community and the neighboring districts in the Aotearoa Pest Free 2050 project. It is vital that Council has suitable funding and capacity available to support such initiatives, including the proposed Predator Free Selwyn project as part of Pest Free Waitaha Canterbury. It is an important that Council shows support for our community in this meaningful initiative, and that projects are well planned and coordinated to get optimal outcomes.

Submitter Number:	1412	**Submitter:**	Alastair Barnett for Lakeside Memorial Hall Inc Committee
Organisation:	Lakeside Memorial Hall Inc Committee		
Point Number	1412.3		

Category	Activity > Planning Further Community Facilities
Comments:	To: Selwyn District Council 2 Norman Kirk Drive P O Box 90 ROLLESTON 7643 Submission on: Long Term Plan 2024-34 Date: 2 May 2024 Submission by: Lakeside Memorial Hall Incorporated Committee Alastair Barnett (Chairperson) Ph 0274889873 E carey.barnett@xtra.co.nz Address for service: Lakeside Memorial Hall Incorporated Committee c/- Alastair Barnett Lakeside R D 3 LEESTON 7683 Ph 0274889873 E carey.barnett@xtra.co.nz 2 Lakeside Memorial Hall Incorporated SUBMISSION TO SELWYN DISTRICT COUNCIL LONG TERM PLAN CONSULTATION DOCUMENT 2024-2034 1. INTRODUCTION 1.1 The Lakeside Memorial Hall Incorporated Committee (the Committee) welcomes the opportunity to submit to the Selwyn District Council (SDC) on its Long Term Plan Consultation Document 2024-2034. 1.2 The Committee has had an ongoing interest in the hall since its original build in 1917. Although the building was replaced as a result of the 2010/11 Canterbury Earthquakes and is an asset of the SDC, the Committee continues on as a very important 'cog in the facility's wheel'; undertaking in-kind working bees and assisting in the maintenance and enhancement of the facility as it forms a much loved 'meeting house' and facility for the Lakeside and wider Ellesmere community. 1.3 Lakeside residents have previously been well served by Council staff and Councillors recognising the needs of this community and the facility itself. The Committee genuinely appreciates the

willingness of SDC to consider any suggested improvements for the hall and surrounds in the past and going forward.

1.4 The Committee requests the opportunity to discuss this submission with the Council during the hearing process.

2. SUBMISSION

The Issue

2.1 Since the commissioning of the new hall it has been well patronised and revered by those who attend functions there. The design, location and functionality of the building lends itself to a wide variety of events and has proven to be the success the Committee envisaged when first considering pursuing the rebuild with the Council.

2.2 For some time though there has been a continuing issue with protecting event attendees from inclement weather conditions when accessing the courtyard, restroom, bar and storage areas. The restrooms, bar and storage areas are not directly accessible from the main hall area but only via the outdoor courtyard area, which, while covered in parts, is not substantially weather proof. While the courtyard is aesthetically attractive in clear conditions it does tend to be less appealing during rain or storm events which can occur from time to time.

2.3 Typical experiences during these conditions can include:

- Cold and wet drafts when the main hall doors open and close, along with wet wooden flooring creating slipping and muddy appearance;
- Patrons becoming wet and cold while standing or moving through the courtyard area;
- Slipping on the wet courtyard bricks and/or entry area into the main hall due to rain;
- Patrons becoming wet when queuing at the bar area or standing near the main hall doorway while inside the hall area; and
- Hall items such as chairs and tables becoming wet during the event pack in/up phase as they are transported to or from the storage area – causing moulding to occur while stored. Consequently this can reduce the lifetime and/or appearance of these items.

Potential Solutions

2.4 The Committee has been pursuing for some time options to help minimise the weather effects in the courtyard and is working to price suitable options which may include, but are not limited to, the following solutions suggested below:

- Drop down see through awnings/walls to temporarily enclose courtyard roofed areas;
- Removable shade sail/s;
- Retractable roof;

	□ Installation of a double door to prevent patrons inside the main hall becoming wet or drafted when main hall doors are opened. 2.5 The Committee is currently investigating and pricing these options but is yet to receive any specific cost estimates. While some improvement, renewal and maintenance works appear to be programmed in the SDC 'Community Facilities Activity Management Plan 2024, Section 11: Community Centres and Halls' document, the amounts forecast do not appear to specifically mention addressing the issues or solutions set out above. To this accord the Committee has deemed it appropriate to submit on the Long Term Plan and request budgeted funding be allocated over the term of this plan (2024-34). Recommendation 2.6 The Committee is happy to work with the SDC to rectify the issues set out above and work through the potential solution/s. It is also noted that there may be other independent and small funding streams available that could assist in meeting the overall cost of any future agreed solutions. To this accord the Committee proposes the following recommendation: 'That up to $100,000 is allocated for courtyard weather protection upgrading at Lakeside Soldiers Memorial Hall in the Selwyn District Council Long Term Plan 2024-34.' The Committee thanks the Selwyn District Council for considering this submission
Staff Recommendation	Council acknowledges the various proposed facility improvement projects suggested for Lakeside Memorial Community Hall. Staff are aware that there is in place a cyclical asset maintenance, improvement and renewal programme. In addition, provision has been made for facility improvements of an accessible carpark and a viewing platform.

Submitter Number:	1413	**Submitter:**	Bill Martin for Summit Road Society
Organisation:	Summit Road Society		
Point Number	1413.3		

Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	Kia ora Koutou, we were invited to make a submission, as part of the LTP process, regarding a Strategic Community Partnership. Please see the attached documents for our submission. We think the Society has demonstrated that it can deliver priorities and activities that align with the core functions of Council and are key to Council achieving Long Term Plan outcomes. Similarly, we think we have demonstrated that our activity generally relates to activities that the public might reasonably expect the Council to deliver. Improving access to Omahu Bush In addition to its own ecological values Omahu Bush also provides an important connection to other areas of reserve in the Port Hills. These include The Crater Rim Walkway, Living Springs and Otahuna Reserve. Opening up access to Omahu Reserve for the people of the Selwyn District via the Tai Tapu Valley would make a valuable addition to the recreational opportunities for residents. For some time, we have been investigating how to improve public access to Omahu Bush. This has included looking at a range of options: • An additional public carpark on the Summit Road • Increasing the track network in the reserve • Improving public access for Selwyn residents A strategic partnership with the Selwyn District would be an opportunity to explore together this and other ways of improving recreational access to the Port Hills for the people of Selwyn District. The population of Selwyn District increasing significantly faster than the national average (Infometrics, n.d.), this would provide residents with access to a reserve with outstanding ecological value. Aligning funding to population growth The Council has provided an annual grant of approximately $2200 to the Society since the 1990s. At that time, it matched a grant paid to the Summit Road Protection Authority, which was based on the population of the district, around 2000 residents at 10c per resident. The population of Selwyn has grown significantly since then to 80,000. By proportion alone, the grant should have increased over that time to $8,000 per annum (ignoring inflation). As noted below, the activities (and associated costs) of the Society have also grown. Our key activities and outcomes 1. Pest and predator control in Omahu Bush Assisted by a dedicated team of volunteers, we have a very intensive predator trapping programme at Omahu Bush and we are progressively expanding the trapping network into Gibraltar Rock and the grazing block. We have now removed over 2100 predators from Omahu Bush. 3 Browsing by deer and pigs previously caused considerable damage to Omahu Bush. However, trapping reduced numbers, and this has been followed by our deer fencing project (7.5 km of fence completed in 2022) around the reserve which was recently completed. Following its completion, we have utilised skilled

contractors to cull the remaining pigs and deer within the reserve. Several residual deer remain within the reserve but will be progressively removed over the next year. The regrowth in the reserve is remarkable – something we hope Selwyn residents will be able to appreciate once we succeed with increased opportunities for access. 2. Track maintenance and weed control A further team of volunteers works weekly to maintain the track network and to remove weeds from the reserve. Weed encroachment from neighbouring properties means that this is a constant and costly battle. The cost of maintenance, weed, pest and predator control has been $16,000 a year over the last three years. Volunteer hours for the Omahu Bush project were 1570 in 2023, equivalent to $40,820 per annum at the living wage. 3. Pest Free Banks Peninsula While we have nearly eliminated feral pigs and deer in Omahu, we would draw the Council's attention to the wider issue of feral pigs and deer across the Southern Port Hills and wider Peninsula. The Society supports an ongoing landowner led/agency supported feral pig control operation on Banks Peninsula and on the Port Hills. Feral browser control in our forests is not only essential to protect native biodiversity but is also a climate response. Forest and Bird have estimated that controlling feral browsing pests to the lowest possible levels across the country would increase the carbon sequestration of native ecosystems by 8.4 million tonnes of CO2per year, which is equivalent to nearly 15% of New Zealand's 2018 net greenhouse gas emissions. We have also been working closely with the Christchurch City Council, the Selwyn District Council and others on the wider Pest Free Banks Peninsula programme. We would like to acknowledge and thank the Council for their support and involvement with Pest Free Banks Peninsula. This programme is achieving transformational change to eradicate pests and predators from the Port Hills and the Peninsula by 2050. 4 The programme has already achieved eradication of feral goats on Banks Peninsula (Sept 2023). Feral pig zonal elimination is about to be trialled on a portion of Banks Peninsula in an endeavour to prevent their spread. This work carries risks and covers a wide variety of different properties. Much of the work is very specialized and involves risks and liabilities which means it primarily needs to be undertaken by experienced contractors. Funding this into the future is a challenge. The programme has also eliminated hedgehogs from a section of Kaitōrete, which is a New Zealand first on the mainland. Similarly, we are excited about the potential of Predator Free Selwyn with keen community groups across the region leading the charge – however they need support and funding from the Council. This annual cost of feral pig control on Banks Peninsula is: $250,000+ Volunteer hours for the Omahu Bush perimeter fence project and ungulate removal within Omahu were 2450 in 2022 and 175 in 2023. 4. Predator Free Port Hills and Predator Free Tai Tapu Our community project Predator Free Port Hills continues to grow. This programme provides the buffer between the City and the Port Hills proper. We now have 1700 households trapping in our programme. Our goal is 4000

	households. We run regular trapping workshops to provide advice and support to backyard trappers and engage with the public through stalls, community events and social media. Our programme relies on local connections, neighbours talking to neighbours. We continue to support the Predator Free Tai Tapu group, which is also growing rapidly. At the start of 2021 there were four households in Tai Tapu signed up, that number has now risen to 61. Tai Tapu includes the area from Halswell to Gebbies Pass. It includes lifestyle blocks, farms and the small township of Tai Tapu. This annual cost of the wider Predator Free Port Hills programme is: $80,000. Volunteer hours for this project were 7000 in 2023. 5 5. Te Kākahu Kahukura The Society is also working with a number of organisations including the Selwyn District Council to progress the Te Kākahu Kahukura project. Led by the Banks Peninsula Conservation Trust, this project aims to restore 1000 ha of broadleavedpodocarp forest to the southern end of the Port Hills. Much of the southern Port Hills area is within the Selwyn District. Te Kākahu Kahukura is a landscape scale project that the Society is part of. TKK seeks to restore a thriving and resilient indigenous forest to the southern Port Hills. Public reserves such as Omahu Bush, Ahuriri Scenic Reserve and Kennedys Bush contain some of the finest examples of native bush close to the population centres of Lincoln and Rolleston. Concluding comments We believe our activities and plans within the Omahu and Gibraltar Rock Reserves and the wider Port Hills, deserve recognition by the SDC both in terms of a Strategic Partnership, and also by way of increased funding to $20,000 per annum. If hearings are held, we would like to speak to our submission
Staff Recommendation	This request will be considered by Council within the Long Term Plan Deliberations. Strategic Partnerships are part of the Council's Community Funding Programme and any arrangements with groups are generally made for three years, subject to performance and delivery. A submission to Council’s Long-Term Plan process, plus strong alignment with Council’s strategic direction and role is required for consideration for this fund. The activities funded are generally activities that, should they not be delivered, might reasonably be expected to be the responsibility of Council or impact an aspect of the District's wellbeing.

Submitter Number:	1414	**Submitter:**	Rachel Skelton for Rolleston College
Organisation:	Rolleston College		
Point Number	1414.1		
Category	Activity > Planning Further Community Facilities		
Comments:	Our submission is based on the development of a partnership between Rolleston College and the Selwyn district council in the form of a shared performing Arts facility. Rolleston College supports community groups and community use of facilities Rolleston College is deeply engaged in supporting local arts with partnerships with CentreStage Rolleston, Rotary Ball, Aurora, Play Drama, both Community Choirs, the local primary schools, Swarm Studios. We have witnessed first-hand the transformative power of the arts enriching lives, fostering community cohesion and driving economic growth. This submission will outline the benefits of arts in the community and will advocate for a partnership with the Selwyn District Council. The arts serve as a vital platform for self-expression and creativity, allowing individuals of all ages and background to explore and share their unique perspectives. Whether through visual arts, music, theatre and dance, encourages personal growth, self-discovery, and empathy An outlet for expression in a structured way to support prosocial behaviour community connections and the sense of belonging and ownership within Selwyn. This initiative would support the work of the Selwyn Youth Hub in the work that is being done in this space. The arts and cultural activities play a significant role in nurturing the next generation of creative thinkers and problem solvers and as this community expands we wish to foster our creatives and prepare them for success in an increasingly complex and interconnected world. Our values of Building Communities and Transforming Futures directly align with the Selwyn District Council's principles of promoting wellbeing, sound business practice, prudent stewardship, recognition of diversity, and interest in future communities. We want a shared use facility to be a beacon for the arts in Selwyn and an example to other growing communities on how we can best use community partnerships to benefit the whole community. With the second campus stage two in the pipeline, the school sees an opportunity to partner with the Selwyn District Council to build a state-of-the-art community facility where the school could invite arts groups to use the spaces. This partnership may also hasten the Ministry of Education's commitment to this construction stage. We think it (a performing arts centre) would be of benefit to the school, the community and the council.		

	There are existing examples of this kind of partnership already functioning in other areas e.g. TAPAC https://www.tapac.org.nz/about/history which is housed on the grounds of Western Springs College. We see a shared community space where performing artists could rehearse, perform, learn and connect with other like-minded creatives as being a desirable community facility. TAPAC's original mandate was to offer affordable, accessible and inclusive performing arts facilities and programmes to the community. The arts and creative sector represents about 3.3 percent of New Zealand's economy and this contribution has grown by about one-third since 2000. In the year to March 2021, the sector generated $10.851 billion. Supporting this area of our community by working in partnership would be a worthy investment.
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events.

Point Number	1415.1		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	"Waikirikiri Selwyn is a district of opportunity where families thrive. We are a great place to bring up children and to grow old." The above is the opening statement by the Mayor Sam Broughton in the LTP consultation document. Maybe the proviso that this excludes the Upper Selwyn Huts community needs to be added as many residents are elderly and there are also several families. I would also like to know where our MP Nicola Grigg stands on the intention of SDC to bankrupt and make homeless many residents of the Upper Selwyn Huts. Her opinion regarding the situation at the Lower Huts and Greenpark Huts would also be of interest.		
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future		

	Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Hut

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22

	Funding: Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:** This is my personal vote and does not necessarily reflect RSFDG.
Staff Recommendation	The submission is acknowledged.

Comments:	RSFDG Request for construction of a multisport capable Squash focused sport facility in Rolleston 1 of 18 Have Your Say Selwyn District Council – Long-term Plan 2024-2034 Submitter: Rolleston Squash Facility Development Group (RSFDG) Members: Lester McKee, Paul Lancaster, Christina Cron, Al Cron, Paul Taylor, Alina Boyce, Kevin Gilbert, Elke Dijkstra, Oliver Johnston, Valentyna Sylevych, and Jody Allen Correspondence: Lester McKee Address: PERSONAL DETAILS WITHHELD Regarding our request for the construction of a multisport capable Squash focused sports facility in Rolleston. Dear Selwyn District Council Members, This submission is to show solidarity and support for the Squash New Zealand-Squash Canterbury submission to request financial support for construction of a multisport capable Squash focused sports facility in Rolleston. Specifically, funding to undertake a: 1. Feasibility Study and Business Case in 2025 ($60,000), 2. Concept Design in 2026 ($40,000), 3. Detailed Design and Consenting in 2027 ($250,000), and 4. Construction in 2028 ($2,500,000) We recognize this is no small request or undertaking and realize that to complete this project, funding partnerships will likely be needed. History and intent The Rolleston Squash Facility Development Group (RSFDG) is a group of competitive and recreational Squash players who live in or near Rolleston who have an interest in building a multisport capable Squash focused sports facility in Rolleston. We have had many informal discussions over the years but in January, 2023, upon learning about the Selwyn District Council Long-Term Plan, we began meeting formally every 2 weeks to discuss the need for a Squash focused sports facility in Rolleston. Ideas we have been bouncing around include the need for a strong youth development focus, facility location options, and various facility configurations. An early outcome of these discussions was to reach out to Squash Canterbury to get their input and support. Subsequently Squash Canterbury reached out to Squash New Zealand and together they decided to make a formal and thorough submission but asked RSFDG to provide local level input. Ideas then began flowing via phone calls and emails and drafts were shared. Their latest submission builds upon the previous submissions made by Squash Canterbury in 2013 and then again in 2018 (submission 100301). RSFDG Request for construction of a multisport capable Squash focused sport facility in Rolleston 2 of 18 Our RSFDG submission

aims to do three things: It 1. Indicates the local energy and passion we have for building a Rolleston Squash facility, 2. Registers the RSFDG endorsement for the Squash NZ -Squash Canterbury submission, 3. Provides the results of petition we conducted of the local community to provide an indication of wider interest. So far we have received 336 signatures and 35 personal stories. Who we are We are a group of passionate Squash players who have been playing Squash from between <1 year to >40 years. Our love for the sport has been passed down to our children, who also play and wish to play more. However, our community in Rolleston lacks an accessible local Squash facility. This means we have to travel considerable distances to enjoy our favorite sport increasing the time commitment needed and thus diminishing the frequency of play and enjoyment, particularly of our kids - a challenge that many other local families face as well. Squash is not just a game. It's an excellent way of promoting physical fitness and social interaction within the community. Benefits to Rolleston A benefit of Squash, being an indoor game, is that it is played year-round. Squash courts can be designed with movable walls allowing the same space to be converted for multi-use such as yoga, spinning, table tennis, pickleball, to name a few. A local Squash club would expand Selwyn District's capacity for sport and recreation providing great additional benefits directly to our community. The establishment of a new Squash club will not only cater for the needs of existing players like ourselves and our children but will also encourage more youth and adults in Rolleston to take up this healthy and enjoyable sport. In addition, a local squash facility that many people (children and adults) can walk or ride to, rather than driving, would help Selwyn with its commitment towards the Zero Carbon Act and its adopted formal Climate Change Policy targeting net zero greenhouse gas emissions by 2050. The larger opportunity With a rapidly growing population, a number of existing primary schools, and plans to expand the high school to be the largest in the country, there is an obvious potential for a large and thriving youth Squash development program that would make high use of a world class Squash and multisport facility. Coupled with the sports science expertise of Lincoln University, such a facility would likely produce national and international champions. With a recent decision to include Squash in the 2028 Olympics, our recent success at the Commonwealth Games, New Zealanders Paul Coll (Greymouth and Christchurch club member) currently ranked number 2 (best ranking number 1) and Joelle King currently ranked number 16 in the world (best ranking number 4), Squash is rising in profile. Identified need As shown in the 2022 Squash New Zealand Facilities Strategy, right now Selwyn District is underserved by Squash facilities. It identifies Selwyn generally and Rolleston particularly as one of its top national priorities for building new facilities. Based on population assessment of RSFDG Request for construction of a multisport capable Squash focused sport facility in Rolleston 3 of 18 Squash take up in New Zealand and population projections, Squash New Zealand and

Squash Canterbury estimate the current need to be in excess of six (6) courts now in Rolleston alone but that this would likely expand to ten (10) courts by 2048. In an effort to further gauge community interest, RSFDG conducted an informal petition using an on-line petition platform called Change.org (Appendix 1). In the 14 days up to April 27th, 2024 we received 336 signatures. The details of the results can be found in Appendix 2. Appendix 3 contains a list of comments provided by some of the petition signees illustrating the passion of many who signed. Here are some poignant personal stories from people who live in Rolleston: Farin Nisa "I like to play squash and it will be great if the facility is within our area" Janel Hau "I would love to do this sport again locally" Haydn Fitzgerald "I would love to use local squash courts rather than travelling, and this would lead to me playing more." Vicky Kenyon "My son in-law plays squash and lives in Rolleston and now our young grandson is showing signs of taking after his father. It would be great to have a squash facility for them to enjoy close to home, instead of traveling many kilometers away." Amberlee Olding "I travel to play weekly, would love to play local people locally!" Kate Fox "The Rolleston community would benefit greatly from squash courts! Already a lot of players from out in Rolleston who commute into Chch, so this would be awesome" Barry Gardiner "I used to work at SDC and could not play my favorite sport in Rolleston due to the lack of courts. Squash is a brilliant game and kids love playing it. I hope that this petition is viewed favorably as Rolleston desperately needs squash courts." Stephen Gardner “Our family has just shifted out to Rolleston, like many others over the past few years. It would be great if there was a facility out here as our kids will be keen to play in a few years’ time. I play competitively and it’s a big drive into Christchurch to play, not to mention the carbon footprint associated with it. A modern facility would be a great community asset!" Jennifer Barnden "Husband and I play squash, having to travel out of Rolleston weekly. Having a squash court in Rolleston would be awesome" Rachel McVie "My husband is a professional squash coach, and this would be ideal for us. My kids and I have all played, and would play way more often if we had a local club. We currently don’t play as it’s a hassle to go in to town to play." Although quite a few of the signatories did not indicate any place of residence, we still interpret the results as another useful indicator of the unquestionable need for a Squash facility in Rolleston. As a group we intend to keep building awareness of squash within the District (with Squash Canterbury support) and continue to learn more about the demand demographics. For example, we are presently working with Squash Canterbury to bring a portable squash wall to schools in the Area to allow the youth to try out the game. And we intend to proactively engage the local iwi in the consultation process and for youth development and inclusion advice. RSFDG Request for construction of a multisport capable Squash focused sport facility in Rolleston 4 of 18 Closing thoughts Squash is a healthy community building sport that offers inclusion of people of all ages, skills, and cultures. This

	last aspect is particularly pertinent as Rolleston and Selwyn continues to attract people of wide cultural identity. The residents of Rolleston and the nearby rural districts would gain benefits including friendship, health and fitness, and the bonus potential to produce world class athletes from our massive youth population (46%<20 years old; 2018 Census). Our petition and the needs analysis done by Squash New Zealand provide strong supporting evidence that it's time we had easy access to this wonderful sport right here in Rolleston. That is why we endorse the submission by Squash NZ-Squash Canterbury that requests financial support for construction of a multisport capable Squash focused facility in Rolleston. We look forward to the opportunity to work in coalition with staff at Selwyn District Council, Squash NZ, Squash Canterbury, local iwi, Canterbury Sport, and other members of the local community to bring this proposal to fruition. Thank you for making possible this opportunity to hear our voice and for your time and consideration. Appendix 1. Petition conducted by the Rolleston Squash Facility Development Group (RSFDG) 4/28/24, 10:46 AM Petition · Establish an Accessible Squash Facility in Rolleston - Rolleston, New Zealand · Change.org RSFDG Request for construction of a multisport capable Squash focused sport facility in Rolleston 5 of 18 Establish an Accessible Squash Facility in Rolleston Started 13 April 2024 336 500 Signatures Next goal Why this petition matters Started by Alina Boyce We are a group of passionate Squash players, ranging from novices with just a year's experience to seasoned veterans who have been playing for 40 years. Our love for the sport has been passed down to our children, who also play and wish to play more. However, our community in Rolleston lacks an accessible Squash facility. This means we have to travel considerable distances to enjoy our favorite sport, diminishing the frequency of play and enjoyment - particularly for our kids. This challenge is not unique to us; many other local families face the same issue. The lack of local facilities not only hampers participation but also inhibits the growth of this wonderful sport within our community. Accordingly, we call upon Selwyn District Council to establish a Squash facility in Rolleston. This would significantly increase local participation rates among both adults and children alike. It’s pretty well accepted and according to the world health organization, increased physical activity usually leads to improved health outcomes. Join us in urging those with power and influence to build a Squash Facility in Rolleston – let's make Squash more accessible for everyone! Please sign this petition today!
Staff Recommendation	Staff recommend that the submission is acknowledged but the funding requested is not approved. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input, Squash being one of them. Staff note that existing facility utilisation has not been outlined in the submission. Staff recommend that this

	facility be included as part of a wider community facility funding and planning project.

Submitter Number:	1417	**Submitter:**	Wayne Hutchinson for Regimental Association Incorporated
Organisation:	Regimental Association Incorporated		
Point Number	1417.2		
Category	Activity > Planning Further Community Facilities		
Comments:	The Regimental Association does not want to do a formal presentation to Council at this stage, but will be available to take questions at any hearing. The Submission is as follows. The Regimental Association Inc submits its proposal for a military museum in Rolleston to be included in the Long-Term Plan. The submission, titled Project Upham, envisages a functional tourist attraction. The Museum needs suitable stakeholders to advance planning and provide an enduring relationship with the district. The aim of this submission is to obtain your agreement to include in the Charles Upham Centre in the District Long Term Plan. We provide four documents in support of the submission. We advance the view that the Charles Upham Centre will be a world-class tourist experience of similar standing to the National Army Museum in Waiouru. The Regimental Association collection stretches as far back as the Boer war at the start of the 19th Century. Having permission to use the Charles Upham name, we will provide an instant pillar of international and national recognition and a point of difference. The Centre will bring people to Rolleston with the economic benefits to Selwyn. In our view, the Centre must be a viable commercial proposition.		

	To build the collection into an eclectic experience requires a detailed feasibility study as to location, funding, concept plans and Project Charter. We are asking the Council: • To participation in a joint feasibility study, • To gift a suitable site in the Rolleston area, with easy access from State Highway 1, standard services (parking, water, connectivity etc) or the potential for these to be provided. We respectfully submit that the Charles Upham Centre in Rolleston be included in the SDC Long Term Plan 2024 – 2035.
Staff Recommendation	Selwyn District Council acknowledges the importance of promoting and protecting heritage as it improves community wellbeing by connecting people and building the identity of Waikirikiri Selwyn. The Selwyn Strategic Heritage Plan 2023-2027 ensures there is a focus on improving support for heritage activities and supporting the work of local history groups and residents who are strongly motivated to collect, protect and enhance local place-based heritage. Council has two community heritage funds available for this purpose and a staff response related to community grants is being prepared for presentation as part of deliberations. Selwyn Council also intends, as noted in the report to Council on 3 April 2024, that a piece of work be undertaken in-house to understand benefit, cost and identify potential funders for such to be undertaken by Council staff as workload allows in next 18 months. If the submitter is prepared to contribute towards the completion of this feasibility study, that might allow the study to be completed sooner. Council is intending to undertake work later in the calendar year that explores tools that Council has available that it might want to consider as its contribution to community group efforts related to facilities. Tools might include land lease consideration to an external party.

Point Number	1418.2		

Category	Activity > Planning Further Community Facilities
Comments:	The arts and creative sector represents about 3.3 percent of New Zealand's economy and this contribution has grown by about one-third since 2000. In the year to March 2021, the sector generated $10.851 billion. Supporting this area of our community by working in partnership would be a worthy investment *(Source: Ministry for Culture & Heritage Manatū Toanga NZ, 2002).* Our submission advocates for the creation of a partnership between Rolleston College and the Selwyn District Council to create and provide a shared Performing Arts facility in Rolleston for use by all Selwyn community members. Currently, Rolleston College supports community groups and community use of performing arts facilities throughout the year. This includes evenings, weekends and throughout each school holiday. As an education hub, Rolleston College is deeply committed and engaged in supporting local arts and has current and ongoing partnerships with CentreStage Rolleston, Rotary (annual ball), Aurora Dance Studio, Play! Drama Workshops, Swarm Studios Selwyn, both Community Choirs, and the local primary schools use our venue for their musical productions and prizegivings. Through these associations, we have witnessed first-hand the transformative power of the arts enriching lives, fostering community cohesion and driving economic growth. The arts serve as a vital platform for self-expression and creativity, allowing individuals of all ages and backgrounds to explore and share their unique perspectives. Whether through visual arts, music, theatre or dance, encourages personal growth, self-discovery, and empathy we wish to support the growth of creatives in the community through this submission. This submission will outline the benefits of arts in the community and proposes a partnership with the Selwyn District Council as part of the long term plan. As educators, we know that an outlet for expression in a structured way supports prosocial behaviour community connections and a sense of belonging and ownership. The committed educators and community members have been a part building belonging and identity since 2017 and we have become one of the beating hearts of the community with a desire for equitable outcomes for all. As we have grown we have seen the need within Rolleston, and the wider Selwyn community for a sense of belonging in this space to align with the offerings in sport and recreational resources within the community. This initiative would also support the work of the Selwyn Youth Hub in the work that is being done to support belonging, wellbeing and prosocial behaviour. We are currently a school of 1800, with a growing roll expected to be 2500 by 2030. The arts and cultural activities play a significant role in nurturing the next generation of creative thinkers and problem solvers, and as this community expands we wish to foster our creatives and prepare them for success in an increasingly complex and interconnected world. Our values of Develop Self, Building Communities and

Transforming Futures align with the Selwyn District Council's principles of promoting wellbeing, sound business practice, prudent stewardship, recognition of diversity, and interest in future communities. We believe a shared-use facility for the arts in Selwyn would be a beacon to inspire and set an example to other growing communities on how we can best use community partnerships to benefit the whole community.
With the second campus stage two in the pipeline, the school sees an opportunity to partner with the Selwyn District Council to build a state-of-the-art community facility where the school could invite arts groups to use the spaces. This partnership may also hasten the Ministry of Education's commitment to this construction stage.
There are existing examples of this kind of successful partnership already functioning in other areas around New Zealand, such as:

- The Auckland Performing Arts Centre (TAPAC)*https://www.tapac.org.nz/about/history*

  This is housed on the grounds of Western Springs College and is a shared community space where performing artists can rehearse, perform, learn and connect with other like-minded creatives This would be a desirable community facility within Selwyn and perform a similar function for school and community use. TAPAC's original mandate was to offer affordable, accessible and inclusive performing arts facilities and programmes to the community. We see this as aligning with the SDC's principles as outlined above.

- The Aurora Centre*https://www.burnside.school.nz/explore-burnside/our-facilities/*

  The well-known Aurora Centre located onsite at Burnside High School, Christchurch since 2001. This facility is used by the school during the day as a teaching space for performing arts. During the evenings and weekends, it is a community facility for local, national and international performances and a home for local church groups. A space like this in Selwyn would enable us to host events similar to RockQuest, visiting ballet companies and performance artists to be easily accessed by Selwyn residents, negating the need to travel 30+ kilometres into central Christchurch for similar events.

- Elmwood Auditorium*https://www.elmwoodplayers.org.nz/75th-anniversary.html*
  This theatre space seats 142 people for live theatre and music performances. The Elmwood Players had a historic hall on this site and in the mid-1990's it was demolished to make way for an auditorium, which is shared with Elmwood Normal School. This was also born out of the need within the

community and through passionate partnerships in the arts that have continued over many years. This facility is an asset that has allowed the arts to flourish and continues to be a beacon for the arts within Christchurch. We have the opportunity to create a jewel in the crown for the Selwyn community in the same way that the Elmwood Auditorium joint project has done.

With this proposed shared facility, we have the opportunity to address a key barrier for those accessing the arts in Selwyn. The findings of a "*New Zealanders and the Arts Young Persons Survey: Attitudes, attendance and participation"* report states that 40% of people surveyed would attend arts events if travel was not a barrier*(Source: New Zealanders and the Arts Ko Aotearoa me ōna toi 2020, Creative New Zealand Toi Aotearoa; p19)*. This is yet another compelling reason demonstrating the need in the region where access due to the physical geography of the area is something that needs addressing. Furthermore, the above report notes that the when the public were asked " should the arts receive public funding, 62% agreed this was up 13% since 2014" *(Source: https://creativenz.govt.nz/Development-and-resources/New-Zealanders-and-the-arts----Ko-Aotearoa-me-ona-Toi).* Therefore the trend is growing to support arts in the same manner that the council has supported sporting facilities in the region as part of the development and rebuild around Selwyn.

We are requesting a meeting with the Selwyn District Council to discuss our submission and a chance to speak at a hearing.

He kakano i ruia mai i rangiatea; The seed shall not be lost he whakataukī no Horoeka Haemata | Rolleston College

Staff Recommendation

The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.

Comments:	Supporting Letter attached in respect of proposed infrastructure plans, specifically connected to the roading upgrades around West Rolleston Primary School April 8, 2024 Selwyn District Council Long Term Plan Submissions Subject: Strong Support for Capex Roading Projects to Enhance Student Safety and Wellbeing Dear Selwyn District Council, On behalf of West Rolleston Primary School, I am writing to express our strongest support for the following Capex Roading Projects included in the 2024-2034 Long Term Plan: ● Dunns Crossing & Burnham School Road Traffic Signals (SNP) ● School Safety Infrastructure Upgrades ● Speed Management Plan Implementation We believe these critical infrastructure improvements are essential for ensuring the safety and wellbeing of our students as they travel to and from school. The current traffic flow at Dunns Crossing and Burnham School Road presents a significant safety concern for children, especially during peak hours. The installation of traffic signals would greatly improve pedestrian crossing opportunities and reduce the risk of accidents. Furthermore, school safety infrastructure upgrades, such as improved signage, crossings, and footpaths, would create a safer environment for students navigating the surrounding roads. Additionally, a comprehensive speed management plan would encourage responsible driving near schools, further mitigating potential dangers. Investing in these projects aligns perfectly with the Council's goals of promoting active transport and enhancing community wellbeing. Improved safety infrastructure would encourage students and families to walk or cycle to school, fostering a healthier lifestyle and reducing traffic congestion. Additionally, we urge the Selwyn District Council to consider including the Brookside Road Upgrade and Cycleways project within the committed funding for the 2024-2034 Long Term Plan. A safe and accessible Brookside Road with dedicated cycleways would provide a vital connection between West Rolleston Primary School and Rolleston Central. This direct link would encourage active transport options for students and families, further promoting a healthy and environmentally friendly commute. When combined with the proposed safety improvements on other roads, this project would have a significant and positive impact on the entire

	West Rolleston community. We strongly urge the Selwyn District Council to prioritize these Capex Roading Projects, including the Brookside Road Upgrade and Cycleways, within the Long Term Plan. We believe these investments will have a lasting positive impact on the safety and well-being of our students and the wider West Rolleston community. We are happy to provide any further information or participate in discussions regarding these projects. Thank you for your time and consideration. Ngā mihi Rob Hunt Presiding Member West Rolleston Primary School
Staff Recommendation	Submission is acknowledged by Council. Staff notes the support for prioritising road improvements.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46

	Funding: Rates: 100% **Comment:**

Comments:	Waikirikiri Hockey PO Box 148 Rolleston 7643 30th April 2024 Selwyn District Council PO Box 90 Rolleston 7643 Submission on Selwyn District Council's Draft Long-Term Plan 2024-2034 In 2016 Waikirikiri Hockey was established and subsequently was given permission to enter teams in the Junior 6-aside Canterbury Hockey Association (CHA) Competitions. In 2017 Waikirikiri Hockey became a Full Affiliated Member of Canterbury Hockey enabling the club to grow through the grade into the full senior competition. The club has continued to grow and shares use of the Artificial turf at Foster Park with Canterbury Hockey and local schools. Access to utilize the turf is becoming more challenging due to club, and school hockey growth in the area. Club Membership Year Junior CHA Members 0-14 Senior CHA Members 15-50 Total 2017 128 0 128 2018 156 49 205 2019 235 91 326 2020 249 80 329 2021 243 108 351 2022 263 102 365 2023 288 102 390 The club is showing strong growth in the Junior grades and has plans to enter teams into higher levels of competition in future. We thank the Council and Staff for the investment and development in the Foster Park Turf; we believe this has been proven to be worthwhile. The quality of the facility saw it added to the CHA junior venues and 6 CHA (city) teams play at Foster Park each Saturday of the winter season. Lincoln University Hockey Scholars complete code skills sessions and Rolleston College School Teams Train, Selwyn Sports Trust Hockey in Schools Program are also run on here. The children's summer hockey saw teams entered from all over Selwyn including Melvern, West Melton, Tai Tapu, Lincoln and Rolleston. From the membership numbers above you can see while the main driver of the turf was to provide an opportunity for junior players to participate in Hockey, the level of interest from adults is growing and being used all year round. This shows the longevity of the sport in the region. The club is financially sound, the committee has qualified and enthusiastic people and implemented a coach development structure, excellent communication, and support from Canterbury Hockey. Waikirikiri Hockey is placed well to grow and develop as the surrounding community develops and while the facility at Foster Park is meeting current requirements, we would like to see the budget for further turf facilities as the community and the club grow in the medium to long term. These facilities' size and location must be considered in alignment with the Canterbury Hockey Facilities Plan. Short Term Demand can be covered with the new turf at foster park, and Canterbury Hockey's facility at Nga Puna Wai, however long term we see the need for more local facilities in the Selwyn District. We would like the opportunity to work with the council to develop these plans. Glen Ellis President
Staff Recommendation	The submission is acknowledged. Staff plan to complete utilisation reports on the existing Hockey Facilities in the next 3 years. The

	recent regional hockey facilities plan indicates there is sufficient supply in Selwyn until at least 2031. Staff note that Foster Park and West Melton are not viable options for further development due to being close to capacity so other suitable locations will need to be identified.

Submitter Number:	1421	**Submitter:**	Ann-Maree Ozanne
Point Number	1421.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** I appreciate that public transport is decided by Ecan, but I believe Council need to advocate for improved public transport between smaller townships and Rolleston/Christchurch before focusing on Park and Ride as at least Rolleston already have access to a good public transport system. In particular looking into options for a co-run school bus from West Melton to Christchurch with Ecan and MOE similar to that of Rolleston. Currently on any given day there are 25-30 school children from West Melton to 3 schools on the bus Route around Upper Riccarton. This indicates the need for a school only bus and it could return at 3.15 - 3.45pm a more suitable time for the school children.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service. The Ministry of Education provides school bus services

Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	If digital solutions to improve, the Council needs to lobby government for better coverage, especially between Darfield and Kirwee, and West Melton & Yaldhurst. In addition to this Council needs to consider that not every communicates digitally and to not forget those that don't.
Staff Recommendation	Face to face interaction will continue to be an important part of how we interact with our communities. Our digital approach is designed to make things more streamlined, connected and efficient.
Point Number	1421.8
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Dear Members of the Council, I am writing to express my support for the preservation and improvement of the Sheffield Memorial Pool. This facility is not just a pool but a cornerstone of our community's heritage and was established as a memorial to our veterans. Its value in promoting health, unity, and education in Sheffield cannot be overstated. In recent years, the pool has encountered several challenges, including structural degradation and variable usage rates affected by unforeseen events like the COVID-19 pandemic, cold summers and reduced opening hours. Nonetheless, the increased community engagement and high attendance in the most recent season clearly demonstrate the pool's importance to our townships. A significant issue is the pool's current depth, which poses both safety and accessibility concerns as well as making it a challenge for the Swim School when taking lessons. Feedback from a communitywide survey overwhelmingly supported the reduction of the pool depth, enhancing safety and potentially lowering operational costs. This change would make the pool more accessible and safer, particularly for our younger or less experienced swimmers. Given the pool's role in our community and the expressed needs of its users, it is crucial that any decisions regarding its future involve thorough consultation with the whole community. I advocate for the pool to remain open for the 2024/25 season to provide adequate time for this essential consultation with the community. Moreover, I suggest that the Council considers collaborative solutions that might include

	repairing the existing structure to continue to serve the evolving demographics of Sheffield as well as working with community volunteers and the communities access to alternative funding sources, to reduce overall costs and make the an achievable project. It's imperative that any plans not only reflect the practical needs of our whole community (those learning to swim through to the older generation interest in health and recreation) but also respect and preserve the memorial status of the pool. Thank you for your attention to this vital community issue. I trust that the Council will make decisions that reflect the strong community spirit and the values we hold dear in Sheffield. Sincerely, Ann-Maree Ozann
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Submitter Number:	1422	**Submitter:**	Matt Legg for Coes Ford Concerned Residents Group
Organisation:	Coes Ford Concerned Residents Group		
Point Number	1422.1		
Category	Activity > Other Categories identified by Staff > Emergency management		
Comments:	FLOOD PROTECTION Submitted on behalf of The Coes Ford Concerned Resident's Group Total residents the are part of the group: 16 We as a group are submitting to the SDC Long-Term Plan as we are increasingly concerned about the current management of the Selwyn River, particularly the Coes Ford Reserve. We are already paying rates that should go partly towards the elimination of the following concerns. Our concerns have been raised with both SDC and ECAN multiple times in the past and not addressed. As residents, we pay rates for SDC and ECAN. Included are:		

SDC
• Recreation and Reserve maintenance
• Water race maintenance
• Land Drainage

ECAN
• Drainage. Class A Works and Service
• Uniform General Charge
• Fresh Water Management

As such we already pay for reserve maintenance, flood protection, and land drainage.

Although some may state it is our choice to live near a river, the council allowed these properties to be subdivided to include a dwelling - and has been collecting rates which include that for flood protection. Therefore, there is a duty of care to the residents – particularly since the issues we raise are due to maintenance and current management of the waterway.

Local residents have noted that the flooding is getting worse – however it is believed that this isn't due to extra water, but a change in the condition of the riverbed.

In 2004 you could see from one side of the river to the other. In the 60 years of the flood banks being up, the Legg's property had never flooded (from local feedback). Now, in the last 8 years the property has flooded twice. In July 2023 when the water came over the last time (286 cumecs), the Legg's property would have flooded again had it not been for the fact they had lifted their dwelling in 2021.

In the last 15 years, there has been quite a lot of change in the riverbed – causing out of river flows. The shingle coming from downstream is a well know issue, but a bigger issue is the extensive planting of low growing, bushy shrubs in mass plantings.

One local noted that trees were planted in the river in wrong places. The floods have proven that natives planted in Coes Ford had the effect of not allowing the river to flow and backing water up until it comes over the banks. Any plantings should be planted with the flow of the river not across it.

Another ongoing issue is the lack of working together (SDC and ECAN) – a constant theme is one blames the other and vice versa. It's impossible to get questions answered, and neither will commit to a plan to stop or mitigate flooding.

SUBMISSION

Members of our group have highlighted and discussed these at length during various meetings with ECAN/SDC representatives and via correspondence. However, again we will restate the main points:

PLANTING IN AND NEAR RIVERBEDS

Existing planting approx. 2010 – 2024 in and around Coes Ford (including campgrounds)

A group “Evergreen” commenced planting in Coes Ford and surrounds with SDC knowledge (signs placed in these areas have SDC logo). In times of flood these plantings are blocking the natural river flow and speed (as witnessed by residents). It appears that as the years pass, the flooding is getting worse as the planting thickens and more is added.

PHOTOS – please see attached PDF with photos of the riverbed and the change in planting over the last 35 years.

Unfortunately, although native species are valuable to New Zealanders, it is important to consider the following when planting in and near riverbeds:

Species (thick and shrubby blocks, restricts and diverts water flow)

Spacing between planting (allowing for maturity and ensuring growth does not block/restrict/divert water flow)

Maintenance (thinning, pruning and removal of species that have died is required ensuring growth does not block/restrict/divert water flow)

Modelling ECAN modelling of any proposed planting should be required.

Traffic management needs to be considered, as some of the roading corners are either planted or overgrown, reducing visibility of oncoming traffic.

NOTE: The Selwyn River (Chamberlains Ford) bridge on Leeston Road was weakened by the 2021 flood due to planting diverting water in the wrong direction (Stu Hastings – Farmer) - there was no other viable option available for quite some time.

There is ongoing planting regularly occurring. Who is doing this and what controls/oversight are ECAN and SDC putting on this? First and foremost, it is a riverbed, not a campground. River flow should always be considered when planting projects, maintenance are being undertaken.

6 Sylvia from ECAN has met with us on more than one occasion. Sylvia has noted the problem and took photos.

SOLUTION
• Do not plant in riverbeds
• Current plantings require removal (or tinning if this is impossible) ensuring growth does not block/restrict/divert water flow. Our group is prepared to do some of this work.
• If a group is allowed to plant near a riverbed (taking into consideration location, species for planting etc.), they must be responsible for and maintain the area.
• A policy needs to be in place or set up that should include the following points
o Which plants can be planted where
o Spacing o Maintenance intervals
o This policy needs the be followed by all departments from ECAN and SDC

FLOOD BANK REPAIRS AND MAINTENANCE

Earthquake Damage

The flood bank behind the Barclay and Hutcheon properties has a significant drop (100 mm) since the Christchurch earthquakes that has never had any work to remediate it. This was confirmed and recognized as an issue by Ian Heslop who was the ECAN River Engineer. Video footage is held of the flood bank breach during flooding. We would consider this a priority before the introduction of a wetland with the potential to cause more significant flooding. Why has this maintenance of Silver Stream, Coes Ford and the surrounding stop banks not been prioritised above something that is considered a ‘nice to have’? Perhaps we should stick to the basics first?

SOLUTION

• ECAN/SDC Raise the flood bank where it has dropped.
• Finish the Flood Bank from Clive MacIntosh’s to Selwyn Bridge now that water cannot get through due to planting slowing the water down and pushing it out the sides of the river.

SDC/ECAN COLLABORATION

The group would like to see better collaboration between SDC and ECAN. If they could combine their efforts and work jointly there would be less duplication. Internal departments in ECAN/SDC appear to be compartmentalised and protecting their own patch rather than working together as one.

Example: Wetlands Project willow removal along Silverstream. Waited too long to burn, so it was damp and did not remove, flooding then resulted in clogging of Silverstream with part burnt and unburnt willow debris. When advised, the comment was “It’s not ideal” after asking about cleanout …”not my funding area”. The mess has not been cleaned up. Imagine if a landowner had caused such a mess. Note that willows uprooted and in the middle of the riverbed were never cleaned up from the 2017 flood. These will be slowing the flow and should have been removed long ago as a priority.

Various members of the group have had numerous meetings/correspondence with ECAN and do not feel as though we are being listened to and heard.

SOLUTION
• ECAN and SDC to collaborate more so both parties are aware of each other’s activities and implications to each.

CURRENT RIVERBED MANAGEMENT

The river is supposed to take 450-500 cumecs yet it has breached and gone over at approx. 286 cumecs at Coes Ford (16 & 21 Goulds Road affected).

• The riverbed at Coes Ford narrows and is a natural funnel, where the stop banks come together - hence it cannot be blocked with planting.
• Other streams and tributaries contribute to the flow and flooding of Coes Ford.
• Gravel comes down the river naturally and requires regular cleaning out to ensure the river stays in its own channel. Further, it requires removal in the narrow portion of the flood banks coming into Coes Ford. The last 3 removals of gravel have made Coes Ford water much cleaner and fish and eels have been seen since. Further, continued removal of gravel build-up ensures that the Ford is less likely to flood and access to and from the District is more evenly distributed.
• Plant effective non-invasive plants and willows that allow water to go though
• Willows in the Coes Ford area have been drilled and poisoned as advised by Keely Gwatkin Reserves Officer of SDC, however the plan is to let them rot in situ.
• Clearance plans should be required for poisoned/dead/cleared material. There should be no clearing without a disposal plan due to the mass damage caused by it when it floods
• Manage the river as one, not by catchment. There has been work done upstream and it must be remembered that doing this will influence those of us down stream. Dunsandel had work done to stop water flooding/overflowing where there was a natural overflow to stop a farmer flooding (as advised by Verity ECAN River

Engineer). Obviously taking out this natural overflow ensures that more water comes to us and we are clogged with planting in the smallest part of the river.

SOLUTION

• Manage the river as one not by catchment
• Do not clog the riverbed with planting
• Only allow planting that will not block/restrict/divert water flow
• Regularly remove gravel
• Ensure any planned work done upstream does not have negative effects downstream
• Remove the poisoned willows as they will further clog the riverbed and cause more flooding

PROPOSED WETLANDS

We view the proposed wetland by SDC/ECAN with some trepidation having been affected by flooding. We are also concerned with weather pattern/climate change and being told repeatedly flooding will get worse.

We are concerned at the cost (paid by Ratepayers like ourselves) and implications only to have next flood wash it away. We would prefer money on flood protection in the first instance, then look at a wetland, which may increase the flood risk. The land has already been purchased; therefore, it is highly likely this will go ahead rather than not. It appears that we have been presented with a fait accomplai. Judging by the 2021 flood and what was moved by the force of the water e.g. concrete toilet blocks at Coes Ford, those expensive walkways will all disappear.

• The land purchased by SDC was grazed and maintained. Now, it is getting full of weeds, scrub, and brush.
• What flood assessments have been done for the properties located opposite and below proposed wetlands?
• Walkways or any infrastructure would need to survive floods, however; there is a concern that these too will slow the river and are potential causes of flooding.
• Should the wetland increase flooding, who is going to foot the bill to the local landowners when they have made you aware of their concerns and you have progressed anyway?

Although this is a nice idea, it is suggested that you come when the river is in full flood as the idea of planting a wetland on a river bed that floods like the Selwyn does, is clearly not ideal.

• The ECAN website states the working group includes local landowners. It does not. The group was selected and there is no land owner that has this wetland behind their property on the group.

	The one landowner representative in fact had a lease on the land purchased by the council and lives a distance from the proposed wetlands. There is no local landowner on the Northern and East of the proposed wetland on the Coes Ford side of the working group. We asked to have a representative included that was located closer and this was disallowed. Further, the ECAN website states “A separate meeting was also held earlier this year to hear from landowners who were concerned the project could heighten the risk of flooding.” "The designers - along with river engineers, were able to hear any concerns that needed to be taken into account, and allay people's fears." Let us advise you that our fears have not been alleviated. SOLUTION Do not consider or build a wetland until the river and surrounds have been resolved and the river is flowing freely. OUR SUMMARY The flow of the river is being compromised by planting/shingle building up and other debris. This is causing major damage regularly with flooding. Stop banks being maintained and completed would be helpful to reduce out of reiver flows. *Photos are attached showing the change in the riverbed over the last 35 years. Staff Recommendation	The submission is acknowledged. Staff will engage with the submitters and work to find a way forward which will include working Ecan. Staff recommend that any planned investigations related to the submission and discussions with affected parties continue.

Submitter Number:	1423	**Submitter:**	Jess Glassey for Sheffield Contributing School
Organisation:	Sheffield Contributing School		
Point Number	1423.1		
Category	Questionnaire > Matters For Community Guidance		
Comments:	**Question:** Do you support the closure of Sheffield Community Pool? No **Comment: Comment: Comment:**		
Staff Recommendation	Submission is acknowledged by Council.		
Point Number	1423.5		
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool		
Comments:	29 April 2024 To whom it may concern, The Sheffield School has an obligation to deliver quality water safety education to its students through the New Zealand Curriculum and as such has a critical interest in retaining a swimming facility in the community. The Sheffield School has reviewed the viability of using the Darfield Pool to deliver its curriculum priorities however, this option presents significant challenges to the school inciuding transport logistics and costs ($10/000 per annum), significant time out of the classroom for travel and the simple fact that there aren't any spare time slots availabie during school hours to fit Sheffield students in among other users during the week. Therefore, the Sheffield School Board of Trustees does not support the council's proposed closure of the Sheffield Memorial Pool. The Board of Trustees is in favour of the council returning the Sheffield Memorial Pool back to a local entity along with the proposed $290/000 for decommissioning to enable		

	the community to repair, maintain and run the faciiity for many more years to come. The Board of Trustees also appreciate that if this isn't possible, either through the community not having the capacity to do so or due to the council's decision to decommission the existing faci!ity despite the community's wishes then the Sheffield School would like to put forward a second option for consideration, by way of a building a new swimming facility on school grounds. The Board of Trustees has conducted independent reviews of what is required to repair the existing facility and researched the viability (including funding streams} of building a new pool within school grounds. Both of these options bring with them their own set of challenges/ however the Board of Trustees believes these challenges can absolutely be overcome but will take a united community and council approach to achieve. The Sheffield School Board of Trustees would like the opportunity to present these options in more detail directly to the Selwyn District Council during the public hearings in May. Thank you for your consideration. Jess Glassey Sheffield Schoof Board of Trustees, Presiding Member Sheffield Contributing Schoo! (MoE No. 3502} 110 Curve Road, Sheffield 7500
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Point Number	1424.3
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	1. Historical value The Mayor says in the Long Term Plan that "we're focussed on looking after what we already have" - how about you look after us! ...An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there were huts established there, mainly for fishing and hunting. Given this … … are short term and ultimately for a finite period' . At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts. We request this historical significance be recognised and for the Selwyn Huts to be listed as an historical site on the District Plan and for the term for us being here to be extended to protect this history. _____ ... 2. District wide rates Selwyn Huts need to be put on DWR for Water and Sewer. The reasons being : (a) We will soon be on the same sewer system as Leeston who pay DWR and we … … pay towards USH sewer upgrade. There is no good reason why the Council couldn't fund the full amount. This was proposed in 4.12.4 of the "Upper Sekwyn Huts Future Occupancy Strategy" report dated 04/03/2024. (h) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners.

	(i) Additionally we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Given the reasons above there is no reason why Selwyn Huts cannot be put on the DWR for Sewer and Water like everyone else. The Selwyn Huts should be listed as a history site on the District Plan. It pre-dates the 1900s so is an archaeological site under Heritage Pouhere Taonga Act All homes and all people should be protected. It's inhumane and disgusting to evict the Selwyn Huts residents from their home. Review the 15 year finite term and let us stay. This also helps preserve our kiwi history!!! It's unfair not to include Selwyn Huts on the District Wide Rate for water and sewer. Excluding a community in the district goes against the purpose of introducing the DWR in the first place. The legal opinion from Council's own lawyers has highlighted this. We should not be discriminated against and should be treated like everyone else in the district Replace the reticulation system. Council have been in charge of this since 1989 and dropped the ball by not doing any maintenance and upgrades over the last 35 years. Don't use your incompetence as an excuse to make us pay or to kick us out
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.
Point Number	1424.4
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts

Comments:

The mayor's introduction to the online LTP submissions, states "When we were preparing this plan, you told us you wanted a sustainable Selwyn, ***a place where people could live without needing to go anywhere else*** and we want to deliver this."

Then he and the councillors need to decide that the residents at Selwyn Huts can continue to live here. With the sewer system being upgraded - not entirely at the council's expense - the Hut owners should be permitted to live there for at least the next 50 years, not the insulting potential offer of 15 years.

Add the Selwyn Huts to the District Wide Rating for their water and sewer.

(a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequent upgrade, the requirement we were told for being put on DWR.

(b) We have already paid for the water upgrade.

(c) We should not be discriminated against and should be treated like everyone else in the district.

(d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We should also be added to the DWR for Sewer and Water like everyone else.

(e) Towards25 LTP Document stated:
"The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities."
This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table.

From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston.

	(f) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community." (g) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Selwyn Huts Future Occupancy Strategy" report dated 04/03/2024. (h) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners. (i) Additionally we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP
Point Number	1425.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

	Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** We support the Leeston Community Committees submission.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing

	Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1430.3
Category	Activity > Other Categories identified by Staff > Infrastructure Property General
Comments:	The Council operates a public carpark at 53-55 Tennyson Street and has acquired the adjoining property to the east at 9Markham Way. JP Singh seeks that the Council budgets for the cost of extending the public car park into this property to accommodate an anticipated increase in visitors to the town centre as business development occurs within the Rolleston transitional precinct surrounding Markham Way.
Staff Recommendation	Submission is acknowledged by Council. Selwyn District Council do own the carpark at #53 and 55 Tennyson Street, and do own the property at #9 Markham Way which is east of this carpark. We agree that more carparks will be required within the Rolleston Town Centre east of Tennyson Street as more retail/commercial buildings are established. Establishing a carpark at #9 Markham Way would supplement the existing carparks and provide access to Markham way. However, staff recommend that a wider investigation be made into properties surrounding #9 Markham Way to look at the wider context of Commercial development so that haphazard Urban Planning does not occur with regards to carparking.

Comments:

The owner of Broadfield Garden enquired of the mayor in October 2023 whether SDC would purchase Broadfield Garden and make it free to visitors. The Mayors office replied suggesting that a submission be made when the 10 year plan was out for consultation.

An intention of the 10 year plan is to make the Selwyn District self sufficient in places to live, work and play. The purchase of Broadfield provides an immediate resource established 30 years, ready now for visitors at a cost and time much less that starting afresh.

It has 18 discrete areas, designed by an award winning Landscape Architect and is recognised by N Z Gardens Trust (an association of council and privately owned gardens that are open to visitors). The Trust assesses the members gardens 3 yearly and awards a grading (generally 3 to 6 stars). Dunedin Botanic Garden established 150 years and Hamilton Botanic Garden have both been awarded 6 stars. Broadfield has also been awarded 6 stars, a recognition by its peers. The soils are highly desirable Templeton silt loams with excellent drainage, a big plus compared to those at Lincoln and Prebbleton. Unusually it does not have a house to detract from its purpose as a significant garden. A dwelling would likely be an inconvenience and significant additional cost from a Councils perspective.

Gardens are highly biodiverse, a detailed biodiversity audit has been done on a garden in the U K, Great Dixter which is of similar size to Broadfield but much older and 2,400 different species have been identified. See ‘Great Dixter biodiversity”

There is a garden known as Pukuiti in Taranaki established by a Private Trust that was open to visitors and was attracting 7,200 visitors p a charging an admission fee to assist with maintenance. It has been acquired by Taranaki Regional Council, made free to visitors and now attracts 57,000 visitors p a. It is located 23 km from the nearest significant population centre of New Plymouth and the distance from the built up area does not appear to be a significant detraction. Broadfield Garden is located midway between the 3 biggest population centres in Selwyn District 7 km from Rolleston library, 8 km from Lincoln library and 7 km from Prebbleton ‘Station’.

Gardeners prominent in the N Z context, employed by Local Authorities that are familiar with Broadfield Garden that might be prepared to comment on Broadfields significance, design and planting include;

Jack Hobbs (no relation) Curator Manager Auckland Botanic Garden

Wolfgang Bopp Director Christchurch Botanic Garden

Dylon Norfield Collections Supervisor Dunedin Botanic Garden

Other prominent gardeners familiar with Broadfield Garden that might be willing to comment include;

Margaret Barker Founder and Owner of Larnoch Castle and Garden Business

Alan Jolliffe President Royal N Z Institute of Horticulture

The motivation in offering the garden to SDC is that the owner is aged 74 has completed 30 years and his two sons are not enthusiastic about taking it on. Two couples that have shown interest in the property want it for a private dwelling site in which case it would be unlikely to be available to visitors. If SDC purchased it as a 'reserve' it might increase the financing options and the hope is it would continue to be available to visitors, preferably free, like other Council owned gardens in N Z.

The key issue like any garden is to do the right things at the right time and as efficiently as possible. There are large areas that are low maintenance and much smaller areas that are detailed and higher maintenance. From my accumulated experience I can ensure this happens for as long as I am involved and could write a detailed description and maintenance manual.

The garden has been developed and maintained by the owner working 2 days a week, one contractor now working 5 days per week, (here 8 years and wants to continue under a new owner) and 1 man 1 day per week (here 14 years), total 8 man days per week, roughly equivalent to 1.6 FTE In addition I have a very good

	Lincoln student that does occasional days during term time, his second year here. A previous helper Dave Fals stayed 17 years. We have found it easy to attract and retain good staff. The owner is prepared to continue 2 days a week for at least 1 year, if health holds up longer and does not need to be paid. Regards David Hobbs
Staff Recommendation	Staff acknowledge the quality and significance of Broadfield Gardens and the opportunity it presents as a formal garden to complement the existing open spaces. However, the proposal does have some costs and risks that need to be weighed up alongside other options. This includes the cost of purchase (and how that could be funded), the cost of additional infrastructure to enable public use, the on-going cost of maintenance and potential revenue opportunities. There are also some limiting factors such as proximity, accessibility and connectivity. It is noted that Council is considering development of a formal garden at the District Park as part of stage 1 development: that would focus on 3 main types or components of formal gardens: botanic plantings (including natives, exotics and floras); sister city garden opportunities; community gardens. Although the acquisition of the garden presents an opportunity for Council to provide a special area of open space that is not replicated anywhere else in the District, staff are of the view that the proposal is difficult to support at this time given the costs and other factors mentioned above. Staff recommend that Council does not purchase Broadfield Garden at this point in time but considers what other mechanisms are available or support it could provide to retain the garden for the district's benefit.

Comments:	11 After the last Springfield floods I presented to S D C the maps and plans from Ecan. They were drawn by Mr Reid of the Catchment Board in 1958 after the 1951 flood. What progress have you made?
Staff Recommendation	A Concept Report has been developed on options to reduce flood risk in the Springfield township. Staff recommendation is to await the outcome of the Environment Canterbury Long Term Plan consultation process with the Selwyn community about an additional targeted rate for district wide flood and river resilience work. It is recommended that Council work with ECan, landowners and other Partners on the concept. Further design and consenting work is budgeted in year 10 of the LTP with construction in years 11 and 12. Regular maintenance of the network within the township will be continued
Point Number	1436.6
Category	Activity > Planning Further Community Facilities
Comments:	9 Give back the Halls and Domains back to the Communities to administer, It's the people that make communities not money. Why do you need control of the people?
Staff Recommendation	The submission is acknowledged. Over the next year Council will be reviewing the network of public-facing facilities across the Selwyn District (libraries, community centres, halls, sports centres and pavilions). This work will take a holistic look at all facilities to plan for short, medium and longer-term community needs. It is recognised that a number of Council owned halls and centres have an extensive history in Selwyn and it is also recognised that there are some halls / community centres that are now underutilised by the local community and may be facing large costs in maintenance and / or remediation. The review will help Council better understand issues, opportunities and barriers and to consider alternative options for the future. Depending on the facility, options identified in the review may include, but not be limited to, the lease or sale of facility to a community group or organisation, the repurposing of facility from a general public hire facility to a dedicated activity facility for the district, co-location arrangements, etc. The intention of Council's

	public-facing facilities network plan is to ensure a reasonable and balanced spread across the wider district, with facilities that are relevant to the various communities.
Point Number	1436.7

Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council.
Point Number	1437.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions

	are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:** SOC support Option 2 We commend that the plans for this to be built include the use of 21st Century materials and technology that place an emphasis on sustainability and appear to recognise the build is occurring as we face a climate crisis. Libraries in Greater Christchurch are proven centres of community and the plans for meeting rooms and community space will ensure this is no exception. This development appears to be following best practice all round and the strong connection between Council and mana whenua in its development is pleasing to see. It is unfortunate that costs have escalated but it would be in our view false economy to stop this now.
Staff Recommme	The submission is acknowledged.

ndation	
Point Number	1437.4
Category	Activity > Walking and cycling improvements
Comments:	Within Selwyn we support the people asking for connections between centres. SOC supported last LTP plans for cycleways; and while we know the distances between places make this perhaps Less attractive to many than public transport options we would still like to see cycleways planning and development as part of the mix. They do not have to be 'gold plated'. It is exciting to see there creational cycleways that you are investigating from Arthur's Pass through the region, and the one around Te Waihora-Lake Ellesmere and look forward to the completion of the studies on these. These should not be the total commitment to cycling in the SDC area though.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1437.5
Category	Activity > New Public Transport Services
Comments:	We also support the $75,000 being spent on a business case exploring new public transport services that might be provided by SDC given the restraints on Ecan and the needs and wishes of the people of Selwyn. We note that the people of Selwyn want to be able to "live without needing to go anywhere else". This sense of place is important to people but there also needs to be an ability for connection. Connection within the district and connection with the nearby metropolitan centre that provides the access to services and agencies that currently are not available locally to residents. We also thank SDC for what appears to be your positive, constructive role in the Greater Christchurch Partnership, and thank you for joining with other councils to

	support Mass Rapid Transport and joined up thinking about public transport in the wider region.
Staff Recommendation	Submission is acknowledged by Council and SDCs support for the initiatives in Councils Draft LTP
Point Number	1437.6
Category	Activity > Lincoln Town Centre Upgrades
Comments:	The Lincoln Town Centre upgrades need to include walking and cycling improvements as well as traffic calming. We note this is in the plan and urge Council to make sure these happen.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1437.7
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	Selwyn is a region with enormous potential and stunning natural assets from the Liffey Stream to Te Waihora, to a township in the middle of a national park. These natural features and the biodiversity within them desperately need your protection. We urge SDC to prioritise this work, and continue to support work with community groups, to protect (as the first priority), enhance and where necessary restore habitat for biodiversity. The Upper Waimakariri is an area of significance in terms of endemism and the responsibility to care fo our biodiversity 'backyard' falls to all including SDC.
Staff Recommendation	The Council Environmental team are working hard across the district to work with our community and agencies to protect and restore indigenous biodiversity. Part of that involved leading initiatives in the Waimakariri Basin, including with the control of pest and weed species that threaten our special flora and fauna.

Point Number	1437.9
Category	Activity > Low Nitrate Water Sources
Comments:	The days of Selwyn being lauded (at least by some) as the land of “milk and money” must be seriously in their rear view mirror. The damaged one must be addressed including the costs associated with securing safe low nitrate drinking water. Beyond that there is pay back to the natural world that paid such a heavy price for that ‘prosperity’.
Staff Recommendation	The submitters support to continue to chlorinate community drinking water supplies is acknowledged. Staff recommendation is to continue to chlorinate community supplies to reduce risk to community health.
Point Number	1437.11
Category	Activity > New Public Transport
Comments:	With the demographic of the Selwyn region veering toward more youth, having sutainability oriented services,public transport and active transport options and valuing the natural world are all things SDC should be embracing.
Staff Recommendation	Submission is acknowledged by Council and SOCs support for the initiatives in Councils Draft LTP
Point Number	1437.12
Category	Activity > Other Categories identified by Staff > Waste Management
Comments:	Congratulations to SDC for your excellent recycling centre.
Staff Reco	Kia ora. Thank you for your submission on the LTP 2024-2034. The team is appreciative of the feedback and proud of how the facility is evolving.

mmendation	
Point Number	1437.14
Category	Activity > Other Categories identified by Staff > Consultation Document Feed
Comments:	The younger people in this community hoping to live out healthy, happy lives ;many are looking for change. They are not the only ones.It is good to see the ways in which the SelwynDistrict Council appear to be listening.
Staff Recommendation	Submission is acknowledged by Council. Staff try really hard to connect with our communities and keep them informed of what is happening in Sewlyn.
Point Number	1437.15
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	looking after the natural world does not need to mean the end of economic development. We support the $9million dollar spend but wish to pull out and emphasise the terms “Sustainable and strategic” and “innovative business growth ”used in that section of the consultation document. The potential for business, local government and community to partner in creative ways that support the natural world and that might potentially mitigate against the climate and ecological crises we face is no more apparent than in the proposal of Lincoln University andOrion and to partner around transitional sustainable energy solutions for the district.
Staff Recommendation	It is acknowledged the submitter has commented that they support the Economic Development Strategy, and Council will consider their feedback in strategy action planning.;

Point Number	1437.16
Category	Activity > Other Categories identified by Staff > Other Matters
Comments:	TeWaihora while not the lake it should be is still an amazing place and the commi tment and combined efforts of manawhenua, Council and others to take better care of it into the future mean things will hopefully improve overtime . To have really successful ecological efforts, however,we do need wider communit y understanding and buyin. This requires research, as well as education and awareness raising. We must return as a socie ty to making evidence-based intelligent responses to the real world challenges we face. We ask that SDC support this including supporting monitoring and other program mes designed togather the iiinformation needed for positive change.
Staff Recommendation	Staff support the submission Councils the Biodiversity Strategy will provide a framework to address the matters raised in the submission

Point Number	1441.1
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	

Question: You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:

Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi.

Project cost:
Years 1–3: $4.2 million
Years 4–10: $11.6 million

Estimated impact on rates:
Years 1–3: $7.06
Years 4–10: $19.52

Funding:
Rates: 49%
NZTA Waka Kotahi: 51%

Our
budgeted
option

Comment: 9) Big Decision 1 - Public Transport
The RRA supports the development of public transport infrastructure and supports Council's Option 1 *"Build three new Park and Ride facilities at Lincoln and Rolleston, and up grade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi"*

The RRA asks that it be involved in the selection of park & ride sites for Rolleston commuters.

Staff Recommendation	Submission is acknowledged by Council. The Park N Ride facility at Foster Park already a 2023/24 budgeted and approved for construction to cater for demand in the south of Rolleston. With Councils Preferred Option the new Park N Ride facilities at Rolleston

	are planned for 2029-33, at which time additional capacity will definitely be required to align with the additional PT services planned by Environment Canterbury over this time. These are positioned on Kidman St and on the corner of Jones and Hoskyns Road

Development contributions: 19.5% *
2024/25
2025/26
2026/27

	2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment: 10) Big Decision 2 - Waihora Whata Rau 2b – Leeston Park.** The RRA supports in principle the construction of the new community facility in Leeston and some upgrades to Leeston Park. The RRA supports Council's Option 2 for Whata Rau and Option 2 for Leeston Park and additionally requests that value engineering principles be used to ensure the best value for the ratepayer be achieved in these projects. **Reason:** The RRA acknowledges the need for suitable community facilities for the communities of our district. The RRA takes an inclusive view of our district and supports other communities in our district as we would hope they would support Rolleston. Facilities need to be appropriately sized for the community where the facility is to be built and to build with the aim of achieving “the best bang for the ratepayer's dollar.”
Staff Recommendation	The submission is acknowledged. The size of the facility has been taken into account in relation to this matter.
Point Number	1441.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the

	loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Carry out the landscape improvements to extend the playing fields; replace and upgrade the playground equipment, footpaths, toilet block, lighting and irrigation; and seal the carpark. **Project cost:** Years 1-10: $3.4m **Estimated impact on rates :** Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% * Our budgeted option **Comment: 10) Big Decision 2 - Waihora Whata Rau 2b – Leeston Park.** The RRA supports in principle the construction of the new community facility in Leeston and some upgrades to Leeston Park. The RRA supports Council's Option 2 for Whata Rau and Option 2 for Leeston Park and additionally requests that value engineering principles be used to ensure the best value for the ratepayer be achieved in these projects. **Reason:** The RRA acknowledges the need for suitable community facilities for the communities of our district. The RRA takes an inclusive view of our district and supports other communities in our district as we would hope they would support Rolleston. Facilities need to be appropriately sized for the community where the facility is to be built and to build with the aim of achieving “the best bang for the ratepayer's dollar.”
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2. In preparing detailed plans for project elements at Leeston Park there will be a focus on ensuring that assets and facilities meet the required levels of service for users and consider full life-cycle costs.

Point Number	1441.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	

Question: We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1.

Build a community recreation and sports facility at Darfield that includes two indoor courts.

Project cost:
Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million)
Estimated impact on rates (per year):
$19.91

Funding:
Rates: 57%
Development contributions: 43% *
Comment: 11) Big Decision 3 – Malvern Recreation and Sports Facility
The RRA supports upgrading the existing Darfield Recreation Centre including the addition of two indoor courts, Council's Option 3.

The Darfield Recreation Centre is under unitilised and should be improved to encourage greater use.

When developing (more) indoor court space it should be ensured that all appropriate sports get a fair and reasonable allocation of space and time. No single sport should be able to dominant court space bookings at the most popular times.

Reason:
The RRA acknowledges the need for suitable community facilities for the communities of our district. The RRA takes an inclusive view of our district and supports other communities in our district as we would hope they would support Rolleston.

Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.
Point Number	1441.5
Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1441.6
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	**12) Closure of the Sheffield Memorial Pool** The RRA supports the proposed closure of the Sheffield Memorial Pool. **Reason:** The cost of operating & maintaining the Sheffield Memorial Pool is very high considering is low utilisation. The site has difficult, some might say dangerous, access to the state highway. Many communities in our district have to travel to use a swimming facility. Council has to make a tough, but rational, decision and close this facility.
Staff Recommendation	It is acknowledged that the submitter has selected to close the Sheffield Memorial Pool.

Point Number	1441.7
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	**13) Economic Development** The RRA **does not support** the proposed $900,000 per year expenditure on economic development. In the constrained economic environment this is an excessive amount of expenditure to be funded from the general rate. The RRA **could support** a smaller amount, say $200,000 or $300,000 per year to be reviewed and reconsidered in the 2027-37 LTP. **Reason:** Despite the rationale given & claims made in the Consultation Document the amount requested is excessive and needs to be reduced to a more reasonable level. RRA members suggest money and effort might be better spent/utilised in speaking directly to existing businesses to find out what the council could do to better support and enable the growth of their businesses. It was further suggested that elected members and senior staff could meet with business leaders directly for this.
Staff Recommendation	It is acknowledged the submitter has selected to not progress with the Economic Development Strategy and holds a view that the proposed allocation should be reduced. Councils' contribution to economic development is alongside others who are expected to contribute significantly more overall. Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. Every cent of spend will be scrutinised and planned for to ensure outcomes and returns are maximised from the spend. Action plans will outline this in detail. The $9m is over a ten-year period, and not all the proposed spend is the same across the years with the first years having a lower allocated amount.
Point Number	1441.8
Category	Questionnaire > Matters For Community Guidance > Digital Solutions

Comments:	**14) Investigating and implementing improved digital technology solutions $1.3M/year** The RRA generally supports this proposal but notes the lack of detail in the Consultant Document. Public online access to resource consents and consent applications should be improved – as an example – in this process.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1441.9
Category	Activity > Chlorination
Comments:	**14) Water – Chlorination** The RRA supports the Council's recommendation to continue to chlorinate community water supplies.
Staff Recommendation	The submitters support to continue to chlorinate community drinking water supplies is acknowledged. Staff recommendation is to continue to chlorinate community supplies to reduce risk to community health.
Point Number	1441.10
Category	Activity > Low Nitrate Water Sources
Comments:	**15) Water – Low Nitrate water sources** The RRA supports the Council's proposal to investigate centralis some water supplies on the plains to come from one low nitrate source.
Staff Recommendation	The submitters support for investigation of low nitrate water sources is acknowledged. Further investigations into the centralised sources of low nitrate water is budgeted in the LTP in years 1 to 4. Staff recommendation is to proceed with these investigations as budgeted in the LTP.

Point Number	1441.11
Category	Activity > Potential Requirements To Fluoridate
Comments:	**16) Water – Fluoridation** The RRA does not support the fluoridation of council water supplies and supports the Council's recommendation to make no provision to fund this. In addition the RRA asks that the Council lobbies LGNZ and Central Government to ensure that our district is not forced to fluoridate our water supplies.
Staff Recommendation	The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.
Point Number	1441.12
Category	Activity > New Public Transport Services
Comments:	**17) Transport - Exploring new public transport services** The RRA has called for a MyWay PT service for Rolleston (potentially include Prebbleton, Lincoln & West Melton) in submissions to the RLTP, Transport GPS & Ecan LTP. The RRA requests that Council supports this proposal and makes provision for any required infrastructure.
Staff Recommendation	Submission is acknowledged by Council. Environment Canterbury is considering developing a business case for additional direct services for Rolleston and Lincoln in 2024-27 including investigating 'On Demand' Services as another option within larger townships like MyWay in Timaru but this would only ever eventuate as a trial first.
Point Number	1441.13
Category	Activity > Lincoln Town Centre Upgrades
Comments:	**17) Transport - Lincoln Town Centre upgrade** The RRA supports the concept of this project but questions the cost/value/affordability of the current proposal. Due to cost escalations the extend of this project needs to be reviewed and

	possibly reduced in scale and cost.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1441.14
Category	Activity > Rolleston Transport Improvements
Comments:	**18) Transport - NZTA Waka Kotahi Rolleston transport improvements** The RRA supports the budget for works to support these projects.
Staff Recommendation	Submission is acknowledged by Council supporting Councils $19M package of Rolleston local road arterial upgrades
Point Number	1441.15
Category	Activity > Compulsary organics collection
Comments:	**19) Resource recovery and waste management - Compulsory organics kerbside collection** Whilst acknowledging the rationale behind this proposal, the RRA requests that Council works with LGNZ & Central Government to remove the compulsory element of this proposal and/or alternately seeking funding support for those in the community who cannot reasonably afford this extra cost.
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. The Ministry for the Environment have advised that an opt-in service for urban areas meeting the criteria would be non-compliant with the directive. We intend to seek guidance from the Ministry around discretionary exemptions.
Point Number	1441.16
Category	Activity > Infrastructure DC
Comments:	**20) Property & Assets - Community Infrastructure Development Contributions**

	The RRA supports the proposed Community Infrastructure Development Contribution and asks that this proposal also included funding for public toilets in neighbourhood reserves. **Reason:** Many parents have reported problems with the lack of toilets in neighbourhood reserves as young children cannot reasonably wait to return home before going to the toilets. This leaves parents with an unreasonable choice – let the child toilet in the bushes or let the child soil their clothing. More toilets are needed and therefore more funding. Development brings families and children to our towns and therefore development contributions should help fund the solution.
Staff Recommendation	Support for the introduction of a development contribution for community infrastructure is acknowledged. The introduction of this charge does cover provision of additional public toilet facilities some of which will be in high-use public playgrounds. The general level of service is to not have a toilet in every playground as this would be cost prohibitive but to place these on a priority basis in high-use playgrounds. Toilets have previously been installed in playgrounds such as Prebbleton Community Park and Parekura Reserve and further are in train or planned (Te Whariki, Lincoln; Rolleston Youth Park; Faringdon Oval).
Point Number	1441.17
Category	Activity > Council's Office Improvements
Comments:	**21) Property & Assets - Council's Rolleston Office Improvements** Most ratepayers and residents don't use the Rolleston HQ and will question the need and/or value of this proposal. The RRA support the principle of this proposal but asks that the project be reviewed for value and that staffing levels be appropriate and not continue to grow. Any upgrades for the CE & Mayoral spaces are nice-to-have and shouldn't be done. The Mayor & CE should show restraint and lead by example in making do with what is a recently constructed space.

Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	1441.18
Category	Activity > Strategic Investment Strategy
Comments:	**22) Property & Assets - Strategic Investment Strategy** The RRA supports this proposal. A new strategy is needed. It needs to be better communicated to our community.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1441.19
Category	Activity > Planning Further Community Facilities
Comments:	**23) Property & Assets - Planning further community facilities** The RRA supports this proposal acknowledging the need for a new community centre in Prebbleton as well as a community centre to service the southern area of Rolleston. The RRA notes the need to secure appropriate land for these facilities before houses are build on what would be suitable sites. The RRA supports redeveloping the Rolleston Community Centre for new and existing users.
Staff Recommendation	The submission is acknowledged. Plans for a new Prebbleton Community Centre are included in the current Long-Term Plan.
Point Number	1441.20
Category	Activity > Fees and Charges
Comments:	**24) Property & Assets – Fees and Charges.** The RRA supports to proposed changes to fees and charges.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1441.21
Category	Activity > Planning Further Community Facilities
Comments:	**29) Indoor Courts for Eastern Selwyn** a) The RRA requests that provision be made in the LTP within 2024-2034 for the design and construction of more indoor court space in Eastern Selwyn (as well as in other areas of the district). b) The RRA requests that provision be made for an extension to the Selwyn Sports Centre within the 2024-34 LTP period. **Reason:** The Infrastructure Strategy lists ***Budget $16m Strategy: 2027/28 Build 2041/42*** for indoor court space in Eastern Selwyn. This is surprising given the reports that some sports already cannot get court space – at reasonable times - in Eastern Selwyn. Staff have advised that the utilisation of the Selwyn Sports Centre is only 30% - is this 30% of any time or 30% of popular (after school and weekend) times as it doesn't match community experience? Staff have also advised that there may be more court space available in Christchurch City. Is it reasonable and/or feasible to expect our sports people to commute to Christchurch City to train and play (particularly our youth)?
Staff Recommendation	The submission regarding indoor courts for Eastern Selwyn is acknowledged. A study on court utilization has been completed leading into this long-term plan cycle with Selwyn Sports Centre being less utilized than comparable facilities. Peak loadings were taken into account during this study. Work will be done periodically moving forward to inform court increases in Eastern Selwyn.
Point Number	1441.23
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	**26) Changes to Development Contributions Policy** The RRA supports in principle the proposed changes, with the request made in 20) above.

	Toilets should be provided in reserves with high use from parents with young (pre-school) children.
Staff Recommendation	Support for the introduction of a development contribution for community infrastructure is acknowledged. The introduction of this charge does cover provision of additional public toilet facilities some of which will be in high-use public playgrounds. The general level of service is to not have a toilet in every playground as this would be cost prohibitive but to place these on a priority basis in high-use playgrounds. Toilets have previously been installed in playgrounds such as Prebbleton Community Park and Parekura Reserve and further are in train or planned (Te Whariki, Lincoln; Rolleston Youth Park; Faringdon Oval).
Point Number	1441.24
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	**1) Selwyn Aquatic Centre Weekend Opening Hours** The RRA requests that the weekend opening hours for the Selwyn Aquatic Centre be changed from 8am-8pm to 7.30am-7.30pm **Reason:** With the current 8 am opening time there is less than 30 minutes for pool users to use the pools before the swim school begins. Many, primarily older, users prefer to exercise outside of swim school hours. This is not possible with an 8am opening time. If the Aquatic Centre opened at 7.30 am on weekends then users would have about 45 minutes to exercise before swim school classes begin. Speaking with many users this would be a sufficient time for them to exercise. The swim school sees no problem with this as they w. ould not start earlier except for a small number of private 1:1 lessons. Lifeguards and Aquatic Centre management did not oppose this proposed changed. Lifeguards and Aquatic Centre management also report that the Aquatic Centre is generally very quiet from 7.30pm to 8.00 pm on Saturday and Sunday evenings. Finally this is a cost neutral proposal as a the centre would still be open on for 12 hours on the weekend.
Staff Recommendation	Staff acknowledge the submission and suggest a 6 month trial in change of weekend hours at Selwyn Aquatic Centre be conducted

	and feedback received and documented to inform a longer term decision.
Point Number	1441.25
Category	Activity > Planning Further Community Facilities
Comments:	**2) Libraries open on public holidays** The RRA requests the libraries open on public holidays excluding Christmas Day, New Years Day and Anzac morning. **Reason:** Libraries in our district are shut on most public holidays. This is perverse as public holdidays are the very day families could go to the library together. Programmes don't need to be run, but libraries should be open on public holidays.
Staff Recommendation	The submission is acknowledged. When Te Ara Atea and the libraries/services centres are shut, people can still access library resources via the 24/7 Digital Library.
Point Number	1441.26
Category	Activity > Planning Further Community Facilities
Comments:	**3) Walking network of Park Benches in townships** The RRA request that 20 park benches / year for 10 years be installed in Selwyn's townships to establish a walking network in the townships to enable young and old to walk and sit and walk and sit as they move through out townships. (Maintenance will be required.) This is a district wide project not a Rolleston focused project. This should be incorporated into Selwyn's Youth and Ageing strategies **Reason:** For parents with young children and older residents it is hard to walk longer distances without having somewhere to have a rest before continuing one's walk. This project would establish a network or path through our townships where people can walk, sit, walk sit. It could link our facilities (parks/reserves/community centres) with our town centres. Staff report that the installed cost per bench is around $3,271 so the cost of this project would be about $66,000/year or about

	$4/household/year – less than a cup of coffee per year. Staff also advised that there is $115,250 in the LTP for the whole 10 years for additional park furniture (seats, picnic tables) in townships which would fund 30-40 items. While acknowledging this the RRA considers 3-4 items per year to be insufficient and recommends the higher number (20 per year) of items be purchased & installed.
Staff Recommendation	The submission is acknowledged. The Council are currently developing Te Paepae and Piki Amokura, strategies for ageing positively and youth in Waikirikiri Selwyn. The associated action plans that will be developed later this year will identify Council's priorities and role going forward. The submitter's points will be forwarded to the appropriate Council team for consideration in the strategy action plan.
Point Number	1441.27
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	**4) Boundary Planting at the District Park** The RRA requests that boundary planting at the District Park be undertaken in this (2024) winter or spring. **Reason:** With development of the District Park to happen in the next few years it is important to get boundary planting done early to give it some chance to establish prior to the park being used. Planting this season will give the boundary shelter extra time to establish. Staff have advised against this advising *"We are not in favour of planting up the boundary of the park yet as we do not have any plans completed for the layout of the park (Masterplan). Until we have an understanding of the general layout (eg. Roading, Carpark areas, entrances etc) we are not in a position to plant up the boundaries without risking having to remove large areas of planting*" While acknowledging staff concerns the RRA considers the benefits of boundary planting in 2024 outweighs the issues/objections from council staff.
Staff Recommendation	Staff do not support the submission. Although the eagerness of the submitter to see shelter planting established as quickly as possible is acknowledged, the small gain of planting a year or two earlier is outweighed by the likelihood of planting trees in the wrong place. Staff are certain that the best way forward is to complete the Master

	Plan for the park that clearly shows how the interface with the boundary will be treated and where planting can be placed. Staff recommend that the Master Plan for the District Park is completed before any works are carried out that may be inconsistent with the plan.
Point Number	1441.28
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	**5) Tennyson Street traffic control/signage from reserve boundary to Kidman/Byron Street.** The RRA requests further speed limit signage and road markings in Tennyson Street from the reserve boundary to the Kidman/Byron Street intersection. **Reason:** Residents have observed and reported that many vehicles heading northbound on Tennyson Street are not observing the 30 kmh speed limit once the vehicles have passed the entrance to the reserve carpark. Similarly a lot of southbound traffic doesn't slow down to 30 kmh until they reach the first raised platform. Further traffic calming measures such as raised platforms and road markings or traffic signage are requested to altert drivers to the appropriate speed in this area. Council could also request further enforcement action from Police in this area.
Staff Recommendation	Submission is acknowledged by Council. Council is developing a speed management plan and implementation is subject to NZTA approval and co-funding
Point Number	1441.29
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	**6) Anzac memorial monument in the Rolleston Town Centre** The RRA requests that funding be allocated for the design & installation of a new Anzac Memorial Monument (and flag poles) in the Rolleston Town Centre. **Reason:** The Rolleston Anzac Parade and Service has been coordinated by

	the Rolleston Residents Association with the Rolleston RSA and other community groups supported by the Selwyn District Council. The RRA thanks the SDC for the ongoing support of this event. The 2024 Rolleston Anzac Parade and Anzac Service was successfully shifted to the newly completed Rolleston Town Centre. This is a safer, better location than the Clock Tower Reserve at the intersection of Tennyson Street and Rolleston Drive. If the Rolleston Town Centre is to be the long term location of the Anzac Parade and Service then an Anzac Memorial Monument (and flag poles) is required. The new location saves $15,000/year in traffic management/road closure costs – funds that should be redeployed to seed fund the design, creation & installation a new monument for the Town Centre.
Staff Recommendation	The SDC Rolleston Town Centre (RTC) Project team acknowledge this submission and support the intent to move the Anzac Day ceremony permanently to the Rolleston Town Centre. We support the installation of permanent flagpoles and a new monument near Te Ara Atea, the new Amphitheatre and future Town Square. Existing memorial plaques currently located at the Clock Tower could also be moved to the new site should a new Monument (or Sculpture/Artwork) be installed at the Town Centre. To clarify, we do not support moving the Clock tower to the RTC, but support the creation of a new memorial which could be in the form of a monument or more modern sculpture, at which the exiting memorial plaques could be moved to. Staff are of the view that, before committing to any contribution from Council that the full costs of the project is known and the portion that is to be provided by fund raising. Staff support this project as it is associated with the broader programme of works to the Rolleston Town Centre. Subject to further information being provided on the cost and funding plan for the project Council may consider an appropriate contribution. Operating costs such as road closure will not be provided for the capital cost of this memorial.
Point Number	1441.30
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	7**) Broadlands Drive extenstion** The RRA requests that Broadlands Drive be extended from its intersection with Nicolau Ave through to Lincoln Rolleston Road as

	soon as possible. **Reason:** With the continued growth in this area and the construction of the new Rolleston Pak'nSave the extension of Broadlands Drive through to Lincoln Rolleston Road will provide more effficient traffic flows through the area including students travelling to & from Rolleston College. As Council owns the associated land costs can be recovered when the land is eventually used or subdivided.
Staff Recommendation	Submission is acknowledged by Council. Staff will consider the suggested improvements
Point Number	1441.31
Category	Activity > Planning Further Community Facilities
Comments:	**8) Free Room Hire for Residents Associations** The RRA requests that Residents Associations be granted use of an appropriate room in a council faciliity for upto 11 meetings per year. **Reason:** Having Residents Associations to apply for council grants to pay for room hire in council facilities is a very inefficient use of both council staff time and volunteer time. It would be simpler and more efficient to grant the Associations room hire and “cut out the middle men.” After all, at the end of the day both council and resident associations are meant to be working toether for the benefit of our community. A grant of free room hire would show goodwill from council to the associations.
Staff Recommendation	Council will consider the Resident group grants in its deliberations. The submitter's point is noted
Point Number	1441.32
Category	Activity > Strengthened Partnerships
Comments:	**27) Māori contribution to Council decision-making policy** The RRA **opposes** the proposed policy.

	Reason: If Mana Whenua want representation at Council then they should support the creation of Māori Wards. To oppose the creation of one or more Māori Wards but want appointed counciilors is undemocratic and unfair to other residents and ratepayers.
Staff Recommendation	Selwyn Council has previously discussed and considered Maori representation on Council, including provision of a Maori ward. Council has chosen not to pursue Maori ward establishment at this time. Rather, Council has chosen an approach that allows for Committee delegation by Council to Committees that are all of Council Committees. On Committees, provision has been made for Te Taumutu Runanga and Ngai Tuahuriri Runanga representation

Comments:			

Question: You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:

Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi.

Project cost:
Years 1–3: $4.2 million
Years 4–10: $11.6 million

Estimated impact on rates:
Years 1–3: $7.06
Years 4–10: $19.52

	Funding: Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding
Point Number	1442.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design.

	Project cost: Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts

Comments:	Put the Upper Selwyn Huts on the historical list. They have existed since 1870. Allow Upper Selwyn Huts to be put onto the district wide rates for water and sewer. It was proposed in 4.12.4 of the Upper Selwyn Huts future occupancy strategy report. 04.03.2024. The reticulation system at Selwyn Huts should be replaced by SDC as you have been responsible for this since 1989 and done nothing. Give Selwyn Huts the same or similar managed retreat that Hurinui offer their settlement owners.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Submitter Number:	1446	**Submitter:**	Lynda Collins for West Melton Garden Club
Organisation:	West Melton Garden Club		

Point Number	1446.3
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	From: West Melton Garden Club, representing 135-140 financial members. We have recently become aware that the 3.5 ha Broadfield Garden (an internationally recognized garden) and a botanical jewel in Selwyn's crown, is now for sale, as the creator David Hobbs, is planning to

retire. This well-established garden has been developed over the past 30years, and Selwyn does not have any comparable public space.

We also understand that SDC is currently looking to create a park/gardens on the land they purchased some 8 years or so ago on

Levi/Weedons Road. The idea is fine, but we can only imagine the massive cost of developing a botanical garden and park from scratch. It would be

at least 15-20 years before it began to resemble a mature area, and would need to have something special to warrant international and national visitors planning to visit.

With this in mind, it would be criminal for the council to not consider purchasing this "ready-to-go" treasure- Broadfield Garden. As it is already very well established, it will immediately continue attracting visitors to the district where they will also support other businesses, and is an amazing venue for so many activities, functions etc. The concept ties in so well with one of the Council's main purposes, that being "to improve the social, economic, environmental and cultural well-being of the residents and communities".

We believe that the purchase of Broadfield Gardenas an established botanical garden and park for residents will assist in attaining all of these aspirational aims.

- Social well-being will be improved through access to a calm and peaceful well-designed garden to enable residents to connect with nature. o Environmental well-being will be enhanced through preserving and maintaining an important botanical environment containing a huge collection of New Zealand indigenous plants.
- Cultural well-being will be enhanced through acquiring a garden which has been recognised by the NZ Gardens Trust as being of international significance and which contains a collection of plants, many of which

  are rare or uncommon in general cultivation.

- Economic benefit for the district will come from the many visitors which the garden will continue to attract including many international visitors and tours. Those visitors will support other businesses in the wider Selwyn District.

	With regards to the Levi Road land, more playing fields as planned in a park-like setting is a great idea, but there could also be other options, and I suggest the council ask the public for ideas on this. While we are aware that many of the councillors may not have a personal interest in "gardens" as such, as a botanical treasure this can not be overlooked. It is only by visiting and talking to the creator that they can appreciate it's value on a national and international level. Action is required now to prevent other potential purchasers taking action, and the district losing this treasure forever. Lynda Collins, Secretary, on behalf of the West Melton Garden Club,
Staff Recommendation	Staff acknowledge the quality and significance of Broadfield Gardens and the opportunity it presents as a formal garden to complement the existing open spaces. However, the proposal does have some costs and risks that need to be weighed up alongside other options. This includes the cost of purchase (and how that could be funded), the cost of additional infrastructure to enable public use, the on-going cost of maintenance and potential revenue opportunities. There are also some limiting factors such as proximity, accessibility and connectivity. It is noted that Council is considering development of a formal garden at the District Park as part of stage 1 development: that would focus on 3 main types or components of formal gardens: botanic plantings (including natives, exotics and floras); sister city garden opportunities; community gardens. Although the acquisition of the garden presents an opportunity for Council to provide a special area of open space that is not replicated anywhere else in the District, staff are of the view that the proposal is difficult to support at this time given the costs and other factors mentioned above. Staff recommend that Council does not purchase Broadfield Garden at this point in time but considers what other mechanisms are available or support it could provide to retain the garden for the district's benefit. In regard to the comment on the District Park in Levi Road, staff can advise that public input into the development of the park has been sought and over 1,600 submissions received. The ideas put forward are currently being considered in terms of the first stage of development but could include open spaces for sports, formal style

	gardens (as noted above), dog-friendly spaces, a range of play opportunities, tracks and trails and natural areas and plantings.

Point Number	1447.6
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	Roading is in a very bad state in our district - the whole of Selwyn! It's an absolute miracle that more are not hurt/maimed/killed due to the abysmal state of the roads.
Staff Recommendation	Submission is acknowledged by Council. Selwyn roads compare favourably with the roads in other districts.

Submitter Number:	1448	**Submitter:**	James Taylor
Point Number	1448.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** Invest in trains and buses not park and ride facilities.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. The Greater Christchurch PT Futures Business Case identified Park N Ride facilities were needed to support the proposed additional direct to City PT services planned, and in the future MRT related district bus connection services. This will reduce commuter travel using single occupant private vehicles. The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case determined that MRT was viable in the city, but not in the surrounding Districts. Councils planned Park N Ride facilities together with additional express and direct bus services will be critical to make these connections to the MRT service. The MRT Business Case process has yet to determine what mode MRT services will take i.e. rail or bus.

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52

	Funding: Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** Environment Canterbury supports the building of three new park and ride facilities at Lincoln and Rolleston, and upgrades of public transport infrastructure. We acknowledge that your preferred option is to do this with co-funding from NZTA Waka Kotahi. We understand that more and frequent public transport services are important to your community and we support funding for a business case to improve infrastructure aligned to the Public Transport Futures programme, noting that we have been advised by NZTA that only a Public Transport Authority can run public transport services. We look forward to working together to support the outcomes of the Public Transport Futures programme, and seeing service improvements for the main urban centres in Selwyn District. This will help to address public transport needs in Greater Christchurch with continuing population growth and increased public transport patronage.
Staff Recommendation	It is acknowledged that the Environment Canterbury has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Previous feedback, and for this draft LTP, there is a strong desire from our residents for an improvement in Metro bus services in urban areas. This includes more penetration of services into new growth areas. Council is agreeable to provide the necessary infrastructure like bus stops to achieve this. Environment Canterbury has not carried out a Service review in Selwyn for some considerable time ever after repeated requests. It is acknowledged the cooperation to progress CGP PT Futures that will provide more direct Metro bus services to the City and the uplift in the frequency and reliability of others. Council is providing a funding contribution to include Selwyn specific outcomes in Environment Canterbury business cases being undertaken. Council also acknowledges Environment Canterbury's intention to investigate 'On Demand' PT services like a MyWay services trialed for Timaru in townships like Rolleston and Lincoln in 2024-27. Council is realistic that Environment Canterbury cannot fund Metro bus services across the wider and rural parts of the district. It has discussed with Environment Canterbury and NZTA staff to establish Councils own funded 'exempt' wider district PT services. Reference to this is now

	included in the adopted 2024-34 Canterbury Regional Land Transport Plan and has been put forward for the updated Regional Passenger Transport Plan to improve the ability for Councils to progress such aspects. This would include reallocating subsidised PT funding from poor performing services to initiatives. Council also needs to ensure that the required PT services from the district accompany any MRT city deployment to ensure the district can connect to this in the City with further express and direct bus services i.e. to Hornby and Riccarton hubs. Councils proposed Park N Rides are planned to facilitate this future outcome in tandem with the necessary PT services provided by Environment Canterbury through the upcoming business case development process being contributed to.

Comments:	Canterbury Regional Council welcomes the opportunity to make a submission on your draft Long-Term Plan 2024-34. As a regional council, ahead of developing our own long-term plan we refined our Council's strategic direction. Our focus is on accelerating regeneration of the natural environment, enabling improved water and land use outcomes, and empowering communities to ensure they are resilient and prepared. Also important to us is championing safe, reliable, multi-modal transport choices, including a commitment to providing modern, affordable public transport services that gives our communities choice as urban areas grow. We recognise that strong action is needed to address climate change for the benefit of current and future generations, and our Ngāi Tahu partnership is central to all of our work. We acknowledge the strength of your partnership with Ngāi Te Ruahikihiki ki Taumutu and Ngāi Tūāhuriri whose takiwā covers your district. As part of our Long-Term Plan structure we have moved away from portfolios of work and focused our work into the three core services that Environment Canterbury delivers: Environmental Regulation and Protection, Community Preparedness and Response to Hazards, and Public Transport. We will provide comment on your long-term plan in that context.

	While we focus on our core services, we recognise the importance of a collaborative, joined-up approach from the region's councils in a number of areas. We look forward to continuing to work together through established channels to advance shared aspirations for our communities.
Staff Recommendation	Council acknowledges the submission.
Point Number	1449.7
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	We would like to acknowledge the experience, expertise and time of your staff and elected members on the Canterbury Climate Change Working Group and Councillor Reference Group under the Canterbury Mayoral Forum. Your Council's contribution in this area in the coming years will be important as implementation of the Canterbury Climate Partnership Plan begins. Canterbury councils will have to increase our efficiency and effectiveness as we respond to climate change, and work together on best practice climate adaptation. We also acknowledge your efforts to make climate change mitigations and adaptation a core part of your planning and decision making, and your work to take actions to reduce your own carbon emissions.
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions.
Point Number	1449.9
Category	Activity > New Public Transport
Comments:	We thank you for your continued support and contribution to the work of the Canterbury Regional Transport Committee. This includes the Committee's recent focus on preparing the Canterbury Regional Land Transport Plan (RLTP) 2024-34. Investment is planned to almost double over the next decade in the region's land transport

	network. This highlights the significant investment that central and local government need to make to create an innovative, resilient and low emission transport system that helps Canterbury thrive for generations.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1449.10
Category	Activity > Low Nitrate Water Sources
Comments:	We support Selwyn District Council's initiative to investigate the feasibility of centralising a source of water that is low in nitrate to supply some drinking water supplies on the Canterbury plains.
Staff Recommendation	The submitters support for investigation of low nitrate water sources is acknowledged. Further investigations into the centralised sources of low nitrate water is budgeted in the LTP in years 1 to 4. Staff recommendation is to proceed with these investigations as budgeted in the LTP.
Point Number	1449.11
Category	Activity > Other Categories identified by Staff > Other Matters
Comments:	We very much appreciate your contribution and commitment to working alongside Mayoral Forum colleagues for the benefit of Canterbury and its communities. The Canterbury Mayoral Forum, and the regional forums and working groups that support it, provide valuable mechanisms for local government in Canterbury and are a key means of demonstrating a strong and unified voice on the priority issues for our region. The value of this strong and unified voice cannot be underestimated. We look forward to continuing to work with your Council as we implement the Canterbury Regional Forums' work programmes, particularly the Mayoral Forum's Plan for Canterbury, over the remainder of this local government term. In particular, we acknowledge your Chief Executive Sharon Mason's role as Chair of the Canterbury Economic Development Forum. We value the collaborative relationship with you under the Greater Christchurch to address the strategic opportunities and challenges facing the sub-region. This includes the recent focus of the Partnership to develop the Greater Christchurch Spatial Plan – a shared blueprint for how the sub-region will grow and change over the next 30 years and beyond, and remain an attractive place to live, learn, work, visit and invest. There is the opportunity for us through this Long-Term Plan to begin to deliver on the Spatial Plan, and in

	doing so, deliver on our communities' aspirations for the future of Greater Christchurch and the places within it.
Staff Recommendation	Submission is acknowledged by Council. and it is noted the Selwyn District Council looks for to a productive collaborative relationship with Ecan.
Point Number	1449.14
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	We support Selwyn District Council's continued investment in infrastructure for reticulated wastewater treatment and disposal systems and stormwater drainage systems across the district, and your strategic planning for development and increasing population density. We commend the Council for its investment in rolling out reticulated wastewater infrastructure for the townships of Darfield and Kirwee. We ask that Council urgently consider extending wastewater reticulation in Kirwee to cover the subdivision of Ascot Park where a large number of human effluent discharge consents will soon be expiring and where we understand some properties are subdividing into smaller sections. We encourage you to continue to work on new infrastructure and the maintenance and upgrading of existing drinking water, wastewater and stormwater infrastructure to ensure compliance with national standards and resource consents, reduce the environmental impacts and respond to the impacts of climate events. We support Selwyn District Council's initiative to investigate the feasibility of centralising a source of water that is low in nitrate to supply some drinking water supplies on the Canterbury plains. We acknowledge our shared involvement in co-governance arrangements for Te Waihora. Through the Whakaora Te Waihora work programme, we are delivering on our shared objectives and we look forward to continuing to work collaboratively on these and other work programmes that will protect and enhance biodiversity and cultural values.
Staff Recommendation	Environment Canterbury's support for water, wastewater, stormwater and surface water infrastructure upgrades is acknowledged. Support for the roll out of wastewater reticulation in Darfield and Kirwee is acknowledged.

	Servicing for the Ascot Park Ltd subdivision in Darfield between Creyke Rd, Cardale St and Telegraph Rd will be extended by the developer at the time of subdivision and will connect into the reticulation already installed. Existing large sections (around 5000m2) have been excluded from the proposed catchment of the Darfield and Kirwee schemes as large lot sections can sustainably maintain onsite treatment. Staff recommendation is to engage with the large lot owners outside the current planned roll out and consider feasibility of extending the network to service these areas. $50,000 for design phase could be added in this LTP with capex to be budgeted in next LTP. Environment Canterbury support for planning for climate change impacts is acknowledged. Staff recommendation is to continue with the proposed LTP budget that includes climate adaptation planning for the 5 waters assets. Staff recommendation is to continue to work with our partners on surface water management and restoration across the District.
Point Number	1449.19
Category	Activity > Other Categories identified by Staff > Emergency management
Comments:	We would like to acknowledge the good working relationship between our Councils' staff, particularly during flood events. We would particularly like to acknowledge your Civil Defence and Emergency Management (CDEM) team who are amongst the most proactive responders in the region. As a regional council and the administrating authority for the Canterbury CDEM Group, we value strong coordination with other Councils and the collaborative approach in preparing for, and responding to, Canterbury's extremely active hazard scape. Environment Canterbury supports all initiatives that mean communities are more prepared, and resilience to future flood events is increased, including infrastructure resilience and protection of lifeline infrastructure. We encourage you to ensure future development on floodplains is appropriate. As we consult on and consider a proposed targeted rate for flood and river resilience work for your district through our long-term plan, we acknowledge and appreciate your Council's comments on this matter

Staff Recommendation	*The submission is acknowledged. Council appreciates the support.*

Submitter Number:	1450	**Submitter:**	Julie Smith
Point Number	1450.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:**		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP		
Point Number	1450.2		
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility		

Comments:	
	Question: We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes two indoor courts. **Project cost:** Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million) **Estimated impact on rates (per year):** $19.91 **Funding:** Rates: 57% Development contributions: 43% * **Comment:** Important to have two courts as it will be a multi sport complex.
Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.
Point Number	1450.3
Category	Questionnaire > Matters For Community Guidance
Comments:	
	Question: Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? Yes **Comment: Comment: Comment:**

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1450.5
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	So important to keep the Sheffield swimming pool open. Important for our families in a growing area. If there is not a pool kids tend to swim unsafely in the river. It is an asset to the community that we don't want to lose.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Submitter Number:	1451	**Submitter:**	Kathleen Liberty
Point Number	1451.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83		

	Funding: Rates: 100% **Comment:** Carry out the work regardless of co-funding but try to obtain funding. Increase use of public transport can improve road safety and may reduce other expenditures (e.g. installation of traffic lights due to increased car traffic).
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council
Point Number	1451.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	
	Question: 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.*

	Project cost: Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** Must spend funds on water quality and public road safety.
Staff Recommendation	The submission is acknowledged.
Point Number	1451.4
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:

Point Number	1451.9
Category	Activity > Lincoln Town Centre Upgrades
Comments:	I read the plan for Lincoln, which is primarily about taking until 2034 to complete the work planned for 2015-2024. This seems ridiculous, because the Lincoln today is completely different to the Lincoln of 2014 (the last planning period). A New Lincoln plan needs to address the astronomical growth rate of present and in the near future (eg. Plan Change 69). In my opinion this should emphasise water quality, sewage and raod safety.
Staff Recommendation	Submission is acknowledged by Council.

Point Number	1451.10

Comments:	I don't understand what is meant by "tech solutions"
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Submitter Number:	1452	**Submitter:**	Shelley Washington for Rod Donald Banks Peninsula Trust
Organisation:	Rod Donald Banks Peninsula Trust		

Point Number	1452.2

Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	Thank you for the opportunity to submit on the Council's 2024-34 Draft Long Term Plan. We value the opportunity to provide feedback. The Rod Donald Banks Peninsula Trust is a Christchurch City Council controlled organisation founded in 2010 for the benefit of Banks Peninsula/Te Pātaka o Rākaihautū residents and visitors. Our vision: Ko te whakawhanake kaitiaki taiao nā te whakahōu ara hīkoi, ara paihikara, te whakaniko rerenga rauropi, te whakamana mātauranga me te mahi tahi ki ngā tāngata e kaingākau kaha ana ki Te Pātaka o Rākaihautū hoki. Developing environmental guardians of the future through improved public walking and biking access, enhancing biodiversity, promoting knowledge and working in partnership with others who share our commitment to Banks Peninsula. **The Rod Donald Banks Peninsula Trust supports:** • Selwyn District Council's work to maintain and improve its sections of the Little River Rail Trail, and the Council's active collaboration with other key parties involved in the trail. • The improvement of walking and biking access to the western Port Hills – such as Gerkins track to the Summit Road. Access to green spaces are something Selwyn residents hold with high importance. Access to recreation in nature on the Port Hills and the Little River Rail Trail is particularly beneficial for mental and physical wellbeing and helping to create environmental guardians of the future. • Contribution of biodiversity funding for the Port Hills, such as for post fire restoration and pest and weed control, including contributions to Pest Free Banks Peninsula. • A new cycle trail around Te Waihora Lake Ellesmere connecting to the existing Little River Rail Trail. A new cycle trail connecting Arthur's Pass to the east coast and to the Little River Rail Trail. These would support regenerative tourism. **The Rod Donald Banks Peninsula Trust seeks in addition:** • A $3,000 SDC Community Fund Grant for the 2025 Banks Peninsula Walking Festival. The Banks Peninsula Walking Festival

	recently marked its 11th year milestone, hosting 25 events across the Christchurch and Selwyn Districts over four weekends, including one weekend in November 2023. Drawing in over 600 participants from diverse backgrounds, the festival offered a wide array of themes, distances, and objectives, encompassing everything from foraging and history to geology and conservation. It has become a cherished and eagerly anticipated fixture on the region's recreation calendar. In 2022, the festival was fortunate to receive a $3,000 SDC Community Fund Grant, which provided crucial financial support and enabled the successful delivery of several popular walks in the Selwyn District. A presentation to the full council in early 2023 by the walking festival coordinator garnered positive reception, underscoring the event's significance to the wider districts. At its core, the festival is dedicated to promoting exploration, sharing information, and fostering an appreciation for the breathtaking natural landscapes of the Banks Peninsula. Over the years, it has grown into a meticulously organized affair, attracting participants from across Canterbury and beyond. Previous editions have been lauded for their diverse range of walks, knowledgeable guides, and the enthusiastic participation of landowners. • Extension of public access from Gerkins Road to Ahuriri Reserve boundary. Gerkins Road is a legal road that works its way uphill from Cossars Road. For much of its length it is aligned with a four[1]wheel drive track and is a popular biking route. The Walking Access Map shows that the legal road no longer extends through to Ahuriri Reserve boundary. The Trust requests that the Council make provision for the marking and construction of this route suitable for walking and biking on an alignment that matches either the legal road or is on a track that is most acceptable to adjacent landowners. If necessary, the Council should use an easement or land exchange to enable the conclusion of the most acceptable route. • Funding support of $20,000 per annum to Summit Road Society as 28% of their land is in Selwyn District Council and they provide an excellent role in fostering public access for recreation and for biodiversity enhancement. Support for access to Omahu Reserve and weed and pest control.
Staff Recommendation	Council administers a range of community grants. Submitters seeking Council funding for community led projects are encouraged to view information on grants available and associated funding rounds on Council’s website at Selwyn District Council - Funding & Grants : or to email selwyncommunityfund@selwyn.govt.nz . Council notes the submitter's support for the Summit Road Society submission.

Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	er Selwyn Huts is a historical Selwyn District settlement dating from the early 1900's. Early part of historical settlement which Heritage NZ is investigating. Close community, we all know each other help support families and children. This is unique and does not happen in Rolleston Lincoln or the modern subdivisions the council seems to be enamored by. Upper Selwyn Huts need to be retained for perpetuity as important part of the history of Selwyn District. Many families have association with this settlement for many generations. History needs to be retained and restored not destroyed as many have been.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Submitter Number:	1455	**Submitter:**	Jeremy Shepherd
Point Number	1455.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		

Comments:	
	Question: You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** Provide more buses and bus routes, bust stops should only be a sign on a post, no need for shelter and real time information. If there are plenty of frequent buses people do not need to go to a park and ride facility. Therefore, there is no maintenance cost for the car parking area, thus keeping spending to a minimum
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. The 2020 Greater Christchurch PT Futures Business Case identified Park N Ride facilities were needed to support the proposed additional direct to City PT services planned, and in the future MRT related district bus connection services. Environment Canterbury who provides Metro Bus Services, needs to undertake more regular service reviews in Selwyn to take account of urban growth. Council is also providing an annual bus stop improvement programme that provides shelters and real time information systems.

Comments:	
	Question: 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next

	to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** Keep spending to a minimum use what you have, not build what you would like.
Staff Recommendation	The submission is acknowledged.
Point Number	1455.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. Staff Recommendation	Submission is acknowledged by Council.
Point Number	1455.11
Category	Activity > Council's Office Improvements
Comments:	No money should be spent remodeling the council house.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	1455.12
Category	Activity > Infrastructure DC
Comments:	Developers should be responsible for developing the whole area not just building houses. It is surprising the council did not realise this before the huge amount of development in the Rolleston area.
Staff Recommendation	Submission is acknowledged by Council. The submitter appears to support the introduction of the community infrastructure development contribution. It is noted that developers are required to build the roading, water and wastewater services for their developments and are required to contribute to other headworks or road upgrades that are needed as a result of growth. They will also often develop a reserve in the subdivision (although they obtain a credit for this) and are required to pay for development or upgrade of reserves and

	community facilities beyond the subdivision where these assets are needed for additional capacity from growth.
Point Number	1455.15

Organisation:	Ellesmere Food Bank
Point Number	1456.1
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	See attached letter: I believe there should be a fund were food banks get $20,000 a year to help keep stock up, the need out there is extremely high. Letter provided details and number of the clients that the Ellesmere Food bank support. The concluding paragraphs read: Our community is growing very fast, sadly, with growth comes mor social problems, more stress, more sickness. Whatever problem a person has before they come here, when they get here, they will still be here. It ,might take a little while to show up. The drunk keeps drinking, the thief keeps stealing, the drugy keeps using. All mental health, depression, anxiety, postnatal depression etc, lifes stresses. We work at the cliff face, we see what stress does to families, the violence, the broken homes. With growth, the developer makes huge amounts of money. Real estate push for top dollar. The higher the value, more money for councils.

Comments:	**Question:** Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? No **Comment: Comment: Comment:**

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1458.6
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Why is the cost so high. Too many consultants and reports?
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1458.8
Category	Activity > Providing safe drinking water
Comments:	Install a filtered water station at Tussock Square
Staff Recommendation	The submitters preference for locations in the community where dechlorinated water can be obtained for household use is acknowledged. Staff have investigated options and can provide modified drinking fountains/bottle filling stations with cartridge filters to remove chlorine at key community hubs across major townships in the district. Use of off the shelf products will reduce costs and allow the number of filling points to be scaled with demand. The filling points are estimated to have capital installation cost $20,000 (including concrete apron) plus $20,000 annual operational cost. Staff recommendation is that dechlorination is best achieved at a household level where costs are met by those who wish to benefit from chlorine removal.
Point Number	1458.10
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	Too much building going one our rural township. Subdivide Rolleston. Leave Darfield alone. Infrastructure cannot cope e.g. DR School.
Staff Recommendation	A key assumption for the Long Term Plan is the population projections. As each town grows, there is a need to understand its future, as well as upgrade its infrastructure.

	This is generally done through Strategic and Spatial Plans as well as through working with our government partners on provision of services (e.g. schools). As growth continues to exceed the projections, more projects are needed quicker to meet this growth.
Point Number	1458.11
Category	Activity > Chlorination
Comments:	Do not support fluoride or chlorine in the water. Mass medication.
Staff Recommendation	The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health. The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1458.12

Category	Activity > Planning Further Community Facilities
Comments:	I would like to see all communities treaded fairly and equal in regards to their community Hall/Centre. One community should not gain greater with other communities at such a loss.
Staff Recommendation	The submission is acknowledged. Over the next year Council will be reviewing the network of public-facing facilities across the Selwyn

	District (libraries, community centres, halls, sports centres and pavilions). This work will take a holistic look at all facilities to plan for short, medium and longer-term community needs. It is recognised that a number of Council owned halls and centres have an extensive history in Selwyn and it is also recognised that there are some halls / community centres that are now underutilised by the local community and may be facing large costs in maintenance and / or remediation. The review will help Council better understand issues, opportunities and barriers and to consider alternative options for the future.

Comments:	**<u>Local Alcohol Policies (LAPs)</u>** 1. Selwyn Council is currently undergoing a review of it's Local Alcohol Policy. So far Hospitality New Zealand has not been asked for any input into this re view but we believe that it is important that there is an industry voice included in considerations before a draft recommendation is put out for consultation. We would welcome the opportunity to meet with t he council through this process.		

2. Alcohol laws in New Zealand aim to reduce the harm caused by the excessive or inappropriate consumption of alcohol. We believe that well run on-licensed environments are the safest place for people to consume alcohol in NZ. Hospitality New Zealand is committed to delivering training and skill development across the industry to further enhance host responsibility in this sector.
3. Prior to the implementation of the Sale of Liquor Act in 1989 there were about 3000 licenses in NZ and since then the number of licenses has increased to just over 11,000. Conversely, liquor consumption in New Zealand has decreased 22% since 1986. Therefore, increased access (more licenses and more places to purchase alcohol) has not translated into higher consumption.
4. We believe a holistic approach needs to be taken to support safer drinking in New Zealand. We believe councils have many options available to address alcohol harm while maintaining the community and economic benefit of hospitality. Some of these tools include:
    - National settings under the Sale and Supply of Alcohol Act.
    - District Licensing Committees and their discretion around approving licenses, and the ability to issue infringement notices and license suspensions for noncompliance.

- Accords and stakeholder agreements to drive inner city safety improvements. Ashburton has a very active Alcohol accord led by ACADS.
- Host responsibility training: eg Responsible Service of Alcohol (HNZ), Serve Wise (HPA).

1. Hospitality NZ will work with you to ensure regulatory agencies enforce the Act as it was written and intended, not attempting to use functions of the Act such as appeals to meet their own policy preferences.
2. We will also consider appropriate amendments to the LAP system, cutting down on the time and financial cost of implementation, and/or deferring to DLCs to administer appropriate restrictions, and mitigate further unnecessary expense being incurred by local councils, associations and individual businesses in the establishment of LAPs.

Staff Recommendation

The Local Alcohol Policy is under review currently and Hospitality NZ are on our list of groups for consultation in due course

Comments:	**Short-term Rental Accommodation (STRA)** 1. The STRA sector has grown rapidly and it is now a key part of the tourism industry in New Zealand. Rapid visitor growth and a lack of commercial accommodation development in many of the busiest tourist regions have also created increased demand for STRA. While competition in any sector is healthy, the unregulated nature of STRA presents an uneven playing field vis a vis traditional commercial accommodation providers. 2. Commercial accommodation operators are seeking a fairer playing field around rates and regulations, particularly targeted at STRA properties that are whole-of-house rentals operating more than 90 days a year. The STRA sector operates mainly in residential areas, only pays residential rates, operates with less regulation, and often escapes appropriate taxation. 3. In some parts of the country, the preference for rental property owners to convert to Airbnb or similar, is resulting in a lack of available long-term rental accommodation for workers and families, and impacting on the community feel of suburbs. 4. Some Councils such as Rotorua and Queenstown have made moves to define STRA accommodation in their District Plans, so these providers – when occupied above a certain number of visitor nights – are deemed to be commercial operators and would be subject to commercial rates and regulations. Nelson and Christchurch have made similar moves – however, enforcement remains the issue. 5. At a Central Government level, we are advocating for the creation of a national register of short-term rental accommodation properties, and ensuring appropriate health and safety and compliance requirements on peer-to-peer house letting is set at a national level, removing the need for local councils to come up with the rules and moving towards fair regulation of STRA operators. 6. Hospitality NZ will work with you to define commercial accommodation in your area in a way that captures whole-of-house STRA listings and ensure rates are appropriately collected from these businesses.

Staff Recommendation	The issue of STRA is a District Plan issue and not a Long Term plan issue.

Comments:	***Tourism Infrastructure Funding*** 1. We recognise that tourism and hospitality use and benefit from a wide variety of mixed-use infrastructure. Despite some Government funding, tourism areas are still experiencing a large funding shortfall, primarily for infrastructure heavily relied on by tourists in towns and regions with a small ratepayer base. This has led to councils considering rates rises or bed taxes to fund infrastructure and tourism promotion. 2. We do not support the current ad-hoc way some councils are looking to impose levies and rates (and taxes if they are allowed to). This can significantly increase the cost to visitors in some areas, shift pressures of visitor numbers and infrastructure to neighbouring councils, and carry an impact for particular businesses. 3. Instead, a national strategy for tourism value capture and distribution of those funds is needed, allowing a source of funding for local government to use on relevant infrastructure and tourism activities, and avoiding the piecemeal region by region approach. Along with a number of parties, we are working at a national level to address tourism funding – in the meantime we do not see a council-by-council approach as conducive to a national, equitable approach.

Comments:	**<u>Night time Economy</u>** 1. As 24-hour economies gain traction around the world, Hospitality New Zealand believes there's an opportunity for Aotearoa to follow suit. Following the infamous Sydney lockouts, New South Wales Government has developed a 24-hour Economy Strategy aimed at building a vibrant and strong 24-hour economy where the principal activityis not about the consumption of alcohol. The strategy covers things like integrated planning to encourage collaboration, diversification of night-time activities, enhancing mobility and connectivity around the clock, and changing the narrative around being open at night. The long-term 24- HourEconomyStrategyalsoenvisages"playbooks"andsupportservicestohelpbusinessesnavigategrantsandlicences,moreaffordablespacesfortheartssector,simplerliquorlicencingandareviewoflivemusicandnoiseregulations. 2. Hospitality NZ believes this type of strategy holds some opportunities for New Zealand communities, and would welcome the opportunity to work with your council to explore how this could look in your area. 3. Whilst the Selwyn district may not look towards a 24-hour economy, a late night time strategy holds opportunity for growth. Particularly in the CBD area of Rolleston the Council should consider a forward looking strategy to ensure that there is an entertainment precinct worthy of NZs next City and not held back by restrictions that are more suitable to sleepy towns. 4. Considerations such as liquor bans in hospitality precincts to prevent side-loading, making more council space available for encroachment of hospitality businesses, supporting a vibrant night time economy with public transport and spaces for taxis and ridesharing can all be beneficial to the development of precincts. Consideration should also be put into defining a CBD area in any future local alcohol policy to allow for the better development of night time activity to support a growing population. Selwyn has an opportunity to lead NZ in this area and increase its appeal as a fun and vibrant district.

Comments:	I grew up in Lincoln during the 1950s. It is being expanded for too fast and too much without proper transport and infrastructure. More basic maintenance in places like Prebbleton (the forgotten town). Should be re-thought through.
Staff Recommendation	A key assumption for the Long Term Plan is the population projections. As each town grows, there is a need to understand its future, as well as upgrade its infrastructure. This is generally done through Strategic and Spatial Plans. However, as growth continues to exceed the projections, more projects are needed quicker to meet this growth.

Comments:	Rates are a very serious problem on a sheep and beef farm like mine. Sheep and beef are dropping, rates are rising to almost gross farming income. I ask SDC to reduce rates, do less services and put off some employees as the government are doing.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1462.7
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	$290,000 to close - why?
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

CENTRAL PLAINS WATER LIMITED'S SUBMISSION ON SELWYN DISTRICT COUNCIL'S DRAFT LONG TERM PLAN 2024-2034

To: Selwyn District Council

From:

Central Plains Water Limited

PO Box 9424

Tower Junction

Christchurch 8149

Susan Goodfellow (Chief Executive Officer)

Central Plains Water Limited's submission on the Selwyn District Council's Draft Long Term Plan 2024- 2034 is set out in the attached document.

Central Plains Water Limited wishes to speak to their submission at the public hearings.

Susan Goodfellow

Chief Executive Officer

Central Plains Water Limited

On this 1 st day of May 2024

CENTRAL PLAINS WATER LIMITED'S

SUBMISSION ON SELWYN DISTRICT COUNCIL'S

DRAFT LONG TERM PLAN 2024-2034

SDC is a key partner in the Central Plains Water Enhancement Scheme

In May 2000, the Central Plains Water Enhancement Scheme Steering Committee, a joint committee of the Selwyn District Council (SDC) and Christchurch City Council (CCC), was established and funded to assess the feasibility of water enhancement schemes for the Central Plains area. This feasibility study confirmed the validity of an affordable scheme.

In April 2003 the Central Plains Water Trust (CPWT or the Trust) was established to replace the Steering Committee and progress the project. The Trust is a public venture, with Trustees appointed by SDC, CCC and Ngāi Tahu. The first role of the Trust, following establishment, was to raise sufficient share capital to fund the process to obtain the resource consents necessary to proceed with the project. The consents were granted and are owned and administered by the CPWT which licences the use of these consents to Central Plains Water Limited (CPWL).

CPWL reports to the CPWT quarterly on compliance with resource consents, strategic initiatives and the status of projects receiving CPWL Environmental Management Funding each year (this Fund is further discussed later in this submission). CPWL also prepares an annual report to the Trust detailing the effects of the scheme on water quality and water levels in the Selwyn Waihora Catchment. This report is independently reviewed and forms the basis of the Trust's Annual Sustainability Report. Further, CPWL provides support to the Trust when the Trust is reporting to SDC.

About the Scheme

CPWL was established in September 2003 and is responsible for the implementation and operation of the Scheme.

The Scheme is a large-scale community irrigation scheme that provides reliable and cost-effective water to farmers in the Selwyn District, with the

consent to irrigate 63,000 hectares of farmland between the Rakaia and Waimakariri Rivers, from the Malvern foothills to State Highway 1.

The Scheme was constructed in three stages between 2014 and 2018. It is the largest irrigation scheme in the South Island and its establishment cost was in the order of $474M. The Scheme is currently owned by 397 farmer shareholders and operates on co-operative principles. Shareholders include dairy, cropping and beef and sheep farmers.

The Scheme has been designed to have an 80-year lifespan with an expectation that 100 years of service will be achieved. As such it is a multi-generational investment providing long term community benefits.

The Scheme's business activities, increased food production resulting from reliable water, and environmental outcomes directly benefit the Selwyn District, while also benefiting the Canterbury Region and beyond.

Economic benefits

The Scheme contributes significantly to Canterbury's economy. In a 2022 assessment undertaken by BERL the Scheme had a direct expenditure for the year of $268 million, which generated direct gross domestic product of $150 million, while contributing a total (direct, indirect, and induced) benefit of $293 million to Canterbury's gross domestic product. In the same year, the Scheme generated direct employment of 893 full-time equivalents and 1,816 indirect full-time equivalents in the Canterbury region.

Environmental benefits

Key to establishment of the Scheme was SDC's and CCC's desire to protect the quality and quantity of water in the Canterbury Plains, including switching land users from groundwater abstraction to low nutrient alpine sourced water. With this, the Scheme's development was closely aligned with the vision of the Canterbury Water Management Strategy (CWMS) and the Scheme is a key contributor to achievement of the CWMS Outcomes.

CPWL's activities contribute to improving and protecting the values associated with Te Waihora/Lake Ellesmere which is the most important wetland habitat of its type in New Zealand.

CPWL strives to be a world leader in environmental and sustainable practice by protecting and enhancing the surrounding waterways. This is principally achieved by:

(a) Protecting the aquifers - By taking low nutrient alpine water from the Rakaia River in a controlled way, as provided for by the Rakaia River Water Conservation Order (RWCO), farmers no longer have to abstract water

from groundwater wells and artesian supplies thereby leaving that water in the aquifers; and

(b) Controlling and reducing loss of nutrients - Nutrient levels on farms in the Scheme are monitored and audited, and reductions in nutrients lost is one of the key environmental pillars on which the Scheme is built.

In 2014/2015 100 million cubic metres (m3) of shareholders consented annual groundwater volume (the total consented annual groundwater take is over 200 million m3) was used by CPWL shareholders. This decreased to 32 million m3 in the 2022/2023 irrigation season (i.e., approximately 16% of the consented annual groundwater volume used). Leaving the water in the aquifers improves the flow in streams that are linked to Te Waihora/Lake Ellesmere.

CPWL requires that all Shareholders have Farm Environment Plans (FEPs) to ensure that farmers are carrying out good management practices on their farm. The FEPs ensure that nitrogen and phosphorous losses resulting from farming activities are reduced to allow water quality to improve over time. CPWL's resource consents require reductions in nitrogen/nitrate losses. By 2022, dairy farms were required to reduce their losses by 30% (from their annual average loss between 2009- 2013) and dairy support by 22%, irrigated sheep and beef farmers by 5% and arable farmers by 7%. Collectively, from 2022, CPWL farmers achieved a reduction of 936 tonnes and are now 29% under the pre-Scheme catchment load.

Directly benefiting Te Waihora/Lake Ellesmere, the Scheme has to date contributed $350,000 to the Te Waihora Environmental Management Fund that is managed by Te Rūnanga o Ngāi Tahu for the restoration of Te Waihora/Lake Ellesmere. CPWL also contributes 12.5% of the annual costs, approximately $44,000 per year (on average) to open the Lake to the sea.

Also benefiting Te Waihora/Lake Ellesmere is the CPWL Environmental Management Fund (EMF). This fund is administered by a Trust that includes representatives from the community, iwi, environmental and recreational interests, and Trustees that are appointed by SDC and CCC. The Trust makes the decisions on which projects to fund, with projects selected to date addressing wetland enhancement, minimising nutrient losses to lowland streams and riparian planting. To date the EMF has distributed over $630,000 to environmental-related initiatives including the protection of wetlands and Significant Natural Areas, and planting over 70,000 native trees.

CPWL's pipe network, which includes a 2.4m diameter pipe under the Hororata River, also supports Canterbury Regional Council's three cumec

Near River Recharge (NRR) project. This project enables the recharge of groundwater with surface water in an area of the south bank of the Hororata River. The recharged groundwater then supplies the Hororata River and other lowland streams downstream from the recharge point in dry years to support flows, fish populations, invertebrates, and additional improvements in the ecology of the rivers and streams. This NRR project is world leading in terms of its scale and environmental focus. The project relies on CPWL's Rakaia River intake, Stage 1 headrace, and Stage 2 pipe network.

Adding to community resilience

At its very core, CPWL's provision of reliable irrigation and stock drinking water bolsters the farming community's resilience to the potential effects of climate change. At the same time, the Scheme's infrastructure has the potential to benefit communities in ways that go well beyond the 'on-farm' benefits. For example, the Scheme currently provides 20 connection points to supply water to Fire and Emergency New Zealand for firefighting purposes, and the pipeline has the potential to supply raw water to drinking water treatment plants should an event adversely impact council infrastructure.

CPWL has a particular interest in maximizing the value gained for communities from the Scheme's infrastructure (within the constraints of the resource consents held for the Scheme) and advancing community resilience to the effects of climate change and natural disasters such as earthquakes and extreme weather events.

CPWL welcomes the comments in SDC's Long Term Plan 2024-2034 Consultation Document on the need to reduce greenhouse gas emissions and plan for resilience to climate change.

CPWL commends SDC for being one of the earliest signatories to the New Zealand Local Government Leaders' Climate Change Declaration 2017, for developing and implementing plans to reduce greenhouse gas emissions, and for contributing to the Canterbury Climate Change Risk Assessment (2022). Sound district planning and emergency management planning is key to ensuring long-term resilience in the Selwyn District.

CPWL welcomes SDC's intent to "play a more active role in our district's economic development so that continued development in Waikirikiri Selwyn is intentional, sustainable, and strategic", and to "promote innovation, and showcase Waikirikiri Selwyn's competitive strengths". CPWL's infrastructure, environmental management systems and programs, and cooperative approach to business offers a wealth of opportunity to economic development in the district while at the same time enhancing environmental values and building resilience to the potential effects of climate change. The RWCO and Lake Coleridge's role in storing

	water for community and environmental outcomes are vital parts of the equation that need to be protected. The Consultation Document rightly states that SDC works “closely with other councils and Government agencies to advocate for our district and make sure we are all working together for the wider good of 5 the region” and that they “play a role in advocating, facilitating, and supporting these [i.e. government and non-government agencies, along with many other groups] across Waikirikiri Selwyn”. CPWL considers that there is an enormous opportunity to work closer with business, in particular with owners and operators of major infrastructure that can play a vital role in building resilience across the district and the Canterbury Region. CPWL welcomes an opportunity to discuss SDC’s priorities for building community resilience, and to consider how CPWL could assist in this regard. Central Plains Water Limited wishes to speak to their submission at the public hearings. Susan Goodfellow Chief Executive Officer Central Plains Water Limited On this 1 st day of May 2024

Comments:	Cut staff, cut spending. I don't support the building changes at Headquarters.
Staff Recommendation	That the submission is acknowledged by Council.

	With the rapid growth of the district the workload has increased significantly. The Council has endeavoured to keep the headcount to an optimal level.
Point Number	1464.8
Category	Activity > Strengthened Partnerships
Comments:	$300,000 Mana Whenua???
Staff Recommendation	Council is committed to responsible use of ratepayer funds. Council considers that investing in relationships, and actively working with local Runanga , is not just the right thing to do under Te Tiriti o Waitangi, it's also an efficient way to achieve positive outcomes for all Selwyn residents. Council recognises it has a large volume of often complex needs and time-consuming demands that its places on Runanga representatives, who are generally volunteers, in order to assist Council meet its legal compliance requirements, develop and implement strategy, guide adherence to cultural protocols and good practice. The mechanism of contribution towards the two Runanga is considered an appropriate and cost-effective way to support the contribution of Runanga representatives to supporting Council to achieve positive outcomes for all Selwyn residents.
Point Number	1464.9
Category	Activity > Council's Office Improvements
Comments:	I don't support the building changes at headquarters. Reduce staff and stick to infrastructure.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.

Submitter Number:	1465	**Submitter:**	Anthea Laugesen

Point Number	1465.1
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** We do not want money we do not have for this project.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP
Point Number	1465.2

No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1465.7
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	Stop giving money to individuals for sport or culture activities. Get back to fundraising or corporate funding.
Staff Recommendation	The submitter's comments are noted. Community funding is largely focused on community projects delivered by community groups and organisations with a small amount of funding available to individuals through Secondary School Tertiary Scholarships and some of the discretionary funds.

Point Number	1465.8
Category	Activity > Walking and cycling improvements
Comments:	We do not need to spend millions on cycle ways during a recession. This is a luxury not essential.
Staff Recommendation	Submission is acknowledged by Council.

Point Number	1465.9
Category	Activity > Council's Office Improvements
Comments:	The Selwyn Council building does not need upgrading. Keep staff working from home or reduce staff numbers.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.

Point Number	1465.10
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	The council needs to stop spending money they do not have. We do not want to borrow more and have our rates put up. People are struggling now without having the rates going up.
Staff Recommendation	That the submission is acknowledged by Council. That the Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.

Submitter Number:	1466	**Submitter:**	Eric Collis

Point Number	1466.1
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	1. Historical value The Mayor says in the Long Term Plan that "we're focussed on looking after what we already have" - how about you look after us! An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council unanimously determined that 'Hut licences and subsequent renewals are short term and ultimately for a finite period' . At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts. We need to submit requesting this historical significance be recognised and for the Selwyn Huts to be listed as an historical site on the District Plan and for the term for us being here to be extended to protect this history. 2. District wide rates Everyone needs to submit on the LTP asking for us to be put on DWR for Water and Sewer.

The reasons being :

(a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequant upgrade, the requirement we were told for being put on DWR.

(b) We have already paid for the water upgrade.

(c) We should not be discriminated against and should be treated like everyone else in the district.

(d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We should also be added to the DWR for Sewer and Water like everyone else.

(e) Towards25 LTP Document stated:

“The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities.”

	This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table. From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston. (f) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community." (g) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Sekwyn Huts Future Occupancy Strategy" report dated 04/03/2024. (h) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners. (i) Additionally we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future

	Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Submitter Number:	1467	**Submitter:**	Robina Jorgensen
Point Number	1467.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:** More bus stops and perhaps a bus route that operates around Rolleston. If the bus timetable was to be more frequent between the city or Hornby and Rolleston then I would personally use it more than I currently do.		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council. Environment Canterbury is considering developing a business case for additional direct services for Rolleston and Lincoln in 2024-27 and improving the frequency of		

	other key Metro PT services such 5 (Rolleston) and 80 (Lincoln) is also being planned. Environment Canterbury is also investigating 'On Demand' PT Services as another option within larger townships.

Point Number	1468.12
Category	Activity > Chlorination
Comments:	1. Water chlorinated water tastes awful.The water in Prebbleton was excellent quality before changes.Refuse fluoridation of water.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies. The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.
Point Number	1468.13
Category	Activity > Planning Further Community Facilities

Comments:	1. Prebbleton Hall – community has access to Prebbleton School Hall or Lincoln Events Centre.Events Centre should be a shared facility for Selwyn (Prebbleton to Leeston) as should be the library a regional shared resource.
Staff Recommendation	The submission is acknowledged.
Point Number	1468.14
Category	Activity > New Public Transport Services
Comments:	1. Express Bus Prebbleton – City is a great addition? Thanks
Staff Recommendation	A primary purpose of the Park N Rides is to support additional express and direct bus services planned by Environment Canterbury. Environment Canterbury is considering developing a business case for additional direct services for Rolleston and Lincoln in 2024-27. Improving the frequency of other key Metro PT services such 5 (Rolleston) and 80 (Lincoln) via Prebbleton is also being planned.

Comments:	Council entrance upgrade – not required.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	1469.9
Category	Activity > Planning Further Community Facilities
Comments:	Many rural halls should be made free of charge to rural communities including meetings, sports, social.
Staff Recommendation	Council has previously determined it needs to take a direct and future focused, whole of district approach to planning for community centres and reserves across the district. This includes a more direct operational oversight of how centres and halls operate to ensure compliance with relevant legislation, improved access (not limited to certain groups communities as previously) and to better manage costs. Reasons behind Council taking increased responsibility in regard to Council Committee managed centres / reserves include poor levels of facility maintenance, underutilisation by residents of centres and halls, little / no revenue generation returned to Council, and problems for Council controlling the nature and cost of the invoices generated by Committees under the previous arrangements.
Point Number	1469.10
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	No to street light upgrades.
Staff Recommendation	Submission is acknowledged by Council. Upgrades will improve light spill and increase the life span and reduce power consumption - this will reduce the cost to SDC.

Staff Recommendation	Submission is acknowledged by Council.

Submitter Number:	1470	**Submitter:**	Karen Mears for Glentunnel Resident Committee
Organisation:	Glentunnel Resident Committee		
Point Number	1470.2		
Category	Activity > Other Categories identified by Staff > Parks and Reserves		
Comments:	Glentunnel residents committee would like to see potable water at the camper van /caravan dump station beside the Glentunnel hall for filling their water storage. These people are filling up their potable water from the drinking fountain at present.		
Staff Recommendation	Staff support the submission as this is a minor cost project that can be accommodated within existing budgets, and it is possible that		

	Council could get financial support from the NZMCA for this work. Staff recommend that a potable water point is installed at the Glentunnel dump station from existing budgets and the NZMCA is contacted to see if they would contribute to the cost.
Point Number	1470.4
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	That Heritage funding is available for small local community museums and heritage in general in Selwyn.
Staff Recommendation	The submitter's point is acknowledged. Council acknowledges the importance of promoting and protecting heritage as it improves community wellbeing by connecting people and building the identity of Waikirikiri Selwyn. In 2023 Council approved the Selwyn Strategic Heritage Plan 2023-2027. The purpose of the Heritage Plan is to ensure there is a focus on improving support for heritage activities and supporting the work of local history groups and residents who are strongly motivated to collect, protect and enhance local place-based heritage. Council has two community heritage funds available: • Community History Fund which is to support kaitiaki (guardians, conservators, and protectors) communities and community groups for various history projects (and the operating costs of community history groups). • Heritage Protection Fund which is to encourage and assist owners with work required to maintain and enhance heritage buildings in the District as well as work required on protected trees. More information about community grants is available on the Council's website at https://www.selwyn.govt.nz/services/funding-And-grants
Point Number	1470.5
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	Glentunnel supports the submission by Hororata for SDC to employ local coordinator for the small reserves, potentially Greendale,

	Hororata, Coalgate, Glentunnel, Whitecliffs, Lake Coleridge in the Malvern ward for the next financial year. That there are sufficient budgets for maintaining the local reserves and walkways in the Malvern ward. These small reserves are one of the main assets in the little townships.
Staff Recommendation	Staff do not support the introduction of a paid person to act as a reserves coordinator in the Malvern area. The proposal has cost and level of service implications in terms of an additional resource for this area. Staff concur that there has been teething problems in the transition from committees to contract but are confident this can be resolved by setting up improved communication channels, utilising local volunteers as the 'ears and eyes' to report matters of concern and providing additional support. The Reserves Operations Team will look to ensuring there is a consistent point of contact in Council to support the rural reserves. It is noted that there is opportunity for budgets to be provided to resident's associations which could be used to support local initiatives including on reserves. Staff recommend that the employment of a local coordinator for Malvern Reserves is declined and processes are put in place to improve communication between local communities, Council staff and contractors on reserve matters and to ensure that there are clear channels for reporting and addressing issues. Budgets have been included in the draft LTP for all reserve areas including those in the Malvern area to provide a consistent level of service.
Point Number	1470.6
Category	Activity > Other Categories identified by Staff > Road Safety
Comments:	Glentunnel supports submissions on finishing the widening of Leaches road to the Windwhistle stop sign. Glentunnel supports submissions on major signage improvement for the Windwhistle stop sign, by lobbying NZTA for the improvements. Also for safety barriers down Scotts cutting to the Rakaia gorge bridge by lobbying NZTA.
Staff Recommendation	The submission relates to aspects that are not the Council's responsibility. Council is working with NZTA and are supportive of safety improvements in our townships along State Highways.

Point Number	1470.7
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	That the SDC reinstate their policy on making landowners responsible for keeping road side, particularly at intersections, hedges and trees cut back to improve better visibility for motorists.
Staff Recommendation	Submission is acknowledged by Council. This is continually being addressed. Council is promoting our berm policy.
Point Number	1470.8
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	It is important is important that the community and infrastructure needs of the people of Glentunnel are provided for in the Selwyn Long-Term Plan 2024-2034, these needs include but are not limited to representation in Council decision making, public stormwater management and upgrading the public drinking water supply infrastructure in Glentunnel." Continued improvement of storm water and drainage infrastructure for Glentunnel village Continued maintenance and up grading potable water supply to the Glentunnel residents. Often residents are without water due to leaking pipes and other maintenance issues. This is not necessarily related to residents having not enough water storeage.
Staff Recommendation	The submitters comments are acknowledged. Staff recommendation is to proceed with the 5 waters budgets as proposed in the LTP.

Submitter Number:	1471	**Submitter:**	Margaret Morrison
Point Number	1471.1		

Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	
	Question: You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** Some rapid transit buses into city please. During daytime eg for non workers.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. A primary purpose of the Park N Rides is to support additional express and direct bus services planned by Environment Canterbury. Environment Canterbury is considering developing a business case for additional direct services for Rolleston and Lincoln in 2024-27. Improving the frequency of other key Metro PT services such 5 (Rolleston) and 80 (Lincoln) is also being planned.
Point Number	1471.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau

Comments:	
	Question: 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** English name we all understand please.
Staff Recommendation	The submission is acknowledged. Selwyn District Council considers that, when public buildings incorporate Maori names and cultural design elements, they are not merely symbolic gestures. Instead, they represent a tangible effort to honour the Treaty's obligations and foster a sense of belonging for all New Zealanders.
Point Number	1471.3

Comments:	
	Comment: Don't know.
Staff Recommendation	The submission is acknowledged
Point Number	1471.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	
	Comment: Build one with room to expand later.
Staff Recommendation	It is acknowledged that the submitter has selected Option 2, build the community recreation and sports facility at Darfield that includes one indoor court.
Point Number	1471.5
Category	Questionnaire > Matters For Community Guidance
Comments:	
	Question: Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1471.9

Category	Activity > Strengthened Partnerships
Comments:	Why do we need strengthened partnership with Mana Whena when all citizens and ratepayers should be treated the same?
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognises the importance of supporting Iwi participation. Council is committed to ensuring inclusivity and that ensuring everyone has an opportunity to benefit. Council considers this can lead to better outcomes for the whole community. For example, Iwi knowledge about local environments can be invaluable in planning and resource management projects. For Council to include Iwi contribution to count, by ensuring Iwi perspective has an opportunity to inform decision making on its committees, reflects our commitment to the Treaty and our shared responsibility to create a more equitable and respectful society.
Point Number	1471.10
Category	Activity > Potential Requirements To Fluoridate
Comments:	Fluoride – yes
Staff Recommendation	The submitters preference to fluoridate community drinking water supplies is acknowledged. The cost to fluoridate supplies is estimated at $7.9m over the LTP period. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.
Point Number	1471.11
Category	Activity > Chlorination
Comments:	Chlorine – no.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.

Point Number	1471.12
Category	Activity > Walking and cycling improvements
Comments:	Cycling tracks in right places not Hoskyns Road (new track)
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1471.13
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	Neighbours permission for log burners please. Neighbours need permission for 3 dogs but not for a woodburner.
Staff Recommendation	The regulation for log burners is controlled by ECan, as they look after air quality.
Point Number	1471.17
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Comment:** 1. Build one with room to expand later.
Staff Recommendation	It is acknowledged that the submitter has selected Option 2, build the community recreation and sports facility at Darfield that includes one indoor court.
Point Number	1471.18
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	But needs to be more user friendly than current sports centre online booking system. Not everyone has a computer. Some has smart phones only.

Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP. Face to face interaction will continue to be an important part of how we interact with our communities. Our digital approach is designed to make things more streamlined, connected and efficient.
Point Number	1471.19
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	Alas this is all as clear as mud! Will the Council be doing as they wish and not what Ratepayers want? All rates Maori or not should be the same. Why do we need strengthened partnership with Mana Whena when all citizens and ratepayers should be treated the same?
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognizes the importance of partnerships; building strong partnerships with iwi is vital for Council to fulfill its obligations to the entire community. Te Tiriti O Waitangi (Treaty of Waitangi) is a founding document of New Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with iwi, to have any meaning, requires consideration of iwi position and contribution to discussion/debate. Council is required by s 108 Local Government Act 2002 to have a policy on the remission and postponement of rates relating to Maori freehold land. When developing this policy staff have considered Council's position regarding rates postponement and remission based on these legislative requirements.
Point Number	1471.20
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	Alas this is all as clear as mud! Will the Council be doing as they wish and not what Ratepayers want? All rates Maori or not should be the same.
Staff Recommendation	The submission is acknowledged.

Council notes the concern with the level of information provided. Improvements regarding the presentation and provision of information will be considered for future consultations.

Question: 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.*

Project cost:
Year 1: $3.05m

Estimated impact on rates (per year):
$10.46
Funding:
Rates: 100%

Comments:	We should all pay same rates. We are all one people. Whatever ethnic we aline too.
Staff Recommendation	Council acknowledges the submission. Council is required by s 108 Local Government Act 2002 to have a policy on the remission and postponement of rates relating to Maori freehold land. When developing this policy staff have considered its position regarding rates postponement and remission based on these legislative requirements.
Point Number	1476.9
Category	Activity > Chlorination
Comments:	Re money we need proof of accountability where money is spent. Seems a lot of money to out chlorination! Keep it in if its going to put our rates up so much. These feasibility investigations cost far too much. Then nothing happens a waste of money.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.

Category	Activity > Strengthened Partnerships
Comments:	Attachment to submission for for Long Term plan 2024-2034(Frana Bain) Firstly could you please follow the new outline given by the present government to respect that we are an English speaking country and use the English word first and Maori word second. The existing format is very confusing as only a very small amount fo the population speak and understand the Maori Language. Thank you please show respect to the people living in this Selwyn area.
Staff Recommendation	Selwyn District Council prioritizes inclusivity and cultural respect in our community. Te Tiriti o Waitangi, the Treaty of Waitangi, is a founding document of New Zealand. Recognizing Te Reo Maori (the Maori language) and incorporating Te Reo Maori in communication is one way Council chooses to uphold the spirit of the Treaty partnership. Council considers recognizing Maori language is not only appropriate but also necessary. It reflects our commitment to the Treaty and our shared responsibility to create a more equitable and respectful society.

Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	**Planting on the Peninsula** This should not be funded by Selwyn rate payers this should be done by big business such as Air New Zealand.

Staff Recommendation	Council is working with stakeholders to develop native restoration plantings at many sites. Generally, these projects are being done in partnerships. Council is happy to support and advise commercial entities that are wanting to plant native plants.
Point Number	1477.11
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	The Council is elected by the rate payers to complete projects to improve our area and plan for the future, you represent us not other organisations, we pay you to do a job. Your tasks are to ensure the infrastructures are in place including storm water maint,enance, roading maintenance, maintaining local community facilities. Please plan future development carefully the lack of voting turn out for the approval of the large subdivision in Lincoln was disgusting as the voting should have been completed by all Councillors, you are representing us!
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1477.12
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	I don't not consider future subdivision development sustainable as you are simply pulling people from the city and then they spend their days polluting the countryside driving back into the city. This is not smart thinking! No amount of electric cars are going to improve the pollutions as they are double the weight of the standard petrol vehicle and this will impact and damage the roads more.
Staff Recommendation	Population projections are not predictions, rather they indicate probable outcomes based on assumptions. A key assumption for the Long Term Plan is the population projections. As each town grows, there is a need to understand its future, as well as upgrade its infrastructure. As the towns and district grows, there will be greater opportunity for jobs to be located within the district. The additional weight related to private electric cars have little impact on the performance of road pavements. The issue facing road

	controlling authorities is where this will be used for heavy vehicles such as buses and trucks. Road user charges may need to increase for these types of vehicles to pay for the additional maintenance required but this has not been considered yet by central government.
Point Number	1477.13
Category	Activity > Providing safe drinking water
Comments:	What is Taumata Arowai??? and what government department do they represent? please explain.
Staff Recommendation	Taumata Arowai is the regulator of water services for Aotearoa New Zealand. They have an oversight role in protecting the environment from the impacts of waste and stormwater. They took over from the Ministry of Health as drinking water regulator in November 2021. Staff recommendation is to continue with the water services capital programme as proposed.
Point Number	1477.14
Category	Activity > Other Categories identified by Staff > Other Matters
Comments:	The council has no authorisation given by the rate payers to implement an SDG goals from an unelected United Nations program . We rate payers have the right to vote on the implementations of the proposed SDG plan, this has not been mandated. Remember you represent us!!. I personally do not support "15 minute cities" or any other aspects of the United Nations plan.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1477.15
Category	Activity > Other Categories identified by Staff > Debt Levels
Comments:	We are all having to tighten our belts and this must include the Council, stop borrowing and do not use our personal properties as collateral.

	The Long term plan document booklet looks expensive to produc19 and is it even recyclable with its glossy pages? This type of spending is unnecessary, why such expense of this document. Look forward to your responses/reply.
Staff Recommendation	That the submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.
Point Number	1477.17

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Dear folks I would like the Council to reconsider the closing of the Sheffield pool. It is a memorial to our brave soldiers. It is safer for our school children than the river re drowning possibilities and parasites etc Global warming will require more pools to be in existence, for firefighting etc Global warming will increase cooling in a pool requirement. We are trying to reduce CO2 in the atmosphere, not increase it by car travel to a pool further away. 1 pool's cost to keep it open over time may be cheaper than many cars travelling costs. In financial difficulties or petrol restrictions or war tec. A close by pool would be beneficial. A pool is a safe place for school children to gather after school, safety in numbers. A pool helps keep the community together rather than fragmented activities around other places. Young people need safe places to learn to swim. Old people need close by facilities. Sheffield is the only pool easy to access in the area, and not running at capacity, so people can get in.

	Councils should be helping the communities to maintain their facilities, not trying to take control and close. Spread asset risk by more and smaller pools than one larger pool. If pumps break or bacteria outbreaks happen not so many people affected or infected. Visitors to Sheffield could stay longer if a pool exists and other facilities could be added eg: Spar & hot pool. Solar panels could be used to heat the pool and remain open for longer in a season. More land obtained and a skateboard park or other playground equipment added. If the existing pool must go then I feel it important to our community to rebuild somewhere in Sheffield, as a memorial to our fallen men. It seems wrong to close the memory of what did by removing their memorial. Could it be run in partnership, council and community helping with costs. Thank you for your concerns and help for the communities and hope you will consider the above thoughts in your process.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool, and highlighted the Memorial aspects of this facility as a key Council consideration for the future of this site.
Point Number	1478.3

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Sheffield Memorial Pool This well used community asset needs full upgrades before other communities need the “nice to have” extras. This pool is covered by the pool rates and should continue to be, but with far more community autonomy. We request far more consultations with the community and more time to sort more of the facts as the SDC appears to be working with some of their facts misleading to them. Please note also that Council said the pool would be open for the 24/25 swim season, so immediate closure is out of the question. More time must be given to sort and investigate all avenues such as return the pool to the community. As for Sheffield using Darfield, this is not a solution as Darfield pool is already beyond capacity and has a large project population growth that will creating further problems.

Sheffield has a projection population growth also with over 70 sections to come to market sometime soon.

Also, we must retain the Malvern Community board and for them to be given some power in the matter of assets in the Malvern area so we get a reasonable voice on our behalf to the Council, this would include the Sheffield War Memorial pool.

As a War Memorial this pool demands proper respect from the Council as it is in memory of our fallen men, this affects families also of those who paid and ultimate price for our freedoms from any form of dictatorship taking control, and democracy ruling in NZ.

There is some doubt as to Council ownership of the pool, especially as the land donated was given for the community and to by held for the community by the Malven County Council seem to be doubtful such as tub slippage.

The pool should be put back in community control with less Council input. The funds which would be used to demolish the pool could be used by the community to restore the pool and a share of annual rates by given for ongoing operations and expenses.

The council has allowed the pool to degrade as maintenance has not been done and this needs to be rectified and should be done soon.

In question is SDC's pool depth requirements for health and safety reasons. The policy that paid lifeguards must be present for all swimming only adds up to an extreme position taken by SDC. Other pools of the depths Sheffield operate without lifeguards in other Council districts.

It is also very plan and noted in other districts that community run pools are far better maintained than Council maintained pools; another good reason for the Community involvement in running of swimming pools. We are also sure the land ownership could be sorted more simply than is being suggested, as the pool has been the occupier for over 70 years.

Another point that should be considered and is backed by science (could check with Canterbury University climate change representatives) is that all open pools of water help to cool the atmosphere in warming weather and are encouraged.

And not least is a school children swimming education. Recently Water Safety NZ called for more training of school children because of our desperate record for drownings each summer. The idea of going to Darfield is not feasible, as this would dramatically reduce the swim time the students of Sheffield would receive. They would

	lose time in travel and cannot get a satisfactory length of practice time allocated at Darfield. The expense of busing to Darfield is also prohibitive from their finances, so who would pick up the extra costs, Council? Not likely we suspect. Aso Springfield students mainly the older ones come to Sheffield with parent help for lessons. This would make it a lot less appealing in going to Darfield for a very restricted time period at Darfield's pool. The memorial pool needs to come back to the community to run on a more satisfactory basis. At present the swim hours for the pool do not suit a lot of people that used to use it. With the community handling the day-to-day operations with something like a key system and no paid lifeguards, the pool could remain at its present depth and be run more efficiently.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	1479.7
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	This well used community asset needs full upgrades before other communities need the "nice to have" extras. this pool is covered by the pool rates and should continue to be, but with far more community autonomy.

	We request far more consultation within the community and more time to sort more of the facts as the SDC appears to be working with some of their facts misleading to them.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Submitter Number:	1480	**Submitter:**	Sharn Nu'u for Malvern Community Board
Organisation:	Malvern Community Board		
Point Number	1480.1		
Category	Activity > Other Categories identified by Staff > Parks and Reserves		
Comments:	Proposal for a local Domain/Reserves Coordinator The Malvern Community Board supports and recommends the communities being enabled to maintain their local parks & reserves if it benefits the community and allows for greater enjoyment of their environment.		
Staff Recommendation	Staff do not support the introduction of a paid person to act as a reserves coordinator in the Malvern area. The proposal has cost and level of service implications in terms of an additional resource for this area. Staff concur that there has been teething problems in the transition from committees to contract but are confident this can be resolved by setting up improved communication channels, utilising local volunteers as the 'ears and eyes' to report matters of concern and providing additional support. The Reserves Operations Team will look to ensuring there is a consistent point of contact in Council to support the rural reserves. It is noted that there is opportunity for budgets to be provided to resident's associations which could be used to support local initiatives including on reserves. Staff recommend that the employment of a local coordinator for Malvern Reserves is declined and processes are put in place to improve communication between local communities, Council staff and contractors on reserve matters and to ensure that there are clear channels for reporting and addressing issues.		

Point Number	1480.3
Category	Questionnaire > Matters For Community Guidance
Comments:	
	Question: Do you support the closure of Sheffield Community Pool? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1480.4
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Sheffield Memorial Pool The Malvern Community Board supports the retention of a pool facility in Sheffield. We agree that the Darfield pool is not a viable alternate solution for the Sheffield/Waddington and even Springfield communities. We support the retention of the war memorial. We support the community's exploration into alternative solutions and request the council seriously consider working alongside the local representative groups to reach a conclusion that would benefit all interested parties. We support the pool opening for the 2024/25 season. We recommend that the current decision to close the pool as stated in the long-term plan be abandoned to allow for further consultation.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool, and highlighted the Memorial aspects of this facility as a key Council consideration for the future of this site.

Point Number	1480.5
Category	Activity > Chlorination
Comments:	<u>Dechlorinated Water Stations</u> The Malvern Community Board supports dechlorinated water stations in the townships as the residents see fit and that the SDC assist the communities in implementing these water stations by way of consent and/or provision of required permits to instal either at their cost or through use of existing rates.
Staff Recommendation	The submitters preference for locations in the community where dechlorinated water can be obtained for household use is acknowledged. Staff have investigated options and can provide modified drinking fountains/bottle filling stations with cartridge filters to remove chlorine at key community hubs across major townships in the district. Use of off the shelf products will reduce costs and allow the number of filling points to be scaled with demand. The filling points are estimated to have capital installation cost $20,000 (including concrete apron) plus $20,000 annual operational cost. Staff recommendation is that dechlorination is best achieved at a household level where costs are met by those who wish to benefit from chlorine removal.
Point Number	1480.6
Category	Activity > Low Nitrate Water Sources
Comments:	<u>Nitrate levels</u> We would like to draw attention to the health implications of the nitrate levels in the Malvern Water supplies. We recommend the council consider prioritising an investigation into what could be a major heath issue. This concern comes off the back of the free water testing that was performed by Greenpeace in Darfield in April 2024.
Staff Recommendation	The submitters support for investigation of low nitrate water sources is acknowledged. Further investigations into the centralised sources of low nitrate water is budgeted in the LTP in years 1 to 4. Staff recommendation is to proceed with these investigations as budgeted in the LTP.
Point Number	1480.7
Category	Activity > Walking and cycling improvements

Comments:	The Malvern Community Board opposes the Alps to Sea cycleway.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1480.10
Category	Activity > Other Categories identified by Staff > Road Safety
Comments:	Pedestrian Crossings The Malvern Community Board supports pedestrian crossings being placed in high-risk areas for children and youth in the Darfield Community, specifically adjacent to the schools and that consultation be considered with the schools and community to ensure the safety of the children, especially given the rapid growth and expansion contributing to more traffic of and through the Darfield township.
Staff Recommendation	Submission is acknowledged by Council. Council has applied for $2.6m to improve safety infrastructure around schools within Selwyn, 24-27 NLTP. Our Interim Speed Management Plan is still focused on lower speeds around schools, through variable 30km/h.
Point Number	1480.11
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	ANZAC Lane The Malvern Community Board supports the request by the Kirwee Community Committee, that ANZAC Lane be included in the Long-Term Plan 2024-2034 for funding of this war memorial.
Staff Recommendation	The submitter's support for the Kirwee Community Committee request for funding for a war memorial in Kirwee is noted.
Point Number	1480.12
Category	Activity > Other Categories identified by Staff > Speed Management

Comments:	Speed Limits around schools The Malvern Community Board supports and recommends the lowering of speed around the Malvern schools to 30km during school hours.
Staff Recommendation	Submission is acknowledged by Council. Council has progressed our ISMP which recommends lowering school speeds to 30km/h during pick up and drop off times only, this reflects the intentions of central government.
Point Number	1480.13
Category	Activity > Other Categories identified by Staff > Waste Management
Comments:	Refuse Station in Malvern The Malvern Community Board supports and recommends a refuse station with recycling capabilities in the Malvern area.
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. There would be very significant costs to consent, construct and operate a separate transfer station, these costs would need to be reflected in the fees charged and would be cost prohibitive. Based on our community bulky waste and recycling day events, attendance wouldn't suggest that the demand for a permanent transfer station in Malvern exists presently.
Point Number	1480.14
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	Existing projects The Malvern Community Board would like for the council to review and prioritise carry forward projects that are still outstanding from the previous LTP, in conjunction with the current LTP consultation.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1480.15
Category	Activity > Other Categories identified by Staff > Parks and Reserves

Comments:	Reinstatement of LTP funds for Go Hororata The Malvern Community Board supports and recommends the reinstatement of original LTP funds for Go Hororata as specified in the community groups submission.
Staff Recommendation	Staff support the submission to bring the development programme at Hororata Domain forward one year to 2024/25 because some work is a continuation of projects already underway and there is also a need to carry out public health and safety works to the equine facilities and trotting track. Staff recommend that part of the budget ($270,500) for Hororata Domain development is brought forward from 2025/26 to 2024/25 to enable urgent and committed works to proceed.
Point Number	1480.16
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	Flooding remediation by landowners The Malvern Community Board supports the Malvern landowners in their pursuit of autonomy to do what needs to be done to protect their land of unnecessary damage from flooding due to swollen rivers and flash flooding during severe weather events. The board recommends this alternative solution to local flooding be adopted by council and endorsed to other interested parties, e.g. mana whenua, Ecan, etc.
Staff Recommendation	The submitters comment is acknowledged. Staff recommend property owners undertake good due diligence when purchasing properties and seek resource consenting advise when considering earthworks on their property.
Point Number	1480.17
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	We think it is more important for the wider Malvern Community to have an aquatics and sports/events centre in Darfield in this LTP.
Staff Recommendation	Submission is acknowledged by Council.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		
Comments:			

Question: 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.*

Project cost:
Year 1: $3.05m

Estimated impact on rates (per year):
$10.46
Funding:
Rates: 100%

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	**Selwyn Long Term Plan Submission Statement-Sheffield Memorial Swimming Pool-2024** It is requested that the Selwyn District Council (SDC) representatives take into consideration the points outlined in this letter when deciding on the Sheffield Memorial Swimming Pool. • A safe, logistically viable training and recreational facility. The SDC has a duty to the residents of the Sheffield, Annat, Waddington and surrounding areas to provide a quality, local swimming facility which is well resourced. There is a necessity for children in this country to be able to feasibly access swimming lessons in a safe environment and during their formative years. That should not even be question up for debate .

As an island nation with numerous beaches and bodies of water such a1s rivers and lakes NZ is known for its passion of water-based activities. Sadly, we are also known for our drownings.

With the removal of access to the Sheffield Memorial Swimming Pool the SDC is minimising the opportunity for safe and reasonable training. This is turn increases the risk of losing our youngsters in a swimming accident. Even more directly attributable to a closure would be a nearby river incident.

Where have many already gone to swim since the SDC have reduced our pool opening hours to a bare minimum? The Waimakariri Gorge of course; a very dangerous body of water if one is not trained how to swim. The SDC would do well to approach the local Fire brigade and determine if they have had to attend incidents there over the past few years.

What options does Sheffield School have? An absurdly short spot or few at Darfield? Logistically and quality wise this is not an option.

Sheffield pool is a necessity if we deem swimming lessons important to our children.

It is also important to provide teenagers and adults with a suitable recreational swimming spot . To travel outside of the area is not viable for many people for more than the very occasional swim.

- War Memorial

The SDC has a duty to respect and value this Memorial to our fallen soldiers . It must not take this duty lightly or carelessly. A great level of disrespect has already been

shown in allowing this facility to degrade so much over the past few years.

- Use Resources Wisely

It would be an absolute waste of money and resources to demolish the changing sheds, small pool, and pump/solar heating area. All of which are perfectly functional and much of which is new post the 2010 earthquake.

During planning the SDC should be allocating Selwyn's funds in a more guarded manner. Sheffield and like districts should be getting 'must haves' before other areas get 'nice to haves'. Example in point the s2sok water slide at Darfield.

- Use

One of reasons put forward for shutting the pool is the limited use it gets. It is 100% as a direct result of the decision of the SDC to address its Health and Safety obligations in the tightest manner possible with the institution of lifeguards leading to limited swimming hours. After this institution the SDC continued to reduce swimming hours across the years. So, the natural result is obviously reduced usage. The population of the local area and surrounds is also growing and this will increase demand.

- Return the pool to the Community if SDC cannot live up to their obligations.

The pool needs to be much more available. The old key etc system is the best working model to allow for this. Since SDC will not back down on its extreme H&S mitigation options then consider returning the pool to the community.

Consider:

Return the asset to the community for $1. Included in this needs to be the funds SOC has accounted for demolishing the pool which sit at $290K. Also, along with this the maintenance funds that should have been spent over the last several years need to be included in the hand over. The council has allowed the pool to deteriorate terribly by not painting etc (valued at $16,000 when costed) which has led to its worse condition and an increase in costs to bring back to standard. Also, by essentially deciding the goal is to close the pool, costs have skyrocketed over the dallying period of

inaction. The council should deliver the difference in funds of the inflated costs of repair from several years ago until hand over.

Furthermore, the council should allocate a portion of the rates to the Sheffield Memorial Pool on an annual basis out of the rating fund since all locals pay into this pool. This is even if the pool is returned to the community.

As a measure of good will, which has been lacking to a great degree in regard to this pool, the SDC must liaise to ensure all land issues are resolved during any hand over to the community.

	Finally, but no less importantly, the community must be given time. Time to appoint/confirm a representative action group and to carry out a proper feasibility study to ensure that costings of repair, maintenance and day to day running of the pool are fully understood and viable before finalizing a hand over. A chance to develop its plan and work through options such as whether this is a single handed or collaborative approach, full repair or interim fix, funding sources etc. etc. Thank you for your consideration. Yours Sincerely
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Comments:	1. A thorough, comprehensive, independent, audit of the Selwyn District Council Office from the top down is urgently require by a competent suitably trained individual or company to determine the true necessity, efficiency and financial cost of what appears to be an exorbitant numbe r of staff.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1482.23
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	1. Fix the urgent problems. eg, Flooding risks in Hororata and Springfield etc:.
Staff Recommendation	The submitters request for additional planning and upgrades to reduce flooding is acknowledged. Environment Canterbury has recently completed a Long Term Plan consultation process with the Selwyn community about an additional targeted rate for district wide flood and

	river resilience work. Staff recommendation is to proceed with the stormwater capital works programme as budgeted. The programme includes works in Springfield (design in year 10 and construction years 11 and 12) and Hororata (minor upgrades to the stormwater network and pumping).

	Question: Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? Yes **Comment: Comment: Comment:**

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1483.4
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	No more approved subdivisions in Darfield until a sewerage system is available and useable
Staff Recommendation	The submitters support for roll out of wastewater reticulation to service new development in Darfield and Kirwee is acknowledged. The network roll out is being prioritised to service areas of new development. Areas of new development <5000m2 will be connected to the reticulation network. Staff recommendation is to proceed with roll out of servicing for the existing areas as proposed in the LTP.
Point Number	1483.5
Category	Activity > Walking and cycling improvements
Comments:	I was told 6 years ago that a cycle trail would be formed from Kirwee to Darfield (stage 1) and then from Darfield to Sheffield (stage 2). Quote: "the money has been budgeted to do this". Is it because we don't live in Lincoln or Rolleston that this has not been acted on. Quality of water (high in nitrates). Is the Council going to address this issue and if so, when? For the amount of heavy traffic on our roads the repairs, maintenance and quality leaves alot to be desired. Looking to the future farmland should be retained for food production rather that housing. Malven should be retained as a separate identity because of its history and rural environment.
Staff Recommendation	Submission is acknowledged by Council. Mountain to Sea Cycleway Stage 1 in the LTP covers the cycleways mentioned by the submitter.

Submitter Number:	1484	**Submitter:**	Julie May

Point Number	1484.1
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	I strongly believe the purchase of Broadfields Garden by the SDC, which is an established and recognized botanic garden, would provide social environmental and cultural benefits to the residents of Selwyn and surrounding areas A financial return could be made by utilizing the garden for a variety of public and private events such as weddings,. Local business would also benefit It would be a refreshing change to see SDC put funds into a venture that would benefit so many people, instead of the constant favoritism towards new sporting facilities, dog parks and cycle trails This would benefit the ratepayers in an entirely different manner Give the residents their own garden I hope the council gives this submission consideration and acts before the Broadfield Garden Is lost forever Submitted by Julie May 375 Ellesmere Junction Road Springston
Staff Recommendation	Staff acknowledge the quality and significance of Broadfield Gardens and the opportunity it presents as a formal garden to complement the existing open spaces. However, the proposal does have some costs and risks that need to be weighed up alongside other options.

	This includes the cost of purchase (and how that could be funded), the cost of additional infrastructure to enable public use, the on-going cost of maintenance and potential revenue opportunities. There are also some limiting factors such as proximity, accessibility and connectivity. It is noted that Council is considering development of a formal garden at the District Park as part of stage 1 development: that would focus on 3 main types or components of formal gardens: botanic plantings (including natives, exotics and floras); sister city garden opportunities; community gardens. Although the acquisition of the garden presents an opportunity for Council to provide a special area of open space that is not replicated anywhere else in the District, staff are of the view that the proposal is difficult to support at this time given the costs and other factors mentioned above. Staff recommend that Council does not purchase Broadfield Garden at this point in time but considers what other mechanisms are available or support it could provide to retain the garden for the district's benefit.

Submitter Number:	1485	**Submitter:**	Simon Osborne for Doyleston Resident Committee
Organisation:	Doyleston Resident Committee		
Point Number	1485.1		
Category	Activity > Other Categories identified by Staff > Parks and Reserves		
Comments:	**Doyleston Residents Committee LTP submission** The Doyleston Residents Committee have been the custodians of Osborne Park since 1911, and of the hall since 2000 . Until the summary dissolution in 2022 we were a community committee of the Selwyn District Council (SDC).		

The committee have continued to meet on a regular monthly basis and made every effort to stay engaged with the SDC. The land was gifted to the Doyleston community for the purpose of recreation and was held by the Crown. The hall was gifted and established by local community members.

All of the maintenance and planting of the grounds has been undertaken by the committee and the local community on a voluntary basis. Funding where needed has come from donations, grants and the SOC.

In recent times the SDC has been progressively centralising control of community assets (held on behalf of the community). This deliberate de-localisation has been done without any meaningful consultation with the communities involved.

Osborne Park and its facilities have been maintained and presented to a very high standard as a result of a very engaged committee and community members. Recently our groundskeeper

John Mccartin (who is a 2023 SDC award winner for volunteer work) has been told via a third party that he is dismissed from his job as of July 2024 and CORDE will take over. This action by the SDC is the final straw for the Doyleston community, who have suffered a diminution of mana as a result of the constant erosion of local input and engagement during the process of centralisation. The Doyleston Residents Committee are unanimously resolved in the presentation of this submission to regain our role of l our park.

Our Submission

The Doyleston Residents Committee will have a formalised structure, such as an Incorporated Society or Charitable Trust .

The Doyleston Residents Committee will lease from the SDC the entire Osborne Park for a nominal rent. The Residents Committee will have responsibility to maintain the grounds and buildings to a high standard. The SDC will provide funds for public amenity

including maintaining public toilets and OSH repairs to playgrounds etc.

The Doyleston Residents Committee will in cooperation with SDC ensure proper OSH training for key personal and operate in a safe and responsible manner.

The Osborne Park facilities are currently used on a regular basis by.

Ellesmere Archery- who have their own use agreement with SDC. The Doyleston Residents Committee fully support the club's submission to the LTP.

Civil Defence-base for Doyleston and lrwell. The Vintage Club.

) .

Ellesmere Tennis. Local Play Centres.

In Conclusion

The Doyleston community are highly engaged with the Doyleston Residents Committee and Osborne Park. We believe the above

	arrangement would continue to improve the engagement and involvement of our local community. We see tremendous value in having volunteers **run** a community facility as it increases social engagement, mental health and provides an opportunity for people to work together providing community fellowship. There would be significant cost savings for the SDC both in administration and servicing, with the day-to-day operations and responsibility being that of the local community. We look forward to negotiating the details with the SDC.
Staff Recommendation	Submission is acknowledged by Council. Council is proposing to carry out a review of facilities across the district and this includes looking at alternative management models especially where the facilities are primarily meeting a localised need. Therefore, as part of this work, there may be an opportunity to further explore how arrangements could work with the Doyleston Residents Association (once they become an incorporated society) and management of Doyleston Community Centre and potentially Osborne Park. It is noted that one of the key reasons for moving away from volunteers undertaking high-risk maintenance activities (e.g. mowing) is the significant risk to the public, the volunteers and Council if an incident occurs. Before any consideration is given to the arrangement outlined in the submission this risk needs to be fully understood and mitigation measures explored, and this may be a significant constraint to the proposal. Staff recommend that further work is undertaken to explore the feasibility of the proposal for the Doyleston Residents Association to undertake operation of Doyleston Community Centre and Osborne Park under a lease/management agreement and this forms part of the broader work to look at alternative management models for Council facilities.

Comments:	
	Question: Do you support the closure of Sheffield Community Pool? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1486.4
Category	Activity > Chlorination
Comments:	As it is our drinking water in Darfield is so chlorinated that it is causing health issues amongst residents by both drinking and external uses. I support the option of going for an exemption.

Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1486.5
Category	Activity > Low Nitrate Water Sources
Comments:	High levels of nitrates in Darfields water is of extreme concern due to potential risks involved with consumption. I will no long drink the water and should have access to safe drinking water. These levels need addressing urgently. I support centralizing some of our water on the plains to come from 1 low nitrate source.
Staff Recommendation	The submitters support for investigation of low nitrate water sources is acknowledged. Further investigations into the centralised sources of low nitrate water is budgeted in the LTP in years 1 to 4. Staff recommendation is to proceed with these investigations as budgeted in the LTP.
Point Number	1486.6
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	No more approved subdivisions until a sewerage system is approved.

	Looking to the future farmland should be retained for production rather than housing.
Staff Recommendation	Population projections are not predictions, rather they indicate probable outcomes based on assumptions. A key assumption for the Long Term Plan is the population projections. As each town grows, there is a need to understand its future, as well as upgrade its infrastructure. The National Policy Statement on Highly Productive Land provides clear direction and parameters for council in considering future housing growth in Selwyn in relation to farmland.

But upgrade bus stops with suitable lighting.		

Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP
Point Number	1487.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** Keep the existing building with minor repairs and reassess in 2035 after we have had no earthquakes - then keep using it as is.

Staff Recommendation	The submission is acknowledged.
Point Number	1487.3

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1487.7
Category	Activity > Other Categories identified by Staff > Financial management

Comments:	As you may be aware – we are managing our way through a CoL crisis at the moment and families are struggling to keep necessities provided. Council should be aware of this and should be doing all they can to help these families and ratepayers by keeping to a strict budget and only spending money that they have now - not money they may have in the future. This would include, but not limited to: • Not building new sports facilities or council services buildings • Not funding unnecessary roading and cycleway projects – stick to fixing potholes and maintenance. • Not spending money on consultants and contractors when you have so many staff employed. • Looking to reduce staff, of which there are far too many. With an increase of 649 in 4 years – from 282 in 2020 to 931 in 2024.Nothing has improved with that increase. • Rate increases need to stop – council should only spend what they receive – there should be no borrowing to pay back later. Council focus should be towards the people that live in Selwyn and towards reducing debt. • If you don't have the money to buy something, then you should not be buying it. • What happens when rate become so unaffordable that people are unable to pay.? • Do you force them to pay or sell and move. • Who will buy if they cannot afford rates? Is this when Blackrock and Vanguard step in to own everything?
Staff Recommendation	That the submission is acknowledged by Council. That the Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum. The Council is proactively looking for opportunities to minimise waste of resources, this process is constantly improving.
Point Number	1487.8
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	Too much word salad. Policy should be focused on your ratepayers and only your ratepayers.

Staff Recommendation	Submission is acknowledged by Council.

Comments:	But why the high cost? What is it for?
Staff Recommendation	It is acknowledged that the submitter has selected to close the Sheffield Memorial Pool.
Point Number	1487.10
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	This is something business is better at - leave it to them.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.

Submitter Number:	1488	**Submitter:**	Bex Ridgen for Greendale Residents Committee
Organisation:	Greendale Residents Committee		
Point Number	1488.2		
Category	Activity > Other Categories identified by Staff > Emergency management		

Comments:	**We would like the council to grant land holders in the Greendale community, adjacent to the Hawkins river and the Waianiwaniwa river, permission to, in response to flooding events, within a reasonable time frame to clean up debris, reinstate and fortify berms on the banks of the rivers by shifting deposition to the outer edges of the rivers, without prosecution and excessive fees.** This will benefit the council and private land holders by reducing maintenance costs, increasing maintenance cycles, reducing ingress of weed species and protecting council owned assets and privately owned assets. The sections of these two rivers that are of primary concern starts where each river enters the Greendale area at the Bealey Rd from there the Waianiwaniwa river section ends where it enters the Selwyn river, the Hawkins river section ends where it crosses Coaltrack Rd by the Greendale Golf course. These two rivers are not rateable assets and are not maintained, as a result have poor capacity due to highly inadequate berms/stop banks and are shallow. These two rivers threaten eighteen homes along the Hawkins River and Five homes on the Waianiwaniwa River. These neglected rivers have caused substantial damage to properties and dwellings since 2008. There are two properties that boarder the Selwyn river each reside at the end of both Waterford rd and Gillanders rd both properties do not fair well during floods. Currently land holders adjacent to these two rivers who wish to abide by the rules, imposed upon them by the regional and district council to protect their properties and avoid prosecution, need to apply for consent to carryout restricted work which comes with a heavy price and may include the following but is not limited to: Earthworks consent $3200 min up to $6500 Consent to excavate gravel $2500min up to $4700 Diversion of water $3500 and upwards. Plus the cost of the excavator.

	This is not feasible nor fair for those land holders who are flooded every two years. Thank you for your time Kind regards Bex Ridgen Greendale Residents Committee Chairperson
Staff Recommendation	Council acknowledges the submission. Selwyn District Council cannot grant consent for in river works but we have been advocating for more river work in the Selwyn catchments to deal with the issues that you describe. Staff recommend that Selwyn District Council continue to work with Ecan to find a more sustainable solution. Ecan have proposed a new rate in the Selwyn District as part of their Long-term Plan that is intended to address some of these issues.

Category	Activity > Chlorination
Comments:	1. RE chlorination of water

	• A large number of residents being affected by chlorine which is being added to our water. • Personal affection (and others spoken to) • Irritation, eczema, infections • Continually having to scratch skin causing sores. • Throat – burning feel. • Stomach – feeling nauseous, pain, weight loss. • Drinking water not filtered – taste remains in mouth & gut. • We once had beautiful drinking water which is no longer available, WHY??? • My family in the past have taken our water to the city to drink due to the horrid taste of theirs. • Should we have to feel not well in the home & Township we enjoy living in for the majority of our lives. • I have heard of water cylinders having to be replaced and people being told by plumbers its due to chlorine in the water. • If this is so should not the Council reduce the rates to enable especially senior citizens to meet the added expense of this replacement, along with having to install water filters due to continual illness.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. 	Question: We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Carry out the upgrades detailed in the Leeston Park Master Plan over 15 years, including new pathways, carparks, toilets, park furniture, sports field lighting and irrigation, trees and plants, playground extension and upgrades, and park extension and signage. **Project cost:** Years 1-15: $9.49 million

	Estimated impact on rates: Years 1-5: $10.23 Years 6-10: $6.05 **Funding:** Rates: 71.4% Development contributions: 28.6% * **Comment:** Use subdivision development fees.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 3. Development contribution funds can, under the Local Government Act, only cover project elements required to extend capacity to meet demand from growth. As this project is primarily an upgrade of the park to improve levels of service only a minor part of the cost can be funded by development contributions and this has been built into the funding model.

	Question: Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1490.6
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	Change the Inner Plains Outer Plains Development Strategy. Allow development of outer plains to subdivisions of 1 ha where appropriate. This will allow more development funds and improve infrastructure.

Staff Recommendation	Rezoning does not occur through the Long Term Plan. The process for a rezoning is through a Plan Change. The council has recently worked through its review though there are opportunities for private plan changes. There will be processes in the future that long-term growth areas can be discussed. Infrastructure development is more effective in urban areas where it can service a greater number of people and more cost efficient
Point Number	1490.7
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	Tar seal all gravel roads where houses are affected by dust. Dust is a health issue. Many houses were built when the fastest thing was the Nor West wind. Now gigantic trucks create a devastating vortex of dust. This is not longer a "NUISANCE" it is a health problem. The Council must develop a plan to have these properties protected within 10 years.
Staff Recommendation	Submission is acknowledged by Council. Council does not have available funding for this submission. Unsealed roads are cheaper to maintain.
Point Number	1490.8
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Dependent family members line in 2nd dwellings. No one lives in these by choice (mostly). Do not rate these buildings other than C.V.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau

Comments:	
	Question: 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Category	Activity > Planning Further Community Facilities
Comments:	The first is the Prebbleton Public Hall. The current hall, originally built by the community in the 1890s, has served as a hub for numerous social, recreational, and heritage activities. After the 2010 earthquake it was deemed earthquake damaged and cannot be hired out after 2034. I urge the council to **return to making the hall one of the BIG DECISIONS** as it was in the 2021 to 2031 Long Term Plan. It is

	unacceptable that it is no longer one of the BIG DECISIONS given that it had been promised for over a decade. Going back to 2013, the Strategic Plan made a recommendation to replace the current halll with a larger more flexible hub facility. It was going to be built 2019-2021. This hall is the only Fast track project that has not been built. The nature of the new hall depends on community consultation, although I do see the opportunity to establish a central hub for heritage in the Selwyn area. The local Heritage group is continually active, knows how to store information, and has equipment such as recorders.
Staff Recommendation	The submission is acknowledged. A new community centre for Prebbleton has been in considered in earlier Long-Term Plans and was previously signalled for construction in 2025/26. A needs assessment study was undertaken in 2023 which concluded that there was demand for a facility to service the community, and that it should provide a mix of social, community gathering and recreation spaces. The study further concluded that the facility needed to be located so it was easily accessed by the community. As there are uncertainties about the best site for the facility and the activities that it will cater for, further planning and community consultation is needed. To enable time for the necessary planning to happen, the project has been programmed for 2026/27 to 2027/28.
Point Number	1491.8
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	The second part of my submission Is to support The second part of my submission Is to support **a permanent gymnastic facility in the Rolleston area.** A dedicated gymnastics

	facility allows for the installation of specialized equipment and provides a safe temperature-controlled environment. More importantly it means that children (and adults) of all ages have access to an activity that sets them up with core strength, flexibility, balance, fitness, and general coordination not just for the sport itself, but life and other activities. It would serve as a hub for the surrounding areas like Lincoln, Prebbleton, and Leeston. **a permanent gymnastic facility in the Rolleston area.** A dedicated gymnastics facility allows for the installation of specialized equipment and provides a safe temperature-controlled environment. It would serve as a hub for the surrounding areas like Lincoln, Prebbleton, and Leeston. It would serve as a hub for the surrounding areas like Lincoln, Prebbleton, and Leeston.
Staff Recommendation	The submission is acknowledged. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input. This excludes existing or proposed Council facilities as part of the Long Term Plan. Staff Recommendation	Submission is acknowledged by Council.
Point Number	1494.8
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	There few amenities in Sheffield & to close the Memorial Pool would be a travesty & totally unfair to residents & pupils The councils own website states the importance of social interaction & safety aspects for everyone when learning to swim I wholeheartedly support that the pool remains open & is handed over to the school & that the ratepayers money which would be used to close it down be given over to the school for the maintenance of the much needed facility In addition Selwyn District Council should give every cooperation free of charge to the school to assist with the running of the project
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	1494.9
Category	Activity > Council's Office Improvements

Comments:	I totally disagree that any money should be spent on any additional facilities or space to the already palatial council offices There are plenty of conference areas & if they are inadequate then Zoom or Skype meetings should be used not ratepayers money!
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	1494.10
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	Are SDC unaware that some ratepayers are struggling to pay for basic necessities in their households even to the extent of not being able to feed their children without hardship? If they are not then they are even more out of touch with real life than I imagined! All council staff are well paid & in these hard times one suggestion I would like make is that all salaries for staff earning over $65000 per annum be frozen for the period of one year. Furthermore that the Mayor , Sam Broughton should donate one of the 2 salaries he draws to those less fortunate than himself outside SDC. All free perks for Councillors & council staff should be stopped & any extravagances terminated SDC should lead by example & tighten their belts as so many are being forced to do These are unprecedented times of hardships & cut backs must be applied not unnecessary spending to everyone. Ratepayers cannot afford or be expected to cope with any unnecessary rate rising when so many are struggling
Staff Recommendation	That the submission is acknowledged by Council. That the Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum. The Council proactively looks for opportunities to minimise waste of resources, this process is constantly improving.

Point Number	1494.11
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	No policy should be implemented which would add expense to rate payers many of whom are already struggling financially.
Staff Recommendation	Submission is acknowledged by Council.

Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	
	Question: We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:** Not affordable at this time Darfield population

	growth from 3,400 to 4,500 over the 10 year period does not justify. Better to consolidate at one facility (Rolleston).
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	1495.6
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	Firstly, is the major concern related to the negative financial impact the proposal will have on our community. The proposed increases are not acceptable. It appears Council is simply accepting major costs increases and passing them on. The current costs pressures on our community require a major re-think. Council needs to be realistic with its ambitions, and the community's ability to pay. We are reminded daily of working families not being able to meet every day needs due to ever increasing costs of basic necessities. Council needs to be part of the solution rather than exacerbate to current problems.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1495.7
Category	Activity > Other Categories identified by Staff > Rates
Comments:	In Council LTP Summary, there is a section on "What you told us."Ratepayers told you they are prepared to pay "a little more in rates" for improved services, and want "stronger planning". The prosed rate increases: 2025/25 15.6% 2025/26 14.6% 2026/27 13.9% 202712813.2%

	Cumulative ,this is an increase of 70.8% over the 4 years. This is total y unrealistic. Also, Council should not take any comfort from the projected lower increases after these 4 years. On looking back, your 2018/28 LTP the forward forecast for this period was: 2024/25 2.8% 2025/26 2.6% 2026/27 3.3% 2027/28 2.8% This is a cumulative increase of 12%
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1495.8
Category	Activity > Other Categories identified by Staff > Debt Levels
Comments:	Debt to Income. This Plan proposes a new debt to income ratio of 220%, up from 160% in the current LTP, and from 130% in the 2018/28 LTP. The purpose of the legislation is to ensure financial discipline and restraint on the Council,on behalf of your community. When the Council simply shifts the bar to suit the here and now, Councilloses credibility and indicates a lack of financial responsibility. How is the community able to take confidence of "stronger planning" when this is how it operates?
Staff Recommendation	That the submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.

Point Number	1495.9
Category	Activity > Other Categories identified by Staff > Debt Levels
Comments:	The **LTP** refers to " much of the borrowing funded by development contributions and lease income". Can you quantify this? What proportion overall? It is noted the Leeston library/community centre refers to 19.4% The Leeston Park improvements 28.6% It is our submission that Council should work hard towards obtaining a sustainable debt level.
Staff Recommendation	Submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.
Point Number	1495.10
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	1. Stronger Planning. The Council residential rezoning of the area on the outskirts of Lincoln (Carter Plan Change) has been a huge disappointment. The LTP refers to the Greater Christchurch Partnership, the Spatial Plan, and the Transport Plan. This Plan Change was not consistent with these adopted Plans, and not supported by the local community. We appreciate the need for supply to keep ahead of demand, however efficient infrastructure development requires commitment to longer term shared agency plans. How is the community supposed to make their own investment decisions when they cannot rely on the SDC adhering to their own publicly adopted plans?

	It is appreciated the Council appointed a commissioner to hear the privately applied for Plan Change, however for the Council to initiate its own Plan Change and undermine the Environment Court appeal process was extremely disappointing. Given the time it takes for a Council initiated Plan Change,. had this process started prior to the private plan change being notified? How much will the required local contribution be to the infrastructure as a result of this development?
Staff Recommendation	Plan Change 69 was initiated before the completion of the Greater Christchurch Spatial Plan and the notification of the National Policy Statement on Highly Productive Land. It was enabled through the governments National Policy Statement on Urban Development. This meant councils could not reject plan changes but rather hear them through. During the Plan Change 69 process and on top of our District Plan Review, Government announced and legislated all councils in New Zealand to initiate a Plan Change to implement the Medium Density Residential Standards. Council will continue to build on the Spatial Plan to provide direction on growth and investment through Future Selwyn and the associated Area Plans. Development Contributions are charged to cover the infrastructure required to service the growth.
Point Number	1495.11
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	1. Cost Increases. LTP refers to numerous cost pressure increases; Leeston library/community centre +80% Bridges +38% Roads +27% Sewerage +30%.

	It is appreciated that the covid related economic shut down caused supply chain issues. It is not responsible for Council to simply accept these and pass them on. This will contribute to ongoing stagflation. Capital programmes need to be re-assessed, re-prioritised and in the short term accept only for essential works, along with necessary expenditure to maintain current infrastructure. Deferred works can be revisited when prices become more reasonable. The contracting sector will need to become more innovative and more efficient. Necessity is the mother of invention. How long has the SH 1 bridge over the Rakaia gone past its initial use by date? It can be done.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1495.12
Category	Activity > Lincoln Town Centre Upgrades
Comments:	1. Lincoln Town Centre After an initial budget of $21.4 m, it is now proposed at $46m. initial y it was proposed to use Central Government funding allocated for "3 waters" consideration. What happened to this funding? Again, we submit this project needs to be re-assessed.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1495.14
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	1. Economic Development. Councils need to understand the economic fundamentals of their districts. This is nothing new. Councils support economic growth

	through district and infrastructure planning, providing a degree of certainty for private sector investment . Izone is a good example of Council going further in filling a gap, but at no cost to the ratepayer. It is preferable for employment opportunities to be provided localy where practicable. It is important to provide efficient and friendly Council services. It is unclear what the $9m spending over 1O years is going to achieve. What are the targeted outcomes? How does it relate to the regional economic development strategy? Existing Council planning functions, along with local representatives and regional networks should provide necessary knowledge. Council undertakes 1O year + planning now. What is going to be different?
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. The proposed allocation is a contribution from the Council towards activity that will stimulate and support the local economy. Councils' contribution to economic development is alongside others who are expected to contribute significantly more overall. Council is involved in and has access to important levers in Economic Development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. Every cent of spend will be scrutinised and planned for to ensure outcomes and returns are maximised from the spend. Action plans will outline this in detail.
Point Number	1495.15
Category	Activity > Compulsary organics collection
Comments:	Organic Collections. How does this service at an additional cost of $190 per annum to ratepayers differ from the current green waste collection? It is

	suggested in the L.TP that this is a Central Government requirement. Can we suggest in the current financially restrained environment you take this back to Wellington. What are the tangible outcomes? Has any analysis been undertaken for a separate glass collection? This may well have a better payback in respect of quality of recyclables.
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. The compulsory organic collection is the same as the current service. Householders who currently have an organics bin will not need to pay an additional $190.00 on top of the existing cost. The introduction of compulsory organics is outside of Council's control. The Ministry for the Environment has issued a directive that all urban areas with a population of greater than 1,000 residents must have a food scraps/organic collection by 1 January 2027. Every Council in New Zealand is obligated under the Waste Minimisation Act to comply with this. Council will be investigating separate glass collection in conjunction with neighbouring councils and our contractors.
Point Number	1495.17
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	1. Water Services Entities Act. It is pleasing to see the repeal of this Act. The financial analysis initially provided to support the proposed entities could not be relied on. We are unaware of any analysis undertaken by SOC on these costings, however Waimakariri's analysis was well publicised, along with the Auditor General. Certainly safe and reliable potable water supplies, and environmentally sustainable wastewater systems are essential. The proposed plan refers to the need for smart meters, given we currently have water meters, how does smart meters improve quality?
Staff Recommendation	The submitters support for investment in water and wastewater services is acknowledged. Staff recommendation is to proceed with the proposed capital programme as budgeted in the LTP. The benefit of Smart water meters is that they allow us to understand

	daily water demand and identify anomalies such as leaks in the network. The data also helps rate payers understand their water usage.
Point Number	1495.18
Category	Activity > New Public Transport
Comments:	1. Public Transport Planning. The proposed LTP includes a contribution of $75k to planning public transport. The LTP acknowledges this is the responsibility of ECan. This should be business as usual. The Regional Transport Committee should be driving this, with SDC providing input and responses as necessary. Why are the existing resources not capable of this?
Staff Recommendation	The funds are required to develop the business cases in conjunction with Environment Canterbury for the additional PT services and aligned infrastructure needed for Selwyn. This means Council does not need to fund a separate full business case for its infrastructure on its own to meet NZTA Waka Kotahi requirements.
Point Number	1495.19
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	1. Roading Maintenance and Renewals. This is budgeted to be $82.3m, (up $27.1m), including $3rn on catchup maintenance and emergency repairs. No unsubsidised works should be undertaken. Priority should be given to repairs and maintenance.
Staff Recommendation	Submission is acknowledged by Council. Staff note the support for prioritising roading infrastructure. Catching up on renewals delivers value for money in pothole prevention.
Point Number	1495.20

Category	Activity > Walking and cycling improvements
Comments:	These should only be developed with the support of local community groups. We see no business case for another "Alps to Ocean" trail. Again, a ni1ce to have, but not essential.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1495.21
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Again, we would consider this to be business as usual. The Plan refers to expected reduced costs. Has the business case been prepared and the costs saving built into future budgets? If so, the proposed $1.3m expenditure should not have a impact on rates. As an aside, hard copies of the proposed LTP documents were not available at the Lincoln library for reference which was surprising. ECan's were.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1495.22
Category	Activity > Strengthened Partnerships
Comments:	$300k is currently provided for, with no detail on how expended. The Plan suggests this will be expanded- for what purpose? What are the performance measures and expected outcomes?
Staff Recommendation	Council is committed to responsible use of ratepayer funds. Council considers that investing in relationships, and actively working with local Runanga , is not just the right thing to do under Te Tiriti o Waitangi, it's also an efficient way to achieve positive outcomes for all Selwyn residents. Council recognises it has a large volume of

	often complex needs and time-consuming demands that its places on Runanga representatives, who are generally volunteers, in order to assist Council meet its legal compliance requirements, develop and implement strategy, guide adherence to cultural protocols and good practice. The mechanism of contribution towards the two Runanga is considered an appropriate and cost-effective way to support the contribution of Runanga representatives to supporting Council to achieve positive outcomes for all Selwyn residents.
Point Number	1495.23
Category	Activity > Potential Requirements To Fluoridate
Comments:	1. Water Quality Requirements. Further to our comment in 12 above, reference is made to the need for significant pipeline upgrades and more monitoring/testing. Where do these currently fall short? It is surprising that Rolleston is considered the 4th most at risk supply. How could that be with largely new reticulation? We support fluoridisation in improving health outcomes for our young. As a public health outcome, this should come with Central Government financial support.
Staff Recommendation	The submitters comments regarding chlorination are acknowledged. Significant upgrades include additional treatment, storage upgrades, pipe renewals, network metering and implementation of smart water metering. More frequent sampling, testing and network monitoring would also be required. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies. The submitters preference to fluoridate community drinking water supplies is acknowledged. The cost to fluoridate supplies is estimated at $7.9m over the LTP period. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.

Point Number	1495.24
Category	Activity > Compulsary organics collection
Comments:	It is unfair to compulsorily require every household to have a green waste bin at a cost of $190p.a. Those that want a bin are already paying the $190p.a. and one assumes that those that do not have a green waste bin do not require one. Many larger properties, and some smaller ones, have their own composting facilities and do not need a green bin, and would make no use of one. The need to remove food waste from landfill is unquestioned, but surely there are other ways of ensuring this? We already have monitoring of the recycling bins, and the plastics that go into these bins. Perhaps this would be a better approach? Those already responsibility recycling their green waste, without the need for a bin, should not be penalised because of the actions of others. Is this proposal from Council because implementing the new regulations needs extra funding? If so this is an unfair way to achieve it.
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. We do acknowledge that this is an additional unwanted burden for those who already compost their own food scraps and garden waste at home. This regulation is outside of Council's control. The Ministry for the Environment has issued a directive that households in all urban areas with a population of greater than 1,000 residents must have a food scraps/organic collection by 1 January 2027. Every Council in New Zealand is obligated under the Waste Minimisation Act to comply with this.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1495.28
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	*I express the following views as a private citizen, not representin g the views of the Society of St Vincent de Paul, of which I am currently the president of the local conference. I have, however, as a*

	consequence of my role in the Society, gained insights that may be useful. The 70.8% rise over current rates for 4 years is unconscionable and will be destructive to the cohesion of our communities, which is already under strain. This is quite clear in the level of juvenile offending in Rolleston, for example . Much of Rolleston, as I am sure you are aware, is rental accommodation. On p58 of the draft LTP, in the conclusion, it is stated: "All rate payers, current and future, pay for the costs.....". This is true, but those costs are immediately passed on, in the case rental properties, in increased rents to those who, in many cases, are the least able to afford it. Our Society has already helped families, some in their own homes, who find the current cost of living outstripping their ability to pay. Exorbitant rate rises, like those proposed in this draft LTP, will contribute to increased mortgagee sales and, potentially, homelessness.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum. The Council also recognises the negative impact that increased cost of living is having on the public's mental health, and that this trend is not only limited to New Zealand, but is widely spread in many other countries worldwide. The Council proactively looks for opportunities to minimise waste of resources and this process is constantly improving.
Point Number	1495.30
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	On a more general note, much of the draft LTP is nowhere near specific enough and deals in very vague terms. One specific example is the $1.3million each year to investigate and implement improved digital technologies (p42} . Surely the investigation can be done within the normal activities of the Council and concrete

	proposals put forward for consideration? The figure of $1.3 million seems to have been plucked from thin air, or perhaps I have got this wrong? There are other examples already dealt with in our main submission .
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1495.31
Category	Activity > Lincoln Town Centre Upgrades
Comments:	Finally, an observation: SDC is in danger of losing credibility with ratepayers, and a consequent loss of engagement by them, if SDC keeps drastically changing things . The huge increase in proposed rates over the previous iteration of the LTP, and the ignoring by Council of their own plan and other statements by implementing a plan change with unseemly haste to allow the Carter subdivision in Lincoln are two examples. This latter action was opposed by a significant majority of the Lincoln ratepayers and citizens, many of whom do not now see the point of ongoing submissions when faced with the demonstrably cavalier attitude of Council to their concerns, and the undemocratic way this was rushed through. Concern for the environment and unfettered urban sprawl, as stated by the Council, are seen by many to be just empty words .
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1495.33
Category	Activity > Other Categories identified by Staff > Social / Affordable Housing
Comments:	I see nowhere in this draft LTP any provision for social housing, affordable housing initiatives, or even any recognition that these problems already exist in our communities. Why is this? The SDC seems to be unaware of these issues and it makes a sad irony of

	the statement in the continuation of the previously mentioned conclusion on p58:".....will maintain the Council's healthy financial position over the next 10 years and provide a sound base for maintaining the well-being of current and future generations. " This while some of our current young generation are going to school without breakfast, or a lunch in their school bag. Schools are providing these for some, but not all .I cannot see how their "well-being" is going to be helped.
Staff Recommendation	Submission is acknowledged by Council. It should be noted that while the Council does not see itself as a provider of social housing it is exploring options for partnering with other housing providers to secure outcomes that would have elements of affordable housing. Selwyn District Council is also working with it partner council in Canterbury to provide affordable housing action plan
Point Number	1495.34
Category	Activity > Planning Further Community Facilities
Comments:	1. Library Rate. The proposed rate is a $254 uniform charge. While a supporter of the library and the good service provided by staff, do the libraries need to be open 7 days a week?
Staff Recommendation	The submission is acknowledged.
Point Number	1495.35
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	1. Christchurch Multi Events Arena. We support the Councils decision to decline the opportunity to contribute to future operating costs. We seen o flow on economic benefits to the Selwyn District. Selwyn residents will voluntarily contribute through attending events of their choice, and in so doing, likely add to the City CBD economy.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024,

	Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. Council will consider their feedback.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	
	Question: 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	Pages 54+55 do not contain details of the proposed changes New Zealand is a democracy therefore all ethnic groups need consultation on major works and spending.
Staff Recommendation	Council acknowledges the submission and notes the concern around the level of clarity regarding how specific groups will be engaged with. The proposed policy sets out Council's general approach to determining how and when it will engage with the communities it serves. Council's engagement approach will be determined based on the level of significance assessed using the assessment criteria outlined. Selwyn District Council recognizes the importance of partnerships; building strong partnerships with iwi is vital for Council to fulfill its obligations to the entire community. Te Tiriti O Waitangi (Treaty of Waitangi) is a founding document of New Zealand and establishes a

	partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with iwi, to have any meaning, requires consideration of iwi position and contribution to discussion/debate.
Point Number	1496.8
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	The council is responsible for maintaining the assets owned by the district. Roading maintenance and repairs should be a priority. New subdivision, approved by the council, have increased traffic and damage to the roads. Repairs have not been carried out to a significant level to maintain many of the roads in the district. Leaving uneven surfaces and potholes.
Staff Recommendation	Submission is acknowledged by Council. We are addressing this by planned reconstruction/repair as subdivisions are completed.
Point Number	1496.9
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	Large areas of Native planting should not be paid for by the ratepayers. Commercial Entities wanting to offset ‘carbon’ should be encouraged to do this.
Staff Recommendation	Council is working with stakeholders to develop native restoration plantings at many sites. Generally, these projects are being done in partnerships, and as such Council does not invest in 'large areas of native planting'. Council is happy to support and advise commercial entities that are wanting to plant native carbon offsets.
Point Number	1496.10
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	The current level of spending by the council is unacceptable. Rate payers should not be covering the costs of wasteful spending on the United Nations Global ideologies such as the Sustainable Development Goals.

	Why are 5G ready streetlights being installed everywhere and expensive community centers and parks being built. Spending on 'smart' 15 min Communities to 'keep us safe' is another globalist agenda. Where has your mandate to spend of these come from.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1496.11

Comments:	1. All library to go under control of the education system, not a fit for councils. Extra classrooms, children able to integrate better with the community.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1497.39
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Soldiers Memorial pool give back to the community.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	1497.40

Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Could keep out of this area.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	1497.41
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Use what you have better.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Point Number	1498.4
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice This should be driven by the Government and private sector. The existing economic development and business growth is high with sufficient momentum - the SDC have a number of urgent community and core SDC functions (e.g. roading, community facilities) that this funding should focused on. The Council need to get back to basics. It is interesting to note that with the proposed subdivision in Lincoln we were told by the Council that 'if you build the houses the businesses and infrastructure will come' - but that has been proven to be wrong and now you want to spend more money to put it right? We have spoken to many people who feel that the rate of development should be slowed down to allow everything to catch up. It is all very well selling Selwyn as a great place to live but not much use if you are ruining it for the people that live here. There is actually no more space in our education facilities especially at senior school level. The water quality is at breaking point. The roads are at breaking point. We are wrecking the environment faster than it can ever be expected to cope and that doesn't really fulfil a legacy of leaving a better place for the future for our mokopuna does it?
Staff Recommendation	Submission noted and comments will be considered by relevant team and as part of action planning.
Point Number	1498.5
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice The SDC have a number of urgent community and core SDC functions (e.g. roading, community facilities) that this funding should focus on. This should be part of the normal working requirements from properly qualified staff.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1498.6
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice The information provided in page 54 on the changes to the significance and engagement policy is inadequate for anyone to be able to provide meaningful comment - where is the link to the draft policy? There is no information provided on what the actual proposed changes will be. This should be withdrawn from being included in the LTP until it has actually been provided to the community with a chance to read and provide feedback. We have the same concerns and comment on the changes to financial policies - how can you ask for our feedback when no information on the specific changes is provided? For example, revising the capped rate uplift and revising the SDC rating structure and adding a provision for annual CPI uplift appear to be major changes with potentially significant impact on ratepayers - but one sentence with no detail on the specific changes is not adequate information. As above, this should be withdrawn from being included in the LTP until it has actually been provided to the community with a chance to read and provide feedback.
Staff Recommendation	Council acknowledges the submission and notes the concern with the level of information provided. Improvements regarding the presentation and provision of information will be considered for future consultations.
Point Number	1498.7
Category	Activity > Other Categories identified by Staff > Borrowing Levels
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice Borrowing increase as on Page 57 from $155 million to $634 million seem to be a huge amount. It goes on to say that 'much of the borrowing will be funded by development contributions from land developers and lease income from Council commercial properties' - developers have not yet funded very much at all, and supply minimal infrastructure in and around subdivisions which will eventually become the Councils problem to maintain and repair (costing you more) The rates increases that you are proposing are high and difficult for most to manage – but then you forecast the increases just stop - we find it hard to believe that rates will then just

	stop increasing - when there is so much debt owed? Surely it is better to pause, consolidate and then move forward when the picture is clearer.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1498.8
Category	Activity > Strengthened Partnerships
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice We support strengthening partnerships with mana whenua.
Staff Recommendation	The submission is acknowledged.
Point Number	1498.9
Category	Activity > Chlorination
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice The options for removing chlorination in water supplies should have been put out to community consultation - this is a major issue for each community, so ratepayers do have a right to have a say, particularly when the council is back tracking on previous public commitments / statements that chlorination was only a temporary measure. Each community should have the choice on what level of service they are willing to pay for - e.g. let a community vote on whether they want a township specific targeted rate increase to pay for chlorination removal. For such a huge issue it is interesting that you chose to put it in one section at the back of the document where you are 'telling' not 'asking.' It will be 82.6 million to remove the chlorine (+$231 per year on rates) This is after saying that 96% of respondents listed it as a key priority. You introduced chlorine under the pretence that it was 'temporary.' In fact, some people are still waiting and thinking that it will be removed - however it is clear from your document and also listening to your council meetings that there is not going to be and never has been any intent to remove the chlorine. Whether chlorination is right or wrong is another question - but to put the decision making through such a shoddy process will again increase distrust in the Council. It was also disappointing to listen to Councillors referring to rate payers who are passionately against chlorination as annoying and inferring that they are just crazy and not worth listening to?
Staff Recommendation	The submitters preference for community consultation on the removal of chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at

	significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. This matter was included in the consultation document and Council will consider all submissions received. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1498.10
Category	Activity > Low Nitrate Water Sources
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice Of perhaps bigger concern is the paragraph about 'Considering Low Nitrate Water Sources.' Hidden in a small paragraph and 'telling' not 'asking' This is such an important public health issue it should be being put out there loudly and urgently. Of course, straight away blame ECan, but this has to be a priority for SDC, ECan and the Government. You say that 5 water sources are already at half the maximum nitrate level allowed currently in NZ for drinking water. NZ use 11.3 mg/l nitrate - nitrogen which is a level that was set in the 1950's to avoid blue baby syndrome. This is out of date and needs urgent action by you. The NZ College of Public Health, Medicine, and Public Health Association states that 100 cases of bowel cancer and 40 deaths per year are related to high nitrate levels along with links to miscarriages/ premature births, thyroid, colorectal, non hodgkins lymphoma, stomach, bladder, ovarian and breast cancers. The New Zealand College of Midwives advises pregnant women should avoid drinking water over 5mg/l nitrate (increases pre term birth chance by 47% which can result in learning difficulties, poor health outcomes for life and costs of approx $97,000 for that child in health care.) 5 areas are stated as having half the current limit - so presumably around 5.6mg/l nitrate. One of these areas is Darfield and Kirwee. To be safe it should be under 1mg/L. If we cannot drink our local water, it increases plastic pollution exponentially, as well as transportation, storage etc. Areas affected most are usually dairy areas such as we have - nitrate has no taste, no colour, no odour. Synthetic nitrogen fertiliser and intensive

	dairying are the main issues, but here we also have nitrate leaching from the Pines wastewater plant bringing the issue closer than ever to Rolleston. SDC, Ecan and the Govt need to lower the number of cows in Canterbury now. The areas downstream of the Pines Wastewater plant need action. **$5.3 million to 'start looking at this situation over 10 years is clearly not enough, not soon enough and should be given priority over anything else. Without healthy water you will not have a healthy population.** We could maybe stop what is happening and save our water table from contamination before it is too late for all areas (although it is most likely too late as this nitrate could be in the ground 20 -30 years before reaching the water table). **We propose that any funds required for this are moved across now and action is taken urgently, this could avoid the future need to bring water in from further away - presumably the alps so that it is not nitrate contaminated. It would be great to see SDC be brave and take the lead on this rather than blaming everyone else and just taking the consequences of their inaction.**
Staff Recommendation	The submitters support for low nitrate water sources is acknowledged. Staff recommendation is to undertake further investigations into centralised sources of low nitrate water as budgeted in the LTP.
Point Number	1498.11
Category	Activity > Potential Requirements To Fluoridate
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice No fluoridation to the water. Looking at the state of children's teeth here and the costs around adult dental care fluoridation of the water seems like an obvious perhaps? As there is no budget and no intention, but chlorination is continuing, it would have been better to know the costs and benefits of adding fluoridation to the water supply so that people could make an informed choice, as maybe people would opt to have it?
Staff Recommendation	The submitters preference for community consultation on fluoridation of community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.
Point Number	1498.12

Category	Activity > Maintenance and Renewals Funding Roading
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice We strongly support increased investment in maintenance and renewal of transport infrastructure, but we are disappointed that the LTP consultation document provides very little information on such a significant issue for residents. Surely road safety and transport infrastructure have to be one – if not the top priority in this LTP. How much clearer do the residents have to make this to the Council? The LTP should be upfront and clear to ratepayers that these are the roads / intersections that will be improved through this LTP, particularly over the next 3 year period. The poor state of a number of high-use roads is one of the major concerns that are constantly raised, so we are surprised as to why SDC has not come out in the LTP with a clear and well specified plan of action.
Staff Recommendation	Submission is acknowledged by Council. Staff notes the support for transport infrastructure spending. Detailed improvement program has been provided as supporting info for transportation asset management plan. See https://www.selwyn.govt.nz/your-council/plans-And-reports/ltp-2024-2034/supporting-documentation-for-the-long-term-plan-2024-2034
Point Number	1498.13
Category	Activity > Lincoln Town Centre Upgrades
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice 1. We strongly support increased investment in the Lincoln Town Centre upgrades ASAP. This has been committed to completion in a number of previous LTP's but keeps getting bumped for prioritisation of investment elsewhere (presumably Rolleston upgrades). Further delay and lack of investment in Lincoln is not acceptable. 2. We do feel though that some investment in Lincoln could be better scheduled - particularly the Park'n'ride and Meijer Drive extension should be better thought through and should be delayed until later years (i.e. beyond the next 3 years). This would free up $7.5M in the next 3 years that could be better used to improve community facilities and

	safety within the township, e.g. i. The Gerald Street and Birches Road intersection traffic lights could be brought forward to the next 3 years, rather than 2029/30; ii. **Traffic lights should be installed in the centre of the village at Gerald / William / Robert Street intersection. This is already a high use car and pedestrian intersection (more than West-Belt/Gerald) that will only increase substantially if the proposed large carparks are built behind the town centre and the Lincoln events Centre sports fields are extended. Traffic lights at Gerald / William / Robert Street intersection would also mean a safer pedestrian crossing for the many school children who use the town centre to cross Gerald Street (both pedestrian crossings could then also be removed outside the Grouse and the Cottage Cafe);** iii. **Improving the road safety outside Lincoln Primary on Birches and North Belt is also a much higher priority in the next 3 years than the Park and Ride and Meijer Drive extension. Surely the safety of our tamariki has to be the number one priority for any community. At the moment all focus is on Rolleston primary schools – Lincoln schools have been forgotten.** iv) We struggle to see the reason why Meijer Drive needs to be extended all the way through to Boundary Road - we fully support the planned extension of the sports grounds, but this doesn't need to have a road straight through it, that without proper speed calming measures will most likely be ideal for boy-racer's as at night-time as it will be a large empty area. This would also put yet more traffic pressure on the Springs / Boundary Rd intersection which is already a crash hotspot.
Staff Recommendation	Submission is acknowledged by Council. Traffic signals are included at West Belt to cater for the higher cross traffic along the northern and southern sections of West Belt. They are not included at William Street as the breaks in traffic created at West Belt will assist in providing crossing opportunities in the slower speed zone of the town center. The section of Gearld Street between the Liffey and West Belt will have slower speeds and improved facilities for pedestrians. A number of options are currently being investigated for the area alongside the shops. The Park N Ride at Lincoln opposite the Lincoln Events Centre is planned for 2026/27. This timed to coincide with a planned increase of direct bus services to the City by Environment Canterbury. Business and shop owners are concerned about the all-day parking around Gerald St by those using current bus services to the city. The proposed Park N Ride will assist in the upgrade of Gerald St by providing for this type of parking at a better location. The extension of Meijer Drive is coordinated with this to provide the required bus route to Boundary Road and Springs Rd for the intended direct bus services as well as providing roading access and parking for the new recreational reserves. Council has a programme to lower speeds for

	schools supported by the necessary infrastructure. Currently awaiting NZTA approval. The other 3 signalised intersections along Gerald St are needed first to cater for the traffic growth at those intersection and to tie into the adjoining street upgrade works.
Point Number	1498.14
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice 1. We strongly support the upgrade to Ellesmere Road, but argue that the Ellesmere **/ Lincoln-Tai Tapu intersection upgrade should be brought forward from 2027/28. This intersection is clearly getting more and more dangerous. It has been in poor condition for a number of years and has ever increasing traffic use.** 2. **We cannot see any clear plans to upgrade both Springs and Birches Roads between Lincoln and Prebbleton. Both are increasingly dangerous, with very poor areas of road surface, intersection crashes and already high commuter use. We are shocked that it appears SDC continues to ignore the many concerns raised by residents - and this seems a glaring hole in the LTP.** Roading maintenance and renewals $82.3 million - this is a huge amount and has not been broken down in the document for people to look at. Having found the break down buried in the many accompanying files it does not include anything from what we can see for Springs, most of Ellesmere and Birches Rd. These roads are extremely worn, too narrow, have dangerous stop junctions coming onto them and are not fit for purpose with the current amount of traffic - never mind the future growth of Lincoln. Every week almost there are accidents. Just yesterday there was a near fatal - if not fatal accident at the junction of Ellesmere and Edward Street. Yes, people need to drive better, but it is the Councils responsibility (not Waka Kotahi) to make our local roads safe. Stop junctions need flashing light up signs. Road markings need updating. Roads need to be wider and resurfaced. Everyone we have spoken to would be happy for money to be moved across to address these issues, and these issues are urgent before more **people are killed**. This is a core Council responsibility and a ‘must have’ not a ‘nice to have.’
Staff Recommendation	Submission is acknowledged by Council. Road and intersection improvements are programmed on priority basis. Detailed maintenance and renewal program has been provided in the transportation asset management plan.

Point Number	1498.15
Category	Activity > Walking and cycling improvements
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice The **$24 million** indicated for the Arthurs Pass to the sea cycleway is beyond what ratepayers can afford and is not a priority, considering all of the other urgent issues in core infrastructure functions that we are struggling to pay for, even with the very high rate increases in coming years. The same could be argued for the **$8.5** million indicated for Te Waihora Lakeside trail. There are already a number of walking and cycling options available for residents across Selwyn and Christchurch areas, that are easy to access and have sufficient capacity and diversity of environments for residents to enjoy.
Staff Recommendation	Submission is acknowledged by Council.

Point Number	1498.16
Category	Activity > Infrastructure DC
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice We strongly support increasing development contributions for community infrastructure. It is clear with the very large rate increases that the current costs of new residential and commercial expansion is too high and existing ratepayers are having to pick-up a substantial bill. This needs to be better balanced, existing ratepayers can not keep subsidising the community facility and infrastructure demands of more and more greenfield urban expansion.
Staff Recommendation	The submission is acknowledged and staff note the support for the introduction of the proposed development contribution for community infrastructure.

Point Number	1498.17
Category	Activity > Council's Office Improvements
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice

	We do not support spending **$3.7M** on upgrading the Rolleston SDC offices - there is no strong justification provided, and many other urgent community and infrastructure issues such as roading need to be prioritised.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	1498.18
Category	Activity > Planning Further Community Facilities
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice We support prudent planning for improved community facilities in Leeston, Darfield, Prebbleton and Rolleston. We noted that whilst sports facilities are mentioned 20+ times, however there is no mention of any other types of recreational facilities at all?
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events.
Point Number	1498.19
Category	Activity > Compulsary organics collection
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice Compulsory Organics - kerbside collection is brilliant. Kerbside recycling of all types of plastic would be great to do as well, when it is possible to do so.
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. We're pleased you are supportive of the change. Materials accepted in the kerbside recycling are limited by what the

	recycling processing plant can sort, as well as the recycling commodity markets. There is currently almost no demand for post-consumer plastics numbered 3, 4, 6 and 7. Without an outlet for these materials, they cannot currently be collected for recycling. Fortunately, many companies seem to be moving away from using these plastic grades in their packaging.
Point Number	1498.22
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice Selwyn Huts - even though this decision has been made we feel they should be kept as part of Selwyn's history and heritage. Batch settlements like this one at Selwyn Huts are unique and iconic to New Zealand and if SDC were serious about its Heritage Strategy they would actually start doing things that illustrate this. In the recent District plan, there were only token heritage protection actions taken. It is amazing to uphold the tangata whenua history, but the reality is that places such as Lincoln have a strong and still important colonial history, and this should be maintained as well. Lincoln has its roots as an agricultural town, and this should be celebrated.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice

	Maintaining our valuable highly productive land should have been and should be in the future a high priority as it cannot be replaced once lost. We need to maintain the food security of the community for the future - especially in the face of climate change.
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. Council is developing a Future Selwyn Strategy that looks beyond the 10-year horizon to consider how we can respond to these challenges. The Council is also developing an Emissions Plan and Sustainability Plan to identify actions into the future.
Point Number	1498.24
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice Nowhere in your documents do you discuss 'tree cover.' this is vital for a healthy, liveable environment and has been sadly lacking in any SDC decisions as illustrated by Rolleston which is devoid of large trees and natural habitats for birds and other wildlife. We refer you to last years investigation by the parliamentary commissioner for the environment which made clear the immeasurable value that urban green space and tree cover makes to the well being of communities. Tree Cover protection should be included in all future plans urgently - including not removing existing trees and making developers add trees and green spaces to developments. Rolleston is a dismal area of concrete and is lacking in all things 'environmental' - please do not let this happen to other Selwyn neighbourhoods.

Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. Council is developing a Future Selwyn Strategy that looks beyond the 10-year horizon to consider how we can respond to these challenges, including tree cover. The Council is also developing an Emissions Plan and Sustainability Plan to identify actions into the future.

Category	Activity > Maintenance and Renewals Funding Roading
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice $3 million to 'help catch up with road renewals and do emergency work for climate change and extreme weather events' seems extremely inadequate considering the state of the roads that need upgrading and the likelihood of extreme weather events.
Staff Recommendation	Submission is acknowledged by Council. Staff note the support for additional transport funding.
Point Number	1498.26
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice Finally: The reality is that you have no money. The council borrowing increase shown on Page 57 from $155 million to $634 million seems a huge amount. There is a striking increase in the borrowing limit, and in particular the gap between the total rates revenue and the borrowing limit, from near $300 million in FY24/25 to near $500 million in FY33/34. Where is the justification for this? If council borrowing is truly going to decline as

	forecast from FY30/31, then surely the borrowing limit should also decline to be in a consistent proportion to rates revenue. It goes on to say that 'much of the borrowing will be funded by development contributions from land developers and lease income from Council commercial properties' - but we find that hard to believe, as developers have not yet funded very much at all, and supply minimal infrastructure in and around subdivisions which will eventually become the Councils problem to maintain and repair (costing you more). If the council is confident that this will occur, as indicated in the document, then this revenue should be clearly shown in the graph on page 5. Why is the most important information put at the back of the document – is it because most people will have lost interest after the first few pages?
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1498.27
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice The rates increases that you are proposing are high, with double digit compounding increases for the next 4 years - this will be really difficult to pay for most of us. But then you forecast the rates increases will halve from FY28/29 to as low as <2% in FY31/32 and FY33/34. It is very hard to believe this - when there is so much debt owed? There must be a better and more conservative way forward.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1498.28
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice On page 15 of the LTP you talk about Climate Change and the effects beyond the lifespan of the plan, but is SDC really bothered about Climate Change and the environmental effects or is it just 'greenwashing' because

	it sounds good? You have a 'Climate Change' policy - where does this come into action in this plan?
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions.
Point Number	1498.29
Category	Activity > New Public Transport Services
Comments:	Long-Term Plan 2024-2034 from Lincoln Voice Whilst we fully support adequate public transport, we think that **road safety investment** is of higher priority, particularly for Lincoln residents. Our rationale is: 1. At present for Lincoln there are adequate parking facilities for the limited number of commuters who use buses. We should note that the town parking areas are planned to be increased substantially with the town centre upgrades (all of which will be within a few minutes walk to the planned park-in-ride facility). The town centre upgrade that was proposed and accepted in 2017, including the increased parking areas, traffic lights and safe pedestrian crossings are a higher priority that if completed as scheduled in the LTP would provide adequate capacity for any park and ride demand for at least the next 5 yrs. 2. The main roads from Lincoln are in extremely poor and dangerous condition - Springs, Birches and Ellesmere. These roads all have a very poor surface and dangerous intersections - this has been raised with the Council and on the community facebook page numerous times, yet both Springs, Birches, and most of Ellesmere Roads do not appear to have any dedicated investment in the LTP for upgrading these key commuter routes. These roads are used substantially more than they were designed for. The increase in population is already huge and will be even more with the recent approval of PC69 to virtually

	double the size of the Lincoln. The safety of residents should be a Council priority and maintenance of local roads is a core Council responsibility. 3. The consultation document makes it clear that there is no immediate and concrete commitment from the Greater Christchurch Partnership on establishment and funding of additional bus services. There is also no commitment from Waka Kotahi to co-fund. It makes sense to to delay until the next LTP any investment in Park in Rides until those agencies have provided concrete support. As in the above two points, Lincoln in particular has higher immediate priorities for the park and ride funding and will have adequate parking if the town centre is upgraded to support any increase in demand or provision of bus services. 4. Public transport corridors need to be close to people's homes. With the current and proposed urban sprawl that is about to happen in Lincoln it is very doubtful that this will be able to happen. If you put a park and ride in at Lincoln and also the ones in Rolleston you are encouraging many cars to do repeated short journeys which is incredibly bad for the lifespan of the car engines, the battery and air pollution. Ideally public transport should be in corridors of medium density housing where people live who are most likely to use it. SDC could change the medium density zoning to apply more specifically to town centre locations - where it should be medium density under the new government changes.
Staff Recommendation	The 2020 Greater Christchurch PT Futures Business Case identified that further investment in improved PT services and infrastructure will have positive benefits including the use of Park N Rides in the Districts to facilitate direct PT services to the city. This was further reinforced in the 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case. There are insufficient Park N Ride facilities to cater for 10 years of demand to align with the additional PT services planned by Environment Canterbury. Environment Canterbury is considering developing a business case for additional direct services for Rolleston and Lincoln in 2024-27. Improving the frequency of other key Metro PT services such 5 (Rolleston) and 80 (Lincoln). Environment Canterbury is also investigating 'On Demand' PT Services as another option within larger townships. The Lincoln Town Centre - Gerald St Upgrade is included in the draft LTP. With Councils Preferred Option a Park N Ride at Lincoln opposite the Lincoln Events Centre is planned for 2026/27. This timed to coincide with a planned increase of direct bus services to the City by Environment Canterbury. Business and shop owners are concerned about the all-day parking around Gerald St by those using current bus services to the City. The proposed Park N Ride will assist in the upgrade of Gerald St by providing for this type of parking at a better location. Because of the cost of extending bus services across expanding urban areas, Park N Ride is more effective especially for direct to City services. The widening and safety upgrade of Ellesmere Rd is also included in the draft LTP as the first

	priority for upgrading this main road in the area which will take pressure off Springs Rd.
Point Number	1498.30
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	Long-TermPlan2024-2034fromLincolnVoice 1. Lincoln community reserve extension, Boundary Rd, 2024 - 2029 s hould be done with some urgency due to population increase. 2. Kakaha Park Stage 2 2024 - 2026 is not urgent and could be delay ed for a number of years.
Staff Recommendation	Staff support the submission in terms of development of the extension to Lincoln Domain which is being driven by demand from population growth. Budgets have been provided in the draft LTP to progressively develop the site (total $4.5 million from 2024/25 to 2028/29). Staff concur that the development of stage 2 at Kakaha Park could be reprogrammed to start a year later in part to provide time to consider planning for the site with potential for further land to be added as well as integration with other facility proposals. Staff recommend that the budgets set aside for the development of Lincoln Domain extension are supported and that the budgets for Kakaha Park stage 2 development works in 2025/26 and 2026/27 are shifted out one year in the programme with the budget of $884,000 in 2024/25 to undertake urgent drainage improvement works and design to be retained.

Category	Activity > Strengthened Partnerships		

Comments:

SUBMISSION OF HERITAGE NEW ZEALAND POUHERE TAONGA TO THE SELWYN DISTRICT COUNCIL DRAFT LONG TERM PLAN 2024-34

To: Selwyn District Council

Name of submitter: Heritage New Zealand Pouhere Taonga

1. Thank you for the opportunity to make a submission on the Selwyn District Council's Draft Long Term Plan 2024-34 (the Plan).
2. Heritage New Zealand Pouhere Taonga (HNZPT) is an autonomous Crown Entity with statutory responsibility under the Heritage New Zealand Pouhere Taonga Act 2014 (HNZPTA) for the identification, protection, preservation, and conservation of New Zealand's historic and cultural heritage. HNZPT is New Zealand's lead heritage agency.

<u>General approach</u>

3. HNZPT acknowledges the challenge of preparing this Plan in a period of change and uncertainty, with legislative reforms and current financial pressures.

4. HNZPT recognises that the Long Term Plan is a high-level document to provide direction for development initiatives and funding within the district. Within that, the Council has a responsibility to acknowledge the various tangible and

intangible aspects of life that make up its heritage and ensure that these are appropriately represented within the Plan. Cared for historic heritage is essential in creating an engaging and vibrant region that fosters local identity, draws people in and helps to sustain the local economy. It is a fundamental part of the fabric of the community.

5. HNZPT supports Council's strengthened partnership with mana whenua, and the development of a Bicultural Strategy, which we believe will help create better outcomes for communities.
6. HNZPT supports the "well-beings" identified within the community outcomes that promote the social, economic, environmental, and cultural wellbeing of the community. We note that Selwyn's growth predictions for the next 10 years remain high, and acknowledge the challenge to balance that growth with the continued high standard of living that Selwyn communities currently enjoy.

7. We commend the measures Council has undertaken in the three years since the last Long Term Plan, in particular the development of a Heritage Strategy and the establishment of a $50,000 community history fund for history groups seeking funding to preserve and promote heritage.

8. In the 2021-31 Long Term Plan, HNZPT supported the adaptive reuse option put forward for the 1890s Hororata Community Centre. We are pleased to see that, following discussions with the community, the Council transferred the Hall and surrounding land to the Hororata Community Trust, along with a grant of $1 million towards developing the new hub. HNZPT encourages this development to retain and reuse the existing building as part of the new hub and would welcome the opportunity to provide conservation advice and assistance.

<u>Climate change</u>

9. HNZPT supports the Council's continued efforts to understand and respond to the effects of climate change. Heritage sites can be significantly affected by the impacts of climate change, including the loss of archaeological sites through sea level rise, and their continued retention requires us to understand these impacts and to respond to them effectively.

10. We recognise that Selwyn District Council was one of the earliest signatories to the New Zealand Local Government Leaders' Climate Change Declaration and supports their commitment to developing and implementing plans to reduce greenhouse gas emissions, to engage with tangata whenua, and to support resilience within local communities. We note that climate change consideration has been incorporated into numerous aspects of the Plan, including the infrastructure strategy, and that the Climate Change policy commits the Council to make climate change mitigation and adaptation a core component of its planning and decision making.

11. HNZPT supports Selwyn District Council's partnership with other agencies to improve the efficiency and health of homes, businesses, infrastructure and to raise awareness of climate change impacts.

Archaeological Authorities

12. Under the HNZPTA an archaeological site is defined as any place in New Zealand that was associated with human activity that occurred before 1900 and provides or may provide, through investigation by archaeological methods, evidence relating to the history of New Zealand. Archaeological sites are legally protected under sections 42(1) and 42(2) of the HNZPTA and an archaeological authority is required for any works that may modify or destroy an archaeological site, including demolition of a building constructed prior to 1900. It is an offence to undertake activities that may modify or destroy an archaeological site unless authorised by an archaeological authority issued under the HNZPTA.

13. Legislative obligations regarding archaeology should be taken into consideration for all Council projects. HNZPT

recommends that Council undertake best efforts to avoid identified archaeological sites in close proximity to any proposed projects in the first instance. This would minimise costs and delays. If avoidance is not possible, the associated costs and timeframes need to be factored into project budgeting and planning.

Incentives

14. HNZPT strongly supports adaptive reuse to enable heritage buildings that may no longer be suitable for their original use, to be appropriately adapted. This can ensure their longevity, and we encourage Council to always consider this option for their buildings.

15. Many of the district's heritage buildings are privately owned yet still contribute to the community sense of belonging and way of life. Financing the maintenance, repairs, strengthening and upgrade of these structures can often be financially challenging for owners. HNZPT supports the Council's ongoing assistance to heritage building owners through the Selwyn Heritage Fund, which encourages and assists owners with work required to maintain and enhance their heritage buildings, and we strongly encourage the retention of this fund.

16. There are also a range of other incentives Council could utilise to promote the protection and conservation of historic heritage. HNZPT supports incentivising mechanisms such as the remission of rates for landowners of historic heritage, free or subsidised processing of applications, and the provision of free specialist advice to heritage building owners.

Recommendations

	17. HNZPT requests consideration of the following methods to protect and enhance Selwyn's historic heritage: • Council recognises the adverse effects of climate change on historic heritage and implements measures to prevent further degradation wherever possible. • Council is aware of the potential archaeological and cultural importance of areas which are subject to development proposals or pressures, and continues to consult with HNZPT. • Council continues grant funding for repairs and maintenance and seismic strengthening for private owners of heritage properties. • Council considers further heritage incentives to facilitate the retention and strengthening of heritage buildings such as free or subsidised processing of applications, remission of rates and free advice to owners of heritage properties.
Staff Recommendation	The submission is acknowledged. Selwyn District Council acknowledges the importance of promoting and protecting heritage as it improves community wellbeing by connecting people and building the identity of Waikirikiri Selwyn. The Selwyn Strategic Heritage Plan 2023-2027. ensures there is a focus on improving support for heritage activities and supporting the work of local history groups and residents who are strongly motivated to collect, protect and enhance local place-based heritage. Council has two community heritage funds available: the Community History Fund, which is to support kaitiaki (guardians, conservators, and protectors) communities and community groups for various history projects (and the operating costs of community history groups); and the Heritage Protection Fund which is to encourage and assist owners with work required to maintain and enhance heritage buildings in the District as well as work required on protected trees.

Submitter Number:	1501	**Submitter:**	Ryan Jones for Affinity Gymnastics Academy
Organisation:	Affinity Gymnastics Academy		

Point Number	1501.2
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	See report attached to this submission Submission Selwyn District Council Should honour their previous commitment to support gymnastics in Selwyn. This should be in the form of building a purpose-built facility for lease back to Affinity Gymnastics Academy, the largest Charitable sports club in the region and the largest gymnastics club in the district. The options for council to support gymnastics as proposed as follows: Option one (preferred) Selwyn District Council agree to provide a purpose-built facility in Rolleston of at least 1,600m2 to accommodate Affinity Gymnastics Academy, subject to a lease. Option two Selwyn District Council provides a section of land in Rolleston for Affinity to build a purpose-built gymnastics facility the land can be subject toa nominal ground rent and the council provides some seed funding to the club towards the build costs.
Staff Recommendation	The submission is acknowledged. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input. This excludes existing or proposed Council facilities as part of the Long Term Plan. Staff recommend that this facility be included as part of a wider community facility funding and planning project with gymnastics as a potential individual case study along with other facilities such as a performing arts and a military museum or similar to provide a variety of examples.

Submitter Number:	1502	**Submitter:**	Sam Newton for Recreation Aotearoa
Organisation:	Recreation Aotearoa		
Point Number	1502.1		
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities		
Comments:	See report attached to the submission		

Recreation in Selwyn

1. We acknowledge and thank Selwyn District Council as the major provider of the areas sport and recreation facilities. By investing in recreation, Selwyn District Council is helping to instil a lasting culture where active living matters. The work of Selwyn District Council makes a real difference.

2. The Selwyn District Council has a critical part to play in ensuring people continue to enjoy quality recreation opportunities. These need to be available to everyone, regardless of age, fitness level, ability, or socio- economic background.

1. Council planning needs to adopt a long-term approach that considers factors such as urbanisation, population growth, and an ageing population, to ensure recreation can continue to thrive amid change.

2. Research has found that in areas of activity decline, government and community-led interventions helped reverse the trend. When the infrastructure is in place, such as parks, playgrounds or aquatic facilities, people are more likely to be active.

3. Population growth and increased demographic diversity has and will continue to place pressure on recreational infrastructure in Selwyn.

Specific Comments:

4. Recreation Aotearoa supports the proposed investment in Active Recreation infrastructure and services, outlined in the Draft LTP.

5. Recreation Aotearoa supports the Councils commitment to investment in active transport infrastructure. Recreation Aotearoa has long supported Active Transport initiatives across the motu. Investment in Active Transport infrastructure achieves the dual symbiotic benefit of easing congestion and making it easier for residents to integrate healthy recreational activities into their day-to-day lives.

6. Recreation Aotearoa submits its support for the investment in Play by Selwyn District Council. Recreation Aotearoa notes that co-design kaupapa for Play infrastructure often results in a desirable bias towards less structured and informal modes of play.

7. Recreation Aotearoa cautions against deferred maintenance and upgrades of playgrounds, specifically. It is essential that investments in public toilets, walkways and connecting green spaces are also implemented.

8. We further encourage Selwyn District Council to increase investment in the accessibility of playgrounds and parks. Considering the wider whānau impact of disability and inactivity, and the increasing rate of impairment comparative to the aging population, statistically there is a significant proportion of the community currently missing out on the irrefutable benefits of being physically active.

1. Recreation Aotearoa submit on the importance of genuinely consulting and collaborating with people with disabilities and their whānau, and encourage Selwyn District Council to undertake inclusive consultation processes within the design, development, and upgrades of the recreation and play spaces specified within the LTP.

2. We further submit our support for maintaining collaboration with people with disabilities throughout the duration of such projects and warn of the risk of only consulting with end-users at the beginning of a project, or after it is too late. Maintaining ongoing input from the disability community and advisory groups at regular intervals, is an essential principle to imbed within the project developments.

3. Alongside robust processes for maintaining collaboration with people with disabilities, Recreation Aotearoa also submits its support for ensuring there are processes stipulated in policy whereby people with disabilities can notify council of any barriers to accessing recreation places, spaces, and programmes. This includes aligned procedures of how such barrier will be addressed and remediated by council.

4. Recreation also submits its concern that cost escalation in undertaking these investments may be inadequately accounted for. Recent observations from around the motu, in both the PARS sector and others, have demonstrated that inflation in materials, labour and debt- servicing has placed considerable budgetary pressure on long term projects.

5. Recreation Aotearoa cautions Selwyn District Council of a predictable lag-effect of participant uptake in the utilisation of new recreational facilities. Many forms of recreation have suffered a loss of participant numbers and organisational capability after recent challenges. Recreation Aotearoa urges Selwyn District Council to be patient with regard to how quickly and fully new facilities are utilised by different recreational groups.

	6. Additionally, we submit that rapid changes in demographics, participation trends and technology mean that a 'build it and they will come' approach doesn't always work. Simply building infrastructure is not enough. Recreational assets need to be activated and programmed to make them more appealing and to break down barriers for the hard- to-reach areas of the community.
Staff Recommendation	Submission has been acknowledged by council.

Submitter Number:	1503	**Submitter:**	Carleen Morrish for Eastern Plains Land User Group
Organisation:	Eastern Plains Land User Group		
Point Number	1503.1		
Category	Activity > Other Categories identified by Staff > Rates		
Comments:	We are writing to you today on behalf of the members of the Eastern Pains Land User Group, a catchment group that represents farmers and landowners between State Highway One, the Selwyn River, city boundary and Te Waihora. A hardworking farming community who wish to urgently bring to your attention our deep concerns regarding the possibility of facing a substantial rates increase from both the Selwyn District Council and Environment Canterbury. It is our understanding that the Selwyn District Council intends to implement the following rates increase – as per Councillor Briefing Agenda & Supporting Material, Wednesday 27th March 2024; ATTACHED LETTER HAS SDC GRAPH OF PROPOSED RATES INCREASES – WOULD NOT FORMAT TO BE COPIED INTO THIS SUBMISSION CATEGORY. SEE LETTER ATTACHED TO THIS SUBMISSON.		

a rates increase of 15.5% increase for 2024/2025 , 14.5% 2025/2026, 14% 2026/2027, 13.5% 2027/2028, while Environment Canterbury is planning for a 24.2% increase. This potential burden of increased rates threatens the very livelihoods of farmers who are already facing numerous challenges in their daily operations, and poses a significant threat to our ability to continue operating effectively and sustainably.

The farming industry operates on thin profit margins, and any increase in operational costs has a direct impact on the financial viability of farms. Facing such a substantial rates increase would place an immense financial strain on farmers, potentially pushing many to the brink of financial instability. The cumulative impact of facing rate increases from both SDC and ECAN simultaneously is particularly harsh on farmers. It leaves no room for adjustment or flexibility in their budgets, making it extremely challenging to cover essential operating expenses, invest in sustainable practices, or plan for the future. A member of our committee has been in contact with Federated Famers who had the following view to share; Rate increases should be at or below inflation, Councils should stick to their core business and Uniform Annual General Charge should be less than 30%. Our member has calculated that the impact on their farm would be $5000 next year.

Farming requires significant investments in machinery, infrastructure, compliance, technology, and resources to remain competitive and sustainable. A double rates increase would divert much-needed funds away from these essential investments, hindering the ability of farmers to modernize their operations and adopt environmentally friendly practices.

Farmers play a vital role in our communities, not only as producers of food but also as stewards of the land and contributors to the local economy. A substantial rates increase could have far-reaching implications beyond individual farms, leading to job losses, reduced spending in local businesses, and a decline in the overall economic health of the region. The cost of farming in the Selwyn District is already a challenge because of high land values that give rise to high rating compared to land more rurally located which has a lower value and consequently a lower rate invoice. Both farming operations would

	have similar farm income and margins but vastly contrasting rates invoices. In light of these pressing challenges, we urge you to reconsider the implications of imposing a high rate increase on the farming community. We understand the need for local authorities to generate revenue, but we also appeal for fairness and consideration of the circumstances facing farmers.
Staff Recommendation	That the submission is acknowledged by Council. That the Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum. The farming community has always been an integral part of the district's fabric. The Council acknowledges the hard working and infrastructure heavy nature of the demands this community is facing, and we carefully consider farmers in our strategic planning.

Submitter Number:	1504	**Submitter:**	Amy Carter for The Christchurch Foundation
Organisation:	The Christchurch Foundation		
Point Number	1504.1		
Category	Activity > Other Categories identified by Staff > Community funding /grants		
Comments:	See Documents attached to this submission for more information **Role of the Council** The council, with its deep understanding of the district's needs and its commitment to serving the community, is ideally positioned to help establish this fund. Your support, financial and advocacy, can play a crucial role in bringing this idea to fruition.		

	The contribution we respectively are requesting of the Selwyn District Council through a strategic partnership with the Christchurch Foundation would include investment in the establishment costs, support with the marketing and promotions of the Fund to the District, access to Selwyn Council Facilities for hosting of briefings and meetings and helping us identify the correction local champions including mana whenua, community influencers and business leaders to work with us on this project. **Conclusion** In conclusion, the establishment of The Selwyn Fund (an endowment fund for the Selwyn District) can serve as a significant step towards ensuring the long-term prosperity of our community. It aligns with the council's strategic priorities and can help make Selwyn a great place to live, work, and play, forever. Over time as it grows it will provide an impactful co-funder for the council to deliver important projects for the community, in perpetuity. We kindly request the council to consider providing a contribution to the establishment funding and a commitment to establishing a strategic partnership with The Christchurch Foundation within your LTP. Included with this submission are some supporting appendices. • Vital Signs research which shows community aspirational priorities for greater Christchurch which included statistically correct representation from the Selwyn District. • The initial briefing paper supplied to SDC re the concept in January 2023.
Staff Recommendation	This request will be considered by Council within the Long Term Plan Deliberations. Strategic Partnerships are part of the Council's Community Funding Programme and any arrangements with groups are generally made for three years, subject to performance and delivery. A submission to Council's Long-Term Plan process, plus strong alignment with Council's strategic direction and role is required for consideration for this fund. The activities funded are generally activities that, should

	they not be delivered, might reasonably be expected to be the responsibility of Council or impact an aspect of the District's wellbeing.

Submitter Number:	1505	**Submitter:**	Anne Scott for Spokes Canterbury
Organisation:	Spokes Canterbury		
Point Number	1505.1		
Category	Activity > Walking and cycling improvements		
Comments:	Spokes Canterbury **supports capital and operational spending on walking and cycling infrastructure**. More investment is needed to encourage mode shift and ensure the safety of cyclists and pedestrians of all ages and abilities. • Investment in cycle infrastructure requires little maintenance and has numerous health and environmental benefits. • Increasing use of active transport and public transport reduces congestion and wear on our roads. Selwyn is growing rapidly and becoming more urbanised. Residents living in Selwyn need a range of transport choices that support active and public transport, including walking, cycling, scooting, buses and MRT. 13% of New Zealand adults do not drive for various reasons, and need alternatives that will allow them to be independent and remain connected with their community. Many places in Aotearoa have low cycling numbers but it is clear that if safe infrastructure is provided, people will cycle. Build it and they will come. Most people can enjoy cycling, and will do so if they feel it is safe for their whanau and themselves. Using an E-bikes increases the range of people who can participate and journeys that are practical. Lower speeds, separated infrastructure, and safer		

crossings of major roads and intersections encourage the “interested by concerned” cyclists who are often women, children, and the over 65s on e-bikes (the fasting growing cycling category in NZ) to take more

trips. Accessible cycling infrastructure should be designed to work for a wide range of uses including cargo bikes carrying children, trikes, and mobility scooters.

There are an increasing number of good cycling opportunities in Selwyn but they are poorly advertised and signposted. A cycling map would be very helpful and encourage more use. It is easy to get lost and even local cyclists are unaware of what is available. As Selwyn has grown the volume and speed of traffic has also increased to the point where cyclists feel increasingly unsafe cycling unprotected on the road.

Spokes supports connecting Selwyn towns together through a separated cycle network. A cycleway from West Melton to Darfield via Kirwee would be well used. A connection between West Melton and Yaldhurst (joining the South Express) would be helpful. There is confusion among Spokes members if there is a separated cycleway from Prebbleton to Rolleston or do you have to go via Lincoln. The Hoskyns Road cycleway should be extended to Weedons School.

Selwyn should continue to advocate for the proposed bridge with cycling and walking infrastructure over SH1 in Rolleston. It is unclear if this is still going ahead.

Spokes supports developing a cycle trail in Selwyn connecting Arthurs Pass to the East Coast and a trail around Te Waihora connecting to the Little River Trail. Spoke would like an opportunity to comment on the proposed route at an early stage.

Smoother road surfacing makes it physically easier to cycle, particularly for children and the less physically able. Spokes

	members report that the default chip seal used in Selwyn is too rough. A good example is the reseal done outside Lincoln Primary School and Lincoln High School. Spokes top priority is to increase safe cycling around schools and popular destinations to allow children to get safely and independently to school and to encourage the greatest range of people of all abilities to cycle.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1505.2
Category	Activity > Other Categories identified by Staff > Speed Management
Comments:	Note - attached submission documentation has graphs and table to support this submission point. They do not display well in here **Speed** New Zealand and international research show that **reducing speeds is the single most effective, and often cheapest, way to reduce death and serious injuries on our roads**. Spokes Canterbury supports **slow speeds, particularly around schools and in neighbourhoods,** which can encourage more active travel choices as cyclists and pedestrians feel safer. • The research is clear that speed is a factor in death and serious injury crashes and the risk is significantly reduced by lowering speeds in neighbourhood streets. There is now growing evidence in Aotearoa, confirming international research, that reducing speeds has a significant impact on reducing deaths and serious injuries. (See fig 1) • There is a significant difference between being hit by a vehicle in a 50 km/h zone to a 30 km/h zone (see fig 2) • Reducing speeds on rural road also makes a significant difference (see fig 1), including variable speeds at intersections. GRAPHS AND TABLES HERE Selwyn has a number of intersections of 80km or above that would benefit from variable speeds, noting that this can reduce deaths and

	serious injuries by 51%. The Council could discuss this with NZTA | Waka Kotahi based on the needs of the community and DSI statistics. *Fig 1. Glen Koorey, 2023 Australasian Road Safety Conference, Cairns*
Staff Recommendation	Submission is acknowledged by Council. Council has previously consulted on a full speed management plan which reflected your submission, we need to give some consideration to the consultation results, which were largely unsupportive of speed limit reductions. We are now dependent on central government to outline how speed limits are to be managed and update our full speed management plan accordingly.
Point Number	1505.3
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	
	Question: You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option

	Comment: Spokes supports Option 1 - Build three new Park and Ride Facilities at Lincoln and Rolleston and upgrade Public Transport Spokes Canterbury supports better public transport for Selwyn. We support Bike Park and Ride facilities with safe, secure, covered bike parking and good shelters. Bike parking can be the hooped variety or Locky Docky for e-bikes. Good public transport services using electric buses reduces congestion and emissions. Selwyn should also consider a MyWay service (similar to Timaru) that interconnects with Selwyn key destinations and to other bus services. For example, a bus between Prebbleton and Rolleston as the current connection stops in Lincoln for a break which makes the trip too long. The MyWay vehicles should have bike racks. If Waka Kotaki does not provide co-funding for option 1 Selwyn should consider going ahead with at least some of the service improvements given there is good local support.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Environment Canterbury is considering developing a business case for additional direct services for Rolleston and Lincoln in 2024-27 including investigating 'On Demand' Services as another option within larger townships like MyWay in Timaru but this would only ever eventuate as a trial first. It is the intention that the Park N Rides have secure and possibly covered bike parking. Environment Canterbury provide PT services including vehicles. With the move to a fully electric bus fleet this will assist in emissions reduction.
Point Number	1505.4
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	Spokes would like to see an **increased focus and expenditure spent on climate action.**

	Spokes Canterbury supports the Council focusing infrastructure investment on active and public transport modes such as cycling and walking using separated or shared paths; reduced speed; and public transport as part of your climate actions. **Transport makes up 17.5% of New Zealand's gross emissions**. The health effects and costs of fossil fuel vehicles should also be taken into account when prioritising funding. It is not a coincidence that New Zealand has the highest car ownership and one of the highest asthma rates in the world. A recent study in Neurology has linked PM2.5 particulates from diesel exhausts and other traffic-related air pollutants to Alzheimer's disease. Anything we can do to reduce single occupancy motor vehicle use and motor vehicle use for shorter journeys reduces the long-term costs to all New Zealanders. Selwyn has the potential to increase cycling trips with the right infrastructure. Spokes also supports the Council efforts on climate adaptation, water reforms and protecting land and ocean biodiversity.
Staff Recommendation	Acknowledged The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. Council is developing a Future Selwyn Strategy that looks beyond the 10-year horizon to consider how we can respond to these challenges. The Council is also developing an Emissions Plan and Sustainability Plan to identify actions into the future. Council views that the further implementation of the 2020 Greater Christchurch PT Futures Plan offers the most tangible way to reduce emissions and is why it is investing in additional PT infrastructure such as Park N Rides to align with the additional services sought to be provided by Environment Canterbury to encourage further PT use. Council has invested heavily in cycleways in Selwyn over recent times, however the new Government Transport Statement on Transport is not supporting previous levels of co-investment in active and public transport which means Council will also need to adjust to

	this new reality. However this is not stopping Council planning for good outcomes aligning transport systems to land use and growth where these opportunities arise.

Point Number	1506.2		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		
Comments:			
	Comment: **Leeston** I have read the Leeston submission and agree with the findings. The issue I have is that the Council staff held a public meeting in Leeston about eighteen months ago and the community put notes, containing information about our thoughts/needs for the building , around the walls of the community room, the staff said they would collate them and come back to us. The council staff have not come back to us to discuss this information. Around December last year the Township was sent a plan of the new building that looked like a fish, two thirds for the library and only one third for the community. The building is supposed to be a ***community*** center for the community to use.		
Staff Recommendation	The submission is acknowledged. Staff used the community notes to inform the preliminary design process.		
Point Number	1506.3		

Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	**Springston South Reserve or Upper huts** Why is there a plan to connect the reserve to the Rolleston Sewerage Plant (at a discounted rate)? When the council says climate change would mean they could no longer live there in the future. How are you going to stop water infiltrating the sewer system? Better communication is required especially when lives, public health and properties are involved.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.
Point Number	1506.4
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	**Doyleston** I have read the Doyleston submission and agree with the findings. When is the RSA Lynch Gate in Doyleston going to be light up? Also, when are the soldiers' names and other wording going to be re-painted in gold?
Staff Recommendation	Submission is acknowledged by Council. Council is proposing to carry out a review of facilities across the district and this includes looking at alternative management models especially where the facilities are primarily meeting a localised need. Therefore, as part of this work, there may be an opportunity to further explore how arrangements could work with the Doyleston Residents Association (once they become an incorporated society) and management of Doyleston Community Centre and potentially Osborne Park. It is noted that one of the key reasons for moving away from volunteers undertaking high-risk maintenance activities (e.g. mowing) is the significant risk to the public, the volunteers and Council if an incident occurs. Before any consideration is given to the arrangement outlined in the submission this risk needs to be fully understood and mitigation measures explored, and this may be a significant

	constraint to the proposal. Staff recommend that further work is undertaken to explore the feasibility of the proposal for the Doyleston Residents Association to undertake operation of Doyleston Community Centre and Osborne Park under a lease/management agreement and this forms part of the broader work to look at alternative management models for Council facilities. Staff will consider the work noted in the submission for the upgrade of the memorial in Doyleston alongside other priorities for memorial upgrades. An annual budget is set aside in the draft LTP for memorial refurbishment and upgrading.
Point Number	1506.5
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	**Osborne Park** I am concerned about the Council wanting to take over Osborne Park mowing and ground maintenance These jobs have been done by a group of volunteers led by JXXX MXXXXXXX, who received an award at the last SDC Awards event. I believe the Council only covered the cost of fuel for our tractor and ride on mower with no payment for all the labour involved. Take note the ground that is used by the Archery Club needs mowing regularly to be kept very short to enable the arrows to be found. When the hedges are trimmed, who cleans up after they are cut? Currently the volunteers led by John tidy up and dispose of the trimmings. JXXXs' wife received a phone call to say he would not be needed after the end of June this year?!! The very man that received an award for all the voluntary work he has done around Doyleston over many years.
Staff Recommendation	Submission is acknowledged by Council. Council recognises the valuable work volunteers have provided in looking after reserves and facilities. The key reason for moving away from volunteers undertaking high-risk maintenance activities (e.g. mowing) is the significant risk to the public, the volunteers and Council if an incident occurs. It is noted that a submission has been received for the Doyleston Residents Association for Council to consider handing the

	reserve and hall back to the community. Council is proposing to carry out a review of facilities across the district and this includes looking at alternative management models especially where the facilities are primarily meeting a localised need. Therefore, as part of this work, there may be an opportunity to further explore how arrangements could work with the Doyleston Residents Association (once they become an incorporated society) and management of Doyleston Community Centre and potentially Osborne Park. Before any consideration is given to a future arrangement all risks need to be fully understood and mitigation measures explored, and this may be a significant constraint to the proposal in terms of volunteers continuing with high-risk work. Staff recommend that further work is undertaken to explore the feasibility of the proposal for the Doyleston Residents Association to undertake operation of Doyleston Community Centre and Osborne Park under a lease/management agreement and this forms part of the broader work to look at alternative management models for Council facilities.

Submitter Number:	1507	**Submitter:**	Clayton Fairbairn
Point Number	1507.1		
Category	Activity > Other Categories identified by Staff > Parks and Reserves		
Comments:	Community Park Facilities Council has invested significantly in creating new reserves. Several of those reserves have excellent toilet and storage facilities (Brookside Park and Kakaha Park) but they fail to provide club rooms/community rooms where participants in sport can congregate in shelter after their activities. These facilities could be made available to the whole community when not in use by the sport participants at the weekend much like any other SDC community room. These community rooms would allow council to disestablish community halls of which several require significant investment.		

	Selwyn is well served with large community halls at Rolleston and Lincoln amongst others allowing for smaller rooms to be constructed at local reserves to serve dual purpose of sport clubrooms and community rooms of a scale more suited to the number of people requiring such facilities. The large old community halls can be disposed of with funds invested into the smaller community facilities. For Leeston Park this should be an obvious option. Dispose of old community halls and provide new community rooms at council reserves.
Staff Recommendation	The submission is acknowledged by Council. Council's general policy is to not provide social spaces on reserves but to build the changing facilities and toilets and storage necessary for the operation of the park. Traditionally social spaces (clubrooms) have been provided by clubs but Council is moving away from single use clubrooms and promoting hub (combined) facilities. In some cases where Council is considering a community facility on a park there may be an opportunity to create some common social space as part of that facility (e.g. Leeston Park, Lincoln Domain). The submitter's view is consistent with the general approach.
Point Number	1507.2
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	Financial Transparency In the previous LTP rates were proposed to rise 4-5% per year over 10 years with a limit of a 6% annual increase. Council is now proposing a 15.6% increase with an average increase of 8.5% over 10 years. The average annual inflation over the last three years was 5.5% and is currently 4%. The numbers do not add up. Council have identified that infrastructure has increased in cost by approximately 30% and it appears that those costs account for approximately 50% of the rates cost. This indicates that there has also been significant cost elsewhere not identified clearly by council which is causing the rates rise and not offset by the increase in households

in the district. The LTP has failed to identify where the increased costs are.

Business as usual costs

The LTP appears to have focused on how budgets can be increased without consideration of where savings can be made in other areas. Council's business as usual (BAU)

operations have increased costs to rate payers without any consultation of the ratepayers and without inspection by councillors. Examples of this are:

- □Stormwater infrastructure being required in new development when it is not required by Environment Canterbury.
- □Wider footpaths in all areas.
- □Rejecting narrow minor carriageways (permitted by the District Plan).
- □The adoption of collector sewers.
- □Failure to meet legislated timeframes for resource consent processing.
- □Significant requirements for council construction contracts (tenders) which add unnecessary cost.
- □The simple act of turning off the lights in the civic offices at night.

Council needs to change its BAU to reduce these costs that manifest themselves as increased depreciation/replacement costs over the long term and refunds of processing fees in the short term. This assessment should include an assessment of staff numbers required to deliver services efficiently.

Other Hidden Costs

Council should audit its activities to see if what they do is necessary. With time bureaucracy becomes bloated. Standards continue to be

	ratcheted upwards, more rules are created but it is unclear what risk or outcome is trying to be avoided. Have staff numbers increased due to greater council requirements? Are those people needed? Are the standards imposed providing value for money? The LTP is silent on potential savings and only looks to rates for funding, borrowing is shown to be well below maximum and decreasing. It appears that the LTP was prepared when our economy was in a bad position but it has since settled with inflation dropping. This recovery does not support the proposed increases.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1507.3
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Digital Assets Council has unnecessary digital assets attended to by paid staff. You tube is used to share information with the public by SDC but has a woeful view number. Much of the subject matter is valueless to ratepayers. Cease digital activities other than those that provide transparency of council processes e.g meetings. The savings can be used to offset rate increases. Council has receptionists and an electronic check in for civic office visitors. The electronic system is unnecessary when staff can perform its function. Disestablish the electronic system and use the savings to offset rate increases. Council should review the value provided by all of its digital activities and reduce in scale or disestablish where possible.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology.

	Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1507.4
Category	Activity > Infrastructure DC
Comments:	Development Contributions Should not pay for ongoing costs of community facilities. Development contributions should be used to upgrade infrastructure due to development demands. Targeted rates should be used for maintenance and general rates for community facilities.
Staff Recommendation	Submission is acknowledged by Council. The proposed community infrastructure development contribution can only be used for development of new facilities or upgrade of existing facilities that are needed to meet additional capacity from growth and are targeted to specific projects. They cannot be used for maintenance and renewal work and, as noted in the submission, maintenance and operating costs are met from rates (less any revenues received).

Submitter Number:	1508	**Submitter:**	Michael Jones
Point Number	1508.1		
Category	Activity > Planning Further Community Facilities		
Comments:	I am Michael Jones a Prebbleton resident and committee member of the Prebbleton hall and make this individual submission. I will draw information from SDC long term plan, Berl information and the redacted report of Global Leisure Group.		

1. The current hall is approximately 100 years old, has suffered earthquake damage and will not be usable after 2035.
2. The Hall is well used and is close to effective capacity but not suitable for the change in future community requirements, the land and premises are debt free and most operating expenses met from income with funds held on term deposit demonstrate the profitable operation over many years by an effective committee of volunteers.
3. A future community facility should have sufficient flexible divisible space to allow indoor sports as well as being useable for larger gatherings for social and other community events. Whilst a central siting is convenient there are few undeveloped sites available and most would have issues with vehicle movements as Prebbleton proximity to the motorway and the growth and proximity of Lincoln means Prebbleton's main road is increasingly busy. The lack of public transport however is unlikely to be detrimental to a site not central as a majority of residents already use or have to use own transport as there is little public transport available.
4. A new site should also have sufficient car parking with provision for bikes.
5. As land prices are high consideration that the building should be two levels to minimise the buildings foot print as long as a cost benefit analysis confirms this against the size of site/parking and future expansion.
6. Prebbleton's current population is approx. 5,500 and expected to grow to 9-10,000 over a period which is difficult to estimate in view of the likely recession and general high costs through inflation which is not reducing at a rate RBNZ considers suitable to allow interest rates to be reduced.
7. Considering population growth in the short/medium term 1-5 years a new facility is urgent and should be the number 1 priority for SDC – I will expand on this later in my submission.
8. The GLG report dated 13/9/2023 estimates a population increase of 4653-5556 in the next decade so planning for a population of 9-10,000 is reasonable. BERL estimated a population of 4775 by 2026 which is already exceeded so I suggest this gross inaccuracy questions if their report can be relied on. The GLG report also notes the proximity to Lincoln & Halswell were existing and new facilities have been built or extended but demand exceeds the supply in terms of availability so planning for Prebbleton should either be on the plus side or allow for expansion. Whilst the retirement villages have provision for residents only the café appears available to non village residents and its likely even probable that village residents will want to participate in activities not available in the village but available in a community hall. Birth rates are falling globally and New Zealand has declined from 3.17 per female in 1970 to 1.634 in 1920/21, the implication is that Births in 1970 will produce retirement age residents in

2035 adding to an older demographic as life expectation increases currently 83 in NZ so planning should recognise Prebbleton with an aging demographic. Whilst declines in the birth rate means less younger people they still need to be catered for, I submit the outdoor sports facilities at the Domain and Kakaha Park are sufficient for Prebbleton needs for the foreseeable future. Indoor sports however require consideration as facilities are limited in current facilities and will reduce once Prebbleton Hall becomes unuseable.

9. The GLG report shows that only 4 of the 14 activities they identify as needed are catered for although a further three activities could be accommodated in the Hall with little alteration although availability may be a problem.
10. General observations/comments – SDC identified that 80%+ of Selwyn residents have a positive experience of living in Selwyn, however Springs Ward records the lowest satisfaction at 80% compared with the average of 86% and whilst this cannot be directly attributable to the lack of facilities in Prebbleton, it is possible that facilities provided in Lincoln and Rolleston are already over used so are not actually available to Prebbleton residents. SDC do identify the lower positive attitude in Springs Ward to rapid growth, road conditions and changes in the atmosphere of the township some of which are temporary although increased commuter traffic to Lincoln is likely to increase. I note that Leeston with a population of approx. 2,500 has better shopping facilities and SDC's Big Decision 7 LTP 2021-2031 is to spend $8.9 Million on a community centre and library, I have no objection that Leeston deserves that facility but the Prebbleton Hall replacement has been in the LTP since 2016 but no apparent site or building has been proposed and no effective discussion with The Prebbleton Hall committee or residents has taken place.
11. SDC in common with most other councils is under pressure to minimise rate increases which is likely to be a factor for many years to come so committing a large sum for a Prebbleton community centre is understandably one that impacts rates is difficult taking into account the Leeston and Hororata decisions totalling $11.9 million and a possibility that inflation will increase the cost substantially as happened for Kakaha Park.
12. In my opinion Prebbleton has not been given the consideration in the funding of a facility despite its population growth and now justifies a firm commitment by SDC to urgently scope a new facility. The Hall committee have discussed community involvement in terms of future requirements and if the facility should be one totally funded and implemented by SDC or if an independent facility or joint venture is the preferred option by SDC and Prebbleton residents.

	13. Should SDC insist on being the funder and implementer of building a new facility then the Hall committee probably has little input but notes the West Melton facility is not providing the facilities of the community according to unverified feedback. 14. The Hall committee welcomes an informal and open discussion on how best Prebbleton and its community can be served with a facility that meets current needs and future proofing for the foreseeable future This is my personal submission and does not claim to represent the Prebbleton Hall Committee who I understand will make their own submission. I do wish to present this submission and speak to it before the council with further comments on the current LTP and any further information or developments that have come to light.
Staff Recommendation	The submission is acknowldged. A new community centre for Prebbleton has been in considered in earlier Long-Term Plans and was previously signalled for construction in 2025/26. A needs assessment study was undertaken in 2023 which concluded that there was demand for a facility to service the community, and that it should provide a mix of social, community gathering and recreation spaces. The study further concluded that the facility needed to be located so it was easily accessed by the community. As there are uncertainties about the best site for the facility and the activities that it will cater for, further planning and community consultation is needed. To enable time for the necessary planning to happen, the project has been programmed for 2026/27 to 2027/28.

Category	Activity > Planning Further Community Facilities
Comments:	To support future project success Apollo believes that with a smart approach to procurement and delivery, through design and build engagement and effective project packaging, there would be opportunity to save costs on these projects and potentially deliver improved outcomes particularly for the local community. In addition to the projects referred to in the above "big decisions", Apollo also notes that there are a number of other planned or potential projects within the Selwyn District that we believe would be more likely to be successful if taking into consideration of the following points: *Combining projects into delivery programmes* – Selwyn District Council's proposed community facility projects present a great opportunity to leverage the benefits of combining multiple projects into a single delivery programme. There are many benefits that can be obtained from this approach which include cost savings in overheads and purchasing power, consistency in delivery, reduction in client-side management resource and optimisation in scheduling. The opportunity to create value by delivering faster, better and for less cost for the ratepayers of Selwyn District by following this approach is significant. *Developing and delivering to realistic capital budgets for projects* – recognising that Councils typically need to apply conservatism and contingency when assessing project budgets, it is important that the budget does not become over-inflated to mitigate cost risk thus resulting in that project becoming unaffordable. The worst outcome

for a community is either to lose projects to an inflated budget when costs could have been reduced, or, for the initial budget to be overrun during the construction phase. Whilst consultants are typically relied upon during the early phases of a project, Apollo's experience is that this typically leads to conservatism and over-scoping that ultimately leads to setting a project budget that is higher than necessary. It is crucial to include, during the budget and scoping phase, advice from organisations with proven experience in all aspects of project delivery from design through to construction.

Design and Build should be leveraged – Apollo is seeing more Local Government and Central Government projects move to Design and Build due to:

- Single Point of Responsibility: With Design and Build, there is a single entity responsible for both design and construction. This can streamline communication, decision-making, and simplify accountability throughout the project lifecycle.

- Faster Project Delivery: Since the design and construction phases can overlap, Design and Build projects often have shorter timelines compared to traditional methods. This can result in faster project completion and earlier occupancy and utilisation.

- Cost Certainty: Design and Build contracts often include a fixed price or a guaranteed maximum price, providing more certainty regarding project costs. This can be appealing to clients who want to avoid cost overruns.

- Innovation and Collaboration: Design and Build encourages collaboration between designers and builders from the early stages of a project. This can lead to innovative solutions and value engineering, potentially resulting in better project outcomes.

	• Reduced Administrative Burden: Since there's only one contract and one point of contact, the administrative burden on the client is reduced compared to managing separate contracts for design and construction. We recommend that Design and Build be considered as an engagement and contracting methodology for the construction of SDC's proposed projects and encourage this method to be explored as much as possible. Design and Build is sometimes considered as an appropriate methodology for 'cheap and quick' project types. The reality is that Design and Build, with the right team on board, is suitable for virtually any project type - with the true benefit being the project is delivered to a fixed price with one point of accountability for design and construction that means variations and programme extensions that so often blight Council projects are negated. *Facility utilisation predictions should be optimistic* – Apollo has seen first-hand how community assets are utilised to far greater levels than initially predicted during the planning phase. Sometimes demand estimates are based on the existing unfit for purpose facility. Innovative and best practice community facility design will cater for a far wider range and greater number of users if designed well. Apollo recommend to SDC that the projected utilisation of Community Assets, particularly those in highly engaged communities, be considered using predictions that are at the high end of probability.
Staff Recommendation	Submission is acknowledged by Council.

Submitter Number:	1510	**Submitter:**	Lindsay Serra for Prebbleton Heritage Incorporated
Organisation:	Prebbleton Heritage Incorporated		
Point Number	1510.1		

Category	Activity > Planning Further Community Facilities
Comments:	**Submission to SDC LTP 2024 - 2034 from Prebbleton Heritage Incorporated**

1. Prebbleton Heritage Incorporated is a local history group preserving the history of Prebbleton. We have an informal arrangement with the Prebbleton Public Hall Society Incorporated, the legal owner of the Hall at 617 Springs Road, to permanently occupy a room totalling 24 square metres to house our collection of archives, photographs, and other items of historical interest. Our group has occupied this room continuously since it was constructed as an add-on to the main Hall building some years ago.

2. The Prebbleton Public Hall Society have indicated their concern to us at the status of a proposed new Community facility for Prebbleton as set out in the LTP 2024-2034. The project seems to have been pushed further and further into the future and now is scheduled for further consultation. The lack of any identified suitable sites makes it difficult for residents to visualise the possible configurations and possibilities of any proposed facility. They also feel the need for a more definite timeframe is essential as their existing Hall is classified as earthquake prone and has a finite end date where their only alternatives are compliance or demolition. Their management committee, like many voluntary organisations, have no certainty in attracting and retaining suitable members to their committee. Younger residents are time-poor and have so many commitments to their children's activities they shy away from a commitment to a community organisation. Consequently, committee members tend to be retirees with a limited and uncertain horizon for participation.

3. Prebbleton Heritage Incorporated's future is so integrally tied to that of the ongoing viability of the Public Hall committee we fully support their desire for clarity and a more definite timeframe for a commitment for a new community facility for Prebbleton.

4. Prebbleton Heritage are aware that many other groups are also reliant on the voluntary efforts of the Hall Committee to maintain and manage the Hall and welcome having a facility of this nature available for their purposes. Such groups just would not function if the Hall Committee did not continue their work as there is little choice or alternatives in Prebbleton other than the existing Public Hall.

5. Prebbleton Heritage Incorporated's requirements could be met in any new community facility with the allocation within that building of secure and exclusive access to a storage space of around 24 square metres, but preferably at minimal or no cost. We do not have a revenue stream to cover any significant annual lease commitments. Our other requirements of space for displays or meetings would be readily accommodated by the periodic use of any new building's multi-purpose community facilities.

6. Notwithstanding this, Prebbleton Heritage Incorporated, as an active participant in the preservation of Prebbleton's heritage, would be disappointed if all avenues to preserve the existing hall were not made before it was to be abandoned. Although not formally listed as an historical building, the hall has considerable social significance to the town. The first part of the building was constructed in 1897 when the Prebbleton Library was forced to relocate from its room at the Prebbleton School, when that building was compulsorily acquired by the Education Department. This library was substantially enhanced in 1914 by the addition of a Hall. That Hall was the focus of many WW1 activities with functions for our soldiers, both leaving for war, and their subsequent return. The hall has played a large part in the social fabric of the community for more than one hundred years with numerous events, dances, weddings, and other social events being enjoyed by many in the township.

7. Prebbleton Heritage Incorporated is also an active participant in the Selwyn Heritage and Historical Network, a collection of place-based local history groups and museums within the Selwyn District. In December 2022 Council approved the Selwyn Strategic Heritage Plan 2023-2027 after a detailed review had been produced by Council staff. We welcome and applaud that commitment shown by SDC to identify, protect,

	enhance, and promote Selwyn's heritage. That also introduced the contestable Community History Fund of $50,000. Whilst this has been welcomed by all groups, most groups are experiencing cost pressures through the inflated cost of living increases seen over recent years and our Selwyn Network would commend the SDC to consider adjusting this amount upwards to allow for the impact of sharply rising insurance and building occupancy costs. 8. Prebbleton Heritage Incorporated also hopes the commitment of SDC to maintaining their support staff to liaise and support the activities of our various groups within the Selwyn Network will continue as we have found them to be an invaluable aid to help us enhance our respective activities.
Staff Recommendation	The submission is acknowledged. Plans for a new Prebbleton Community Centre are included in the current Long-Term Plan. Council acknowledges the importance of promoting and protecting heritage as it improves community wellbeing by connecting people and building the identity of Waikirikiri Selwyn. The Selwyn Strategic Heritage Plan 2023-2027. ensures there is a focus on improving support for heritage activities and supporting the work of local history groups and residents who are strongly motivated to collect, protect and enhance local place-based heritage. Council has two community heritage funds available: the Community History Fund, which is to support kaitiaki (guardians, conservators, and protectors) communities and community groups for various history projects (and the operating costs of community history groups); and the Heritage Protection Fund which is to encourage and assist owners with work required to maintain and enhance heritage buildings in the District as well as work required on protected trees.

Point Number	1511.1		

Category	Activity > Other Categories identified by Staff > Rates
Comments:	Rate rises. To me the Selwyn District Council needs some belt tightening and stop treating the ratepayers as a endless money box (piggy bank). There seems to be no limit to the rate rises and no concerted effort to control spending. Many people are on fixed incomes and are struggling to have massive increases in rates. Remember money does not grow on trees but comes out of our pockets and your wages!
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1511.2
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	*51* The Selwyn District Council Community Funding, History Fund , Youth Fund , Creative Communities Scheme, Natural Environment Fund , Meet you r street, Heritage Fund , Tertiary Scholarship Sport NZ Rura l Travel Fund , All should be halved , Some should be discontinued.
Staff Recommendation	The submitter's point is noted and will be forwarded to the appropriate Council team for information. The Creative Communities Scheme Fund and the Sport NZ Rural Travel Fund are funds that are given to Council by external agencies for Council to allocate to the community.

Comments:	Spend millions of dollars destroying the angle parking at the Old Lincoln Sh opping Center. This si not spending money wisely.
Staff Recommendation	Submission is acknowledged by Council.

Submitter Number:	1512	**Submitter:**	Barbara McLeod for Prebbleton Indoor Bowling Club

Organisation:	Prebbleton Indoor Bowling Club
Point Number	1512.1
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	TO: Selwyn District Council. Rolleston. FROM: Prebbleton Indoor Bowling Club. SUBMISSION FOR THE LONG TERM PLAN DRAFT. It was recognized back in 2010 that the Prebbleton Hall would be inadequate because of the growth in the area. There is absolutely no disputing of this fact. The Hall stands on a small section on the very busy Springs Road. It was built in 1897 . It caters for no more than 18 carparks behind the Hall. The parking space on Springs Road now has many yellow lines around the area of the Hall. So safe parking is also inadequate . In February 2011, the Big Earthquake struck and rendered the Hall illegal for the safety of patrons - under the EQC specifications and standards. Due to many "munted" homes elsewhere, the Village exploded in size and population. This event also rendered many of our facilities inadequate. It has been recently published that the original Long Term Plan promising a new Community Centre/Hall with other essential facilities and a safe carpark - with considerably money put aside for a 25/26 date has now been canned. In lieu of a public Community Centre for Prebbleton, it has become apparent that the reason for this canning is that SDC have planned for 2 (TWO) new Community Centre's within Rolleston. Rolleston already has a large Community

Centre including the Library and Cafe and many other rooms for hire and use.

The Prebbleton Indoor Bowling Club (PIBC) are extremely concerned about this. The Hall has a limited life. It has been deemed unsafe. It is used every day of the week. It is a busy hub for Prebbleton - albeit an unsafe one. If a new Community Centre is not built within the next few years, Prebbleton stand to lose many local Clubs and activities. The locals (ratepayers/residents/voters, will go elsewhere for their sport/gatherings/meetings/Church etc.. It was proposed to be out-lawed by 2031 - but I believe there has been a reprieve until 2035. By then, the money already funded by it's residents/rate payers/voters in 25/26 will become a pittance to the price of what the new facility will cost in 2035. This is not wise a decision at all - made by our own Council !I

It is often (publicly) said that Prebbleton is the Fendalton of Selwyn. But it also is the only small town with an inadequate, unsafe and the oldest Hall. We believe that Selwyn District Council actions on this is most unresponsible (and it looks very strange in the eyes of all Prebbletonians.) Again, I endorse that the money put aside for this project - money that has already come from the Ratepayers/Residents/and more importantly - the Voters stands. Actions must be made immediately for Reconsideration of your decision. We recommended that urgent attention is given to the decision of "just putting it off" for the benefit of other areas who are already well serviced.

The attached List is of signed members of the PIBC - a fraction of who were able to sign. There are 30 members of the Prebbleton Indoor Bowling Club - but not all could be contacted.

Sincerely,

Prebbleton Indoor Bowling Club

	Barbara Mcleod. Secretary.
Staff Recommendation	The submission is acknowledged. A new community centre for Prebbleton has been in considered in earlier Long-Term Plans and was previously signalled for construction in 2025/26. A needs assessment study was undertaken in 2023 which concluded that there was demand for a facility to service the community, and that it should provide a mix of social, community gathering and recreation spaces. The study further concluded that the facility needed to be located so it was easily accessed by the community. As there are uncertainties about the best site for the facility and the activities that it will cater for, further planning and community consultation is needed. To enable time for the necessary planning to happen, the project has been programmed for 2026/27 to 2027/28

Submitter Number:	1513	**Submitter:**	Harvey Polglase for Darfield Residents Association

Comments:	Petition attached to Submission form showing 108 / 110 people signed for a Pedestrian Crossings (no location identified) - signatures have not been verified to check for individual submissions on this topic
Staff Recommendation	Submission is acknowledged by Council. Pedestrian crossings are prioritised across the district for installation and upgrades.
Point Number	1513.4
Category	Activity > Chlorination
Comments:	Petition attached to Submission form showing 102 / 110 people signed for Filtered Water Station (no location identified) - signatures have not been verified to check for individual submissions on this topic
Staff Recommendation	The submitters preference for locations in the community where dechlorinated water can be obtained for household use is acknowledged. Staff have investigated options and can provide modified drinking fountains/bottle filling stations with cartridge filters to remove chlorine at key community hubs across major townships in

	the district. Use of off the shelf products will reduce costs and allow the number of filling points to be scaled with demand. The filling points are estimated to have capital installation cost $20,000 (including concrete apron) plus $20,000 annual operational cost. Staff recommendation is that dechlorination is best achieved at a household level where costs are met by those who wish to benefit from chlorine removal.

Submitter Number:	1514	**Submitter:**	Hilary Hutton for Springston Garden Club
Organisation:	Springston Garden Club		
Point Number	1514.1		
Category	Activity > Other Categories identified by Staff > Parks and Reserves		
Comments:	The Springston Garden Club wish to submit to the Selwyn District Council long term plan. We strongly advocate the Selwyn District Council purchase Broadfields Garden, an internationally recognized and loved property.		

	Selwyn doesn't have any gardens or parks in this calibre and the purchase would fulfil a social, environmental and cultural need. This is a wonderful opportunity for the Selwyn District Council to provide safe access for older people and young families in a secure environment. Broadfield is an established mature property with many indigenous plants and unusual exotic species all in a healthy well cared for state. The Garden could be used for public events such as weddings, ideal for groups from Garden clubs, nursing homes and as an educational tool for horticulture students. Other possibilities are outdoor plays and music recitals, all earning income. This would make a return for the council. The Springston Garden Club urges the Selwyn District Council to pursue the purchase of Broadfield while there is still time. Too late when the developers have destroyed it. Please find attached a list of signatures from members of the Springston Garden Club who are strongly in support of this submission.
Staff Recommendation	Staff acknowledge the quality and significance of Broadfield Gardens and the opportunity it presents as a formal garden to complement the existing open spaces. However, the proposal does have some costs and risks that need to be weighed up alongside other options. This includes the cost of purchase (and how that could be funded), the cost of additional infrastructure to enable public use, the on-going cost of maintenance and potential revenue opportunities. There are also some limiting factors such as proximity, accessibility and connectivity. It is noted that Council is considering development of a formal garden at the District Park as part of stage 1 development: that would focus on 3 main types or components of formal gardens: botanic plantings (including natives, exotics and floras); sister city garden opportunities; community gardens. Although the acquisition of the garden presents an opportunity for Council to provide a special area of open space that is not replicated anywhere else in the District, staff are of the view that the proposal is difficult to support at this time given the costs and other factors mentioned above. Staff recommend that Council does not purchase Broadfield Garden at this point in time but considers what other mechanisms are

	available or support it could provide to retain the garden for the district's benefit.

Organisation:	Ellesmere Returned and Services Association		
Point Number	1515.1		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		
Comments:			

Question: 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre.

	Project cost: Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**

Comments:	As an infected organisation (Our properties have common boundaries' and the Council has utilised a large area of our for a number of years) we have yet to have any dialogue with the Council) except a meeting with a staff member approximately two years ago) we invite the Council to come and meet with us.
Staff Recommendation	Staff acknowledge the submission and recommend that further consultation is carried out regarding Whata Rau and Leeston Reserve with all interested parties in the Ellesmere District.

Submitter Number:	1516	**Submitter:**	Andy Herron
Point Number	1516.1		
Category	Activity > Other Categories identified by Staff > District Planning		
Comments:			

	Maps have been attached to this submission My submission relates to rezoning the section at 2-10 Queen Street, in Coalgate - valuation number 2422039 102. I would like to have the zone changed from a large lot residential, to a low-density residential zone. I have taken this from the underlying planning rules for Coalgate township, although this may not be correct as we would like to be able to have a minimum section size of 1000 square meters as the historical cadastral survey shows, and our neighbours across the road, not 600 meters as this plan states. Please see the attached plan of our desired outcome.
Staff Recommendation	Rezoning does not occur through the Long Term Plan. The process for a rezoning is through a Plan Change. The council has recently worked through its review though there are opportunities for private plan changes. There will be processes in the future where long-term growth areas can be discussed.

Submitter Number:	1517	**Submitter:**	Lionel Hume for North Canterbury Province of Federated Farmers of New Zealand
Organisation:	North Canterbury Province of Federated Farmers of New Zealand		
Point Number	1517.1		
Category	Activity > Other Categories identified by Staff > Financial management		
Comments:	Federated Farmers		

- **That Council exercises responsible governance and revises its LTP budgets to constrain expenditure increases to no greater than the rate of inflation over the 10 years of this LTP.**

1. Federated Farmers is extremely concerned about the large increase in operating expenditure (25%) for 2024/25 compared with 2023/24 (an increase of $43.5m in absolute terms), followed by projected increases of 4.6% and 8.6% in the following 2 years. This has led to an increase in the total rate take of 23% in 2024/25 compared with 2023/24, followed by increases of 18% and 17% in the following 2 years. The projected rate increase calculated from the numbers on p 58 (23%) differs from the proposed rate increase of 15.6% stated on p 19 of the consultation document. It is not clear why this is. Presumably it is to do with a projected increase in the rate payer base and an allowance for inflation? This needs to be explained.

2. When considering such significant rate increases, we would hope that the Council has carried out an in-depth analysis of all work programmes to identify potential cost savings. As per s77 of the Local Government Act 2002, the Council must, in the course of its decision-making process, seek to identify all reasonably practicable options and assess those options in terms of advantages and disadvantages. It is hoped that this level of detailed analysis occurred when determining 'what stays and what goes' in the proposed LTP. Council must ensure that there are clear, positive outcomes for every dollar spent.

Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1517.2
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	

Question: You told us you want to see better access to public

transport, particularly for our young and elderly residents. So we want to hear from you - should we:

Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi.

Project cost:
Years 1–3: $4.2 million
Years 4–10: $11.6 million

Estimated impact on rates:
Years 1–3: $7.06
Years 4–10: $19.52

Funding:
Rates: 49%
NZTA Waka Kotahi: 51%

Our budgeted option

Comment:

Federated Farmers

1. Recommendation:
   - **That Council only proceed with the new park and ride projects if they attract NZTA co-funding and if the residue is funded by targeted rates, directed towards the beneficiaries of public transport services.**

1. Council is proposing to build new park and ride facilities in Lincoln and Rolleston and to upgrade public transport infrastructure, to accommodate increased bus services as part of the Greater Christchurch Partnership. Council's stated preference is to proceed with co-funding from NZTA. The option of funding the project without NZTA co-funding is also being considered. A third option is to not invest in the project at all.

2. The project is not likely to directly benefit our members, or rural people generally. Therefore, we would only support the project if it receives co-funding from NZTA, and if the residue is funded by targeted rates directed at beneficiaries of the expenditure.

Staff Recommendation

It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. The 2020 Greater Christchurch PT Futures Business Case identified that further investment in increased PT services and infrastructure will have positive benefits. This will reduce the use of single occupant private vehicles that in that in turn will reduce emissions and congestion and provide people with another affordable transport option. Council could consider a targeted rate, but the facilities proposed have a wider District benefit as residents beyond those townships can drive to the Park N Rides to then access PT services such as direct to City

Federated Farmers

1. Recommendations:
   - **When considering the development and funding of community facilities, we remind Council of its obligation to ensure prudent stewardship and the efficient and effective use of its resources (s14(g), Local Government Act 2002). Implementing excessive rate increases, in the midst of cost of farming and cost of living crises, is not appropriate.**
   - **Community facilities should be funded by targeted rates, so that the costs are directed towards the beneficiaries.**

Whata Rau (Leeston)

1. This proposed project involves building a new library, service centre, community centre and meeting rooms. This probably makes sense rather than investing in a temporary fix of the existing library/service centre. However, in the current economic climate, and with such a large projected rate rise, it would be wise to avoid the most costly option, involving additional sports courts and/or community meeting places. There seems to be little difference between options 2 and 4. However, we ask whether the more bespoke nature of option 2 is worth an additional

   $800,000?

2. Whatever course of action is chosen, Federated Farmers asks that the project is funded by targeted rates directed toward the beneficiaries, rather than from the general rate based on property values. Community facilities of any sort, located in towns, tend to benefit urban more than rural rate payers.

Staff Recommendation	The submission is acknowledged.
Point Number	1517.4
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	

Question: We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1.

	Do nothing. Use the existing park facilities and remove or replace old and unsafe items in the park. **Project cost:** Year 1: $143,000 **Estimated impact on rates:** Included in our current rates **Funding:** Rates: 100% **Comment:** 1. The stated options are: do nothing; do landscape improvements to extend the playing fields and other upgrades, as previously planned; or do greater upgrades as per the 15 year Leeston Park Master Plan. 2. Federated Farmers recommends the do nothing or the more modest upgrade option. The greater upgrades are inappropriate in the current economic climate. Again, we ask that the project is funded by targeted rates directed toward the beneficiaries, rather than from the general rate based on property values. Community facilities of any sort, located in towns, tend to benefit urban more than rural rate payers.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1. It is noted that Council funds the larger recreation parks on a district-wide targeted rate basis that recognises the benefit these spaces provide to the broader community. In this case some funding from development contributions received within the locality will be used to help fund the work.
Point Number	1517.5
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Comment:** 1. It is proposed to build a community recreation and sports facility at Darfield. As with the other proposed projects

(above), Federated Farmers asks that council carefully considers the affordability of the project, given that the Selwyn community is facing a series of substantial rate increases.

2. Justification for the proposed project is that the population of the wider Darfield area is increasing rapidly and that there are currently no indoor courts in the Malvern area for popular

sports such as basketball. Federated Farmers accepts the need for such facilities, but questions the timing given the financial stress that communities are currently facing.

1. If Council decides to proceed with the project, Federated Farmers again asks that the project is funded by targeted rates directed toward the beneficiaries, rather than from the general rate based on property values. Community facilities of any sort, located in towns, tend to benefit urban more than rural rate payers.

2. Also, this is the sort of expenditure which will benefit individuals rather than properties. Therefore, a UAC would be an appropriate mechanism to generate funding.

1. Recommendations:
   - **When considering the development and funding of community facilities, we remind Council of its obligation to ensure prudent stewardship and the efficient and effective use of its resources (s14(g), Local Government Act 2002). Implementing excessive rate increases, in the midst of cost of farming and cost of living crises, is not appropriate.**
   - **Community facilities should be funded by targeted rates, so that the costs are directed towards the beneficiaries.**

Staff Recommendation	Submission is acknowledged by Council.

Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1. It is noted that Council funds the larger recreation parks on a district-wide targeted rate basis that recognises the benefit these spaces provide to the broader community. In this case some funding from development contributions received within the locality will be used to help fund the work.
Point Number	1517.7
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	1. Council proposes to close the Sheffield Memorial Pool, stating that there is easy access by Sheffield residents to the Darfield pool, and that there will be a considerable saving in expenditure compared with repairing the pool. Federated Farmers has sympathy with Council's desire to reduce expenditure but asks whether adverse impacts on the local community have been thought through. We are aware

	that Sheffield Primary School uses the pool for its water safety and learning to swim programmes. These programmes are very important for primary aged students. Accessing the Darfield pool would be much more difficult logistically (presumably busing would be required) and would add significant cost. Has the School been consulted with? 2. Therefore, Federated Farmers asks that council carefully considers the need for the Sheffield pool by the local community, in relation to the other very costly projects being considered.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1517.8
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Federated Farmers 1. Recommendation: • **Promotional activities with the aim of stimulating economic development should be funded by targeted rates, directed towards the beneficiaries (such as the urban business sector).** 1. Council emphasises the importance of economic development in the Waikirikiri/Selwyn District and states that it wishes to support the business community to help grow the Selwyn economy. The relationship between business activity, employment and the gross domestic product of the district has been emphasised.

	1. Federated Farmers has the view that Council should focus on its core business, such as delivering high quality public infrastructure. Promotional activities should be done by, or at least funded by, the business sector. Such activities should be funded by targeted rates directed towards the beneficiaries of those activities.
Staff Recommendation	submission has been noted and feedback will be considered by relevant team.
Point Number	1517.9
Category	Activity > Providing safe drinking water
Comments:	**Providing safe drinking water** 1. Federated Farmers agrees that the provision of safe, secure drinking water supplies is a core business of Council.
Staff Recommendation	The submitters comments are acknowledged, staff recommendation is to continue with the 5 waters budgets as proposed in the LTP.
Point Number	1517.10
Category	Activity > Chlorination
Comments:	**Chlorination** 1. It is stated that Council is investigating the feasibility of removing chlorination from certain water supplies where this is feasible (where an exemption could be obtained from Taumata Arowai). Council correctly states that there would be considerable additional cost, along with an increased risk profile, associated with the delivery of unchlorinated water.

	2. Therefore, Federated Farmers supports the proposal of Council to continue chlorinating water supplies and not applying for further exemptions.
Staff Recommendation	The submitters preference to continue to chlorinate community drinking water supplies and seek no further exemptions from Taumata Arowai is acknowledged. Staff recommendation is to continue to chlorinate community supplies to reduce risk to community health.
Point Number	1517.11
Category	Activity > Low Nitrate Water Sources
Comments:	1. Recommendation: • **Federated Famers considers that the provision of safe community water supplies is a core function of Council and supports its approaches the issues of chlorination and elevated nitrate concentrations.** 1. Federated Farmers notes that all drinking water sources have nitrate concentrations well below the New Zealand drinking water standard (and UN World Health Organisation guidelines). However, it is pointed out the several sources have reached50% of the drinking water standard. 2. Therefore, Council is wise to consider future options for keeping water supplies within the drinking water standard. Centralisation, to take more water from the sources with lowest nitrate concentrations appears to be a sound option.
Staff Recommendation	The submitters support for low nitrate water sources is acknowledged. Staff recommendation is to undertake further investigations into centralised sources of low nitrate water as budgeted in the LTP.
Point Number	1517.12

Category	Activity > New Public Transport Services
Comments:	1. Recommendations: • **Providing public transport services is not part of Council's core business. Council should be very cautious about entering this arena.** • **Federated Farmers strongly supports council in its role of maintaining and developing an effective transport infrastructure network.**
	1. Council states that there is public demand for more frequent public transport services (in addition to the services delivered by Environment Canterbury). Federated Farmers has the view that there would need to be very good reason for Council to step outside of its core business and provide transport services (as opposed to providing transport infrastructure).
	2. Federated Farmers supports Council's focus on maintenance and renewal of the roading and bridge network. In this context, Council is wise to budget for emergency work that may be required as a result of extreme natural events.
	3. Federated Farmers supports Council in advocating strongly to central government/NZTA to maintain or increase the Financial Assistance Rate (FIA - currently 51%) for eligible roading and bridging projects.
	4. Federated Farmers supports the NZTA Waka Kotahi Rolleston transport improvements, along with the investment in local roads needed to coordinate with that work, which would presumably attract the FIA contribution from NZTA.
	5. Council cites popular support for walking and cycling improvements, including cycle trails. We appreciate that Council is exploring funding options, other than rates for these developments. Funding from the business sector would

	be appropriate for developments which would potentially attract tourists, such as the cycle trails being contemplated.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1517.13
Category	Activity > Infrastructure DC
Comments:	1. Recommendation: • **Federated Farmers supports the use of development contributions to fund infrastructure upgrades needed as a result of new residential or commercial developments.** Federated Farmers supports the use of development contributions to fund infrastructure upgrades needed as a result of new residential or commercial developments. We also support the addition of a new development contribution to provide new community facilities needed to serve new developments. Funding from this source would presumably be used to fund some of the community developments proposed in this LTP.
Staff Recommendation	The submission is acknowledged, and staff note the support for the introduction of the proposed development contribution for community infrastructure. The new development contribution charge will be used to help fund specific projects in the draft LTP.
Point Number	1517.14
Category	Activity > Council's Office Improvements
Comments:	1. Recommendation: • **Given the rate increases proposed in this LTP, it would be wise to delay or abandon improvement to the Rolleston Council Office.**

	Federated Farmers suggests that, given the rate increases proposed in this LTP, it would be wise to reassess the need for improvements to the relatively new Rolleston Council Office, and abandon or delay them.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	1517.15
Category	Activity > Other Categories identified by Staff > Rates
Comments:	**Rate levels and limit** 1. Council is proposing setting rate increase limits of 16% for the first 4 years and 10% for the remaining 6 years of each LTP. Because a new LTP is notified each 3 years, this effectively means that the limit would be 16% each year. This is far too high. Rate increases should not exceed the rate of inflation. 2. In this context, we remind Council of its obligation to ensure prudent stewardship and the efficient and effective use of its resources (s14(g), Local Government Act 2002). Implementing excessive rate increases, in the midst of cost of farming and cost of living crises, is not appropriate. The economic well-being of rural communities must be considered alongside spending by Council on discretionary projects.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1517.16

Category	Activity > Other Categories identified by Staff > Borrowing Levels
Comments:	1. Recommendations • **In the context of Council's obligation (under the Local Government Act 2002) to ensure prudent stewardship and the efficient and effective use of its resources, the proposed rate increase limit is far too high. Rate increases should not exceed the rate of inflation.** • **Federated Farmers supports the use of borrowing, within appropriate limits, to spread the cost of capital items over more than one generation of rate payers.** 1. Federated Farmers supports the use of borrowing to spread the cost of capital items over more that one generation of rate payers. However, as acknowledged by Council, borrowing must be kept within the set limits so that it does not unduly burden future rate payers.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1517.17
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	1. Federated Farmers supports the Council's Infrastructure Strategy as outlined on p 60. We ask that Council focuses on its core business, operates efficiently and is always mindful the community's ability to pay in the context of its economic circumstances as any particular time.
Staff Recommendation	That the submission is acknowledged by Council.

Submitter Number:	1518	**Submitter:**	JM Keoghan

Point Number	1518.1
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	There is less than 0.5 per cent of the original native vegetation on the Canterbury Plains. The discrete protected areas of native species that exist are vulnerable with edge-effect invasion by exotic species and irrigation drift etc. Purchase of Broadlands Garden with its international recognition, provides the best possible opportunity to address the dearth of native plant ecosystems in our Selwyn District, using the outstanding stand of native species at Broadlands Garden as the nucleus for expansion to represent the original native plant ecosystems of our district, and with subsequent introduction of native fauna such as lizards and invertebrates. Planned eco-sourced planting would be carried out with participation of our communities: garden clubs, groups, schools and individual volunteers and with long-term protection through a QEII covenant and with further development by future generations. A native-plant corridor will help bring native birds onto the Canterbury Plains. It will be a resource for research, learning and recreation for now and the future. This is an unique

	opportunity in the face of expanding urbanisation and land use intensification.
Staff Recommendation	Staff acknowledge the quality and significance of Broadfield Gardens and the opportunity it presents as a formal garden to complement the existing open spaces. However, the proposal does have some costs and risks that need to be weighed up alongside other options. This includes the cost of purchase (and how that could be funded), the cost of additional infrastructure to enable public use, the on-going cost of maintenance and potential revenue opportunities. There are also some limiting factors such as proximity, accessibility and connectivity. It is noted that Council is considering development of a formal garden at the District Park as part of stage 1 development: that would focus on 3 main types or components of formal gardens: botanic plantings (including natives, exotics and floras); sister city garden opportunities; community gardens. Although the acquisition of the garden presents an opportunity for Council to provide a special area of open space that is not replicated anywhere else in the District, staff are of the view that the proposal is difficult to support at this time given the costs and other factors mentioned above. Staff recommend that Council does not purchase Broadfield Garden at this point in time but considers what other mechanisms are available or support it could provide to retain the garden for the district's benefit.

Category	Activity > Planning Further Community Facilities		
Comments:	The XX replace commercially sensitive information.		

I have recently been taking myself to Selwyn aquatic Centre for a personal training program that I have been attending for over 2 months. Since I have been there, I have noticed a huge need for refreshments, a meeting place, and a cafe type environment for a multitude of reasons. I personally think this would be a great investment into the community with the park across the road and high school next door not to mention the swimming pool and all the public that use such a great array of facilities.

The three options as mentioned in your emails to me are as follows.

Option 1. Option 1, would be that I Build it, I also refit it with kitchen, furniture, and outdoor area. I would be the one that is financing this so that the lease would be accordingly plus a XX% in take in the turnover or something along those lines

Option 2. Option 2, would be the Selwyn Council build the cafe facility and i do the refit with kitchen, furniture, and outdoor area.

Once again with the Selwyn Council fronting up for the build and Craig fronting up for the refit the lease would have to be adjusted accordingly and the XX% take of the turnover would apply.

Option 3. Option 3, would be that Selwyn council build the cafe facility and do the refit with kitchen, furniture, and outdoor area.

Because the Selwyn Council is spending the initial investment the lease price and the share of the turnover would be adjusted. I would like to think that we could work in together to get the split of the rent, lease and profit share correct to benefit both Selwyn council and Craig Bradford.

Option 4. I would also like the kitchen across the road to also be a part of the cafe. I would also like to see a outdoor area built between the collage and the pool so that parents and grandparents can sit in the sun with a coffee while watching their children Etc Etc.

After lengthy discussion with xx team at xx xx, developers and construction company, I have come to the conclusion that I think Option 3 would be the most attractive scenario for me to proceed, this does not mean the other options are off the table it just means this is my preferred option.

So where does that leave Rolleston Council and myself.

I would like to work alongside the architects, construction team (I have a reputable construction company I would like to use). The Selwyn Council will know how they want the building to fit in with the swimming pool so it looks like it’s been there forever. I'm looking

	forward to be working with the Selwyn Council and xx xx on the project so it is designed in a manner where I think will be most effective for all. As for a lease agreement, this is something I am very open to discuss early on in the project. It's got to benefit Selwyn Council, Craig Bradford and the Community of Selwyn. We can see that some xx xx would be of some help to us, being about 3 months. After our first year of trade, we would then look at a xx xx xx xx. The percentage would be something we would negotiate whilst negotiating the lease in other words everything's on the table and these discussions will need to be had.
Staff Recommendation	Staff support the submission due to the commercial and community outcomes possible. The relevant staff will further investigate potential ways forward and provide a report to council in due course.

Staff Recommendation	Submission is acknowledged by Council.		

Point Number	1520.2
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	I am writing to express my wholehearted support for the retention of a pool facility in Sheffield and to highlight the invaluable benefits that rural facilities like this bring to our community. Sheffield Pool serves as a vital hub for our community, providing a space for families, friends, and individuals to engage in recreational activities, fostering a sense of camaraderie and unity. Its presence will contribute significantly to the overall wellbeing of our residents, both physically and socially. In rural areas, access to recreational facilities is often limited, making Sheffield Pool an essential asset. It not only promotes a healthy exercise lifestyle by offering a place for exercise and relaxation but also acts as a catalyst for community integration. In rural settings, these facilities play a crucial part in reducing isolation and ensure that residents have a place to connect and build relationships. Furthermore, Sheffield Pool serves as an educational resource, offering swimming lessons and water safety programmes that are particularly beneficial for families in rural areas where natural bodies of water are a particular hazard. With the retention of a swimming facility in our community, the Sheffield School Board of Trustees demonstrates a commitment to the well-rounded development and safety of our community members, especially our children. I urge you to support the Sheffield Board of Trustees in retaining a pool facility in the area, recognising its role in enhancing the quality of life for residents and contributing to the unique fabric of our rural community. Your support for this facility will undoubtedly have far-reaching positive effects for generations to come.

	Thank you for your time, consideration, and dedication to the betterment of our community.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool		
Comments:	Dear Council Members		

I am writing as a concerned member of the Sheffield Waddington Community to express my concern on the future of the Sheffield Memorial Pool, a critical community and war memorial asset.

Essential Community Asset

The Sheffield Memorial Pool serves as a central hub for health, recreation, and community engagement. It is crucial for teaching swimming, ensuring safety, and fostering community bonds.

Responsibility and Maintenance

Since the Council assumed ownership from the community, there has been a significant responsibility to maintain

this facility adequately. Unfortunately, necessary maintenance has been deferred, leading to severe structural issues.

Addressing these issues incrementally over the past 10-15 years would have prevented the current costly predicament.

Preservation of War Memorial

The pool is also a war memorial, honouring those who served. If there is consideration of decommissioning the pool, a dedicated memorial garden incorporating the existing memorial wall should be developed. This would serve as a place of reflection and remembrance, maintaining the legacy of our veterans.

Proposals for Alternative Solutions

	Given the structural and financial challenges, we urge the Council to explore alternative solutions that include working on a collaborate approach with the wider community. It's crucial that we find sustainable ways to keep a recreational facility within our community. **Conclusion** As stewards of our community 's assets and heritage, it is imperative that the Council takes decisive action to preserve the Sheffield Memorial Pool and its war memorial site. As a community, we are ready to assist in finding viable solutions to ensure these assets continue to benefit our community. Thank you for considering this urgent matter.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool, and highlighted the Memorial aspects of this facility as a key Council consideration for the future of this site.

Comments:	The Sheffield Memorial Pool has been saving lives for over 70 years offering Sheffield School Students and the wider public a safe environment to learn to swim.		

The pool also being the only open-to-air pool between Christchurch and the West Coast also helps our environment.

With Darfield Swimming Pool running at full capacity this last season, retraining another public swimming such as the Sheffield pool will provide relief on the Darfield Pool facilities and give public options.

Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability		
Comments:	The world is changing rapidly and with big concerns like Climate Change and finances we need councils to be aware of a better future than ever before.		

Things that need to be looked into are:

- Sustainable diets – allowing fast track process to build factories for lab grown meat and lab milk, because vegan diet is the only way to eat so we can reach Net Zero 2030. For protein huhu grubs have been trialled in Otago, a study with great results. That way we can get rid of all farming and convert all farmland into native trees for our blue/green spaces, no fertilisers, pesticides or mowing over bees and butterflies.
- Transport – the aim is to reach our smart city goals for 2030, in which most people do not own cars, they won't need them, those who must have them for work will require sustainable models like full electric, hydrogen or newer technologies and permits to restrict use in the future.
- Electricity is the future. We need to invest in all renewables as we wont be utilising any petrol or diesel. Cartage and roading won't be required since food will be vertically grown in plant based local labs. We can even live on pills like astronauts with everything we need, zero food requirements.
- Smartcitys – these future proof us for Carbon Net Zero. You never need to leave home, except on foot as everything is place based with 15-20min walk zones. The idea is that most people work from home, exercise, entertainment, education all at home. Oxford in England is currently implementing this with 6 zones and each resident gets to apply for permission to leave their zone up to 100x each household per year in their car, which rely on licence plate recognition. To ensure this, the models that have been trialled in 4 provinces in China and have been really effective using facial and Iris pattern recognition. Its now so sophisticated people no longer need to carry their Mastercard's, they can pay for things at shop counters just with facial recognition technology. It is also highly effective for catching criminals and people with outstanding bills.

  Geofencing and electronic gates are part of the smart network and will help divide the zone restrictions. Climate change lockdowns can then easily occur allowing for whole cities to remain inside to contain and limit CO2. Carbon sinks are already happening in NZ and used the world over, where we suck CO2 out of the air and contain it below the ground.

- CBDC – Central Bank Digital Currency are the future, a cashless society. All money will be run by a centralised Bank, digitally and as we advance like China this will prevent plastic manufacturing of bank cards and printed cash or coins saving

	once again the CO2.We will be moving to the Social credit score system and this will allow authorities to punish people who don't follow the strict climate rules. China already does this and even putting a bottle for recycling into a wrong bin gets picked up and penalised as every single streetlight has new mesh network – smart capabilities that track every move, so if we have nothing to hide, life is great.
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. The Council is also developing an Emissions Plan and Sustainability Plan to identify actions into the future. Council is developing a Future Selwyn Strategy, alongside an Economic Development Strategy, that looks beyond the 10-year horizon to consider how we can respond to these challenges, including improving transport options, electricity and sustainable food production insofar as Council can influence. While Council supports people being able to meet their needs within a 15-minute walk, the council does not support the restriction of freedom of movement. The Council does not have any influence on the banking.

Category	Activity > Other Categories identified by Staff > Other Matters
Comments:	**Submission** SPCA thanks the Selwyn District Council Council for the opportunity to contribute to the Long- term Plan 2024-2034 consultation. Through this submission, we invite the Selwyn District Council Council to help us achieve more responsible cat ownership by supporting our subsidised desexing and microchipping programme, Snip 'n' Chip. **New Zealand needs more responsible cat owners** Cats are one of New Zealand's most popular companion animals. SPCA supports responsible ownership of companion cats to promote cat welfare and reduce problems with cat overpopulation. SPCA is concerned with a recent decrease in the number of companion cats that are desexed, only half of cats are microchipped, and very few are kept at home (Companion Animals New Zealand, 2020). Each year, on average 20,000 cats and kittens come into our Centres. Many of these animals are directly or indirectly (through stray cat populations) a result of an owner failing to desex their companion cat. Our SPCA Centres regularly see the welfare problems related to irresponsible companion cat ownership, including: • the predictable cycle of unplanned litters of kittens born each year because there are too many undesexed companion cats allowed to breed; and

- the number of cats and kittens who are lost or have strayed, and we cannot find their owner because they are not microchipped, or their microchip details are not registered on a national database.

We also know that irresponsible cat ownership can lead to nuisance in communities (e.g., spraying, toileting, fighting), predation on wildlife, and the spread of toxoplasmosis to people and animals including farmed animals and vulnerable native marine mammals (e.g., Hector's and Māui dolphins).

Desexing and microchipping companion cats are some of the few tools we have to address problems with stray cats in our communities. Desexing a companion cat helps prevent unplanned litters of kittens which can end up as stray cats. Having a microchip registered on the New Zealand Companion Animal Register can help us identify an owner to reunite with a lost companion cat that may be living as a stray.

The cost of the procedure is the most common barrier for companion cat owners to desex and microchip their cats (Companion Animals New Zealand, 2020).

Support more responsible cat ownership

Our work in New Zealand communities to increase the number of cats and kittens that are desexed and microchipped is fundamental to our mandate to prevent cruelty and advance animal welfare. We provide

more details on the welfare benefits of desexing and microchipping cats in the Background section of this submission.

Our Snip ‘n’ Chip programme offers subsidised desexing and microchipping for people who need help with overcoming the cost of the procedures. SPCA works closely with local veterinarians to

provide this service. The vouchers ‘sell out’ quickly once they are available, indicating this is a

much sought-after service in communities.

SPCA has worked closely with Whangārei District Council, Auckland Council, Waitaki District Council, Dunedin City Council, and four Auckland Local Boards to address the barriers to desexing and microchipping cats.

We invite the Selwyn District Council Council to join us in our efforts to prevent problems before people end up dealing with difficult decisions about unwanted cats and cat behaviour in their communities.

We have included our Snip ’n’ Chip Council Package with more detailed information about how we work with local councils to promote more responsible cat ownership.

Staff Recommendation	Selwyn District Council engage in discussions with the SPCA to discuss how we can support them in their Snip ‘n’ Chip campaign.

Comments:	This is a spurious article. https://www.odt.co.nz/star-news/star-districts/star-selwyn/rates-hike-selwyn-residents-hands You need to LISTEN to your constituents .This article puts the blame on residents. You made the plans .You make the decisions. The swimming pool in Selwyn is yet another example of a council not listening and continuing on holus bolus despite residents concerns. This current plan smacks of the same. I am concerned at the apparent inconsideration of the Selwyn District Council and its possible proposed 16(now downgraded a LITTLE it seems) percent unnecessary rates rises-supposedly touted at potentially the highest in the country!. Do you realise that for a pensioner I calculate this rise as a considerable portion of their food bill.zYou are automatically disadvantaging single income people. I would like the council to answer the following. please asap. How does the Council think solo parents(and even working ones among these) will afford these rate hikes and keep feeding their children WELL AND PROPERLY>? Or families? Or pensioners?		

Or even the average family?

Or a single person?

Especially in these days of food price hikes and similar as well as a country in recession. This is the time for Council to tighten its belt .restrict itself to core projects and not become the over lavish squanderer/spender. Has the Council considered tightening its belt as all over the country have had to do? It would seem apparently not. Have they considered taking smaller wages? Why employ more on lavish wages???

Some of the projects above core expenditure are the following.

A number of scholarships.

Revamped Lincoln and leeston town centres. Over fancy architecture.

Proposed sewerage line from Lincoln to Leeston to Rolleston-why not curb unsustainable/unchecked subdivision-i *nfra structure for subdivision should be self funded by the developer not causing increased funding for the ratepayer.*

Advertising(eg road safety which should be attended to by Govt. regardless of it being a worthy project)

Paying for buildings to be blessed instead of using money for the local community (building ,etc) as nominated by Three Waters Designation.

Walkways. and cycle ways(West Melton walk way having been one example)

Excessive. unnecessarily fancy architecture(library)

I think the following figures are delusional and misrepresentative. Facts and figures that do not meet reality are in short misrepresentative and USELESS.

https://rep.infometrics.co.nz/selwyn-district/living-standards/household-income

I think it is time the council stopped ego tripping trying to look like the most advanced council with fancy but unnecessary projects and get in touch with its constituents especially those who would not be on large salaries or the fairy tale figures mentioned above and will not speak up) Unlike council members many people in Selwyn are on low and single incomes and I have spoken to some of these. Even

those on higher incomes resent the price hikes(should they reach to 20 percent then the highest in the country).

Fancy walkways. cycle ways .architecture, bus services, park and ride(why live out here if you do not own a car?,)libraries. and sports grounds or similar do NOT feed hungry mouths. What is the council's priority.? Its constituents or seemingly grandiose agenda to pander to the more wealthy or its own sense of the grandiose and egotistical achievement?

So at the end of these proposed hikes will Selwyn be the area of the stressed, the impoverished or the area needing more mental health services and such like? It is the old story -does having everything with lots of money make one happy? Clearly the council espouses this opinion.

https://www.nzherald.co.nz/sponsored-stories/kids-missing-school-to-feed-families/72C7T5WRHBH63LCCIAXADZEAKE/#no_universal_links

While I am on the subject, perhaps the council could do something about the health hazard of the local swimming pool. There is inadequate ventilation at the pool which means excessive condensation(especially in winter) and thus the chlorine cannot escape. I have not returned there after several times coming home nauseated and with headaches. What lack of foresight for such an expensive commodity we all have to pay for. Once again it was a plan that excluded many people's opinion in a council's rush to put its plan ahead of people's views.

The lack of financial foresight, planning and over expenditure in Selwyn district is out of control. No survey has even been done on the rates rise. At least this should be carried out instead of again blindly and delusively blundering on without much constituent input. It is guaranteed not all constituents can turn up to a meeting to give their opinion. Councillors that do not represent the people for one are guaranteed not to be elected as they simply become out of touch and non representative.

What percentage of constituents have been surveyed regarding their opinions on rate rises?

And why haven't they? What right do a few elected councillors have to blunder on without recourse to their constituents' opinions as a whole? And would they override these opinions for their own opinions? What funding figures are being released TO THE COMMUNITY for these unnecessary plans?

	In times of scarcity one retracts their spending not increases it. The lack of logic in these proposals shows a council that is out of touch and full of fanciful but unrealistic dreaming. As the old adage goes, dream are free, But these dreams need to be put under the scrutiny of reality. The role of council is to serve the community-NOT STRESS IT. Nor gather accolades and garlands for achievements beyond the budgets of the people. Seemingly then this council needs financial advisors in touch with the reality of life .Councils and Governments are full of plans blown out that could not be finished(look at Selwyn High School for example) Clearly the growth here in Selwyn is unsustainable and like the Council itself need to be brought under reasonable control and restraint so that it cuts its cloth to suit the budget /cloth not inflates its costs to create a" gold and embroidered cloth "budget that is entirely unrepresentative and excessive. I see no representation of the community as a whole in the rates rise as the community have not been consulted as a whole. Just told. This dictatorial and out of touch manner is not acceptable and needs to be immediately rectified. And plans curbed.. Before yet again blindly progressing, put out a survey to ALL constituents. Urgently and asap. Such may restore confidence that this Council is interested in its constituents opinions and not its own plans which certainly are not acceptable in times of need and recession. When others have to tighten their belts let the council show they can set the example. Not be the exception. with "gold plated vanity projects.". Please read this out at the meetings proposed for objections to be heard for this plan on Wednesdays and please notify me it was heard in its ENTIRETY>.Having read it out myself I realise it does fit in the allocated time allowed. It also is a written submission allowed for by booths etc placed around Selwyn District. Thank you Yours .Mr DL PROUTING
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and the negative impact that the increased cost of living is having on the public. The Council endeavours to keep rates increases to a minimum and continues to proactively look for opportunities to minimise costs. The Selwyn Aquatic Centre is designed with the appropriate air refresh rate in mind and this is monitored 24/7 by a building

	management system. We are confident this meets or betters industry standards.
