Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is*

	earthquake prone and will likely need further significant upgrades to be used from 2035 onwards. **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** The current facilities have many advantages which in a sense are symbiotic. The school is in close proximity to the library which means the library is a safe place for students to go. Because it is handy it will be used more. Accessibility is an important consideration - use of the library by the younger generation may lead to a library user life. There are also benefits for those attending the medical centre next door. Partners of patients or family members can visit the library while their partners or family members are otherwise engaged. I find it hard to believe that engineers can't find a suitable cost effective approach to strengthening the building. As a Southbridge ratepayer I am concerned that the ideology of a 'hub' drives decisions to create monuments that future generations pay for and don't use. There are a number of halls in Selwyn in close proximity (bearing in mind that living in Selwyn, one is used to travelling) which are underutilized (and you need to ask why that is the case) - we don't need more halls - we need to use the ones we already have. As a Southbridge resident I'd be loathe to pay for a hall in Leeston it doesn't need when there are number in close proximity. I'd much prefer SDC to look at its infrastructure and consider what role it has to play if the Alpine fault triggers. Has the Council prepared, protected important infrastructure. In the scheme of things, I can't see that a community in Leeston is warranted (certainly at present - in the current economic climate). Delay the decision and repair the current facilities.
Staff Recommendation	The submission is acknowledged. Maintenance, repairs and strengthening options, and the location of other facilities, have been taken into account in relation to this matter.

Point Number	782.8
Category	Activity > Chlorination
Comments:	I am really annoyed at your inability to limit chlorination. Chlorination has affected a number of people and I believe you have done some harm for which those affected are not compensated. You have listed Southbridge as 10th in the order of those likely to succeed in an exception claim. I find that staggering. I still recall the testimony of a person at a council meeting who advised that Southbridge water was

	used as a benchmark for water testing across Australasia - it was that good. (I believe that person knew what he was talking about). If it is not that good now - what have you done. It would be great to see a publication of the evidence and have an independent review. You have definitely chosen the easy option (no credit to you at all).
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. Chlorination is a requirement of the Drinking Water Quality Assurance Rules that came into effect in November 2022. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.

Staff Recommendation	Submission is acknowledged by Council.

Point Number	783.7
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	West Melton needs new netball courts and clubrooms.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves

Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	I feel Selwyn huts has been dealt with in a inhumane way . This needs to be rectified. These people gave been let down by mismanagement and it needs to be addressed. I would like to suggest , no wastewater system for them but for them to be paid out so they can carry on with life like every other person who has that right ! Its about the people after all .
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.
Point Number	784.7
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	1. Historical value The Mayor says in the Long Term Plan that "we're focussed on looking after what we already have" - how about you look after us! An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the

Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council unanimously determined that 'Hut licences and subsequent renewals are short term and ultimately for a finite period' . At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts.
We need to submit requesting this historical significance be recognised and for the Selwyn Huts to be listed as an historical site on the District Plan and for the term for us being here to be extended to protect this history.
2. District wide rates
to be put on DWR for Water and Sewer.
The reasons being :
(a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequant upgrade, the requirement we were told for being put on DWR.
(b) We have already paid for the water upgrade.
(c) We should not be discriminated against and should be treated like everyone else in the district.
(d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We should also be added to the DWR for Sewer and Water like everyone else.
(e) Towards25 LTP Document stated:
"The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities."
This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table.
From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston.

	(f) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community." (g) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Sekwyn Huts Future Occupancy Strategy" report dated 04/03/2024. (h) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners. (i) Additionally we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else. **Regards,** **Selwyn Hut Owner**
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. Comments:	I think existing infrastructure should get a refresh like the park between Dryden Ave & McCauley St. Even if just the ugly metal stick figures are removed and the children's play area upgraded. It doesn't have to cost a lot of money. The tree near the park corner Dryden & Overbury Crescent was also taken out by a speeding car.
Staff Recommendation	Staff support the submission in terms of upgrading the reserve at Dryden Ave. Budgets have been provided in the draft LTP to

	undertake a number of improvement works including re-grassing, cricket wicket, planting and renewal of some play equipment that will be at end of life during the 10-year period. Staff recommend that the budgets to undertake improvement and renewal works at the reserve in Dryden Ave. which form part of broader development and renewal programmes are retained to enable the works to proceed.
Point Number	787.7
Category	Activity > Other Categories identified by Staff > Speed Management
Comments:	I think existing infrastructure should get a refresh like the park between Dryden Ave & McCauley St. And speeding cameras should be set up for speeding cars & boy racers. Speed bumps for traffic calming should be introduced at strategic locations. If more police are needed to monitor speeding & night time racers it will keep the roads safe.
Staff Recommendation	The submission relates to aspects that are not the Council's responsibility. Speed cameras are managed by NZTA, Council is unable to install cameras, but have requested that the mobile camera be utilised in this location.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan, but with additional sports courts and/or bigger community meeting spaces.

	Project cost: Year 1: 19.24m **Estimated impact on rates (per year):** $53.14 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** having a local space for everyone in selwyn would be amazing and really help sports be here rather than having to go anywhere else for this.
Staff Recommendation	The submission is acknowledged.

Point Number	791.3
Category	Activity > Planning Further Community Facilities
Comments:	The Prebbleton Hall is scheduled for demolition and there has been no mention of it being rebuilt/replaced. The current hall, along with the war memorial, have a part to play in our community. The hall is well used by a number of groups each week and is also hired out for family gathering, events, and meetings. It appears that there is no plan for a community hall after the current building is demolished. Prebbleton is a growing village and has already grown at an expediential rate and the supporting infrastructure and facilities are not keeping up with an ever-increasing population.

Staff Recommendation	The submission is acknowledged. A new community centre for Prebbleton has been in considered in earlier Long-Term Plans and was previously signaled for construction in 2025/26. A needs assessment study was undertaken in 2023 which concluded that there was demand for a facility to service the community, and that it should provide a mix of social, community gathering and recreation spaces. The study further concluded that the facility needed to be located so it was easily accessed by the community. As there are uncertainties about the best site for the facility and the activities that it will cater for, further planning and community consultation is needed. To enable time for the necessary planning to happen, the project has been programmed for 2026/27 to 2027/28.
Point Number	791.4
Category	Activity > New Public Transport Services
Comments:	Prebbleton also now has 2 retirement villages and the current bus services are restrictive. For example, there is no bus that comes through Prebbleton to Hornby, which is a regional bus hub. The Hub, Hornby is the closest shopping centre that provides a wide range of shops, goods and services. The only option is to catch the 81 bus, get off further down Springs Road, then catch another bus, which may involve a challenging walk for the elderly to the next bus stop to get to Hornby (plus waiting time for the 2nd bus), then on the way home, possibly carrying shopping the same process (ie catch 2 buses and a challenging walks) to get back home. At a time of government entities claiming being environmentally aware, this is not a good example.
Staff Recommendation	Environment Canterbury provide PT Services. Council is advocating for additional services to Hornby for Prebbleton and Lincoln, but this may occur as part of the express bus connections sought to the proposed MRT hub planned at Hornby in the future.

Comments:	Please more climate change initiatives. None of all of this will matter in 10 years if climate goals are not reached by then.
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. Council is developing a Future Selwyn Strategy that looks beyond the 10-year horizon to consider how we can respond to these challenges. The Council is also developing an Emissions Plan and Sustainability Plan to identify actions into the future.

Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	795.7
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	There doesn't seem to be any mention of the proposed reserve/playground at Dunsandel Estate subdivision. The subdivision is already full of young families who are desperately waiting for this development.
Staff Recommendation	Staff support the submission because a budget has already been provided for this project in 2023/24. Play equipment will be purchased before the end of the financial year with installation to follow later in 2024. Staff recommend that the playground at Wayleggo Place in Dunsandel proceeds and is completed with the balance budget from 2023/24 carried forward to 2024/25.

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding
Point Number	796.4
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities

Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a share Hub/Clubrooms built at the proposed new Tennis & Netball facilities based in West Melton. West Melton Tennis & Netball share the vision to provide an inclusive, nurturing & welcoming community focused environment to develop players of all ages, creating longevity for the clubs & community. What we are asking for is a hub to bring our community together to create a sustainable future of tennis & netball but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Tennis nets, tennis poles, tennis balls/trolleys, netball balls, gear bags, hoops & training equipment. The space would require a kitchenette suitable for making tea & coffee and afternoon tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		

Comments:

Question: 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design.

Project cost:
Year 1: 15.21m
Estimated impact on rates (per year):
$42.01

Funding:
Rates: 80.5%
Development contributions: 19.5% *

Ellesmere Promotions Trust wish to support Leeston Community Committee's Submission in favour of Option 4 (decision 2a) and Option 2 (decision 2b).

It is important that Leeston have a Town Plan to underpin future development within the town.

We strongly support putting the new Community Centre / Library back on its current site – particularly give the current building will need to be demolished at some point if the new build is done in another location. Putting the new building on this site would provide more of a civic centre for the township and separate those activities from the sports facilities. Having the civic centre at one end of the business area and the sports area at the other, with only a 5 minute walk between them, would help to keep the vibrancy of Leeston township alive. The current library site is a far safer site for the young and elderly in the area. There is a real health & safety issue with having young children and the elderly crossing to the suggested site on Leeston & Lake Road. This road is part of the Heavy Transport bypass, which a major health & safety issue for the young and elderly.

It is also our belief that building the new centre where the current Library is will have positive financial benefits. Being a quieter site, there will be less requirement for soundproofing of the building, and we are of the opinion there would be less remediation work to be done on this site. The infrastructure for the building is already in place.

We would however wish to raise concerns about where the Doctor will relocate to in Leeston, given that the current Doctors Surgery is part of the current library complex. This is something the township are very concerned about and will need to be thought through.

Ellesmere Promotions Trust would use it for small events, meetings, cultural events, health & wellness events, community engagement, cultural / arts events – depending on the final size of the Community Centre. The centre does need to be of a size to meet the needs of our growing community. We are trying to grow Event Tourism within Ellesmere and would like to support Council owned facilities

	wherever possible. However, these need to be in locations that have easy access for foot traffic – something we don't have currently.
Staff Recommendation	The submission is acknowledged. Access issues, health and safety, and noise have been taken into account in relation to this issue.
Point Number	797.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Carry out the landscape improvements to extend the playing fields; replace and upgrade the playground equipment, footpaths, toilet block, lighting and irrigation; and seal the carpark. **Project cost:** Years 1-10: $3.4m **Estimated impact on rates :** Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% * Our budgeted option **Comment:** *With regards to the Leeston Park development area, we do not see the need to spend the budgeted amount on the toilets in this area. The current toilets are perfectly adequate and serviceable. Of more value would be putting this money towards building a sports pavilion which would serve all the sports groups at Leeston Park and incorporate changing rooms and toilets. We don't see this being as urgent as getting our Community Centre and Library completed.*

Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2 and that they do not see a priority for upgrading the existing toilet block.

Comments:	The council should introduce a by-law "That all new house builds and large commercial and farm buildings have solar energy recovery systems installed at time of construction" This will show Selwyn District Council as a leader in this important initiative to help reduce the effects of climate change.
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. While we cannot require solar panels through the Resource Management consenting process, council can explore sustainable solutions for residents through its Sustainability Plan

Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	I understand, from others, that there is no funding committed to a replacement tennis clubhouse alongside the proposed new West Melton tennis courts. All clubs need clubhouse, they are almost as necessary as a tennis net. Something like a bigger version of the new, simple clubhouse at Hororata would be sufficient.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves

Comments:	I oppose almost all mana whenua engagement in decision making. Qualified specialists should be used based on talent and not any superior knowledge claims based on the origin of great, great grandparents.
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognises the importance of supporting Iwi participation. Council is committed

	to ensuring inclusivity and that ensuring everyone has an opportunity to benefit. Council considers this can lead to better outcomes for the whole community. For example, Iwi knowledge about local environments can be invaluable in planning and resource management projects. For Council to include Iwi contribution to count, by ensuring Iwi perspective has an opportunity to inform decision making on its committees, reflects our commitment to the Treaty and our shared responsibility to create a more equitable and respectful society.
Point Number	802.12
Category	Activity > Potential Requirements To Fluoridate
Comments:	>> Strongly support the addition of fluoride to drinking water.
Staff Recommendation	The submitters preference to fluoridate community drinking water supplies is acknowledged. The cost to fluoridate supplies is estimated at $7.9m over the LTP period. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.

Submitter Number:	803	**Submitter:**	Emma Baumbach
Point Number	803.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear.		

	Project cost: None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** Any chance of rebuilding a trainline along the rail trail to connect Lincoln to the city centre? I'd much prefer we invest in trains and trams rather than buses
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case determined that MRT was viable in the city, but not in the surrounding Districts. It considered a wider passenger rail service using the existing rail network could have merits in the future if combined with a wider regional passenger rail service. But with small projected patronage, large investment needed for rolling stock and infrastructure (on a rail network managed by others), and that there is no CBD connection makes this currently not worthwhile.
Point Number	803.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would

	have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do nothing. Use the existing park facilities and remove or replace old and unsafe items in the park. **Project cost:** Year 1: $143,000

	Estimated impact on rates: Included in our current rates **Funding:** Rates: 100% **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1
Point Number	803.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:** Surely most of these options aren't things that should be prioritised during a recession. Public transport and cycle ways - yes, but not additional sports and community facilities.
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	803.5
Category	Questionnaire > Matters For Community Guidance
Comments:	

	Question: Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	803.7
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Ever increasing rates, house prices that don't go down, being forced to build or buy a house to suit a box ticking scheme instead of allowing people to build and buy in a way that suits their own life and finances.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	803.8
Category	Activity > Walking and cycling improvements
Comments:	Being forced to own and drive a car because the public transport is so shocking, and the cycleways are even worse. NZ needs to be more like the Netherlands. Connect us all with public transport and cycleways that are actually worth a damn.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	803.10
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool

Comments:	Why is costing so much to close the pool? Can't you just take all the equipment out and lock it all up, and then in the future if Darfield was wanting it's own sports facility and pool, you can reopen it again in the future if and when the council has an influx of funding? It seems ridiculous to have to pay so much to close it down to the 'box ticking' standard. If people want to break in and mess with it they can do it at their own risk.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	803.11
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	As a nearly 30 year old having to live with my parents again, the chances of me ever owning my own house are ridiculously slim.
Staff Recommendation	Acknowledged. The housing market is complex and the council monitors and ensures there is enough available capacity to meet demand though other financial factors contribute to house prices.

Category	Activity > Other Categories identified by Staff > Rates
Comments:	Page 56 - An 8.5 % increase per year in rates over the next 10 years is extortionate. This is especially so as we have no choice but to pay. The council need to spend within their budget rather than force its ratepayers to pay more.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	805.10
Category	Activity > Strengthened Partnerships
Comments:	Treating Maori differently to any other group of people is racist and should be avoided.
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognises the importance of partnerships: Building strong relationships with Iwi is vital for the Council to fulfil its obligations and effectively serve the entire community. Te Tiriti o Waitangi, the Treaty of Waitangi, is a founding document of New Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with Iwi, to have any meaning, requires consideration of Iwi position and contribution to the discussion/ debate.
Point Number	805.11
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	The public sector don't know much about running businesses. They just think they do. It would be poor value for money.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** Public transport is an important function of our local councils including Selwyn and Environment Canterbury. In these times, with cost of living pressures and climate change accessibility to public transport needs to be focused on. Two points of consideration a secure Lincoln Park and Ride would help to:		

	Connect key suburbs. In my area of town (SW Christchurch), there can be the need to connect from Tai Tapu to Halswell and Halswell to Lincoln. It is only a short distance via motor vehicle but there is no public transport link to the two. I am proposing a Tai Tapu to Halswell shuttle. Tai Tapu is not connected to public transport. It is 10+ km to Halswell where there are public bus routes to town. Bus services are arranged for transporting children to Christchurch schools and my father used to catch a work bus to town each work day in the 1980's (Tai Tapu to Christchurch). There is the precedent. It is generally too far to bike to Halswell. There are bus services in Lincoln but I know of people who have moved recently from Tai Tapu to Lincoln to be "closer to the buses" and hence Christchurch city. Lincoln to Halswell: The bus routes could easily be connected from Halswell to the 81 Lincoln Bus stop at/near Healthy Harvest on Springs Rd (via Marshes Rd). I have completed the journey from Halswell via bus then walking to Healthy Harvest (takes 30 min plus on foot carrying what I needed for work).Thankfully a kind lady who saw me doing this in the morning happened to be passing when I was returning and gave me a ride (from Healthy Harvest to Halswell), I would have been exhausted if not. And also could the half price bus fares be continued beyond 30 June 2024? Again in a cost of living crisis where people have less to spend/coupled with rising costs public transport needs to be kept accessible (affordable). This particularly applies to people living in more "rural" locations 20+km away from Christchurch.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Environment Canterbury provide PT Services and sets the fares. The connection between Lincoln and Halswell could occur in the future as part of route extensions under the Greater Christchurch PT Futures process. The Park N Ride facilities will be sized and provided to enable use from the adjoining townships so residents can drive and park to access the PT services e.g residents at Tai Tapu using the Lincoln Park N Ride. It unlikely a shuttle would be provided by Environment Canterbury.
Point Number	809.2

Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the continued development of an economic development strategy? Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	809.4
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Firstly please consider rates rises to be kept to a minimum. Spending needs to be done efficiently. Growth of the district should be somewhat offset by more households to contribute to rates.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	809.5
Category	Activity > New Public Transport Services
Comments:	Regarding sustainable transport options for outer areas of Selwyn eg Tai Tapu perhaps loan EV cars/bicycles could be located in Tai Tapu to better connect with other surrounding areas eg Lincoln/Halswell. This has been done in Christchurch previously (EV cars parked in the Art Gallery car park) and now with Zilch at the airport.
Staff Recommendation	It would not be a Council function to provide EV loan vehicles etc, however should a commercial operator wishing to set up such a service Council could consider what could be done to assist like it currently does allowing EV charging stations on Council land.

Point Number	809.6
Category	Activity > Chlorination
Comments:	We would like Tai Tapu to be considered for chlorine removal from our drinking water supply.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	809.7
Category	Activity > Lincoln Town Centre Upgrades
Comments:	A big yes to supporting the redevlopment of Lincoln (Town centre). The project needs to start soon, it has been proposed for too long! Spending needs to be reviewed, $46M seems too high. Lincoln is a hub for outer areas away from Rolleston and needs more facilities medical/playgrounds etc! Rolleston while the largest centre, doesn't need all the focus on spending. Activities are often based in Rolleston, it is easier to go to town. Secondly it would be better if Lincoln University could be included in the Lincoln town redevelopment, it has been there for a long time (since 1878) and while on the outskirts of Lincoln at the moment it is a hub of activity. Thank you for the opportunity to provide feedback.
Staff Recommendation	Of the $46M for the upgrades that includes improving amenity aspects, $36M is related to core infrastructure works that are necessary anyway to address a failing carriageway and other near end of life assets like kerbing and footpaths. This also includes the signalization of the 4 key intersections necessary to cater for the expected traffic volumes and safety needs.
Point Number	809.8
Category	Questionnaire > Matters For Community Guidance > Economic Development

Comments:	Yes, but do for a lower price tag. Rates need to be keep down.
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy and has noted the proposed allocation should be reduced. The $9m is over a ten-year period, and not all the proposed spend is the same across the years with the first years having a lower allocated amount. Council can revisit the allocations in year 3 of LTP. Councils' contribution to economic development is alongside others who are expected to contribute significantly more overall.
Point Number	809.9
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	But do cost effectively. Spending leads to use of rates and this needs to be done carefully and prioritised.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Point Number	810.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are

	collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** In the current economic climate, I think Council needs to stick to the basics, like water, transport and environmental (climate change). Other major projects can wait until the economic situation improves.
Staff Recommendation	The submission is acknowledged.
Point Number	810.3

Comments:	the pool is a much needed community facility especially for the school children who use it for swimming lessons. Take the pool away a d there will be children who will miss out on basic learn to swim lessons as not every family can afford to take their children further afield for private swimming lessons.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Submitter Number:	813	**Submitter:**	Mel Bleach
Point Number	813.2		
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities		
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a share Hub/Clubrooms built at the proposed new Tennis & Netball facilities based in West Melton. West Melton Tennis & Netball share the vision to provide an		

	inclusive, nurturing & welcoming community focused environment to develop players of all ages, creating longevity for the clubs & community. What we are asking for is a hub to bring our community together to create a sustainable future of tennis & netball but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Tennis nets, tennis poles, tennis balls/trolleys, netball balls, gear bags, hoops & training equipment. The space would require a kitchenette suitable for making tea & coffee and afternoon tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Point Number	814.1
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes two indoor courts. **Project cost:** Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million) **Estimated impact on rates (per year):** $19.91 **Funding:** Rates: 57% Development contributions: 43% * **Comment:** At Darfield High School, we're seeing a huge growth in interest in sports such as basketball but we currently have to travel to Rolleston or Chch to access full size courts. Our students come from as far away as Coleridge and Castle Hill so travel times make accessing such sports a major, inequitable, barrier. Darfield is an obvious hub for the inland parts of Selwyn and is growing substantially through new subdivisions, so far mainly occupied by younger families. One court would be insufficient to meet demand by the time it is built. Of note is that DHS currently has two (undersize) gym spaces and both are in constant use during the day with significant usage outside of school times for team training. This suggests that a one-court gym would be too small. It would make more sense to recognise the growth of the area and build for the near future, rather than building an undersize facility and needing to extend it in the foreseeable future.

	Darfield High School, which is likely to have a roll of around 1,000 students by the time the facility is completed, also needs to upgrade our gym. We would be very keen to collaborate with SDC to achieve our goals together in a responsible use of public funds. We have space to enable building on our site which could save costs and would guarantee usage during the day; this would not need to be exclusive, or even a barrier, to wider community usage. The Ministry of Education could be a significant contributor to build costs and DHS to ongoing costs through patronage and maintenance contributions. This would make much better use of public funds and could potentially affect the cost projections for Council. There are many examples of successful partnerships between MoE/schools and district councils. DHS is a reasonably central location for the wider community. If located off the Darfield High School site, we would be unable to contribute financially and distance from the school would be a significant factor in whether we can use the facility during the school day. It would not seem sensible to build a facility in Darfield that cannot be used by scool students during the day. We believe that this decision is highly significant for our growing community in terms of equitable access to resources in Selwyn and to our future health.
Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.

Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	814.7
Category	Activity > New Public Transport Services

Comments:	Public transport from Darfield to Rolleston should be a high priority for our students. We agree that Rolleston makes sense as a hub for public services but it does not make sense if it cannot be accessed by our community, many of whom are too young to have driving licences and shouldn't need to drive even if they can. Currently, the amazing services available in Rolleston cause some resentment as they are so inaccessible to our community.
Staff Recommendation	Environment Canterbury provides PT Services. Council is aware of the demands on the 86 Metro Darfield to city service and will continue to raise this with Environment Canterbury. It is envisaged Darfield residents will use the planned Rolleston Park N Ride facilities to connect to the direct to City services. Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service.

Comments:	I would like the following considered for Castel Hill village • Progression towards a dark sky area, either with a trial of a lights off initiative or dark sky compliant street lighting
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and they would like to see Castle Hill progress towards Dark sky accreditation. Dark sky considerations will be part of the development of Action Plans associated with the Economic Development strategy. Council will consider their feedback in strategy action planning.
Point Number	815.10

Comments:	I would like the following considered for Castel Hill village

	• Finalise and implement the Castle Hill Village Reserves Management Plan, including funding removal of the remaining seed source/wildling Douglas Fir and Larch trees in the Village
Staff Recommendation	Submission is acknowledged by Council. The Castle Hill Reserve Management Plan is progressing to completion with a hearing to be held on 9 May 2024. Budgets have been provided in the draft LTP to undertake tree pest removal at Castle Hill.
Point Number	815.11
Category	Activity > Other Categories identified by Staff > Waste Management
Comments:	I would like the following considered for Castel Hill village • A garden waste disposal system for the Village
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. There are no immediate plans to establish a permanent green waste drop-off site at Castle Hill as costs to residents of Castle Hill to provide this (in particular transport costs) is prohibitively expensive. Furthermore, an open top skip in an unstaffed facility would invite tipping of construction waste and other bulky waste - contaminating the green waste. Staff have suggested previously that Council would consider assisting the community association with a community hire of a garden chipper once or twice per annum.
Point Number	815.13
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	I would like the following considered for Castel Hill village • Upgrade of the wastewater treatment plant in line with expected discharge water quality standards from Taumata Arowai/DIA
Staff Recommendation	The submitters preference to upgrade the wastewater treatment plant for Castle Hill is acknowledged. Staff recommendation is to proceed with the Wastewater Capital works programme as budgeted in the LTP, which includes upgrades to the disposal and treatment systems at the Castle Hill treatment plant.

Point Number	815.14
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	I would like the following considered for Castel Hill village • No further development beyond current village extent - without investigation of sustainable water supply, landscape impact, wastewater and rubbish disposal.
Staff Recommendation	Rezoning does not occur through the Long Term Plan. The council has recently worked through its review thought there will be processes in the future that long-term growth areas can be discussed.
Point Number	815.15
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	I would like the following considered for Castel Hill village • Upgrade of the signage and fencing at the Village entrance
Staff Recommendation	Submission is acknowledged by Council. Entrance signage upgrade is being arranged through the developer and design pending approval from NZTA

Point Number	816.5
Category	Activity > Planning Further Community Facilities
Comments:	I question why such a large focus is being placed on sport and sporting events, and nothing on the performing arts. The Arts are always the first thing to be axed, yet make some of the largest amount of money and draw in huge numbers of people. Selwyn should have at least one proper theatre facility built, given the large number of large scale community productions that take place that are forced into confined spaces. The arts are just as, if not more, important than sports to countless people, and it's frankly very disappointing that performing arts programmes consistently get the shaft while sports get new facilities and large funding.
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.

Comments:	We really need a bigger facility for gymnastics! It was on the cards then got overseen. It is not safe for our tamariki and does not allow for any extention where our kids are doing so well. We could have the potential to extend our children in this area and alot of these children will go so far! We could have so many more Selwyn champions! We really need a space to carry out more variety of gymnastics. The space is not big enough for success. Also it is freezing in winter and unsafe in summer due to the heat!
Staff Recommendation	The submission is acknowledged. Council recognises that well over 150 submissions have been received across 11 or more different community facility types, often requesting significant capital input. This excludes existing or proposed Council facilities as part of the Long Term Plan. Staff recommend that this facility be included as part of a wider community facility funding and planning project with gymnastics as a potential individual case study along with other facilities such as a performing arts and a military museum or similar to provide a variety of examples.

Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a shared Hub/Clubrooms built at the proposed new Netball & Tennis facilities based in West Melton. West Melton Netball & Tennis share the vision to provide an inclusive, nurturing & welcoming community focussed environment to develop players of all ages, creating longevity for the clubs and the community. What we are asking for is a Hub to bring our community together to create a sustainable future of Netball & Tennis but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Netball Balls, Gear Bags, Hoops, Training Equipment, Tennis Nets, Tennis Poles, Tennis Balls and Trolleys. The space would require a kitchenette suitable for making Tea & Coffee and Afternoon Tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it’s future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

	Question: Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	821.8
Category	Activity > Other Categories identified by Staff > Consultation Document Feed

Comments:	Generally the points raised are OK but the LTP process is flawed with too much emphasis on directing the community to the submission process rather than actively collecting and listening to the views of the community (in person) and acting on these / representing the community when change / action is required (outside of LTP submissions). We need some true representation of community views on behalf of the community
Staff Recommendation	Council acknowledges the submission. Staff will take this into account as they consider future consultation and engagement activity.
Point Number	821.9
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	. Also the community is not just Rolleston, far too much investment is placed on building a strong infrastructure in Rolleston and the voices of those outside of Rolleston are just treat as second class. Just look at the Lincoln Plan that has been put on the back burner so long that the rise in cost of implementing keeps pushing it back even furhter. This is completely unacceptable.
Staff Recommendation	A key assumption for the Long Term Plan is the population projections. As each town grows, there is a need to understand its future, as well as upgrade its infrastructure. This is generally done through Strategic and Spatial Plans. As growth continues to exceed the projections, more projects are needed quicker to meet this growth.
Point Number	821.10
Category	Activity > Chlorination
Comments:	Chlorination - We support some increase in rates to remove chlorination as a priority but expect SDC to reduce spending on low priority projects in Rolleston to fund the balance.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If

	implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	821.11
Category	Activity > Low Nitrate Water Sources
Comments:	Nitrate levels - We support SDC looking into use of low nitrate sourced water but equally wish SDC to put pressure on the source of the nitrate contamination.
Staff Recommendation	The submitters preference is for low nitrate water sources. Staff recommendation is to undertake further investigations into centralised sources of low nitrate water as budgeted in the LTP.
Point Number	821.12
Category	Activity > Potential Requirements To Fluoridate
Comments:	Flouridation - We are against enforced flouridation as this should be a consumers choice.
Staff Recommendation	The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health
Point Number	821.13
Category	Activity > Lincoln Town Centre Upgrades
Comments:	Lincoln Town Centre Upgrades - it is essential that SDC prioritise the full completion of Lincoln Town Centre upgrades without further delay especially in the view of the excessive growth of the township which has been forced through against the wishes of many of Lincoln residents (particularly the growth resulting from PC69). This should extend to the feeder roads in and out of Lincoln. To support the prioritisation and fuinding of this, the Rolleston Transport improvements should be placed at a lower priority (as Lincoln has been previously).
Staff Recommendation	The widening and safety upgrade of Ellesmere Road is included early in the draft LTP. The main Rolleston roading and transport projects are required to align with an NZTA programme for safety and access upgrades along SH1 through Rolleston

Point Number	821.14
Category	Activity > Other Categories identified by Staff > Consultation Document Feed
Comments:	General - WIth prior submissions to the LTP process, we feel that townships, in particular Lincoln, are continually been given a lower priority than Rolleston. Additionally we are looking for greater active support for the Lincoln community outside of the LTP submission process (not just asking the community to submit on the LTP).
Staff Recommendation	Submission is acknowledged by Council. Council had a number of face to face opportunities across the district as part of this consultation approach to try and address the concerns raised around collecting and listening to feedback.

Submitter Number:	822	**Submitter:**	Murray George

Point Number	822.1
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined

	Funding: To be determined **Comment:** When you say "You told us you want to see better access to public transport, particularly for our young and elderly residents" were these rate payers or the general population?
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. The general population comprises of ratepayers that fund services on behalf of the young and elderly that they once were and will eventually become.
Point Number	822.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46

	Funding: Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [
Point Number	822.3

Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do nothing. Use the existing park facilities and remove or replace old and unsafe items in the park. **Project cost:** Year 1: $143,000 **Estimated impact on rates:** Included in our current rates **Funding:** Rates: 100% **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1
Point Number	822.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development

	contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:** Use the facilities down the road at West Melton
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	822.5
Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	822.8
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	I would consider supporting this if I saw a fixed price contract being signed with the supplier i.e. No cost increases once work has been commenced.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through

	automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	822.9
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	I can only see 33 pages on the document
Staff Recommendation	Council acknowledges the submission and notes the concern with the level of information provided. Improvements regarding the presentation and provision of information will be considered for future consultations.
Point Number	822.10
Category	Activity > Other Categories identified by Staff > Rates
Comments:	The projected rates rise is ridiculous especially for those on fixed incomes. Any rates rise should be in line with inflation.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	822.11
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	The council needs to concentrate on the upkeep of roads and footpaths, decent unchlorinated water, rubbish collection, sewerage and drainage. All other projects should be put on hold until other ways of funding can be found. A user pays system needs to be adhered to in public facilities. A review of staff numbers needs to be undertaken. I frequently use Te Ara Atea/Library in Rolleston and are surprised at the number of staff standing around seemingly with nothing to occupy them. Forget the "feel good" projects and concentrate on the basics.
Staff Recommendation	That the submission is acknowledged by Council.

Build a community recreation and sports facility at Darfield that includes one indoor court. **Project cost:** Year 3: $7.07 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $5.97 million) **Estimated impact on rates (per year):** $11.67 **Funding:** Rates: 57% Development contributions: 43% * Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the submitter has selected Option 2, build the community recreation and sports facility at Darfield that includes one indoor court.
Point Number	823.6
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	To preserve farmland for farming use, **allow** 4 hectare blocks to subdivide into 2 or 3 lots, to provide a variety of different sized sections (1, 2 and 3 hectare sections), in the region around Lincoln, particularly between Lincoln and Tai Tapu. This would provide increased housing/farming industry but maintain the semi-rural appearance of the area.

	Thank you
Staff Recommendation	The National Policy Statement on Highly Productive Land provides clear direction and parameters for council in considering future housing growth in Selwyn, including subdividing farmland to smaller blocks.

Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	provision of policies tomenable less red tape more efficent complience is always good for business development
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and Council will consider their feedback in strategy action planning.
Point Number	824.9
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	tech systems and supporting infrasture must keep pace with tech changes
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Point Number	824.10
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	policy must adapt to the changes in society Wellbeing of society requires review and adjustment to these changes Local government plays a key role processing and advocating central government regulatory requirements We must take an inclusive view of multicultural and diverse communities we live together we work together we support each other we need to be open to innovative ways to improve how this can be achieved. One way is to recognise the value of the cultural hertiage as new look forward there are many issues that we can not control. Climate global conficts economic conditions we need to take heed of growth and impact on productive soils and need to improve water quality we are blessed in NZ for abundant water resources (sometime too much in the wrong places) care to manage and improve this essential resource is key to our collective future Climate change is here and will continue to impact society in NZ. Active discussion and policy around coastal retreat must begin now I would like to feel more confident for the future of my grandkids than i do now
Staff Recommendation	Submission is acknowledged by Council.
Point Number	824.11
Category	Activity > Chlorination
Comments:	i would like to see chlorination data more transparent it is an emotive issue we need to see clear data as to why and what levels are needed for public health.

	Are there other techologies that could deliver results without the physiological and mechanical impacts ? Treatment is required due in part to the intregity of the distribution network is it possible to reduce the treatment level when leaks are found and repaired
Staff Recommendation	The submitter has requested additional information on Chlorine requirements. Chlorination is a requirement of the Drinking Water Quality Assurance Rules that came into effect in November 2022. The new rules require that we have a minimum dosage of 0.2 parts per million (ppm) in the water when it reaches each property on the supply. The amount of chlorine dosed into the water supply is carefully managed to ensure levels of chlorine in the water people drink are absolutely minimised. This dosage may vary at specific times if it is needed to keep your drinking water safe. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.

HI

I am an avid user of the Leeston Rugby Club facilities and also the gym at the college. Both of these facilities are currently in the balance of 'what do we do next' with them. I recently read an article about Rangiora High School and how they wanted to partner with the District council and build a communty meeting hall / cultural space for the use of the whole community. Why on earth can this discussion not be occuring in Leeston as well? I am in favour of building a multi purpose building that serves that need of the community for the next 80-100 years. Sport and culture must both be considered. We do not however neeed some fancy triangle shaped building that is the worlds most eco friendly building and that is highly inflated in cost because of this. It does not need to symbolise anything with its shape and it does not need to have more space for a libary that anything else. Can the council please listen to the community. If we were to build this new facility in partnership with the College as a community then this would be by far the best outcome for both parties. The College is currently having some issues keeping kids at its school as the parents have lost faith in the rebuild

	process and the college as a whole. I am sure that another 19 million would go a long way to helping bring the community and the school back together. I attended the recent anzac day service held in the Rugby club building which was a great success. There were at least 300-500 people there and a large number had to stand outside as the venue was full. How will the councillors feel once the new triangle building is constructed next to the RSA and the community still uses the Rugby club for the Anzac service as the new buliding is not big enough or fit for purpose, we will not even walk past it during our parade and this will be very sad indeed, this is the reality we are facing as a community. Does the council realise that for 5 months of the year there is an indoor netball competiton held in the Rugby Club building that brings around 60 like minded people together on a Monday night through winter. Imagine if this competition was held in a new building or a renovated existing building that was more fit for purose than a current Rugby club that barely fits a netball court (the goal posts are only 30 cm away from the walls) These people along with many others deserve much better from their council rates than a triangle Library don't you think? There are many more people in the community that would use a sporting facility if it was built also, mainly the youth of the area who currently have no facility to use. I have two boys aged 10 and 11 and the first thing that wanted from a community building when I asked them was somewhere to play basletball, not somewhere to hang out and read books or play video games. There is currently no facility for even outdoor basketball in Leeston let alone an indoor option. The consultation process on this issue so far has been appalling and a complete waste of ratepayers money, we as a community have been completely left in the dark while the triangle building has been designed - the local community group was not even allowed to know the dimensions of the building untill recently. This us and them mentality does not help. Good luck with the next phase Regards Stuart Stephens
Staff Recommendation	The submission is acknowledged. Various locations have been investigated in relation to this matter.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	825.7
Category	Questionnaire > Matters For Community Guidance > Economic Development

Comments:	This is the role of Central government
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and holds a view that Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	825.8
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Do not spend anymore than other councils of similar size are and use the power of councils to get a good deal from a large operation that supports multiple councils please
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	825.9
Category	Activity > Compulsary organics collection
Comments:	The proposed green waste bin is not necesary and if it is deemed necessary then there needs to be an opt out option - this may then make it not financially viable as more people will compost there own - which will achieve the same outcome but not add any cost to the ratepayers as a whole.
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. We do acknowledge that this is an additional unwanted burden for those who already compost their own food scraps and garden waste at home. This regulation is outside of Council's control. The Ministry for the Environment has issued a directive that households in all urban areas with a population of greater than 1,000 residents must have a food scraps/organic collection by 1 January 2027. Every Council in

	New Zealand is obligated under the Waste Minimisation Act to comply with this.

Submitter Number:	826	**Submitter:**	Details Withheld
Point Number	826.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** the preferred option of cost sharing with Waka Kotahi hopefully will work. However the demand for public transport with expanding		

	populations and the appalling state of roads in Lincoln towards the city that are only going to be exacerbated by large developments. Can those developments be made to contribute towards these services/road improvements. Otherwise the townships are going to become less appealing if the transport corridors and options are not safe or tolerable to travel on. Could consideration be given to improving the cycling network to/from Lincoln - Prebbleton, Lincoln - Tai Tapu and Lincoln Prebbleton. The decision to enable housing driveways across the rail trail in Lincoln makes commuting less than idea. In the last ten years there has been a proposal for cycleway to Tai Tapu and this appears to be lost. The proposed population lf Lincoln is due to grow close to that of Rolleston in 2021. Will Lincoln get the same level of investment that Rolleston has.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Developers are required to pay development contributions for transport projects in addition to providing the new infrastructure to establish their developments and upgrades as identified through consenting and engineering approval processes. Cycleways already exist connecting Lincoln to Prebbleton, Rolleston and beyond. This includes recent pathways to the east of Lincoln to Peymans Road which is now the current cycleway link to Tai Tapu considering the practical difficulties and high cost to establish a pathway alongside Lincoln Tai Tapu Road. Councils' current priority is the widening and safety upgrade of the Ellesmere Road arterial route from Lincoln.
Point Number	826.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed

	to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Point Number	826.5
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	I respectively suggest that there needs to be some clarity and transparency around the Council's approach to engagement and communication with the community. The processes followed with respect to Plan Change 69 have eroded trust.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	826.6
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	the populations of Lincoln and Prebbleton combined are looking to match that of current Rolleston, while i appreciate the hubbing of facilities at Rolleston due to the population, will Council start planning for the similar investment in Lincoln and Prebbleton now.
Staff Recommendation	A key assumption for the Long Term Plan is the population projections. As each town grows, there is a need to understand its future, as well as upgrade its infrastructure. This is generally done through Strategic and Spatial Plans. As growth continues to exceed the projections, more projects are needed quicker to meet this growth.

Submitter Number:	830	**Submitter:**	Details Withheld
Point Number	830.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million		

	Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** Explore light rail options for Rolleston and Darfield commuters
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case determined that MRT was viable in the city, but not in the surrounding Districts. It considered a passenger rail service using the existing rail network could have merits in the future if combined with a wider regional passenger rail service. But with small projected patronage, large investment needed for rolling stock and infrastructure (on a rail network managed by others), and that there is no CBD connection makes this currently not worthwhile. The MRT Business Case process has yet to determine what mode MRT services will take i.e. rail or bus.

Category	Activity > Low Nitrate Water Sources

Comments:	I would support more community information on nitrates in drinking water. And monitoring of not just council operated bores, but free testing and data recorded of nitrate levels in private bores. I know it is Ecan's responsibility but they are NOT doing this. When our bore recorded nitrate levels 50% above WHO recognised safe, we reported it to Ecan who were uninterested. We alerted our neighbours and advised them to get their bores tested.
Staff Recommendation	The submitter has requested additional information on nitrate levels in drinking water for public and private bores. Data on current nitrate levels and maximum acceptable values of Council operated Community drinking water supplies can be found on Council's website at https://www.selwyn.govt.nz/services/water/water-supplies/water-quality-in-selwyn-district/nitrates. Environment Canterbury has undertaken nitrate monitoring in Canterbury Groundwater that can be found on their website. Private property owners can access testing services via private sector suppliers. Staff recommendation is to undertake further investigations into centralised sources of low nitrate water as budgeted in the LTP.

Category	Activity > Lincoln Town Centre Upgrades
Comments:	Regarding Lincoln, it has become clear that given the number of developments, including PC 69, which are going to double the town in size, the council needs to invest in the safety of the roads - for example, Springs, Birches, and most of Ellesmere Rd are not mentioned or due for any upgrades to make them safe enough for the amount of traffic that now travel on them. There are multiple fatal stop junctions that need improved signage and road markings. Gerald Street most definitely needs traffic lights to allow cars to turn right from any intersection. And so many more measures need to be taken to keep up with the current population growth.
Staff Recommendation	The Council will be starting the upgrade of the Lincoln Town Centre and Gerald Street in stages starting in 2024 at the Liffey end and finishing at Springs Rd in 2030. This is estimated to cost $45M and includes cycle lanes, power undergrounding, 4 sets of traffic signals and the replacement of the failed carriageway. Council has invested heavily in upgrading key arterial intersections of Shands and Springs Road with roundabouts at Prebbleton to cater for the confluence of

	traffic growth from Rolleston and Lincoln and access to the motorway and/or city. The widening and safety upgrade of Ellesmere Road is included early in the draft LTP.

So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:**		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP		
Point Number	833.2		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Staff Recommendation	Submission is acknowledged by Council.
Point Number	833.7
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	pools man be managed by locals
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	833.8

Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	spread costs as can afford
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy and holds a view that the proposed allocation should be reduced. The $9m is over a ten-year period, and not all the proposed spend is the same across the years with the first years having a lower allocated amount. Council can revisit the allocations in year 3 of LTP. Councils' contribution to economic development is alongside others who are expected to contribute significantly more overall.
Point Number	833.9
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	carful investment measures done before any commitments are made. Discuss any first .
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Category	Activity > Other Categories identified by Staff > Other Water
Comments:	It is important to me that the community and infrastructure needs of the people of Glentunnel are provided for in the Selwyn Long-Term Plan 2024-2034, these needs include but are not limited to representation in Council decision making, public stormwater management and upgrading the public drinking water supply infrastructure in Glentunnel.
Staff Recommendation	The submitters support for infrastructure upgrades in Glentunnel is acknowledged. Upgrades to the Hartley's water supply scheme (serving Glentunnel) include connecting the scheme to Hororata to increase resilience and adding source capacity. Minor Stormwater improvements for Glentunnel are budgeted. Staff recommendation is to continue with the 5 waters capital programme as budgeted in the LTP.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	839.8
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool

Comments:	The Sheffield community should have the pool returned as the council seased it originally
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	839.9
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	the council should remember that Selwyn exists outside of Rolleston.
Staff Recommendation	A key assumption for the Long Term Plan is the population projections. As each town grows, there is a need to understand its future, as well as upgrade its infrastructure. This is generally done through Strategic and Spatial Plans. As growth continues to exceed the projections, more projects are needed quicker to meet this growth.

Comments:	leverage off of other R&D in the civilian sector

Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Point Number	840.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:**		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP		

Point Number	840.2
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes one indoor court. **Project cost:** Year 3: $7.07 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $5.97 million) **Estimated impact on rates (per year):** $11.67 **Funding:** Rates: 57% Development contributions: 43% * Our budgeted option **Comment:** Darfield definitely needs something like this as there is nothing in the area. Most people would be involved in the sports weather it was netball or basketball, for training in any sports. I feel like it would definitely be used by the current kids and the future generations to come. I would definitely be more into sports if it was to be built and the darfield rec centre or even located at the darfield high school
Staff Recommendation	It is acknowledged that the submitter has selected Option 2, build the community recreation and sports facility at Darfield that includes one indoor court.
Point Number	840.3

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre.

	Project cost: Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Category	Activity > Planning Further Community Facilities
Comments:	I believe that the Selwyn district especially Rolleston needs a Community Theatre. I had the upmost pleasure visiting Rolleston to watch Mary Poppins. WOW what an amazing organisation and so inclusive to many ages, ethnicities and nerodiversity. This is an amazing experience for many people to be involved in, I was astonished to see how many volunteers were involved in the show. I am sure the show brought revenue to the community as not only did I spend money in Rolleston, but after a successful show many of my friends brought their families to view the show. So council, I suggest you build a theatre that would be multifunctional for many different organisations to use. All the best
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such

	as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.

Category	Activity > Planning Further Community Facilities		
Comments:	I believe that the Selwyn district especially Rolleston needs a Community Theatre. I have recently visited Rolleston to watch Mary Poppins by CentreStage Rolleston. I was pleasantly surprised to see how amazing this organisation is. From an outsider perspective the organisation is inclusive to many ages, ethnicities and nerodiversity. This is an amazing experience for many people to be involved in, and I was astonished to see how many volunteers were involved in the show. I am sure the show brought revenue to the community as not only did I spend money in Rolleston, but after a successful show many of my friends brought their families to view the show. The organisation managed to sell out majority of their season, so I could only imagine that a venue with more seating would bring more revenue into both their organisation and the community. A Theatre would benefit so many schools, organisations, clubs, touring companies and thus exposing the Rolleston community to an avenue of life that is currently restricted to them.So council, I suggest you build a theatre that would be multifunctional for many different organisations to use.		
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.

Submitter Number:	844	**Submitter:**	Penny De Jong
Point Number	844.2		
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities		
Comments:	There appears to be no provision made for upgrading facilities in Prebbleton. This suburb has exploded with growth over the past 10 years, but we have no sports facilities, no swimming pool, no events		

	or recreation centre, n no investment in infrastructure (like getting power lines underground) no provision for park and ride, little in the way of public transport, constant traffic on springs road through the village with no safe place for new residents of the Somerset retirement village to cross, and no provision for anything in the long term plan. Not good enough.
Staff Recommendation	Staff recommend this submission be acknowledged. A new community centre for Prebbleton has been in considered in earlier Long-Term Plans and was previously signaled for construction in 2025/26. A needs assessment study was undertaken in 2023 which concluded that there was demand for a facility to service the community, and that it should provide a mix of social, community gathering and recreation spaces. The study further concluded that the facility needed to be located so it was easily accessed by the community. As there are uncertainties about the best site for the facility and the activities that it will cater for, further planning and community consultation is needed. To enable time for the necessary planning to happen, the project has been programmed for 2026/27 to 2027/28.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Comments:	I feel there is too much focus and budget directed to sports. I support the comments made by others, who have asked for more support for the arts in Selwyn. We need a dedicated performing arts space and SDC can lead the way with these conversations.
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	858.7
Category	Activity > Chlorination
Comments:	Stop chlorinating our water. Please.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be

	used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** No to any expense until your council pays down some debt. You are acting irresponsible by placing the ratepayers into so much debt, as you are a corporation you will be held accountable for this reckless behaviour.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP
Point Number	861.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1.

	Carry out the landscape improvements to extend the playing fields; replace and upgrade the playground equipment, footpaths, toilet block, lighting and irrigation; and seal the carpark. **Project cost:** Years 1-10: $3.4m **Estimated impact on rates :** Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% * Our budgeted option **Comment:** I can't understand why you would need to borrow any money as a loan, every new subdivision makes a contribution to developments and all the new ratepayers drawn in, surely your business model should be using these funds. As ratepayers I think it is time that the council makes public the income and expense of each section, and if the income is less than your projected expense you will need to modify your spending just like any other business. This attitude of council will just the get ratepayers to pay needs to stop immediately.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2. Development contribution funds can, under the Local Government Act, only cover project elements required to extend capacity to meet demand from growth. As this project is primarily an upgrade of the park to improve levels of service only a minor part of the cost can be funded by development contributions and this has been built into the funding model.

Comments:	As a council you have a responsibility to serve the ratepayers by way of providing basic services, water non poisoned, roading, flood protection, river maintenance etc.

	You have taken over the community facilities and made them unaffordable for community groups, these need to be given back to the communities, they are there for the people. The Selwyn District Council has become a controlling entity, your role is to support and care for your ratepayers, not treat us like slaves.
Staff Recommendation	That the submission is acknowledged by Council.

Organisation:	South Island NRL Bid		
Point Number	863.3		

Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	I am a member of a consortium preparing to win an NRL license (National Rugby League for Australia and New Zealand) for a South Island Rugby League Club and teams in the NRL competition. Currently New Zealand only has Auckland Warriors in the NRL. While a South Island bid, the home base is intended to be Canterbury. We have secured support from a range of parties including Rolleston Warriors and all the other Canterbury league clubs, as well as South Canterbury, Otago, Southland and West Coast league associations. Some consortium members are focused on securing the necessary funding internationally and nationally. Interestingly two of the potential investors are based in Selwyn. Christchurch City Council has provided agreement in principle for Te Kaha to be used for “Home Games”. The other part of the consortium is focused on establishing a charitable trust to provide pathways for young athletes and support regional league development. As part of the charitable trust wing we are wanting to meet with and talk to representatives of Selwyn District Council in order to understand what land Council owns that it might be prepared to lease / sell for the purpose of providing a South Island rugby league training facility. The timeframe for building such a facility is 2026. We are asking Council to be open to considering how it might support such an opportunity , as it has done and presumably still intends to do for other sports.
Staff Recommendation	Submission is acknowledged by council. Key staff from council will be liaising with the consortium over the coming months to discuss further.

Point Number	864.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design.

	Project cost: Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** All of these small increases in rates will add together to make the rates bill insurmountable for some house holds,
Staff Recommendation	The submission is acknowledged.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	865.6
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a share Hub/Clubrooms built at the proposed new Tennis & Netball facilities based in West Melton. West Melton Tennis & Netball share the vision to provide an inclusive, nurturing & welcoming community focused environment to develop players of all ages, creating longevity for the clubs & community. What we are asking for is a hub to bring our community together to create a sustainable future of tennis & netball but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the

	following. Tennis nets, tennis poles, tennis balls/trolleys, netball balls, gear bags, hoops & training equipment. The space would require a kitchenette suitable for making tea & coffee and afternoon tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Category	Activity > Planning Further Community Facilities		
Comments:	To put it plain and simply, Selwyn needs a dedicated arts centre. Schools, community theatre groups and even businesses based in Selwyn could capitalize on a venue like this for events such as big major show productions, small scale school productions and other arts centered businesses or business events in general that can utilize the space without having to constantly search and hire out other venues. As someone who is part of the arts scene in Selwyn who does theatre, this would be a great change to have a more central space for all Selwyn arts. Selwyn has the capacity to create such a venue that's even comparable to one such as the rangiora town hall or even the Ashburton event centre. This can create better experiences for those travelling out to come and witness these performances with better equipped facilities and atmosphere. The sporting scene already has enough facilities as it is or enough facilities in the progress of being developed that the priority of this should be lowered. A dedicated arts centre will prove much more beneficial to the wider population of the community rather than the select majority that seems to be favoured all the time. The arts should be at equal standing with sports if not higher as of right now.		

	Sports have the same ability to make connections as much as arts do, if not more. I agree that Selwyn is a sporting-based community, but to funnel so much money into sporting facilities but nothing into arts is abysmal. The long-term plan NEEDS to consider the arts a lot more than just something the community does for fun. We do arts because of passion to perform for people, keep learning and honing our craft as well as form those precious connections both internally within the organisations as well as externally in the community and wider population outside of selwyn. As previously mentioned, sports are very very similar to arts in its beliefs and amount of dedication put towards it, so arts should be thought about much more and in depth. Whats best right now is to consider an arts centre that's dedicated to the people willing to take time out of lives to try and convince you to rethink where the money should be placed.
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.

Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined		

	Funding: To be determined **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP
Point Number	870.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Category	Activity > Planning Further Community Facilities
Comments:	There no plans for a dedicated facility for arts in the long term plan. There isn't any consideration for the performing arts mentioned in the plan at all. The fact that the plan is more focused on putting funding towards another sports complex, which Selwyn does not need, is disheartening for all those involved in the arts. The list is non-exhaustive, but this includes performers, organisers, businesses,

	musicians, technical experts, artists, and all those that aspire to be involved in any these mentioned vocations. The general lifeskills that are taught in sports can also be taught at a much better capacity in the field of arts. This includes coordination, teamwork, self-disipline, punctuality, and passion. The arts has always been a safe space to build self-esteem, and improve your mental health (source:https://tinyurl.com/yky9r67h). Personally, performing in musicals in Selwyn for the past five years has given me the courage to go in front of a hundred people (give or take) and do something outside of anybody's typical comfort zone. It has given me the confidence to quit a toxic job and move into a more stable career. This is something that sports has never been able to do for me. Support the arts, and get plans underway for a dedicated arts facility. Everybody deserves a safe place to be themselves
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.

Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a share Hub/Clubrooms built at the proposed new Tennis & Netball facilities based in West Melton. West Melton Tennis & Netball share the vision to provide an inclusive, nurturing & welcoming community focused environment to		

	develop players of all ages, creating longevity for the clubs & community. What we are asking for is a hub to bring our community together to create a sustainable future of tennis & netball but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Tennis nets, tennis poles, tennis balls/trolleys, netball balls, gear bags, hoops & training equipment. The space would require a kitchenette suitable for making tea & coffee and afternoon tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Point Number	876.7
Category	Activity > Chlorination
Comments:	I wish to highlight the poor water quality and the management of water quality in the Darfield/Kirwee area. High chemical loading for the treatment of the water has been a subject for some time and needs to be rectified. It is an ongoing issue and well documented within the community as being a real problem. We need clean fresh water, not overpowering chemicals and overdosing to keep our water clean. Money needs to be invested in this area.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. Chlorination is a requirement of the Drinking Water Quality Assurance Rules that came into effect in November 2022. The new rules require that we have a minimum dosage of 0.2 parts per million (ppm) in the water when it reaches each property on the supply. The amount of chlorine dosed into the water supply is carefully managed to ensure levels of chlorine in the water people drink are absolutely minimised. This dosage may vary at specific times if it is needed to keep your drinking water safe. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to

	intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	876.8
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	This is a memorial pool and has significant importance to the local community. The features of the pool are attractive with a wonderful aspect. The Darfield pool upgrades have been poorly thought out and criticism indicates a smarter layout could have been considered at no extra cost. The cost of $1M to repair this pool is an over estimation.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** If the current building can continue to be used for next 10 years, maintain and repair as required until the financial position of council is stronger.
Staff Recommendation	The submission is acknowledged.
Point Number	878.3

Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public

	transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** Developing these parks asap regardless of whether NZTA comes to the party with funds is essential. After all, this contributes enormously to reducing carbon emissions, and commuting traffic on our already busy roads. One way to keep costs down to minimum, as in all council projects, is to PLEASE keep designs SIMPLE. We DO NOT need the flashest and best for every project, they just need to be functional and kept well maintained.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Park N Ride sites need to provide a level of service that aligns with the increased bus services including bus parks, shelters of sufficient size, secure vehicle parking, bike stands, lighting and all-weather pavement surfacing. They have to be safe and follow CPTED requirements for potential 24/7 use. This type of level of service attracts increase patronage and use of bus services, which is the objective.

Comments:	Cycleways: More safe cycleways in the area = safety for cyclists & walkers, along with less traffic on the roads.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	880.7
Category	Activity > Chlorination
Comments:	Water: Disgusted that the council is no longer seeking exemptions to remove compulsory chlorination,
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	880.8
Category	Activity > Potential Requirements To Fluoridate
Comments:	and very definite NO to any fluoride in our water when it is only beneficial to a very small sector of the population.
Staff Recommendation	The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.
Point Number	880.9
Category	Activity > Other Categories identified by Staff > Waste Management
Comments:	Organic waste bins should not be compulsory for those, like us, who deal with all our waste by recycling it back into the soil.
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. We do acknowledge that this is an additional unwanted burden for those who already compost their own food scraps and garden waste at home. This regulation is outside of Council's control. The Ministry for

	the Environment has issued a directive that households in all urban areas with a population of greater than 1,000 residents must have a food scraps/organic collection by 1 January 2027. Every Council in New Zealand is obligated under the Waste Minimisation Act to comply with this.
Point Number	880.10
Category	Activity > Other Categories identified by Staff > Road Safety
Comments:	Roading: Fix problems once, and fix them properly - the standard of many repairs is very poor and requires higher standards to be set.
Staff Recommendation	Submission is acknowledged by Council. Catching up on renewals deliverers value for money in pothole prevention.
Point Number	880.11
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	Recreation: I strongly urge the Council to urgently look into purchasing the nationally and internationally recognised property - Broadfield Garden - for the benefit and pleasure of Selwyn residents, along with the many hundreds of national and international visitors who visit this 6 star garden. The property is currently for sale, and it would be criminal to lose it to developers or a private owner thus losing it forever. This is a far better proposition than creating a completely new park/gardens on Levi Road - the cost for this would be mind-boggling and on-going, and would not even resemble a park for at least 15-20 years. Broadfield is over 25 years old and it's a case of walk in and enjoy right now. I suggest the councillors all visit this venue asap, and arrange a discussion with the creator - David Hobbs, to appreciate just how valuable the garden is to the region. Little would have to be done to make it up to public standards - e.g. toilet block - (perhaps composting toilets) and maybe an extension of the cycleway from Rolleston/Lincoln cycleway enabling walkers and cyclists easier and safer access.
Staff Recommendation	Staff acknowledge the quality and significance of Broadfield Gardens and the opportunity it presents as a formal garden to complement the existing open spaces. However, the proposal does have some costs and risks that need to be weighed up alongside other options. This includes the cost of purchase (and how that could be funded), the cost of additional infrastructure to enable public use, the on-going cost of maintenance and potential revenue

	opportunities. There are also some limiting factors such as proximity, accessibility and connectivity. It is noted that Council is considering development of a formal garden at the District Park as part of stage 1 development: that would focus on 3 main types or components of formal gardens: botanic plantings (including natives, exotics and floras); sister city garden opportunities; community gardens. Although the acquisition of the garden presents an opportunity for Council to provide a special area of open space that is not replicated anywhere else in the District, staff are of the view that the proposal is difficult to support at this time given the costs and other factors mentioned above. Staff recommend that Council does not purchase Broadfield Garden at this point in time but considers what other mechanisms are available or support it could provide to retain the garden for the district's benefit.
Point Number	880.12
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	I think council would be pleasantly surprised to find how many groups and individuals would welcome this national treasure becoming a permanent asset of the Selwyn area. There are many options open too for future uses - functions (eg. Spring Fling), weddings, practical workshops, maybe eben a community vegetable garden etc. - so many ideas.
Staff Recommendation	Staff acknowledge the quality and significance of Broadfield Gardens and the opportunity it presents as a formal garden to complement the existing open spaces. However, the proposal does have some costs and risks that need to be weighed up alongside other options. This includes the cost of purchase (and how that could be funded), the cost of additional infrastructure to enable public use, the on-going cost of maintenance/operations and potential revenue opportunities to offset costs. There are also some limiting factors such as proximity, accessibility and connectivity. It is noted that Council is considering development of a formal garden at the District Park as part of stage 1 development that would focus on 3 main types or components of formal gardens: botanic plantings (including natives, exotics and floras); sister city garden opportunities; community gardens. Although the acquisition of the garden presents an opportunity for Council to provide a special area of open space that is not replicated anywhere else in the District, staff are of the view that the proposal is difficult to support at this time given the costs and other factors mentioned above. Staff recommend that Council does not purchase Broadfield Garden at this point in time but considers what other mechanisms are available or support it could provide to retain the garden for the district's benefit.

Point Number	880.14
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	Re use of Levi Road property - Yes to more playing fields, but in lieu of park/gardens why not a camping ground for those who are not MHA members, playgrounds areas, a Mini-golf course (I'm sure there could be private businesses interested in creating this), Disc golf (be one of the 1st in the area). The list goes on, and if put to the public, I am sure there would be many many new ideas. The purchase of this invaluable property fits so well into the purpose and aims of the Council to improve "social, Economic, Environmental and Cultural well-being" of it's residents and communities. I implore the council to act fast on this, and consider the importance of maintaining it for public use.
Staff Recommendation	Council acknowledges the submission. The submitter provides support for the speedy development of the park including sports fields and has provided some further ideas on facilities and features that can be considered for the District Park development in Levi Road, Rolleston. It is noted that around 1600 submissions were received from the community on ideas for the park and these have been assessed to ascertain the likely developments for the first stage of the park. The ideas put forward by the submitter can be passed on to the project team for consideration in developing the plans. A significant budget has been included in the draft LTP to progress development of this park.

Comments:	Lincoln township should be upgraded.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	881.11
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a share Hub/Clubrooms built at the proposed new Tennis & Netball facilities based in West

	Melton. West Melton Tennis & Netball share the vision to provide an inclusive, nurturing & welcoming community focused environment to develop players of all ages, creating longevity for the clubs & community. What we are asking for is a hub to bring our community together to create a sustainable future of tennis & netball but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Tennis nets, tennis poles, tennis balls/trolleys, netball balls, gear bags, hoops & training equipment. The space would require a kitchenette suitable for making tea & coffee and afternoon tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.
Point Number	881.12
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	The proposed alternative for swimming for the wider Sheffield community is the Darfield Pool. This facility is currently too small for the community as it is. This year there were days when it wasn't open to the community because of booked groups. Expecting to add

	the wider Sheffield community to this group will only increase the over crowding or worse, prevent people from even attempting to learn to swim. This would be a poor outcome. Upgrading the Sheffield Pool is a much better short term option until the council is able to invest in a much larger central option for the community.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** In your own documents you pointed out "the need to be cautious about decision-making in the face of uncertainty..." and I agree with this sentiment. This item is not a high priority considering the impact on rates. Also you are keen to make Selwyn more "self-sufficient" in areas like employment which if achieved would reduce the need for extended travel on public transport to say Christchurch City. In the current climate Government funding through NZTA is definitely uncertain and is likely to be focused on maintaining/replacing existing assets.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP
Point Number	882.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

	Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** I believe in the current financial climate Council should be "cutting its cloth according to its means". The difference in cost between repairing the existing building, with hopefully some refurbishment, against any of the other options is very large. The need to do more work to the building to meet earthquake requirements is after 2035 so there is no need to renew this building within the timeframe of the proposed LTP.
Staff Recommendation	The submission is acknowledged.

Comments:	The section in the consultation document on Significance and Engagement just says you are going to change but doesn't actually tell us in any detail what you are proposing to change - so don't see how I can comment.
Staff Recommendation	Council acknowledges the submission and notes the concern with the level of information provided. Improvements regarding the presentation and provision of information will be considered for future consultations.
Point Number	882.9
Category	Activity > Other Categories identified by Staff > Rates
Comments:	In the Financial policy points - as we ratepayers generally receive increases in income in line with CPI whether by wage increases or

	superannuation increases, it would be more acceptable if the Council could restrict its increases in rates to a CPI uplift and find all other income that it wants to spend on projects for other sources. You cannot expect people to respond well if you tell us we will have to pay 15% more in rates - this is unaffordable for many and therefore unacceptable.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	882.10
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	On the climate change front. I believe this topic is perhaps top priority for Council especially mitigation of the impacts. Many people are concerned about the large increase in building sites in the Rolleston and Lincoln areas and the impact on stormwater management. We know that climate change will bring devastating volumes of rain in short periods of time and the prospect of flooding is very concerning. Before Council spends funds on "nice-to-haves" it should be ensuring we are well protected from flooding.
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. Council is developing a Future Selwyn Strategy that looks beyond the 10-year horizon to consider how we can respond to these challenges. The Council is also developing an Emissions Plan and Sustainability Plan to identify actions into the future.
Point Number	882.11
Category	Questionnaire > Policy Changes > Policy Review - Other

Comments:	In terms of Maori contribution to Council decision-making. I agree Council should seek to clarify and publish the processes whereby Maori and other relevant groups are involved in having input to decision-making and that such policies will be aligned to any new legislation from the current Government.
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognizes the importance of partnerships; building strong partnerships with iwi is vital for Council to fulfill its obligations to the entire community. Te Tiriti O Waitangi (Treaty of Waitangi) is a founding document of New Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with iwi, to have any meaning, requires consideration of iwi position and contribution to discussion/debate.
Point Number	882.12
Category	Activity > Strengthened Partnerships
Comments:	A few comments. Regarding strengthening relationships with mana whenua, while I agree in principle, I have difficulty with anyone from any community group having voting rights at Council decision-making that are not elected as part of the normal election process. I believe all council members should be accountable to us the ratepayers at large for any decisions made and what I see in Selwyn's case does not seem fit with that. I may have the wrong impression so I feel it would help if there was greater transparency on this topic. I would be interested to know what the $300,000 Partnership and Participation funding is used for and also whether Council spends any funds on initiatives with other groups to help build the "platform for being a good host for multiculturalism".
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognises the importance of supporting Iwi participation. Council is committed to ensuring inclusivity and that ensuring everyone has an opportunity to participate. Council considers this can lead to better outcomes for the whole community. For example, Iwi knowledge about local environments can be invaluable in planning and resource management projects. Council is trying to ensure Iwi contribution counts by including Iwi in decision making on its committees. The current arrangement at Council meetings allows Iwi participation in the discussion, but at a Council meeting the Iwi representation does not have voting rights.

Category	Activity > Other Categories identified by Staff > Infrastructure Property General
Comments:	I completely agree with the focus of maintenance of existing assets. My own career has been in this area and I have seen many cases where cutting maintenance to save cost has resulted in failed assets and the need for early renewal / replacement. Again, a responsible approach to use of funds to keep services operational is preferable to more projects. Under the section on Strategic Investment Strategy I like the idea that you are looking at alternative options for generating income outside of rates. As mentioned in the previous section ratepayers cannot be seen as a source of ever-increasing funding demands.
Staff Recommendation	Submission is acknowledged by Council. Asset management and operational improvements ensure this.
Point Number	882.14
Category	Activity > Other Categories identified by Staff > Growth
Comments:	One last point, quite a number of us feel that Council has allowed excessive growth in Lincoln which has spoilt its character. As residents for 10 years we have seen Lincoln change from a lovely rural village atmosphere with the added character of the University to a busy township where you can have trouble getting out of a side street. Now another 1700 sections are to be added and I understand sets of traffic lights along Gerald street that will not enhance the character of the place which you have often stated you wish to retain. Surely some better control of growth could have been made by the Council and perhaps avoid having to spend $45M on the town centre. Why are you always hell-bent on growth? We are not a business in competition with others but people trying to build a community.
Staff Recommendation	Population projections are not predictions, rather they indicate probable outcomes based on assumptions. A key assumption for the Long Term Plan is the population projections. As each town grows, there is a need to understand its future, as well as upgrade its infrastructure. This is generally done through Strategic and Spatial Plans. However, as growth continues to exceed the projections, more projects are needed quicker to meet this growth.

Submitter Number:	884	**Submitter:**	Kim Churton
Point Number	884.2		
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities		
Comments:	he West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a shared Hub/Clubrooms built at the proposed new Netball & Tennis facilities based in West Melton. West Melton Netball & Tennis share the vision to provide an inclusive, nurturing & welcoming community focussed environment to develop players of all ages, creating longevity for the clubs and the community. What we are asking for is a Hub to bring our community together to create a sustainable future of Netball & Tennis but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Netball Balls, Gear Bags, Hoops, Training Equipment, Tennis Nets, Tennis Poles, Tennis Balls and Trolleys. The space would require a kitchenette suitable for making Tea & Coffee and Afternoon Tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.		
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored.		

	The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Staff Recommendation	Submission is acknowledged by Council.

Point Number	886.8
Category	Activity > Other Categories identified by Staff > Rates
Comments:	SDC need to trim its budgets and limit its expenditure like all households are doing, and stop keep treating ratepayers as bottomless money pits. Exceeding the rate of inflation is an action that impoverishes citizens and should not have legislative support. Furthermore, farmers who are unfairly rates should not have to bear the heaviest burden in this urbanization.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	886.9
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	The links to these pages only permit access to pages 33/34 so 54/55 not accessible.
Staff Recommendation	Council notes the concern regarding the level of information provided. However, it is noted that others have been able to access the document but improvements regarding the presentation and provision of information will be considered for future consultations.
Point Number	886.10
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	How much of the 1 Million is contestable and could savings be made. Once community resources such as this are removed they are unlikely to ever be replaced. We want more people learning to swim, not fewer.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified.

	The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	886.11
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Not if it involves extravagant use of precious resources that benefit a few at the cost of the many.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	886.12
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	This lacks sufficient detail - exploring effective technologies is what management should be doing generally without huge budgets - again, 'essentials' not 'nice to haves'.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Comments:	**Question:** Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	887.8
Category	Activity > Planning Further Community Facilities
Comments:	the updates to the prebbleton community and minimal at best. All funsing is located to other areas and the council does not wven care to upkeep our beautiful lights due to the cost. Therefore i do not believe the council even listens to its community and im sure this submission will make no difference
Staff Recommendation	The submission is acknowledged. Plans for a new Prebbleton Community Centre are still included in the current Long-Term Plan.
Point Number	887.9
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	we should update these as required but i dont believe we should be making changes that are not necessary or enforced
Staff Recommendation	Submission is acknowledged by Council.
Point Number	887.10
Category	Questionnaire > Matters For Community Guidance > Digital Solutions

Comments:	I do not believe this is required at this time to serve the people effectively
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Point Number	888.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51%		

	Our budgeted option **Comment:** Please work with ECan to develop a better bus service between West Melton and Christchurch and to connect West Melton to Rolleston as West Melton's population grows. the single bus we do have is already standing room only - some of the Christchurch schools using this service could be asked to provide their own service to enable workers to get in and out but we also need more buses for commuters to use the bus as an option.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Environment Canterbury is responsible the 86 direct to city Metro service, while the Ministry of Education provides School bus services. Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service such as linking West Melton to Rolleston.
Point Number	888.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

	Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Staff Recommendation	Submission is acknowledged by Council.

Submitter Number:	889	**Submitter:**	Details Withheld
Point Number	889.2		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	Upper Selwyn huts settlement are paying for a pipeline should be under the DWR, if the residence pay for it, we should be allowed to stay for longer than 15+ years USH is a Historical Selwyn District settlement history is important to all of us, and the Selwyn Area. One of the earliest settlements, imported fish into River. They are part of all history of settlements around the lake. Council have claimed that The Lake Settlements will NOT be effected for 25+ years with Climate Change. Leave the settlements until then and reassess. Seems that Climate Change is used as a excuse to be used for all areas around water, to be used for a reason.		
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.		
Point Number	889.4		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	1. Historical value		

The Mayor says in the Long Term Plan that "we're focussed on looking after what we already have" - how about you look after us!
An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council unanimously determined that 'Hut licences and subsequent renewals are short term and ultimately for a finite period' . At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts.
We need to submit requesting this historical significance be recognised and for the Selwyn Huts to be listed as an historical site on the District Plan and for the term for us being here to be extended to protect this history.
2. District wide rates
Everyone needs to submit on the LTP asking for us to be put on DWR for Water and Sewer.
The reasons being :
(a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequant upgrade, the requirement we were told for being put on DWR.
(b) We have already paid for the water upgrade.
(c) We should not be discriminated against and should be treated like everyone else in the district.
(d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We should also be added to the DWR for Sewer and Water like everyone else.
(e) Towards25 LTP Document stated:
"The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities."

	This document also has USH specifically listed in the “Proposed district-wide rate for urban water compared with existing targeted rates” table. From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston. (f) Buddle Findlay’s Legal Opinion dated 04/03/2019 states “We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community.” (g) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn’t find the full amount. This was proposed in 4.12.4 of the “Upper Sekwyn Huts Future Occupancy Strategy” report dated 04/03/2024. (h) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners. (i) Additionally we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** If Waka Kotahi pull their funding, maybe continue to research cost and options and spread the funding to implement. I think we need to encourage the use of public transport, but their needs to be some improvements made to ECAN's timetables for the direct routes to support this spend. e.g. I start work early and leave early for school pickups, the direct service does not support this and makes it quicker to bike or drive
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Environment Canterbury provide PT Services. If the NZTA Waka Kotahi decline to further fund the implementation of 2020 Greater Christchurch PT Futures Plan then the GC partnership will have a serious issue to consider.

Point Number	890.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Comments:	**Question:** Do you support the continued development of an economic development strategy? Yes **Comment:**
Staff Recommendation	Submission is acknowledged by Council.

Point Number	890.7
Category	Activity > Planning Further Community Facilities
Comments:	Prebbleton Community Centre - could this be built alongside any future school in Prebbleton, then residents could have access to a library and full sized court when school is out?
Staff Recommendation	The submission is acknowledged. A new community centre for Prebbleton has been in considered in earlier Long-Term Plans and was previously signaled for construction in 2025/26. A needs assessment study was undertaken in 2023 which concluded that there was demand for a facility to service the community, and that it should provide a mix of social, community gathering and recreation spaces. The study further concluded that the facility needed to be located so it was easily accessed by the community. As there are uncertainties about the best site for the facility and the activities that it will cater for, further planning and community consultation is needed. To enable time for the necessary planning to happen, the project has been programmed for 2026/27 to 2027/28.
Point Number	890.8
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	Christchurch City Council have a new Urban Forest Plan that encourages tree canopy cover as well as Urban Forest Patches (native forest of a certain size). Could Selwyn move toward something similar, or at least have a policy where they plant 2 trees for 1, and have a budget to plant trees on road berms etc. to increase canopy cover. Look at the successful Tree story at Melbourne City.
Staff Recommendation	Staff support the submission because work is already underway on reviewing the Tree and Vegetation Policy with a view to retaining and increasing tree cover. In addition to this work the Blue-Green Network Plan which forms part of the Future Selwyn work programme will be promoting tree cover targets in the urban setting. In anticipation of this work and also as a measure to reduce the impacts of climate change (more planting reduces heat in urban areas) an urban greening programme has been included in the draft LTP. Staff recommend that work continues on the development of policies and plans that are focused on retaining and increasing vegetation cover in urban environments and that support is given to the Urban Greening Programme included in the draft LTP (total $775,400 over 10 years from 2024/25).

Point Number	890.10
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	When accepting subdivision plans - need to consider connection to wider community. Nearby we have Toswill Rd, and there is no drop down kerb on Prebbleton Domain side of road. This makes it tricky to cross when rugby is on, as there is no space between cars parking and its hard for small children to safely ride bikes/scooters. A refuge would be great too.
Staff Recommendation	Submission is acknowledged by Council. Staff will consider the suggested improvement for Tosswill road.
Point Number	890.11
Category	Activity > Walking and cycling improvements
Comments:	We also have a beautiful storm water path that is missing connections into the main shops, would be a great walk if it did. And some intersections have poor visibility as the wider area has not been considered. Thanks for all that you do :)
Staff Recommendation	Submission is acknowledged by Council. Council has a footpath extension program to cover missing links. Transport staff has recorded this for future consideration. Projects are prioritized within annual budget allocation.

Submitter Number:	891	**Submitter:**	Details Withheld

Staff Recommendation	Submission is acknowledged by Council.
Point Number	891.4
Category	Activity > Lincoln Town Centre Upgrades
Comments:	Transport - Lincoln town center and links to the town center and local amenities need to be update to make travel around the area safer.

	We live in Verdeco and to get any where in Lincoln we have to cross Springs road which is very unsafe especially when we are walking and biking and made worse when are with our children. A large proportion of the cars dont do the 50 speed limit down Springs road, there are no safe crossing points and no footpaths at times between Verdeco and the university. To have a pedestrian crossing or an island to allow safer crossing of Springs Road would make things safer. For residents in Verdeco Springs road is needed to be crossed to get to everything - all preschools, schools, playgrounds, shops and it needs to be made safer to do so especially with the planned new subdivision and the increase in traffic on an already very busy road that this will bring.
Staff Recommendation	The Upgrade of Gerald St will improve footpaths and provide cycle lanes. Council is aware of the issues with Springs Road south of Gerald Street. Some upgrades to provide safer crossing points are part of outcomes developers are required to provide such PC69. Council has budgeted for footpath extensions and links for Springs Rd further to this but it will need to review the situation as these developments are staged.

Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	I can't see why rating of "Maori freehold land" should be any different from freehold land owned by non-Maori. Why single out a particular section of the population? What this means is that rates for the rest of the population will be higher accordingly.
Staff Recommendation	Council acknowledges the submission. Council is required by s 108 Local Government Act 2002 to have a policy on the remission and postponement of rates relating to Maori freehold land. When developing this policy staff have considered its position regarding rates postponement and remission based on these legislative requirements.
Point Number	892.9
Category	Activity > Lincoln Town Centre Upgrades
Comments:	My main comment is: Please keep in mind "nice to have" vs "must have" and "important to have." They are 3 different approaches. Major on the latter two. In particular, the "upgrading" of Gerald Street. I am a pensioner who has recently moved into Liffey village. However I am familiar with Lincoln through working here for many years. My recent impressions that Lincoln retains its "villagey" feel, despite significant housing developments in numerous directions. My observation of people movements and commerce in the main shopping precinct end is that it is an area where residents wish to park, pop into a shop/business, and out again. It is not an area where a "pedestrian mall" with no traffic is warranted or needed. There are plenty of eateries where people can socialise inside and outside. Extra outside spaces are NOT NEEDED, particularly bearing in mind the colder months of the year and cooler winds year round. Gerald Street is an essential thoroughfare through to New World, and all the businesses along it. Any "development" that interferes with the traffic flow would be an unnecessary backward step for the population I believe. In particular, older residents do not need the dubious benefit of having to park in a back street in order to access cafes, post office, pharmacy etc.

	Please consider this proposal in terms of "need to have" vs "nice to have." I am not in favour of the expenditure of the $millions in the proposal in the LTP. At the very least, re-examine and pull back on the expenditure.
Staff Recommendation	Of the $46M for the upgrades that includes improving amenity aspects, $36M is related to core infrastructure works that are necessary anyway to address a failing carriageway and other near end of life assets like kerbing and footpaths. This also includes the signalization of the 4 key intersections necessary to cater for the expected traffic volumes and safety needs. Council is considering options for the eastern town center upgrade that will need to strike a balance to still provide for through traffic on this arterial route along with improving the overall amenity of the area to make it safer and easier to move around by pedestrians and cyclists while supporting local businesses.
Point Number	892.10
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	$9 million is a lot of money. What are the businesses contributing? It is so easy to waste money on consultants, plans and reports etc. All things "business" tend to assume millions will be involved, which do not necessarily benefit the ordinary rate payer. By all means have an "economic development" strategy. But KEEP THE COSTS DOWN.>
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and Council will consider their feedback in strategy action planning.
Point Number	892.11
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Better technology, Yes. But why does it need to be an ongoing cost each year? It is all too easy to budget "ongoing" costs - but are these really necessary?

Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Point Number	893.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:**		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council		
Point Number	893.2		

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** This is a poor use of funding.
Staff Recommendation	The submission is acknowledged.
Point Number	893.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the

	loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do nothing. Use the existing park facilities and remove or replace old and unsafe items in the park. **Project cost:** Year 1: $143,000 **Estimated impact on rates:** Included in our current rates **Funding:** Rates: 100% **Comment:** This is a poor use of funding.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1
Point Number	893.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes two indoor courts. **Project cost:** Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million) **Estimated impact on rates (per year):** $19.91 **Funding:** Rates: 57% Development contributions: 43% * **Comment:** Good investment, do it right first time.

Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	893.8
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Stop putting the financial burden on ratepayers when it's clear SDC doesn't have the fiscal responsibility required to manage the funds.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	893.9
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	I don't believe any success from these ventures will reduce rates, so therefore rates should not be used to fund these ventures.

Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	893.10
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	This is far too vague a statement to spend $1.3M on.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22		

	Funding: Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:** I believe Leeston is long overdue this facility so I am in strongly favour of Option 2 as I am hoping that as it is the favoured option by the SDC this might mean that progress in implementing the plan will be faster. At the moment we are very poorly served in terms of community spaces especially for community activities such as exercise/dance/hobby and other larger gatherings. Leeston's population is growing so there are more younger families needing better community facilities but also we have a significant proportion of older citizens who do not always have the means to travel to other Council hubs for such activities. This also applies to parents at home with young children - it's essential for the health and wellbeing of citizens to be able to access such resources in their own communities, especially as we should be trying to lower our use of private vehicles. A true hub for the community, the use of which is not contingent on sharing use ,for example with the high school ,is essential for a community's physical and mental wellbeing and to strengthen a sense of community.
Staff Recommendation	The submission is acknowledged.
Point Number	900.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development

	contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Carry out the upgrades detailed in the Leeston Park Master Plan over 15 years, including new pathways, carparks, toilets, park furniture, sports field lighting and irrigation, trees and plants, playground extension and upgrades, and park extension and signage. **Project cost:** Years 1-15: $9.49 million **Estimated impact on rates:** Years 1-5: $10.23 Years 6-10: $6.05 **Funding:** Rates: 71.4% Development contributions: 28.6% * **Comment:** My reasons for supporting option two are similar to those relating to the community centre. Again, I feel work on Leeston Park is seriously overdue so by opting for the scenario favoured by the SDC I'm hoping that work can begin soon. The park is extremely neglected in terms of planting (a mix of poorly maintained, ill chosen and simply scruffy trees), there are few places for people to sit, and compared to, for example, Rolleston, the playground is decidedly inferior. To my mind the children of Leeston are extremely poorly catered for compared to those in Rolleston. They deserve better both in terms of size of playground, safety measures, and exciting and interactive playground equipment and landscaping. I have visited almost all the playgrounds in Rolleston and the comparison with Leeston is, frankly, stark. Dogs, comparatively, have a better park in Leeston than our children.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 3 and staff support the submitters view that the park is outdated and in need of an upgrade.

Comments:	**Comment:** I do want to strongly advocate for Leeston's ongoing development, specifically with Waihora Whata Rau and Leeston Park as outlined in the Long-Term Plan. I don't believe that we have 'rights' to community and other facilities as such as overall we are fortunate to live in a comparatively wealthy nation and region where we enjoy so many services most of the world still does not have. But, at the same time, as ratepayers, I do believe we should be able to see equivalent, and population-appropriate benefits for our community that other centres in Selwyn have We are a growing community and an attractive town with quality facilities and recreational areas will ensure more people move to the area, which ultimately means more rates for the council and contributes to a vibrant healthy district and a thriving and happy local community.
Staff Recommendation	The submission is acknowledged.

Category	Activity > Lincoln Town Centre Upgrades
Comments:	Over the last few years the increase in pedestrian, cycle and scooter traffic on the pathway from Heathridge & Rosemerryn has led to the rapid degradation of the grassed reserve area surrounding the Cottage, particularly under the oak tree, until it is now bare ground. While the awful visual impact on this heritage gem is obvious, the dust is a serious problem for both the heritage collections within the cottage, and the cottage itself.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	901.6
Category	Activity > Lincoln Town Centre Upgrades
Comments:	SDC should proceed with the plan, with a focus on increased safety at intersections and throughout for pedestrians and cyclists. Of real concern is the impact on infrastructure of subdivision already underway, and that proposed, on main access routes, Springs, Birchs and Ellesmere Roads. Additionally, what will be done to a. Protect the heritage settings of St.Stephens Anglican Church, Coronation Library/Down by the Liffey Gallery, and Liffey Reserve areas during and with the installation of traffic lights at the James St./Gerald St. intersection b. Retain the open view to Pioneer Hall and Liffey Reserve backdrop, from Gerald St. What impact will the proposed

	street fronting shops (adjacent to The Famous Grouse) would have on Pioneer Hall? Shading? c. What will be the impact of traffic backing up on Edward St during peak morning traffic flows? d. What will be the impact on East Belt of traffic diverting to avoid lights/backed up traffic? East Belt is a heavily used school parking and drop-off/pickup area e. Lower speed limits within the centre of Lincoln f. Will the Christmas Parade and Pageant be impacted/improved by the changes?
Staff Recommendation	A series of signalized intersections will be included along Gerald St as these are safest control to accommodate traffic, pedestrian and cyclists and related cycle lanes. The widening and safety upgrade of Ellesmere Road is included early in the draft LTP. Council is aware of the heritage and other cultural aspects that will need to considered in the design for the area for the planned traffic signals at Edward St and James St. Council may need to consider closing to through traffic the likes of East Belt but this will be investigated and modelled closer to the time in relation to the design of the traffic signals and options available. Lower speed limits are part of the plans. The Christmas Parade will not be impacted by the competed projects.

Comments:	The proposed Lincoln Rotary project to mark the site of the Lincoln flour mill, near the Ryelands weir, with a replica waterwheel, seating and interpretation panels. It will be a great addition to the Lincoln Township Trail. Strongly supported.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	901.10
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	Springs Water trough (Heritage item H324) The trough is a significant local heritage item, with links to both farming activity of

	The Springs Station and local engineers, Pearson Brothers, who made it c. 1907 **Strongly recommended that it is protected before the development of this area begins, and that it is recognized on site as a heritage feature (history panel, fencing, local sculpture?)**
Staff Recommendation	Selwyn District Council acknowledges the importance of promoting and protecting heritage as it improves community wellbeing by connecting people and building the identity of Waikirikiri Selwyn. The Selwyn Strategic Heritage Plan 2023-2027. ensures there is a focus on improving support for heritage activities and supporting the work of local history groups and residents who are strongly motivated to collect, protect and enhance local place-based heritage. Council has two community heritage funds available: the Community History Fund, which is to support kaitiaki (guardians, conservators, and protectors) communities and community groups for various history projects (and the operating costs of community history groups); and the Heritage Protection Fund which is to encourage and assist owners with work required to maintain and enhance heritage buildings in the District as well as work required on protected trees.

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Sheffield Swimming Pool is an important War Memorial and a much loved Community Institution. It provides families and individuals an opportunity to engage in a recreational activity and maintain relationships in the community. It also provides our children the opportunity to learn to swim and learn water safety which is a vital life skill. Sheffield School provides excellent daily practise in this area. It is within walking distance for many residents, and is an important community meeting place. Sadly local waterways are not always a safe swimming option. I am hopeful we can reach a suitable solution and ask that by keeping the pool open for the 24/25 season, this may allow our community time to explore options and make a plan, so that no one misses out. Thankyou for the opportunity to have a voice and I look forward to seeing the community and council work together on this issue.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46

	Funding: Rates: 100% **Comment:**

Point Number	906.2
Category	Activity > Planning Further Community Facilities
Comments:	The Reason why the arts specifically are important to me is because it's my sense of escapism. It gets me out and about to meet new people that have similar interests to me. It keeps me sane and keeps me from metaphorically pulling my hair out because I have places to be at night to stimulate me instead of twiddling my thumbs in boredom. The Reason why more needs to be included for the arts within the Selwyn District is not only because of the people that put their heart and soul into their craft whether that be from performing on stage or rigging the lights and moving props on stage, but also because the people of the Selwyn District would very much get a kick out of seeing a well produced Concert, Play, Musical etc and in turn this would help out many local businesses in the area also that provide hospitality to the residents of the Selwyn District.

Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.

Had the planners looked further ahead we could have had a better library in Rolleston, located in different place (not among retail shops) and of a larger scale ... now we currently have a flash looking building that is impractical and limited in size and services along with access and parking and landscaping that is using outside space. Larger is sometimes better and prevents ongoing consultation and further development..... look at the aquatic centre, too small to start with and it's already undergone improvements for capacity. Foster Park and parking there is another example of too little planned for.
Staff Recommendation	The submission is acknowledged.

Again, I believe there is too much attention to duplicating what is already available in Selwyn.
Staff Recommendation	It is acknowledged that the submitter has selected Option 2, build the community recreation and sports facility at Darfield that includes one indoor court.
Point Number	907.8
Category	Activity > Strengthened Partnerships
Comments:	**Strategic Relationships :** While strengthening relationships and partnerships with mana whenua may bring some value, there are many cultures in the district and their voice should be heard to host multiculturalism.
Staff Recommendation	The submission is acknowledged. Biculturalism is generally recognised as positively impacting multiculturalism in several ways including reducing stereotypes, promoting inclusivity and enhancing cross-cultural communication. Biculturalism in New Zealand demonstrates the commitment to the Treaty of Waitangi and contributes to the well-being of both cultures as well as supports and strengthens the wellbeing of the broader multicultural environment.
Point Number	907.9
Category	Activity > Chlorination

Comments:	**Clorination of water** continues to leave fowl taste in our household and one wonders had planning been done some time ago would we be needing it today.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	907.11
Category	Activity > Walking and cycling improvements
Comments:	I am astounded to learn there has been a long standing ambition for a cycle trail to connect with Arthurs Pass and others... more feasibility studies... I am not one sees connecting with the outdoor character as being remotely important when other projects need far more attention.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	907.12
Category	Activity > New Public Transport Services
Comments:	I also read of Lincoln's upgrades...another budget blowout... more cycle and walkways...it all sounds great but it will not help me get from Rolleston to another area and with the continued approval of more and more houses people will continue to need to drive. Please improve transport and worry about walking and cycling tracks later on when we are not under so many financial constraints as ratepayers.
Staff Recommendation	Submission is acknowledged by Council. The Gerald St upgrade consists of more than just providing cycling facilities which are explained in the 2016 Lincoln Town Centre Plan. There are existing metro bus services such as the 820 that link from Burnham to Lincoln that includes Rolleston. Environment Canterbury is considering developing a business case for additional direct services for Rolleston and Lincoln in 2024-27 and improving the frequency of

	other key Metro PT services such 5 (Rolleston) and 80 (Lincoln) is also being planned.
Point Number	907.13
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	**Financial :** As a ratepayer this is one of the greater concerns.... not how many flash playgrounds, libraries, gardens, cycleways, trees and plantings, sports fields or buildings that can be provided. Nor how many more houses can be crammed into Rolleston and the outlying areas. Please take consideration for those living in the district who came here to retire.... superannuation income does not provide for a fancy frills lifestyle and the pushing up of land values and extravagant council spending makes one consider if this was a good place to come to after all. I do not believe aiming big to be big means better.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	907.14
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	On reading it sounds very bureaucratic and repetitive and a waste of ratepayer money that should and could be spent better. Consultation and ongoing reviews of policies seems extravagant. Do we really need a whole lot of meetings and people to consider climate change plans....why can't councils work together on one plan.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	907.15
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Comment:** Park and rides may be good but if you can't drive to park in the first instance, isolation moves in all because there is no transportation locally.

Staff Recommendation	Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service. The Park N Rides will be linked to Councils major cycleway networks were possible.
Point Number	907.16
Category	Activity > New Public Transport Services
Comments:	There has been too much talk and little action in the 7 years I have lived in Rolleston. Transport must get off the starting block so we can move around Rolleston and get to Christchurch without any more delays. More buses around Rolleston, particularly for school and sports travel, can only help in getting people out of cars. If I want to be able to get to ChCh or if I need to go to a hosp appointment, I need to be able to firstly get to a bus that will take me to the city. The outer areas of Rolleston have been forgotten by the planners. Transport has been forgotten and the greed of developers wanting to make money and build houses has superseded.
Staff Recommendation	Environment Canterbury who provides Metro Bus Services, needs to undertake more regular service reviews in Selwyn to take account of urban growth. Council on its part ensures that major new roads and intersections that are provided by developers in new subdivisions can support future bus routes and services should they be funded and introduced by Environment Canterbury in the future. Environment Canterbury and Council will be investigating 'On Demand' Services as another option within larger townships.
Point Number	907.17
Category	Activity > New Public Transport Services
Comments:	**Transport :** Why does this cost so much to prepare a business case.... sounds like repeats of previous correspondence and yet little results to date.
Staff Recommendation	The preparation of business cases to obtain funding have to conform to the requirements of the NZTA Waka Kotahi.

Comments:	Duplication of a facility again
Staff Recommendation	It is acknowledged that the submitter has selected to close the Sheffield Memorial Pool.
Point Number	907.20
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	I believe the business community's development would benefit if operated outside of Council.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.

Point Number	907.21
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	With so many other costs, I believe this should occur naturally within the organisation and not be allocated funding as a specific project.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Submitter Number:	908	**Submitter:**	Details Withheld
Point Number	908.4		
Category	Activity > Other Categories identified by Staff > Speed Management		
Comments:	We have made this request previously that the speed through Kirwee Township be reduced, and 60 kph would be sensible. As you know when a speed limit is 70 kph the boundaries are always pushed. This is a busy stretch of road and at Kirwee Challenge there are over 430 post boxes (Kirwee does not have postal delivery) and therefore the Kirwee Challenge is visited by numerous community members every day. An added advantage would be a roundabout at the corner of State High 73 and Courtenay Road. This would slow the traffic through the township. The traffic at the stop sign of Courtenay Road and SH73 has been monitored regularly by Kirwee Community Association members at different times of the day and year, and the results are horrendous with regularly in the vicinity of only 50 per cent of the traffic stopping.		
Staff Recommendation	Submission is acknowledged by Council. Speed limits on State Highways are managed by NZTA. Council has made submissions supporting the speed reduction through these locations.

Category	Activity > Other Categories identified by Staff > Rates
Comments:	Capital spending – as per the article on One News, the Minister has warned councils to prioritise the must haves over the nice-to haves. We recommend that the council cease all capital expenditure for the next three years and concentrate on completing all current works already in the current Long-Term Plan. By taking this stance this would reduce the need for significant rate rises over the next three years.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	908.6
Category	Activity > Walking and cycling improvements
Comments:	The Kirwee Community Association would like to see a footpath from the corner of High Street up Tramway Road to the entrance of where the new carpark into Kirwee Reserve is going to be. Many people in Kirwee go walking through the Reserve and do a circuit, and having a footpath to walk on would be a great addition. We are not sure whether a footpath along Tramway Road is included in the upgrades set down in the Kirwee Reserve Development in the Long-Term Plan.
Staff Recommendation	Submission is acknowledged by Council. Council has a footpath extension program to cover missing links. Transport staff has recorded this for future consideration. Projects are prioritized within annual budget allocation.
Point Number	908.7
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	A playground in the grassy area beside the Tree House daycare centre in School Lane would be a great addition. We believe this has been talked about in the past, but as yet nothing has been done, and all that is there is the grassy area and a seat. There is a lot of new development in Kirwee and this area would be closer for children to visit safely than having to go the Reserve.

Staff Recommendation	The submission is acknowledged by Council. When the reserve was initially set aside it was envisaged that it would include a playground as part of development. However, being in close proximity to the school (100 metres away) and access to the school playground being available to the community it did not proceed. Significant funds have been invested in upgrading the playground in the Domain and further upgrading work is planned as part of the ongoing development programme ($165,000 from 2024/25-2026/27). There is another reserve to be set aside in the residential subdivision as it expands, and allowance has been made to install a playground in this reserve although that is likely to be some years away depending on the speed of development. Staff will continue to monitor the provision and access to play equipment in this locality.

Point Number	909.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** I am not totally against park and ride facilities ,but these have to be funded by the users ,not the ratepayers once built		

Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. The eventual operation and maintenance of the Park N Rides will a Council responsibility that will be co-funded by NZTA Waka Kotahi.
Point Number	909.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30

	2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:** Yes build ,but dont let this go over budget as most council projects do , as a rate payer i am sick of paying for inflated projects and nice to haves that cost millions to run
Staff Recommendation	The submission is acknowledged.
Point Number	909.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Carry out the landscape improvements to extend the playing fields; replace and upgrade the playground equipment, footpaths, toilet block, lighting and irrigation; and seal the carpark. **Project cost:** Years 1-10: $3.4m **Estimated impact on rates :** Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% * Our budgeted option

	Comment: You need good facilities in the parks if they are well used , and are paid for the usage by the users
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2 and the submitters funding preference
Point Number	909.4
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes one indoor court. **Project cost:** Year 3: $7.07 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $5.97 million) **Estimated impact on rates (per year):** $11.67 **Funding:** Rates: 57% Development contributions: 43% * Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the submitter has selected Option 2, build the community recreation and sports facility at Darfield that includes one indoor court.
Point Number	909.5

Staff Recommendation	Submission is acknowledged by Council.
Point Number	909.9
Category	Activity > Walking and cycling improvements
Comments:	I am in favor of connecting cycle lanes between towns ,with the increased usage of bikes around the community .
Staff Recommendation	Submission is acknowledged by Council.
Point Number	909.10
Category	Activity > Other Categories identified by Staff > Rates
Comments:	I am a firm believer of the user pays system , as a rate payer if these proposed increases are fully implemented my rates would of increased 400% in 23 yrs all cause by government policies , all services should be paid for once built by the user ,so they are self funding .The poor old rate payer always gets hit to pay .
Staff Recommendation	Submission is acknowledged by Council.
Point Number	909.11
Category	Activity > Lincoln Town Centre Upgrades

Comments:	Lincoln town ship is a dangerous place at peak times so something has to be done, planning should of been done before now and paid for by the developers .
Staff Recommendation	The Council will starting the upgrade of the Lincoln Town Centre and Gerald Street in stages starting in 2024 at the Liffey end and finishing at Springs Rd in 2030. This is estimated to cost $45M and includes cycle lanes, power undergrounding, 4 sets of traffic signals and the replacement of the failed carriageway. Lincoln is being included in the area plan development under the 'Future Selwyn' process. Developers are required to pay development contributions but only to a level set by legislation.
Point Number	909.14
Category	Activity > Infrastructure DC
Comments:	I agree with higher development contributions or getting developers to service and repair works for a longer period
Staff Recommendation	The submission is acknowledged and staff note the support for the introduction of the proposed development contribution for community infrastructure. It is also noted that the maintenance period for developers to look after reserves and assets received from subdivision has been extended to 24 months.
Point Number	909.15
Category	Activity > Strengthened Partnerships
Comments:	.Iwi should have a say on matters that effect them only ,not general decision making as put forward
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognises the importance of supporting Iwi participation. Council is committed to ensuring inclusivity and that ensuring everyone has an opportunity to benefit. Council considers this can lead to better outcomes for the whole community. For Council to include Iwi contribution to count, by ensuring Iwi perspective has an opportunity to inform decision making on its committees, reflects our commitment to the Treaty and our shared responsibility to create a more equitable and respectful society.

Point Number	909.16
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	We as ratepayers should get a free literage of water before paying like CCC .Pressure should be put on canterbury regional council to restrict the volume of water farmers are extracting to grow grass ,or charged appropriate sums like rate payers are.
Staff Recommendation	The submitters comments are acknowledged.
Point Number	909.17
Category	Activity > Fees and Charges
Comments:	I dont agree with increasing charging for information requests , as usually this information is needed by the house owner which in most cases has been provided to the council by the same person .
Staff Recommendation	Submission is acknowledged by Council.
Point Number	909.18
Category	Activity > Potential Requirements To Fluoridate
Comments:	Although not yet requested ,I am not in favor to adding fluoride to the water.
Staff Recommendation	The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.
Point Number	909.19
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Every town should not have a pool ,this land can be sold and put towards Malvern development
Staff Recommendation	It is acknowledged that the submitter has selected to close the Sheffield Memorial Pool.

Point Number	909.20
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Selwyn businesses should pay for their own economic development .
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.

Submitter Number:	910	**Submitter:**	Barry Bignell
Point Number	910.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06		

	Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** Improving Public Transport is critical for a sustainable future. However, with improved facilities the Selwyn District Council will need to work with Environment Canterbury to increase bus capacity, particularly on Route 81 - the Lincoln Direct route.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. With Councils Preferred Option a Park N Ride at Lincoln is planned for 2026/27. This timed to coincide with a planned increase of direct bus services to the City by Environment Canterbury.
Point Number	910.2

Staff Recommendation	Submission is acknowledged by Council.
Point Number	910.8
Category	Activity > Lincoln Town Centre Upgrades
Comments:	Lincoln Town Centre Plan 2016: The upgrade to Gerald Street and the Lincoln Town Centre must start being implemented as a priority. The Vehicle Movements on Gerald Street are now exceeding the movements projected for 2031 in the last review of the Selwyn District Long Term Plan. Traffic lights are necessary to improve safety by slowing down traffic and reduce congestion. The decision not to proceed with a by-pass in 2011 is now having a major impact on traffic on Gerald Street as heavy vehicles, agricultural vehicle, and the significant increase in light vehicles due to the uncontrolled growth in housing are all impacting safety for cyclists, pedestrians, and residents trying to exit side roads. Traffic lights are necessary to improve safety by slowing down traffic, reduce congestion and creating breaks in traffic flow (particularly at peak times). Implementing cycle ways in both directions is also required urgently for the safety of all.
Staff Recommendation	The Council will starting the upgrade of the Lincoln Town Centre and Gerald Street in stages starting in 2024 at the Liffey end and finishing at Springs Rd in 2030. This is estimated to cost $45M and includes cycle lanes, power undergrounding, 4 sets of traffic signals and the replacement of the failed carriageway. A Southern Bypass of Lincoln had been considered before and discounted by Council due to the unwillingness of developers to accommodate it, comparatively low use and high cost. The redesign of Gerald St will reduce vehicle speeds through the township which may in turn redirect through traffic onto other routes. Councils roading programme includes a future project to form Collins Rd to Ellesmere Rd to provide another route for Lincoln South development traffic other than Springs Rd. This attempted to be pinned to the Plan Change outcomes but was not agreed to.
Point Number	910.9

Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	In general I support these changes. Council must continue to include local Iwi consultation.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	910.10
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Caution is the word for this. Digital Solutions can easily experience cost blowouts.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP

Staff Recommendation	Council staff are not aware of any request for payment by Te Taumutu Runanga Inc in response to any of the various Selwyn Council requests for a name to be gifted for a building / room, along with the associated cultural narrative. It is however acknowledged that such requests often require an unpaid volunteer with appropriate expertise to respond, which can take a number of hours to undertake the research and investigation. Council appreciates such gifts from Te Taumutu Runanga. Depending on the volume and nature of upcoming requests by Council, it may be appropriate for Council to consider making a contribution to the voluntary hours required, in the future.

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**

Comments:	**2022 and 2023 were very poor summers with cool and cloudy days, so Sheffield with a smaller population than many other towns so it is not surprising that has less numbers. The importasnt thing is Sheffield and the large surrounding community and especially the school badly need the local pool to firstly learn to swim as an important part of education, life and social interaction. A local pool is a lot safer than the alternative swimming in the Waimak River which many choose. The Darfield pool is already full and has a growing population. It would be a long distance for many who already travel to get to Sheffield as their community hub in summer, and is also likely to grow.**
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	I am writing to express my wholehearted support for the retention of a pool facility in Sheffield and to highlight the invaluable benefits that rural facilities like this bring to our community. Sheffield Pool serves as a vital hub for our community, providing a space for families, friends, and individuals to engage in recreational activities, fostering a sense of camaraderie and unity. Its presence will contribute significantly to the overall wellbeing of our residents, both physically and socially. On rural areas, access to recreational facilities is often limited, making Sheffield Pool an essential asset. It not only promotes a healthy exercise lifestyle by offering a place for exercise and relaxation but also acts as a catalyst for community integration. In rural settings, these facilities play a crucial part in reducing isolation and ensure that residents have a place to connect and build relationships. Furthermore, Sheffield Pool serves as an educational resource, offering swimming lessons and water safety programmes that are particularly beneficial for families in rural areas where natural bodies of water are a particular hazard. With the retention of a swimming facility in our community, the Sheffield School Board of Trustees demonstrates a commitment to the well-rounded development and safety of our community members, especially our children. I urge you to support the Sheffield Board of Trustees in retaining a pool facility in the area, recognising its role in enhancing the quality of life for residents and contributing to the unique fabric of our rural community. Your support for this facility will undoubtedly have far-reaching positive effects for generations to come. Thank you for your time, consideration, and dedication to the betterment of our community.

Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Category	Activity > Other Categories identified by Staff > Rates
Comments:	The rates increases is unbelievable. We should be looking at cutting costs here not increasing costs. This is not sustainable for average homeowners, and feel that with these increases we will be pushing people out of homes, and homelessness will be an issue. New facilities - like indoor courts and new stadiums are not needed as the Selwyn sports Centre is huge. Plus why not upgrade the Rolleston community hall beside New World, this can be used better!

Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.

Comments:	Executive Summary: 1.0 The Rolleston Softball Club was founded in 2012 and has grown from 110 to 266 members from the last season, being 2022/23. Also grown are the officials, coaches, managers, scorers and umpires, as new teams are created. Based on these figures, the club envisages that the membership will grow again for the upcoming season due to the formation of the Premier Grades. Last season, the club fielded two Premier Reserve teams (men's and woman's) and this year the first ever premier team (men's) will be submitted to Canterbury Softball Association (CSA) for approval. This will provide a basis for further development of our talented younger players to come through and provide sustainability for the Rolleston Softball Club. Priemer teams are scheduling games on the current turf, but to have the full round there or tournaments, held, another turf diamond is required. Rolleston Softball had this year seven Canterbury Representatives and have had three Development Junior Sox coming through and the club. We are increasing in representation and having additional facilities provides them the opportunity to remain at Rolleston Club as well as other emerging talent, and gives them the opportunity to go to the highest level in Softball. With this level of growth, comes with the expectation on delivering premier quality games, thus the increase demand for training and game time increases. With Foster Park being used for winter sports,

the premier teams are still able to use the artificial turf for off season training, which is a huge advantage. On this, the premier teams have already started pre-season training on the artificial turf for the upcoming season to commence in October 2023.

The demands on the single turf has become difficult over the last few seasons, especially when two clubs - Selwyn Baseball and Rolleston Softball, are both bidding for similar times on the existing singular turf diamond.

Note: at the time of writing this submission, the Rolleston Softball Club are unsure the status of the Selwyn Baseball Club and their membership will be for the 2023/24 Season.

Key areas in this submission:

✓ Needs Analysis
✓ Submission – Why now?
✓ Dugouts, Lighting and Scoreboard
✓ Shade and Seating for spectators
✓ Existing Artificial Diamond – Upgrades

To help understand each point above, we will endeavour to work systemically through so that you are fully informed about the challenges the club is working through and hopefully, provide insight into how providing an additional resource will help to keep building our membership and provide top playing facilities, on and off the diamond.

2.0 Needs Analysis - growth of membership and development of our players:

Since commencing in 2012, the club has seen an increase of 140% in membership, which for a volunteer community-based sport, is a very successful result. As the membership grows, this does place more of a demand on the club to provide facilities, marked diamonds and space for all our members to train or play on. Once the teams have all the equipment they need, then it turns to gaining access to the turf diamond for training.

For the 2022/23 season the club saw multiple cross-over of our junior players starting to play in more senior grades. This development is encouraged and has been a focus over the last few seasons.

The club need to provide a development pathway for our younger players not just to enhance for their own personal development but also for the sustainability of the club.

To ensure that we keep hold of our emerging talent, we need to provide facilities for our players, which includes an additional playing turf for Rolleston Softball, but also additional add-ons like dugouts and lighting.

3.0 Location:

Currently Rolleston Softball Club are allocated to play on Foster Park, far end of the grassed area on the corner of Dynes Road and Lowes Road.

CURRENT STATE:

PROPOSED FUTURE STATE: 2nd ARTIFICIAL TURF

4.0 Submission Details – why now?

Over the last 2-3 seasons the club have struggled to allocate time to one artificial diamond, not only due to sharing this resource with Selwyn Baseball, but also sharing amongst our own senior and competitive junior grades.

For Selwyn Baseball, training days was every Tuesday and Friday evenings, and game day being every Sunday. At times Baseball was allocated to another club's diamond on the Sunday as the season progressed. Having to share the turf placed a lot of time pressures on our club as Selwyn Baseball had only four teams, whilst Rolleston Softball had nineteen teams, of which eleven of these were competitive teams all wanting time on the turf diamond.

Coupled with this demand, the senior competitive grades, and u18/u15s, we found it exceedingly difficult to allocate teams to the one turf, and had to rotate all grades around the ballpark, utilising painted diamonds 2 & 3 throughout the season.

Allocating senior grades to the artificial turf became a priority, due for the safety of people passing by but also to our junior grades. At times, our u7s – u11's practised right beside our premier reserve or men's teams which would have been a bit frighting for our young players. The club tried to avoid this as best we could, but there were times this could not be avoided.

With the restraints from Selwyn Baseball as well as demands from within our own club, it is time now to look at the installation of a second artificial turf at Foster Park.

It is our understanding that a second turf is in the Selwyn District Plan, and we would like to see this pushed forward in this or next financial year allocation.

5.0 Dugouts, Lighting and Scoreboards:

The game of softball is played within the summer months, and that means a lot of sunshine and, normally under intensive heat in Canterbury. Access to shade is increasing in demand especially when a player has been on the diamond for some time, and getting a reprieve from the sun/heat is most welcomed by all players and officials. It is now becoming a safety issue that there is no shade available to the players in the form of a dugout, as well as seating and shade for spectators during the season.

The club has placed two gazebos in the past to shade the players, but these are perishing under the harsh conditions and now the covers are ripping and need replacing. Also access to the gazebos is difficult as, when these are needed, often these cannot be accessed as the committee members are playing elsewhere on that day. The club are requesting the installation of dugouts on the second turf diamond, as well as the existing one.

For the dugouts, we also request that lockable chests are installed on the end of one of the dugouts (on each diamond) to house the turf fixed running bases. This would provide coaches with an ease of access to grab these more and be available at trainings.

As well as game time, the need for lighting is becoming more urgent. Lighting for evening trainings during winter, hosting evening games during the season and the opportunity to provide premier or national tournaments that can run late into the evening.

Electronic scoreboards are another resource on the rise for all clubs. Having lights and an electronic board, gives our club the opportunity to host premier teams to Rolleston for national tournaments and key premier games. This will be a game changer for our club and to have this resource, will place our club on the radar for these key events.

6.0 Existing Artificial – upgrades:

As previously mentioned, the need for installation of dugouts on the existing artificial turf, is becoming a safety issue in where players need to have shade from the heat and no there is no option for shade available at the turf, in its current state.

	As part of this submission for the 2nd Artificial Turf, we also request that current artificial turf have dugouts installed on either side of the diamond to accommodate the home team and the away team, and lockable chest to place the turfs running bases. Please note there was a quote supplied in 2021 by Fair Dinkum, but due to some restraints out of our control, the club did not pursue it further at that time. The club feels now that time to provide these extra resources, especially the installation of dugouts, has become a "safety need" than a "nice to have." Since the facility is council owned, there should be an agreement to add dugouts for players, as it is a safety need. Currently we are using gazebos but these are need of replacing as being used more often, and putting them up and down more frequently is causing damage. The quote is included with this submission is a guide to erecting dugouts on the existing turf, and the club will be willing to get this re-quoted if requested. The quote provides for two dugouts on the existing diamond, with seating and ventilation. 7.0 Submission Detail: 1. Installation of dugouts on the existing Artificial Turf Diamond, one on each side. 2. Lockable chests installed in both turfs, accessed in one of the dugouts to house the turf running bases. 3. Installation of the 2nd Artificial Turf Diamond at Foster Park, with Dugouts and Lighting. 4. Consideration for an Electronic Scoreboard, installed for the use on the 2 nd Artificial Turf Diamond. 5. Consideration for seating and shade installed for spectators. Thank you for considering this proposal and I look forward to hearing back from you. If you have any questions, please contact president@rollestonsoftball.co.nz. Kind regards Desiree Barnes President Rolleston Softball Club
Staff Recommendation	The submission is acknowledged by council. Staff support the proposal of the extra softball diamond in the medium term, as this has been allowed for in the planning for Foster Park with the timing for installation to be determined by demand. Staff support the provision of dugouts and storage at the existing Foster Park site as these facilities were intended to be built when the initial diamond was installed. Lighting for the existing softball diamond is currently

	budgeted for in years 7-10 of the Long-Term Plan. Staff recommend that a budget of $60,000 is included in 2024/25 to install dugouts and storage and that a budget of $400,000 is included in 2028/29 to construct a second diamond at Foster Park (subject to ongoing demand analysis). It is noted that reserve development contributions can be used to help fund the additional capacity needed.

Organisation:	Sheffield Waddington Residents Group		
Point Number	919.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None		

	Estimated impact on rates: To be determined **Funding:** To be determined **Comment:** There needs to be a better public transport system from the smaller towns such as Darfield before funds are spent on a park and ride in an area that already has good public transport. We appreciate that the decision on public transport mostly sits with Ecan, but the request the council consider the smaller towns first.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service. The Park N Ride facilities will be sized and provided to enable use from the adjoining townships so residents can drive and park to then access the PT services.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would

	have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Comments:	Please also find attached our submission regarding safer speed limits in the smaller townships.
Staff Recommendation	Submission is acknowledged by Council. Speed limits on State Highways are managed by NZTA. Council has made submissions supporting the speed reduction through these locations.
Point Number	919.8
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Please find attached our full submission at in the attachments.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility

	and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Absolutely do not support the closure of this facility. Through fhe meetings with sheffield residents, it was clear that this amount was not correct to fix the pool as had been shown by our board members This pool is used by our community and needs ro come back to the community for us to run. We dont need fhe life guards and could be run by the community this is a pool that the school children use through out summer and school timw and if this is taken away im not sure where you expect our children to swim. We cant be expected to go down to darfield in

	achool time so that children can have lessons as part of their curriculum. This is used all the time. also you have created a pool at darfield whixh isnt big enough now for the community in darfield let alone asking for the other areas to come down and use this piol. Its over crowded already at its busiest times and now that this new slide has veen added it has taken out furthwr space in the pool and to be honest was an absolute waste of money when it wqs shown as a hydroslide save our pool!!!!

Point Number	925.2		
Category	Activity > Lincoln Town Centre Upgrades		
Comments:	i strongly feel that the Lincoln town center is long overdue a bit of TLC. The Lincoln town centre plan was completed using data that is now nearly 10 years old. Is this plan still appropriate given the growth experienced in Lincoln in that time, or has it taken so long for action that a better plan should be drawn up using up to date information?		
Staff Recommendation	The outcomes promoted by the 2016 Lincoln Town Centre Plan are still relevant however the design upgrade plans for Gerald St will reflect current best practice.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	926.6
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Keep these smaller local facilitating open is very important for the community.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council.

	The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Point Number	927.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51%		

	Our budgeted option **Comment:** In the long term, it would be great a commuter rail service could be established on the existing tracks from Rolleston (and Rangiora/Kaiapoi) to central Christchurch. That is outside the scope of SDC activities, but if another park and ride facility is to be established at Rolleston, it may be prudent to locate it within easy walking distance of the railway station, perhaps via a footbridge over SH1.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case determined that MRT was viable in the city, but not in the surrounding Districts. It considered a wider passenger rail service using the existing rail network could have merits in the future if combined with a wider regional passenger rail service. But with small projected patronage, large investment needed for rolling stock and infrastructure (on a rail network managed by others), and that there is no CBD connection makes this currently not worthwhile. The Rolleston Park N Rides are located on Kidman St and another on the corner of Jones and Hoskyns Road next to the main PT route and railway line. These will be connected via the planned SH1 Flyover by NZTA Waka Kotahi which includes integrated walking and cycling facilitates.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are

	collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	New courts for the West Melton Tennis & Netball Clubs are about to be established to the South of the West Melton community centre. The existing courts (which were funded, built and maintained by the tennis club over many decades) are to be removed to provide additional car parking for the Rugby and Bowling clubs. The West Melton Tennis & Netball Clubs will therefore need 24x7 access to secure clubroom facilities that enable us to support coaching of juniors, host interclub and representative matches, hold committee meetings and store our equipment, as outlined below. Initially, this might be provided by secure (e.g. swipe card) external access to Meeting Room 3 near the southwest corner of the community centre, **PROVIDED THAT** unlimited use of that facility is provided at an affordable (i.e. very low) rate to the two clubs, consistent with

	their access to the current clubrooms on the East side of the domain. If acceptable terms cannot be agreed, then we will need dedicated clubrooms to be built adjacent to the courts, as described below. The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a share Hub/Clubrooms built at the proposed new Tennis & Netball facilities based in West Melton. West Melton Tennis & Netball share the vision to provide an inclusive, nurturing & welcoming community focused environment to develop players of all ages, creating longevity for the clubs & community. What we are asking for is a hub to bring our community together to create a sustainable future of tennis & netball but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Tennis nets, tennis poles, tennis balls/trolleys, netball balls, gear bags, hoops & training equipment. The space would require a kitchenette suitable for making tea & coffee and afternoon tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage.

	The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.
Point Number	927.9
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	I support the changes to the Significance and Engagement Policy outlined in the consultation document.
Staff Recommendation	Submission is acknowledged by Council.

Submitter Number:	928	**Submitter:**	Alastair Wilson for West Melton Bowling Club
Organisation:	West Melton Bowling Club		
Point Number	928.4		
Category	Activity > Other Categories identified by Staff > Parks and Reserves		
Comments:	There is a need for provision of a quality car parking area to the area south of the West Melton Bowling Club green for members parking. This facility, with a paved surface & good lighting, will be required immediately following the proposed extension of the WM Rugby Club out to the playing ground and the resulting elimination of the current one-way car access through the West Melton Domain.		
Staff Recommendation	Staff support the submission budgets have been set aside for development of car park areas at West Melton Domain as per the Master Plan. A total of $800,000 is allocated for car park work from 2024/25-2026/27 including the development of the unformed car park to the south of the Bowling Club. Staff recommend that. the development programme for West Melton Domain including car park construction is supported to enable demand for facilities and spaces to be met.

Submitter Number:	935	**Submitter:**	Alastair Ross
Point Number	935.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:** We urgently need public transport links within Selwyn. All the major infrastructure is being sited in Rolleston (e.g. sports facilities, hospital). For this to work for all of Selwyn, there need to be buses that regularly go straight from Lincoln, Springston, Prebbleton, Tai Tapu, Darfield etc. to the major facilities in Rolleston. This will help to keep a lot of the after school traffic off the roads. As an example, we make the return trip between Lincoln and Foster Park eight times per week, ferrying children to sports practices - and that includes car pooling, otherwise it would be ten times per week, not including to matches or other events. The buses do not fit in with people going		

	after school to Rolleston, and the route taken is via Springston and several subdivisions in Rolleston, making a journey which otherwise could be 15 mintutes into one that takes 25-30 minutes. To make the investments in Rolleston work for all of Selwyn's ratepayers, there needs to be good and direct public transport within the Selwyn district.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council. Environment Canterbury is considering developing a business case for additional direct services for Rolleston and Lincoln in 2024-27. Improving the frequency of other key Metro PT services such 5 (Rolleston) and 80 (Lincoln) is also being planned. Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service. Council and Environment Canterbury are working closely together on how to improve PT in the district.

Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** train facilities		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case determined that MRT was viable in the city, but not in the surrounding Districts. It considered a passenger rail service using the existing rail network could have merits in the future if combined with a wider regional		

	passenger rail service. But with small projected patronage, large investment needed for rolling stock and infrastructure (on a rail network managed by others), and that there is no CBD connection makes this currently not worthwhile. The MRT Business Case process has yet to determine what mode MRT services will take i.e. rail or bus.

Submitter Number:	937	**Submitter:**	Greg Ellis
Point Number	937.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option		

	Comment: SDC needs to ensure that Ecan implement suitable buses of the right size and frequency to ensure high patronage, at a reasonable cost to also encourage people to use public transport. If this doesn't happen alongside the Park and rides I don't support the expenditure. I would go as far as suggesting the location of the park and ride also would facilitate easy access to any eventual light rail implementation in the future between population centres. As for Arthur's Pass, I support the implementation of bi-lingual signage at town and Village entrances. I would like to see specific funding allocated to upgrade the lighting in Arthur's Pass village to enable the Village to be classified as a dark sky area. As this will involve discussions with Kiwirail, we really need SDC on board to lead those discussions. I note that $1.2m is allocated for district wide dark sky in 2039/40. Please pull some of this allocation forward to allow this discussion to be initiated in the Arthur's Pass area in the 2025/26 financial year. I fully support the construction of a cycle trail to join Arthur's Pass to Te Waihora across the Selwyn District.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case determined that MRT was viable in the city, but not in the surrounding Districts. The MRT Business Case process has yet to determine what mode MRT services will take i.e. rail or bus. It is intended that the proposed Park N Ride facilities are positioned and integrated into townships to support higher density and sustainable living outcomes sought by Council. They are perhaps better referred to as future 'transport hubs'. The other submission points in support of Bilingual signage, Dark Skys, and the planned Alps to Sea cycleway are also acknowledged in relation to Arthurs Pass. Council will likely be investigating how lighting may be controlled at Castle Hill to determine initial viability first.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	937.9
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability

Comments:	The SDC Civil Defence activities is setting the standard for all of Aotearoa, in terms of their preparedness and knowledge. With the odds of the alpine fault rupturing in the near future getting higher, it is crucial that funding is increased to this sector so all of the Selwyn district will cope in the event of AF8 happening. This will also be applicable to storm and flooding events as Climate change bites. There was very little in terms of discussion on Climate Change adaptation and protection of infrastructure, utilities, property, and people in the plan, funding needs to be increased to address growing risks and enhance plans and preparations for a significant disaster.
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. Council is developing a Future Selwyn Strategy that looks beyond the 10-year horizon to consider how we can respond to these challenges. The Council is also developing an Emissions Plan and Sustainability Plan to identify actions into the future.
Point Number	937.10
Category	Activity > Other Categories identified by Staff > Road Safety
Comments:	Following heavy snowfall I would like to see a better system in place that gets local SDC roads and footpaths cleared in a quicker time frame as they can become impassable and dangerous.
Staff Recommendation	Submission is acknowledged by Council. Council manages maintenance of roads and footpath on a priority basis.
Point Number	937.11
Category	Activity > Other Categories identified by Staff > Speed Management
Comments:	Please consider reduced speed limits to 20kph or 30kph on Council roads in the Arthur's Pass Village, and support Waka Kotahi to reduce the speed through the centre of Arthur's Pass village to 30kph on SH73.

Staff Recommendation	Submission is acknowledged by Council. Council has been supportive of and lobbied for lower speed limits through the Arthurs Pass village, however the SH is NZTA responsibility, also the central government is yet to disclose its intentions around setting of speed limits.
Point Number	937.13
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	I would like to see SDC continue to allocate funding for volunteer Conservation groups, in particular through the SNEF fund.
Staff Recommendation	The support for the continued use of the SNEF (Selwyn Natural Environment Fund) for community-led environmental projects is noted.
Point Number	937.16
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	I would like to reinforce our request for garden maintenance to be carried out on a more regular basis by SDC as irregular maintenance leads to locals maintaining the upkeep of SDC owned gardens in Arthur's Pass.
Staff Recommendation	Submission is acknowledged by Council. Staff note the need for environmental maintenance.
Point Number	937.17
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	The Arthur's Pass water supply has recently had work carried out. Multiple tanks are in place to give a large amount of storage capacity in times of turbidity of the water at the intake. We have been informed on multiple times that this tank farm is a temporary solution only. I would like to see this promise of a permanent solution to be in the budget within the next 3 financial years. Please ensure funding is put in place in the SDC budget. Note, the temporary tank farm installation has halved the only SDC community green space and is

	not longer suitable for community activities like volleyball or kicking a ball round.
Staff Recommendation	The submitters support for water treatment upgrades in Arthurs Pass is acknowledged. As part of the Long Term Plan the final stage of upgrades to the treatment plant have been budgeted for in 2026 to 2029 and will investigate treatment efficiency. Pending the outcome these works may include treatment and storage upgrades. Staff recommendation is to budget for these works as planned in the LTP.
Point Number	937.18
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	Under stormwater there is $553,000 allocated in 2025-2027 for Arthur's Pass underpass flooding. We suspect this is for the subway tunnel leading to the train station. Before this amount of ratepayers money is spent, I would like SDC to look into whether it is an SDC responsibility or clearly a Kiwirail responsibility.
Staff Recommendation	The submitters request for Council to seek alternative funding mechanisms for stormwater capital upgrades to reduce flood risk to the underpass in Arthurs Pass are acknowledged. Staff recommendation is to further investigate and design these improvements in year 2 of the LTP as planned.
Point Number	937.20
Category	Activity > Planning Further Community Facilities
Comments:	I would like to see SDC increase support for heritage activities in Arthur’s Pass. This would include advocating for the protection and development of the original Park Headquarters/Visitor Centre building managed by the Department of Conservation.
Staff Recommendation	The submission is acknowledged. Selwyn District Council acknowledges the importance of promoting and protecting heritage as it improves community wellbeing by connecting people and building the identity of Waikirikiri Selwyn. The Selwyn Strategic Heritage Plan 2023-2027. ensures there is a focus on improving support for heritage activities and supporting the work of local history groups and residents who are strongly motivated to collect, protect and enhance local place-based heritage. Council has two community heritage funds available: the Community History Fund, which is to support kaitiaki (guardians, conservators, and protectors) communities and community groups for various history projects (and the operating costs of community history groups); and the Heritage Protection Fund which is to encourage and assist owners with work

	required to maintain and enhance heritage buildings in the District as well as work required on protected trees.
Point Number	937.22
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	I would like to reinforce our request for garden maintenance to be carried out on a more regular basis by SDC as irregular maintenance leads to locals maintaining the upkeep of SDC owned gardens in Arthur's Pass.
Staff Recommendation	Submission is acknowledged by Council. Staff have been working through a process to pick up gardens that have been maintained outside of the reserve maintenance contract and absorb these into the contract. This includes the gardens at Arthus Pass and budgets have been developed to accommodate this minor additional cost.
Point Number	937.23
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	re: Greendale Domain. I believe this needs to be returned back to the community. The Greendale community hall is currently under utilised, returning this facility back to the community to manage and promote usage
Staff Recommendation	The submission is acknowledged by Council. Work is planned to review the management and operating arrangements for a number of community facilities. This may include options for alternative ways to manage and look after local facilities and Greendale Hall could form part of this review process although it is not an initial priority. Any future arrangements would be considered in consultation with the local community.
Point Number	937.24
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	Under Halls and Community Centres, an upgrade of the heating in the Arthur's Pass Community Centre has funding allocated for 2030/31. This needs to be bought forward to the next financial year,

	2024/25. In an alpine environment, suitable heating is very important, not just for those using the Community Centre, but also for the good of the building, and possibly essential for the local Community Response team to care for stranded locals and travellers. Please make this new fireplace install a priority for the 2024/25 financial year.
Staff Recommendation	Staff do not support the submission. A significant amount of work has been carried out by Council in recent years in upgrading the building including installation of heat pumps, insulation and new flue for the log burner. A new heating appliance was considered but as this would trigger a Building Consent substantial budgets would be required to carry out compliance works (disabled access toilets, alarm system, accessibility improvements) it did not proceed. The reasons for not proceeding were communicated to the Arthurs Pass Community Association. Staff are of the view that the significant cost of this work is not warranted at this point but have allowed for heating replacement and associated works from 2029-30 (when the existing fire appliance is expected to be at end of life). Staff recommend that the submission to have a new solid fuel heating appliance installed at Arthurs Pass Community Centre is declined but the condition and performance of the existing solid fuel heater is monitored over the next few years.

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46

	Funding: Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Staff Recommendation	Submission is acknowledged by Council.
Point Number	938.8

Category	Activity > Other Categories identified by Staff > Financial management
Comments:	the council should kerb it's spending. We cannot leave a massive debt that will never be repaid for future generations. Live within your means please. Stop subdividion of good fertile land into smaller blocks which are not really productive and adding to the ecconomy. This also means each property will require their own well which will affect other existing properties. In this area maybe work more closely with ecan so that the nitrate levels can be better managed.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	938.9
Category	Activity > Planning Further Community Facilities
Comments:	if communities would like added resources eg: sports facilities, community hall, swimming pools etc then they can fundraise towards this and the council can chip in. At least it willl show they are serious not just whingers. Like a spoilt child. I appreciate that the council gets pulled into all sort of directions but let us look into fixing existing problms first. Then if there is money left over build new things. Maybe also have a generic plan for new builds for council facilities that can be altered slightly for each project to save on atchitect and engineering costs.
Staff Recommendation	The submission is acknowledged. Over the next 12 months Council will be reviewing the network of public-facing facilities across the Selwyn District (libraries, community centres, halls, sports centres and pavilions). This work will take a holistic look at all facilities to plan for short, medium and longer-term community needs. It is recognised that a number of Council owned halls and centres have an extensive history in Selwyn and it is also recognised that there are some halls / community centres that are now underutilised by the local community and may be facing large costs in maintenance and / or remediation. The review will help Council better understand issues, opportunities and barriers and to consider alternative options for the future. The review will also factor in options for standardised design. Depending on the facility, options identified in the review may include, but not be limited to, the lease or sale of facility to a community group or organisation, the repurposing of facility from a general public hire facility to a dedicated activity facility for the district, co-location arrangements, etc. The intention of Council's

	public-facing facilities network plan is to ensure a reasonable and balanced spread across the wider district, with facilities that are relevant to the various communities.
Point Number	938.11
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Rates should be the same - no mater who they are. No one should have an advantage over others in a business environment.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	938.12
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	unless the community wants it and proves there is a demand for it by instigating some sort of fundraising towards it - close it. Just by upgrading it will still incur ongoing costs. Maybe the school would take advantage and be able to come up with funding and let them manage it.
Staff Recommendation	It is acknowledged that the submitter has selected to close the Sheffield Memorial Pool.

Comments:	I would love to see the Broadfield Netball courts resurfaced in the next 10 year Plan. We also need our lights to be repaired so Netball and Tennis are able to keep playing when the light dwindles at the end of the day. Especially training on the courts for the Netball season is tricky when all the lights are not working. Two lights are out and have been since last season. I do not want to wait for 10 years for the lights to be repaired but I thought this would be a good place to raise the issue. Thanks heaps Autumn - Broadfield Netabll Secretary

Staff Recommendation	Submission is acknowledged by council. Work is currently underway with the major projects team to complete this work.

Comments:	We need our selwyn council to stop borrowing money we havnt got and charging it on rates especially when we have rising costs on each household that needs money for necessities not things they have.Building's should be repaired or extensions by our council not new rebuilds with money that's not theirs to spend.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	942.13
Category	Activity > Compulsary organics collection
Comments:	residents should be able to opt out of organic waste bins these are not needed by every house holder and especially rural farmers
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. We do acknowledge that this is an additional unwanted burden for those who already compost their own food scraps and garden waste at home. This regulation is outside of Council's control. The Ministry for the Environment has issued a directive that households in all urban areas with a population of greater than 1,000 residents must have a food scraps/organic collection by 1 January 2027. Every Council in New Zealand is obligated under the Waste Minimisation Act to comply with this.
Point Number	942.15
Category	Activity > New Public Transport
Comments:	We need electric scooters and bikes which ate more used ,should have a lane for them especially rollestons and lincolns main streets
Staff Recommendation	Submission is acknowledged by Council. Most existing roads are not wide enough to be retro fitted with separate cycle lanes. Council does include lanes into intersection upgrades like traffic signals were able both on the road and alongside the road. Council recently increased the minimum width of footpaths to 1.8m to provide more room and is also specifying 2.5m wide share use paths on key connections in its urban areas. Along Gerald St in Lincoln cycle

	lanes are planned to be installed as part of the street reconstruction project. Electric bikes and scooters are able to use standard cycle facilities provided.
Point Number	942.17
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	our local councillers Sam ,and Shane need to help us ratepayets and not waste money on projects not needed in the selwyn areas .
Staff Recommendation	Submission is acknowledged by Council.
Point Number	942.20
Category	Activity > Planning Further Community Facilities
Comments:	Any new buildings to go ahead need dual language signage on the outside of it for emergency and travelling public to know what it is .rolleston new library building should have an english name alongside the maori one ,which I'm sure can be amended still .
Staff Recommendation	The submission is acknowledged. Selwyn District Council considers that, when public buildings incorporate Maori names and cultural design elements, they are not merely symbolic gestures. Instead, they represent a tangible effort to honour the Treaty's obligations and foster a sense of belonging for all New Zealanders.

Submitter Number:	943	**Submitter:**	Jacinda Valentine for Netball Mainland, Business Unit of Netball New Zealand
Organisation:	Netball Mainland, Business Unit of Netball New Zealand		
Point Number	943.1		

Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes two indoor courts. **Project cost:** Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million) **Estimated impact on rates (per year):** $19.91 **Funding:** Rates: 57% Development contributions: 43% * **Comment:** This submission is provided by Jacinda Valentine, Relationship Manager on behalf of Netball Mainland a business unit of Netball New Zealand, and the affiliated Zone Regional Sports Organisation for all Netball Centres in the Mainland region. Selwyn has 2 Netball Centres, Selwyn Netball Centre(SNC) and Malvern Netball Centre(MNC). Both Centres currently work together to support Netball in the Selwyn region. SNC had 2239 participations in 2023(NNZ Membership Return 2023) and MNC had 295 participations in 2023(NNZ Membership Return 2023) a 20% growth for MNC. As the facilities grow in Malvern we expect membership for the MNC will continue to increase. We would like to endorse option 3, which will set Malvern Recreation and Sports Centre up as a wider Sports Hub. To have 2 indoor courts at the sports hub will allow for future growth into the region. It doubles the participation opportunity and will be more cost effective, rather than building 1 Court now and needing to add another in the future. We commend Selwyn District Council for their future thinking to support the wider Malvern regions access to great facilities which increases opportunities. From a sports lens, 2 courts allow for leagues to grow and will mean the peak afterschool and weekend timeslots will not be dominated by

	one sport, which will enable a more diverse opportunity for Malvern residents. We would endorse that these courts have multiple court markings to maximise use of the facility for the community. Our preferred site for the Malvern Recreation and Sports Centre is to build it next to the current outdoor netball courts at Darfield Domain. This site would allow court-based sports to run tournaments and festivals that utalise all 5 courts, 2 Indoor and 3 Outside. This approach would be modelled on Foster Park which has been very successful. This site has plenty of greenspace to allow for extension of fields, more parking and future development. It would also allow for the current facilities and fields to be further utalised, with the possibility of adding additional court markings to the outdoor courts in the future for wider sport use. To hub facilities would mean combined sports can run festival days and taster sessions, this works well for schools that have to bus students as they have a wider opportunity for multiple sports in one space. Selwyn Sports Trust already run festival days in Malvern and it would be great to have additional facilities to enhance what they already do. Netball Mainland, Malvern Netball Centre, Selwyn Netball Centre and the wider Netball clubs that feed into these Centres, all support the view of this submission, and we would like to continue to work alongside SDC, other sporting organisations and wider stakeholders around any development with the Malvern Recreation and Sports Centre. We appreciate the opportunity to engage in the LTP submission process.
Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.

Comments:	need to make do with what you have no money for this
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Submitter Number:	945	**Submitter:**	Alex Hood
Point Number	945.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51%		

	Our budgeted option **Comment:** With Rolleston expected to get to 40,000 population and Lincoln to 14,000 (form memory), it is simply not an option to postpone for another years-long period. But also adding to this, I think expanding the 85 Rolleston - City direct bus route down to Acland Park, Faringdon, etc would be useful, and adding new departure times for this route. Especially because this will limit traffic driving within Rolleston to the park & ride in the morning.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Environment Canterbury who provides Metro Bus Services, needs to undertake more regular service reviews in Selwyn to take account of urban growth. The new Park N Ride to be constructed shortly at Foster Park will help improve access to bus services in this area.
Point Number	945.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

	Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan, but with additional sports courts and/or bigger community meeting spaces. **Project cost:** Year 1: 19.24m **Estimated impact on rates (per year):** $53.14 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** n/a
Staff Recommendation	Submission is acknowledged by Council. [
Point Number	945.3

Comments:	Sounds good to me.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	945.11

Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	I can't comment too much on this as there is not a lot of information available, but as a general rule I don't think Council money and Business money should be mingling.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.

Comments:	Mana Whenua Engagement- Appears to be $300k/year for a seat at the table. Again, no immediate sign of value for money for rate payers. What is that $300k paying for.
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognises the importance of supporting Iwi participation. Council is committed to ensuring inclusivity and that ensuring everyone has an opportunity to benefit. Council considers this can lead to better outcomes for the whole community. For example, Iwi knowledge about local environments can be invaluable in planning and resource management projects. For Council to include Iwi contribution to count, by ensuring Iwi perspective has an opportunity to inform decision making on its committees, reflects our commitment to the Treaty and our shared responsibility to create a more equitable and respectful society.
Point Number	946.8
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	Council Facility Upgrade - These are nice to haves (EV Charging stations). In a climate where publicly funded organisations are either

	cutting jobs or being told to do more with the same head count, the SDC is clearly not on the same path with more jobs and expansion at the cost of the rate payers, some of, will not be financially able to pay their rates due to excessive spending by SDC. Every organisation has to cut their cloth accordingly, but SDC shows no signs of the current economic climate. Ratepayers are not a bottomless pit that will just pay more rates without suffering or consequences.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	946.10
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	SDC Could look at cutting costs on Flood Prevention, Climate Change and Tree planting services, which are all supposed to be done by ECAN as that is what we are paying them for. Much like traffic safety advertisements, which is NZTA's responsibility.
Staff Recommendation	The submitters comments are acknowledged. Staff recommendation is to proceed with programmes as proposed in the LTP. Environment Canterbury has recently completed a Long Term Plan consultation process with the Selwyn community about an additional targeted rate for district wide flood and river resilience work.
Point Number	946.11
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	There is no tangible information on what is proposed to be done, no KPI's no targets, and no evidence of cost/benefit.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.

Submitter Number:	947	**Submitter:**	Details Withheld
Point Number	947.2		
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities		
Comments:	The Hub/Clubrooms would require a suitable space to store the following. Netball Balls, Gear Bags, Hoops, Training Equipment, Tennis Nets, Tennis Poles, Tennis Balls and Trolleys. The space would require a kitchenette suitable for making Tea & Coffee and Afternoon Tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.		
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.		
Point Number	947.3		

Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a shared Hub/Clubrooms built at the proposed new Netball & Tennis facilities based in West Melton. West Melton Netball & Tennis share the vision to provide an inclusive, nurturing & welcoming community focussed environment to develop players of all ages, creating longevity for the clubs and the community. What we are asking for is a Hub to bring our community together to create a sustainable future of Netball & Tennis but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. Comments:	

	Question: Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment:** **Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	949.7
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Rate increases are projected to double by year 2027, this is going to negatively affect ratepayers who are already struggling to make ends meet, in order to fund non-essential projects. Council needs to be mindful of ratepayers budgets which are negatively impacted by council bills. Doubling of rates will outstrip wage increases over the same period. You should not be borrowing sums of money based on ratepayer owner property, this is not your property to secure against council loans. Rates increases should aim to match the 1-3% rate of inflation set by the RBNZ.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	949.8
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	Biodiversity spending on native plants: Council should encourage businesses to fund this as carbon credits, this should not be ratepayer funded.
Staff Recommendation	Council is working with stakeholders to develop native restoration plantings at many sites. Generally, these projects are being done in partnerships, and as such Council does not invest in 'large areas of native planting'. Council is happy to support and advise commercial entities that are wanting to plant native carbon offsets.

Point Number	949.9
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	Rainbow Agenda: I am concerned about the council funding of the rainbow agenda and sexualised nature of books in our libraries. I am not in favour of funding this agenda.
Staff Recommendation	The submission is acknowledged.;
Point Number	949.11
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	Road costs: Stop wasteful spending on road closure and too many road cones, fix roads properly with quality materials, I often see roads around Lincoln fixed poorly and then the same piece of roading is repeatedly fixed over (e.g. Ellesmere Rd junction with Geraldine Rd)
Staff Recommendation	Submission is acknowledged by Council. Council must comply with traffic management rules. Road maintenance methods and quality control are always a focus.
Point Number	949.13
Category	Activity > Other Categories identified by Staff > Emergency management
Comments:	Flood prevention: Need to focus on better community emergency groups
Staff Recommendation	The submission is acknowledged. We have over 32 Community Response Teams that are an integral part of Emergency Management. These teams work with the community during emergency events and new community response team members are welcome to join at any time. We work with other organisations such as Ecan, to reduce the risk and impacts of flood events. As part of their Long Term Plan, Environment Canterbury has recently consulted with the Selwyn community about an additional targeted rate for district wide flood and river resilience work. Staff's recommendation is to proceed with the stormwater capital programme that includes initiatives to reduce flood risk in some townships.

Point Number	949.14
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	I do not support the use of facial recognition and mesh network capacity of Lincoln street lights. It's very invasive technology and I am not happy paying for this or living amongst this technology. We recently had friends visiting from Switzerland and they commented how much surveillance camera's there are in New Zealand compared with Switzerland with a much larger population.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25

	2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Comments:	As a Prebbleton local I am concerned with the amount of traffic on Springs Road and the ability to cross safely especially for our children. The current pedestrian crossing is terrifying due to the number of people who don't stop and fail to see you on it. I would like to see traffic lights including pedestrian crossing either instead of the current roundabout at Blakes/Springs or traffic lights to allow for pedestrian crossing where the current zebra crossing is.
Staff Recommendation	Submission is acknowledged by Council. Council is aware of the concerns with the Springs Road crossing. Crossing upgrades are prioritised and upgraded accordingly. School safety infrastructure is planned to allow crossing facilities on Blakes Rd. 24-27 NLTP.

Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a shared Hub/Clubrooms built at the proposed new Netball & Tennis facilities based in West Melton. West Melton Netball & Tennis share the vision to provide an inclusive, nurturing & welcoming community focussed environment to develop players of all ages, creating longevity for the clubs and the community. What we are asking for is a Hub to bring our community together to create a sustainable future of Netball & Tennis but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Netball Balls, Gear Bags, Hoops, Training Equipment, Tennis Nets, Tennis Poles, Tennis Balls and Trolleys. The space would require a kitchenette suitable for making Tea & Coffee and Afternoon Tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities. Thank you for taking the time to complete the submission.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it’s future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

	Comment: There should be a metro bus service from Darfield township to Rolleston, this route would make its way through from Darfield, then to Kirwee, followed by West Melton, lastly stopping at Rolleston. Curreently the only bus departing from Darfield is set for 7 in the morning, this is not appropriate for elderly people who arent able to drive them selves, they dont want to wake up that early to do necessary things such as groceries. A common bus from Darfield to Rolleston would also benefit teenagers as they would be able to go into Rolleston and then if they wanted to take the connecting bus to the city, as Darfield township does not have3 many activities to do it results in youth feeling the urge to engage in things they shouldnt be doing. If they had a cheap way to get there they would cut down the crime rates
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Environment Canterbury is responsible the 86 direct to city Metro service, which is currently justified for commuters when patronage levels are the highest. Category	Activity > Lincoln Town Centre Upgrades		
Comments:	Lincoln Centre. Although you talk of upgrading the Town's centre, I see it as wallpaper especially as the plan was approved in 2016 but where is the action? I watched Rolleston then Prebbleton get major new commercial buildings, and aesthetically pleasing they are too, but where is the plan for a completely new and up-to-date set of shops etc for Lincoln. (lovely library though) There is no mention of this in		

	your Long-Term Plan and that is until 2034 for heaven's sake. (I could be stronger in my language here!) Given the massive housing growth forecast, it is ridiculous you haven't upgraded the commercial hub of Lincoln by now given council knows in advance the number of new houses planned for the next decade. Considering the amount of Lincoln rates now going into your coffers, to not even have a mention in your plan is a scandal. It is time we had more representation on the council advocating far more strongly for Lincoln's progress in development and consideration. I am meeting many locals now expressing such an opinion.
Staff Recommendation	The outcomes promoted by the 2016 Lincoln Town Centre Plan are still relevant however the design upgrade plans for Gerald St will reflect current best practice. The Council will starting the upgrade of the Lincoln Town Centre and Gerald Street in stages starting in 2024 at the Liffey end and finishing at Springs Rd in 2030. This is estimated to cost $45M and includes cycle lanes, power undergrounding, 4 sets of traffic signals and the replacement of the failed carriageway . The extension of Meijer Dr to Boundary Road, along with the creation of adjoining reserves, is planned in 2025/26 budgeted at $3.5M. In conjunction with this in 2026/27 a $4M Park N Ride Facility to cater for improved public transport services planned by Environmenrt Canterbury will be constructed opposite the Lincoln Events Centre
Point Number	957.6
Category	Activity > Walking and cycling improvements
Comments:	Cycle tracks. There needs to be a dedicated cycling/walking track from Lincoln to Rolleston. Given the increase in traffic, it is becoming unsafe and uncomfortable to bike on the roads to Rolleston as they are narrow especially when mixing with trucks, large cars and vans buffeting and near misses) and the traffic will increase obviously with more houses being built. I would also like to see, and use, more dedicated tracks that go into the countryside, and not have to use roads. The surface of these

	should be fine grit and not gravel, as for many bikers this makes it hard to stay steady on and requires much concentration (thus negating a major benefit of riding) to avoid becoming unstable and falling off (especially for older riders) thus negating the whole point of bike riding. Concrete, therefore, is the ideal surface. The whole point of recreational bike riding is to escape noise and stress, and relax amongst the beauty and calmness of Nature, to improve one's health and wellbeing. Lincoln has a large riding (and walking) community of many age groups and given so many families ride with their kids, we need safer dedicated tracks especially as the children become teenagers, and not just playgrounds. Bike riding is linked to better health which takes pressure off the Health budget, so central government is obligated to contribute funding for these tracks as well as council.
Staff Recommendation	Submission is acknowledged by Council. Major routes follow council's walking and cycling strategy which will be updated with suggestions from LTP submissions taken into account.
Point Number	957.7
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	A Lincoln Park Given that the density of housing is starting to make an impact both visually and spatially, I believe it is imperative council sets aside at least 10 acres to create a park (like Hagley Park) that has stands of large trees both native and non-native species, such as the magnificent oak tree. I lived in London for 13 years and the saving grace of London is its parks, large enough to escape urban surroundings and relax, which the locals did all the time especially with their children. One major consideration council needs to ask is, where will Lincolns teenagers go? Walk around the streets? There is nowhere apart from the Events Centre and Library, both indoors. A park would provide so many benefits to all ages, and I suggest 10 acres at least so people can move around without seeing people all the time. With the world becoming more technological these sorts of spaces are going to become a crucial resource for sanity and wellbeing, and not be regarded as a costly luxury. It is not a matter of financial value

	and reward but of human value and health. With an increase within the younger generations of mental health issues, this park is a necessity in providing a safe space for countering such conditions of the mind. The present small parks with wetlands are not large enough, and therefore suffer the spacial intrusion of houses, and so are unable to provide a necessary uncluttered environment. For the sake of present and future generations, Lincoln needs a large beautiful park we can all be proud of, and more importantly, use.
Staff Recommendation	Submission is acknowledged by Council. Lincoln has a relatively high level of park and greenspace provided throughout the township with spaces such as LIffey Reserve and Lincoln Wetlands as well as the network of neighbourhood greenspaces particularly around the streams. Council has purchased 5.7 hectares of land that adjoins the existing Lincoln Domain to the north. Budgets have been provided in the LTP to enable this land to be developed for recreation and amenity purposes. The plan includes a mix of native and exotic plantings and has large areas set aside for informal recreation and quiet contemplation. When this site is developed it will provide a contiguous corridor of greenspace linking the township, high school and open space areas to the north including Mahoe Reserve, Lincoln Cemetery and the golf course.

Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	I feel I am not qualified to give a comprehensive analysis and comments regarding this. I'm quite sure within Selwyn there are numerous experienced financial and management business and public service people who will add valuable advice and comment.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	957.9
Category	Activity > Other Categories identified by Staff > Crime/district safety
Comments:	Police. What police? There is hardly ever a police presence in Lincoln, the station is occupied on a part time basis by one police officer and you

	hardly ever see a police car patrolling. In the last 5 months I know of 3 burglaries in Lincoln and 7 car break-ins. An off-duty police officer who lives close-by said it was from young people driving in from Christchurch, not locals. What is council doing about this? Where's the feedback?
Staff Recommendation	Your submission is acknowledged however while the Council is in regular contact with the police about the levels of crime and service, they provide the extent of policing in the district is ultimately determined by NZ Police.
Point Number	957.10
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	It just seems logical to close as there is a new pool now close by, and $600,000 could be better used elsewhere.
Staff Recommendation	It is acknowledged that the submitter has selected to close the Sheffield Memorial Pool.
Point Number	957.11
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	As Selwyn's population is going to increase by a lot, more businesses will move here or open up new premises to meet a variety of consumer demands. Council needs to be prepared, and new businesses will want to see what is planned before moving here.
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and Council will consider their feedback in strategy action planning.
Point Number	957.12
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	It's the future dummy! (Not you reading this, for those who object)
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology.

	Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	959.7
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	I support Go Hororātā's requests that the budget for the Capital Projects be included in the LTP for 2024/25. The current proposal to delay funding is not acceptable. The new public toilets in Hororata are a disappointment. The quality of the actual toilet block is substandard – no toilet seats, not bird proofed, will fill up with dust and leaves, no way of drying your hands and the structure is showing signs of rusting already. The toilets should be looked at and reviewed as the structure will most certainly not stand the test of time. I support Go Hororata's proposal for a local Domain/Reserve Coordinator, as rural communities are feeling disconnected to their Reserve's and frustrated that they are no longer able to care for these public green spaces like they have for generations.
Staff Recommendation	Staff support the submission to bring the development programme at Hororata Domain forward one year to 2024/25 because some work is a continuation of projects already underway and there is also a need to carry out public health and safety works to the equine facilities and trotting track. Staff will also review the new public toilets to check on structural issues and any work that may be needed to improve comfort and secure the building. Council appreciates the strong connection that communities have with their local reserves and domains. Although Council has formally disestablished committees of Council including reserve committees it is intended that there will be opportunities for local communities to continue to provide valuable input to reserves on a voluntary basis. This can be by way of acting as a local point of contact for reserve matters or involvement in organised projects. Staff do not support the introduction of a paid person to act as a reserves coordinator in the Malvern area. The reserves contract and the proposal has cost and level of service implications in terms of an additional resource for this area. Staff concur that there has been teething problems in the

	transition from committees to contract but are confident this can be resolved by setting up improved communication channels, utilising local volunteers as the 'ears and eyes' to report matters of concern and providing additional support. The Reserves Operations Team will look to ensuring there is a consistent point of contact in Council to support the rural reserves. It is noted that there is opportunity for budgets to be provided to resident's associations which could be used to support local initiatives including on reserves. Staff recommend that part of the budget ($270,500) for Hororata Domain development is brought forward from 2025/26 to 2024/25 to enable urgent and committed works to proceed. Staff further recommend that processes are put in place to improve communication between local communities, Council staff and contractors on reserve matters and to ensure that there are clear channels for reporting issues.

Point Number	960.4
Category	Activity > Other Categories identified by Staff > Road Safety

Comments:	On traffic management Greendale residents are worried about safety at the intersection of Greendale and Adams Roads. The Greendale Residents Committee has previously submitted a request to have the intersection redesigned. The current design asks motorists turning right from Adams Road to make a counterintuitive move - to veer left before turning right. Staff did not see the redesign as high priority. **My suggestion** **Paint road markings to indicate that motorists should keep left before turning right.** I see the road markings as a low-cost way to reduce the chances of right-turning traffic colliding with vehicles turning left from Greendale Road. Redesign including a Give Way sign would be ideal.
Staff Recommendation	Submission is acknowledged by Council. The layout of this intersection could be reviewed. It would need to be prioritised within the intersection upgrade prioritisation framework for any potential works to be completed.
Point Number	960.5
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Cellphone coverage around much of Greendale is weak and unreliable despite a new cellphone tower.
Staff Recommendation	Submission is acknowledged by Council.

Point Number	961.7
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	'Climate change policy' Needs to consider housing developments out in rural areas where there is no public transport and private vehicle use is high contributing to climate change
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. Council is developing a Future Selwyn Strategy that looks beyond the 10-year horizon to consider how we can respond to these challenges, especially urban form.
Point Number	961.8
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	'Changes to development contributions policy' I support this policy, as Selwyn has grown the extra costs placed on existing and long term rate payers has been significant and unfair 'Māori contribution to council decision-making policy' I oppose this policy as it is undemocratic, it divides us a nation. If we want a unified community we do it as New Zealanders

Staff Recommendation	The submission is acknowledged. Selwyn District Council recognizes the importance of partnerships; building strong partnerships with iwi is vital for Council to fulfill its obligations to the entire community. Te Tiriti O Waitangi (Treaty of Waitangi) is a founding document of New Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with iwi, to have any meaning, requires consideration of iwi position and contribution to discussion/debate.

Submitter Number:	962	**Submitter:**	Details Withheld
Point Number	962.2		
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities		
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a shared Hub/Clubrooms built at the proposed new Netball & Tennis facilities based in West Melton. West Melton Netball & Tennis share the vision to provide an inclusive, nurturing & welcoming community focussed environment to develop players of all ages, creating longevity for the clubs and the community. What we are asking for is a Hub to bring our community together to create a sustainable future of Netball & Tennis but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Netball Balls, Gear Bags, Hoops, Training Equipment, Tennis Nets, Tennis Poles, Tennis Balls and Trolleys. The space would require a kitchenette suitable for making Tea & Coffee and Afternoon Tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.		
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other		

	options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Point Number	963.7
Category	Activity > Low Nitrate Water Sources
Comments:	Scientific studies of nitrate and pathogens in wastewater treated and disposed of through onsite systems in Darfield and Kirwee have not generated concrete evidence that supports the reticulation of the sewerage systems in these townships from a public health perspective. Further, while the nitrate levels in the townships' drinking-water are high, these appear to be associated with agricultural activities in the area rather than the decentralised wastewater treatment systems in Darfield and Kirwee. Hence, all work on the reticulation of the sewerage systems in Darfield and Kirwee should be halted, and denitrification of the drinking-water, sourcing drinking-water from bores with low nitrate levels, and reducing nitrate inputs to groundwater from agricultural activities must become key areas on which to focus resources from Selwyn District Council, Environment Canterbury, and the Government; reducing nitrate levels in the drinking-water is not a 'nice-to-have' but a public health necessity.
Staff Recommendation	The submitters preference for low nitrate water sources is acknowledged. Staff recommendation is to undertake further investigations into centralised sources of low nitrate water as budgeted in the LTP. The submitters request to not invest further in reticulation of wastewater for Darfield and Kirwee is acknowledged. Reticulation of the existing township has been budgeted in the LTP between 2027 and 2038. Staff recommendation is to engage with the community on how servicing costs can be met.

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Sheffield residents should used Darfield's pool.
Staff Recommendation	It is acknowledged that the submitter has selected to close the Sheffield Memorial Pool.
Point Number	963.9

Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Not if it includes visits to and hosting personnel from overseas 'sister' cities/regions that generate no benefit to the district.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.

Category	Activity > Planning Further Community Facilities
Comments:	Performing Arts - while sports are part of our culture and facilities are widely used, there is no dedicated space for the performing arts in Selwyn. While Rolleston College is a venue that is used, it's not fit for purpose and is small. Performing Arts are an important part of many lives that has wide reaching benefits (especially for children). Drama, dance and music provides participants with the skills to think creatively, encourage to explore emotions and expand imaginations. Performing Arts also allows those from different cultures to come together as a community, connect and share.
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.
Point Number	964.9
Category	Activity > Other Categories identified by Staff > Road Safety
Comments:	ETTING TO SCHOOL SAFELY. With over 5,000 children in Rolleston getting to school every day, road safety is ridculous low. To the point, I can not in good concious send my kids to school on

	their bikes/scooters. Meaning I need to drive them to school and conjest the road even more, adding to the issue. There is no where safe to cross at Springston Rolleston Road or Goulds Road (we live in Banded Place and the kids go to Clearview). There are no lights, pedestrian crossings etc and while there are places to cross with a wee island in the middle, the traffic is so busy, kids are often rushing in front of on coming cars. It's only a matter of time before someone gets seriously hurt or worse. There is also a large area across the road from Clearview the parents currently park on. While it's totally understandable due to the lack of parking, it means people are driving across the footpath, again this practice is a accident waiting to happen. We either need to a) block it off or b) create safe entry/exits. I believe that the need to drive to pick up/drop off kids would reduce with adequate and safe ways for them to get to school by themselves.....
Staff Recommendation	Submission is acknowledged by Council. All points are known to Council and are currently being worked on with the Interim Speed Management Plan, Schools safety infrastructure planned for 24-27 NLTP. Council is working with Clearview and MOE to sort parking issues and the safety issues with driving over the footpath.

Point Number	965.9
Category	Activity > Lincoln Town Centre Upgrades
Comments:	**Lincoln Town Centre Upgrade** This project is strongly opposed!! Any proposal to expend $46m on such a development is a complete waste of time. Yes, I know someone once drew a pretty plan which could only be described as "nice to have".!!! Big is not necessarily beautiful, and certainly much more than a need to tidy up the "main street". No, it is not required to try and emulate the Town Centre improvements provided in Rolleston. I strongly suggest that the Council go back to basics and prepare something more in keeping with our lovely "rural village".
Staff Recommendation	Of the $46M for the upgrades that includes improving amenity aspects, $36M is related to core infrastructure works that are

	necessary anyway to address a failing carriageway and other near end of life assets like kerbing and footpaths. This also includes the signalization of the 4 key intersections necessary to cater for the expected traffic volumes and safety needs.
Point Number	965.10

Point Number	965.11
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	It is little mean for a Lincoln resident to tell Sheffield residents that their pool should be scrapped?? However all of the criteria supplied suggest that this is a sensible proposal.
Staff Recommendation	The submission is acknowledged. A new community centre for Prebbleton has been in considered in earlier Long-Term Plans and was previously signalled for construction in 2025/26. A needs assessment study was undertaken in 2023 which concluded that there was demand for a facility to service the community, and that it should provide a mix of social, community gathering and recreation spaces. The study further concluded that the facility needed to be located so it was easily accessed by the community. As there are uncertainties about the best site for the facility and the activities that it will cater for, further planning and community consultation is needed. To enable time for the necessary planning to happen, the project has been programmed for 2026/27 to 2027/28

Comments:	Digital improvements are fine but they have to be user friendly. Most Council forms are awful to work with, and make no provision for 'saving. the form and continuing its completion later. That should be standard practice.		

	No digital forms should be unleashed on the pubic until their customer friendly status has been checked
Staff Recommendation	Submission is acknowledged by Council.
Point Number	967.4
Category	Activity > Planning Further Community Facilities
Comments:	History and Heritage I congratulate SDC on improving their performance in this area, in supporting the work of the community's volunteer organizations in the area. This has been from the appointment of relevant Library staff, supporting improvements to historic buildings in the community, developing interactive township trails etc. On-going work is required on two of these in Lincoln - Pioneer Hall, which is 150 years old this year, and Liffey Cottage next to the Union church. That has been detailed by SDC landscape officers led by Derek Hayes (See attached email). For Liffey Cottage that is estimated to cost some $10,000. A further sum is required to protect the historic contents of Pioneer Hall with appropriate blinds. These are estimated to cost some $2,000. An important development has been the expanded role of the Selwyn History and Heritage Network (SHHN). Over the last two years that has injected $50,000 p.a. into the community's history ventures, largely through the volunteer organizations of the sector. Improving that amount to cope with inflation would be highly desirable. The eHive historic artifact cataloguing system has been a great initiative connecting Selwyn Historic Collections to the WWW, and thus making the individual items' details searchable and available worldwide. It is my belief that this eHive system should be taken on-board by the Council's Libraries. It will need some on-going funding, which the Libraries are best placed to manage. The need for on-going volunteer input of artifact details will continue - a direct financial contribution by volunteers to the Council. Finally, there is the issue raised at SDC's Council Meeting on 3 April 2024, the proposed Regimental History Centre (RHC) at Burnham. In my opinion this could be a key centrally placed facility, which could overcome the problems of the current 'unsafe' (Earthquakes) and leaking structure at Burnham Camp. The question is whether SDC should proceed with a feasibility study,

	which would be required to obtain a Central Government contribution. That would be appropriate as the Army is financed by Central Government not local. If agreed to and proceeded with such a development just off State highway 1 would be a major boost to local and international tourism as well as preserving major historical artifacts vital to understanding the role of the citizen army in the development of Kiwi culture. An alternative project at Leeston, well off the main tourism routes and farming rural/focused is replicated across the country, which Burnham cannot be. At Arthur's Pass, while still important and on a major tourism route, the proposals relate to National Park developments and are thus the primary responsibility of the Department of Conservation.
Staff Recommendation	The submission is acknowledged. Selwyn District Council acknowledges the importance of promoting and protecting heritage as it improves community wellbeing by connecting people and building the identity of Waikirikiri Selwyn. In 2023 Council approved the Selwyn Strategic Heritage Plan 2023-2027. The purpose of the Heritage Plan is to ensure there is a focus on improving support for heritage activities and supporting the work of local history groups and residents who are strongly motivated to collect, protect and enhance local place-based heritage. Council has two community heritage funds available: • **Community History Fund** which is to support kaitiaki (guardians, conservators, and protectors) communities and community groups for various history projects (and the operating costs of community history groups). • **Heritage Protection Fund** which is to encourage and assist owners with work required to maintain and enhance heritage buildings in the District as well as work required on protected trees.

Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	District Wide Rates for Water and Sewage For 114 years the Upper Selwyn Huts were self-administered with an annual licence fee to cover our internal expenditure. From this fund we were able to construct two successful sewer schemes the first in 1920 which included a holding tank that effluent was truck away, the second in 1987 which was a boarder dyke system. In 2011 the SDC took over the administration of the settlement. The SDC council has continued to claim the payment of this Licence Fee and now we are faced with an horrific invoice to gain compliance with the installation of a pipe line to the Pines in Burnham. The District Wide Rates for water and sewage; for the settlement I believe should have been moved on to this in 2011; following the transfer from the self-administered system. I have made three attempts as a speaker at the council meetings to have this change made, the only response I have received is that other rate payers would not be happy to approve this move. I am not happy the be faced with paying for our portion of the pipeline, when I can only use it for possibly 1 year or 5 years as the new draft Deed of Licence indicates. This issue was put to the SDC at the last Long Term Plan, and I spoke to the submission. From the Council meeting the only input was from Debra Hasson commenting that would not be fair on all the other SDC Rate payers if the Upper Selwyn Huts were added to the District Wide Rates. As a rate payer I am paying rates towards the following: General Purposes Rate Library Charge Recreation Reserve Rate Community Centre Rate Uniform Annual General Charge Water Race 9Amenity) Rate Swimming Pools Canterbury Museum Land Drainage With the latest attack on the Upper Selwyn Huts from the SDC related to the Draft Deed of Licence, it is amazing that there could be savings made in administration, if the Water and Sewage charges were added to the District Wide rates. When this Pipe to Pines scheme was initially proposed it was estimated to be $3M, now it is estimated at $4M on a total scheme estimated at $35M. It was expected to be completed by 30 June 2024 the date the ecan consent extension expires. Why

	is the Upper Selwyn Huts being made to pay anything towards this scheme? When will the pipe line to the Upper Selwyn Huts. If we refuse to sign the Deed of Licence or pay for the 30% of the $2M loan or the suggested bond, then we will be evicted, this is unacceptable for all families who call this place their home and you are not offering any compensation. On 19/04/2024 2:33 pm, Selwyn Huts wrote: Hi Graham, Thank you for your email. Council has reviewed this issue on several occasions and decided that it is not appropriate for the Upper Selwyn Huts to be part of the districtwide rates for water and sewage. As he Huts were never intended for full-time residence, it would not have made sense to have rated huts for these services when they were only occupied for a limited number of days each year. This historical precedence continued once the 365 day a year occupation was permitted. Thanks, Tim Hi Tim I am not impressed by this historic reply. The reason for not being included I believe is due to it being administered by a board and committee for 114 years and the associated cost came from license fees. Forward on to 2011 when the SDC took over administration that would have been the time to reassess the rates and include the water and waste within the District Wide Rates Your reply as to non-permanent residents has got nothing to do the reasons for excluding the USH. That was the case until 2015 when the DOL indicates that all dwellings are classed as permanent
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.
Point Number	968.4
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	*I request that the SDC review their decision not to include the Upper Selwyn Huts of the District Wide Rates for water and sewage.* *The reason given most recently referred to Upper Selwyn Huts as follows:* *"Huts were never intended for full-time residence, it would not have made sense to have rated huts for these services when they were only occupied for a limited number of days each year."*

	My current Deed of Licence refers to Licence Type: Permanent. This came about while Kelvin Coe was Mayor and under his direction, we were informed that the council under advice from council lawyers; could not restrict the occupancy to other than that being permanent. *The reference made in the past as to the change in occupancy was not as a result of people being made homeless post the 2011 Christchurch Earthquakes, there were some properties of hut owners who were using their huts for recreation purposes that made requests for family or friends to stay over due to their homes being red carded. This was not why huts became more populated but due to the change of status from non-permanent to permanent status prior to 2011.*
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Comments:	**<u>Upper Selwyn Huts Historical Status</u>** **It is time for the SDC to treat our settlement with the respect it is due. Instead of spending our money ans effort on trying to evict us, it would be more beneficial to look at protecting us.** **The Upper Selwyn Huts are part of the Jewel in the Canterbury Crown and it needs to be preserved. With reference to the time-line attached this settlement has historical status being established in 1888. There are huts that have been in one family for over 100 yeas. There has recently been one hut that it has been established was used to accomodate shearers as it was drawn by horses to many farms. This hut has been restored to it's original formate.** An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council

	unanimously determined that 'Hut licences and subsequent renewals are short term and ultimately for a finite period'. At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	The Selwyn district is blessed with a network of active and thriving communities. People across the district volunteer to make their community a better place to live. They are connected to the public spaces (whether it be buildings, reserves, pools, walking and bike tracks etc) in their area. People are willing to give their time to see public facilities looked after and improved. Community involvement in these public spaces gives people a sense of belonging, pride, connection to others and people who established these facilities. A modern term for this is 'Placemaking' - Strengthening the connection between people and the places they share; placemaking refers to a collaborative process by which we can shape our public realm to maximize shared value. With community-based participation at its centre, an effective placemaking process capitalizes on a local community's assets, inspiration, and potential, creating quality public spaces that contribute to people's health, happiness, and well-being. The Council doesn't need to lead Placemaking but enables our already active and brilliant community groups to do this. A more community-led approach by the Council would see a collaborative process that would strengthen our communities, see our public spaces better cared for more sustainably and more than likely save ratepayers money because more projects could be carried out more efficiently by local contractors. Some steps the Council could take: • Keep running capacity building workshops these are useful. • Keep a dedicated staff member to be the point of contact for Residents Groups. • Keep the Malvern Community Board or similar – it is useful for resident's groups to have someone who can attend meetings and help connect community and Council. The rural areas have many active resident's groups and it is not feasible for 1 or 2 Councillors to attend all of the meeting. • Streamline the booking system for public spaces to make them more accessible – both buildings and green spaces. • There are many great community events happening on our district, the Council does not need to run these but enable them to happen, not just with funding but making it easier for volunteers to organise and run the events in public spaces. Differentiate between large events and smaller events. A small event with under 150 people held on a Reserve should not require the same insurance and health and safety paperwork as a large event. Remove the need for small events to hold their own public liability policy. • Involve communities in developing plans and projects in public spaces. Since the dissolving the committees of Council there is no clear path for communities to make projects happen. In the past communities have been able to develop and fundraise for projects like walkways, sports areas, building renovations and more. This was way for improvements to be made to public spaces without needing to be fully funded by Council and had all the 'Placemaking' benefits mentioned above. • Collaborate with community groups that are already achieving great outcomes for Selwyn communities. • Have a

	system where working bees can be held by the communities to do basic maintenance in public space. • Don't let layers of bureaucracy stop good projects and activities happening in communities. • Better communication between Council departments to ensure a consistent approach.
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and Council will consider their feedback in strategy action planning.;
Point Number	969.7
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Rate increases need to be controlled, this likely means that discretionary spending on the 'nice to have' projects need to be trimmed. Fair enough, every business in New Zealand is facing this challenge at the moment. This is an opportunity to look at how the Council could empower and enable communities to develop some smaller projects in public space.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	969.8
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	This is a war memorial and that needs to be honoured. If the Council had invested in maintenance in past years, we would not be in this position. There are several options being put forward by the community, I hope the Council will consider these and work with the community to get the best outcome.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	969.9
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Investment in economic development will result in a return for our district. This is a productive use of ratepayers' money.

Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and Council will consider their feedback in strategy action planning.

Staff Recommendation	Submission is acknowledged by Council. [
Point Number	970.3
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	I am writing on behalf of the West Melton Rugby Club and would like the following to be considered please by the Council. West Melton has grown considerably over the past 10 years with a considerable number of new houses built and another new subdivision announced last week. We currently have over 500 members with a growing Touch competition in summer and at least one team in every grade of the Ellesmere winter rugby competition. Our facilities are also currently used by the West Melton Netball club. We would like to be considered for assistance in two areas due to growing demand and one area on safety grounds.
Staff Recommendation	The submission is supported by staff. The development of West Melton Domain has been an ongoing project since the Master Plan was prepared a few years ago in response to growing use of the Domain. A budget has been included in the draft LTP to continue with planned works which includes provision for additional car parks with a total of $800,00 allocated from 2024/25 to 2026/27 specifically for this work. In addition a budget has been included to contribute to the upgrade of changing facilities on the Domain with a budget of $436,000 set aside in 2025/26. Staff recommend that the development programme for West Melton Domain is supported to enable demand for facilities and spaces to be met.

Point Number	970.4
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	1, Field lighting. With five senior teams between Colts and Div. 1 the current lighting does not allow the teams to individually train. We currently have only one ground which is lit for night games (albeit it quite poorly) and two half fields. Due to the clubs central location within Canterbury along with the free draining soils we are often used by Canterbury Country and the Crusaders development teams for practices and pre season games. We would like the lighting of at least two full size fields up to the existing standard suitable to host night games with the third field to practice standard.
Staff Recommendation	Submission is acknowledged by Council. The sports lighting programme was prepared on a priority basis with a number of factors considered including health and safety, condition, lighting performance, and utilisation levels. The West Melton lighting upgrade is scheduled for years 1-3 of the Long Term Plan.
Point Number	970.5
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	2, Additional changing rooms. As stated, with five senior teams as well as a team in each of the teenager grades the allocation of changing rooms on any given Saturday is a challenge. We would also like these new facilities to be gender neutral, inclusive, welcoming and support the use and participation of all users, especially female. Prior to COVID West Melton did have a team in the Canterbury Div 1 Womens competition, and we currently have two young women in the Black Ferns who played all their school age rugby up to U11.5 years (the max allowed by NZR in mixed sex teams) at West Melton. Both of these two women are still regular visitors to the club and are instrumental in us seeing an increase in the number of girls playing in the junior grades. Unfortunately our existing changing rooms have shared showers and are hindering our ability to field female teams in the teenager and older age groups.
Staff Recommendation	The submission is supported by staff. The development of West Melton Domain has been an ongoing project since the Master Plan was prepared a few years ago in response to growing use of the Domain. A budget has been included in the draft LTP to continue with planned works which includes provision for additional car parks with a total of $800,00 allocated from 2024/25 to 2026/27 specifically for this work. In addition a budget has been included to contribute to

	the upgrade of changing facilities on the Domain with a budget of $436,000 set aside in 2025/26. Staff recommend that the development programme for West Melton Domain is supported to enable demand for facilities and spaces to be met.
Point Number	970.6
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	3, With a large number of primary school aged children in both the summer and winter competitions we have concerns about the current carpark layout which is a one way system with all vehicles having to go between the clubrooms and playing fields in order to exit the carpark. Although we currently put cones out to at least raise awareness for drivers, the random nature of these children going back and forwards between the clubrooms and fields (often unsupervised) is an accident waiting to happen. Adding to the existing deck and blocking through way access to the existing carpark would fix this.
Staff Recommendation	The submission is supported by staff. The development of West Melton Domain has been an ongoing project since the Master Plan was prepared a few years ago in response to growing use of the Domain. A budget has been included in the draft LTP to continue with planned works which includes provision for additional car parks with a total of $800,00 allocated from 2024/25 to 2026/27 specifically for this work. In addition a budget has been included to contribute to the upgrade of changing facilities on the Domain with a budget of $436,000 set aside in 2025/26. Staff recommend that the development programme for West Melton Domain is supported to enable demand for facilities and spaces to be met.

Comments:	Once submissions to the Long Term Plan have been received and reviewed, please advise publicly how many submitted and on what and also please advise the proportion of overall LTP value (cost) that Ratepayers can submit and have influence over. I am keen to see all projects progress at some future date and rolled out progressively rather than in any one Ten year plan term. People are hurting out here and managing rates down to around 8.5% average is achievable by Council and needs to be given effect to.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	973.9
Category	Activity > Other Categories identified by Staff > Rates
Comments:	I do not consider an average 16% rate increase acceptable at any level. The financial table notes appear at odds given it states an 8.5% increase and then sets a limit on average of 16%. While this is a relatively wealthy region there are many who will struggle significantly with this level of average rate increase. Average should be around 8.5% which is well above inflation in. I see no real effort in recognising affordability nor fiscal responsibility given this is a wealthy council. Time to cut the cloth and wait for the economy to pick up so people can afford to pay rates without cutting back on survival essentials. Ratepayers submitting to the LTP can only influence a very small proportion of any rate rise with Council usual stance being all the rest (including a large number of additional staff) is the cost of providing services. I don't see anything in these policies that directs officers to focus on essentials.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.

Point Number	974.3		
Category	Activity > Other Categories identified by Staff > Other Water		
Comments:	I was wondering what your thoughts are on the damage you are doing to the Property values along the upper Ellesmere Water Race system you are slowly closing down? Along with the increased anxiety that comes with the prospect of decreased Stock water for our livelihoods, Fire fighting ability on what seems to be increasingly		

	hotter Summer months and flooding run off during the rainy season, which can all contribute greatly to the mental health and well being of your constituents who are effected the most by the impending closure. For those of us that have it running through our front yards we will also be facing significant big Property value drops due to having what will effectively be open drains running through our landscaping (of which 10's of thousands have been spent to beautify and provide plant filtration for the water ways overall health over the years). There has been little to no consultation with Land owners in the 11yrs I have lived here, I have canvased my own research from the properties along what is left of the Race system and **ALL** want it to remain, to the point of being happy to pay a little more in rates for the ability to keep the resource. I sincerely hope you respond Warm regards, Jason
Staff Recommendation	The submitters comment is acknowledged. Consultation on the Upper Ellesmere Water Race closure was undertaken as part of the 2022/2023 Annual Plan. 89.6% of submitters were in favour or had no preference on the proposal. One submission requested that a short stretch of the water race be retained. Closure of this stretch of race has been deferred until years 3-5 to allow land owners to arrange alternative water sources.

Comments:	Councils should also prioritize the establishment of proper facilities to support arts and music programs for children within our community. Arts and music education play a vital role in fostering creativity, critical thinking, and cultural awareness among our youth. Unfortunately, the lack of dedicated spaces hinders our ability to provide quality education and enrichment opportunities. By investing in proper facilities, we can ensure that all children have access to the benefits of arts and music education, promoting their holistic development and enriching our community as a whole.
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.

Comments:	Firstly thankyou for doing some great work for Selwyn especially great new residential areas in Lincoln and Rolleston vitally needed after 70,000 displaced in Christchurch after the earthquakes. Impressive water runoff and underground drainage in the new areas. This now vitally important in our climate change future
Staff Recommendation	Submission is acknowledged by Council.
Point Number	979.4
Category	Activity > Planning Further Community Facilities
Comments:	You ask for people to read your documentation however as a leading council in NZ where is the infastructure to support the massive residential areas! I mean we desperately need more Medical centres, Doctors imported from India, Phillipines, England, States, nurses, and quite frankly Selwyns own General Hospital in Rolleston
Staff Recommendation	Submission is acknowledged by Council.
Point Number	979.6
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability

Comments:	We know our most pressing need is to keep people safe the climate change. Lead the way SDC you have a great Emergency Response team now
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. Council is developing a Future Selwyn Strategy that looks beyond the 10-year horizon to consider how we can respond to these challenges. The Council is also developing an Emissions Plan and Sustainability Plan to identify actions into the future.

Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	980.12
Category	Activity > Other Categories identified by Staff > Other Matters
Comments:	I do not agree with the closure of the Malvern Ward and our representatives. We are a different area to Rolleston, a huge area with a long history and we need to continue being supported and represented. A long history in farming and will continue into the future. Do not cease our community board either. Our voices should and must be heard, we are entitled to have our say.
Staff Recommendation	Submission is acknowledged by Council It is noted that the Representation Review is subject to a separate process.

Submitter Number:	981	**Submitter:**	Details Withheld
Point Number	981.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:**		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP		
Point Number	981.2		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we		

	want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

	Question: Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	982.11
Category	Activity > Chlorination
Comments:	Water: Chlorine, not sure why we needed it, the water was lovely. This cost us $1400 to put in a filtration system to ensure that we do not ingest what is actually bleach. You say minimal amount, so why is it so strong? Ingesting Chlorine changes the gut biome, which in turn creates bad health, this is not looking after the people, same goes for Fluoride which is a by product. I'm sure people get enough from their toothpaste. I believe in Europe they use Ultra Violet Light to decontaminate all drinking water.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. Under the Drinking Water Quality Assurance Rules there is a requirement to add a small dose of chlorine to the piped network after treatment. To be able to move to intermittent chlorination (for eligible schemes) an exemption from Taumata Arowai is required. Exemption will only be granted by the regulator if infrastructure and systems can lower risk sufficiently. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies. The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health
Point Number	982.12

Category	Activity > Lincoln Town Centre Upgrades
Comments:	Lincoln Town Centre: What is with all this beautify towns? The road could do with fixing due to pipes being upgraded, but seriously there is nothing wrong with how it looks - more waste of money. How much more development do you want Lincoln to have, isn't that an environmental impact in itself? Consumerism is the environmental issue!
Staff Recommendation	Of the $46M for the upgrades that includes improving amenity aspects, $36M is related to core infrastructure works that are necessary anyway to address a failing carriageway and other near end of life assets like kerbing and footpaths. This also includes the signalization of the 4 key intersections necessary to cater for the expected traffic volumes and safety needs.
Point Number	982.13
Category	Activity > Walking and cycling improvements
Comments:	Rural Walking and Cycling improvements: I hope cyclist wear a bug net over their heads when they cycle around lake Ellesmere lol! In the current climate I don't think this is a NEED, but a WANT, most people are satisfied with the Little River Trail, to be honest not a lot of people use the full trail around Lincoln, Prebbleton, Wigram etc The Arthurs Pass cycle trail would cost a lot of $, are the tourist going to pay to use this? again too much $ to spend and not a lot to gain from it.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	982.15
Category	Activity > Compulsary organics collection
Comments:	Compulsory Organics: I thought this would be a good idea, however you use the word ORGANICS, when it is SCRAP FOODS which have ultimately come from commercially grown crops which are sprayed with pesticides, herbicides, fungicides etc, meats that have antibiotics etc in them, not to mention compostable bags which have plastic in them still, and garden clippings that have more likely been sprayed with Weed & Feed and/or Roundup. It is no wonder commercial compost is not that great to use on your garden

	anymore. Is the SDC going to test for Contaminates in the Composted material before reusing it? This is an Environmental Issue - maybe consult with ECAN. What if you compost all of your own waste? why would you need a Green Bin? I think forcing this on Rate Payers is a Very Bad Decision.
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. We do acknowledge that this is an additional unwanted burden for those who already compost their own food scraps and garden waste at home. This regulation is outside of Council's control. The Ministry for the Environment has issued a directive that all urban areas with a population of greater than 1,000 residents must have a food scraps/organic collection by 1 January 2027. Every Council in New Zealand is obligated under the Waste Minimisation Act to comply with this. Regarding contaminants, Council's contractor regularly tests our compost for a range of contaminants using an accredited laboratory. We do not accept compostable/biodegradable plastics in the kerbside organics bins, any plastics are removed as contamination.
Point Number	982.16
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Enhancing customer experience through digital solutions: You speak of Environmental and Social Well being, so why do we need more digital, don't we need to actually have connection with people?
Staff Recommendation	Face to face interaction will continue to be an important part of how we interact with our communities. Our digital approach is designed to make things more streamlined, connected and efficient.
Point Number	982.17
Category	Activity > Other Categories identified by Staff > Rates
Comments:	I am really not happy seeing my rates go from $3500 up to $7000 by 2034 - I will be 68 years old then and don't think $135 per week out of my (hopefully) pension will serve me well. Locals are already saying that retirement is no longer a reality and that they have to keep working to afford current conditions.
Staff Recommendation	That the submission is acknowledged by Council.

	The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	982.18
Category	Activity > Council's Office Improvements
Comments:	Council Building Upgrading..... how many times do you need to do this? AGAIN Times are Tough, get creative and use the space you have! scale back like all of us have to do.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	982.19
Category	Activity > Chlorination
Comments:	Environmental Well Being: I think you need to talk Health over all - which is gut health and no Chlorine.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged.
Point Number	982.21
Category	Activity > Other Categories identified by Staff > Borrowing Levels
Comments:	Financial: What can I say going from $300 million borrowings to over $600 million, it is so easy just to make up projects and just go and borrow, to create debt for us Rate Payers so the SDC can have an Asset on their books. You do know you own nothing unless it is paid in full and discharged?
Staff Recommendation	Submission is acknowledged by Council.
Point Number	982.24
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Same goes with the Leeston Pool - No one uses it. We need to cut cost everywhere!

Staff Recommendation	It is acknowledged that the submitter has selected to close the Sheffield Memorial Pool.
Point Number	982.25
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	I really don't think it is the councils job to show, teach business owners how to run a business. The council struggles to manage itself. So $9m is totally wasteful. Or is this to pay for Networking Breakfast or Lunches? Again people are struggling to pay their mortgage, fuel, power, RATES, so shouldn't the SDC be looking at cutting the budget, just as we do when things get tough? Big NO from me.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and holds a view that Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	982.26
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Again.... Ditto. Times are tough, use what you have, suck it up. My phone and computer are over 5 years old, they still work, so will yours.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	982.27

Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	I pretty much don't understand any of this section, it's all fluff to me. I would like to know how much the Mana Whenua are funded each year and what it is we are paying for?
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognizes the importance of partnerships; building strong partnerships with iwi is vital for Council to fulfill its obligations to the entire community. Te Tiriti O Waitangi (Treaty of Waitangi) is a founding document of New Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with iwi, to have any meaning, requires consideration of iwi position and contribution to discussion/debate. Selwyn District Council recognizes the importance of responsible use of ratepayer funds. Investing in relationships, and actively working with iwi, is not just the right thing to do under Te Tiriti o Waitangi, it's also an efficient way to achieve positive outcomes for all Selwyn residents.
Point Number	982.28
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	Climate change should be under ECAN, not the council. I'm 58 years old and have seen drought, floods, cyclones, dust storms, hails storms, wind etc and absolutely beautiful weather. It comes and goes, I am yet to believe there is a climate crisis, and where is your data to back it up? You might want to watch the "Climate the Movie" and ask those scientist for their opinion as it actually is inline with what I have seen over my life time.
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions.
Point Number	982.30

Category	Activity > Other Categories identified by Staff > Debt Levels
Comments:	Again - The world is in an Economic Crisis - STOP CREATING PROJECTS THAT CREATES DEBT
Staff Recommendation	That the submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.
Point Number	982.31
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Comment:** We have many small parks around the different subdivision, in general I don't see anyone using them. The great sandpit on Clausens Ave is probably used by the local cats to poop in and not used for purpose. Since the last two subdivisions have gone in, many, many people are walking right around town - even the running club has expanded their tracks, so I don't see a need for more paths and more tree's in the park.
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility.
Point Number	982.32
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Comment:** Minimal amount to spend on the park.

	If Landscaping is required this should be done by the community - I really think the word "Community" is not really used to its full potential - this would save $ Also, water? who pays for the water going on to plants? The park is fine the way it is.
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility.
Point Number	982.34
Category	Activity > Infrastructure DC
Comments:	Development Contributions: "to meet the cost of new community infrastructure required because of growth" - as per your Age Distribution on page 12 - their is a decrease in Age 0-64 and a 5% increase in 65+, so I think you need to look at infrastructure for the Elderly and not more sports halls for youth!
Staff Recommendation	Submission is acknowledged by Council. The demographic changes in the district community over time are well understood. There is an aging population that we will need to cater for as well as other age groups in the community that will continue to expand from population growth. We use a range of demand factors (including demographic changes) to underpin programmes and facility requirements including recreation and leisure trends and specific needs analysis. Council is mindful of the changes that may occur over time and also consider flexible designs for facilities that can be more easily modified or re-purposed for different uses. In acknowledging the aging population, Council is currently developing Te Paepae - Aging Positively Strategy that sets out Council's commitment to age-friendly district and how it can support older people in the community.
Point Number	982.36
Category	Activity > Strengthened Partnerships
Comments:	Strategic Relationships: Mana Whenua what is the break down of expenditure for the $300k funding, what are we paying for?
Staff Recommendation	The submission is acknowledged. Council is committed to responsible use of ratepayer funds. Council considers that investing in relationships, and actively working with local Runanga , is not just the right thing to do under Te Tiriti o Waitangi, it's also an efficient way to achieve positive outcomes for all Selwyn residents.

	Council recognises it has a large volume of often complex needs and time-consuming demands that its places on Runanga representatives, who are generally volunteers, in order to assist Council meet its legal compliance requirements, develop and implement strategy, guide adherence to cultural protocols and good practice. The mechanism of contribution towards the two Runanga is considered an appropriate and cost-effective way to support the contribution of Runanga representatives to supporting Council to achieve positive outcomes for all Selwyn residents.
Point Number	982.37
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Volunteering: Bring back more volunteering - isn't this what "Community" is about, not creating projects and just getting a commercial business to complete it. Volunteering for looking after halls - seems we have many retirees in SDC who could handle this.
Staff Recommendation	The submission is acknowledged. The Council has capacity building program which includes information to support volunteers.;
Point Number	982.38
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	I really think the SDC needs to CUT BACK and stop creating projects that cost Millions - I am a Rate Payer and I am asking you to just STOP!
Staff Recommendation	Submission is acknowledged by Council.
Point Number	982.39
Category	Activity > Other Categories identified by Staff > Crime/district safety
Comments:	Policing: I do not want surveillance camera's installed everywhere - this is a breach of my privacy.
Staff Recommendation	Submission is acknowledged by Council.

Point Number	982.40
Category	Activity > Planning Further Community Facilities
Comments:	I would like to go with the Community Group Plan that has been created. Having a Civic Hub (Library / Community Space) at Anderson Square end would better for the Leeston Primary School children that use the Library the most, it would be a safer passage for them going to and from. Having a Library near a sports area is really not suitable. Also to have a meeting room that can be accessed from the outside with a WIFI security code, that a volunteer can man for the public to use after hours (Like Tai Tapu Hall). A new smaller building built near the Rugby club would be better. Or even build a smaller SPORTS building with Car Parking where the Contaminated Ground is. I believe if an area is CAPPED you do not have to remove contamination, this would save $.
Staff Recommendation	The submission is acknowledged. Council staff consider that there are significant efficiencies and increased benefits to be made in ongoing operational costs and usage if facilities are multi-purpose / multi-functional, where that makes sense to do so.

Submitter Number:	983	**Submitter:**	Fiona McDonald for ECAN Central Biosecurity Advisory Group
Organisation:	ECAN Central Biosecurity Advisory Group		
Point Number	983.4		
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability		
Comments:	The advisory group supports the regular review of the Climate Change policy and encourages the council to ensure that it considers the threats to biosecurity and boidiversity that climate change brings with it and the policy supports mitigation and prevention.		

Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions. The Council is also developing an Emissions Plan and Sustainability Plan to identify actions into the future. Council is concerned by climate change related threats to biosecurity and biodiversity and as such will continue to monitor those effects, and work with our community and agencies to develop and action associated mitigation and prevention solutions.
Point Number	983.5
Category	Activity > Strengthened Partnerships
Comments:	The advisory group supports the council's work to ensure that mana whenua and iwi Māori are included in all stages of the council decision making in a genuine and authentic way.
Staff Recommendation	The submission is acknowledged.
Point Number	983.6
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million

	Estimated impact on rates: Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council
Point Number	983.7
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26

Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes two indoor courts. **Project cost:** Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million) **Estimated impact on rates (per year):** $19.91 **Funding:** Rates: 57% Development contributions: 43% * **Comment:**
Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.
Point Number	983.10
Category	Questionnaire > Matters For Community Guidance

Comments:	**Question:** Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	983.12
Category	Activity > Walking and cycling improvements
Comments:	Support the development of the cycle trail network with a trail from Arthur's pass to the east coast and a trail around Te Waihora connecting to the Little River Rail Trail. Particularly the Arthur's Pass to the coast trail, this would be a huge recreation and tourism asset for the district. Selwyn is missing a massive and growing cycle trail market, with all of the economic and well being benefits that go alongside this infrastructure.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	983.13
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	The Dark Sky initiative is another area that has huge tourism potential that is currently not being realised in Selwyn. Castle Hill Village with Kura Tawhiti beside it is the ideal centre to focus on by making the street lighting Dark Sky compliant and applying for recognition.
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and would like to see Castle Hill progress towards Dark sky recognition. Dark sky considerations will

	be part of the development of Action Plans associated with the Economic Development strategy.
Point Number	983.15
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	I would like to see the council support the National Wilding Conifer Control Programme and the Canterbury Regional Pest Management Plan by committing to removing all pest trees from its reserves that sit within Wilding Conifer Control areas such as Castle Hill Village as part of the Long Term Plan.
Staff Recommendation	Council recognizes the environmental risks of weed spread from all conifers in the high country, including those on Council reserves in the Castle Hill village (whilst noting the significant stands of conifers on other land surrounding the village). As such Council staff have been working with village residents and Environment Canterbury to remove pines from the Council reserves and look at planting suitable native plants to provide form and cover. All the contorta species have been removed and a draft Reserve Management Plan has been prepared to guide management of the reserves. Staff agree that suitable Council funding should be available to complete the pine removal and associated replanting project.
Point Number	983.16
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	While Darfield is only 10 minutes away, the travel distance/time for those that are on the west side of Sheffield (such as Castle Hill) increases.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool.

	Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Submitter Number:	984	**Submitter:**	Helen Cockburn
Point Number	984.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:**		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council		
Point Number	984.2		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**

Staff Recommendation	Submission is acknowledged by Council.
Point Number	984.7
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a shared Hub/Clubrooms built at the proposed new Netball & Tennis facilities based in West Melton. West Melton Netball & Tennis share the vision to provide an inclusive, nurturing & welcoming community focussed environment to develop players of all ages, creating longevity for the clubs and the community. What we are asking for is a Hub to bring our community together to create a sustainable future of Netball & Tennis but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the

	following. Netball Balls, Gear Bags, Hoops, Training Equipment, Tennis Nets, Tennis Poles, Tennis Balls and Trolleys. The space would require a kitchenette suitable for making Tea & Coffee and Afternoon Tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Category	Activity > Other Categories identified by Staff > Rates
Comments:	Would like to see the general rates funded by a greater proportion of uniform annual general charges and resulting less use of capital value rating. Capital value use for general rates means large houses or rural properties are funding a way greater share of the general rates than they should be.
Staff Recommendation	That the submission is acknowledged by Council.

Point Number	989.9
Category	Activity > Infrastructure DC
Comments:	Increase development contributions to ensure they cover a fair share of infrastructure that is already in place, and new or improved infrastructure that is needed due to the development of housing or commerce. This needs to consider roading, water, recreation and community needs.
Staff Recommendation	Submission is acknowledged by Council. The development contributions for all services have been reviewed and adjusted leading into the preparation of the draft LTP. This has included the introduction of a new development contribution for community infrastructure. Based on the programme of capital works, a thorough and robust process is undertaken to calculate the development contribution amount that can be fairly and reasonably applied to the growth community for a project. The calculation is made in accordance with the Council's Development Contribution Policy and the legislation that underpins the policy as well as guidelines on administering the policy.
Point Number	989.10
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	Finish the half done projects at the Hororata Reserve, as agreed and budgeted in the Master Plan developed by Hororata community and SDC. No money has been allocated in the first year, yet there are at least four projects on our Reserve which have very patiently been awaiting completion. The walkway track around the perimeter is a very well used facility, but part of it has been sitting excavated for many months now as it awaits shingle fill. The horse cross country jumps have been repaired as required for safety upgrade, but are yet to be moved back out to the main Reserve. As part of the safety upgrade from the trotting trainers, track fencing needs to be re-aligned and a boundary fence to contain parked horse floats and safety barrier between pedestrians and horses. Revenue could then be collected again from the casual pony club riders using the jumps, and the trotting trainers using the grass race track. It will be great to finally see the new toilet block operational after many months of sitting idle. Please put some funding back into the first year for the Hororata Reserve so at least these projects can be completed. This would still leave several projects that were planned for this first year pushed back into a later year, such as demolishing the old toilet block, landscaping the new pedestrian entrance, closure of a main

	entrance which is on a bend in the road and subsequent upgrade of the other main entrance off the straight piece of road. The Hororata Reserve is a great asset for the whole Selwyn District and we need to ensure improvements are ongoing. The community is losing the interest and passion it had historically for our Reserve as we are not allowed to be involved in its care or maintenance, and at times see it in a poorer condition than it used to be kept in. SDC need to consider how the community can be involved in the upkeep and care of the Reserve and continue to take pride in our fantastic asset.
Staff Recommendation	Staff support the submission to bring the development programme at Hororata Domain forward one year to 2024/25 because some work is a continuation of projects already underway and there is also a need to carry out public health and safety works to the equine facilities and trotting track. Staff agree that improved communication and support from Council will be beneficial and are happy to work with the community on Domain matters and how the community can continue to be involved on a volunteer basis. The Reserves Operations Team will look to ensuring there is a consistent point of contact in Council to support the Domain. Staff recommend that part of the budget ($270,500) for Hororata Domain development is brought forward from 2025/26 to 2024/25 to enable urgent and committed works to proceed.
Point Number	989.12

So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million		

	Estimated impact on rates: Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding
Point Number	990.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design.

	Project cost: Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Point Number	990.7
Category	Activity > Lincoln Town Centre Upgrades
Comments:	It is high time money was spent in Lincoln. You, the council, have paved the way for a huge influx to the population of a small country town that does not have the infrastructure to support it. We need our Town Centre upgraded now as promised, before the influx not after. In conjuction with that, our roads need to be improved to take the already increased traffic and big trucks need to be diverted away from Lincoln Town Centre
Staff Recommendation	The planned upgrade of Gerald St is to accommodate the additional traffic expected however a project of that magnitude cannot be done overnight and has to be staged. The widening and safety upgrade of Ellesmere Road is included early in the draft LTP. A Southern Bypass of Lincoln had been considered before and discounted by Council due to the unwillingness of developers to accommodate it, comparatively low use and high cost. Council is considering options for the eastern town center upgrade that will need to strike a balance to still provide for through traffic on this arterial route along with improving the overall amenity of the area to make it safer and easier to move around by pedestrians and cyclists while supporting local businesses.
Point Number	990.12
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Lincoln, with a much bigger population, does not have it's own pool. The drive to Selwyn Aquatic Centre is further than 10minutes for all the people who wish to use it.
Staff Recommendation	It is acknowledged that the submitter has selected to close the Sheffield Memorial Pool.
Point Number	990.13
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Council makes promises to do things but never achieves much. Put the money into something tangible.

Staff Recommendation	Submission has been noted.
Point Number	990.14
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Is it to help the community or for the councils own benefit????
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

This location is preferable because of its proximity to Leeston Primary School, a major user group. A library is not compatible with a busy sports ground and could create parking issues when major sports events are held. The current location provides a more balanced spread of facilities rather than concentrating them at one end of the town.
Staff Recommendation	The submission is acknowledged. The location of other local amenities and facilities has been taken into account in relation to this matter.

Comments:	Broadfield Garden, currently on the market, is a garden of national and international significance. Purchase of this unique asset by SDC would provide major support for the economic development strategy by acting as a magnet to draw visitors to Selwyn from across the country. It is already visited by tour groups and with skillful promotion this could become a major attraction for Selwyn. Currently there is no comparable facility in public ownership within Selwyn and it would take 30 years or more to develop such a facility from scratch.
Staff Recommendation	Staff acknowledge the quality and significance of Broadfield Gardens and the opportunity it presents as a formal garden to complement the existing open spaces. However, the proposal does have some costs and risks that need to be weighed up alongside other options. This includes the cost of purchase (and how that could be funded), the cost of additional infrastructure to enable public use, the on-

	going cost of maintenance and potential revenue opportunities to offset costs. There are also some limiting factors such as proximity, accessibility and connectivity. It is noted that Council is considering development of a formal garden at the District Park as part of stage 1 development that would focus on 3 main types or components of formal gardens: botanic plantings (including natives, exotics and floras); sister city garden opportunities; community gardens. Although the acquisition of the garden presents an opportunity for Council to provide a special area of open space that is not replicated anywhere else in the District, staff are of the view that the proposal is difficult to support at this time given the costs and other factors mentioned above. Staff recommend that Council does not purchase Broadfield Garden at this point in time but considers what other mechanisms are available or support it could provide to retain the garden for the district's benefit.
Point Number	991.8
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	The once-in-a -generation opportunity exists for SDC to purchase a major landscape garden that already exists within the district, Broadfield Garden on Selwyn Road. This is within easy reach of major population concentrations in Rolleston, Lincoln and Leeston. In addition to acting as a stimulus for economic development by bringing visitors to the district, purchase of Broadfield would ensure that it remains accessible to residents as a cultural, botanical and recreational resource. Broadfiled's collection of New Zealand native plants is significant and the way they have been utilised as part of an outstanding landscape is unique in New Zealand.
Staff Recommendation	Staff acknowledge the quality and significance of Broadfield Gardens and the opportunity it presents as a formal garden to complement the existing open spaces. However, the proposal does have some costs and risks that need to be weighed up alongside other options. This includes the cost of purchase (and how that could be funded), the cost of additional infrastructure to enable public use, the on-going cost of maintenance and potential revenue opportunities. There are also some limiting factors such as proximity, accessibility and connectivity. It is noted that Council is considering development of a formal garden at the District Park as part of stage 1 development: that would focus on 3 main types or components of formal gardens: botanic plantings (including natives, exotics and floras); sister city garden opportunities; community gardens. Although the acquisition of the garden presents an opportunity for Council to provide a special area of open space that is not replicated anywhere else in the District, staff are of the view that the proposal is

	difficult to support at this time given the costs and other factors mentioned above. Category	Activity > Other Categories identified by Staff > Parks and Reserves		
Comments:	I think that the Selwyn Dog Training Club needs a dedicated training area and grounds. This would help the community by giving more availability for training times/days and also mean that the Foster Dog Park would always be available to the public. This would give the club ground that are free from dog messes and the ability to run training seminars and competitions free of time guidelines. This would be a massive asset to the community.		
Staff Recommendation	Staff agree that the current site has limitations in terms of space and conflict with casual use of the dog park especially during events. More dedicated dog friendly areas are needed to service Rolleston and, with the impending development of the District Park on Levi Road there is an opportunity to incorporate dog-friendly spaces and this need has been identified in early planning undertaken to date. Space to accommodate a dedicated area for the Selwyn Dog Training Club needs to be further explored in terms of identifying the best location and how this could be set up and funded. Staff recommend that further investigation is carried out in consultation with the Selwyn Dog Training Club to determine the best future		

	location for the club and what support Council would provide for relocation of activities.

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	The Sheffield War Memorial pool has always been a great asset to the Sheffield Community and up until it was taken over by the Council was regularly used by the community as they could decide when they wanted to have a swim due to work and family commitments. The key system enabled this to happen. If the pool was to be closed this would be to the detriment of the whole community. The school needs a pool where water safety can be taught and I know that this would not happen if they had to travel to Darfield. The time of travelling and the cost to the school and parents would prohibit this. You state that families can travel to Darfield to have a swim, but parents cannot always afford the extra petrol and may not even have a vehicle available to take them (some families only have one car and this is used to commute for work). I have heard that the Darfield pool is often at capacity on a hot day therefore, families could be turned away. Most children love the water and I have concerns that with our close proximity to the Waimak Gorge that they could walk or bike down there and get into trouble. There has never been any safety issues in using the pool under the key system for the many years that I have lived in Sheffield. We currently have 70 sections coming up for sale in Sheffield and with this development the need for a pool would increase substantially. I propose that the Council donates the Swimming complex back to the Sheffield Community and gifts the money that they are proposing to use to demolish a War Memorial to a selected committee of Sheffield residents to enable the repairs and future running of the pool for a good number of years.
Staff Recommendation	The submission is acknowledged. A new community centre for Prebbleton has been in considered in earlier Long-Term Plans and was previously signalled for construction in 2025/26. A needs assessment study was undertaken in 2023 which concluded that there was demand for a facility to service the community, and that it should provide a mix of social, community gathering and recreation spaces. The study further concluded that the facility needed to be located so it was easily accessed by the community. As there are uncertainties about the best site for the facility and the activities that it will cater for, further planning and community consultation is needed. To enable time for the necessary planning to happen, the project has been programmed for 2026/27 to 2027/28

Submitter Number:	995	**Submitter:**	Penny Hallowes
Point Number	995.3		
Category	Activity > Other Categories identified by Staff > Parks and Reserves		
Comments:	I have been a Selwyn Dog club member for about 15 years and in that time the number of members has increased hugely. The number of pet dogs in Rolleston and Selwyn in general means that a dedicated place for dog sports and training is becoming essential		

	A dedicated area (of approximately 3–4 hectares) would allow our club to: Train dogs in a clean environment that is free from a build-up of dog droppings. People who are competing and training their dogs tend to be the more responsible owners when it comes to cleaning up after their dogs. A dedicated area for dog training and competition purposes, which would become a new home for Selwyn Dog Training Club. A surface that is not uneven and full of holes because People of all ages run their dogs and a surface that is safe to run on for old and young would be a huge advange for safety. Structure a weekly club-wide training programme that is not hindered by booking times and people who don't care if they walk through in the middle of it. Run competitions, assessments, seminars and workshops without being restricted by limited booking dates and times. The club does it's best to help with training people and their dogs in basic obedience. Have an area where visitors could camp while attending competitions, with Council approval. People with several dogs who travel to dog show often find it hard to get accomodation. Many have campervans, and being able to stay on the grounds would attract more people from all over the country.
Staff Recommendation	Staff agree that the current site has limitations in terms of space and conflict with casual use of the dog park especially during events. More dedicated dog friendly areas are needed to service Rolleston and, with the impending development of the District Park on Levi Road there is an opportunity to incorporate dog-friendly spaces and this need has been identified in early planning undertaken to date. Point Number	996.7
Category	Activity > Other Categories identified by Staff > Road Safety
Comments:	We need safer intersections in Selwyn. Keeping trees trimmed well back so we can see clearly without sticking out into danger. Also keeping the trees back off roads where they cause shade and ice in winter.
Staff Recommendation	Submission is acknowledged by Council. Council has an intersection prioritisation framework for upgrades. Council regularly monitors vegetation on the network but takes public input to help inform us of any areas that need work.
Point Number	996.10
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	The infrastructure in Glentunnel needs closer monitoring. We need better management of stormwater drains. The town struggles with surface flooding at every rain event. Also the water supply has been turned off often without notice. Upgrades need better management

	with more communication to the residents. Mistakes happen and water is being cut but how do we seem to come across them ourselves without a courtesy email suggesting maintenance issue.
Staff Recommendation	The submitters comments are acknowledged. As part of the surface water capital programme, budget has been allocated to extend the network of water level and rain fall monitoring. As a restricted water supply, scheme properties should have 3 days storage. Planned outages are communicated by letter to affected properties and on Council's website.
Point Number	996.11
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	We would like to embrace our historic significance and show others about the huge industry that once existed here. If we could access funding to keep the old brick stables standing this would be a real asset to our community.
Staff Recommendation	The Submission is acknowledged. The Council's community funding programme supports a wide range of community organisations with projects and activities in Waikirikiri Selwyn.
Point Number	996.12
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	A potable water station outside the community centre in Glentunnel is necessary for campers. They are using the drinking fountain.
Staff Recommendation	The submitters request for bulk community water filling point in Glentunnel is acknowledged. Glentunnel is a restricted water supply that requires properties to have water storage. Staff recommendation is to continue to provide access to drinking water via the existing fountain and direct campers to camping facilities that will have storage tanks or townships with on demand supplies.
Point Number	996.13
Category	Activity > Maintenance and Renewals Funding Roading

Comments:	I'm in support of widening Leaches Road to the Windwhistle stop sign. The Rakaia Gorge at Scotts Cutting needs better barriers. SDC needs to work with NZTA on improving these.
Staff Recommendation	Submission is acknowledged by Council. This job is worth considering but depends on available funding and needs to be prioritised against higher traffic volume roads that need this treatment.

Submitter Number:	997	**Submitter:**	Annette Richards
Point Number	997.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** Even when funding is clearly identified, I dont see the need for 2 Park and Rides in Rolleston. There needs to be more public transportqtion and facilities from Darfield to Kirwee to West Melton to Yaldhurst joining onto the Christchurch transport system.		

Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. The new Park N Ride facilities at Rolleston are planned for 2029-33, at which time additional capacity will definitely be required to align with the additional PT services planned by Environment Canterbury over this time. Council will be investigating what further PT services can be provided across the wider District, further to what Environment Canterbury can provide.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22

	Funding: Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**

	Question: Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	997.9
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Dont spend $290,000 to close it. Offer it to the Sheffield Community first for them to look after it or to another interested party. the price could be low or free. it doesnt make sense to spend $290,000 to gain nothing. $1 million upgrades seem excessive. Ask me and I can recommend someone who has been involved with fixing pools.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Point Number	998.8
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a share Hub/Clubrooms built at the proposed new Tennis & Netball facilities based in West Melton. West Melton Tennis & Netball share the vision to provide an inclusive, nurturing & welcoming community focused environment to develop players of all ages, creating longevity for the clubs & community. What we are asking for is a hub to bring our community together to create a sustainable future of tennis & netball but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Tennis nets, tennis poles, tennis balls/trolleys, netball balls, gear bags, hoops & training equipment. The space would require a kitchenette suitable for making tea & coffee and afternoon tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Category	Activity > Council's Office Improvements

Comments:	Council office improvement should not be done waste of money. Employ less people work harder and smarter and the upgrade isn't needed.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	999.9
Category	Activity > Other Categories identified by Staff > Rates
Comments:	This council has had tremendous growth over the pass ten years and large increase in rates it should have a cash surplus, but with bad management they have accumulated debt and still want to borrow more. Rate payers don't want the increase of 8% or 16% you are proposing.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	999.10
Category	Activity > Walking and cycling improvements
Comments:	Cycle trail to the alps not needed will end up costing way to much. Rate payers won't get time to ride them they will be doing overtime to pay there rates bill.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	999.11
Category	Activity > Lincoln Town Centre Upgrades
Comments:	Lincoln town centre upgrades. The cost is to high and most of what you are proposing are not needed like Cycle links, cycle lanes, transport options for reducing climate impact this is just BS. We done need attractive town centre we just need a practical town centre.
Staff Recommendation	Of the $46M for the upgrades that includes improving amenity aspects, $36M is related to core infrastructure works that are necessary anyway to address a failing carriageway and other near

	end of life assets like kerbing and footpaths. This also includes the signalization of the 4 key intersections necessary to cater for the expected traffic volumes and safety needs.
Point Number	999.13
Category	Activity > Strengthened Partnerships
Comments:	Funding 300k per year for mana whenua to partership better outcomes ?? In ten year 3 million dollars for what outcomes? Don't support.
Staff Recommendation	Selwyn District Council recognises the importance of responsible use of funds: The Council is committed to responsible use of ratepayer funds. Investing in relationships, and actively working with Iwi, is not just the right thing to do under Te Tiriti o Waitangi, it's also an efficient way to achieve positive outcomes for all Selwyn residents.
Point Number	999.17
Category	Activity > Strategic Investment Strategy
Comments:	Strategic investment strategy! maybe you should come up with the plan first and execute it, save the income from your smart income generating from outside of rates then spend the saving. Then you won't have a debt to pay off.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	999.19
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Stop spending money we done have. The rate increase's you are suggesting are ridiculous. The increasing of the debt I don't Support people are not going to be able to afford to pay the rate in the future.
Staff Recommendation	That the submission is acknowledged by Council.

	The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	999.20
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Business financial strategy Business initiatives. Stay out of this the council have poor business nous, terrible budget and timeframe blowouts. This will not benefit rate payers.
Staff Recommendation	It is acknowledged the submitter holds a view that Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.

Category	Activity > Planning Further Community Facilities		
Comments:	The Selwyn district has many areas for recreation; sports facilities, public gardens, community halls and pools to name a few, however, there are no dedicated facilities for the performing arts. Of course sport has an important place in our society but so do the arts. Surely not every single person in Selwyn is interested in sport and maybe to maintain a diverse and broad minded community, offering facilities for the arts might be part of your plan. There are many groups who could benefit from high quality purpose built performance space and it may		

	inspire more to form in the future. The arts provide ample volunteer opportunities for locals and also provide local entertainment and opportunities for audiences to contribute to Selwyn's local economy before and after they attend performances. It gives Selwyn residents a chance to enjoy local businesses and establishments in Selwyn by going for dinner or meeting with friends before or after events. I would appreciate your consideration in this matter of adding a dedicated arts facility to the council's long-term plan. Yours Sincerely, Claire Clark
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.
Point Number	1000.5
Category	Activity > Planning Further Community Facilities
Comments:	I am a founding member of CentreStage Rolleston. We have just come to the end of a season of the Broadway musical, Mary Poppins. We sold over 2000 tickets for this show, which equates to around 10% of the population of Rolleston meaning that 1 person in 10 came to see our show. This says to me that performing arts are welcomed in the Selwyn District. Our key partnership is with Rolleston College where CentreStage is able to use the school's auditorium for performances. We are very

grateful for the opportunity to use this space but it has limitations. We are bound to put on shows in the school holidays when many other groups are too as they also perform in schools. This means we are all competing for cast but also audiences as people can't always commit financially to pay for tickets to 4 different shows in 2 weeks. The Rolleston College auditorium was built as a school hall and has many limitations when used as a theatre meaning we have to bring in a lot of equipment to be able to put on the high quality theatre that we pride ourselves in.

CentreStage Rolleston was formed by a group of enthusiastic Rolleston locals with a wealth of experience in all aspects of theatre. Our passion for the performing arts has seen us embark on a quest to provide a platform for people in the community to be involved in all facets of theatre, both on and off stage and provide a local arts attraction for audiences of all ages to enjoy. Our mission is to 'connect the community through theatre', being inclusive, whilst building momentum and developing individual skills and talents. CentreStage has built its success on the hard work of hundreds of volunteers. In 2024, CentreStage Rolleston will embark on our biggest year yet. We will welcome approximately 5,000 audience members to our shows, enabled by 400 local volunteers and approximately 25,000 volunteer hours. Each and every person involved with CentreStage Rolleston has a unique set of skills and talents. We value the contribution that our people make towards delivering our ultimate goal of quality community theatre.

The Selwyn district has many areas for recreation; sports facilities, public gardens, community halls and pools to name a few, however, there are no dedicated facilities for the performing arts. Of course sport has an important place in our society but so do the arts. Surely not every single person in Selwyn is interested in sport and maybe to maintain a diverse and broad minded community, offering facilities for the arts might be part of your plan. Category	Activity > Lincoln Town Centre Upgrades
Comments:	The propsed Lincoln Town Plan should proceed. It is hazardous to cylce on many of the roads in Lincoln and Gerald Street is one example. It would be interesting to know the patronage of existing facilities in the district and their on going costs to see if more are required. What proportion of the rates increase is going to meet the infrasture for new subdivisions. What account has taken of climate change in allowing these developments to proceed. Why isn't our council able to maintain a rates rise in single digits like Waimakariri has been able to do. We need far more transparency about the decisions the council is making.
Staff Recommendation	Submission is acknowledged by Council.

Comments:	Any new developments need to have explored alternatives with full diclosure to the community of ongoung costs
Staff Recommendation	Any proposed re-zonings will need to provide a full assessment of impacts. The National Policy Statements on Highly Productive Land and Urban Development do seek consideration of alternate locations as part of the assessment. Development Contributions are charged to cover the infrastructure required to service the growth.

Submitter Number:	1002	**Submitter:**	Details Withheld
Point Number	1002.3		
Category	Activity > Other Categories identified by Staff > Parks and Reserves		
Comments:	Foster dog park in Rolleston is no longer fit for purpose and an alternative should be sought sooner rather than later. We need an area dedicated to dog sports that the local club can use and be treated with the respect that other sports clubs are treated with. Having an area away from the current dog exercise park will free up that space for the local residents to use at all times. This will also remove the frustration caused when residents arrive at the park to find it closed for club training or competitions and ease tension between the selwyn dog training club and Rolleston residents. Having a dedicated facility will also improve the ability to maintain it to a standard that will encourage people from other regions to come to competitions and spend their money at local establishments (Standards such as flat grounds without holes that people are able to trip in and clear of dog waste). Having a dedicated area for the dog club will also allow the club to hold more trainings and increase their membership so that more local dog owners can gain the knowledge of how to train their dogs and become better community members. I feel that this would be better for not only Selwyn dog owners but all Selwyn residents.		

Staff Recommendation	Staff agree that the current site has limitations in terms of space and conflict with casual use of the dog park especially during events. More dedicated dog friendly areas are needed to service Rolleston and, with the impending development of the District Park on Levi Road there is an opportunity to incorporate dog-friendly spaces and this need has been identified in early planning undertaken to date. Space to accommodate a dedicated area for the Selwyn Dog Training Club needs to be further explored in terms of identifying the best location and how this could be set up and funded. Staff recommend that further investigation is carried out in consultation with the Selwyn Dog Training Club to determine the best future location for the club and what support Council would provide for relocation of activities.

Point Number	1003.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** The proposed Park & Ride next to Foster Park isn't a good size or place for it to be. The space allows less than 100 car parks and is		

	not enough in the long term if the plan is to encourage people to take public transport, and the population is growing rapidly. With Rolleston College and public facilities close-by and medium/high density housing planned for Helpet Park, Park & Ride will turn into private/free carparks for residents and students,and people taking the bus won't have enough space to park. Helpet Park or especially the green space behind SDC will be enough space and better locations for Park & Ride.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. The Park N Ride facility at Foster Park already a 2023/24 budgeted and approved for construction to cater for demand in the south of Rolleston. With Councils Preferred Option the new Park N Ride facilities at Rolleston are planned for 2029-33, at which time additional capacity will definitely be required to align with the additional PT services planned by Environment Canterbury over this time. These are positioned on Kidman St and on the corner of Jones and Hoskyns Road

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

	Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	1003.8
Category	Activity > Strategic Investment Strategy
Comments:	Spend Wisely In the meantime before we develop an industry of some kind in Selwyn, spend within our means even if it means slower infrastructure development. Many facilities are new, things are mostly working, keep it that way, till we have more cash to spend. Right now we are spending like teenagers with a credit card, no stable income, racking up a loan and snowballing those interest. Selwyn has many positives right now, but the way we're going will end up being a slow trainwreck, and people will have to leave this beautiful place.
Staff Recommendation	That the submission is acknowledged by Council.

Point Number	1003.9
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	Helpet Park This park was originally earmarked for social housing development when the location was still remote and Rolleston is small. Now that is central Rolleston, and the College is so squeezed for capacity, it's better to utilise Helpet Park for the school or have a centralised hub of public facilities. A park and ride (at least part of Helpet Park) would even be a better alternative in the long term. Plan social housing along bus routes, and keep the Foster Park/Helpet Park areas for public facilities/future infrastructure needs. This is one of the very last pieces of land the Council owns in Central Rolleston, don't pursuit the short term gains of development contribution there, the lost opportunity there is greater.
Staff Recommendation	Submission is acknowledged by Council. Planning for the development of the Helpet Park Land has not been concluded and there are a number of possible uses for the land that are being considered by Council. It is noted that there are no plans for another school in this locality and Council has obtained land nearby on Broadlands Drive for a future park and ride facility.
Point Number	1003.10
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	There are significant cybersecurity and access rights concerns within the Council, systems are inefficient and poorly structured. No organisation can risk this.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP. Cyber security will be a key component to ensure we keep Council data safe.
Point Number	1003.11
Category	Questionnaire > Matters For Community Guidance > Economic Development

Comments:	District Revenue Streams Selwyn District cannot rely on one-off development contributions as a sustainable source of income that is destined for long term failure. We need to develop/attract an industry, tourism/agricultural/commercial industry whatever it is, that can continue to generate income for the district. Otherwise once we sell up all the land, development contributions drop, we have no industries to keep young people employed in the district, self-employed tradies leave the district to build elsewhere, we are left with an aging population with no revenue generation source, and below average household income earners that cannot afford the rate hikes.
Staff Recommendation	The submission is acknowledged.;As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community. Council will consider feedback in their Strategy Action Plan

Comments:	**Question:** Do you support the closure of Sheffield Community Pool? No **Comment: Comment: Comment:** I		

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1004.2
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	It is vitally important we keep the War Memorial swimming baths in the same place and to the same specifications as it is at present. It is the only pool with a diving board operating. If you want to look at their safety record, there has never been anyone seriously hurt by diving from the board. More injuries are caused by people diving into shallow water. As a member of the Sheffield Volunteer Fire Brigade, we have been called out to the Waimak River where people have gone for a swim and got into trouble because the baths were closed at the time suitable for them to swim. This has only happened since the key system was removed. As you Councillors well know, there have been people drowned in the Council water races but not in the local pool. The Darfield pool is working to capacity and has had to turn people away. The distance and cost people from outside Darfield to take their children for a swim can mean that children will often miss out. It doesn't help families currently that want to use the Sheffield pool on public holidays when they have extra family around and the pool is closed. The Sheffield and Springfield Communities currently use the Sheffield pool for swimming lessons. The cost you predict to fix the pool is not realistic. It can be fixed a lot cheaper than the 1 million. If the Council no longer think the pool is viable, the best thing they can do is gift the War Memorial Pool back to the community and give the $229,000 demolition fee to an elected committee who are willing to run it for the Community. Take it right away from the Council.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that

	Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1005.8

Category	Activity > Strategic Investment Strategy
Comments:	Many of your projects as stated seem to be outside of the council responsibilities to the communities. Many are the core responsibilities of Government departments such as Environment Canterbury, New Zealand Transport Agency, Primary Industries ect. Several are nice to have projects such as further rural walking and cycling developments. It seems that SDC may be best to focus on collecting rates and delivering the services that the rates pay for. Expanding the scope to other projects such as the Strategic Investment Strategy, as stated on page 51 of the report, is risky and a specialized profession outside of SDC's core services. SDC needs to focus on providing the services that are charged for via rates revenue and specific charges to provide those services.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1005.9
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	It needs more community volunteer encouragement.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1005.10
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	SDC do not need to be in competition to the existing businesses that are specializing in economic development. It is my opinion that the SDC should focus more on the core purposes.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and holds a view that Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.

Point Number	1005.11
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Again, effective progress towards delivering the best outcome for the community is best through further development of existing practices.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1005.12

Comments:	Implement the Castle Hill Village Reserves Management Plan, including funding removal of the remaining seed source/wildling Douglas Fir and Larch trees in the Village
Staff Recommendation	Submission is acknowledged. The Castle Hill Reserve Management Plan is progressing to completion with a hearing to be held on 9 May 2024. Once completed an implementation programme will be developed. In anticipation of the plan being completed budgets have been provided in the draft LTP to undertake tree pest removal at Castle Hill.
Point Number	1006.13
Category	Activity > Other Categories identified by Staff > Waste Management
Comments:	A garden waste disposal system for the Village- priority as village grows and vegetation including wildings cleared from properties either dumped on reserves, or other properties causing re wilding problem or fill up the refuse containersbins for the village
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. There are no immediate plans to establish a permanent green waste drop-off site at Castle Hill as costs to residents of Castle Hill to provide this (in particular transport costs) is prohibitively expensive. Furthermore, an open top skip in an unstaffed facility would invite tipping of construction waste and other bulky waste - contaminating the green waste. Staff have suggested previously that Council would consider assisting the community association with a community hire of a garden chipper once or twice per annum.
Point Number	1006.14

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting

	with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	I do not support the closure of the Sheffield Pool and believe doing so will lessen the opportunity for rural children to learn to swim. While it is true that it is only be a 10-15 minute drive from Sheffield to Darfield, that doesn't mean that transporting all the children from Sheffield and Springfield schools regularly to Darfield is possible or affordable. Additionally, the Darfield Pool is already heavily booked by Darfield Primary School during school hours over summer. If there are not enough session times available, the proximity of Darfield pool to Sheffield or Springfield is irrelevant. The reality is that closing the Sheffield pool will mean children from Sheffield and Springfield Primary schools will have very little access to swimming practice, even if the cost of transportation can be worked around. Is is also unfair to say that Sheffield pool is used less than other community pools. It is used by less people because the comparison is being made to pools in communities with a larger population. The reality is that over summer, the pool is used almost daily by children from Sheffield Primary School. Is it really fair that we decide the children of more rural areas should have less opportunity to learn to swim? If the pool is closed, that is precisely the reality. Unless there is a preference to build a new pool in Sheffield, then upgrading the current pool is necessary. There is already fewer public amenities available in smaller rural towns. It is deeply saddening that the council is in favour of further reducing these amenities. The pool is currently used by both Sheffield and Springfield School, many families after school and at the weekends, as well as for birthday parties. Small rural towns need the council to preserve the amenities that they have, not reduce them as a cost saving measure so that there is more money available for projects in towns with a larger population. For how much money is being budgeted for projects in other towns, $1 million dollars to upgrade and keep the pool open doesn't seem like an overly large expense in comparison. Why is it okay to be adding public facilities to other towns to the tune of millions of dollars, but not to pay $1 million to save an existing facility that is so relied upon? It is entirely unfair on the children of Sheffield, Springfield and Waddington to close the Sheffield pool and in doing so, knowingly reduce their chances to both learn to swim and to practice their swimming. It is simply not possible that those children will have the same swimming opportunities if the pool is closed. There is not the same availability at the Darfield pool and the cost or practicality of

	transport to Darfield will be prohibitive to both the school and individual families. Please do not take the pool away from all the rural kids who deserve to have the same opportunity to swim as more urban children.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1009.6
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	I'm sure this is a useful initiative but how is it possible that it is fine to spend $1.3 million a year on an going basis to look at more effective technology, but a one off cost of $1 million to upgrade and keep Sheffield pool open is deemed too much of of a cost?
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Submitter Number:	1010	**Submitter:**	Penelope McCaul
Point Number	1010.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** no plan should be made without a comprehensive transport plan, including private vehicle travel.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. The Greater Christchurch PT Futures Business Case identified that further investment in improved PT services and infrastructure will have positive benefits. This will reduce the use of single occupant private vehicles that in that in turn will reduce emissions and congestion and provide people with an affordable transport option. This aligns with Greater Christchurch Spatial Plan and related Transport Plan that includes all modes of transport.
Point Number	1010.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. 	be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** why the cultural narrative? Plenty of existing options, no further development required.
Staff Recommendation	The submission is acknowledged. Selwyn District Council prioritises inclusivity and cultural respect in our community. Te Tiriti o Waitangi, the Treaty of Waitangi, is a founding document of New Zealand. Recognising Te Reo Maori (the Maori language) and incorporating cultural design elements in public facilities is one way Council chooses to uphold the spirit of the Treaty partnership. Council considers recognising Maori language and culture in public spaces is not only appropriate but also necessary. It reflects our commitment to the Treaty and our shared responsibility to create a more equitable and respectful society.

Comments:	does not reflect that the cheapest option for ratepayers is to not grow out develop Selwyn. This is an option that should be offered.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1010.12
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	i do not support the increasing growth and development of Selwyn. This has led to adverse outcomes in all areas of our life from increased pressure on community facilities, schools and medical facilities, increased traffic and commute times and escalating rates to pay for facilities we don't really need but the council thinks that we do.
Staff Recommendation	Population projections are not predictions, rather they indicate probable outcomes based on assumptions. A key assumption for the Long Term Plan is the population projections. As each town grows, there is a need to understand its future, as well as upgrade its infrastructure.

	As growth continues to exceed the projections, more projects are needed quicker to meet this growth. Council also will continue to work with government agencies to seek the provision of services, e.g. schools.
Point Number	1010.13

	Build a community recreation and sports facility at Darfield that includes two indoor courts. **Project cost:** Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million) **Estimated impact on rates (per year):** $19.91 **Funding:** Rates: 57% Development contributions: 43% * **Comment:** As one of four clubs utilizing the netball courts in Darfield currently we would love to see at least two 8ndoor courts somewhere in Darfield. Be8ng able to have ournyearn1nto 4 children being able to play and lean no matter the weather would help them get the most out of our season. We have 18 children playing in this age group this year. This would also be great to use on a Saturday morning for our competitions for year 5/6, year 7/8, and social grade. Our club incorporates, Hororata, Windwhistle, Glentunnel and Whiteclifs children so would be well received by a large part of the Selwyn community to have an indoor facility.
Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.
Point Number	1011.4
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Just because there is a pool in Darfield doesn't mean that Sheffi3ld kids should have to be driven to Darfield to go to a pool, it is great to be able to either walk to or have a few minute drive to go for a swim rather than more of a mission to head into Darfield.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Submitter Number:	1012	**Submitter:**	Details Withheld

Point Number	1012.3
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	Having dedicated dog training competition grounds is extremly important for the safety and well being of dogs. Using Foster Park is not practical or safe with the uneven grounds, dog poo not picked up by owners in the community, lack of space and community members not respecting training sessions by not having their dogs under effective control.
Staff Recommendation	Staff agree that the current site has limitations in terms of space and conflict with casual use of the dog park especially during events. More dedicated dog friendly areas are needed to service Rolleston and, with the impending development of the District Park on Levy Road there is an opportunity to incorporate dog-friendly spaces and this need has been identified in early planning undertaken to date. Space to accommodate a dedicated area for the Selwyn Dog Training Club needs to be further explored in terms of identifying the best location and how this could be set up and funded. Staff recommend that further investigation is carried out in consultation with the Selwyn Dog Training Club to determine the best future location for the club and what support Council would provide for relocation of activities.

Point Number	1014.6
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a shared Hub/Clubrooms built at the proposed new Netball & Tennis facilities based in West Melton. West Melton Netball & Tennis share the vision to provide an inclusive, nurturing & welcoming community focussed environment to develop players of all ages, creating longevity for the clubs and the community. What we are asking for is a Hub to bring our community together to create a sustainable future of Netball & Tennis but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Netball Balls, Gear Bags, Hoops, Training Equipment, Tennis Nets, Tennis Poles, Tennis Balls and Trolleys. The space would require a kitchenette suitable for making Tea & Coffee and Afternoon Tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club &

	team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Point Number	1018.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:**		

Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council
Point Number	1018.4
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council unanimously determined that 'Hut licences and subsequent renewals are short term and ultimately for a finite period' . At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts. We need this historical significance be recognised and for the Selwyn Huts to be listed as an historical site on the District Plan and for the term for us being here to be extended to protect this history.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.
Point Number	1018.5
Category	Activity > Other Categories identified by Staff > Rates
Comments:	(a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a

subsequant upgrade, the requirement we were told for being put on DWR.

(b) We have already paid for the water upgrade.

(c) We should not be discriminated against and should be treated like everyone else in the district.

(d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We should also be added to the DWR for Sewer and Water like everyone else.

(e) Towards25 LTP Document stated:
"The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities."

This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table.

From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston.

(f) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community."

(g) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Sekwyn Huts Future Occupancy Strategy" report dated 04/03/2024.

	(h) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners.
Staff Recommendation	That the submission is acknowledged by Council.

Comments:	Historical value The Mayor says in the Long Term Plan that "we're focussed on looking after what we already have" - how about you look after us!
Staff Recommendation	Council acknowledges the submission.
Point Number	1018.9
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	Additionally we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear.		

	Project cost: None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** there is more need for a better spread of public transport around all of canterbury. Darfield 86 bus should get more rides into and out of town. (Ecan has summision on that) maybe have a good look on using train in future as road going to be too full. We could have a really good train system from stringfield, sheffield, darfield and rolletson into town!
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. The Canterbury Regional Passenger Transport Plan, which is currently being reviewed by Environment Canterbury and will be consulted on later in the year, embodies the regional approach to PT. Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service. The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case considered a wider passenger rail service using the existing rail network. This could have merits in the future if combined with a wider regional passenger rail service. But with small projected patronage, large investment needed for rolling stock and infrastructure (on a rail network managed by others), and that there is no CBD connection makes this currently not worthwhile.

Point Number	1023.4
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	A dedicated dohg training area would benifit the whole of rolleston. Allowing classes to run with the increased number of dogs in the area people can learn the benifits of having a well trained dog. Not only that this would allow competitions to run more frequently as the grounds would be available more often
Staff Recommendation	Staff agree that the current site has limitations in terms of space and conflict with casual use of the dog park especially during events. More dedicated dog friendly areas are needed to service Rolleston and, with the impending development of the District Park on Levi

	Road there is an opportunity to incorporate dog-friendly spaces and this need has been identified in early planning undertaken to date. Space to accommodate a dedicated area for the Selwyn Dog Training Club needs to be further explored in terms of identifying the best location and how this could be set up and funded. Staff recommend that further investigation is carried out in consultation with the Selwyn Dog Training Club to determine the best future location for the club and what support Council would provide for relocation of activities.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1026.11
Category	Activity > Other Categories identified by Staff > Rates
Comments:	The Council needs to look carefully at NEEDS and not WANTS. Rural ratepayers, ie, farmers, pay a huge amount in rates and the proposed increases will be much more for these ratepayers than urban ratepayers. There needs to be more information just how much more the increases will impact farming ratepayers. They are businesses just as much as businesses in the towns of Selwyn District. (In the examples of increases, there is no example of rural properties with water races but no water units. Not good consultation!)
Staff Recommendation	That the submission is acknowledged by Council. That the Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum. The Council proactively looks for opportunities to minimise waste of resources, this process is constantly improving. The farming community has always been an integral part of the district's fabric. The Council acknowledges the hard working and infrastructure heavy nature of the demands this community is facing, and we carefully consider farmers in our strategic planning.

Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51%		

	Our budgeted option **Comment:** It would be good if SDC could ask ECan to provide more frequent bus service from Leeston/Southbridge to Lincoln or Rolleston. This would enable us to use community facilities like the swimming pool and other sports venues, or attend dentist appointments etc without having to drive.
Staff Recommendation	Environment Canterbury provide PT Services. The 87 Southbridge to Lincoln service is not well used and maybe discontinued. Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service.
Point Number	1027.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m

	Estimated impact on rates (per year): $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** The new community centre needs to have at least as much community and kitchen space as the current library/community centre. I am not in favour of the proposed triangular design which I believe will waste space and increase costs. I also think that siting the centre on the Heavy Vehicle Bypass is not ideal as it will require more noise insulation.
Staff Recommendation	The submission is acknowledged.

Submitter Number:	1028	**Submitter:**	Alana Malcolm
Point Number	1028.2		
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities		
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a shared Hub/Clubrooms built at the proposed new Netball & Tennis facilities based in West Melton. West Melton Netball & Tennis share the vision to provide an inclusive, nurturing & welcoming community focussed environment to develop players of all ages, creating longevity for the clubs and the community. What we are asking for is a Hub to bring our community together to create a sustainable future of Netball & Tennis but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Netball Balls, Gear Bags, Hoops, Training Equipment, Tennis Nets, Tennis Poles, Tennis Balls and Trolleys. The space would require a kitchenette suitable for making Tea & Coffee and Afternoon Tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.		
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council		

	staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Category	Activity > Infrastructure DC
Comments:	Re: Community Infrastructure Development Contributions (roading) While this policy will allow Council to gain additional funds for amenity and infrastructure maintenance and/or upgrade, it is also important to anticipate the ways in which settled local populations could respond to new residential developments in their area.
Staff Recommendation	The submission is acknowledged, and staff note the support for the introduction of the proposed development contribution for community infrastructure. Other funding mechanisms (such as Financial Contributions under the Resource Management Act) have been explored that could potentially be applied to assist development works in existing urban areas where more intensive development has occurred. However, at this point in time they have not been introduced and further work is required to understand the viability and implications.
Point Number	1030.9
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	I wrote to SDC roading department in April regarding a road safety issue, that is also a footpath/cyclist/pedestrian safety issue and raised a concern about poor driver behaviour at the intersection of Birchs Road and Benashet Drive, and Birchs Road and Carnaveron Drive. At both intersections cars travelling along Birchs Road frequently undertake to the left and drive over the grass verge and footpath - often at speed - as stationery cars sit at those intersections waiting to turn right. As a result the grass verge which separates the road and footpath is worn away and loose gravel has been pushed onto the footpath which is dangerous for cyclists and pedestrians. The single lane carriageway is clearly not designed for this kind of driver activity. Having observed drivers along the extent of Birchs Road it is apparent that undertaking at intersections is common practice, for example at Trices Road, Hamptons Road, Robinsons Road, and Tancreds Road, where drivers use the potential space between carriageway and intersection to their left to maintain speed along Birchs road instead of slowing down to allow the driver in front to manoeuvre safely. After a lukewarm response to my initial email, I have subsequently been asked to make a submission to the Long Term Plan. It would

	seem that Council are aware of the problem but need additional funding for the roading team 'to go towards the extra remediation works involved to mitigate the problem'.
Staff Recommendation	Submission is acknowledged by Council. Council cannot be held responsible for driver behaviour. We are already implementing safety improvements at intersections, which includes enhanced road marking and larger signs. Other options are being considered.

Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public		

	transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** None of these options improve options for residents of Ellesmere, esp those who do not drive. BUT most are ok with that. They choose to live here, shop locally and use friends, family or Ellesmere Community Care for urgent travel.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. It is envisaged residents in the wider district can drive to the Park N Rides to then access PT services such as direct to City. Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service.
Point Number	1032.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are

	collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** The Leeston Library is currently on the perfect site, close to the primary school and away from the heavy traffic bypass, contributing to the pulse of the community. I do not think having a library adjacent to the Leeston Park is a good idea due to the heavy traffic bypass, the proximity to the school and how it would leave the other end of the township without activity. The new building code limits may even mean the current building is repairable at a much reduced price, esp if we allow local contractors to tender for the job.
Staff Recommendation	The submission is acknowledged. The location of other local amenities and facilities has been taken into account in relation to this matter.
Point Number	1032.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1.

	Do nothing. Use the existing park facilities and remove or replace old and unsafe items in the park. **Project cost:** Year 1: $143,000 **Estimated impact on rates:** Included in our current rates **Funding:** Rates: 100% **Comment:** The playground equipment is adequate for now. We visit there with our grandchildren, and I never hear anyone complain. If it ain't broke- don't fix it. We see the new lighting is already in. This was a surprise to everyone. Where was the consultation on this? The toilet block can wait until we have a better plan, which will come after consultation with the user groups. The proposed landscaping is not fit for purpose. People want to park their cars on the embankment to watch the rugby, esp the old and young who can shelter in their vehicles during inclement weather. We need to be able to drive around the Park. The return of volunteers (many of whom relied on this to keep active and involved in their community) would reduce council costs and return favour with the council and a greater sense of belonging/ ownership to the people.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1. The work undertaken has been to address immediate Health and Safety concerns, existing lights were at end of life and water supply required upgrading to supply travelling irrigator and temporary irrigation solution. Staff do not recommend continuing with vehicle access to the park due to Health and Safety concerns and continue to support the proposed improvements to the Park under Options 2 & 3.

Category	Activity > Other Categories identified by Staff > Rates
Comments:	Council Headquarters: If Council returned to core business, we would need fewer office spaces. As rate payers, we are not welcomed beyond the front desk, so making the building better for us to use is unlikely. We learnt to work from home during Covid. Maybe SDC needs to enable more staff to work from home. Rates in General: Farmers are effectively asset tested for rates. Most farmers have significant debt loadings. Most land owners earn no more than an average income. Farmers benefit from limited council services. Farmers source their own water Farmers deal with their own shit (septic) Its time landowners(Farmers, lifestylers, rural dwellers) had a better deal. Paying rates based on land value is NOT FAIR or reasonable. Reducing the representation at the council table will also exacerbate the inequalities between rural and urban residents.
Staff Recommendation	That the submission is acknowledged by Council. That the Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum. The Council proactively looks for opportunities to minimise waste of resources, this process is constantly improving. The farming community has always been an integral part of the district's fabric. The Council acknowledges the hard working and infrastructure heavy nature of the demands this community is facing, and we carefully consider farmers in our strategic planning.

Point Number	1032.10
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Health and wellbeing: As many homeowners have fixed term int rates rolling over,(after purchasing for a high price and historically low int rates), the impending burden of significantly increased int payments on top of this current cost of living crisis alone is enough to push some to breaking point. This is true for our situation, and any rates increase will add to our financial burden without improving our quality of life. This simply does not make sense and is a risky business.
Staff Recommendation	That the submission is acknowledged by Council.

Point Number	1032.12
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	Significance & Engagement policy: I request that the community at large be engaged, considered, consulted and respected regarding every decision the council makes. We care deeply about the land and our community, having generational ties to the area. We want to ensure that the plans that affect us and our community, reflect the community at large, and many other families, are feeling like our local knowledge, our hopes and dreams for the future, are overshadowed by a Cultural Narrative that does not represent us.
Staff Recommendation	Council acknowledges the submission and notes the concern around the level of clarity regarding how specific groups will be engaged with. The proposed policy sets out Council's general approach to determining how and when it will engage with the communities it serves. Council's engagement approach will be determined based on the level of significance assessed using the assessment criteria outlined. Selwyn District Council recognizes the importance of partnerships; building strong partnerships with iwi is vital for Council to fulfill its obligations to the entire community. Te Tiriti O Waitangi (Treaty of Waitangi) is a founding document of New Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with iwi, to have any meaning, requires consideration of iwi position and contribution to discussion/debate.

Point Number	1032.13
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	Core business: I believe SDC would do well to return to core business. Ecan should be working on Biodiversity, Climate change, flood prevention. There are services SDC provides that could be cut.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1032.14
Category	Activity > Strengthened Partnerships
Comments:	Cultural narrative: Why do so many in the Ellesmere district feel disconnected from the cultural narrative. It is a very confusing term. This should represent the people and the place. why is this so contentious?
Staff Recommendation	The submission is acknowledged. Selwyn District Council considers that, when public buildings incorporate Maori names and cultural design elements, they are not merely symbolic gestures. Instead, they represent a tangible effort to honour the Treaty's obligations and foster a sense of belonging for all New Zealanders.
Point Number	1032.15
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	Budgeting: If you need ideas on how to be more efficient, how to be creative, flexible, resilient, to prioritise needs over wants, act responsibly, to nuture an asset for the next generation; just ask a sole trader, a farmer, a new home owner....your constituents. With some creative thinking and great leadership, I know SDC could lead from the front; potentially reducing rates; or at least not increasing them. We can do things differently. We can do things better.
Staff Recommendation	That the submission is acknowledged by Council. That the Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum. The Council proactively looks for opportunities to minimise waste of resources, this process is constantly improving.

Point Number	1032.16
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Consult with the community about how to best move on though. They may want the opportunity to run it privately, or find another use for it.
Staff Recommendation	It is acknowledged that the submitter has suggested Council close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	1032.17
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	After hearing about a recent business breakfast in Leeston, I believe this is not money well spent. The issue of not being able to expand, was met with " Move to Rolleston; we have plenty of room for your business" How does that help Leeston??
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.

Point Number	1032.18

Point Number	1033.1
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52

	Funding: Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding
Point Number	1033.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m

	Estimated impact on rates (per year): $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1034.7
Category	Activity > Other Categories identified by Staff > Road Safety
Comments:	hat SDC reinstate the policy on making landowners responsible for keeping intersections on their road frontages clear from over growth of hedges and trees to improve intersection visibility for motorists. --That SDC continue the improvements of Leaches road, Hororata to Windwhistle, of widening the road and improving the road surface. --That SDC continue lobbying NZTA for safety barriers down Scotts cutting, to the Rakaia Gorge
Staff Recommendation	Submission is acknowledged by Council. Berm and vegetation management has always been the responsibility of the landowner. Council regularly liaises with landowners requesting vegetation maintenance.

Point Number	1034.8
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	--I support that SDC employee a local parks and reserves coordinator for the Malvern district as specified in the Hororata residents submission. The SDC halls have a local person looking after the small halls in Malvern why can't this reserve person operate under the same system as the local halls?
Staff Recommendation	Staff do not support the introduction of a paid person to act as a reserves coordinator in the Malvern area. The proposal has cost and level of service implications in terms of an additional resource for this area. Staff concur that there has been teething problems in the transition from committees to contract but are confident this can be resolved by setting up improved communication channels, utilising local volunteers as the 'ears and eyes' to report matters of concern and providing additional support. The Reserves Operations Team will look to ensuring there is a consistent point of contact in Council to support the rural reserves. It is noted that there is opportunity for budgets to be provided to resident's associations which could be used to support local initiatives including on reserves. Staff recommend that the employment of a local coordinator for Malvern Reserves is declined and processes are put in place to improve communication between local communities, Council staff and contractors on reserve matters and to ensure that there are clear channels for reporting and addressing issues.

Submitter Number:	1035	**Submitter:**	Robert Blandford
Point Number	1035.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** Park and Ride is an idea that was introduced in the UK many years ago. It didn't work there and it will not work here. Who is going to drive to a car park and pay, wait for a bus and pay, to be then driven to a bus stop near or far from the place they want to be. I live in Kirwee. We get a morning bus at 7am and a afternoon return bus at approx 5pm. A better bus service would be of more use with a regular buses. Why not commuter trains from Darfield to Christchurch, the infrastructure is there just need a train or two.		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. The 2020 Greater Christchurch PT Futures Business Case identified that further investment in improved PT services and infrastructure will have positive benefits including the use of Park N Rides in the Districts to facilitate direct PT services to the City. This was further reinforced in the 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case. This also considered a wider passenger rail service using the existing rail network. This could have merits in the future if combined		

	with a wider regional passenger rail service. But with small projected patronage, large investment needed for rolling stock and infrastructure (on a rail network managed by others), and that there is no CBD connection makes this currently not worthwhile.
Point Number	1035.2

Point Number	1035.8
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	Before anything needs to be done more scientific evidence needs to be produced to confirm there is Climate Change. From what I have read from leading scientific studies the is no Climate Change. May I suggest the council make efforts to stop cloud seeding and weather altering.
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions.
Point Number	1035.9
Category	Activity > Low Nitrate Water Sources

Comments:	Also do something regarding the quality of our drinking water. My water has been tested and has a nitrate level of 5.24 mg/l. This is not good
Staff Recommendation	The submitters preference is for low nitrate water sources. Staff recommendation is to undertake further investigations into centralised sources of low nitrate water as budgeted in the LTP.
Point Number	1035.11
Category	Activity > Strengthened Partnerships
Comments:	As for Maori, and council decision making. We have council elections do we not and as such if they want to have a say then they should stand a candidate and be voted in as per all the other candidates. Yes they can be asked for advice if what is being proposed has effects on the them just like any others would be asked. A NO to a say if things are to proceed or not unless elected.
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognises the importance of partnerships: Building strong relationships with Iwi is vital for the Council to fulfil its obligations and effectively serve the entire community. Te Tiriti o Waitangi, the Treaty of Waitangi, is a founding document of New Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with Iwi, to have any meaning, requires consideration of Iwi position and contribution to the discussion/ debate.
Point Number	1035.12
Category	Activity > Potential Requirements To Fluoridate
Comments:	Stop chlorinating the water supply and don't even think of adding fluoride to it. Both have major heath risks, this is proven and well documented. You started to Chlorinate the water system after being directed to do so by the late Ashley Bloomfield. This was an illegal instruction and so this action must stop with immediate effect.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. Under the Drinking Water Quality Assurance Rules there is a requirement to add a small dose of chlorine to the piped network after treatment. To be able to move to intermittent chlorination (for eligible schemes) an exemption from Taumata Arowai is required. Exemption will only be granted by the regulator if infrastructure and systems can lower risk sufficiently. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent

	chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies. The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.
Point Number	1035.13
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	It is my understanding from people I have spoken to in Sheffield is that the pool is used however if up grades many more residence would us it.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1035.14
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	All I can see from this is an AI approach to all communications and access to Govt services with no human interactions. Not all people tick a box and human contact must be retained.
Staff Recommendation	Face to face interaction will continue to be an important part of how we interact with our communities. Our digital approach is designed to make things more streamlined, connected and efficient.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1036.10
Category	Activity > Other Categories identified by Staff > Rates
Comments:	The council needs to keep any rates rises to at or below the level of inflation. Ratepayers, particularly those on fixed incomes, cannot afford the frankly outrageous levels of increase (16% or more) being proposed. Rates are a significant portion of my outgoings and the council has a responsibility to keep them at a reasonable level. The council should base it's budgeting on inflationary-only increases and if it needs more money for specific projects it should consider user pays, part charges, developer pays etc. In these difficult economic times the council should be restricting it's expenditure to essential items and providing its services in the most cost-effective way.
Staff Recommendation	That the submission is acknowledged by Council. That the Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum. The Council proactively looks for opportunities to minimise waste of resources, this process is constantly improving.
Point Number	1036.11
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	I fully support the establishment of a dedicated new home for the Selwyn Dog Training Club in a location away from the existing Rolleston Dog Park. The Dog Park has become unsuitable because the public objects to the park being closed when club classes and events are taking place and the club is finding that holding the increasing amount of training classes and events requested is becoming difficult. Dedicated grounds would enable the club to hold classes and events in a location free of dog droppings and without interfering with (and suffering interference from) the general public. There is a huge demand in Rolleston and the wider Selwyn area from the many dog owners who would like to train their dogs to become good canine citizens, and new grounds would allow the

	Selwyn Dog Training Club to provide this service to the community along with the unrestricted ability to run the many dog sports training classes and events they would like to hold.
Staff Recommendation	Staff agree that the current site has limitations in terms of space and conflict with casual use of the dog park especially during events. More dedicated dog friendly areas are needed to service Rolleston and, with the impending development of the District Park on Levi Road there is an opportunity to incorporate dog-friendly spaces and this need has been identified in early planning undertaken to date. Space to accommodate a dedicated area for the Selwyn Dog Training Club needs to be further explored in terms of identifying the best location and how this could be set up and funded. Staff recommend that further investigation is carried out in consultation with the Selwyn Dog Training Club to determine the best future location for the club and what support Council would provide for relocation of activities.

Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06		

	Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding
Point Number	1037.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre.

	Project cost: Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**

Point Number	1038.4
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a shared Hub/Clubrooms built at the proposed new Netball & Tennis facilities based in West Melton. West Melton Netball & Tennis share the vision to provide an inclusive, nurturing & welcoming community focussed environment to develop players of all ages, creating longevity for the clubs and the community. What we are asking for is a Hub to bring our community together to create a sustainable future of Netball & Tennis but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Netball Balls, Gear Bags, Hoops, Training Equipment, Tennis Nets, Tennis Poles, Tennis Balls and Trolleys. The space would require a kitchenette suitable for making Tea & Coffee and Afternoon Tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage.

	The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** The decision to build these local facilities should be left for those effected residents to determine and should come out of targeted rates. Th council should not borrow against all ratepayer homes to fund this type of development and those residents effected

	should be the sole partys who decide if they want to pay for this development. Given the current economic situation the councils focus should be on maintaining critical infrastructure services (3 waters), water quality and focusing on cutting back spending and council operations.
Staff Recommendation	The submission is acknowledged.
Point Number	1040.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do nothing. Use the existing park facilities and remove or replace old and unsafe items in the park. **Project cost:** Year 1: $143,000 **Estimated impact on rates:** Included in our current rates **Funding:** Rates: 100% **Comment:** The decision to build these local facilities should be left for those effected residents to determine and should come out of targeted rates. Th council should not borrow against all ratepayer homes to fund this type of development and those residents effected should be the sole partys who decide if they want to pay for this development. Given the current economic situation the councils focus should be on maintaining critical infrastructure services (3 waters), water quality and focusing on cutting back spending and council operations.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1 and funding preferences. It is noted that Council funds the

	larger recreation parks on a district-wide targeted rate basis that recognises the benefit these spaces provide to the broader community. Loan funding helps to ensure the cost is met on an equitable basis between current and future residents. In this case some funding from development contributions received within the locality will be used to help fund the work.
Point Number	1040.4

Point Number	1040.9
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	Climate Change should not be a driving factor in anything. The science is not settled. We where told he science was settled with vaccine mandates and then we find out the vaccines where never intended to prevent transmission of the COVID...so why where they ever mandated??? ed to pay for th Climate Change ideaology is the same. The discussion has been simplified to obfuscate the actual real issues and being used by corporate and NGO groups to siphon of tax and ratepayer money for their own gain. Many Govt and local govt officials are party to this. A rational and sensible discussion should go along the following lines; 1. Is the climate Changing yes??? I would suggest yes - it always has been... 2. Is current 'global' climate change due to human activities? I would suspect it likley is.... 3. What level of 'global' climate change can be attributed to human

	activities...I think this is very hard to determine... 4. What effect do NZers have on Global Change?? I would argue very little 5. What could NZers realistically be expected to do to mitigate Global Climate Change?? I would argue very little... 6. What level of collateral damage in terms of financially and economically destroying NZers thru ever increasing taxation is acceptable in the name of climate change?? In my view Zero....
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions.
Point Number	1040.11
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	This is my local pool. The local community as you will now be will aware is looking at options to keep the pool open.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	1040.12

Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	This is not the council place to determine economic winners and loosers. Your job is to maintain critical infrastrucrture and leave this to local communities.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and holds a view that Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	1040.13
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	I work in the digital and tech sector. I have worked with local, regional and central govt departments. Money spent on "Digital Solutions" is highly inefficient and wasteful. While recently working for Ecan, I saw Ecan staff looking at purchasing new project management systems, despite the fact they did not fully understand the capabilities of their (very recent) legacy systems....Its a total waste of ratepayer money.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1040.14
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	The council is a bloated organization and becoming captured by corporate and special interests rather than focusing on critical services for which it was originally intended.

	The council needs cut back. The council needs to curtail the revolving door between commercial and public entities in its staffing. Why do we have a CEO??? Why is the CEO not local to the district?? such people are loyal to their ow interest and careers above all else. If you cannot find locally qualified people to fill said position then prehaps the coucil has grow to big.... The council does not have the luxury of spending our money on diversity officers, funding Ngai Tahu Cultural advisors or anything of the sort.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1040.15
Category	Activity > Other Categories identified by Staff > Borrowing Levels
Comments:	I have not seen any discussions even remotely near what is outlined above....In regards to borrowing. The Council has no right to borrow against the value of ratepayers assets or rates income. I do not consent to this at all and will never consider myself obligated. I consider this a complete over reach of council powers. The council needs to restrict spending to what can be organically funded by the district and keep the scale of its operation in proportion to this.
Staff Recommendation	That the submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.
Point Number	1040.16
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	In regards to rating of Maori Freehold land...this should be no different to how any land is rated....their should be no differences based o the ethnic background of the land owner....
Staff Recommendation	Council acknowledges the submission. Council is required by s 108 Local Government Act 2002 to have a policy on the remission and postponement of rates relating to Maori freehold land. When developing this policy staff have considered its position regarding rates postponement and remission based on these legislative requirements.

Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a shared Hub/Clubrooms built at the proposed new Netball & Tennis facilities based in West Melton. West Melton Netball & Tennis share the vision to provide an inclusive, nurturing & welcoming community focused environment to develop players of all ages, creating longevity for the clubs and the community. What we are asking for is a Hub to bring our community together to create a sustainable future of Netball & Tennis but also		

	celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Netball Balls, Gear Bags, Hoops, Training Equipment, Tennis Nets, Tennis Poles, Tennis Balls and Trolleys. The space would require a kitchenette suitable for making Tea & Coffee and Afternoon Tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre.

	Project cost: Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:** Leeston is outside Greater Christchurch therefore should not be effected.
Staff Recommendation	The submission is acknowledged.

Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and Council will consider their feedback in strategy action planning.
Point Number	1047.10
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Stay with the the pencil. I've watched the introduction of CAD in drawing offices and it doesn't make the drawing any more accurate or produce it quicker. Strangely.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1047.11
Category	Activity > Other Categories identified by Staff > Growth
Comments:	Reading between the lines I have the impression that the Greater Christchurch developments are costing the council far more than the development contributions are bringing in. A re-work of the calculations is essential. And be hard on them, the under-costing in the past has left us with a deficit that cannot be recovered, so lets be sure to at least break even. When a new development of 1500 houses is complete about a billion dollars will have changed hands, and here is the council wringing its hands about one million for a swimming pool.
Staff Recommendation	Greater Christchurch is a partnership rather than an development entity in and of itself. It seeks to provide direction on sub-regional issues so the councils are working collaboratively to solve them. All development is still done through council. When a development occurs, council only receives development contributions to provide for infrastructure. The LTP outlines when projects are to occur.

Point Number	1047.12
Category	Activity > Other Categories identified by Staff > Borrowing Levels
Comments:	For borrowing, I would point out the difference between the budgeted rate increase of 4.5% in the 2021 long term plan the the 15.4% that is now required. Thing can change fast, so be very prudent.
Staff Recommendation	That the submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.
Point Number	1047.13
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Rates The suggestion that a rate increase of 15.6% is necessary indicates that some financial disruption is taking place somewhere. At a time like this it would be nice if the council could push back for the ratepayers and limit the rates increase to a more sensible level. I suggest 4% which is a tad more that the current rate of inflation. Alright 4.5%.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1047.14
Category	Activity > Strategic Investment Strategy
Comments:	The way to do this is the same for all of us – don't spend what you don't have. It has been observed that the first type of retail business to be hit hard by a shortage of money is furniture. That sofa will last another year. Sadly that translates in council terms to postponing carefully planned capital investments. Sorry.
Staff Recommendation	That the submission is acknowledged by Council.

Point Number	1047.15
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Comment:** You show that transportation is one of the most costly projects, and that includes park and ride to push back some of the damage done by Greater Christchurch (more about that later). Although I like the idea of park and ride, that would be my first choice for cut. Cut all three, or if money is available just build one in Rolleston.
Staff Recommendation	Submission is acknowledged by Council. With Councils Preferred Option a Park N Ride at Lincoln is planned for 2026/27. This timed to coincide with a planned increase of direct bus services to the City by Environment Canterbury. The timing of the two new Rolleston Park N Rides is planned between 2029 and 2033 to meet Rolleston demands expected at that time. The Park N Ride facility at Foster Park is already a 2023/24 budgeted and approved for construction to cater for demand in the south of Rolleston.
Point Number	1047.16
Category	Activity > Other Categories identified by Staff > Growth
Comments:	I contend that the fundamental policy of growing the city by building in outlying settlements such as Rolleston and Lincoln has had a detrimental effect on the lives of those who live in the area. Especially those within the City who have gained nothing. Now that so much has been done we can clearly see the damage. With a large population living 20Km from the city centre commutes and shopping trips are that much longer. That means more time travelling, and more spent on travel, more stress from the longer commute and congestion and the extra cost in roads. We have three new motorways and all is paid for by taxpayers. The emotional cost should not be underestimated. That distance is a problem has been recognised by the project right from early on: "Walking, cycling and public transport are poor alternatives to driving" (greaterchristchurch.org.nz 2008)

Staff Recommendation	The Greater Christchurch Spatial Plan seeks to improve connections between our towns and the City Centre. In addition, as our towns grow, the provision for more commercial activities increases reducing the need for commuting.
Point Number	1047.17

The Council proactively looks for opportunities to minimise waste of resources, this process is constantly improving.
Point Number	1047.20
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	Greater Christchurch I contend that the fundamental policy of growing the city by building in outlying settlements such as Rolleston and Lincoln has had a detrimental effect on the lives of those who live in the area. Especially those within the City who have gained nothing. Now that so much has been done we can clearly see the damage. With a large population living 20Km from the city centre commutes and shopping trips are that much longer. That means more time

travelling, and more spent on travel, more stress from the longer commute and congestion and the extra cost in roads. We have three new motorways and all is paid for by taxpayers. The emotional cost should not be underestimated.

That distance is a problem has been recognised by the project right from early on:

"Walking, cycling and public transport are poor alternatives to driving" (greaterchristchurch.org.nz 2008)

And that is what we have.

The City council have worked and spent hard to ease traffic with cycle lanes etc. but they are being defeated by the relentless increase in traffic volumes. Greater Christchurch have acknowledged a 58% increase in traffic in the City proper though the population has remained the same. We are expanding the City into something that we know is bad – a city of motorways and car parks, congestion, frustration and expense.

While doing this precious agricultural land has been lost. Stats NZ comments:

"Land fragmentation is an increasing concern in Aotearoa New Zealand, driven by urban expansion onto rural land on the fringes of urban areas, and increased demand for food production. The most highly productive land (LUC classes 1, 2, and 3) is vulnerable to fragmentation for commercial, industrial, residential, and lifestyle block land uses."

You know what is happening but the developments continue to be consented.

So, as the old saying goes: " When you're in a deep hole, stop digging."

I suggest that SDC

* Call for a halt to large scale developments (no new consents).

* Find a better way to develop the city from now on.

* Question the required extent and particularly the rate of growth.

And then consider how best to mitigate the damage already done - like park and ride.

	To me it is obvious that the best way to increase population is by more dense housing in the heart of the city. Though many will never give up the big back yard there are many others that would enjoy living in a nice apartment in a central location where one rarely needs to get the car out. I can see that SDC is aware of the problems from comments and strategies suggested. Mayor Sam's intro to the plan suggesting that Rolleston be made more self-contained is thoughtful and valid but alas means a lot more land going under concrete. Most importantly: The Canterbury plain is a most precious asset. Level land with good soil, water and an amenable climate is becoming rare in the world, and will become more valuable in the future. This isn't just economics, it's strategic. .
Staff Recommendation	The Greater Christchurch Spatial Plan, which Council approved, sets this as an overarching direction. Council is developing a Future Selwyn Strategy that looks beyond the 10-year horizon to consider how we can respond to these challenges to increase density and improve self-sustainability. This can help reduce the reliance on private motor vehicle trips. Also, the National Policy Statement on Highly Productive Land provides clear direction and parameters for council in considering future housing growth in Selwyn.

Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding
Point Number	1048.4
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	The Selwyn district's population is rapidly growing. this also means the number of dogs in the area or using our infrastructure and parks are increasing. I am a dog lover and trainer. I see Rolleston dogpark gets used heaps. As a dog parent, I love doing things with my animals. The Selwyn dogschool currently provides an amazing variety of activities for families and their pets, ranging from basic education on getting digs used to living in our human world and all its challenges to enrichment activities such as scent world, agility, rally-

	O etcetera. The dog school plays a massive role in the community. Due to its popularity though it is starting to struggle to offer all programs to locals as it is restricted by the number of hours it can use its current ground. these are shared with the dog park. I would like to ask to put an area in the future development plans where the dogschool has designated land to grow and keep on offering education and sport activities to any local dog owner. this way the dogpark can also be used 24/7 by locals to give their dogs a good run and play. Happy to discuss further in person. Kind Regards
Staff Recommendation	Staff agree that the current site has limitations in terms of space and conflict with casual use of the dog park especially during events. More dedicated dog friendly areas are needed to service Rolleston and, with the impending development of the District Park on Levi Road there is an opportunity to incorporate dog-friendly spaces and this need has been identified in early planning undertaken to date. Space to accommodate a dedicated area for the Selwyn Dog Training Club needs to be further explored in terms of identifying the best location and how this could be set up and funded. Staff recommend that further investigation is carried out in consultation with the Selwyn Dog Training Club to determine the best future location for the club and what support Council would provide for relocation of activities.

Submitter Number:	1049	**Submitter:**	Nicolle Hughes for Selwyn RFC
Organisation:	Selwyn RFC		
Point Number	1049.3		
Category	Activity > Other Categories identified by Staff > Parks and Reserves		
Comments:	Selwyn RFC recognizes and appreciates the Selwyn District Council recommendation from Page 45 of the Community Facilities Activity		

	Management Plan in regards to the Sports Field Lighting. The recommendation to upgrade the sporting field lighting at the Glentunnel Domain of which Selwyn Rugby Club utilizes would be a very much welcomed upgrade. The current lighting fixtures are very old, potentially a safety hazard and currently are not fit for purpose for any sport playing/training. This situation is causing the necessary changes to playing and training formats which then takes away from our club playing on the fields to another area of Malvern. The recommendation by SDC for the upgrade of which is scheduled for approx 2028/29 is a long time for the Glentunnel Domain Sports clubs to continue in the current state. Selwyn RFC would very much appreciate this timeline be shortened to ensure we can provide quality sports to our local tamariki and enable our clubs to grow and thrive.
Staff Recommendation	Submission is acknowledged by Council. The sports lighting programme was prepared on a priority basis with a number of factors considered including health and safety, condition, lighting performance, and utilisation levels. Glentunnel Reserve lighting was assessed for replacement in years 4-7 of the 10-year programme with some others viewed as a higher priority. The lighting replacement is currently budgeted in year 5 and staff would support it being moved forward to year 4 (2027/28) as part of the 2027-37 LTP process.

Submitter Number:	1050	**Submitter:**	Grace Taylor
Point Number	1050.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:** Anything that will encourage people out of cars is good. Assume this also includes safe bike storage options. if it doesn't, it should.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council
Point Number	1050.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would

	have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** Option 4 is my preference provided if it includes a space with capacity akin to the Baylis Lounge at the LEC , bigger than Southbridge and Lakeside Halls, but dividable, like the Dunsandel Community Centre. I don't think there would be much point in moving from the existing site otherwise, just to achieve an additional "community room". I also encourage the SDC to **open a dialogue** with the Leeston Rugby Club (again), with view to seeking a way forward that would enable the space to be upgraded and better utilized as a council led, multi -sports codes venue in the future.
Staff Recommendation	The submission is acknowledged.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1050.7
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Ever increasing rates is an issue in all of your communities . Stay vigilant!
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.

Point Number	1050.8
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	Every child in NZ should have access to a public swimming pool. The Council needs to work with the community to look at alternative models for keeping swimming available locally.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	1050.9
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Employment/Business opportunities/development are important but this seems like a hefty cost for rate payers. Could it be trimmed?
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	1050.10

Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	I think its OK to be a fast follower . (ie let other Councils test things out and copy them if they work). I think the Council does pretty well now.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Point Number	1051.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51%		

	Our budgeted option **Comment:** There needs to be one in either Darfield or West Melton as well. These areas are developing fast.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Currently Darfield has a lot of on street capacity to cater for bus Park N Ride, but a future facility could be warranted paired with a possible rail PT service if this could eventuate as part of a wider initiative for a regional passenger rail service. For the foreseeable future based on limited demand West Melton residents would use the planned Rolleston Park N Ride facilities beyond what can be accommodated by the current 86 Metro Darfield to city service that stops at West Melton, and any further additional services Environment Canterbury could consider on this route. Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service. This would include linking larger townships like Darfield to Rolleston and PT services based there, and connections to the City.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for

	options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [
Point Number	1051.3

Comments:	I belong to the Selwyn Dog Training Club and we use the Dog Park in Rolleston. The grounds have become very uneven and have holes in them. Also the public who use the grounds are remiss in picking up their dog pooh which is very nasty if you stand in it. It also carries a find of $300 under the Dog Control Act. I would love our Club to have their own designated grounds of approximately 4 hectares so that we can have a clean environment free from a build-up of dog pooh. It would be awesome to train our dogs on a flat surface that we won't risk twisting an ankle on. We would be able to structure our training times without having to be hindered by booking times. It would enable us to run our competitions, seminars and workshops without having to outsource other venues. We are a multi code Club which encompasses at least 7 different codes. Our biggest source of income comes from our dog training classes which is a service we provide to the community. This would leave Foster Dog Park to become solely a dog exercise facility with 24 hour access for the residents of Rolleston and the Selwyn District.		
Staff Recommendation	Staff agree that the current site has limitations in terms of space and conflict with casual use of the dog park especially during events. More dedicated dog friendly areas are needed to service Rolleston and, with the impending development of the District Park on Levy Road there is an opportunity to incorporate dog-friendly spaces and this need has been identified in early planning undertaken to date. Space to accommodate a dedicated area for the Selwyn Dog Training Club needs to be further explored in terms of identifying the best location and how this could be set up and funded. Staff recommend that further investigation is carried out in consultation with the Selwyn Dog Training Club to determine the best future location for the club and what support Council would provide for relocation of activities.

Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

	My understanding is that option 4 has been scaled down to replace the library near Anderson Square. It is disappointing that this information was not widely distributed to the local community prior to submissions closing. The overall feeling from the community is lack of consultation on the initial concept, including SDC purchasing land in Leeston. Millions could have been saved, I hope the current council can bring it upon themselves to admit mistakes were made and endeavor to save costs, whilst still replacing and updating existing facilities in the current locations. Unfortunately, the SDC has developed a reputation for being the 'wokest council', in NZ. Cultural, environmental and wellbeing issues to name a few are all being addressed locally in the community and in businesses. We do not need to spend millions to prove anything following a pandemic and cost of living crisis (i.e the greenest triangle shaped community centre in NZ).
Staff Recommendation	The submission is acknowledged.

Point Number	1056.7
Category	Activity > Walking and cycling improvements
Comments:	- Cycleways are a 'nice to have', but not essential in the current climate. If it was to continue, linking smaller towns in Selwyn would benefit both tourists and locals. However, cycle lanes in townships are unnecessary as still safe options available to get through towns. Linking Arthurs Pass or cycleway around Lake Ellesmere should not be considered at present.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1056.8
Category	Activity > Compulsary organics collection
Comments:	- I am not in favour of compulsory organic curbside collection. It is a horrendous cost for ratepayers.
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. We do acknowledge that this is an additional unwanted burden for those who already compost their own food scraps and garden waste at home. This regulation is outside of Council's control. The Ministry for the Environment has issued a directive that households in all urban areas with a population of greater than 1,000 residents must have a food scraps/organic collection by 1 January 2027. Every Council in

	New Zealand is obligated under the Waste Minimisation Act to comply with this.
Point Number	1056.9
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	- The Council should not be funding biodiversity and climate change projects, this should all be funded by Environmental Canterbury.'
Staff Recommendation	Council has statutory responsibilities to protect and manage indigenous biodiversity and works closely with Environment Canterbury on a number of partnership projects. Climate Change poses a significant risk in the future and Councils, businesses, and the community all need to work together to address issues around adaption and mitigation.
Point Number	1056.10
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	- As a farmer in Selwyn, we are being used as 'cash cows', even when we are running at losses. Please have the decency and common sense to not overspend on projects that are 'nice to have'. The saddest part of society is 'materialism', and that is how Sam Broughton and his council are viewed.
Staff Recommendation	That the submission is acknowledged by Council.

Comments:	I'm concerned about access to spaces that are appropriate for both recreational dog use, and separate dedicated space for dog training and events. As the number of households that have dogs increases with the population of Rolleston and the nearby Christchurch suburb expansion, it is critical that there is adequate availability of spaces that can support recreation for families and their pets. Also, I would highlight that the Selwyn Dog Training Club is nationally recognized as one of the leading community (volunteer) associations that promotes dog obedience and supporting new dog owners with developing good dog ownership habits, including helping develop well mannered dogs and responsible owners. Dog owners also benefit from dedicated training space that can also be used for dedicated training events (including obedience trials and tests, and other dog sports which support the mission of well mannered canine citizenry). Such as a dedicated trainings space is best to be separated from public-use space because the purpose differs. One can look to other regional dog training centres around New Zealand as exemplars. The space currently available does not match the standards found elsewhere, and does not support the continued growth of supporting community members in their pet ownership ambitions, not the degree to which Selwyn can host regional and national events that bring dog owners, and their business, to the region. Selwyn is poised to provide best-in-the nation facilities with care in planning for allocation of dedicated dog training space.		

Staff Recommendation	Staff agree that the current site has limitations in terms of space and conflict with casual use of the dog park especially during events. More dedicated dog friendly areas are needed to service Rolleston and, with the impending development of the District Park on Levy Road there is an opportunity to incorporate dog-friendly spaces and this need has been identified in early planning undertaken to date. Space to accommodate a dedicated area for the Selwyn Dog Training Club needs to be further explored in terms of identifying the best location and how this could be set up and funded. Staff recommend that further investigation is carried out in consultation with the Selwyn Dog Training Club to determine the best future location for the club and what support Council would provide for relocation of activities.

Comments:	Historical value The Mayor says in the Long Term Plan that "we're focussed on looking after what we already have" - how about you look after us !An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council unanimously determined that 'Hut licences and subsequent renewals are short term and ultimately for a finite period' . At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts. (Selwyn Huts) (a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequant upgrade, the requirement we were told for being put on DWR. (b) We have already paid for the water upgrade. (c) We should not be discriminated against and should be treated like everyone else in the district. (d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We should also be added to the DWR for Sewer and Water like everyone else. (e) Towards25 LTP Document stated:

"The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities."

This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table.

From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston.

(f) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community."

(g) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Selwyn Huts Future Occupancy Strategy" report dated 04/03/2024.

(h) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners.
(i) Additionally we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this.

	Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else. Please think about all of this seriously. I really hope you remember to what it was like as a kid...i hope ur childhood was like mine growing up out here free to roam free to be a kid!!! My children do, they have an absolute ball out here, they're never inside they are always out and about on some adventure and for me, it brings peace, safety, community togtherness!! Alife style i love and adore. If i wanted to live in town i would but i would never do that. This is home, its honestly not just some chuck away place!! Theres so much more to the Upper huts we have so much heart here. ❤❤❤❤❤❤
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Point Number	1059.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi.		

	Project cost: Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding
Point Number	1059.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

	Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Comments:	2. Submission to Include Upper Selwyn Huts on the District Wide Rates for Sewer and Water The reasons being : (a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequent upgrade, the requirement we were told for being put on DWR.

(b) We have already paid for the water upgrade.

(c) We should not be discriminated against and should be treated like everyone else in the district. We are tired of being treated as separate from the rest of the district and as second class citizens. This treatment is not fair nor reasonable.

(d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage.

We should also be added to the DWR for Sewer and Water like everyone else.

(e) SDC Towards25 LTP Document stated:

"The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities."

This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table.

From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston.

(f) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community."

(g) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer

	upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Selwyn Huts Future Occupancy Strategy" report dated 04/03/2024. (h) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners. (i) Additionally, we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Submitter Number:	1062	**Submitter:**	Details Withheld
Point Number	1062.2		
Category	Activity > Other Categories identified by Staff > Parks and Reserves		
Comments:	We need a new dog park for dedicated dog training and competitions as with increased amount of people attending this is getting bigger and the push back from others who want to use the park during these time is getting worse. With a dedicated area we may be even able to bring breed shows as well as obedience and agility giving further use to the land and people spending more money in the area for food and accommodation.		
Staff Recommendation	Staff agree that the current site has limitations in terms of space and conflict with casual use of the dog park especially during events. More dedicated dog friendly areas are needed to service Rolleston and, with the impending development of the District Park on Levy Road there is an opportunity to incorporate dog-friendly spaces and this need has been identified in early planning undertaken to date. Space to accommodate a dedicated area for the Selwyn Dog Training Club needs to be further explored in terms of identifying the best location and how this could be set up and funded. Staff		

	recommend that further investigation is carried out in consultation with the Selwyn Dog Training Club to determine the best future location for the club and what support Council would provide for relocation of activities.

Category	Activity > Other Categories identified by Staff > District Planning
Comments:	Opposed to the change of medium density housing to high density/community housing in Helpet Park, Rolleston. This would put pressure on an already busy arterial route on Springston Rolleston Road. It is also opposite Rolleston College, which has its rool expanding. This change has implications for: 1. traffic and safety at peak times between 8.00 am and 10.00 am, as well as 4.00 pm to 6.00 pm. 2. noise levels in a high density housing area so close to other medium density housing. This space would be better used as a green space and reserve for native plants and birds for environmental and climate change benefit so close to the CBD.
Staff Recommendation	Through the District Plan process, Rolleston was zoned Medium Density. The Council has not identified any funding for developing social or affordable housing itself. Council will continue to help facilitate social and affordable housing providers within the district so that we can meet a key Community Outcome - we have access to housing which suits the changing needs of the diverse demographics within Waikirikiri Selwyn. The Greater Christchurch Spatial Plan and the associated Housing Action Plan aims to coordinate a joint response to delivery of social and affordable housing and how council can facilitate this.
Point Number	1064.5
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	To take pressure off this arterial route, Council should go ahead with plans to extend Broadlands Drive to Lincoln Rolleston Road, and put traffic lights where the roundabout is at the intersection of Broadlands Drive and Springston Rolleston Road.
Staff Recommendation	Submission is acknowledged by Council. Upgrades to intersections are planned and will be completed when available funding allows. Safety considerations are always considered and prioritised according to the perceived risk.

Submitter Number:	1065	**Submitter:**	Lucy Richards
Point Number	1065.2		
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities		
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a shared Hub/Clubrooms built at the proposed new Netball & Tennis facilities based in West Melton. West Melton Netball & Tennis share the vision to provide an inclusive, nurturing & welcoming community focussed environment to develop players of all ages, creating longevity for the clubs and the community. What we are asking for is a Hub to bring our community together to create a sustainable future of Netball & Tennis but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Netball Balls, Gear Bags, Hoops, Training Equipment, Tennis Nets, Tennis Poles, Tennis Balls and Trolleys. The space would require a kitchenette suitable for making Tea & Coffee and Afternoon Tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.		
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council		

	staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:**		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council		
Point Number	1066.2		

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**

Category	Activity > Maintenance and Renewals Funding Roading
Comments:	Use rates for road repairs and proper road repairs, not cowboy repairs.
Staff Recommendation	Submission is acknowledged by Council. Repairs are based on rates and all failures and remedials are at the Contractors expense.
Point Number	1067.13

Category	Activity > Providing safe drinking water
Comments:	Water is a fundamental human right and we pay rates to have safe drinking water. I found out that our Kirwee town supply is full of nitrates, not safe for humans in high amounts. My water was tested and its well over the safe level. STOP wasting money and get our water supply pristine, that it is the envy of the world.
Staff Recommendation	The submitters preference is for low nitrate water sources. The nitrate-n levels in the Kirwee bore (April 2024) is 5.99 g/m3. New Zealand Drinking Water Standards set a Maximum Acceptable Value (MAV) of 50 milligrams per litre (mg/l) for nitrate, which is equivalent to 11.3 mg/l nitrate-nitrogen. Staff recommendation is to undertake further investigations into centralised sources of low nitrate water as budgeted in the LTP.
Point Number	1067.14
Category	Activity > Chlorination
Comments:	The council then spends our money on chlorinating our water supply, the majority of Selwyn didn't want it! Now many people have skin issues from the chemicals in the water. GET RID of chlorination, plus we don't want fluoride. Why should households spend money on a water filter for their house, we pay rates for safe water.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. Under the Drinking Water Quality Assurance Rules there is a requirement to add a small dose of chlorine to the piped network after treatment. To be able to move to intermittent chlorination (for eligible schemes) an exemption from Taumata Arowai is required. Exemption will only be granted by the regulator if infrastructure and systems can lower risk sufficiently. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies. The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.

Point Number	1068.7
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	The changes appear to be acceptable. However in regards the Significance and Engagement Policy I'd like to see SDC engage more effectively with stakeholders, listen and take their views more seriously when making decisions, rather than engage with them and continue down a predetermined path regardless of engagement outcomes. Although I strongly support co-governance, I'd like to see more detail from Ngai Tahu when making statements which negatively impact on others rather than using broad explanations of mana whenua, ability to practice mahinga kai and the health of water bodies. When people are being negatively affected by decisions based on their impact on these Ngai Tahu rights its important to include details of how Ngai Tahu are being impacted in order to obtain stakeholders support and understanding. Not using details creates social discourse.
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognizes the importance of partnerships; building strong partnerships with iwi is vital for Council to fulfill its obligations to the entire community. Te Tiriti O Waitangi (Treaty of Waitangi) is a founding document of New Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with iwi, to have any meaning, requires consideration of iwi position and contribution to discussion/debate.
Point Number	1068.8
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	1. Protect the Historical value of Upper Selwyn Huts The Mayor says in the Long Term Plan that "we're focussed on looking after what we already have" - how about you look after us! An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council unanimously

	determined that 'Hut licences and subsequent renewals are short term and ultimately for a finite period' . At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts. I am requesting this historical significance be recognised and for the Upper Selwyn Huts to be listed as an historical site on the District Plan and for the term for us being here to be extended to protect this history.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.
Point Number	1068.10
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	2. District wide rates I'm asking for Upper Selwyn Huts to be put on DWR for Water and Sewer. For the following reasons: (a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequant upgrade, the requirement we were told for being put on DWR. (b) We have already paid for the water upgrade. (c) We should not be discriminated against and should be treated like everyone else in the district. We are tired if being treated differently and as second class citizens. (d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We

	should also be added to the DWR for Sewer and Water like everyone else. (e) Towards25 LTP Document stated: "The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities." This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table. From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston. (f) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community." (g) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't fund the full amount. This was proposed in 4.12.4 of the SDC "Upper Selwyn Huts Future Occupancy Strategy" report dated 04/03/2024. (h) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners. (i) Additionally we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a

	decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Submitter Number:	1069	**Submitter:**	June McLachlan for Ellesmere Community Care Organisation
Organisation:	Ellesmere Community Care Organisation

Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:**		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP		

Point Number	1069.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** No one has proven how a new building would be used or how it would affect the use of current buildings. A lot more thought and consultation needs to go into this project. The current library site is perfect. We need it close to the primary school and we need facilities at that end of the town to maintain vibrancy. We do not want to risk disturbing that site & losing our medical centre in the process. Our aging population needs a medical centre more than a community centre.
Staff Recommendation	The submission is acknowledged. Operations have been considered in relation to the matter.

Point Number	1069.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do nothing. Use the existing park facilities and remove or replace old and unsafe items in the park. **Project cost:** Year 1: $143,000 **Estimated impact on rates:** Included in our current rates **Funding:** Rates: 100% **Comment:** There is work to be done at the Leeston Park, but not before consultation is had with all the stake holders. The Leeston Rugby Club facilities are in dire need of refurbishing. A million dollars would replace the toilets, kitchen and front room; which serves as another great meeting place. If there was time to form a sports trust to work with the rugby club and create a vision for the park, future uses, partner groups, connect with local businesses and sponsors, we could revitalise the stadium. We can buy ourselves time, and prevent further unnecessary debt, by working with what we already have.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1. Initial consultation on the draft Master Plan has been completed with park user groups. Further consultation will be carried out prior to the implementation of any chosen option. In reference to the Rugby club building, council does not currently own the building or land.

Comments:	Cycle trails: We do not believe our residents will benefit from further investment in rail trails. This is an attraction for a few tourists, not a Must Have.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1069.14
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Mental Health: Many of our residents have fixed term int rates rolling over. Their new rates alone are enough to add huge financial pressure to a household. The compounding pressure of the cost of living AND your intended rates rises, will be enough to tip the scales. I anticipate marriage breakups, more domestic violence and potentially suicides, if rates are not more considered. Now is not the time to be increasing expenditure or debt. Our next generation will not thank us for a $634million debt.

Staff Recommendation	That the submission is acknowledged by Council. The Council recognises the negative impact that increased cost of living is having on the public's mental health, and that this trend is not only limited to New Zealand, but is widely spread in many other countries worldwide.
Point Number	1069.15
Category	Activity > Compulsary organics collection
Comments:	Compulsory Organics: Many of our residents produce very minimal green waste. They receive meals on wheels, have their own composting bins, have the contractor remove their grass clippings, live in units with very small gardens. The expected $190/household compulsory fee is NOT something we have an appetite for.
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. We do acknowledge that this is an additional unwanted burden for those who already compost their own food scraps and garden waste at home. This regulation is outside of Council's control. The Ministry for the Environment has issued a directive that households in all urban areas with a population of greater than 1,000 residents must have a food scraps/organic collection by 1 January 2027. Every Council in New Zealand is obligated under the Waste Minimisation Act to comply with this.
Point Number	1069.16
Category	Activity > Strategic Investment Strategy
Comments:	Strategic Investment: My clients all had great strategic investment strategies; "IF YOU DON'T NEED IT, DON'T BUY IT". SDC needs to focus on core business. Differentiate between needs and wants. Demonstrate good business acumen to lead the way to a future we can all afford.
Staff Recommendation	That the submission is acknowledged by Council. Council's strategic investments are based around building a strategy that will meet the needs of our communities and our businesses to thrive in the medium to long-term period.

Point Number	1070.2		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	1. Submission to recognise Upper Selwyn Huts as a Historical Site The Mayor says in the Long Term Plan that "we're focussed on looking after what we already have" - how about you look after Upper Selwyn Huts! An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council unanimously determined that 'Hut licences and subsequent renewals are short term and ultimately for a finite period'. At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts. I am submitting to request that this historical significance be recognised and for the Upper Selwyn Huts to be listed as an historical site on the District Plan and for the term for us being here to be extended to protect this history.		
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend		

	that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.
Point Number	1070.4
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	2. Submission to Include Upper Selwyn Huts on the District Wide Rates for Sewer and Water The reasons being : (a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequent upgrade, the requirement we were told for being put on DWR. (b) We have already paid for the water upgrade. (c) We should not be discriminated against and should be treated like everyone else in the district. We are tired of being treated as separate from the rest of the district and as second class citizens. This treatment is not fair nor reasonable. (d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We should also be added to the DWR for Sewer and Water like everyone else. (e) District Wide Rates is already being applied to fund maintenance of sections of the Upper Selwyn Huts Local Purpose Reserve including maintenance of the tennis courts, the reserve's toilets and community library, and mowing around the dwellings. This sets a precedent that DWR can be applied to our settlement. (f) SDC Towards25 LTP Document stated: "The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council

	acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities." This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table. From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston. (g) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community." (h) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Selwyn Huts Future Occupancy Strategy" report dated 04/03/2024. (i) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners. (j) Additionally, we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Submitter Number:	1072	**Submitter:**	Details Withheld
Point Number	1072.2		
Category	Activity > Other Categories identified by Staff > Rates		
Comments:	I wish to voice my concerns over the proposed huge rates increase. Like everyone else in our community, the council needs to live within their means. They need to prioritise what is essential and urgent and shelve 'wish list' projects until a later date. New buildings can wait. I believe the council needs to fully review its own staffing levels. As a cost saving measure maybe it should also consider more staff to be able to work from home to avoid any future new council buildings. I appreciate there are some hard decisions to be made but this is not a time when ordinary people can be expected to pay such huge increases especially when the price of so many other things are pushing up the cost of living. With all the new home builds around, the council must be seeing the benefit of additional money being paid in rates.		
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.		
Point Number	1072.3		
Category	Activity > Other Categories identified by Staff > Road Safety		
Comments:	New sporting facilities and community centres are a luxury when the Selwyn area is very badly lacking in the appropriate infrastructure to keep us safe. I would like to see some of the dangerous country roads be improved with more flashing stop signs at hazardous crossroads and Ellesmere Road to be made safe long term rather keep doing patch up jobs.		

Staff Recommendation	Submission is acknowledged by Council. Council has an intersection prioritisation framework for upgrades. The flashing stop ahead signs are not authorised for wider installation. Alternative upgrades are being installed where appropriate on a priority basis.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** Enough builings in Leeston to cater for population Repair Library/ medical centre.

Staff Recommendation	The submission is acknolwdged.
Point Number	1073.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Carry out the landscape improvements to extend the playing fields; replace and upgrade the playground equipment, footpaths, toilet block, lighting and irrigation; and seal the carpark. **Project cost:** Years 1-10: $3.4m **Estimated impact on rates :** Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% * Our budgeted option **Comment:** Sports field ligjting already already been done…..what consultation was there ? night training already had satisfactory lighting…….. council supporting a sport that has reducing numbers and dwindling spectators ??? Irrigation already done too ?? In the past volunteers did the irrigating which maintained a green tinge throughout the summer. If it hadn't been for the 25 mm of rainfall post new year the sports field would have looked like brown waste area. No significant rain since.

Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2. The work undertaken has been to address immediate Health and Safety concerns, existing lights were at end of life and water supply required upgrading to supply travelling irrigator and temporary irrigation solution.

Comments:	Closing pools is just a lack of common sense. Drowning figures show that. 10 minutes drive is an added cost to resdents !!

Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1073.6
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	If newspaper reports are accurate why have SDC employed 50 - 100 or so over the last 15 months or so. Would they become redundant if 'effective' technologies are adopted? The first thing that needs updating/ improving is SDC's cumbersome website. Get rid of useless information. Delete Delete Delete. Probably most at risk are the 50 - 100 new employees at SDC. Will they be sacrificed to allow some untested technology replace them ?
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Submitter Number:	1074	**Submitter:**	Kathreen Haylock
Point Number	1074.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** As a user of the bus, I can see the advantage of altering bus routes to better serve the residential population. My concern is with the large rating increase in years 4-10. I presume land is already owned by the council for the park and ride facilities. At this stage , they do not need to be developed (as in the Rolleston grass paddock), but can be used as is until funding is established.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. With Councils Preferred Option a Park N Ride at Lincoln is planned for 2026/27 opposite the Lincoln Events Centre. New Park N Ride facilities at Rolleston are planned for 2029-33, at which time additional capacity will definitely be required to align with the additional PT services planned by Environment Canterbury over this time. These are positioned on Kidman St and on the corner of Jones and Hoskyns Road. Council owns these sites, but the land value has been included in the budgets to align with accounting requirements. Environment Canterbury who provides Metro Bus Services, needs to undertake more regular service reviews in Selwyn to take account of urban growth.

Point Number	1074.3
Category	Activity > Infrastructure DC
Comments:	**Community Infrastructure Development contributions:** New residential and commercial developments should be charged a much higher rate for their long term impact on roading, drainage, stormwater, fresh water and community facilities than the current rate. They are also being enabled to design the minimum width of street in the new developments making street parking difficult and emergency vehicle access difficult. Selwyn district is growing so fast, and the council is getting new rate payers all the time. Yet our rates are rising at an incredible pace. Our incomes are not! It would be a shame if Selwyn became an area people could not afford to live in. Charge the developers more! The traffic lights at the Levi / Lincoln Rolleston road corner is being brought forward 5- 10 years because of the Foodstuff development. How much are they contributing to the cost of this? Are ratepayers being asked to fund it all?
Staff Recommendation	The development contributions for all services have been reviewed and adjusted leading into the preparation of the draft LTP. This has included the introduction of a new development contribution for community infrastructure. Based on the programme of capital works, Council undertakes a thorough and robust process to calculate the development contribution amount that can be fairly and reasonably applied to the growth community for a project. The calculation is made in accordance with the Council's Development Contribution Policy and the legislation that underpins the policy as well as guidelines on administering the policy. The development mentioned in the submission will have been assessed in terms of Council's Policy, and a transportation development contribution charge applied accordingly. Funds received from this process are used as a contribution towards upgrades and development works that are required to meet growth for the transportation network in this locality.

Point Number	1074.5
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	**Planning further Community facilities:** The new park on Levi Road is not required in the near future. Continue to lease out the land and make some income form it until such time as it is required. I ask that the Selwyn District Council examine their costs, spending and budgets , as we are all having to do at present, to make savings where possible. Use the cavernous hallways of the council building to place the new offices for example. Look carefully at efficiency.
Staff Recommendation	Submission is acknowledged by Council. Demand projections indicate that the land on Levi Road earmarked for the District Park will be needed during the 10-year planning period. Planning is underway for the first stage of development (around 35 hectares). The balance of the land will continue to be leased for farming activities until it is needed. Staff are aware of the need to consider efficiencies in developing budgets. Options for staff accommodation other than building extension are being considered.

Comments:	2. Submission to Include Upper Selwyn Huts on the District Wide Rates for Sewer and Water The reasons being : (a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequent upgrade, the requirement we were told for being put on DWR.

(b) We have already paid for the water upgrade.

(c) We should not be discriminated against and should be treated like everyone else in the district. We are tired of being treated as separate from the rest of the district and as second class citizens. This treatment is not fair nor reasonable.

(d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage.

We should also be added to the DWR for Sewer and Water like everyone else.

(e) District Wide Rates is already being applied to fund maintenance of sections of the Upper Selwyn Huts Local Purpose Reserve including maintenance of the tennis courts, the reserve's toilets and community library, and mowing around the dwellings. This sets a precedent that DWR can be applied to our settlement.

(f) SDC Towards25 LTP Document stated:

"The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities."

This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table.

From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston.

(g) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide

	targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community." (h) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Selwyn Huts Future Occupancy Strategy" report dated 04/03/2024. (i) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners. (j) Additionally, we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else.

Point Number	1077.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** Just use whats working. Keep existing car parks and dont replce them with more barriers and gardens that require even more rate funding to install and maintain.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP
Point Number	1077.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1.

	Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:** Meet the need without unnecessary extras unless supported by local fundraising efforts
Staff Recommendation	The submission is acknowledged.
Point Number	1077.3
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do nothing. Use the existing park facilities and remove or replace old and unsafe items in the park.

	Project cost: Year 1: $143,000 **Estimated impact on rates:** Included in our current rates **Funding:** Rates: 100% **Comment:** Get local volunteers or Lions groups to remove unsafe items and save the $143,000
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1
Point Number	1077.4

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1077.8
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	And allow locals to fundraise for and manage their own pool maintainence.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool.

	Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	1077.9
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Its not councils role. These Funds will be required to pay off debt to lenders
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and holds a view that Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	1077.10
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Conservative spending on technology. If it is working ok dont change it just for the sake of keeping up with technology
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1077.11

Comments:	Why is any of this necessary? Ask what is the point pf wasting time and money on this.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1077.12
Category	Activity > Walking and cycling improvements
Comments:	Here's some suggestions to COUNCIL COST CUTTING from some ratepayers: 1/ For starters stop building unnecessary SEALED RURAL cycleways. They are under-used, inefficient and primarily used for leisure purposes. They should be considered only when funds are available. STOP the Alps to Ocean cycleway initiatives until the Council has assurances of funding.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1077.14
Category	Activity > Other Categories identified by Staff > Growth
Comments:	Here's some suggestions to COUNCIL COST CUTTING from some ratepayers: 3/ The predicted growth in ratepayers moving to Selwyn does not justify a spending frenzy based on modelling. If those numbers don't come to fruition due to unaffordable rate rises, the Council runs the risk of running ahead of itself, if they over commit to multi million dollar projects. Get back to money saved/funded projects instead of this lure to foreign loans which could demand unlimited rises in interest rates. We have learnt from the last successive governments this can potentially sell out our country to foreigner ownership and exclude resident NZers from owning their own homes.
Staff Recommendation	Population projections are not predictions, rather they indicate probable outcomes based on assumptions. A key assumption for the Long Term Plan is the population projections. As each town grows, there is a need to understand its future, as well as upgrade its infrastructure.

	If growth is slower than projected then the delivery of infrastructure can adjust.
Point Number	1077.15
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	Here's some suggestions to COUNCIL COST CUTTING from some ratepayers: 4/ Encourage and empower more locally funded projects, getting kids involved in their own community fund raising for the likes of sporting events and equipment. Alternatively offer them free council venues for the likes of busking, markets, cake stalls, boot sales etc. instead of funding their projects from rates, which may reduce their efforts to contribute.
Staff Recommendation	The submitter's comments are noted and will be forwarded to the appropriate Council team for information.
Point Number	1077.16
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	Here's some suggestions to COUNCIL COST CUTTING from some ratepayers: 5/ Stop costly chemical input costs like Roundup and fertilisers and give community service workers opportunities to coordinate composting/weeding/planting/nursery workgroups. Council coordinate with Corrections and Probation services to offer manpower or materials.
Staff Recommendation	Council continually looks to improve its processes around managing restoration initiatives, including with our community. Council has worked with Corrections in the past in this regard.
Point Number	1077.17

Category	Activity > Chlorination
Comments:	Here's some suggestions to COUNCIL COST CUTTING from some ratepayers: 6/ Reduce chlorine input costs where not required in Selwyn water supplies may offset some costs of routine water microbial tests or allow communities to fund their own water testing/filtration requirements. Chlorine should never be a substitute for old damaged plumbing nor should it substitute routine screening for nitrates which chlorine wont eliminate anyway. If this is the case, then plumbing maintenance MUST be on the Councils essential, to dos list.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. Under the Drinking Water Quality Assurance Rules there is a requirement to add a small dose of chlorine to the piped network after treatment. To be able to move to intermittent chlorination (for eligible schemes) an exemption from Taumata Arowai is required. Exemption will only be granted by the regulator if infrastructure and systems can lower risk sufficiently. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1077.18
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	Here's some suggestions to COUNCIL COST CUTTING from some ratepayers: 7/ Biodiversity initiatives should not be Rate Payer funded but done by local community Volunteers wishing to improve their communities and/or provide young Leadership initiatives like DOE(Duke of Edinburgh), Scouts, School or community service groups.
Staff Recommendation	Council works closely with volunteers in our community to initiate and run many biodiversity restoration and protection projects. Council has statutory responsibilities to manage and protect indigenous biodiversity.

Point Number	1077.19
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	To summarise, lets find creative can-do kiwi solutions to reduce and recover costs and keep communities unburdened by debt, like the Coalition government is attempting to wind back, on our behalf due of the last governments overspending mania. We can then rest easy that we did our best to rein in yet another potential disaster, but before it happens this time, so we don't get ahead of ourselves while re-training our youth the meaning of affordability for the best little county in the greatest little country on earth.
Staff Recommendation	That the submission is acknowledged by Council.

Point Number	1077.20
Category	Activity > Planning Further Community Facilities
Comments:	Here's some suggestions to COUNCIL COST CUTTING from some ratepayers: 2/ Allow locals to utilise existing older buildings for hire venues. Don't close or abandon our old halls in favour of costly new builds. The uk treasure their old buildings as historic and our stone and native timber buildings are worth preserving too. Give Locals the opportunity to contribute to their running costs with fundraising projects.
Staff Recommendation	The submission is acknowledged.

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	I support the proposed changes.
Staff Recommendation	It is acknowledged that the submitter has selected to close the Sheffield Memorial Pool.
Point Number	1079.7
Category	Activity > New Public Transport
Comments:	I support in principle the selwyn district long term plan but must make submissions conerning lincoln. edward and gerald sts are used by many large trucks- consideration must be given to a heavy traffic bypass. as soon as practical gerald st from james st to vernon tce should be a 30 kph zone- 50 kph is too dangerous. the existing 58 angle parks should be retained- they are not dangerous and are a more efficient form of car parking.
Staff Recommendation	Gerald and Edward Streets are classified as arterial roads and consequently need to handle significant traffic of different types. Lincoln is relatively unique as Gerald St is also used by agricultural vehicles and equipment. A Southern Bypass of Lincoln had been considered before and discounted by Council due to the unwillingness of developers to accommodate it, comparatively low use and high cost. The redesign of Gerald St will reduce vehicle speeds through the township which may in turn redirect through traffic onto other routes. Council has included the funding in the draft LTP for new public car parks in the town center to accommodate any removal of on street parking.
Point Number	1079.8

Category	Activity > Lincoln Town Centre Upgrades
Comments:	Lincoln roading upgrades This is a discouraging submission to write. On page 49 of the consultation document it explains that the Lincoln Town Centre Master Plan was adopted in 2016. It then goes on to say that the upgrades were only going to be carried out between 2025 and 2035 and seems surprised that the costings have increased with a delay of eight years in delivery. I note that the adopted Master Plan has lights installed in 2020/2021 (page38) which didn't happen. In the time since 2016 the amount of traffic moving along Gerald St has increased greatly and continues to include a large number of heavy vehicles. There have also many several serious injuries to bicyclists

	and it is a dangerous street, both for riders and pedestrians. The traffic on Gerald St, Springs Road and Birches road will only get worse with the extra development approved by the Council last year. I submit that the council needs to make the upgrade of Gerald St a priority. In the process it should address weakness noted in the original plan. 1. The plan allowed for bikes to travel on both sides of the road along Gerald St until the shopping area and then didn't connect to anything. In particular there were no plans to get across the bridge. It is important that any cycleways connect to the rail trail, the schools and the University. For future proofing they should also connect to any park and ride and also to the new subdivisions down Springs Road. At the moment there is not even a decent footpath along Springs Road. 2. The cycleway along the South side of Gerald Street has to cross a large number of roads, a service station and supermarket entrance. Surely it would be more sensible to have a two way cycleway on the North side and perhaps when it gets to the library route it through the properties that the council has bought for car parking. This would also make it easier to connect to schools, rail trail, events centre and park and ride. 3. Thought should be given to a bypass for heavy vehicles. This would make Gerald St a lot safer and presumably lower maintenance on the road.
Staff Recommendation	The outcomes promoted by the 2016 Lincoln Town Centre Plan are still relevant however the design upgrade plans for Gerald St will reflect current best practice. The Council will starting the upgrade of the Lincoln Town Centre and Gerald Street in stages starting in 2024 at the Liffey end and finishing at Springs Rd in 2030. This is estimated to cost $45M and includes cycle lanes, power undergrounding, 4 sets of traffic signals and the replacement of the failed carriageway. A number of options are currently being investigated for the area alongside the shops and issue of cycle lane connectivity is a key focus point. It is the intention the cycling facilities provide a connection between the Rail Trial and the University. A single dual lane cycleway on one side of the road has technical issues through the planned traffic signals at crossroads and will not serve the opposite side of the street for access. A Southern Bypass of Lincoln had been considered before and

	discounted by Council due to the unwillingness of developers to accommodate it, comparatively low use and high cost.

The Leeston Rugby Football Club uses these grounds from February till August, every year for Senior Rugby and JAB rugby in the Ellesmere Sub Union competition.

Currently the club has the following membership:

Registered players 150 comprising of the following teams: Senior Division 3; U18; JAB from 16 years down to Rippers

Committee: President, Vice-President, Secretary, Treasurer and 8 members

Sponsors: 4 Elite Sponsors; 12 Gold Sponsors; 10 Silver Sponsors.

Purpose and Aim: To facilitate and provide club rugby competition for all age groups to participate in. Also providing representative opportunities.

	Committee Meetings: The following group position was minuted at a recent committee meeting and are the vies of the club committee who represent the Leeston Rigby Football Club. Group position: The club committee fully endorse the Leeston Community Committee Submission - please refer to this submission. It make sense to have community faculties in and around a large green space. This opens up opportunities and potential relationships between clubs and organizations to continually improve and get the best use out of car parks, toilet facilities, green spaces by providing a central community hub. This option has the greatest opportunity to provide buildings which are efficient and effective to construct now, but can be added to in the future (easily & cost effective) in response to community growth - a more sustainable approach to building community facilities in the long term. The Leeston Rugby Football Club envisage using the community center for our after match functions due to our own facilities being substandard. A community center which accommodated up to 150 people would be of adequate size. There is no where in Leeston for sports/and or other clubs to hold functions of a certain size with adequate facilities i.e. like the Lakeside Memorial Hall or the Dunsandel Community Center.
Staff Recommendation	The submission is acknowledged.

Group position: The club committee fully endorse the Leeston Community Committee Submission - please refer to this submission.

All building work to take place at Leeston Park needs to incorporate sports and other activities. These include the cricket club; cycling

	club and running club and as they do not have any access to facilities to support the growth of their sporting codes. The other sporting codes including rugby, netball/tennis currently are using less than adequate facilities which will need upgrading in the near future to accommodate the growth set to increase due to the population growth in Leeston and surrounding area. The current Leeston park is in dire need of an upgrade and The Leeston Rugby Football club would be one of many organization's to benefit from this upgrade so we can continue to provide the Leeston community and surrounding areas with a sporting opportunity for all age groups.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2 and support for the Leeston Community Committee's submission and a multi-sport hub in Leeston.

Comments:	The Leeston Rugby Football Club would like the Selwyn District Council to know that the committee would be open to dialogue re: acquisition of the land and buildings currently owned by the Leeston Rugby Club to further enhance this community hub Whata Rau - Leeston Park.
Staff Recommendation	Staff support this submission and would like to engage with the Rugby Club regarding acquisition of land and buildings and investigate the potential of further developing planning for Whata Rau on this site. The suitability of the site and overall position of the club would need to be more fully understood before commenting further.

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [
Point Number	1082.3
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	I would endorse the Councils Community History Fund, as an incentive to the many groups whose volunteers who go about preserving local history. This fund of $50,000 has been oversubscribed for the past two years. As Council has stated costs have continued to increase, and I

	would like council to seriously think about adding to the fund, to help cover the extra costs the groups are faced with. Power and insurance to name just two. Thanks for your consideration Stuart Brannigan
Staff Recommendation	The Community History Fund is considered adequate for the current level of requests with the number and value of applications as expected and in relation to comparative fund sizes in other community funding pools. Council acknowledges the importance of promoting and protecting heritage as it improves community wellbeing by connecting people and building the identity of Waikirikiri Selwyn. In 2023 Council approved the Selwyn Strategic Heritage Plan 2023-2027. The purpose of the Heritage Plan is to ensure there is a focus on improving support for heritage activities and supporting the work of local history groups and residents who are strongly motivated to collect, protect and enhance local place-based heritage. Council has two community heritage funds available: • Community History Fund which is to support kaitiaki (guardians, conservators, and protectors) communities and community groups for various history projects (and the operating costs of community history groups). • Heritage Protection Fund which is to encourage and assist owners with work required to maintain and enhance heritage buildings in the District as well as work required on protected trees.

The current budgeted SDC option is a nothing-burger and does not reflect our wants. I would rather the money be spent on keeping what we have, at minimal cost. A new build only makes sense if the current build is irreparable, or a repair is all almost the same as a rebuild on the same site.
Staff Recommendation	The submission is acknowledged.

Comments:	Small community deserve to keep their pool. The expense to repair is minor compared to many other projects on the table in Selwyn.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1083.9
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	Given the electorates disapproval of co-gevernance and the current powers granted to Councils under the LGA, I do not have any confidence in these changes.
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognizes the importance of partnerships; building strong partnerships with iwi is vital for Council to fulfill its obligations to the entire community. Te

	Tiriti O Waitangi (Treaty of Waitangi) is a founding document of New Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with iwi, to have any meaning, requires consideration of iwi position and contribution to discussion/debate.
Point Number	1083.10
Category	Activity > Chlorination
Comments:	Not happy with most of it. Definitely against Chlorine and Fluoride in the water.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. Under the Drinking Water Quality Assurance Rules there is a requirement to add a small dose of chlorine to the piped network after treatment. To be able to move to intermittent chlorination (for eligible schemes) an exemption from Taumata Arowai is required. Exemption will only be granted by the regulator if infrastructure and systems can lower risk sufficiently. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies. The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.

Comments:	Having read this page - from what I understand of it, it appears to be a good direction.		
Staff Recommendation	Submission is acknowledged by Council.		
Point Number	1084.5		
Category	Questionnaire > Matters For Community Guidance > Economic Development		
Comments:	A few items of relevance and concern to me as a ratepayer with a property and personal interest in Arthur's Pass village (co-owner of 100 West Coast road, Arthurs Pass): **<u>Dark Sky</u>** There are funds allocated in the 2025/26 budget for Castle Hill Village street lighting and also $1.2m allocated later for dark sky		

	upgrades across Selwyn. To tie in with promoting community and tourism in Arthur's Pass, I submit that funding be assigned earlier for dark sky status for Arthur's Pass village.
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and Council will consider their feedback in strategy action planning. The submitter has encouraged trial of a lights off initiative or dark sky compliant street lighting. Dark sky considerations will be part of the development of Action Plans associated with the Economic Development Strategy.
Point Number	1084.6
Category	Activity > Walking and cycling improvements
Comments:	A few items of relevance and concern to me as a ratepayer with a property and personal interest in Arthur's Pass village (co-owner of 100 West Coast road, Arthurs Pass): **Alpine to Sea Cycle trail** This dovetails well into the Alpine to sea Cycle trail. I fully support this investment, and the sooner the better.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1084.9
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	A few items of relevance and concern to me as a ratepayer with a property and personal interest in Arthur's Pass village (co-owner of 100 West Coast road, Arthurs Pass): **Water System in Arthur's Pass village** I strongly encourage the SDC to provide a permanent solution within the next two years. I also encourage SDC to attend to the apparently significant leaks within the water infrastructure at the village.

Staff Recommendation	The submitters support for water treatment upgrades in Arthurs Pass is acknowledged. As part of the Long Term Plan the final stage of upgrades to the treatment plant have been budgeted for in 2026 to 2029 and will investigate treatment efficiency. Pending the outcome these works may include treatment and storage upgrades. Staff recommendation is to budget for these works as planned in the LTP. Water meters have been installed on all connections in the township to help identify high demand/on property leakage. Network monitoring sites have been installed which monitor pressure (which will help identify leakage) and water quality. Renewal of parts of Council's pipe network have been completed over the last few years. Renewals are prioritised on a district wide basis. Council encourages visible leaks to be reported to Council staff for contractors to assess. This can be done using the snap send solve app.
Point Number	1084.10
Category	Activity > Other Categories identified by Staff > Speed Management
Comments:	A few items of relevance and concern to me as a ratepayer with a property and personal interest in Arthur's Pass village (co-owner of 100 West Coast road, Arthurs Pass): **<u>Arthur's Pass Village speed limit</u>** I encourage the SDC to promote and cooperate in having the speed limit reduced to 30km/h in the village, and for this to be policed using speed cameras. This is for safety of tourists and also for our birds, especially Kea. I volunteer at the South Island Wildlife hospital, and it takes a lot of time and resources to try to rehabilitate an injured bird, and success is never guaranteed. Our taonga (both human and feathered) deserve better protection and slower traffic means less injuries.
Staff Recommendation	Submission is acknowledged by Council. Council has been supportive of and lobbied for lower speed limits through the Arthurs Pass village, however the SH is NZTA responsibility, also the central government is yet to disclose its intentions around setting of speed limits.
Point Number	1084.11

Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	A few items of relevance and concern to me as a ratepayer with a property and personal interest in Arthur's Pass village (co-owner of 100 West Coast road, Arthurs Pass): **Te Reo village signage** I encourage and support the implementation of bi-lingual signage at town and Village entrances.
Staff Recommendation	Submission is acknowledged by Council. There is on-going consideration by Council for Bi-lingual signage and a strategy is required. There is allocated budget for welcome to district/township signs and this will likely include Bi-lingual going forward with a consultation process.
Point Number	1084.13
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	A few items of relevance and concern to me as a ratepayer with a property and personal interest in Arthur's Pass village (co-owner of 100 West Coast road, Arthurs Pass): **Heating and Emergency Planning (AF8) for Arthur's Pass Community Centre.** An upgrade of the heating in the Arthur's Pass Community Centre has funding allocated for 2030/31. This needs to be bought forward to the next financial year, 2024/25. In an alpine environment, suitable heating is very important, not just for those using the Community Centre, but also for the good of the building. Should the Alpine fault go with a bang as predicted, a non-electric form of heating and cooking will be essential for the local Community Response team to care for stranded locals and travellers. I acknowledge that SDC have assisted with various improvements in the last 5 or 6 years. In the 20 or so years prior to that, upgrades and general maintenance of the building was generally carried out by local volunteers at no cost to the SDC. This building was at one time owned by the local Community, but was gifted to SDC ownership in the 1990's (?). Up until last year, the local Community also picked up the power bill at the facility, another saving to SDC. The current fireplace was second hand when it was installed in the 1990's, so doesn't meet any clean air regulations. When SDC consider funding for the Arthur's Pass CC, they should keep in mind, that a lot of improvements have come at no expense to SDC. ***Please make this new fireplace install an absolute priority for the 2024/25 financial year.***

Staff Recommendation	Staff do not support the submission. A significant amount of work has been carried out by Council in recent years in upgrading the building including installation of heat pumps, insulation and new flue for the log burner. A new heating appliance was considered but as this would trigger a Building Consent substantial budgets would be required to carry out compliance works (disabled access toilets, alarm system, accessibility improvements) it did not proceed. The reasons for not proceeding were communicated to the Arthurs Pass Community Association. Staff are of the view that the significant cost of this work is not warranted at this point but have allowed for heating replacement and associated works from 2029-30 (when the existing fire appliance is expected to be at end of life). Staff recommend that the submission to have a new solid fuel heating appliance installed at Arthurs Pass Community Centre is declined but the condition and performance of the existing solid fuel heater is monitored over the next few years.

Comments:	**Question:** Do you support the closure of Sheffield Community Pool? No **Question:** Do you support the continued development of an economic development strategy? No **Comment: Comment: Comment:**		
Staff Recommendation	Submission is acknowledged by Council.		

Point Number	1085.2
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	I do not support the closure of the Sheffield Community Pool. The pool is very important to the community and the school. The pool is important for teaching the kids how to swim in a safe environment.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Submitter Number:	1086	**Submitter:**	Details Withheld
Point Number	1086.2		
Category	Activity > Walking and cycling improvements		
Comments:	The main street, Gerald Street, isn't very wide. As much as I want to see it safer for cyclists as I am a cyclist, its going to make it difficult for vehicles. There doesn't seem to be enough room. Just keep one cycle way going both ways (library side), west side. This leaves the side that has the parking, able to keep their businesses easily accessable for their customers.		
Staff Recommendation	Submission is acknowledged by Council. The need to accommodate all modes is being considered in the design of Lincoln Town Centre.		
Point Number	1086.4		
Category	Activity > Maintenance and Renewals Funding Roading		
Comments:	I suggest large roundabouts at either end, intersection of Birches and James Road, the other intersection at Springs Road across from Lincoln Uni. I think lights at West Belt.		
Staff Recommendation	Submission is acknowledged by Council. Upgrades to intersections are planned and will be completed when available funding allows. Safety considerations are always considered and prioritised according to the perceived risk.		

Point Number	1086.6
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	All of these ideas are made with the aim to reduce spending and anything that isn't completely necessary like lights and new technology should be shelved until the next long term plan.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1086.7
Category	Activity > Other Categories identified by Staff > Debt Levels
Comments:	All planning for Selwyn needs to be reduced to keep our debts down. With everything happening in the world and its instability, it makes sense at this time to be frugle. If you have to be borrowing money to service ongoing costs then it doesn't make good financial sense to borrow excessively. $21.4 million to $46 million is an excessive jump in costs. Aquiring further tenders would be good to brings costs down to a more realistic level.
Staff Recommendation	That the submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.
Point Number	1086.8
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Currently there is a cost of living crisis and some people cant afford a major increase in their rates. Consideration needs to be made for the rate payers.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1086.9

Category	Activity > Lincoln Town Centre Upgrades
Comments:	I have attended three meetings, two meetings with 4 members of staff and still no clearer. Each time Ive asked for a plan or something visual and none of that was possible. It is difficult to comment on the 2019 plan.
Staff Recommendation	As advised at the meetings etc. further to the 2016 concept plans for Gerald St, more detailed plans are being prepared and will be made available for consultation in time.
Point Number	1086.10
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	For environmental reasons where water can drain through the ground, leave some of the areas proposed for parking as grass and with some trees where practical or the grid system, like Halswell Library. Im sure with some creativity there can be some clear indicators as to where people can park.
Staff Recommendation	The submitters suggestion is acknowledged.

Submitter Number:	1087	**Submitter:**	Samantha Wallace
Point Number	1087.2		
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities		
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a shared Hub/Clubrooms built at the proposed new Netball & Tennis facilities based in West Melton. West Melton Netball & Tennis share the vision to provide an inclusive, nurturing & welcoming community focussed environment to develop players of all ages, creating longevity for the clubs and the community. What we are asking for is a Hub to bring our community		

	together to create a sustainable future of Netball & Tennis but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Netball Balls, Gear Bags, Hoops, Training Equipment, Tennis Nets, Tennis Poles, Tennis Balls and Trolleys. The space would require a kitchenette suitable for making Tea & Coffee and Afternoon Tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased

	construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Category	Activity > Planning Further Community Facilities
Comments:	I am putting a submission in for the support of the Greendale residence committee ,in their asking the council to return the day to day running of the Greendale hall/ Parvilian to the community. The previous reserve committee managed the hall/ parvilian very successfully, having a budget and spending within it ,resulting in very low rates of $48 / year. And having low cost to hire the facilities which resulted in good usage of all the facilities. Since the council took over and raised the hire fees , to be unrealistic high for the hall/ parvilian ,the facilities have not been well used. The local residents who paid for the hall / parvilian in the first place, are having to go outside the district to hire sports clubs/ church halls etc for their functions at a realistic cost .
Staff Recommendation	The submission is acknowledged. Council annually reviews fees and charges for services on offer. This exercise is intended to balance the financial burden on rate payers with service users. Fees and charges for these services are generally benchmarked regionally and by taking into account population size and spread. The fees and charges Selwyn Council has set for the likes of community centre bookings, programme / class bookings generally sit in the middle of the comparable councils. Over the next 12 months Council will be reviewing the network of public-facing facilities across the Selwyn District (libraries, community centres, halls, sports centres and pavilions). This work will take a holistic look at all facilities to plan for short, medium and

	longer-term community needs. It is recognised that a number of Council owned halls and centres have an extensive history in Selwyn and it is also recognised that there are some halls / community centres that are now underutilised by the local community and may be facing large costs in maintenance and / or remediation. The review will help Council better understand issues, opportunities and barriers and to consider alternative options for the future. Depending on the facility, options identified in the review may include, but not be limited to, the lease or sale of facility to a community group or organisation, the repurposing of facility from a general public hire facility to a dedicated activity facility for the district, co-location arrangements, etc. The intention of Council's public-facing facilities network plan is to ensure a reasonable and balanced spread across the wider district, with facilities that are relevant to the various communities.

Point Number	1090.2		
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities		
Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a shared Hub/Clubrooms built at the proposed new Netball & Tennis facilities based in West Melton. West Melton Netball & Tennis share the vision to provide an inclusive, nurturing & welcoming community focussed environment to develop players of all ages, creating longevity for the clubs and the community. What we are asking for is a Hub to bring our community together to create a sustainable future of Netball & Tennis but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Netball Balls, Gear Bags, Hoops, Training Equipment,		

	Tennis Nets, Tennis Poles, Tennis Balls and Trolleys. The space would require a kitchenette suitable for making Tea & Coffee and Afternoon Tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	1. Submission to recognise Upper Selwyn Huts as a Historical Site The Mayor says in the Long Term Plan that "we're focussed on looking after what we already have" - how about you look after Upper Selwyn Huts! An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council unanimously determined that 'Hut licences and subsequent renewals are short term and ultimately for a finite period'. At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts. I am submitting to request that this historical significance be recognised and for the Upper Selwyn Huts to be listed as an historical site on the District Plan and for the term for us being here to be extended to protect this history.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Comments:	2. Submission to Include Upper Selwyn Huts on the District Wide Rates for Sewer and Water The reasons being : (a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequent upgrade, the requirement we were told for being put on DWR. (b) We have already paid for the water upgrade. (c) We should not be discriminated against and should be treated like everyone else in the district. We are tired of being treated as separate from the rest of the district and as second class citizens. This treatment is not fair nor reasonable. (d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage. We should also be added to the DWR for Sewer and Water like everyone else. (e) District Wide Rates is already being applied to fund maintenance of sections of the Upper Selwyn Huts Local Purpose Reserve including maintenance of the tennis courts, the reserve's toilets and community library, and mowing around the dwellings. This sets a precedent that DWR can be applied to our settlement. (f) SDC Towards25 LTP Document stated: "The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities." This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table.

	From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston. (g) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community." (h) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Selwyn Huts Future Occupancy Strategy" report dated 04/03/2024. (i) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners. (j) Additionally, we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. Comments:	Castle Hill Village Submission ✏️A garden waste disposal system for the Village
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. There are no immediate plans to establish a permanent green waste drop-off site at Castle Hill as costs to residents of Castle Hill to provide this (in particular transport costs) is prohibitively expensive. Furthermore, an open top skip in a unstaffed facility would invite tipping of construction waste and other bulky waste - contaminating the green waste. Staff have suggested previously that Council would consider assisting the community association with a community hire of a garden chipper once or twice per annum.

Category	Activity > Chlorination
Comments:	The overwhelming majority of Selwyn residents are unhappy with their water being chlorinated and do not wish for fluoride to be added in the future. Both local and central government roles are to represent the people. The previous government failed to do this in regards to water legislation, and local government has a responsibility then to speak for the people it represents. I would like to see SDC advocating for review of water legislation by the new government so that non-chlorinated water is an affordable option for communities that wish to have a chlorine-free water source.
Staff Recommendation	The submitters preference against chlorination of community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1095.8
Category	Activity > Potential Requirements To Fluoridate
Comments:	Also I would like to see the council advocate for a review of the legislation that allows the Director General of Health to direct the council to add fluoride to our water supply. This is an overreach that is not largely supported by the community. It is a disgrace that we (the community) pay to have chlorine (and potentially soon fluoride) added to our water that we don't wish to be there, with only the wealthy being able to afford to filter out the chemicals that they were forced to pay to have added to their water supply.
Staff Recommendation	The submitters preference against fluoridation and chlorination of community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if

	there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies and only budget for fluoridation if directed by the Director General of Health

Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** I think that the current community facilities are more than adequate for the population as it stands and for projected increase in population,in the coming 5-10 years. The cost of the project is a concern, with so little detail available to make an informed decision. Yes the time will come for Leeston to have new civic facilities, but it

	is not NOW. Currently there are only 823 households in the Leeston Urban area with a population of 2,430 inhabitants, which means that rural households outside the urban area will be supporting both new Leeston facilities and their own rural community facilities. We have indirectly supported the development of facilities elsewhere as those populations have increased and all of those new facilities e.g Rolleston and Lincoln are currently available for us to enjoy and use. Leeston is essentially a residential township with little in the way of business/industrial growth projected. Leeston is a commuting township. The needs of the Leeston community will change and evolve as the population increases. I appreciate that build/ development costs will increase, but by waiting we will have the potential for better planned and more suitable facilities to be built, taking into consideration the needs of the community as it evolves. There is scope for some lateral thought in planning for dual community facilities taking our rural communities forward. In summing up my submission, I do not think that the cost of building the immediate planned development will give the wider community what it will need in 5-10 years. A shiny new building for the sake of it and at the cost of it will not best serve our district at large in the future.
Staff Recommendation	The submission is acknowledged. Population growth predictions have been taken into account in relation to this matter.

Comments:	They should have better consolidation process with upper hutt residents.		
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.		
Point Number	1097.4		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	1. Submission to recognise Upper Selwyn Huts as a Historical Site The Mayor says in the Long Term Plan that "we're focussed on looking after what we already have" - how about you look after Upper Selwyn Huts! An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local		

Purpose – Hut Settlement. On 8 May 2019, the Council unanimously determined that 'Hut licences and subsequent renewals are short term and ultimately for a finite period'. At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts.

I am submitting to request that this historical significance be recognised and for the Upper Selwyn Huts to be listed as an historical site on the District Plan and for the term for us being here to be extended to protect this history.

2. Submission to Include Upper Selwyn Huts on the District Wide Rates for Sewer and Water

The reasons being :

(a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequent upgrade, the requirement we were told for being put on DWR.

(b) We have already paid for the water upgrade.

(c) We should not be discriminated against and should be treated like everyone else in the district. We are tired of being treated as separate from the rest of the district and as second class citizens. This treatment is not fair nor reasonable.

(d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage.

We should also be added to the DWR for Sewer and Water like everyone else.

(e) District Wide Rates is already being applied to fund maintenance of sections of the Upper Selwyn Huts Local Purpose Reserve including maintenance of the tennis courts, the reserve's toilets and community library, and mowing around the dwellings. This sets a precedent that DWR can be applied to our settlement.

(f) SDC Towards25 LTP Document stated:

"The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal

	is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities." This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table. From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston. (g) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community." (h) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Selwyn Huts Future Occupancy Strategy" report dated 04/03/2024. (i) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners. (j) Additionally, we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing

	resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1.

	Carry out the landscape improvements to extend the playing fields; replace and upgrade the playground equipment, footpaths, toilet block, lighting and irrigation; and seal the carpark. **Project cost:** Years 1-10: $3.4m **Estimated impact on rates :** Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% * Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2
Point Number	1099.4
Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1099.6
Category	Activity > Lincoln Town Centre Upgrades
Comments:	The improvements to Lincoln Town Centre, especially traffic changes to provide safety for young and old pedestrians and cyclists, should be proceeded with as a priority.
Staff Recommendation	Submission is acknowledged by Council.

Point Number	1099.7
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	The Council decision to incorporate Plan Change 69 into the LTP should not have been made. The Council needs to modify the LTP to emphasise the value of high quality soils in the district, in line with the National Policy Statement on High Quality Soil
Staff Recommendation	The National Policy Statement on Highly Productive Land provides clear direction and parameters for council in considering future housing growth in Selwyn, though was not in place for PC69. The LTP sets a community outcome to protect productive and diverse land.
Point Number	1099.8
Category	Activity > Lincoln Town Centre Upgrades
Comments:	There is an urgent need to upgrade roads and traffic management leading from Lincoln towards Christchurch, especially Ellesmere Road and its intersection with the Lincoln/Tai Tapu Road and the Springs Road/Gerald Street/Ellesmere Junction Road roundabout.
Staff Recommendation	The widening and safety upgrade of Ellesmere Road is included early in the draft LTP. This includes a future roundabout at Edward/Lincoln Tapu/Ellesmere Rd intersection. Traffic signals are included in the upgrade of Gerald St to replace existing roundabout at Gerald/Springs/Ellesmere Junction Road intersection.
Point Number	1099.9
Category	Activity > Other Categories identified by Staff > Road Safety
Comments:	There are dangerous intersections needing better signage on roads around Lincoln. Motorists travelling NW on River Road intending to turn right over the Halswell River Bridge onto Davis Road cannot see vehicles travelling in the 80 kph zone East on River Road and they cannot see the turning traffic. The stop signs on Carters Road for the intersection with Hudsons Road can easily be missed, together with no sight for East travelling traffic on Carters Road of vehicles travelling North on Hudsons Road, leading to the possibility of 100 kph/80 kph collisions.
Staff Recommendation	Submission is acknowledged by Council. Council has an intersection prioritisation framework for upgrades.

	The flashing stop ahead signs are not authorised for wider installation. Alternative upgrades are being installed where appropriate on a priority basis.

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:**		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP		
Point Number	1100.2		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau		

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:**
Staff Recommendation	Submission is acknowledged by Council. [

Category	Activity > Maintenance and Renewals Funding Roading
Comments:	Please focus on fixing and mainting the roads.
Staff Recommendation	Submission is acknowledged by Council. Council continues to optimise the capital and renewal program, within budget constraints, to deliver the best outcomes for the community.
Point Number	1100.9
Category	Activity > Planning Further Community Facilities
Comments:	You can lower levels of services to reduce spending. We suggest the council reduce the opening hours of libraries, community facilities and swimming pools to reduce costs.
Staff Recommendation	The submission is acknowledged. Council regularly monitors usage and demand for services at its public-facing facilities and annually reviews opening hours and associated staffing levels to ensure traffic peaks and flows are well managed. In the current Long-Term Plan there is no proposal to increase opening hours at a public facing facility.

Submitter Number:	1101	**Submitter:**	Alan Miller
Point Number	1101.2		
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts		
Comments:	1. Submission to recognise Upper Selwyn Huts as a Historical Site The Mayor says in the Long Term Plan that "we're focussed on looking after what we already have" - how about you look after Upper Selwyn Huts! An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council unanimously determined that 'Hut licences and subsequent renewals are short term and ultimately for a finite period'. At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts. I am submitting to request that this historical significance be recognised and for the Upper Selwyn Huts to be listed as an historical site on the District Plan and for the term for us being here to be extended to protect this history. 2. Submission to Include Upper Selwyn Huts on the District Wide Rates for Sewer and Water The reasons being : (a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequent upgrade, the requirement we were told for being put on DWR. (b) We have already paid for the water upgrade.		

(c) We should not be discriminated against and should be treated like everyone else in the district. We are tired of being treated as separate from the rest of the district and as second class citizens. This treatment is not fair nor reasonable.

(d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage.

We should also be added to the DWR for Sewer and Water like everyone else.

(e) District Wide Rates is already being applied to fund maintenance of sections of the Upper Selwyn Huts Local Purpose Reserve including maintenance of the tennis courts, the reserve's toilets and community library, and mowing around the dwellings. This sets a precedent that DWR can be applied to our settlement.

(f) SDC Towards25 LTP Document stated:

"The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities."

This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table.

From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston.

(g) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to

	look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community." (h) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't find the full amount. This was proposed in 4.12.4 of the "Upper Selwyn Huts Future Occupancy Strategy" report dated 04/03/2024. (i) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners. (j) Additionally, we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else. Additionally i believe SDC should upgrade what USH already has for sewer so we dont have to spend large amounts of money for infrastructure we are not able to use indefinitely. If we do spend that amount of money we should be able tomstay indefinitely. Climate change hasn't affected us yet and SDC should wait until it is definitely affecting us before deciding our future. The are lots of alternative solutions other than eviction that can counteract future climate change effects such as stop bank changes to redivert the water away from the settlement. SDC are being premature with SDCs reckless finite decisions for this settlement.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Category	Questionnaire > BD1 - Transport - Park and Ride		

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** Please do not take more parking in Lincoln village away, it still has a small town vibe and we can not miss all these parkings with direct access to the shops. Come up with an alternative plan for widening the footpath in front of the stores. Also there is no need for traffic lights in Lincoln. All new developments have a percentage of tax added for road infrastructure, make this available for upgrades to Lincoln, due to new builds
Staff Recommendation	Council has included the funding in the draft LTP for new public car parks in the Lincoln Town Centre to accommodate any removal of on street parking depending on what option is selected. Widening of the footpaths in front of the shops is envisaged. Traffic signals are required to cater for the traffic volumes expected to make these intersections more efficient and safer, including for pedestrians to cross. Developers are required to pay developer contributions that part fund Council transport projects.
Point Number	1104.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau

Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** New Zealand is in an recession we need to repair and use as much as we can, till we in a better financial situation, as everybody has a hard time coping financialy and we need to keep the rates increases as low as possible. This is. not a time for expansion but for doing the best with what we have.
Staff Recommendation	The submission is acknowledged.

Point Number	1107.2		
Category	Activity > Maintenance and Renewals Funding Roading		
Comments:	Hopefully you can fix the 'Patchwork' roads around Rolleston. For a city that wants to be a place of the future, it has 3rd world roads and no one is being held accountable. It's ridiculous paying the amount of rates we do to the richest councit in the country when you can even give us safe local roads to drive on, let alone bike. And I should know as I live on one of those roads. These need to be fixed and made useable and functional instead of just being pieced together.		
Staff Recommendation	Submission is acknowledged by Council. Plans are in place and budgeted to improve the condition of the roading network around Rolleston over the next few years. Improvements to sections of Springs and Brookside Rds are programmed for June.

Category	Questionnaire > Policy Changes > Policy Review - Other		
Comments:	The proposed changesnare acceptable. However, I'm pretty sure SDC as a collective do not understand consultation, communication or transparency towards a community of people who you gladly receive rates from but are quite happy to make homeless with no where to go nor understanding of why they have to go.		
Staff Recommendation	Submission is acknowledged by Council.		

Point Number	1109.4
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	1. Submission to recognise Upper Selwyn Huts as a Historical Site The Mayor says in the Long Term Plan that "we're focussed on looking after what we already have" - how about you look after Upper Selwyn Huts! An 1881 plan shows the reserve on which the huts would come to be established was in existence and by the 1890's at the latest there were huts established there, mainly for fishing and hunting. Given this pre-1900 date, the huts are an archaeological site under the Heritage Pouhere Taonga New Zealand Act. There is a long historic and cultural association with the huts and community over the three centuries of occupation. The Reserve is Crown Land, administered by the Selwyn District Council. In 2015 the purpose was changed (by the Department Conservation) from recreation reserve to Local Purpose – Hut Settlement. On 8 May 2019, the Council unanimously determined that 'Hut licences and subsequent renewals are short term and ultimately for a finite period'. At its 13 March 2024 meeting Council resolved to accept option 2 (of 4 options) and offered Residents a final 15 year term for occupation of their huts. I am submitting to request that this historical significance be recognised and for the Upper Selwyn Huts to be listed as an historical site on the District Plan and for the term for us being here to be extended to protect this history. 2. Submission to Include Upper Selwyn Huts on the District Wide Rates for Sewer and Water The reasons being : (a) We will soon be on the same sewer system as Leeston who pay DWR and we have previously paid for our sewer ourselves and a subsequent upgrade, the requirement we were told for being put on DWR. (b) We have already paid for the water upgrade. (c) We should not be discriminated against and should be treated like everyone else in the district. We are tired of being treated as separate from the rest of the district and as second class citizens. This treatment is not fair nor reasonable. (d) We already pay DWR for Recreation Reserve Rate; General Purpose Rate; Library Charge; Community Centre Rate; Uniform

Annual General Rate; Water Race (Amenity) Rate; Area Board; Swimming Pools; Canterbury Museum Levy; and Land Drainage.

We should also be added to the DWR for Sewer and Water like everyone else.

(e) District Wide Rates is already being applied to fund maintenance of sections of the Upper Selwyn Huts Local Purpose Reserve including maintenance of the tennis courts, the reserve's toilets and community library, and mowing around the dwellings. This sets a precedent that DWR can be applied to our settlement.

(f) SDC Towards25 LTP Document stated:

"The Council is proposing to introduce a new way of funding water and wastewater, community centres/halls and recreation reserves. These services are currently funded through targeted rates and the Council is proposing to meet the costs of these services by introducing standard district-wide rates. Underpinning this proposal is the view that Selwyn should be seen as one integrated district, rather than simply a series of detached townships. The Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the cost to residents should also be consistent. In the case of water and wastewater this proposal will also help keep these services affordable for smaller communities."

This document also has USH specifically listed in the "Proposed district-wide rate for urban water compared with existing targeted rates" table.

From this we conclude there was a clear intention to include USH in the DWR for sewer and water. This is even more relevant now we will soon be on the same sewer system as Leeston.

(g) Buddle Findlay's Legal Opinion dated 04/03/2019 states "We note that the Council has recently tended to move to a model where the costs of provision of network infrastructure (such as waste water infrastructure) are spread across the district (ie under district wide targeted rates). It would go against the trend for the Council now to look to recover the greater costs of continuing to provide water services to the [Upper Selwyn] Huts solely from that community."

(h) Council has already agreed to fund 70% of the sewer upgrade, indicating the district is prepared to pay towards USH sewer upgrade. There is no good reason why the Council couldn't fund the full amount. This was proposed in 4.12.4 of the "Upper Selwyn Huts Future Occupancy Strategy" report dated 04/03/2024.

	(i) The cost and operational charges for the pipeline continue to change so being on the DWR would give the community certainty. It would also mean that if people choose to leave the settlement early the cost will not increase for the remaining owners. (j) Additionally, we also request that our reticulation system be replaced by SDC as they have been responsible for this since 1989 and have had ample time to replace this. Given the reasons above there is no reason why USH Can not be put on the DWR for Sewer and Water like everyone else.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.

Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.
Point Number	1110.4
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	I would like to propose that council helps to move Selwyn Dog Training ground from Foster Dog Park to different, more suitable grounds. Both parties - the club and the users of the dog park - would benefit from it as it's obviously way too small for the dog club and not available enough for the public. Selwyn Dog Training Club has been growing steadily over the years since its beginning 20 years ago and has been very popular for public to attend with their young dogs in domestic training classes. They are one of the biggest clubs in South Island, yet their grounds are one of the worst. Unfortunately, they are not able to maintain their membership numbers due to lack of space, the condition of the grounds and constant harassment from other dog park users who obviously want the club to go elsewhere. Dog population in Rolleston has grown dramatically and the owners do need a 24 access to fully fenced area, there is no doubt. Selwyn Dog Training Club is home to many brilliant dog handlers and their dogs who achieve extremely well in the competition circuit. For example, in 2023, 3 of the 4 Zone4 (NZ is divided in 5 Zones)

	team that represented us at Agility Nationals were from Selwyn. Same the year before. Please, feel free to contact me or Selwyn Dog Training Club to discuss this further.
Staff Recommendation	Staff agree that the current site has limitations in terms of space and conflict with casual use of the dog park especially during events. More dedicated dog friendly areas are needed to service Rolleston and, with the impending development of the District Park on Levy Road there is an opportunity to incorporate dog-friendly spaces and this need has been identified in early planning undertaken to date. Space to accommodate a dedicated area for the Selwyn Dog Training Club needs to be further explored in terms of identifying the best location and how this could be set up and funded. Staff recommend that further investigation is carried out in consultation with the Selwyn Dog Training Club to determine the best future location for the club and what support Council would provide for relocation of activities.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1111.6
Category	Activity > Other Categories identified by Staff > Rates
Comments:	In view of the current economic climate, increases of 16% for the next three years are not feasible. Reports suggest that many households are struggling now - note the large number of Kiwi Saver withdrawals recently which have been attributed to financial difficulties
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1111.7
Category	Activity > Lincoln Town Centre Upgrades
Comments:	. Costly items such as the Lincoln Gerald street upgrade need to be postponed until the economic situation is much clearer, particularly in view of the fact that such programs invariably end up exceeding estimates, often by significant amounts.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1111.8
Category	Activity > Other Categories identified by Staff > Debt Levels
Comments:	The level of borrowing for many projects concerns me - 220% of annual revenue is excessive. Who pays if the council finds that it cannot meet its commitments? The council needs to concentrate on core services at this time, particularly since the cost of roads, sewage etc. according to the councils own document have increased up to 38% in the last three years. What has caused these increases and are they going to continue? If they are, there is even more reason to proceed with caution on sports facilities, community centers, etc.

Staff Recommendation	That the submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.

Comments:	• I strongly support the continuing assistance to Arthur's Pass civil defence and heritage protection.		
Staff Recommendation	Submission is acknowledged by Council.		

Point Number	1112.4
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	• I strongly support the continuing conservation efforts and work of the Council Biodiversity team in Arthur's Pass. • I strongly support the protection of kea and continuation of work on by-laws to protect kea. • Strongly support an increase in support for heritage activities in Arthur's Pass.
Staff Recommendation	Councill environmental staff are working hard to reverse the decline in our native species across the district. They recognize that kea protection efforts need to be supported and focused, and as such staff are engaging with stakeholders regarding the kea feeding bylaw proposal.
Point Number	1112.6
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	• I strongly support the maintenance of the Arthur's Pass community gardens.
Staff Recommendation	Submission is acknowledged by Council. Staff have been working through a process to pick up gardens that have been maintained outside of the reserve maintenance contract and absorb these into the contract. This includes the gardens at Arthus Pass and budgets have been developed to accommodate this minor additional cost.
Point Number	1112.7
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	• I support the covering open gutter on Brake Hill.
Staff Recommendation	Submission is acknowledged by Council. Piping would be very expensive because of the topography. And considering the amount of water coming down the drain, piping may not be our best option. Council staff will review option. No additional work is budgeted at this time.

Point Number	1112.8
Category	Activity > Providing safe drinking water
Comments:	Water Supply: The Arthur's Pass water supply has recently had work carried out. Multiple tanks are in place to give a large amount of storage capacity in times of turbidity of the water at the intake. We have been told multiple times that this tank farm is a temporary solution only. I would like to see this promise of a permanent solution to be in the budget within the next 2 financial years. A permanent solution using a membrane filter alongside the UV treatment and chlorine will take away the need for the bulk of the tank farm currently in place. Please ensure funding is allocated in the 2024/25 or the 2025/26 SDC budget.
Staff Recommendation	The submitters support for water treatment upgrades in Arthurs Pass is acknowledged. During periods of high rainfall, the source water quality deteriorates significantly making treatment systems ineffective. Stored water is needed to continue to supply the village and meet mandatory Drinking Water Quality Assurance Rules. As part of the Long Term Plan the final stage of upgrades to the treatment plant have been budgeted for in 2026 to 2029 and will investigate treatment efficiency. Pending the outcome these works may include treatment and storage upgrades. Staff recommendation is to budget for these works as planned in the LTP.
Point Number	1112.11
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	• Transport: We would like to see specific funding allocated to upgrade the lighting in Arthur's Pass village ASAP to enable the Village to be classified as a dark sky area. As this will involve discussions with Kiwirail, we really need SDC on board to lead those discussions. We note that $1.2m is allocated for district wide dark sky in 2039/40. Please pull some of this allocation forward to allow

	this to happen in the prime Arthur's Pass area in the 2025/26 financial year.
Staff Recommendation	The submitter has suggested a trial of a lights off initiative or dark sky compliant street lighting. Dark sky considerations will be part of the development of Action Plans associated with the Economic Development Strategy.
Point Number	1112.13
Category	Activity > Walking and cycling improvements
Comments:	• I support the construction of a cycle trail to join the two extremes of the Selwyn District. We only need to look at how popular cycle trails are becoming around Aotearoa. This would bring in more tourism and enable new businesses to become established along the proposed route, which traverses from the highest point of the Selwyn District, Arthur's Pass to the lowest point, Te Waihora/Lake Ellesmere.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1112.14
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	• I strongly support the submissions which have been made by Arthur's Pass Association, Kea Conservation Trust and Arthur's Pass Heritage Group. • In particular with respect to kea I request that the following is included in the Plan: • Acknowledgement of organisations protecting kea Organisations that help protect kea in Arthur's Pass include the Arthur's Pass Wildlife

Trust, South Island Wildlife Hospital (SIWH) The Kind Foundation, Forest & Bird.

- Inclusion of kea in the list of Special Features of Selwyn's Biodiversity
  Kea should be added to section 3.2 of the strategy as a special feature of Selwyn's
  biodiversity. Kea Conservation Trust's proposed wording is:
  "Kea (Nestor notabilis) – Threatened – Nationally Endangered. Kea are the only mountain
  parrot species in the world and now number fewer than 5,000 individuals in the wild.
  They occur throughout the mountain lands of the District and are frequently visible in and
  around Arthur's Pass Village, Arthur's Pass National Park and the ski fields."
- Ensuring kea are acknowledged across their range
  Kea should be added to the list of species in the High Country and Foothills landscape
  types as they utilise all of these landscapes as well as in the montane and subalpine
  landscape. Restoration of eastern populations of kea through improved pest control is
  likely to lead to more presence at the margins of the Southern Alps. Pests, lead and human
  interactions should be identified as key threats in all landscape types utilized by kea.
  Information on the locations of kea sightings held by Te Papa Atawhai in
  relation to public conservation land in the District shows that kea have been observed
  from the Main Divide through to the foothills of the Kowai River valley and the upper
  Selwyn River catchment: https://doc-deptconservation.opendata.arcgis.com/datasets/79ea1d1b63fa436ca8702b1d459b4e7f_0/explore?location=-43.306798%2C171.799808%2C11.54
  Similarly mapping of kea caught in Arthur's Pass Village and then released with GPS
  trackers shows that kea travel outside the national park into the surrounding high country
- Action to protect kea

  There should be an action attached to Goal 4 about supporting communities to
  manage interaction with kea, including through the development of a bylaw to ban kea
  feeding on non-conservation land except for a conservation purpose and through
  advocacy to other agencies such as Waka Kōtahi about

	the importance of managing kea-human interactions.
Staff Recommendation	It is noted that the bulk of this submission is related to the draft Selwyn Biodiversity Strategy (for which public submissions closed in mid-January 2024). Councill environmental staff are working hard to reverse the decline in our native species across the district. They recognize that kea protection efforts need to be supported and focused, and as such staff are engaging with stakeholders regarding the kea feeding bylaw proposal.
Point Number	1112.15
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	• I strongly support the Council assisting with the re-opening of Park Headquarters/Visitor Centre.
Staff Recommendation	Submission is acknowledged by Council. Council's Heritage Strategy notes the importance of upgrading this building. Staff understand that DoC are in the process of preparing a business case to support the work needed to advance the re-opening of the information centre at Arthurs Pass. The matter is primarily in the hands of DoC and Council can act in an advocacy role to support the re-opening.
Point Number	1112.16
Category	Activity > Other Categories identified by Staff > Other Water
Comments:	• Stormwater: There is $553,000 allocated in 2025-2027 for underpass flooding. We suspect this is for the subway tunnel leading to the train station. This is often a problem, even more so when it freezes, which causes health and safety issues for passengers on the TranzAlpine train. Before this amount of ratepayers money is spent, I would like SDC to look into whether it is an SDC responsibility or a Kiwirail responsibility.

Staff Recommendation	The submitters request for Council to seek alternative funding mechanisms for stormwater capital upgrades to reduce flood risk to the underpass in Arthurs Pass are acknowledged. Staff recommendation is to further investigate and design these improvements in year 2 of the LTP as planned.
Point Number	1112.17
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	• It seems that Tarahaka o Kaimatau is now the accepted te reo Māori name for Arthur's Pass. Kiwirail have applied that to their signage near the subway tunnel. $700,000 is allocated in 2026/27 for this and other things throughout the Selwyn district. I strongly support the implementation of bi-lingual signage at the Village entrances.
Staff Recommendation	Submission is acknowledged by Council. There is on-going consideration by Council for Bi-lingual signage and a strategy is required. There is allocated budget for welcome to district/township signs, and this will likely include Bi-lingual going forward with a consultation process.
Point Number	1112.18
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	• Hall and Community Centres: An upgrade of the heating in the Arthur's Pass Community Centre has funding allocated for 2030/31. This needs to be bought forward to the next financial year, 2024/25. In an alpine environment, suitable heating is very important, not just for those using the Community Centre, but also for the good of the building. Should the Alpine fault go with a bang as predicted, a non-electric form of heating and cooking will be essential for the local Community Response team to care for stranded locals and travellers. I acknowledge that SDC have assisted with various improvements in the last 5 or

	6 years. In the 20 or so years prior to that, upgrades and general maintenance of the building was generally carried out by local volunteers at no cost to the SDC. Up until last year, the local Community also picked up the power bill at the facility, another saving to SDC. The current fireplace was second hand when it was installed in the 1990's, so doesn't meet any clean air regulations. When SDC consider funding for the Arthur's Pass CC, they should keep in mind, that a lot of improvements have come at no expense to SDC. Please make this new fireplace install an absolute priority for the 2024/25 financial year.
Staff Recommendation	Staff do not support the submission. A significant amount of work has been carried out by Council in recent years in upgrading the building including installation of heat pumps, insulation and new flue for the log burner. A new heating appliance was considered but as this would trigger a Building Consent substantial budgets would be required to carry out compliance works (disabled access toilets, alarm system, accessibility improvements) it did not proceed. The reasons for not proceeding were communicated to the Arthurs Pass Community Association. Staff are of the view that the significant cost of this work is not warranted at this point but have allowed for heating replacement and associated works from 2029-30 (when the existing fire appliance is expected to be at end of life). Staff recommend that the submission to have a new solid fuel heating appliance installed at Arthurs Pass Community Centre is declined but the condition and performance of the existing solid fuel heater is monitored over the next few years.

Comments:	The West Melton Tennis & Netball Club and its members, currently around 300 members combined, would like to make a submission to the council for there to be a shared Hub/Clubrooms built at the proposed new Netball & Tennis facilities based in West Melton. West Melton Netball & Tennis share the vision to provide an inclusive, nurturing & welcoming community focussed environment to develop players of all ages, creating longevity for the clubs and the community. What we are asking for is a Hub to bring our community together to create a sustainable future of Netball & Tennis but also celebrate the history of our clubs achievement and memberships over the years with trophies and photos proudly displayed. The Hub/Clubrooms would require a suitable space to store the following. Netball Balls, Gear Bags, Hoops, Training Equipment, Tennis Nets, Tennis Poles, Tennis Balls and Trolleys. The space would require a kitchenette suitable for making Tea & Coffee and Afternoon Tea which is provided to club members and visiting clubs. A toilet and two changing cubicles. A suitable space to hold club & team meetings. Having a hub for our community to come to connect and build on relationships creating happier, healthier people and stronger communities.
Staff Recommendation	Staff recommend that the application for a Council funded clubrooms for tennis and netball at West Melton Domain is declined and other options utilising spaces and facilities within the existing West Melton Community Centre are explored. The relocation of the Tennis and Netball courts next to the West Melton Recreation and Community Centre as part of the West Melton Domain Master Plan allows further investigation into the utilisation of this existing facility for club use. Meeting rooms 2 and 3 of this facility allow for access to the east from the extended carpark and link closely with the location of the courts. These rooms are able to be accessed without entering the rest of the facility if required. This allows for the outcomes identified in the submission while being financially responsible and maximising existing facility use. Council

	staff would be keen to further engage with both clubs to further understand requirements for club use and storage. The generally applied policy has been not to build club social facilities on reserves and council has made it's future preference for multi-use hubs clear, moving away from a proliferation of buildings on reserves.

Submitter Number:	1114	**Submitter:**	Sharn Nu'u
Point Number	1114.1		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements		
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Carry out the landscape improvements to extend the playing fields; replace and upgrade the playground equipment, footpaths, toilet block, lighting and irrigation; and seal the carpark. **Project cost:** Years 1-10: $3.4m **Estimated impact on rates :** Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% *

Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1114.5
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	I support the retention of a community pool facility in Sheffield.
	I support the preservation of the Sheffield War Memorial.
Staff Recommendation	It is acknowledged that the submitter has selected to close the Sheffield Memorial Pool.
Point Number	1114.6

Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	I support the alternative solution of a cogovernance model to ensure continuity for future generations.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	1114.7
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	I agree so long as the public is informed and there is a consiltation process with the affected communities to ensure opportunities benefit all and not a subset of the demogrphic
Staff Recommendation	It is acknowledged the submitter has selected to progress with the Economic Development Strategy, and Council will consider their feedback in strategy action planning.
Point Number	1114.8
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	The policy changes are "woke" and not beneficial to constituents

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1114.9
Category	Activity > Walking and cycling improvements
Comments:	I strongly disagree with the Alps to Sea cycleway and would rather see budgeted rates money spent on both an indoor events and sports center as well as an awuatoc center for Malvern in Darfield in this LTP period.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1114.10
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	I also strongly believe a thorough review and priortisation of outstanding projects from previous LTPs be undertaken urgently to provide a more accurate rate structure for the next 10 years.
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1114.11
Category	Activity > Other Categories identified by Staff > Consultation Document Feed
Comments:	I feel the information, time frames and processes for this LTP is clunky, unclear and ambiguous, money wasting and time consuming and the council should absolutely consider making it simpler and more engaging with all demographics in the future.
Staff Recommendation	Submission is acknowledged by Council. Staff try their best to do this and would value any additional feedback how we could better achieve this. communications@selwyn.govt.nz

Submitter Number:	1115	**Submitter:**	Ralph Scott
Point Number	1115.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** Delay for now in Lincoln, until funding system resolved, but encourage parking on side streets or quieter roadsides near stops. Not sure of bus routes in Rolleston, but a dedicated park is not necessary if roadside parking near stops is available. Parking doesn't need to be in business centres.		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. On street capacity is limited for long term parking and will not meet the future demand or encourage people to use PT services by having more centralised safe and effective 24/7 facilities. The existing Park N Ride at the Council HQ at Rolleston is well used, including on road parking around the vicinity. Further capacity is available in the unformed area north of Kidman Street used also for the Synlait Park N Ride. Councils Preferred Option a Park N Ride at Lincoln opposite the Lincoln Events Centre is planned for 2026/27. This timed to coincide with a planned increase of direct bus services to the City by Environment Canterbury. Business and shop owners are concerned about the all-day parking around Gerald St by those using current bus services to the city. The proposed Park N Ride will assist in the		

	upgrade of Gerald St by providing for this type of parking at a better location.
Point Number	1115.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park as agreed in our 2021-31 Long-Term Plan and using the current design and layout planned to meet the needs identified by the community. The facility would include a library, council service centre and community centre. **Project cost:** Year 1: $16.01m **Estimated impact on rates (per year):** $44.22 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29

	2029/30 2030/31 2031/32 2032/33 2033/34 Our budgeted option **Comment:**

Comments:	Keep facilities like this local - when enhanced, it should get better patronisation.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1115.8
Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	I encourage greater close relationship with Mana Whenua, but also more positive action by SDC to protect existing areas of native biodiversity, encourage land owners to develop or protect areas of native biodiversity on their land (but retain domain over it). I would like to see SDC to do more to fight invasion by non-indigenous plants & animals to protect what areas we do have.
Staff Recommendation	Council biodiversity staff recognize the importance of working closely with mana whenua and have a demonstrated record in that regard. They also recognize that the first priority for their work is to protect existing biodiversity, as clarified by statutory documents. We work closely with willing landowners and staff are increasingly becoming involved in weed and pest control efforts, across the district. It's vital that suitable funding is available for that work given the threat posed to our native flora and fauna.

Point Number	1115.9
Category	Activity > Other Categories identified by Staff > Community funding /grants
Comments:	On another matter, I would like to see SDC give more financial support to new township/community organisations which have been set up to replace those closed down by SDC. Thios will allow SDC to get better feedback from local representatives on what is wanted or needed in the areas they represent.
Staff Recommendation	Recognised Residents Groups (township/community organisations) can apply for a small annual grant that supports running costs and group projects in the community. In addition to the grants, Residents Groups are encouraged to participate in Council capacity building initatives (at no cost to the participants).

Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:**
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	1120.5
Category	Questionnaire > Matters For Community Guidance
Comments:	**Question:** Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? Yes **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? Yes **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.

Point Number	1120.8
Category	Activity > Other Categories identified by Staff > Consultation Document Feed
Comments:	I believe there are a lot of misconceptions in the community (e.g. new subdivisions around Lincoln, pressure on existing infrastructure) about what SDC are doing in regard to issues, assets, and other matters. Clearer engagement and information provided to individuals and groups would be beneficial.
Staff Recommendation	Submission is acknowledged by Council. Staff are working on making this more accessible. In the meantime the public can access any council meeting either through livestream or as a recording through our You Tube site - https://www.youtube.com/@SelwynDistrictCouncil.
Point Number	1120.10
Category	Activity > Low Nitrate Water Sources
Comments:	Yes, centralising low nitrate water sources would be beneficial.
Staff Recommendation	The submitters preference is for low nitrate water sources. Staff recommendation is to undertake further investigations into centralised sources of low nitrate water as budgeted in the LTP.
Point Number	1120.11
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Comment:** No, I do not believe funding transportation would be beneficial at this time. There needs to be some major societal shifts to see widespread adoption of public transport, but the future is uncertain and this could change in the next ten years.
Staff Recommendation	Submission is acknowledged by Council. The 2020 Greater Christchurch PT Futures Business Case identified that further investment in improved PT services and infrastructure will have positive benefits. This will reduce the use of single occupant private vehicles that in that in turn will reduce emissions and congestion and

	provide people with an affordable transport option.
Point Number	1120.12
Category	Activity > Compulsary organics collection
Comments:	Yes, compulsory organic collection should be implement. Red bins should be collected less frequently to promote less impactful behavior from homes.
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. We're pleased you support the upcoming change. Regarding a reduced collection frequency for general waste, this is something that will be assessed during preparation for the next LTP cycle (2027).
Point Number	1120.14
Category	Activity > Strengthened Partnerships
Comments:	Yes, Mana Whenua should have more representation at decision-making tables. Employing full-time representative to develop a Memorandum of Understand would be a good start.
Staff Recommendation	The submission is acknowledged.
Point Number	1120.15
Category	Activity > Other Categories identified by Staff > Consultation Document Feed
Comments:	Yes, to K, L, M, N, O,
Staff Recommendation	Submission is acknowledged by Council.

Submitter Number:	1121	**Submitter:**	Ken Wragg

Point Number	1121.1
Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding
Point Number	1121.2
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development

	contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:** Why is there not a refurbishment plan for the existing Sports & Recreation Centre?
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1121.5
Category	Questionnaire > Policy Changes > Policy Review - Other

Comments:	The financial policies indicate there will be a doubling of rates for all ratepayers. This is totally unrealistic in the current financial climate. In our personal situation, as farmers, we will be borrowing from the bank to pay the rates as we forecast not to make a profit in the current year and probably next year. (It can be noted that we do not receive water, sewerage disposal, storm water disposal or public transportation.) In 10 years we will be paying 40% of our annual salary in rates. This is untenable and undemocratic. This would be unacceptable if imposed on all ratepayers. We would suggest that the council spends time & money on developing a more equitable rating policy.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1121.6
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	Such a strategy is not necessary for an already economically fast growing region. A waste of ratepayers money.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.

Submitter Number:	1122	**Submitter:**	Louise Carey
Point Number	1122.1		

Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** We need public transport services between Darfield and Rolleston so - Darfield residents can access the bus services from Rolleston to City - to make more accessible public facilities and educational opportunities that are available in Rolleston to Darfield youth.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. Council will be investigating what further PT services could be provided to link the wider district townships together beyond what Environment Canterbury can fund and provide as a Metro service. This would include linking larger townships like Darfield to Rolleston and PT services based there including connections to the City. Council is aware that this needs to cater for younger and older residents to access services that are being consolidated around our main townships like Rolleston and Lincoln.

Point Number	1122.2
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes two indoor courts. **Project cost:** Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million) **Estimated impact on rates (per year):** $19.91 **Funding:** Rates: 57% Development contributions: 43% * **Comment:** It would be short sighted to build only one court. With the roll of DHS and the surrounding Primary schools increasing and general growth of Malvern's population, two (at minimum) indoor courts are needed.
Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.

Category	Questionnaire > BD1 - Transport - Park and Ride		

Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, but only if Council receives co-funding from NZTA Waka Kotahi. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $7.06 Years 4–10: $19.52 **Funding:** Rates: 49% NZTA Waka Kotahi: 51% Our budgeted option **Comment:** we have a functioning train line. Position trains from Rolleston to the City on a regular service 7 days a week. travel time woulld be approx 14mins vs 1hr 20 on a bus
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 1 - Our Budgeted Option using NZTA Waka Kotahi co-funding. The 2023 Greater Christchurch Mass Rapid Transit (MRT) Business Case considered a wider passenger rail service using the existing rail network. This could have merits in the future if combined with a wider regional passenger rail service that also included other Malvern townships too. But with small projected patronage, large investment needed for rolling stock and infrastructure (on a rail network managed by others), and that there is no CBD connection makes this currently not worthwhile.
Point Number	1124.2

Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Build Whata Rau next to Leeston Park using a more standard design that can be easily repeated for other buildings. This building would have the same sized floor space as option 2 and include a cultural narrative in the design. **Project cost:** Year 1: 15.21m **Estimated impact on rates (per year):** $42.01 **Funding:** Rates: 80.5% Development contributions: 19.5% * 2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31 2031/32 2032/33 2033/34 **Comment:**

Staff Recommendation	Submission is acknowledged by Council.
Point Number	1124.7
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	focus on the core tasks assigned to a council.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and holds a view that Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.

Point Number	1124.8
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	sensible changes.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.
Point Number	1124.9
Category	Activity > Other Categories identified by Staff > Rates
Comments:	our rates are increasing at an extroidinary pace, with only mew houses being built. Roads are in poor condition.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1124.10
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	stop opening up liquor and vape shops! Please!
Staff Recommendation	The council does not control what types of commercial activities set up but rather it is market-led. Specialist Vape Retailers have national restrictions on setting up near schools.

Comments:	
	Question: Do you support the closure of Sheffield Community Pool? Yes **Question:** Do you support the continued development of an economic development strategy? No **Question:** Do you support the Council investing in better technology solutions to improve our services to the community? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1127.8
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	My view is that we do not need any changes to the "Significance and Engagement Policy. Nor do we need any "Changes to Financial Policies or to Revenue Policies"
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1127.10
Category	Activity > Low Nitrate Water Sources
Comments:	You need to stop building cycle paths and unnecessary expenditures and focus your budget on HEALTH as a number one priority. This is costing everyone dearly and is the one thing we cannot replace or BUY. Use our money for our benifit as a whole and do not spend our money where it is not needed .The reason we are having a higher risk of contamination is that we are allowing too many cows to put nitrates in our soils and getting the farmers richer and the locals

	poorer in health outcomes, this is unacceptable and needs to change now. ECAN have created the problem so you combined need to fix it at the source of the problem now and not in ten years time and not put the issue on us the ratepayers, who foot the bill, both financially and health wise.
Staff Recommendation	The submitters comment regarding priorities and nitrate sources is acknowledged. Staff recommendation is to undertake further investigations into centralised sources of low nitrate water as budgeted in the LTP.
Point Number	1127.11
Category	Activity > Lincoln Town Centre Upgrades
Comments:	The Lincoln Town Center Upgrades are nonsense at $ 46 million to complete, scrap that plan. The Rural walking and cycling improvements : are exorbitant during a recession and need to be put on hold until the costs of living come down and people can pay their rent and food bills and rates. Priorities need to be made.
Staff Recommendation	Of the $46M for the upgrades that includes improving amenity aspects, $36M is related to core infrastructure works that are necessary anyway to address a failing carriageway and other near end of life assets like kerbing and footpaths. This also includes the signalization of the 4 key intersections necessary to cater for the expected traffic volumes and safety needs.
Point Number	1127.12
Category	Activity > Council's Office Improvements
Comments:	The Property and Assets, councils Rolleston Office improvements needs to be stopped for obvious reasons of over spending.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	1127.13
Category	Activity > Compulsary organics collection

Comments:	We do not need a " Compulsory orgainics kerbside collection" in West Melton we have compost heaps in our gardens and should not have to pay $ 190.00 per year, per home for this unnecessary expenditure.
Staff Recommendation	Kia ora. Thank you for your submission on the LTP 2024-2034. We do acknowledge that this is an additional unwanted burden for those who already compost their own food scraps and garden waste at home. This regulation is outside of Council's control. The Ministry for the Environment has issued a directive that households in all urban areas with a population of greater than 1,000 residents must have a food scraps/organic collection by 1 January 2027. Every Council in New Zealand is obligated under the Waste Minimisation Act to comply with this.
Point Number	1127.15
Category	Activity > Chlorination
Comments:	When will you listen? Why have you not applied for an exemption, by the water regulator for West Melton? Water should at all costs be a priority for health and you are not doing this with our rates to provide a chlorine - free requirement. I propose that you apply for further exemptions for all areas of Selwyn.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1127.16
Category	Activity > Providing safe drinking water
Comments:	Regarding keeping our community informed , concerning, WATER : You have failed miserably for providing safe drinking water, ie chlorination in our water is toxic. The same goes for fluoridation which should never be in our water. It is a toxic substance and has no place in our water. The council has not listened to the cry for safe

	drinking water and continues to pollute it regardless. When will you listen?
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies. The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.

Point Number	1131.9
Category	Activity > Potential Requirements To Fluoridate
Comments:	As for fluoride, another poison (Neurotoxin) ,The US Government National Toxicology Program released a 6 year review on fluoride stating it is harmful, causing a number of medical issues, for one reducing IQ of children. Refer Fluroide Free NZ
Staff Recommendation	The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health

Point Number	1131.10
Category	Activity > Other Categories identified by Staff > Rates
Comments:	To summerise the long term plan, The main purpose of local council is to improve social, economic well being of residents & communities. Increasing rates in a recession, cost of living crisis is not helping the well being of residents .A common sense approach is needed in these times, reducing spending, cutting costs, staff levels . Prioritising what is needed.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and endeavours to keep rates increases to a minimum.
Point Number	1131.11
Category	Activity > Other Categories identified by Staff > Debt Levels
Comments:	To increase the debt level from 160% to 220% is a down right inconsiderate disregard to rate payers, $ 155 million up to $634 million. WHY?.
Staff Recommendation	That the submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.
Point Number	1131.12
Category	Activity > Other Categories identified by Staff > Debt Levels
Comments:	And to add insult, if council defaults on the loan, the lender has the ability to set rates as required to recover sums owed. Why the hell are we borrowing? Who is the council working for if they are not working for the people?
Staff Recommendation	That the submission is acknowledged by Council. The debt is being closely monitored by the Council and is kept at a level that allows sustainable operation across all service areas.

Point Number	1131.13
Category	Activity > Chlorination
Comments:	Drinking water should of been left alone. This is what they call forced medication when a poison like chlorine(used as a chemical warfare agent) is delivered into drinking water. Should not of happened. Now the so called cost to remove at $82.6 million is just Ludicrous, Where does that figure come from?
Staff Recommendation	Under the Drinking Water Quality Assurance Rules there is a requirement to add a small dose of chlorine to the piped network after treatment. To be able to move to intermittent chlorination (for eligible schemes) an exemption from Taumata Arowai is required. Exemption will only be granted by the regulator if infrastructure and systems can lower risk sufficiently. Having obtained an exemption for Rakaia Huts, Council has sought independent advice on the infrastructure upgrades required to obtain exemptions for 17 potentially eligible schemes. Without continuous chlorination, additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1131.14
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	Why change if it works. We should be all treated as the same & not disadvantaged in anyway,regardless of race or religion. Rates remission policies regarding maori freehold land seems to one sided. Why should maori be given special stage with council on decision making, This just carries on with the division within the people
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognizes the importance of partnerships; building strong partnerships with iwi is vital for Council to fulfill its obligations to the entire community. Te Tiriti O Waitangi (Treaty of Waitangi) is a founding document of New

	Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with iwi, to have any meaning, requires consideration of iwi position and contribution to discussion/debate. Council is required by s 108 Local Government Act 2002 to have a policy on the remission and postponement of rates relating to Maori freehold land. When developing this policy staff have considered its position regarding rates postponement and remission based on these legislative requirements.
Point Number	1131.15
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	How about leaving the pool for the local Sheffield community to decide whether to keep it or not
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.
Point Number	1131.16
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	This seems excessive. You can support the business community as much as you can but in the end it comes down to the people having the extra cash to spend.

	At the moment local businesses in Lincoln are facing excessive costs in improving security(cameras / security guard) which in the end could force closures. Its a sign that times are tough for businesses & people that are struggling
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	1131.17
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	Another excessive cost that is not needed. Putting people in the one box, not everyone has the ability to understand and use technology, especially the older generation which is totally unfair.
Staff Recommendation	The cost attributed to Digital is to signal we are serious about implementing efficiency across our organisation using technology. Our objective is to make Council financially sustainable through automation of process whilst providing residents and partners with more efficient services. Council is currently developing a Digital Strategy to provide this direction and budgets for the next LTP.

Comments:	
	Question: Do you support the closure of Sheffield Community Pool? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1133.2
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	The Sheffield Memorial Pool is an important asset to Springfield School students. For many years, senior Springfield School students who can swim confidently in the small Springfield School pool travel to Sheffield Memorial Pool for swimming lessons each summer. The Sheffield Memorial Pool is significantly longer and deeper than the Springfield School pool (12.5m long x 4.86m wide, and a maximum of 1.15m deep). Going to the Sheffield Memorial Pool gives our more competent swimmers experience in swimming out of their depth in a controlled environment. Additionally it provides a longer pool for these students to hone their swimming skills, enabling them to compete at the combined Malvern Schools Swimming sports and Canterbury Swimming sports events. As a School Board it is our responsibility to ensure that every student at the school is able to attain to their highest level of achievement. Access to the Sheffield Memorial Pool gives all our students something tangible to work towards, and for those students that achieve to this standard, going to Sheffield Memorial Pool enables them to further develop their swimming skills. The rationale in the Council's proposal to close the Sheffield Memorial Pool states that the Darfield Pool is only located ten minutes drive away, however for Springfield School tamariki, the additional distance means it would not be possible for us to extend our students in this way, even if the Darfield Pool had capacity.

	New Zealand has a higher fatal drowning rate than other Western nations such as Australia, Canada and the UK (https://www.watersafetynz.org/drowning-insights), and nearly three in ten New Zealanders cannot swim or float in the ocean for more than a few minutes (https://nzsar.govt.nz/assets/Downloadable-Files/2021_22-National-Beach-and-Coastal-Safety-Report.pdf). It is essential therefore that there are sufficient facilities where our children can become competent swimmers. The Sheffield Memorial Pool is a vital facility for our community, and for this reason we strongly oppose the Council's proposal to close the Sheffield Memorial Pool.
Staff Recommendation	It is acknowledged that the submitter has suggested Council not close the Sheffield Memorial Pool, and instead transfer the facility and operations of the facility over to a community organisation of some kind, currently not identified. The Long Term Plan consultation is essentially on the future ownership of Sheffield Memorial Pool by Selwyn District Council. The Council's proposal is to decommission the Pool on the basis that Council sees poor value in continuing to fund and operate the Pool given its design issues, low usage in comparison to other staffed facilities, costs (current and pending) and close proximity to a recently refurbished Council Pool. Council's interest is therefore to no longer own the Pool and to save the Council from further costs related to the Pool. The final staff response will consider Council's position regarding alternative options than decommissioning that still achieve Council's interest.

Point Number	1134.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we:		

	Build three new Park and Ride facilities at Lincoln and Rolleston, and upgrade public transport infrastructure, without NZTA Waka Kotahi co-funding. **Project cost:** Years 1–3: $4.2 million Years 4–10: $11.6 million **Estimated impact on rates:** Years 1–3: $14.41 Years 4–10: $39.83 **Funding:** Rates: 100% **Comment:** Lincoln and Rolleston are essentially outlier suburbs of Christchurch City, as that is where most people work or access big or complex things. The road network will not cope with additional private commuter cars.
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 2 - Fully funded by Council
Point Number	1134.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is*

	earthquake prone and will likely need further significant upgrades to be used from 2035 onwards. **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46 **Funding:** Rates: 100% **Comment:** Libraries have an uncertain future. I don't think they will be necessary or viable in the future. There are signs of that already. Stick to more important SDC functions and limit rate rises
Staff Recommendation	The submission is acknowledged. The increased use of all of Selwyn's libraries and service centres has been taken into account in relation to this matter.
Point Number	1134.3

Comments:	Unelected representatives should not be on boards making decisions for everyone when they are not elected by everyone.
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognizes the importance of partnerships; building strong partnerships with iwi is vital for Council to fulfill its obligations to the entire community. Te Tiriti O Waitangi (Treaty of Waitangi) is a founding document of New Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with iwi, to have any meaning, requires consideration of iwi position and contribution to discussion/debate.
Point Number	1136.12

Category	Activity > Low Nitrate Water Sources
Comments:	Transparency about the safety of the water specifically in regards to nitrates in a way that is easily and readily accessible.
Staff Recommendation	The submitters request for information on nitrate levels is acknowledged. Data on current nitrate levels and maximum acceptable values of Council operated Community drinking water supplies can be found on Council's website at https://www.selwyn.govt.nz/services/water/water-supplies/water-quality-in-selwyn-district/nitrates. Environment Canterbury has undertaken nitrate monitoring in Canterbury Groundwater that can be found on their website. Staff recommendation is to undertake further investigations into centralised sources of low nitrate water as budgeted in the LTP.

Submitter Number:	1137	**Submitter:**	James Steans for Southbridge Smallbore Rifle Club Inc
Organisation:	Southbridge Smallbore Rifle Club Inc		
Point Number	1137.2		
Category	Activity > Other Categories identified by Staff > Club and Recreation Facilities		
Comments:	As the Club Treasurer, I am making this submission on behalf of the fifteen members of the Southbridge Smallbore Rifle Club Inc. This year we celebrate our 100th anniversary, We are a Licenced shooting club with the Firearms Safety Authority New Zealand (FSANZ). The Club is affiliated to Target Shooting New Zealand, as well as the South Island and Ellesmere Associations. Our shooting season runs between early March through till the end of September, and throughout the season the clubs of the Ellesmere Association, (Leeston, Southbridge and Dunsandel) share the hosting responsibilities at their home ranges for a Tuesday night competition. The Leeston Club host shooters on their "home" range located on the Leeston Park grounds. Any redevelopment of the Leeston Park is likely to impact the Leeston Clubs use of their range, and I'm aware there maybe a proposal to demolish the building.		

	Consideration must be given to the cost of demolition and reinstatement of the range versus refurbishing the current building to meet current building codes. The Leeston Smallbore Rifle Club boasts the strongest membership of the Ellesmere Association and they must have a facility within their local area to compete in their chosen sport. Not only does the Club host other Clubs, fostering community relationships, they also provide coaching and mentoring to young up & coming shooters and potential competitors through their hosting of community groups such as their local Scouts, and volunteer Fire Brigade members. The Club fosters a safe and fun environment in which all persons can compete against each other and themselves. A facility for this community sports club must remain to support it's increasing use by an expanding local population. Thank you for your consideration.
Staff Recommendation	Submission is acknowledged by Council. It is suggested that further discussions be held by council staff with the club and opportunities to co-locate with Ellesmere Archery at Osborne Park (See their submission) be investigated as it would seem there would be a number of aspects of the facilities that would align. Having target sports all in one location may also encourage further activation and efficiencies in the long term.

Comments:	Financial Policies - I understand the pressures on the council to meet the expectations of the community for improved facilities and services, as well as maintaining the current facilities and services, and at the same time not allowing the costs to escalate excessively.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1139.13
Category	Activity > Planning Further Community Facilities
Comments:	A key concern for myself and my family is that there is no provision in the Long Term Plan for any dedicated facilities for the performing arts in Selwyn. While there has been great investment in sports facilities throughout the district, there has been no specific provision of performing arts facilities until now, or in the current Long Term Plan. The council are no doubt aware that there has always been a strong community of people involved in those arts in the District. However, the size and diversiy of that community is growing disproportionately faster than even the rapid growth in the District's population. To my knowledge in Rolleston alone, there is a theatre group, three choirs, a brass band, numerous dance groups, bands and individual performers. As well as many businesses offering dance, singing, music and acting training. Most of these have formed within the last 10 years. There are many more such groups acoss the District. The arts community in the District are having to make use of small community halls, cafe's, school halls, auditoriums and even classrooms to meet, rehearse and put on shows. The size, layout and equpiment in these facilities are generally inadequate for the types of performance, and for the increasingly large audiences they are able to attract. This means that many of these groups have to travel outside the District to find suitable facilities. The Council have committed to providing the facilities so that the community can engage in the activities they enjoy without having to leave the district, and to developing the culture and interaction of the community. My family and I, as well as many others, believe that Selwyn District has now reached a size that dedicated performing arts facilities should be provided. To match the investment that has already been made in sports and community facilities. Our neighbouring Districts, Timaru, Ashburton, Christchurch City and Waimakariri, all have such

	dedicated Performing Arts facilities, and are not as dynamic or forward looking as Selwyn. Providing a dedicated Performing Arts facility in the District (and over time a variety of facilities across the District) will allow the existing arts organisations and businesses to grow and increase their connections with the wider community. Will provide the opportunity for new groups and organisations to form, where lack of facilities currently prevents that. It will also mean this can all be done within the District. Provision of such facilities will also be another attraction for people and businesses to visit and move to the District.
Staff Recommendation	The submission is acknowledged. Selwyn District Council will develop an Arts Strategy in 2024. Council supports arts experiences throughout the district by way of, and not limited to, performing arts, events and programmes, permanent and temporary exhibitions, public artworks, live music, and theatre events. New facilities, such as Te Ara Atea and Whata Rau, are designed with the flexibility to accommodate arts experiences.

Comments:	I accept the need to increase the borrowing limits as part of that balance. However, I am concerned that should interest rates remain as high as they have been recently, the cost to service the current and increased debt may drive rates up at unacceptably. What interest rates have been allowed for in the plan, and what are the provisions to minimise the impact of high interest rates on the council rates?
Staff Recommendation	That the submission is acknowledged by Council.

Category	Activity > Other Categories identified by Staff > Bio-diversity
Comments:	1/. I would like to see the larch and birch trees stay at castle hill village as it adds a unique special feel to the village.
Staff Recommendation	Council is concerned with the spread of weed species, such as larch and birch, into the sensitive alpine environments and recognizes the huge efforts of volunteers and cost to agencies to manage wilding pines in the last decade. As such Council is looking to remove those species off its reserves in the village over time and replace them with more suitable species.
Point Number	1140.8
Category	Activity > Maintenance and Renewals Funding Roading
Comments:	3/. The castle rocks area needs an udate in terms of traffic management…turning bay or the likes to make it safer for the masses of vehicles coming and going
Staff Recommendation	The submission relates to aspects that are not the Council's responsibility. NZTA is responsible for state highways.
Point Number	1140.9

Point Number	1141.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** Please publish survey data that prove park and ride facilities are actually required. There is plenty of free parking space in Rolleston and Lincoln.		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. The existing Park N Ride at the Council HQ at Rolleston is well used, including on road parking around the vicinity. Further capacity is available in the unformed area north of Kidman Street used also for the Synlait Park N Ride. Councils Preferred Option a Park N Ride at Lincoln opposite		

	the Lincoln Events Centre is planned for 2026/27. This timed to coincide with a planned increase of direct bus services to the City by Environment Canterbury. Business and shop owners are concerned about the all-day parking around Gerald St by those using current bus services to the city. The proposed Park N Ride will assist in the upgrade of Gerald St by providing for this type of parking at a better location. The Park N Ride facility at Foster Park already a 2023/24 budgeted and approved for construction to cater for demand in the south of Rolleston. With Councils Preferred Option the new Park N Ride facilities at Rolleston are planned for 2029-33, at which time additional capacity will definitely be required to align with the additional PT services planned by Environment Canterbury over this time.
Point Number	1141.2
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2a - Whata Rau
Comments:	**Question:** 2a. Whata Rau - new community facility After consulting with Ellesmere residents during the last Long-Term Plan, we agreed to build a new library and community centre called Whata Rau, next to Leeston Park. This project would provide more community spaces that are needed in the area, and provide a solution for the existing Leeston library and service centre: the current facility is earthquake prone and needs significant repairs or to be replaced. Increased construction costs and land remediation issues mean the costs to build Whata Rau have increased. Given this new information we want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2, 3 and 4 take into account development contributions. Development contributions do not apply to option 1. Do not build Whata Rau. Carry out necessary repairs to the existing Leeston Library & Service Centre building so that it can continue to be used for a limited time instead. *The existing building is earthquake prone and will likely need further significant upgrades to be used from 2035 onwards.* **Project cost:** Year 1: $3.05m **Estimated impact on rates (per year):** $10.46

	Funding: Rates: 100% **Comment:** Why does buildings in NZ do not last as long as in other countries? We think demolition is often the preferred method, but a very costly one. If houses would be built with better quality, they would last longer, which would save money.
Staff Recommendation	The submission is acknowledged.
Point Number	1141.3

Comments:	To Selwyn District Council We (Selwyn Dog Training Club) wish to put forward a submission on the Long-Term Plan for the Selwyn district. We wish to highlight our concerns about the Foster Dog Park in Rolleston and provide recommendations for a dedicated area for dog training and dog sport competition purposes for the Selwyn District. This would also be a new home for Selwyn Dog Training Club and the ongoing services the club provides to its members and the community. Our club has grown since its inception in 2004, particularly in the last 15 years since being based at the Foster Dog Park. We had 157 members in 2023 and our membership continues to grow each year. We have had tremendous support from the Selwyn District Council during these years and we wish to thank the Council for this. Our community 'Canine Good Basics' classes are enjoyed by approximately 80 people each year. These classes are the next step up from puppy classes and are essential for owners of young dogs to learn how to teach their dogs to be good members of the community. Following completion of these classes, anyone can join the club to continue training their dog, whether it be in Canine Good Citizen classes, formal obedience, agility, scent work or rally-O. This type of training gives dogs a job, lessening the likelihood of complaints to the Council regarding noisy and bored dogs. With the unprecedented growth of Rolleston, we now find our club is sitting in the middle of the town, instead of the semi-rural outskirts, competing with a rapidly increasing number of dog owners for the use of the same space. While we understand that Foster Dog Park is a shared space, the restrictions we have with allocated training times and limited weekend bookings will affect the future of the club's growth. We are unable to run spontaneous events such as displays, fundraising events, public have-a-go days, competitions, assessments, seminars and workshops because of these restrictions. Our club members are often harassed by members of the public when the park is closed for our events (12 days per year) and the level of dissatisfaction seems to be rising as Rolleston continues to grow. For our club to be able to run dog-sport competitions, the sports turf needs to be similar to that of a rugby field. These competitions involve human athletes sprinting with many changes of directions at speed to get their dogs around the challenging courses. The dogs are also athletes, jumping, running and turning quickly around the courses. Injuries to both people and dogs happen when the grounds are in poor condition. The grounds at Foster Dog Park are extremely

rutted and uneven because of the heavy use and digging from public dogs. The grass surface is patchy in places and over grown in others where the irrigation is leaking. Unfortunately, because of the poor condition of the grounds, there has been at least two broken ankles and numerous sprain and strain injuries in the last 5 years. While we prefer to host our competitions on our home grounds, we are often forced to move offsite, out of the Selwyn district, at great expense and effort, for safety reasons.

For the weekend competitions that we host, we spend a great deal of time setting up equipment, only to have to take it down at the end of the day so that the dog park can reopen each night. This is not the case for most dog training clubs running championship events over more than one day where the equipment and temporary fencing required for the running of the events can remain in place until event concludes. Also, it is usual for dog-sport events around the country to allow visiting competitors to be able to camp onsite during these events; however, this is not possible at Foster Dog Park.

Another concerning issue that our club has with being located within Foster Dog Park is the sheer volume of dog faeces that is left from public dogs. Our club members pick up a considerable amount of dog faeces before our training classes and competitions can commence. This is not an issue for most dog training clubs in New Zealand because they are not located within public dog parks.

Also, there is a perception from some of the public that their dogs can do anything they like if inside the fences of the dog park, allowing these dogs to interrupt competitions, and training sessions, jump on and play with any dogs (including club members dogs on leash) and dogs allowed to pee on the dog club's equipment. The public knowledge of the meaning of "effective control" is often poor which results in friction when they are asked to control their dogs.

Although the Council has bylaws regarding the immediate removal of dog faeces from public places, an obligation not to create a nuisance or health hazard and the requirement for dog owners to have effective control of their dogs when off leash, it is apparent that public dog park users are not adhering to these, nor is there any evidence of enforcement by Animal Control Officers.

We feel that our club would be better located out of the immediate Rolleston township area, leaving Foster Dog Park to become solely a dog exercise facility with 24-hour access for the residents of Rolleston and the Selwyn district. For our club to remain fully functional in the long term, we envisage our club grounds as being an area of approximately 3–4 hectares that is dedicated for dog training and dog sport competition purposes. Within that parcel of land, we would need a sports turf area of 1 ha (the size and shape of

	a rugby field) for training and competitions, with the rest of the land used for clubrooms and storage containers (relocated from Foster Dog Park), toilets, parking, and room for camping during events (with Council permission). Perhaps there is an existing Council-owned country domain or showgrounds somewhere in the Selwyn district that could be better utilised by a local club such as ours? Thank you for giving us this opportunity to provide this submission and to be heard in support of it. Kind regards Selwyn Dog Training Club
Staff Recommendation	Staff agree that the current site has limitations in terms of space and conflict with casual use of the dog park especially during events. More dedicated dog friendly areas are needed to service Rolleston and, with the impending development of the District Park on Levi Road there is an opportunity to incorporate dog-friendly spaces and this need has been identified in early planning undertaken to date. Space to accommodate a dedicated area for the Selwyn Dog Training Club needs to be further explored in terms of identifying the best location and how this could be set up and funded. Staff recommend that further investigation is carried out in consultation with the Selwyn Dog Training Club to determine the best future location for the club and what support Council would provide for relocation of activities.
Point Number	1142.6
Category	Activity > Other Categories identified by Staff > Parks and Reserves
Comments:	My submission is to propose helping the Selwyn Dog Training Club find a new home. The dog club has out grown it's current location. The increase in the number of dogs using the dog park and the expansion of Rolleston means the dog park is used by so many members of the public, that when the club uses the grounds for training or closes on weekend days for events, it causes friction with those who don't understand the clubs lease and right to use the grounds. The condition of the grounds is also deteriorating with the large numbers of dogs concentrated at the grounds. The public also allow their dogs to dig willy nilly which caused holes that are dangerous for running dogs around agility course.

	The ability for the club to find a new home, would mean the public would have full use of the current dog park and the club could have a space more suitable to the host competition events and training the growing dog sport codes the club offers. The dog club provides valuable training for anyone who wants to train their young dogs to the "Canine Good Basics" level which is a good start to learning how to be a good dog in society. Good dogs are less likely to cause problems for the owners, neighbours and the Council! Having dedicated grounds for the club allows for flexibility for offering these training times. As a club member, it would be nice not to be constantly the "bad" guys in the eyes of the public. I was managing a recent event held at the park and had to deal with several unhappy members of the public who felt strongly enough that the club didn't have any rights to close the park and prevent them from walking their dogs at what ever time they wanted, that they voiced their unhappiness in person. As a member of the dog club, I know the club would love the Council's assistance with finding a new home. We'd love to be able to run competition events that allows camping on site, allows us to leave gear and fences up over a 2 day event, brining more visitors into the area. Thank you for your consideration.
Staff Recommendation	Staff agree that the current site has limitations in terms of space and conflict with casual use of the dog park especially during events. More dedicated dog friendly areas are needed to service Rolleston and, with the impending development of the District Park on Levi Road there is an opportunity to incorporate dog-friendly spaces and this need has been identified in early planning undertaken to date. Space to accommodate a dedicated area for the Selwyn Dog Training Club needs to be further explored in terms of identifying the best location and how this could be set up and funded. Staff recommend that further investigation is carried out in consultation with the Selwyn Dog Training Club to determine the best future location for the club and what support Council would provide for relocation of activities.

Point Number	1145.2
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	1. Historical Value of the Upper Selwyn Huts. I wish to make a submission requesting the historical significance of the Upper Selwyn Huts be recognised and listed as a historical site in the District Plan and the term of the huts be extended for an infinite time to protect this history. Our hut is one of the earlier huts built in the late 1890s and my family has a long historic and cultural association with the huts and community over our 3 generations of occupancy.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Staff recommend that all LTP submissions relating to Selwyn Huts are taken into consideration as part of the ongoing work with Selwyn Huts.
Point Number	1145.4
Category	Activity > Other Categories identified by Staff > Upper Selwyn Huts
Comments:	2. District wide rates I wish to make a further submission that the Upper Selwyn Huts be put on the district wide rates for water and sewer like all other communtites within the Selwyn District. The Council has agreed to fund 70% of the Upper Selwyn Huts sewer upgrade, however the Council acknowledges that where residents across the district receive a similar level of service for key infrastructure, the costs to residents should also be consistent. Given that the Council has recently tended to move to a model where the costs of provision of infrastructure to the network (such as waste water infrastructure) are spread across the district via the district wide rates it would go against the trend for the Council to look to recover the greater costs of continuing to provide water, waste water, and sewage services to the Upper Selwyn Huts solely from that community.
Staff Recommendation	Staff acknowledge this submission. Council has a separate and ongoing process outside of the Long-Term Plan which will inform a decision to be made by Council on 14 Aug 2024 regarding the future Deed of Licence to be offered to Upper Selwyn Hut owners. The new Deed of License will start on 1 Oct 2024 . Council is investing resources to establish a working group to assist owners with the implementation of the decision once it is made. Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Carry out the landscape improvements to extend the playing fields; replace and upgrade the playground equipment, footpaths, toilet block, lighting and irrigation; and seal the carpark. **Project cost:** Years 1-10: $3.4m **Estimated impact on rates :** Included in current rates **Funding:** Rates: 71.4% Development contributions: 28.6% *

	Our budgeted option **Comment:**
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 2
Point Number	1146.3
Category	Questionnaire > BD3 - Malvern Rec and Sports Facility
Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Build a community recreation and sports facility at Darfield that includes two indoor courts. **Project cost:** Year 3: $11.28 million (minus $1.10 million already included in the last Long-Term Plan. Total left to fund is $10.18 million) **Estimated impact on rates (per year):** $19.91 **Funding:** Rates: 57% Development contributions: 43% * **Comment:** Darfield is now the hub of western Selwyn and is only going to need more facilities as it grows and the communitybfacilities in the smaller settlements surrounding it age
Staff Recommendation	It is acknowledged that the submitter has selected Option 3, build the community recreation and sports facility at Darfield that includes two indoor courts. Our budgeted option.
Point Number	1146.4

Category	Questionnaire > Matters For Community Guidance
Comments:	
	Question: Do you support the closure of Sheffield Community Pool? No **Comment: Comment: Comment:**
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1146.6
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	While the pool is now almost 75 years old and nearing the end of its useful life, it would be in the communities interest to maintain the pool, or provide an alternative, until the facilities at Darfield have been developed fully to service the whole western area of Selwyn.
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.
Point Number	1146.9
Category	Activity > Other Categories identified by Staff > District Planning
Comments:	Selwyn is mostly an agricultural production region and with the development of the Central Plains Water scheme and other irrigation is a huge producer of produce. The council should always ensure its decisions do not impact on the ability of our rural sector to keep producing world class food and Fibre.
Staff Recommendation	The council is developing key strategies, including Future Selwyn and Economic Development Strategy that outlines, for example, how important food and fibre is to Selwyn and how we can support them.

Submitter Number:	1147	**Submitter:**	leanne Farrar
Point Number	1147.1		
Category	Questionnaire > BD1 - Transport - Park and Ride		
Comments:	**Question:** You told us you want to see better access to public transport, particularly for our young and elderly residents. So we want to hear from you - should we: Delay building new Park and Ride facilities at Lincoln and Rolleston, and upgrading public transport infrastructure until the next Long-Term Plan when funding options might be more clear. **Project cost:** None **Estimated impact on rates:** To be determined **Funding:** To be determined **Comment:** as Rolleston is mostly hard and stony there is no current need to seal these areas, especially as we are currently in a recession		
Staff Recommendation	It is acknowledged that the Submitter has selected Public Transport Option 3 - Delay and reconsider at next LTP. Park N Ride sites need to provide a level of service that aligns with the increased bus services including bus parks, shelters of sufficient size, secure vehicle parking, bike stands, lighting and all-weather pavement surfacing. They have to be safe and follow CPTED requirements for potential 24/7 use. This type of level of service attracts increase patronage and use of bus services, which is the objective.		
Point Number	1147.2		
Category	Questionnaire > BD2 - Waihora Whata Rau > BD 2b - Leeston Park Improvements		
Comments:	**Question:** We want to hear from you - should we: *Development		

	contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1. Do nothing. Use the existing park facilities and remove or replace old and unsafe items in the park. **Project cost:** Year 1: $143,000 **Estimated impact on rates:** Included in our current rates **Funding:** Rates: 100% **Comment:** After the amount of people who were unhappy with the naming of the Rolleston library i see you have continued to name this new building a Maori name. i think we could all be happy with calling it the Leeston library. i would be happy to see this updated when the council has the cash to pay for it and not to put the district into debt. Library at leeston could be built cheaply and cost effectively then that would be ok. if the community could get together and do the landscaping then that too would save costs and help to create community bonds.
Staff Recommendation	It is acknowledged that the Submitter has selected Leeston Park Option 1
Point Number	1147.3

Comments:	**Question:** We want to hear from you - should we: *Development contributions are collected as developments get underway. This means funds are not always available when a project starts. In the beginning, a project will be loan funded and when development contributions are paid to Council, they are used to help pay back the loan. Impact on rates for options 2 and 3 take into account development contributions. Development contributions do not apply to option 1.

	Do not build a community recreation and sports facility at Darfield. **Project cost:** None **Estimated impact on rates (per year):** None **Funding:** None **Comment:** we have great sports grounds in Rolleston, many rate payers are struggling to pay for power food, petrol, child care and their mortgages in this current economic situation. My daughter who is pregnant wants to take a year off to raise her child and having done the maths she tells me she will be struggling to survive even though her partner is a qualified tradesman and works full time. In times of economical hardship every dollar counts. As when know from the past, often there are big budget blow outs for example the sports stadium currently being built in chch. Sp projests seem to be reasonable in cost blow out and end up costing 2 or 3 times the original budget
Staff Recommendation	It is acknowledged that the submitter has selected Option 1, do not build the community recreation and sports facility at Darfield.
Point Number	1147.4

Staff Recommendation	Submission is acknowledged by Council.

Point Number	1147.7
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	i do not believe that any New Zealander should be treated either with more favour or less favour than another. Everyone should be treated fair and equitably especially in regards to paying rates. Why should Maori freehold land rate payers be entitled to be remitted up to 100% of their rates. We all use the facilities such as water, sewage, libraries, rubbish collection and roading so why are they being treated differently. The local Ngai Tahu iwi are one of the richest tribes in the country maybe we should be asking them to contribute to selwyn and their people, making it a better place for all. Why are you reducing the barriers for Maori freehold land and not for everyone. Treating some races differently or above others is not Fair or Equitable.
Staff Recommendation	Council acknowledges the submission. Council is required by s 108 Local Government Act 2002 to have a policy on the remission and postponement of rates relating to Maori freehold land. When developing this policy staff have considered its position regarding rates postponement and remission based on these legislative requirements
Point Number	1147.8
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	Climate change is not happening, the planet has cycles of heating and cooling and it is actually in a cooler period of history. Scientists have been saying that the oceans will rise since the 1980s and as i have lived in canterby=ury all my life i have not seen any evidence of this here. Climate change is currently about reducing CO2 levels. Co2 is currently only 0.04% of the atmosphere and so has very little effect on the temperature of the planet. If anyone remembers basic high school biology plants need CO2 for their respiration and growth and take carbon dioxide out of the air and release oxygen. If we reduce the levels of carbon dioxide lower to "carbon Zero" we will kill all life on this planet. Science has shown with ice core studies done from Antarctica that here have been periods where there has been much higher levels on CO2 before in history and life on earth has flourished.
Staff Recommendation	SDC’s position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders’ Climate

	Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions.
Point Number	1147.9
Category	Activity > Other Categories identified by Staff > Climate Change & Sustainability
Comments:	i do not consent to money being spent on climate change it is a hoax and anyone supporting it is not remembering basic high school biology. Climate change is now a billion dollar industry touted by scholars and scientist getting pay very large amounts of money....of course they do not want to debunk that which pays them.
Staff Recommendation	SDC's position is that climate change is occurring, and that it is resulting in significant effects both locally and globally. SDC is a signatory to the New Zealand Local Government Leaders' Climate Change Declaration 2017. This being our commitment to develop and implement plans to reduce emissions. The Activity Management Plans within the LTP each specifically identify how they are responding to Climate Change and emissions.
Point Number	1147.10
Category	Questionnaire > Policy Changes > Policy Review - Other
Comments:	We do not need mana whenua and iwi to contribute to all of council decisions, they are not elected by they community and if they want to be involved in decision making i propose they thereby stand as a council member. I feel that this policy is not fair or equitable and may incur further costs to the ratepayers.
Staff Recommendation	The submission is acknowledged. Selwyn District Council recognizes the importance of partnerships; building strong partnerships with iwi is vital for Council to fulfill its obligations to the entire community. Te Tiriti O Waitangi (Treaty of Waitangi) is a founding document of New Zealand and establishes a partnership between the Crown and Maori. This partnership requires us to work together for the collective benefit of all. Partnership with iwi, to have any meaning, requires consideration of iwi position and contribution to discussion/debate.

Point Number	1147.11
Category	Activity > Chlorination
Comments:	Water....majority of ratepayers do not want chlorine in our water especially in rolleston as our water was beautiful and clean. chlorine kills bacteria and bacteria are vital to the life of our bodies eg gut microbiome which is responsible for our physical and metal health and also the soil microbiome which is vital the the health of the earth we live on. chlorine is a poison to our bodies and the soil, a healthier way is to use uv filtration. On page 43 of your document you say that a "small dose of chlorine is added", in my opinion and of other people i know the dose is not a small amount, it is easily detected via smelling and taste, and leaves my skin red and itchy after a shower. The does seems to vary but always is detectable. i read that Taumata Arowai can grant an exemption, i ask that you pursue that please.
Staff Recommendation	The submitters preference for Council to remove chlorine from community drinking water supplies is acknowledged. To move to intermittent chlorination for eligible schemes and obtain an exemption from Taumata Arowai requires infrastructure upgrades at significant cost. Additional monitoring and testing would also be required on an ongoing basis. The estimated cost to move to intermittent chlorination is $82.6m over the LTP period. If implemented there will be an increased risk of community illness if there was a contamination event and chlorine may still need to be used intermittently. Staff recommendation is to reduce risk by continuing to chlorinate our community drinking water supplies.
Point Number	1147.12
Category	Activity > Potential Requirements To Fluoridate
Comments:	Fluoridation is a toxic by-product of the fertilizer industry and is so toxic that if spilled on concrete will eat through if. There isnt any safe way of disposing of it so it is watered down and added to our drinking supply. even though the departing government created a bill say we are to have fluoride added to our water I DO NOT CONSENT. If people want fluoride then they can buy fluoride tablets, toothpaste and mouthwash. fluoride has little effect on teeth strengthening and can cause fluorosis of the bone causing them to become brittle.
Staff Recommendation	The submitters preference to not fluoridate community drinking water supplies is acknowledged. Staff recommendation is to only budget for fluoridation if directed by the Director General of Health.

Point Number	1147.13
Category	Activity > Providing safe drinking water
Comments:	you have a duty to the people of the district for their health and safety, adding toxic chemicals to the water against the majorities wishes is neglecting your duty. Here is your opportunity to stand up for the people and their health...It is a fundamental human right to have clean water. Stand up for the people and for what we all want. Do not let government regulations and pressure stop you from doing what is right.
Staff Recommendation	The submitter comment is acknowledged.
Point Number	1147.14
Category	Activity > Walking and cycling improvements
Comments:	i object to millions spent on cycle ways through out he district when there is a cost of living crisis happening, we cant afford to spend money on these, one must be practical and realise that in the south island 8 months of the year it is too cold or too windy to bike long distances. i agree to short cycle ways be built so children can get to school safely. When making cycleways make them without kerbs like there is in town when makes the roads too narrow and impossible for parking or if you get a flat tyre. Stick to cycleways on one side of the road so there is parking for motorist and safe cycling.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1147.15
Category	Activity > Other Categories identified by Staff > Road Safety
Comments:	i think we need lights at the state highway walkers road/Dunns crossing intersection, it very busy. It needs to be done soon as it is a very dangerous intersection.
Staff Recommendation	The submission relates to aspects that are not the Council's responsibility. This location is subject to a priority upgrade being managed by NZTA
Point Number	1147.16

Category	Questionnaire > BD1 - Transport - Park and Ride
Comments:	
	Comment: no need to update the bus shelters, they seem fine. if it is raining and some people cant stand under a shelter they can bring an umbrella, they will probably need it after they get off the bus anyway.
Staff Recommendation	Submission is acknowledged by Council.
Point Number	1147.17
Category	Activity > Other Categories identified by Staff > Rates
Comments:	Lets Make Selwyn Affordable for People and Families!!
	As you point out in page 45 of your growth demand report the average income lags behind much of the national average. Let make life great here allowing people to enjoy our district and the wonderful service we have here now and plan to build those other projects when we can afford to do so without getting more into debt. In selwyn we are earning on average roughly $6500 less than the average wage. It is very hard to get by and enjoy your life when so much of our money is going on rates for things we dont want. Lets keep it simple and afforable,The cost of new facilities is being carried by people who may not be able to use these facilities ie swimming pools or sports grounds pensioners and those about to retire, who will have little benefit from but will have to pay for them out of a pension that is being squeezed very hard. im sure they would rather have those extra dollars in their pocket so they could chose to travel to rolleston if they choose.
Staff Recommendation	That the submission is acknowledged by Council.
	The Council understands the financial pressures that ratepayers face and the negative impact that the increased cost of living is having on the public. The Council also acknowledges that this trend is not only limited to New Zealand, but is widely spread in many other countries worldwide. The Council endeavours to keep rates increases to a minimum and continue to proactively look for opportunities to minimise costs.
Point Number	1147.18

Category	Activity > Low Nitrate Water Sources
Comments:	$5million spent on investigating the feasibility of getting low nitrate water from one source is a huge cost to the ratepayer, what happens at the end of this sudy in 10 years and we find that the nitrates are now high from that area. Surely if you drilled down deep enough you could access water that has very low nitrate levels and i would think $5 million would cover that and a whole lot more!!
Staff Recommendation	The submitters preference is to investigate low nitrate water sources. Staff recommendation is to undertake further investigations into centralised sources of low nitrate water as budgeted in the LTP.
Point Number	1147.19
Category	Activity > Council's Office Improvements
Comments:	We do not need the current council building to be upgraded, the entrance and chambers are great as they are. Once again still to a budget that is intent on reducing debt and keeping the rates low.
Staff Recommendation	While staff numbers have increased placing pressure on the available office space and meeting rooms at the Councils offices the Council acknowledges the issues that this submission raises.
Point Number	1147.20
Category	Activity > Other Categories identified by Staff > Financial management
Comments:	With such a high expenditure of $166 million for delivering services as per financial strategy why does the council continue to empoly more staff...ie 86 new staff members last year. With the cost of being double the income from rates then a prudent council would look at ways of reducing its costs. One of the biggest cost would be staffing. on this same page the council mentions the cost of living crisis and that we are in a world wide recession. No increase in rates is reasonable in this current crisis. you mention that rates will increase 8.50% per year to cover the increasing costs of all your projects. This means i will be paying in 3 years and extra $1000 per year. i live in a very modest 3 bedroom house that is below the national average value. How does a young family with 2 kids and a large mortage with a higher value property manage?

	Lets make selwyn the most affordable district to live in! People who are can pay their bills, put good food on the tables and can afford a family holiday at xmas is what we want. Pease act sensibility with our hard earned money and reduce your costs.
Staff Recommendation	That the submission is acknowledged by Council. The Council understands the financial pressures that ratepayers face and the negative impact that the increased cost of living is having on the public. The Council also acknowledges that this trend is not only limited to New Zealand, but is widely spread in many other countries worldwide. The Council endeavours to keep rates increases to a minimum and continue to proactively look for opportunities to minimise costs.
Point Number	1147.21
Category	Activity > Strategic Investment Strategy
Comments:	The council is not a business therefore it should not be investing into stocks and businesses such as CORDE and Orion . The council has trouble running the community halls in a way that keeps the community happy. They are not business people they are councilors and their job is to run library's roads water, sewage and community centres. Pay debts, reduce spending and keep rates as low as possible. we will all be happier
Staff Recommendation	That the submission is acknowledged by Council.
Point Number	1147.22
Category	Questionnaire > Matters For Community Guidance > Sheffield Pool
Comments:	can the cost of the up grade be done cheaper. it seems very high. when i went to west melton primary we fund raised and added onto the old pool and it is still in use. People bought a key for the season and that paid for the running of the pool ie cost of chemicals. if the community want it so much can they fund raise half of the cost
Staff Recommendation	It is acknowledged that the submitter has selected to not close the Sheffield Memorial Pool.

Point Number	1147.23
Category	Questionnaire > Matters For Community Guidance > Economic Development
Comments:	i have looked at your report and could not find where the section on the economic development strategy was. i have found your long term plan PDF online very hard to read due to the layout. there are too many large pictures and the writing is too small. my feeling is that businesses do not need a stratagy from the council to make them successful, they probably need less red tape and cost such as consents. All businesses need to be treated equally regardless of race. a business that is free hold maori land needs to pay rates the same as any other business, Rates need to be fair and equitable which means Maori on free hold land need to pay the same as anyone else. it is not fair or equitable otherwise.
Staff Recommendation	It is acknowledged the submitter has selected not to progress with the Economic Development Strategy and has noted Council does not have a role in economic development. As discussed at the Council briefing on March 27 followed by the session on 24 April 2024, Council is involved in and has access to important levers in economic development. The Council has a role in facilitating others and enabling economic development to occur as prosperously as possible to benefit the whole community.
Point Number	1147.24
Category	Questionnaire > Matters For Community Guidance > Digital Solutions
Comments:	there are plenty of computers available for people and if not they can buy their own.
